PAUL LEJAY.

Prudentius (GALINDO), Bishop of Troyes, b. in Spain; d. at Troyes on 6 April, 861; celebrated opponent of Hincmar in the controversy on predestination. He left Spain in his youth, probably on account of the Saracen persecution, and came to the Frankish Empire where he changed his native name Galindo into Prudentius. He was educated at the Palatine school, and became Bishop of Troyes shortly before 847. In the controversy on predestination between Gottschale of Orbais, Archbishop Hincmar of Reims, and Bishop Pardulus of Laon, he opposed Hincmar in an epistle addressed to him. In this epistle, which was written about 849, he defends against Hincmar a double predestination, viz. one for reward, the other for punishment, not, however, for sin. He further upholds that Christ died only for those who are actually saved. The same opinion he defends in his "De prædestinatione contra Johannem Scotum", which he wrote in 851 at the instance of Archbishop Wenilo of Sens who had sent him nineteen articles of Eriugena's work on predestination for refutation. Still it appears that at the synod of Quierzy, he subscribed to four articles of Hincmar which admit only one predestination, perhaps out of reverence for the archbishop, or out of fear of King Charles the Bald. In his "Epistola tractoria ad Wenilonem", written about 856, he again upholds his former opinion and makes his approval of the ordination of the new bishop Æneas of Paris depend on the latter's subscription to four articles favouring a double pre-

destination. Of great historical value is his continuation of the "Annales Bertiniani" from 835-61, in which he presents a reliable history of that period of the Western Frankish Empire. He is also the author of "Vita Sanctæ Mauræ Virginis" (Acta SS. Sept. VI, 275-8) and some poems. At Troyes his feast is celebrated on 6 April as that of a saint, though the Bollandists do not recognize his cult (Acta SS. Apr. I, 531). His works, with the exception of his poems, are printed in P. L., CXV, 971-1458; his poems in Mon. Germ. Poetæ Lat., II, 679 sq.

MICHAEL OTT.

Prüm, a former Benedictine abbey in Lorraine, now in the Diocese of Trier, founded by a Frankish widow Bertrada, and her son Charibert, 23 June, 720. The first head of the abbey was Angloardus. Bertrada's grand-daughter was Bertha, wife of King Pepin (751-68), and Prüm became the favourite monastery of the Carolingians and received large endowments and privileges. Pepin rebuilt the monastery and bestowed great estates upon it, 13 August, 762. The king brought monks from Meaux under Abbot Assuerus to the monastery. The church, dedicated to the Saviour (Salvator), was not completed until the reign of Charlemagne, and was consecrated, 26 July, 799, by Pope Leo III. Charlemagne and succeeding emperors were liberal patrons of the abbey. Several of the Carolingians entered the religious life at Prüm; among these was Lothair I, who became a monk in 855. His grave was rediscovered in 1860; in 1874 the Emperor William I erected a monument over it. In 882 and 892 the monastery was plundered and devastated by the Normans, but it soon recovered. The landed possessions were so large that the abbey developed into a principality.

At times during the eleventh and twelfth centuries the monastery contained over three hundred monks. The period of its internal prosperity extends to the thirteenth century. The monks were energetic cultivators of the land. About 836 Abbot Marquard founded a new monastery, Münstereifel; in 1017 Abbot Urald founded at Prüm a collegiate foundation for twelve priests; in 1190 Abbot Gerhard founded a house for ladies of noble birth at Niederprüm. The monastery cared for the poor and sick. Learning was also cultivated. Among those who taught in the school of the monastery were Ado, later Archbishop of Vienne (860-75). Another head of the school, Wandelbert (813-70), was a distinguished poet. Abbot Regino (893-99) made a name for himself as historian and codifier of canon law. Cæsarius of Heisterbach is only brought into the list of authors of this monastery by being confounded with Abbot Cæsarius of Prüm (1212-16). In the thirteenth and fourteenth centuries the monastery declined, partly from the oppression of its secular administrators, but more from internal decay. It reached such a pass that the monks divided the revenues among themselves and lived apart from one another. Consequently the archbishops of Trier sought to incorporate the abbey in the archdiocese. In 1376 Charles IV gave his consent to this, as did Boniface IX in 1379, but the pope's consent was recalled in 1398; Sixtus IV about 1473 also gave his approval to the incorporation. But the abbots refused to submit and even in 1511 carried on war against the archbishop. Finally, when the abbey was near ruin, Gregory XIII issued the decree of incorporation 24 Aug., 1574, which was carried into effect in 1576 after the death of Abbot Christopher von Manderscheid. After this the archbishops of Trier were "perpetual administrators"

of the abbey. The abbey was now brought into order within and without, and once more flourished to such a degree that the two archæologists Martène and Durand, who visited the monastery in 1718, state in their "Voyage littéraire" that of all the monasteries in Germany Prüm showed the best spirit, and study was zealously pursued. The monks made efforts even in the eighteenth century to shake off the supremacy of Trier.

In 1801 Prüm fell to France, was secularized, and its estates sold. Napoleon gave its buildings to the city. Since 1815 Prüm has belonged to Prussia. The church, built in 1721 by the Elector Louis, is now a parish church. The monastic buildings are now used for the district court and the high-school. The sandals of Christ are considered to be the most notable of the many relics of the church; they are mentioned by Pepin in the deed of 762. He is said to have received them from Rome as a gift of Pope Zacharias or Pope Stephen.

KLEMENS LÖFFLER.

Prusa. See BRUSA.

Prusias ad Hypium, titular see, suffragan of Claudiopolis in the Honoriad. Memnon, the historian, says that Prusias I, King of Bithynia (237-192 B. C.), captured from the Heracleans the town of Kieros, united it to his dominions and changed its name to Prusias ("Frag. histor. Graec.", coll. Didot, frag. 27 and 47; fragment 41 treats of Kios or Guemlek, also called Prusias, and not of Kieros, as the copyist has written; this has given rise to numerous confusions). Pliny (Hist. nat., V, 43) and Ptolemy (V, i, 13) merely mention it, one below Mt. Hypius, the other near the River Hypius or Milan-Sou. Several of its bishops are known: George (not Hesychius, as Le Quien says), 325; Olympius in 451; Dometius in 681; Theophilus in 787; Constantine in 869; Leo in 879; St. Paul, martyred by the Iconoclasts in the ninth century (Le Quien, "Oriens christ.", I, 579). It is not known when this see disappeared, which still existed in the tenth century (Gelzer, "Ungedruckte . . . Texte der Notitiæ episcopatum", 554). The ruins of Prusias are found to-day at the little Mussulman village of Eski Bagh or rather Uskub in the *caza* of Duzdjé and the vilayet of Castamouni. The region is very rich, especially in fruit trees. Ruins are still seen of the walls and the Roman theatre forty-six miles in circumference.

S. VAILHÉ.

Prussia.—The Kingdom of Prussia at the present time covers 134,616 square miles and includes about 64.8 per cent of the area of the German Empire. It includes the greater part of the plain of northern Germany and of the central mountain chain of Germany. With exception of the small Hohenzollern district, the original domain of the Prussian royal family, it does not extend beyond the Main. However, in a south-westerly direction west of the Rhine it includes a considerable portion of the basin of the Saar and of the plateau of Lorraine. All the large German rivers flow through it, and it contains the greater part of the mineral wealth of Germany, coal, iron, salt, and potash. Of the area devoted to agriculture over 2.5 per cent are used for the cultivation of grain as follows: 25.91 per cent for rye, 15.37 per cent oats, 6.86 per cent wheat. In 1905 the population was 37,282,935, that is 61.5 per cent of the population of the German Empire. The annual increase of the population is about 1.5 per

cent, but this results from the decline of emigration and the decrease of the death-rate. In 1905 about 11.5 per cent were Slavs, of whom 8.887 per cent were Poles. In religion 63.29 per cent were Protestants, 35.14 per cent Catholics, 0.13 per cent Jews. In 1895 34.18 per cent of the population was employed in agriculture, 38.7 per cent in manufactures. About one-half of all the manufacturing industries are carried on in the provinces of the Rhine, Westphalia, and Silesia. It is only since 1866 that Prussia has had its present area, and not until 1871 did it become the ruling state of Germany. Its present area and power are the result of a gradual development extending over more than seven centuries.

I. The beginnings of the state are connected with the bloody struggles and with the wonderful cultural and missionary labours by means of which the territories on the Baltic between the Elbe and Memel were wrested in the twelfth and thirteenth centuries from the Slavs and won for Germany and the Catholic Church. In this era the region on the Vistula and the Pregel Rivers, which originally was the only part of the territory bearing the name of Prussia, was conquered by the Teutonic Knights in 1230 and converted to Christianity. In 1309 the Grand Master of the order transferred his residence to the Marienburg, a castle noted for its artistic importance, which has been restored by the Emperor William II. The order and the region ruled by the order attained their highest development in the years succeeding this, especially under the government of Winrich of Kniprode (1351-82). Pomerania, the district along the coast to the right and left of the mouth of the Oder, continued to be ruled by its dynasty of Slavonic dukes, nevertheless it was also under German influence and was converted to Christianity in the first half of the twelfth century by St. Otto of Bamberg. The inland territory between the Elbe and Oder, and the region drained by the Warthe and Netze, first called the Electorate of Brandenburg and the New Mark, were acquired from 1134 onwards by the Ascanian line, which also had possessions in Saxony. Before long this line also gained the feudal suzerainty over Pomerania. In all three districts the Teutonic Knights, who carried on wars and colonized at the same time, had the principal share in reconstructing the political conditions. The Cistercian Order had also a large part in the peaceful development of civilization; the order founded flourishing monasteries beginning at Lehnin, and Chorin and extending as far as Oliva near Danzig, and Christianized the natives. In all these territories, though, numerous German cities were founded and German peasants were settled on the soil.

After the extinction of the Ascanian line in 1320 the Electorate of Brandenburg became a possession of the Bavarian House of Wittelsbach, and in 1373 of the House of Luxemburg. Under the new rulers the government and the country greatly declined and the nobility ruled with an iron hand. In order to restore order the last member of the Luxemburg line transferred Brandenburg, at first temporarily, then on 30 April, 1415, as a fief to Frederick of Hohenzollern. This was the birthday of the future great state of Prussia, for Prussia has not become a great power from natural, geographical, or national conditions, but is the product of the work of its kings of the House of Hohenzollern. Frederick I probably desired to make Brandenburg a great kingdom on the Baltic for himself; however, he limited himself to crushing the power of the nobles and then devoted his attention again to imperial affairs. During the next two centuries his descendants did not do much to increase the power of Brandenburg, and they never attained the power of the last members of the Ascanian line. The most important event was the "Dispositio Achillea" of 1473, by which Brandenburg was

made the chief possession of the Hohenzollern family and primogeniture was established as the law of its inheritance.

Of the Hohenzollern rulers of the fifteenth and sixteenth centuries only Frederick II (1440-70) and Joachim I Nestor (1499-1535) were men of any prominence. They were more successful in internal affairs than in the endeavour to extend the size and importance of their realm. Frederick II separated the towns of Brandenburg from the Hanseatic League, and forced them to become a part of the territory of Brandenburg. He also brought the clergy under the power of the state by aid of two Bulls of 1447, which he obtained from Pope Nicholas V, and laid the foundation of the later State Church system established by his family. His efforts to enlarge his territories were checked by the rapid development of the power of Poland at this time, which was followed by the rising importance of Hungary. The result was that all the German possessions along the coast of the Baltic were endangered; and the greater part of the territory of the Teutonic Knights, comprising the region of the Vistula, was conquered together with Danzig by the Poles after two wars: in the war of 1410-11 the Teutonic Knights were defeated by the Poles at the battle of Tannenberg; this was followed by the First Peace of Thorn; after the war of 1456-66 came the Second Peace of Thorn. The Poles also took part in the war which Frederick II waged with Pomerania over the possession of Stettin. When Frederick's nephew and successor sought compensation for Stettin in Silesia, he was opposed by Hungary and had to retire there also.

As ruler Joachim I was even firmer than Frederick II. During his administration the nobility were forced to give up their freebooting expeditions. Following this example the ruling family of Pomerania, of which the most important member of this era was Bogislaw X (reigned 1478-1524), put an end to the excesses of the Pomeranian nobility also. In the provinces along the Baltic the nobility had then a force of armed men at their disposal probably equal to similar forces of the princes. Thus, for example, a family called Wedel had so many branches that in the sixteenth century it could at one time reckon on two hundred men among its own members capable of bearing arms. When these rode out to war with their squires and mounted men they formed a body of soldiers, which, owing to the scarcity of money, was difficult for the ruling princes to meet. Both in Brandenburg and Pomerania the establishment of order was followed by an improvement in the laws and the courts, and by a reorganization of the administration. This latter brought about the gradual formation of a class of civil officials, who had in part legal training, and who were dependent not on the nobility but on the ruling princes. The beginnings were also made of an economical policy. Joachim I sought to turn to the advantage of the Hohenzollerns the fact that the Wettin line ruling in Saxony, which up to that time had been of more importance than the Hohenzollerns, had paralyzed its future development in 1485 by dividing its possessions between two branches of the line. These two dynastic families, Wettin and Hohenzollern, were active competitors for the great spiritual principalities of the empire. In 1513 Joachim's brother Albrecht became Archbishop of Magdeburg and Bishop of Halberstadt, and in 1514 Archbishop of Mainz. At the same time another member of the Hohenzollern family, one belonging to the Franconian branch of the line, became Grand Master of the Teutonic Order, that is, he was the ruler of that portion of Prussia which still belonged to the order. In 1525 he brought about the secularization of the territory of the order, and made it a permanent possession of his family; in return for this, however, he was obliged to acknowledge the

feudal suzerainty of Poland. Joachim was unable to maintain his claims to the right of succession on the extinction of the Pomeranian dukes, but had to give up the claim to feudal supremacy (Treaty of Grimnitz, 1529).

Of all the ecclesiastical principalities, Joachim's successors were able to retain Magdeburg alone, and this only to the end of the century. In Prussia (1569) they obtained the right to joint feudal possession, and thus gained for the main branch of the family a claim to the Duchy of Prussia. Taken altogether, however, the Hohenzollern power declined very decidedly. The ruling branch in Brandenburg was badly crippled by debts, and the last member of the line ruling in Prussia was weak-minded. This enabled the Estates, which had rapidly developed in all German territories from the second half of the fifteenth century, to obtain great influence over the administration, both in Prussia and Brandenburg. This influence was due to the fact that the Estates, owing to their possessing the right of granting the taxes, were equivalent to a representative assembly composed in part of the landowners, the nobility, and the clergy, and in part of the cities, who controlled considerable ready money. At first the nobility was the most powerful section of the Estates. In order to keep the nobles well-disposed the ruling princes, both in Brandenburg and Prussia, and also in Pomerania, transferred to them the greater part of the princely jurisdiction and other legal rights over the peasants, so that the feudal lords were able to bring the peasants into complete economic dependence upon themselves and to make them serfs. As a result the influence of the nobility constantly grew. But as the nobles were men without breadth of view, and in all foreign complications saw the means of reviving the power of the princes and of imposing taxes, the strength of the three Baltic duchies waned equally in the second half of the sixteenth century. None of them seemed to have any future.

II. At this juncture the head of the Franconian branch of the Hohenzollern family, George Frederick of Ansbach-Bayreuth, persuaded the Brandenburg branch of the family to enter upon a far-reaching policy of extension which, in the end, resulted in leading the dynasty and the state over which it reigned into an entirely new path. Influenced by George Frederick, John George of Brandenburg (1571-98) strengthened his claim upon Prussia by marrying his daughter to the weak-minded Duke of Prussia, and secured for himself by another marriage a new reversionary right to the Duchy of Cleve-Jülich, the ruling family of which was nearing extinction. Up to this time Prussian policy had been entirely directed to gaining control in eastern Germany, and this marriage was the first attempt to make acquisitions in western Germany. During the reign of John Sigismund (1608-19) the ducal line of Cleve-Jülich became extinct in 1609, and in 1618 that of Prussia. Of the possessions of Cleve-Jülich, however, Jülich and Berg were claimed by the Wittelsbach family, and Brandenburg was only able to acquire Cleve and a few adjacent districts (1614); even the hold on this inheritance was for a long time very insecure. On the other hand Prussia was united with Brandenburg without any dispute arising because Poland in the meantime had become involved in war with Gustavus Adolphus and was obliged to act with caution. At about the same time the ducal House of Pomerania was nearing extinction, so that all at once the state ruled by the Hohenzollerns seemed to approach a great extension of its territories.

In 1613 John Sigismund became a Calvinist, a faith at that time which had a great attraction for all the energetic and ambitious among the German Protestant princes. The ruler of Brandenburg and Prussia became the son-in-law of the leader of the

Calvinistic party, the Elector Palatinate, and his daughter married Gustavus Adolphus of Sweden. However, on account of the great power which the Estates had acquired in his dominions John Sigismund was not able to undertake a vigorous policy. The Estates were strongly opposed to his adoption of Calvinism, and his promise to leave the Lutheran Confession undisturbed hardly satisfied them, nor were they willing to grant any money for his external policies. On account of these financial difficulties his successor, George William (1619-40), during the Thirty Years' War, came near losing the territories just inherited; and he was not able to make good his claims to Pomerania when, in 1637, his right of inheritance was to be enforced. It became evident that the power of the Estates must be crushed and the people forced to pay their taxes regularly, before the Hohenzollerns could obtain firm possession of their newly acquired domain, establish their authority in Pomerania, and then build up their power in the Baltic coast lands in the valleys of the Oder and Vistula. George William's chief adviser, Count Adam von Schwarzenberg, recognized this and made the attempt to carry out this policy; from 1637 he was engaged in a severe struggle with Sweden, to prevent the Swedes from taking possession of Pomerania.

The merit of finally carrying out this policy and of turning the small and far from cultured state into a strong instrument for political and military aggression belongs to the Great Elector, Frederick William (1640-88), and to his grandson, King Frederick William I (1713-40). In 1644 the Great Elector laid the foundation of the standing army with the aid of which his successors raised Brandenburg-Prussia to its leading position; Frederick William I increased the standing army to 83,000 men. In order to procure the resources for maintaining his army the Great Elector gradually reorganized the country on entirely different principles, and did his utmost to further the prosperity of his people so as to enable them to bear increased taxation. His grandson continued and completed the same policy. At this period a like internal policy was followed in all the states of the German Empire, including the larger ones. Nowhere, however, was it carried out in so rational and systematic a manner as in Brandenburg-Prussia, and nowhere else were its results so permanent. In this, not in its originality, consists the greatness of the political achievement of the Hohenzollerns. The Estates and their provincial diets were not opposed and put down on principle, but they were forced in Prussia and Cleve to grant what was needed for the army; the cities were then subjected to a special indirect taxation (excise duties), and in this way were withdrawn from the government of the Estates. The nobility, now the only members of the Estates, were subjected to personal taxation by reforms in the existing system of direct taxation, by the abolition of the feudal system, and especially by the introduction into Prussia of the general taxation of land. At the same time the control that the Estates had acquired over the collection and administration of the taxes was abolished, and the assessment and collection of the taxes was transferred to the officials of the Government, who had originally charge only of the administrative and commissariat departments of the army. All these officials were placed under a central bureau, the general commissariat, and a more rigid and regular state system of state receipts and expenditures was established. Among the changes were the founding of the exchequer, the drawing-up of a budget, which was prepared for the first time in 1689, and the creation of an audit-office. Moreover, there was a stricter regulation of the finances in every part of the Government, and an extension of the supervision of every branch of the administration by the fiscal authorities so as to include even the independent departments of the state, the result being

that these bodies, especially the cities, were actually ruled by these officials.

These reforms reached their culmination in the founding of the "General Directory", at Berlin, and of the Boards of War and Finance in the provinces in 1721. The result was that the entire official life of Prussia became bureaucratic, and financial considerations had the preponderating influence in the internal administration of the country, as is still strikingly noticeable. Those departments of national administration that yielded little revenue, or were apt to cost more than they could be counted upon to yield, were for the present neglected, or in part still left under the control of the Estates, in those cases where the Estates had acquired the supervision of them; such were, above all, the administration of law, ecclesiastical affairs, and the schools. On the other hand great attention was given to improving economic conditions, and gradually all the measures were used in Prussia that the genius of a Colbert had planned during the reign of Louis XIV to raise France to the place of the first power in the world. Accordingly the population was increased by encouraging the immigration of the Dutch, Huguenots, and finally of the Protestants, who were driven out of Salzburg. Much also was done to improve the soil and the breeding of cattle. In agreement with the prevailing principles of economics, i. e. as much money as possible should be brought into the country, but that its export should be prevented, manufacture and commerce were to be stimulated in every possible way. The Great Elector even established a navy and also founded colonies on the African Gold Coast; in 1717 Frederick William I sold the colonies. Many excellent officials were drawn from other countries to aid in the administration. However, the ruling prince was the centre of the Government. The result of this was that, as early as the latter years of the reign of the Elector, the principal boards of administration and the ministers presiding over them sank more and more into mere tools for carrying out the will of the ruling prince, and decisions were made, not in the boards, but in the cabinet of the prince. This method of administration became completely systematized in the reign of Frederick William I; consequently it is customary to speak of the cabinet government of Prussia. This form of administration was maintained until 1806.

The success of the organizing energy of the ruling princes was so evident that even before the end of the seventeenth century Leibniz said: "This country is a kingdom in all but name." The lacking name of kingdom was given to the country when Frederick I (1688-1713), the son of the Great Elector, crowned himself on 18 January, 1701, at Königsberg, with the title "King in Prussia", meaning of the former duchy. As long as the development of the internal strength of the country was backward there was little chance of gaining any important additions of territory, even though the great wars of the period made such efforts very tempting. The Great Elector was a man of uncontrolled and passionate character, and of much military ambition; it was very hard for him to let others reap where he had sown, for he had taken part in nearly all the wars of his era. Frederick William I also was alive to his country's glory, but was more inclined to prepare for war than to carry it on; in many respects his character recalls that of the later William I. In this period the chief object of the foreign policy of the Hohenzollerns was to increase their possessions along the Baltic. Above all they desired to own Pomerania, which Sweden retained. By the Treaty of Westphalia the Great Elector received only Further Pomerania (Hinterpommern), which was of little value. He gained nothing from the first Northern War (1655-60) in which he took part; his victory over the Swedes in the battle of Fehrbellin (1675)

proved fruitless. His grandson finally acquired Stettin and the mouth of the Oder in 1720, and Hither Pomerania (Vorpommern) did not become a part of Prussia until 1815. The Great Elector was more fortunate in obtaining the release of the Duchy of Prussia from the feudal suzerainty of Poland (1658), and was also able to increase its area by the addition of Ermland. He further desired to acquire Silesia. In these years the chief battlefield of Europe was the western part of the Continent. This was unfavourable for the schemes of the Hohenzollerns, for at that time they had no definite policy of territorial extension in western Europe, and consequently no interests of any importance there.

In the west the Great Elector limited himself to securing the lasting possession of Cleve (1667) and the occupation of the territories which France had secured for him in exchange for Pomerania, namely Minden, Halberstadt, and Magdeburg, which before this had been ecclesiastical principalities. These gave him strategically important positions controlling points of crossing the Elbe and the Weser; but he could not obtain Magdeburg until 1666, and did not gain full possession of it until 1680. During the reigns of his son and grandson some small and unimportant territories to the west of these were obtained. Taken altogether Brandenburg-Prussia had by 1740 increased in area from 9000 square miles under the first Hohenzollern Elector and 31,600 square miles in the reign of John Sigismund to about 46,800 square miles with a population of about 2,250,000. Up to now the bulk of the area of the country had lain towards the east, but from this period onward the preponderating part of its territories began to be found in the west. The wife of the Great Elector belonged to the family of the Princes of Orange, and this led the Elector to consider Holland in his foreign policy; in 1672 especially this influenced him to take part in the war between Holland and Louis XIV. He also gave more attention to imperial affairs than his immediate predecessors. In the politics of the empire sometimes he sided with the emperor. At times, however, he adhered to the views held by the German ruling princes of that time that there was an inner Germany consisting of the various states of the empire; and that this was the real Germany, the interests of which did not always coincide with those of Austria or of the reigning emperor. He believed that the real Germany must at times maintain its interests against Austria by the aid of one of the guaranteeing powers of the Peace of Westphalia, viz. France and Sweden. The only times he paid no attention in his policies to his duty as a prince of the empire was at the beginning of his reign when influenced by religious prejudices, and towards its end when disappointed by the Peace of St.-Germain-en-Laye (1679).

Another sign that the Prussian state was becoming gradually involved in the affairs of western Europe was the fact that as a second wife the Great Elector married a Guelph, to which family the wives both of his son and grandson belonged. In the second half of the seventeenth century the Guelph line founded the Electorate of Hanover in north-western Germany, the only state in this section of Germany that, at the beginning of the eighteenth century, could in any way compete with Brandenburg-Prussia for the leading position. The founding of the Academy of Berlin is due to Sophia Charlotte, wife of Frederick I. The same royal couple established the University of Halle, which soon gained a European reputation on account of its professors Thomasius and Christian Wolff and the institutions for the poor founded by Professor Francke. The fine addition in the royal castle at Berlin and the splendid statue of the Great Elector by Andreas Schlüter were both works of this reign.

III. Frederick II, The Great (1740-88), son of Frederick William I, had probably more intellectual

ability than any other Hohenzollern known to history; he had in him a touch of genius. What checked the development and exercise of his ability was, however, that he seemed from his natural predispositions, and from the way in which in youth he looked upon life, to be born for entirely different conditions than those prevailing in the Prussia of that era. He was more inclined to literature and music than to official routine work and military service, and early became a free-thinker. He preferred the literature of France and despised that of Germany, and was indifferent to Prussia and its people. When a young man these tastes led to conflicts with his father, who resolved on this account to exclude Frederick from the succession, and imprisoned him for several years in the fortress at Küstrin. Frederick was then married against his will, by the advice of Austria, to the Princess Elizabeth of Brunswick-Bevern, personally an excellent and good woman. He finally learned self-control and applied himself with gradually increasing zeal and intensity to the civil and military affairs of the state, but he did this not from a sense of pleasure in such occupations, but from one of discipline and necessity. This may be the reason why in his civil administration and in the aims of his foreign policy he showed little originality in comparison to his natural abilities. On the other hand, in the conduct of war the king showed extraordinary energy, great intellectual activity, and ceaseless personal attention to his task. In his foreign policy Frederick followed the principles of his predecessors and sought above all to develop his domain towards the east. The precarious position of Austria at the beginning of the reign of Maria Theresa was taken advantage of by Frederick to begin a campaign in Silesia in Dec., 1740. As a pretext for the war he took the treaties of succession of his forefathers with the rulers of several of the smaller Silesian duchies, made in 1537, for the non-fulfilment of which Austria seemingly was alone to blame.

He gained the battle of Mollwitz 10 April, 1741, and on 5 June formed an alliance with France, the chief of the other opponents of Maria Theresa; the intervention of England led him to agree to a truce on 9 October, which enabled Austria to make its military force equal to that of France. In alarm Frederick advanced into Moravia, gained the battle of Chotusitz, 17 May, 1742, and in the Peace of Breslau, of 1 June of the same year, obtained from Austria the whole of Silesia, excepting the Countships of Glatz, Troppau, and Teschen. As in the war between Austria and France, which still went on, the advantage of the former continually increased, Frederick once more formed an alliance with Austria's opponents and began a campaign in Bohemia in Sept., 1744, but was obliged to withdraw from this province in December. His position in Silesia now became precarious, but he extricated himself by the victory at Hohenfriedberg, 4 June, 1745, and then defeated the enemy, already on the march to Berlin, at Soor 20 Sept., at Katholisch-Hennersdorf 23 Nov., and at Kesselsdorf 15 Dec. By the Peace of Dresden of 25 Dec., 1745, Frederick retained Silesia. Maria Theresa, however, was not willing to give up Silesia without further effort. Consequently after peace had been made between Austria and France, Kaunitz, who was now Maria Theresa's minister of foreign affairs, sought to form more friendly relations with France and to strengthen those already existing with Russia. So little, however, was attained in France that Kaunitz wished to drop the negotiations, but Maria Theresa's persistence and the measures taken by Frederick in 1756 led to the formation of the alliance. Made uneasy by the weakness of France, Frederick did not maintain the amicable relations that had existed until then between himself and that

power. When war broke out between England and France over the colonies in 1755-6, England negotiated with Russia for the sending of auxiliary troops. Frederick feared to permit such auxiliaries to march through Prussia and offered to guarantee England's possession on the Continent himself (Convention of Westminster, Jan., 1756).

France and Austria now agreed to help each other in case of attack by Frederick (First Alliance of Versailles, 1 May, 1756). Upon this Frederick, led perhaps by fear of attack by a coalition stronger than himself, perhaps also by the hope of making fresh gains by daring seizures, began a third war, the Seven Years' War, with Austria, taking as a pretext the advance of the Austrian troops. Without any declaration of war he advanced into the Electorate of Saxony, which was friendly to Austria, and besieged Dresden 9 Sept., but the Saxon troops kept up a longer resistance than he had counted upon, so it was 1757 before he could begin a campaign in Bohemia. In the meantime Russia and Austria had signed an alliance for war against him 2 Feb., 1757; in addition both the Empire and Sweden declared war against him, and on 1 May, 1757, France and Austria agreed in the Second Alliance of Versailles to adopt the offensive together against him. Frederick's opponents could produce a force of 430,000 men, while he with the aid of England and Hanover (Treaty of 11 January, 1757) controlled about 210,000 men. It was most important for him to force the matter to a conclusion as quickly as possible, before the means of his still poor country were exhausted. On 6 May he won a bloody battle near Prague, but on 18 June he was defeated near Kollin and suffered losses by the new Austrian commander Daun which he could not repair. Frederick was forced to return to Saxony, while the French defeated the Hanoverian army at Kastenbeck on 6 July, and the Russians defeated a Prussian army at Grossjägerndorf on 30 Aug. However, the Russians and French did not form a junction with the Austrians quickly enough. When finally the united French and Imperial army advanced, Frederick defeated the joint forces badly at Rossbach on 5 Nov., and then turned against Daun, who had entered Silesia and had taken Breslau. Frederick defeated him at Leuthen on 5 Dec. Duke Ferdinand of Brunswick continued to lead the Hanoverian and Prussian forces that fought against the French and drove the latter to the Rhine in the battle of Crefeld, 23 June, 1758. The progress of the war in the east did not equal the great expectations aroused by the success at Leuthen. In 1758 the Russians advanced. Frederick maintained himself against them at Zorndorf, 25 August, but the battle was not decisive; from here he hastened to Saxony, where the troops he had left behind were threatened by Daun, and he was surprised by Daun at Hochkirch on 14 Oct.

At the end of 1758 the majority of his officers were dead, and he could only fill the gaps among the soldiery by the compulsory enlistment of mercenaries. His treasury was empty, and he struck debased coin. He exhausted the resources of Saxony. On the other hand the Austrian army was always ready for the field, and the Austrian artillery was superior to his. Accordingly his opponents in the campaign of 1759 forced Frederick to take the defensive. The united Russians and Austrians decisively defeated Frederick at Kunersdorf on 12 August. The result was a series of capitulations. Frederick lost Saxony, the greater part of Silesia was taken from him in 1760-61, largely by Laudon. What saved him, besides his own energy, was the gradual dissolution of the alliances between his enemies. France began to withdraw in the Third Alliance of Versailles of 30-31 December, 1757. At first Russia and Austria drew all the closer together in the Treaty of St. Petersburg

of 1 April, 1760. The Russians plundered Berlin in Oct., 1760. At this most critical moment Frederick maintained himself only by the almost unexpected victory of Torgau, 3 Nov., 1760, which enabled him once more to occupy a secure position in Saxony. As early as 1761 the Russian interest in the war began to decline, and when in January, 1762 Peter III, an admirer of Frederick, became tsar, he took sides with Frederick (truce in March, peace 5 May, alliance 19 June). It was also an advantage to Frederick that Turkey began a war against Austria. In July, 1762, Peter III was succeeded by the famous Catherine II. She wished to have a European peace, and continually urged Maria Theresa to yield. On the Rhine Ferdinand of Brunswick continued to keep the French in check. As the French were also successful in their war with England, they withdrew from the struggle against Frederick by the preliminary Peace of Fontainebleau (3 Nov., 1762). The imperial army broke up. Finally Austria also grew weary of the struggle.

On 15 Feb., 1763, the Peace of Hubertusburg closed the Austro-Prussian war. Frederick retained Silesia, but made no new acquisitions. However, his personal importance and the respect for the military prowess of Prussia were so greatly increased that henceforth Prussia was treated by the other countries as a great power. After this Frederick's administration was a peaceful one. He was able to increase his realm by taking part in the First Partition of Poland (1772), whereby he gained Polish Prussia with the exception of Danzig and Thorn. The War of the Bavarian Succession (1778-79), which Frederick declared against Austria to prevent Bavaria becoming part of that monarchy, caused but little bloodshed. In the Peace of Teschen Austria abandoned all claim to the Bavarian succession. In 1781 Frederick took part in the "Naval Alliance of Neutral Powers". This was formed by Catherine II, and intended mainly to limit the power of England on the Baltic, but it was of small importance. It should also be mentioned that in 1744 East Frisia became a part of Prussia by inheritance.

The most important measure of domestic policy carried out by Frederick in the first half of his reign with the help of his minister Cocceji, was the reorganization of the department of justice, which had been neglected during the reign of his father. After the Seven Years' War his personal influence became more manifest in the other departments of state. It must be confessed, however, that at the same time he obstinately adhered both to the forms and principles of government that he had inherited. At the most it was only in isolated cases that power was exercised with moderation or that the administration was modified in harmony with the spirit of the times, although this spirit, animated by humanitarian ideas and a tolerance arising from indifference, was also alive in him. He even exaggerated many of the objectionable sides of the old system of government. He ruled the country and especially the new provinces as an enlightened despot, exclusively from the cabinet, though as a writer he approved of Rousseau's views as set down in the "Social Contract". In addition he employed the higher officials as if they were subalterns. The officials throughout the country during his reign developed more and more of a tendency to treat the people and especially the middle classes with bureaucratic contempt. Though proud of their victories in the Seven Years' War, the people manifested no consciousness of their belonging to a unified Prussian State. It is true that in the last years of his reign Frederick regarded it as his duty to inspire the entire Prussian people in their economic and social feelings with the sense of their direct relations to the Government, so that every Prussian in all his doings should have in view not only his

own personal advantage but also the welfare and strengthening of the state. Practically, however, this idea only led him to accentuate the social differences, the abolition of which was demanded by the needs of the time. At the end of his reign the Prussian State, of which he was more than ever the monarch, ended just as at the beginning of this rule, with the president of each district. As regards his economic policy, he held on to the worn-out mercantile system.

The great errors of this policy, e. g. the neglect of agriculture, the failure to abolish serfdom, the retention of the double system of taxation (direct for the country and indirect for the cities), a system that paralyzed all economic development, the maintenance of the excessively high system of protection with its many internal duties, were due to this cause. The same may be said of many of his failures, such as the mercantile enterprises which he founded, or his partial failures, such as the transfer of several industries, in particular the porcelain and silk industries, to the leading provinces of the state. His adherence to the mercantile system of economics was necessitated by his adherence to the one-sided conception of national finances which led the Prussian Government to provide for the economic prosperity of the population, with the intention of bringing as much money as possible into the country in order to have it for government purposes. Frederick, therefore, made no changes in the financial theories of Prussian policy. These theories led him, for instance, in imitation of French fiscal methods, to introduce the *Regie*, i. e. to farm out the customs and indirect taxes, and to make the sale of tobacco, coffee, and salt absolute monopolies. The *Regie* made him very unpopular. It is all the more surprising that, notwithstanding the reactionary character of his internal policy, he made the country politically capable of performing all the unusual tasks that he imposed on it, that he changed his possessions into a well-regulated state, and that he succeeded, by political measures, in repairing the terrible injuries of the Seven Years' War in a comparatively short time. Large extents of moor-land and swamp were brought under cultivation, a hundred thousand colonists were settled in deserted districts, and the revenues yielded by manufacture and industry were decidedly increased. The great estates were aided to pay off their debts by encouraging union credit associations, and Frederick sought to regulate and give independence to the circulation of money by founding the Prussian Bank. In harmony with the spirit of the times he also undertook a comprehensive codification and revision of the laws of the state, which was completed after his death and culminated in the publication of the general "Prussian Statute Book" of 1794; Suarez was the chief compiler.

Towards the end of his reign he encouraged the efforts made on behalf of the Catholic public schools by the provost Felbiger, and those for the Protestants by Freiherr von Zedlitz and the cathedral canon Rochow, but he never at any time gave the schools sufficient money. The new code laid down the principle that the public schools were a state organization. Frederick's government, internal and foreign, was marked by a mixture of strong and weak characteristics. It was the policy of a man of genius who was entirely devoted to his task; too intellectual and enlightened to be a reactionary, but one who showed himself greater in carrying out and in utilizing the policies of his predecessors, than in establishing what was necessary to ensure the future development of the state. Great as were his achievements, he ended by paralyzing Prussia's vital powers and engaged the resources of the country in a direction opposed to its development. Frederick gave Prussia the position of a Great Power. But, outside of his personal importance, this position of the state rested exclusively

on its military power, not yet, as in the case of the other Great Powers, upon the area of the country and the economic efficiency of the population. Consequently, the position of Prussia as a Great Power needed to be placed on a stronger basis. Its people had to make marked advances culturally, and develop a real national spirit. Furthermore, the effort must be made to bring the future development of Prussia into close connexion with the leading movements of the coming generation, so that the roots of its life should receive fresh nourishment. Both problems could best be solved by furthering the transfer towards the west of the centre of gravity of the Prussian states already begun under Frederick's predecessors. This western development of his territory was also a policy furthered by Frederick, but he pursued it unwillingly and cared little for it. By this one-sidedness he lessened his services to Prussia when he enlarged his territories in the district of the Oder and Vistula, where the foundations of the state had been laid during the Middle Ages.

There is no doubt that in 1757-58 the coalition formed against him would have crushed him had not Hanover fought on his side and given him the strategic control of north-western Germany. As even after 1763 he regarded Austria as the deadly enemy of Prussia, he could not fail to see that for strategic reasons it was absolutely necessary for Prussia to have the whole of north-western Germany within its sphere of influence; but he did nothing to attain this end. Moreover, he could not abstain from interfering in imperial politics in order to keep Austria from making southern Germany dependent on itself. He, therefore, urged on the War of the Bavarian Succession against Austria in 1778-79, and in 1783 was for a time the leader of the "League of Princes" formed among the German princes of the empire against Joseph II. However, all imperial, that is to say, German politics were distasteful to him. By his example he, more than any one else, contributed to smother all interest in the empire on the part of the German statesmen. He preferred rather to rest Prussian policy on that of Russia, and to lay his political schemes in the east of Europe. In like manner in his internal administration he deliberately neglected his western provinces, although it was just this part of his kingdom that lay in the centre of the rising economic life of Europe, and contained, along with Silesia, the mineral treasures that in the future were to make the country and its population rich. It was also the population of this section that was to prove itself unusually energetic and capable in economic life. Fortunately for the realm Frederick's excellent minister of commerce, Heynitz, did not neglect the western provinces. In these provinces the young Freiherr von Stein passed the first years of his career in the service of the Government. During Frederick's reign the eastern provinces of Prussia were also brought into connexion with the cultural development of the civilization of Western Europe. In order to meet the growing demand of England for grain, their great estates were worked on a capitalistic basis. The younger civil officials and nobility admired England as a model country and were full of interest in all the liberal ideas of the period. Prominent among these was Theodore von Schön. But a number of other young jurists called for a constitution. The University of Königsberg had a large share in producing this development. One of its professors, Kraus, a political economist, spread the theories of Adam Smith; another professor was Kant, who also started with the English philosophy.

During Frederick's reign a novel element found its way into the Prussian State. By the conquest of Silesia, Prussia for the first time acquired a province that was predominantly Catholic; in annexing Polish Prussia it annexed one that was half Catholic. Up to then the only Catholics in Prussia were a few in

Cleve. During the reign of the Great Elector, Catholic Ermland also became a part of Prussia, but this province never was considered of much importance. The church privileges of the Catholics here as there rested upon national treaties. As a rule they were respected. However, a strict watch was kept that the position of the Catholics should be an exceptional one. Attempts to introduce Protestantism among them were encouraged. In ecclesiastical matters Frederick followed in the path of his predecessors. Being a free-thinker the tolerance of his predecessors, based on treaty obligations, became under him a policy merely of religious indifference. "In my kingdom, each may go to Heaven after his own fashion". He provided for the religious and educational needs even of the Catholics, and showed favour to the Jesuits. Still, in his reign Catholics were not allowed to hold office except inferior ones. In its foreign policy the State remained the champion of Protestant interests. This policy could be continued, notwithstanding the great increase in the number of Catholics, because the population of Prussia was accustomed to obey the Government without claiming any rights for itself. In the course of time difficulties would naturally arise from this policy.

IV. When Frederick II died the area of Prussia was about 78,100 square miles and its population 5,500,000. Since 1740 the annual revenues of the State had risen from 7,500,000 to 22,000,000 thalers; the national treasury contained 54,000,000 thalers. Frederick's successor, his nephew Frederick William II (1786-97), was a man of some ability, but was soon led astray by his taste for loose living, and fell under the influence of bad counsellors, such as the theologian and Rosicrucian von Wöllner, and Colonel von Bischoffswerder. Frederick William III (1797-1840) was a man without much ability, somewhat like a subordinate official in instinct, of good intentions but little force. In consequence of the Revolution whose spirit spread throughout Europe the demands of the new era made themselves heard in Prussia also. Both the ministry and the cabinet were constantly occupied with plans for reform, but there was a lack of united and harmonious working and of ability to come to a decision. Dangerous agitations arose among the civil officials. Government by the cabinet became intolerable to the ministers, as the administration was no longer exercised by the king himself but by the secretaries of the cabinet, who during this reign were von Beyme, Lombard, and Mencken. Thus the zeal for reform only increased the dissatisfaction, and very little was accomplished. In foreign politics Frederick William II disavowed the opposition to Austria when he signed the Reichenbach Convention of 27 July, 1790, with the Emperor Leopold II. In 1792 he even became an ally of Leopold's in the war with France, in order to combat the "principles" of the Revolution. His army, however, accomplished but little in this war, and on 5 April, 1795, he signed a separate treaty of peace with France at Basle, thus deserting Austria. For a number of years following this treaty he and his successor, Frederick William III, pursued a policy of neutrality in the great events of Western Europe. Still they sought to gain advantages out of them. According to the Treaty of Basle, Frederick William II agreed with France upon a line of demarcation by which nearly all of northern Germany was declared neutral under the protection of Prussia. Prussia worked energetically for the secularization of the Catholic ecclesiastical principalities, and by agreement with France in 1802 obtained the Dioceses of Paderborn, Fulda, a part of Münster, Eichsfeld, the domains of several abbeys, and the cities of Erfurt and Dortmund; the decision of the imperial delegation of 1803 confirmed it in the possession of these territories.

Prussia kept a close watch upon the fate of Hanover

in the wars between Napoleon and England, being desirous to annex Hanover if possible. For a considerable length of time Napoleon tempted Prussia by holding out the hope of this acquisition, and in 1806 by the plan of a North German Confederation of which Prussia was to be the leader, Frederick William II even sought to gain territory in southern Germany. By an agreement made with the Hohenzollern Line of southern Germany he obtained in 1791 the Principalities of Ansbach and Bayreuth; in 1796 he made an unexpected attack upon Nuremberg but soon vacated it. None of these undertakings were conducted with much energy or with any clearly-defined end in view, for at the same time the political plans of Prussia in Eastern Europe exceeded her strength. Not only did Prussia obtain Danzig and Thorn in the Second Partition of Poland (1792), but in the Third Partition (1795) she acquired the central basin of the Vistula, with Warsaw as its capital. Prussia now included the entire basins of the Oder and Vistula. But it was no longer possible to make the eastern territories the preponderating part of the State. Besides the country was now half Slavonic, and the majority of its inhabitants were henceforward to be Catholic. The old Prussian territories had by this time been brought to a higher state of culture and had become in some measure capable of meeting the demands made upon them. The State now undertook another task: this was to bring the demoralized Polish provinces into order, to organize them, bring them to economic prosperity, and give them civil officials and teachers. In 1806 Prussia became involved in a war with Napoleon, which made evident the confusion of its internal affairs, and its lack of strength. Its army, led by the grey-haired Ferdinand of Brunswick, was cut to pieces in the battles of Jena and Auerstädt, fought on the same day (14 Oct.), after a skirmish at Saalfeld; Prince Louis Ferdinand died 18 October. Most of the fortresses capitulated without any real resistance. The bureaucracy of government officials lost its head and acted in a cowardly manner. The people were apathetic. The king, however, made some resistance, with the aid of Russia. Napoleon wished to make an end of Prussia as a State, and only the intercession of Russia preserved for the Hohenzollern dynasty a part at least of its territories. By the Peace of Tilsit, 9 July, 1807, Prussia lost the Franconian provinces and all those west of the Elbe, as well as the Polish acquisitions outside of Polish Prussia. Moreover, French troops were garrisoned in the districts still remaining to it, and an enormous war indemnity was demanded (Convention of Königsberg, 12 July, 1807).

However, Prussia's terrible humiliation, notwithstanding all its mournful results, first opened the way for the exercise of those energies of the country that had been until now suppressed. The king showed great endurance in his misfortunes. His wife Louise made herself the intermediary between him and the men from whom the restoration of the country was to come. During the war Scharnhorst the future reorganizer of the Prussian army had had his first opportunity to distinguish himself at the battle of Eylau, 7-8 February, 1807. In the winter of 1806-07 the philosopher Fichte delivered his celebrated "addresses to the German nation" at Berlin. In the spring of 1807 the king appointed Count Hardenburg, a native of Hanover, minister of foreign affairs, but was obliged to dismiss him in July at Napoleon's bidding; the count, however, still continued to advise the king. Shortly after the Peace of Tilsit Scharnhorst was given charge of military affairs. From this time the army consisted only of natives of the kingdom, the soldiers were better treated, a thorough education was required from those desiring to become officers, and the people were gradually accustomed to the idea of universal military service, until it was in-

troduced by the law of 3 Sept., 1814. On 5 October, 1807, Freiherr von Stein, a native of Nassau, was placed at the head of all the internal affairs of Prussia. With his appointment the real reform minister came into power. He was able to retain his position only a year, but this sufficed to impress on the legislation of the time a character of grandeur, although he could not control its details. Stein found the kingdom reduced in reality to the present province of East Prussia, and there the liberal officials were already preparing radical changes. The law of 9 Oct., 1807, was already enacted, according to which the peasant serfs were declared free; every Prussian was authorized to hold landed property and to follow any occupation he chose. Stein only signed the decree. The law made it necessary to readjust all peasant holdings and the taxes upon them. This readjustment dragged on during a number of years, and was not finally completed until the middle of the century.

After Stein's retirement this measure frequently proved the economic ruin of the peasants. Another consequence of this law, as completed by the law on trade taxation, Oct., 1810, and by the Edict of 7 Sept., 1811, was the adoption by Prussia of liberty of occupation. Prussia led the way in this reform in Germany. Stein's chief personal interest was in the reform of the constitution and of the administration. His desire was to create a union between the Government and the people that was then lacking, to awaken in the Government officials a spirit of initiative and responsibility, to enkindle in Prussia popular sentiment for Germany. The lesser offices in Prussia were to be divided into two classes; the former following the historical and geographical divisions of the country (provinces, circles, communes); the second determined wholly by the needs of the Government (*Regierungsbezirke*). The duties of the former were to be performed by administrative bodies, who were to act as the representatives or as the deputies of the people; the latter by government officials. With the administrative body, in some cases, a government official was associated (provincial president); in other cases certain government duties were confided to their heads (*Landrät, Bürgermeister*). On the other hand representatives of the people were to have a share in the Government, and in the course of time, as a counterpoise to the ministerial bureaucracy, the members of the national diet were to be elected from the provincial diets. Stein substantially gave the franchise only to land owners. He desired that the people in general should be prepared for taking part in the Government by the schools and universities. Freedom of action was to be restored to the state officials by putting an end to cabinet government, and giving each minister the independent administration of his own department. Personally, Stein was only able to initiate these reforms by the municipal legislation of 19 Nov., 1808, and the "laws on the changed constitution of the highest administration of the realm" of 24 Nov., 1808. His fiery temperament and his strong German sympathies made him too impatient. Together with Scharnhorst he planned measures to rouse the German people for a war against Napoleon. Consequently he was obliged to resign. Moreover, he did not sufficiently gauge the peculiarities of Prussia, particularistic, dynastic, and bureaucratic. His work, however, did not perish.

In 1810 the University of Berlin was founded as the great national centre of education; in 1811 the University of Breslau. In 1810 Hardenberg re-entered the Government and a chancellor carried on the work of reform systematically until his death in 1822. He skilfully managed the king and accommodated himself to the peculiarities of the Prussian character: like Stein he thoroughly believed in the necessity of a complete reconstruction of the State. He made special efforts to reform the system of taxation, but he was

not able to do this at once. In 1810 and 1815 he even promised to call a national parliament. After his own fashion he liberalized or bureaucratized Stein's plans, often taking the Napoleonic legislation for his model. Only the opposition of the Prussian nobility prevented him from sacrificing the very corner-stone of Stein's reform of the administration (1812) by substituting the French system of prefecture and municipality for the self-governing institutions of district and city. These reforms led to the awakening of a sense of nationality both in the educated classes and the common people; and when in 1813 Napoleon returned defeated from Russia the whole population of Prussia rose of their own accord for king and country, and also for the liberation of Germany about which the kings had not concerned themselves.

During the War of Liberation of 1813-14 and 1815 the Prussian army had a large share in the overthrow of Napoleon. At the Peace of Paris (20 May, 1814) and the Congress of Vienna, which rearranged the map of Europe, Hardenberg represented Prussia. He desired to form a permanent agreement in policy between Prussia and Austria, while the king preferred to join his interests with those of Russia. At the important moment (Nov., 1814) the king decided against his minister, whereby a fresh European war was nearly kindled. The question was whether the greater part of western Poland should henceforth belong to Russia, and what compensation Prussia should receive for its share of Poland. Russia was successful, and only Polish Prussia and the Grand Duchy of Posen were given to Prussia. As a compensation for the loss of Warsaw, Prussia demanded Saxony. Owing to Austria's opposition it received only the present Prussian province of Saxony and, instead of the remainder of Saxony, the Westphalian and Rhenish provinces, where before 1802 it had possessed only small districts. Austria hoped that in this way Prussia would be so entangled in Western Europe that it could no longer pursue a policy of neutrality, such as it had adopted after the Treaty of Basle. By this means, however, the centre of gravity of Prussia was completely shifted towards Western Europe. Henceforth Prussia could scarcely give up the military control of northern Germany; should opposition arise, it must endeavour to incorporate into its own territories the districts between its eastern and western provinces. It soon felt the temptation to become the leader of Germany, especially as Austria at the same time gave up its old possessions in Swabia and on the Rhine, and had no longer any territories in Germany. In 1814-15 the area of Prussia was increased to 108,000 square miles, and its population reached 10,500,000. The geographical and political changes which took place in 1807-15, years of suffering and war, had been too rapid. Much remained to be done. Reactionary forces asserted themselves once more. Until 1840 old and new ideas struggled against each other, even among the ruling statesmen. The reactionary tendencies, especially of the era of Frederick the Great, reappeared with the king's approval.

However, government by cabinet order was not re-established. The higher officials, who under Frederick the Great had been the king's executive tools, now practically carried on the Government in the name of the king. The minister Nagler spoke of "the limited intelligence of the subject". The promise to call a national representative assembly was limited to the case of the State needing a national loan; but care was taken that no such necessity occurred. The Prussian Government not only took part in all the attempts of Austria and Russia since 1818 to suppress all revolutionary and politically liberal movements among the people, but even showed the greatest zeal and severity in doing so; e. g. the persecution of student societies, the imprisonment of Jahn, the order forbidding Arndt to lecture, and the

expulsion of Görres from Germany. Partly through attachment to the king, with whom they had been united in common sufferings and partly because of the generally excellent behaviour of the officials, the people of the old Prussian provinces maintained an attitude of expectancy. With the new provinces, however, serious friction arose. Having belonged to France during the years 1795-1814, these provinces had grown accustomed to democratic forms and frequently had a racial dislike to Prussians. The struggle began with the question whether the Prussian statute-book should replace the French "Code civile" in the province of the Rhine. The conflict was intensified by the appointment of many old Prussian officials to positions in the Rhineland and was greatly augmented by quarrels about methods of Church government and the claims of the State in matters of religion. The territories annexed in 1814-15 were mostly peopled by Catholics. Hitherto the State had controlled the Catholic Church authorities of the kingdom in the same way as the Protestants. This not only aroused the opposition of the democratically-inclined Rhenish provinces, but also excited the resistance of the new western Catholic movement, which, without much regard to diplomacy, strove to secure complete liberty for the Church by vigorous defence of her rights.

The question in what cases it was the duty of the Catholic priest to bless mixed marriages was the accidental but highly opportune occasion of bringing the matter to an issue. The Archbishop of Cologne, von Droste zu Vischering, led the opposition. The Prussian Government imprisoned him in a fortress as a "disobedient servant of the state". A powerful popular commotion throughout the Rhine country was the result; this gained its echo in a Polish national movement in Posen, where Archbishop Dunin resisted the marriage laws and was arrested. Success was on the side of the Catholics and the new provinces. But alongside of these after effects of the spirit of Frederick II the Stein-Hardenberg policy continued to gain ground, especially after 1815. The reform of taxation was now carried through under the direction of the statistician J. G. Hoffmann. Organization of the provinces was completed, and an edict granting provincial diets was issued in 1823. General communal legislation was postponed because the economic and social conditions of the eastern and western provinces still differed widely. Allenstein and Johannes Schulze did much for education. Under the lead of the king, the Government compelled the union of the Lutheran and the Reformed churches; in order to give the union a firm basis, a new liturgy was issued in 1821. The old Lutherans who opposed the union of the two denominations were subjected to severe police restraint. By the Papal Bull "De salute animarum", and the Brief "Quod de fidelium", two Catholic church provinces were erected 16 July, 1821: the Archdiocese of Gnesen-Posen, with the suffragan Diocese of Culm; and the Archdiocese of Cologne, with Trier, Münster, and Paderborn as suffragans. In addition the exempt Bishoprics of Breslau and Ermland were established. The bishops were to be elected by the cathedral chapters, but were to be directed by the pope not to choose any person not acceptable to the king. The endowment of the bishoprics with landed estates proposed in 1803 was not carried out; hitherto the State has provided yearly subventions in accordance with the budget of the ministry of worship. Prussia's greatest progress at this time was in the field of political economy. The post office was well organized by Postmaster-General Nagler.

By the law of 26 May, 1818, Prussia changed from a prohibitive high tariff to a low tariff system, almost completely suppressed the taxes on exports, and maintained a high duty only on goods in transit.

It thereby simplified its administration of the customs, and made business easier for its subjects, but the law fell heavily on the provinces belonging to other German states that were surrounded by Prussian territory, and gradually effected the states of middle and southern Germany, whose traffic with the North Sea and the Baltic had to be carried on across Prussian territory. After violent disputes a *Zollverein* (customs union) was gradually formed; the first to join with Prussia in such a union were the smaller states of Northern Germany, beginning with Sondershausen in 1819; in 1828 Hesse-Darmstadt; in 1831 Electoral Hesse; from 1 Jan., 1834, the kingdoms of Southern Germany, Saxony, and the customs and commercial union of the Thuringian States. By the beginning of 1836 Baden, Nassau, and Frankfurt had also joined. With the exception of the non-Prussian north-western districts, besides Mecklenburg and the Hanseatic cities, all non-Austrian Germany was now economically under Prussian hegemony. The different states joined the *Zollverein* by terminable agreements. Each of the larger states retained its own customs administration; changes in the *Zollverein* could only be made by a unanimous vote. These states simply agreed in their economic policy and in the administration of the customs. They did not form a unified Germany from an economic point of view. The men who deserve the chief credit for the establishment of the *Zollverein* are Motz (d. 1830) and his successor Nassen. From the first, Prussia was determined that Austria should not be admitted as a member of the new customs union. Politically this union did not bring its members into closer alliance, but it was probably the cause of a great increase of their economic prosperity. The greatest benefit from it was gained by the Prussian Rhenish provinces. Consequently the trading element of the Rhineland, generally Liberal in politics, gradually grew friendly to the Prussian Government; it hoped to be able to dictate Prussia's economic policy in the course of time. The result was that political conditions within the country improved. In all its other relations to the newly-acquired provinces the State had been forced to give way (e. g. the continued existence of the "Code civile") or would have to in the future (e. g. in its ecclesiastical policy). Now the Rhenish provinces began to divide politically. The State was furthermore consolidated by gaining the sympathetic support of the teachers and professors as an after effect of the patriotic movement in the War of Liberation and partly owing to its energy in the cause of education. The Prussian political system, of meddling with everything, perhaps justified by necessity, was at this time philosophically defended and glorified by the philosopher Hegel.

V. Frederick William IV (1840-61) in his youth had enthusiastically taken part in the War of Liberation, and afterwards in all the efforts for the reorganization of the State. His character was inconsistent; while a man of ability, he was subject to the influence of others. Soon after his accession he conciliated the Catholics (Johann Geissel as coadjutor of Cologne; establishment of a Catholic department in the Ministry of Worship and Education). Although personally a Conservative, he appointed some moderate Liberals to places of prominence. He first called forth opposition among the doctrinaire and radical elements of the eastern provinces by condemning their ideas of popular sovereignty and popular representation on the occasion of his coronation at Königsberg. In accordance with Stein's original plan he intended to give to Prussia a legislature chosen by the several provincial diets. Too much time was spent in discussion without coming to any decision. In the meantime the western provinces also joined the movement for more liberal institutions, largely

as a consequence of the debates in the provincial diet of the Rhine, in 1845. The restlessness was increased by economic distress, especially among the weavers of Silesia, by contradictory ordinances issued by the Government, and by the discovery of a national Polish conspiracy in the province of Posen. Finally in Feb., 1847, the king summoned to Berlin a "first united diet", composed of all the provincial diets. The authority of the united diets was to be small, its future sittings were to depend on the pleasure of the king. The more liberal element of the eastern provinces wished to reject this diet as insufficient. The more politic liberals of the western provinces, however, gained the victory for the new diet, for they hoped in this way to attain to power in the State. The united diet was opened 11 April, 1847. Passionate differences of opinion showed themselves in the debates over the wording of an address to the king, in which, although moderately expressed, the demand for such a "national parliament" as had been promised in 1815 was put forth. Motions made in favour of the granting of a national parliament, and finally the refusal of the diet to take decisive action on a proposed railroad loan, so angered the king that he closed the sessions of the diet towards the end of June. Throughout the country the movement to obtain a parliamentary chamber directly elected by the people was kept up.

When in March, 1848, there was danger that the revolution would break out in Prussia, on 7 March the king made the concession that the united diet should meet every fourth year. On 14 March he summoned the second united diet to meet at the end of April, but he was not willing to concede the election by the people and a written constitution. On 15 March barricades were built in the streets of Berlin. On the evening of 17 March the king decided to grant a constitution, to set the date of the assembling of the second united diet for 2 April, and to take part in the movement for forming a German national state. Notwithstanding the announcement of this decision, bloody fighting broke out in the streets of Berlin 18 March. The next day the king withdrew the troops who were confronting those in revolt. In Posen the Poles gained control of the Government, while the Rhine province threatened to separate from Prussia and to become the first province of the future united Germany. On 20 March Frederick William announced that Prussia would devote its entire strength to the movement for a united Germany, and to maintaining the rights of Germany in Schleswig and Holstein by war with Denmark. At the end of the month the king entrusted the Government to the Rhenish Liberals. The brief session of the second united diet had for a time a quieting effect, the Radical element predominated in the Prussian National Assembly which opened 22 May, and the king's ministers, chosen from the Rhenish Liberals, were not able to keep it in check. During the summer the Conservative element, especially that of the old Prussian provinces, bestirred itself and held the "Junker Parliament"; founded the "Kreuzzeitung", and won influence over the masses by appealing to the sentiments of Prussian particularism and loyalty to the king. When the Radicals favoured street riots, sought to place the army under the control of parliament, and resolved upon the abolition of the nobility, of kingship by the grace of God, and demanded that the Government should support the revolutionary party in Vienna, the king dismissed his Rhenish ministers. In the German movement also they had, in his opinion, failed. The war in Schleswig-Holstein had brought Prussia into a dangerous European position (Armistice of Malmö, 26 Aug., 1848).

The king now commissioned Count Brandenburg on 2 Nov. to form a Conservative ministry. The most

important places in it were given to men from the old Prussian provinces. On 9 Nov., 1848, the National Assembly was adjourned and removed from Berlin. Martial law was proclaimed in the city. On 5 Dec. the National Assembly was dissolved, and a constitution was published on the king's sole authority. Nearly all the Liberal demands of the National Assembly were granted in it, and the upper and lower houses of parliament provided for. Much was done to meet the demand of the Catholics for the complete liberty of the Church. After the failure of the Rhenish Liberal Government, the king hoped for support from the Catholics of the western provinces, and this was at first given. In order to satisfy public opinion a series of laws, intended to meet Liberal wishes, was promulgated in the course of the next few weeks. In accordance with the recently imposed constitution, a new chamber of deputies was immediately elected and opened 26 Feb., 1849, in order that it might express its opinion on the Constitution. However it came to no agreement with the Government. The three-class system of election, which is still in force, was now introduced for elections to the second chamber. In each election district all voters who pay taxes are divided into three classes, so that one-third of the taxes is paid by each class; each class elects the same number of electors, and these electors elect the deputies. Upon this the Radicals abstained from voting. The Conservatives were in the majority in the new chamber. The revision of the Constitution could now be proceeded with, and it was proclaimed on 31 Jan., 1850. According to its provisions Prussia was to be a constitutional kingdom with a diet of two chambers; great power was left to the Crown, which was moreover favoured by obscurities and omissions in the document. After the convulsions of 1848 Prussia had much need of rest. During this year the course of the German national movement had, however, excited the hopes of the king that Germany would acquire the unity which even he desired to see, and that Prussia would, as a result of this unity, be the leader of the German national armies, or perhaps control the new state.

The Liberals were estranged from the king in the autumn of 1848, and the wish was frankly expressed, if not fulfilled, that the future constitution of Germany should be decided in agreement with Austria, and if possible in agreement with all other German princes. These difficulties led the king to decline the German imperial crown when it was offered to him by the Frankfort assembly in April, 1848. He would not accept it from a parliament claiming its power from the sovereignty of the people. Soon after this, influenced by General Radowitz, he himself decided to open new negotiations on the question of German unity. The intention was that Prussia should unite with other German states that were ready to join in a confederation called the "union", and that the union should adopt a constitution and have a diet. This confederation was to form a further indissoluble union with Austria, by which each should bind itself to assist the other in defending its territories. As Prussia had aided the principalities of central Germany to suppress internal revolts in the spring of 1849, these countries did not at first venture to disagree with Prussia, as appears from the agreement of 26 May with Saxony and Hanover, called the "union of the three kings". Nearly all the smaller principalities joined also. Bavaria, however, refused to enter the union, and Austria worked against this plan. In the summer of 1849 Austria proposed to the Prussian Government that the two powers should revive the old German Confederation which had been cast aside the year before, and should henceforth lead it in common ("Interim", 30 Sept., 1849). Russia, which had generally supported Prussia, now upheld Austria. Nevertheless the king, although much opposed by

members of his Government, persisted in his scheme of a union. The constitution planned for the union was laid before a diet of the principalities belonging to the union, summoned to meet at Erfurt.

The Diet in session from 20 March to 29 April, 1850, accepted the Constitution. Upon this Austria encouraged the states of central Germany to form a confederation among themselves to which neither Prussia nor Austria should belong. This confederation was to act as a counterbalance to Prussia, and at the same time was a menace to the Prussian supremacy in the *Zollverein*. In the autumn of 1850 war between the two parties seemed unavoidable. Russia, however, not wishing an open rupture, urged both sides to mutual concessions. Prussia now finally gave up its scheme of the "union", and promised to re-enter the federal diet (Agreement of Olmütz, 29 Nov., 1850; further conferences, Jan. to April, 1851). The dispute between the two powers as to which should control the *Zollverein* continued for two years longer. The ability of Prussia to accomplish the difficult task of defeating the attacks of Austria was probably due to the expert knowledge and clearness of the chief representative of its economic policy, Rudolf von Delbrück, and to the fact that Hanover joined the *Zollverein* in Sept., 1851. Still, concessions had to be made to Austria in the Treaty of 19 Feb., 1853, which crippled the *Zollverein* until 1865. In all questions of foreign politics the relations between Prussia and Austria remained suspicious and cool. Prussia felt that the dispute had resulted in a painful weakening of its European position. The damage was further increased by the irresolute policy of the king during the Crimean War, which caused England to try to exclude Prussia from the congress at Paris in 1856. A small group of Prussian politicians, especially Bismarck, began to urge an aggressive policy and the seeking of support from Napoleon III for such a policy, but neither Frederick William IV nor his brother William who succeeded him would listen to the suggestion.

As regards the internal condition of the country, after the close of the revolutionary movements the Conservatives obtained a large majority in both houses of the Prussian Diet. The more determined members of the Conservative party in the diet demanded a complete restoration of conditions existing before the revolution. They were supported in these demands by the *camarilla* which had been active at the court since 30 March, 1848, and among the members of which were the brothers Leopold and Ludwig von Gerlach. Among the measures desired by the Conservatives were: abandonment of the German national policy; limitations of Prussian policy to northern Germany; closer connexion with England; the adoption of free trade as an economic policy; restoration of judicial and police power on their estates to the nobility; alteration of the Constitution of 1850; and restoration of the Protestant character of the country. Otto von Manteuffel, who had been minister-president since Nov., 1850, was able to defeat the most extreme demands. His chief effort was to suppress all parties as much as possible, and to make the Government official body once more the great power in the State. Up to 1854 there were bitter disputes as to the constitution of the upper house of the diet. At last it was agreed that it should be composed partly of representatives of the great estates, partly of representatives of the large cities and universities, and partly of members independently appointed by the king. The bureaucratic administration established by Manteuffel led to many arbitrary acts by the police, who were under the supervision of Minister of the Interior von Westphalen; the result was much bitterness among the people. Von der Heydt, Minister of Commerce, pursued a sensible policy, declining to favour concentration of capital, and protecting the

small mechanical industries that were threatened with a crisis. From 1854 the influence of the churches over the primary schools was strengthened by the regulations issued by Raumer, Minister of Worship and Education. A defection from the Conservative party, led by von Bethmann-Hollweg (grandfather of the present Chancellor of Germany), was of little parliamentary importance, but apparently influenced the heir to the throne. In the same way the "Catholic Fraction" (1852), formed to oppose the re-establishment of the Protestant character of the State, proved to be only temporary.

In 1857 the king fell ill, and on 23 Oct., 1857, he appointed his brother William to act for him; on 26 Oct., 1858, William was made regent. All extremes of policy and religion were distasteful to William, and he began his reign with many misconceptions of the position of domestic politics. He therefore dismissed Manteuffel and formed his first ministry, the ministry of the "new era", of men of the Bethmann-Hollweg party and of moderate Liberals, the premier being Prince Karl of Hohenzollern. He desired by this selection to assure the public of an evenly balanced non-partisan administration. The Liberals, however, regarded it as a sign that the moment had come to repair the failure in 1848 to obtain a parliament and a Liberal form of government for Prussia. The war between Austria and France in 1859 obliged William to give his entire attention to the reorganization of the Prussian army, which was still dependent on the law of 1814, and had shown many deficiencies when mobilized on account of the war. In Dec., 1859, the regent appointed von Roon minister of war. A bill laid before the Diet in 1860 called for the reconstruction of the military forces, which since the War of Liberation had been disorganized; the army was once more to be a centralized professional force, and at the same time be enlarged without a great increase of expense. The Diet avoided taking any positive stand on the question. William, however, went on with the reorganization. In Jan., 1861, he became king (1861-88). In June, 1861, most of the Liberals united in the Radical "German party of progress". The elections at the end of the year placed this party in the majority. Bills upon questions of internal politics that were intended to meet Liberal wishes were laid before the Diet in vain, nor did the resumption of the policy of the "union" by Count Bernstorff, Minister of Foreign Affairs, nor the commercial treaty with France in 1862 pacify the Liberals. A conflict between the Crown and the Diet began. The money demanded for the army was refused in 1862.

In Sept., 1862, the king called Bismarck to the head of affairs. He was ready to carry on the administration without the approval of the budget. In 1863 Bismarck dissolved the lower house of the Diet, took arbitrary measures against the Press, and sought to bring the Liberals in disfavour with the people by a daring and successful foreign policy. His first opportunity for this came when strained relations developed between the German Confederation and Denmark in regard to the Duchies of Schleswig and Holstein. The upper house of the Diet now refused to grant the money for the expenses of the war against Denmark. Bismarck nevertheless carried on the war jointly with Austria; among its events were the successful storming of the Düppeler entrenchments on 18 April, and the crossing to the Island of Alsén in the night of 28-29 June, 1864. Even these events caused public opinion to change. At the next election the Conservatives were in the majority, and signs of disruption in the "German party of progress" were evident. The disputes which arose between Austria and Prussia as a result of the war with Denmark caused Bismarck to go to war with Austria in the early summer of 1866. The "party of progress" was now completely divided. At a fresh election for the House of Deputies on 3 July,

accidentally the day of the victory of Königgrätz (Sadowa), the Conservatives gained one-half of the seats. The enthusiasm over the defeat of Austria and over the definite settlement thereby of Prussia's leading position in non-Austrian Germany was so great that the difficulties besetting the internal policies could be regarded as removed. Bismarck made retreat easy for his opponents by asking indemnity for the period in which he had carried on the administration without a budget. The greater part of the "party of progress" now became supporters of Bismarck under the name of the "National Liberal" party; the leaders of the National Liberals were Twisten, Lasker, and Forekenbeck. Only a small section of the former "party of progress", under the leadership of Waldeck, and Schultz-Delitzsch, remained in the opposition. As time went on Bismarck found it more convenient to manage parliamentary business through the National Liberals, and consequently made more concessions to Liberalism both in Prussia proper and throughout the kingdom than were in harmony with Prussian Conservative traditions.

In return the Liberals gradually abandoned their opposition to the military form of government in Prussia, and avoided disputes concerning constitutional law. Prussia received a large increase of territory by the war with Austria. After it had gained in 1865 Lauenburg, it also obtained Schleswig and Holstein, and with them a good maritime position, with Kiel as a naval station on the Baltic. Before this, early in 1863, it had obtained Wilhelmshafen from Oldenburg as a naval station on the North Atlantic. The war also gave to Prussia the Kingdom of Hanover, Electoral Hesse, the Duchy of Nassau, and the city of Frankfurt-on-the-Main. Its area was increased to 132,000 square miles, its population to 20,000,000; at present the population numbers about 40,000,000. A still more important gain was that its western and eastern provinces were now united, and that it had complete military control of northern Germany. The additions of territory gave Protestantism once more the preponderance, as the Protestants now numbered two-thirds of the population. The Catholics of the new districts belonged ecclesiastically partly to the church province of the Upper Rhine, partly to the exempt Bishoprics of Osnabrück and Hildesheim; no change was made in these relations. An Apostolic prefecture was connected with Osnabrück, to which the Catholics of Schleswig-Holstein belonged.

VI. Prussia had now reached the goal which for three hundred years it had steadily sought to attain. Its ambitions were now satisfied, it ceased to pursue an independent foreign policy and directed that of the new German Confederation that was established under its headship in 1867-71. At first, both in southern Germany and in the small countries adjacent to Germany, it was feared that Prussia would continue its policy of conquest in order to create a "Greater Prussia". This, however, was a mistaken opinion, as is also the belief that the German Empire is simply the heir to the position of Prussia as a great power. It is true that Bismarck after 1871 seems to have held this view, and to have regarded it as the sole task of his foreign policy to secure what had been attained by large military forces, by a peaceful policy of treaties, and by directing the attention of the other great powers to questions outside of central Europe. Soon, however, the empire was confronted by new and far-extending problems and combinations with which Prussia had never had to reckon. So after 1866 only the domestic policy of Prussia comes under consideration. After the war with Austria its first task was to combine the new provinces with the old in its state organization. This was much more easily accomplished than the similar task in 1815, both because the populations were more easily adapted to each other,

and because the Government proceeded more circumspectly. It was only in Hanover that a strong party, that of the Guelphs, maintained a persistent opposition. The war had also made it possible for Prussia to restore the efficiency of the *Zollverein*. The resulting great economic development of Germany was of much benefit to Prussia's western provinces, for the commerce of the Rhine and the manufacturing districts of the lower Rhine and Westphalia rapidly grew in importance. Berlin also shared in the general increase of prosperity, it became a city of a million inhabitants, a centre of wealth, was almost entirely rebuilt, and covers a larger area each year. In its active mercantile life it is a symbol of the present character of Prussia just as Potsdam, near by, still preserves the character of the Prussia of the era of Frederick the Great.

The result of the great economic development was a renewed growth in influence of the Liberal party, which, however, did not last beyond 1877. From 1870 the Liberals were opposed by the new and strong Centre party, in which the great majority of the non-Liberal, Catholic population of the western provinces were combined. The opposition between the Centre and the Liberals made it possible for the Conservatives to gain time to form a more effective political organization than any they had had before, and to regain for the elements holding to old Prussian traditions a marked influence upon Prussia's domestic policy, notwithstanding the fact that since 1866 the western provinces included the greater part of the territory and population of the country. From 1871 the Government took part in the struggle in which Liberals and Catholics fought out their opinions. It restricted the share of the churches in the direction of primary schools, and passed laws that destroyed the ruling position of orthodoxy in the Protestant church system. It sought to bring the clergy once more under the power of the State. During the eighties Bismarck abandoned the *Kulturkampf*, so far as government interference in Catholic church life extended. There was no essential change in the policy affecting the Evangelical Church. The Evangelical Church has a supreme church council, and by the law of 1873 it received a synodal and parish organization; in 1876 a general synod was established by law. Few changes were made in the school laws. The final decision concerning them has not yet been reached, as in the Constitution of 1850 a special law of primary schools was promised, and this promise must now be fulfilled. A bitter struggle arose over this question. The bill of 1891 was dropped as too liberal; that of 1892 was withdrawn on account of the opposition of the Liberals. After this the matter was allowed to rest. In 1906, owing to the necessities of the situation, a law was passed by a combination of the Government with the Conservatives and National Liberals, with the tacit consent of the Centre. The question to be settled was who should bear the expense of the public schools?

It was laid down that the public schools were in general to be denominational in character; but that everywhere, as exceptions, undenominational public schools were permissible, and in two provinces, Nassau and Posen, should be the rule. The share of the Church in them was not defined, and the struggle as to its rights of supervision still continues. The general level of national education is satisfactory. Only .04 per cent of the recruits have had no schooling. In 1901 there were 36,756 public primary schools, of which 10,749 were Catholic. These schools had altogether 90,208 teachers, and 5,670,870 pupils. Only 315 primary schools were private institutions. For higher education Prussia has 10 universities, 1 Catholic lyceum, 5 polytechnic institutions, and 2 commercial training colleges. Unfortunately there grew out of the *Kulturkampf* not only the conflict over the schools, but also the conflict against the Polish popu-

lation. The Government has always distrusted the Poles. This distrust has been increased by the democratic propaganda among the Poles, by their progress in economic organization, and their rapid social development. Moreover, the rapid increase of the Polish population and its growing prosperity have enabled the Poles to outstrip the German element, which does not seem capable of much resistance, in the provinces of East and West Prussia, and of late in Silesia. In 1885 the Government began a land policy on a large scale. The scheme was to purchase from the Poles as many estates as possible with government funds, to form from these farms to be sold by the Government on easy terms, and by establishing villages to settle a large number of German peasants in these provinces, which, on account of the many baronial estates, were thinly populated, and thus to strengthen the German element in them (1890, law for the forming of these government-leased, or sold, farms; 1891, law for a bank in support of these holdings). The Government began by banishing large numbers of Poles, then set systematically to work to germanize the Poles by limiting the use of their language; thus, even in purely Polish districts, Polish was almost entirely excluded from the public schools as the language of instruction, even for teaching religion. With exception of a break in the early part (1890-94) of the reign of William II, this anti-Polish policy has been carried on with steadily increasing vigour. At last in 1908 the Government by law acquired the right to expropriate Polish lands for its colonizing scheme, as voluntary sale of such lands had almost entirely ceased. So far no use has been made of this authority. The harsh policy of the Government greatly promoted the growth of Radicalism among the Poles; of late, however, the more sober elements seem to have regained influence over them. Besides the increase of the Polish population in the eastern provinces, there has also been a large emigration of Poles into the western provinces, factory hands, so that in some of the western election districts the Poles hold the balance of power.

Outside of its Polish policy Prussia since 1870 has done much for agriculture. Mention should be made of the founding of the central credit association fund, the first director of which was Freiherr von Huene, a member of the Centre party of the Prussian Diet. The reform of the system of taxation, however, was the main cause of the improvement and reorganization of the entire economic life. Indirect taxes were restored, the direct taxes of the country were based on an income-tax, from which very small incomes were exempted. The income-tax was supplanted by a moderate property tax. The taxes on profits were left to the communes for their purposes. Preparations for the tax-reform were made from 1881 by Bitter, Minister of Finance, and the reform was carried out (1890-93) by Miquel, Minister of Finance, a former leader of the National Liberal party. The introduction of the reform was simplified by the fact that only one-eleventh of the direct taxes were needed for the requirements of the Government, and of this eleventh the income-tax yielded 80 per cent. Five-sixths of the revenues of the Government come from the surplus earnings of the railways, as since 1879 nearly all the railways within its territories have been purchased by the State. As these surpluses vary they effect the uniformity of the budget, especially in periods of economic depression. Since 1909, however, provision has been made for this in the budget. The purchase of the railways by the State affected for some time the improvement of the waterways, on account of the advantage to the State of the railway revenues. In 1886 the improvement of water communication, which is still urgent in the eastern provinces, was taken up both in the form of a regulation of the rivers and in the form of a canal policy. In 1897

a bill laid before the Diet, which sought to relieve the railways from overtaxing with freight, by a comprehensive construction of canals from the Rhine to the Oder. The bill was rejected. It was once more brought up, and this time the provision was included that the Government should have a monopoly of the towing on the canals to be built. The bill was accepted in this shape in 1905.

One result of the Government improvements of the waterways is its endeavour to limit the entire freedom of river navigation which has grown up in Germany on the basis of the acts of the Congress of Vienna. So far the Government has not been able to overcome the opposition to this plan in the empire and the neighbouring states; a bill to this end is before the Diet. Since 1870 Prussia has also considered large schemes for improving the organization of the administration. The organization of the district and country communes had not been settled in the earlier period; the organization of the provinces had also to be perfected. The law regulating the administration of the districts was passed in 1872 under the influence of the National Liberal party; the law affecting the provinces in 1875. At the same time a law, which met with general approval, in regard to the entire administrative jurisdiction was carried. In 1897 the difficulties were finally removed which up to then had prevented the Government from obtaining a law to regulate the country communes. This was effected by abandoning the effort to have one law for the entire country, and by passing one simply for the eastern provinces, where the need was most pressing. Since then there has been no further legislation as regards the organization of the administration. In the future new and large questions as to administration will have to be settled, which in the meantime are being discussed by a commission appointed by the king in 1908, who are to report directly to him. Of late, public opinion has also been occupied with constitutional questions, especially of the Centre and the parties of the Left for the adoption of the imperial system of electing the Reichstag in Prussia. The Government is not ready for this, and desires only to modify the three-class system. The first bill for this did not meet with the approval of the Prussian Diet, and was withdrawn in May, 1910.

PRUTZ, *Preussische Gesch.* (4 vols., 1899-1902). Among earlier histories should be mentioned: STENZEL, *Gesch. des Preussischen Staats* (5 vols., 1830-54), extends to 1763; RANKE, *Zwölf Bücher Preussischer Gesch.* (5 vols., 1874); DROYSSEN, *Gesch. der preuss. Politik* (14 vols., 1855-86), extends to 1756. Reviews of historical works on Prussia appear regularly in the semi-annual *Forschungen zur Brandenburgischen und Preussischen Gesch.*

MARTIN SPAHN.

Przemysl, DIOCESE OF (PREMISLIENSIS), Latin see in Galicia, suffragan of Lemberg. After conquering Halicz and Wladimir, Casimir the Great suggested to the pope the creation of seven Latin sees in places where, from the beginning of the fourteenth century, schismatics had at least nominal sees: Halicz, Przemysl, Chelm, Vladimir, Lutzk, Kieff, and Lemberg. Franciscans and Dominicans immediately began to establish missions. When the Bishop of Lebus appointed an incumbent for Przemysl, the pope refused to recognize his jurisdiction and designated (1353) as successor the Dominican prior of Sandomir, Nicolaus Ruthenus. The latter was consecrated at the papal Court and the pope declared this diocese directly subject to the Holy See. As the see was insufficiently endowed, the bishop did not reside in his cathedral town. After the death of Nicolaus the Bishop of Lebus again endeavoured to assert jurisdiction over Przemysl, but Gregory XI appointed Eric de Winsen (1377), who became the first actual bishop of Przemysl. Blessed Jacob Strepa rendered important services to the Diocese of Przemysl. In 1237 Boleslas the Chaste had introduced the Franciscans to Cracow; about one hundred years later they came to Lemberg, where, for three years, Strepa was protector of the order. During that time, Archbishop Bernard laid Lemberg under an interdict and excommunicated the town councillors. Strepa took up the cause of the city to protect it from the influence of the neighbouring schismatics. In addition, he had to defend the Franciscans and Dominicans against the accusation of the secular clergy, who maintained that their administration of the sacraments was invalid. In 1391 Strepa became Archbishop of Galicia. In that capacity he adjusted the ancient quarrel between the Dioceses of Halicz and Przemysl. In 1844 Bishop Franz Zachariasiewicz published the "Lives" (mentioned below), which mention fifty-seven of his predecessors; six bishops have succeeded him (1911). To the "Lives" are prefixed important data concerning the early history of the Latin sees in Russia (pp. xxv-xxxix) and concerning the Latin dioceses of Galicia (pp. xl-lxxxviii). At present the Latin Diocese of Przemysl numbers 1,152,000 Catholics; 547 secular priests; 369 religious men in 27 convents, and 698 religious women in 97 (99) convents.

C. WOLFSGRUBER.

Przemysl, Sambor, and Sanok, DIOCESE OF (PREMISLIENSIS, SAMBORIENSIS, ET SANOCHEIENSIS), a Græco-Ruthenian Uniat diocese of Western Galicia, Austria. It is really the Diocese of Przemysl (Ruthenian, Peremysl) of the Greek Rite, since the See of Sambor represents only a former contest between the Catholic and the Orthodox about the time of the union of the churches, and there never was at any time a Bishopric of Sanok. Przemysl is a fortified town situated on the River San, in the Crownland of Galicia, about fifty-four miles west of Lemberg. Its population in 1900 was 46,350, and it contains the Cathedral Church of the Nativity of St. John the Baptist and the diocesan seminary of the Ruthenian Greek Catholics. Sambor

is a manufacturing town situated about ten miles away upon the River Dniester; it had in 1900 some 17,350 inhabitants. Sanok is a still smaller town, situated on the River San about twenty-five miles southwest of Przemyśl, and has about 5000 inhabitants. The original cathedral church of Przemyśl was a church connected with the great castle, but this was given to the Latins by King Wladislaw in 1412. The Ruthenians then took the present Church of the Nativity of St. John the Baptist for their cathedral. The cathedral church of Sambor, dedicated to the Transfiguration, is situated near the town of Old Sambor. All this part of the country was the Kingdom of Poland, and on its partition the Diocese of Przemyśl fell to Austria. The present Greek Catholic diocese is divided into 40 deaneries, containing 688 organized parishes, 1334 churches and chapels, 6 monasteries of Basilian monks, and 2 convents of Greek nuns. The clergy consists of 803 secular priests, as follows: 662 married, 129 widowers, and 12 celibates, together with 36 monastic priests. The Greek Catholic population of this diocese is 1,198,398.

The Diocese of Przemyśl stretched over a large part of Red Russia, covering some 900 square miles, west of the Archdiocese of Lemberg. It is perhaps the oldest of the Ruthenian dioceses, and Sts. Cyril and Methodius are said to have preached Christianity there. It is certain that this part of south-west Russia received Christianity nearly one hundred years before the conversion of King Vladimir at Kieff. The names of its early missionary bishops are lost, but from 1218 the succession is unbroken. Antonius (1218–25) is the first bishop whose name is recorded. He was a monk and Bishop of Novgorod, but was banished from there and then became Bishop of Przemyśl, succeeding a former bishop who had just died. King Danilo at this time was in union with the Holy See, and for over one hundred years the Greek bishops of Przemyśl were likewise united with Rome. Hilarion (1254), Abraham (1271), Jeremias (1282), Memnon (1288), Hilarion (1292), George (1315), Mark (1330), Cyril (1353), Hilarion (1366), Basil (1385), Athanasius (1392), and Gelasius (1412) ruled this see during its peace with Rome. In 1416 the Bishop of Przemyśl embraced the schism. Elias (1422) was the first bishop who took the title Przemyśl and Sambor. The See of Sambor was founded in the thirteenth century, and shortly afterwards the two dioceses were united, although the double name was not used until assumed by Elias. Athanasius (1440–49) opposed the union of the Council of Florence. The succeeding bishops of Przemyśl adhered to the schism, and remained schismatic for over a century.

In 1594 Bishop Michael Kopystynski (1591–1610) took up the idea of reunion with Rome and added his name to the declaration of union at the Synod of Brest. Later he withdrew it and was excommunicated by the Greek Catholic Metropolitan of Kieff, Michael Ragosa. His successor, Athanasius Krupetzki (1610–52), was a zealous Catholic bishop. Meanwhile the schismatics elected another bishop and drove out Athanasius; and for nearly a century there was a double line of Greek bishops, the Orthodox holding the see at Przemyśl, and the Catholics holding it at Sambor. In 1668 the Orthodox coadjutor bishop, George Hoshovski, took up his residence at Sanok, and from that date the title of Bishop of Przemyśl, Sambor, and Sanok was assumed, although no see was established at Sanok. The succeeding Catholic bishops were Procopius Chmelovski (1652), Anthony Terletzki (1662), and John Malachovski (1669). The next Orthodox bishop was Innocent Vinnitzki (1680–1700), and during his administration the Catholic Bishop Malachovski left his see and went to Warsaw, where he died in 1691. From the time of his consecration Bishop Innocent had announced his intention of uniting with the Holy See. He prepared his clergy

for the union, and on 23 June, 1691, he renounced the schism and signed the act of union. Since then the Greek Diocese of Przemyśl has always been Catholic. In 1694 the first Catholic diocesan synod of the Greek Rite was held at Sambor, where the new situation of the Greek Catholic clergy was canonically established. The bishops succeeding him were George Vinnitzki (1700–13), Jerome Ustritzki (1715–46), Onuphrius Shumlanski (1746–62), Athanasius Szepticki (1762–79), Maximilian Ryllo (1780–94), and Anton Angelovich (1795–1808). The see remained vacant from 1808 until 1813, during the Napoleonic wars, but was administered by the Metropolitan of Lemberg, the well-known historian of the Greek Uniats, Michael Harasievich. The succeeding bishops were Michael Levitzki (1813–16), John Snigurski (1818–47), Gregor Jachimovich (1848–59), Thomas Polanski (1860–69), John Stupnitzki (1872–90), and Julian Pelesz (1891–96), the renowned author of the "History of the Union of the Ruthenian Church with Rome". The present bishop (1911) is Constantine Chekhovich.

ANDREW J. SHIPMAN.

Psalm.—The Psalter, or Book of Psalms, is the first book of the "Writings" (*Kethubhim* or *Hagiographa*), i. e. of the third section of the printed Hebrew Bible of to-day. In this section of the Hebrew Bible the canonical order of books has varied greatly; whereas in the first and second sections, that is, in the Law and the Prophets, the books have always been in pretty much the same order. The Talmudic list (*Baba Bathra* 14 b) gives Ruth precedence to Psalms. St. Jerome heads the "Writings" with Psalms, in his "Epistola ad Paulinum" (P. L., XXII, 547); with Job in his "Prologus Galeatus" (P. L., XXVIII, 555). Many Massoretic MSS., especially Spanish, begin the "Writings" with Paralipomena or Chronicles. German Massoretic MSS. have led to the order of books in the *Kethubhim* of the modern Hebrew Bible. The Septuagint puts Psalms first among the Sapiential Books. These latter books, in "Cod. Alexandrinus", belong to the third section and follow the Prophets. The Clementine Vulgate has Psalms and the Sapiential Books in the second section, and after Job. This article will treat the name of the Psalter, its contents, the authors of the Psalms, their canonicity, text, versions, poetic form, poetic beauty, theological value, and liturgical use.

I. NAME.—The Book of Psalms has various names in the Hebrew, Septuagint, and Vulgate texts.

A. The Hebrew name is תהלים, "praises" (from הלל, "to praise"); or ספר תהלים, "book of praises". This latter name was known to Hippolytus, who wrote *Ἐβραῖοι περιέγραψαν τὴν βίβλον Σέφρα θελείμ* (ed. Lagarde, 188). There is some doubt in regard to the authenticity of this fragment. There can be no doubt, however, in regard to the transliteration *Σφαρθελλείμ* by Origen (P. G., XII, 1084); and "*sephar tallim, quod interpretatur volumen hymnorum*" by St. Jerome (P. L., XXVIII, 1124). The name "praises" does not indicate the contents of all the Psalms. Only Ps. cxlv (cxlv) is entitled "praise" (תהלה). A synonymous name *hallel* was, in later Jewish ritual, given to four groups of songs of praise, Pss. civ–cvi, exi–cxvii, cxxxv–cxxxvi, cxlvi–cl (Vulg., ciii–cvi, cx–cxvi, cxxxvi–cxxxvii, cxlv–cl). Not only these songs of praise, but the entire collection of psalms made up a manual for temple service—a service chiefly of praise; hence the name "Praises" was given to the manual itself.

B. The Septuagint MSS. of the Book of Psalms read either *ψαλμοί*, psalms, or *ψαλτήριον*, psalter. The word *ψαλμός* is a translation of מְזֻמָּר, which occurs in the titles of fifty-seven psalms. *Ψαλμός* in classical Greek meant the twang of the strings of a musical

instrument; its Hebrew equivalent (from זָמַר, "to trim") means a poem of "trimmed" and measured form. The two words show us that a psalm was a poem of set structure to be sung to the accompaniment of stringed instruments. The New Testament text uses the names ψαλμοί (Luke, xxiv, 44), βίβλος ψαλμῶν (Luke, xx, 42; Acts, i, 20), and Δαυειδ (Heb., iv, 7).

C. The Vulgate follows the Greek text and translates *psalmi*, *liber psalmodum*. The Syriac Bible in like manner names the collection *Mazmōrē*.

II. CONTENTS.—The Book of Psalms contains 150 psalms, divided into five books, together with four doxologies and the titles of most of the psalms.

A. *Number*.—The printed Hebrew Bible lists 150 psalms. Fewer are given by some Massoretic MSS. The older Septuagint MSS. (Codd. Sinaiticus, Vaticanus, and Alexandrinus) give 151, but expressly state that the last psalm is not canonical: "This psalm was written by David with his own hand and is outside the number", ἔξωθεν τοῦ ἀριθμοῦ. The Vulgate follows the numeration of the Septuagint but omits Ps. cli. The differences in the numerations of the Hebrew and Vulgate texts may be seen in the following scheme:

Hebrew	Septuagint and Vulgate
i-viii	i-viii
ix	ix-x
x-cxii	xi-cxiii
cxiii	cxiv-cxv
cxiv-cxv	cxvi
cxvi-cxlv	cxvii-cxlvii
cxlv-cxlvii	cxlviii
cxlviii-cl	cxlviii-cl

In the course of this article, we shall follow the Hebrew numeration and bracket that of the Septuagint and Vulgate. Each numeration has its defects; neither is preferable to the other. The variance between Massorah and Septuagint texts in this numeration is likely enough due to a gradual neglect of the original poetic form of the Psalms; such neglect was occasioned by liturgical uses and carelessness of copyists. It is admitted by all that Pss. ix and x were originally a single acrostic poem; they have been wrongly separated by Massorah, rightly united by the Septuagint and Vulgate. On the other hand Ps. cxlv (cxlv) is made up of two songs—verses 1-11 and 12-15. Pss. xlii and xliii (xli and xlii) are shown by identity of subject (yearning for the house of Jahweh), of metrical structure and of refrain (cf. Heb. Ps. xlii, 6, 12; xliii, 5), to be three strophes of one and the same poem. The Hebrew text is correct in counting as one Ps. cxvi (cxiv+cxv) and Ps. cxlvii (cxlv+cxlviii). Later liturgical usage would seem to have split up these and not a few other psalms. Zenner ("Die Chorgesänge im Buche der Psalmen", II, Freiburg im Br., 1896) ingeniously combines into what he deems were the original choral odes: Pss. i, ii, iii, iv; vi+xiii (vi+xii); ix+x (ix); xix, xx, xxi (xx, xxi, xxii); xlv+xlvi (xlv+xlvi); lxix+lx (lxix+lx); cxiv+cxv (cxiii); cxlvii, cxlix, cl. A choral ode would seem to have been the original form of Pss. xiv+lx (xiii+lxix). The two strophes and the epode are Ps. xiv; the two antistrophes are Ps. lx (cf. Zenner-Wiesmann, "Die Psalmen nach dem Urtext", Münster, 1906, 305). It is noteworthy that, on the breaking up of the original ode, each portion crept twice into the Psalter: Ps. xiv=liii, Ps. lx=xl, 14-18. Other such duplicated psalms are Ps. cviii, 2-6 (cvii)=Ps. lvii, 8-12 (lvi); Ps. cviii, 7-14 (cvii)=Ps. lx, 7-14 (lix); Ps. lxxi, 1-3 (lxx)=Ps. xxxi, 2-4 (xxx). This loss of the original form of some of the psalms is allowed by the Biblical Commission (1 May, 1910) to have been due to liturgical uses, neglect of copyists, or other causes.

B. *Division*.—The Psalter is divided into five books. Each book, save the last, ends with a doxology. These liturgical forms differ slightly. All agree that

the doxologies at the end of the first three books have nothing to do with the original songs to which they have been appended. Some consider that the fourth doxology was always a part of Ps. cvi (cv) (cf. Kirkpatrick, "Psalms", IV and V, p. 634). We prefer, with Zenner-Wiesmann (op. cit., 76), to rate it as a doxology pure and simple. The fifth book has no need of an appended doxology. Ps. cl, whether composed as such or not, serves the purpose of a grand doxology which fittingly brings the whole Psalter to its close.

The five books of the Psalter are made up as follows:—

Bk. I: Pss. i-xli (i-xl); doxology, Ps. xli, 14.

Bk. II: Pss. xlii-lxxii (xli-lxxi); doxology, Ps. lxxii, 18-20.

Bk. III: Pss. lxxiii-lxxxix (lxxii-lxxxviii); doxology, Ps. lxxxix, 53.

Bk. IV: Pss. xc-cvi (lxxxix-cv); doxology, Ps. cvi, 48.

Bk. V: Pss. cvii-cl (cvi-cl); no doxology.

In the Massoretic text, the doxology is immediately followed by an ordinal adjective indicating the number of the succeeding book; not so in the Septuagint and Vulgate. This division of the Psalter into five parts belongs to early Jewish tradition. The Midrash on Ps. i tells us that David gave to the Jews five books of psalms to correspond to the five books of the Law given them by Moses. This tradition was accepted by the early Fathers. Hippolytus, in the doubtful fragment already referred to, calls the Psalter and its five books a second Pentateuch (ed. Lagarde, 193). St. Jerome defends the division in his important "Prologus Galeatus" (P. L., XXVIII, 553) and in Ep. cxi (P. L., XXII, 11, 68). Writing to Marcella (P. L., XXIII, 431), he says: "In quinque siquidem volumina psalterium apud Hebræos divisum est". He, however, contradicts this statement in his letter to Sophronius (P. L., XXVIII, 1123): "Nos Hebræorum auctoritatem secuti et maxime apostolorum, qui semper in Novo Testamento psalmodum librum nominant, unum volumen asserimus".

C. *Titles*.—In the Hebrew Psalter, all the psalms, save thirty-four, have either simple or rather complex titles. The Septuagint and Vulgate supply titles to most of the thirty-four psalms that lack Hebrew titles. These latter, called "orphan psalms" by Jewish tradition, are thus distributed in the five books of the Psalter:

Bk. I has 4—Pss. i, iii, x, xxxiii (i, iii, ix (b), xxxii). Of these, Ps. x is broken from Ps. ix; Ps. xxxiii has a title in the Septuagint and Vulgate.

Bk. II has 2—Pss. xliii, lxxi (xlii, lxx). Of these, Ps. xliii is broken from Ps. xlii.

Bk. III has none.

Bk. IV has 10—Pss. xcii, xciii-xcvi, xcix, civ-cvi (xc, xcii-xcvi, xcvi, ciii-cv). Of these, all have titles in the Septuagint and Vulgate.

Bk. V has 18—Pss. cvii, cxi-cxix, cxxxv-cxxxvii, cxlv-cl (cvi, cx-cxviii, cxxxiv-cxxxvii, cxlv-cl). Of these, Ps. cxii has a title in the Vulgate, Ps. cxxxvii in the Septuagint and Vulgate; the quasi-title *hallelû yah* precedes nine (cxi-cxiii, cxxxv, cxlv-cl); the Greek equivalent Ἀλληλουῖα precedes seven others (cvii, cxiv, cxvi-cxix, cxxxvi). Only Ps. cxv [cxiii (b)] has no title either in the Hebrew or the Septuagint.

(1) *Meaning of Titles*.—These titles tell us one or more of five things about the psalms: (a) the author, or, perhaps, collection; (b) the historical occasion of the song; (c) its poetic characteristics; (d) its musical setting; (e) its liturgical use.

(a) *Titles indicating the author*.—Bk. I has four anonymous psalms out of the forty-one (Pss. i, ii, x, xxxiii). The other thirty-seven are Davidic. Ps. x is part of ix; Ps. xxxiii is Davidic in the Septuagint; and Pss. i and ii are prefatory to the entire collection.—Bk. II has three anonymous psalms out of the thirty-

one (Pss. xliii, lxvi, lxxi). Of these, eight Pss., xlii-xlix (xli-xlviii) are "of the sons of Korah" (*libnē qōrah*); Ps. l is "of Asaph"; Pss. li-lxxii are Davidic excepting Ps. lxvii "of the Director" (*lāmenāṣṣēāh*) and Ps. lxxii "of Solomon". Ps. xliii (xlii) is part of xlii (xli); Pss. lxvi and lxvii (lxv and lxvi) are Davidic in the Septuagint and Vulgate.—Bk. III has one Davidic psalm, lxxxvi (lxxxv); eleven "of Asaph", lxxiii-lxxxiii (lxxii-lxxxii); four "of the sons of Korah", lxxxiv, lxxxv, lxxxvii, lxxxviii (lxxxiii, lxxxiv, lxxxvi, lxxxvii); and one "of Ethan", lxxxix (lxxxviii). Ps. lxxxviii is likewise assigned to Heman the Ezrahite.—Bk. IV has two Davidic psalms, ci and cii (c and cii), and one "of Moses". Moreover, the Septuagint assigns to David eight others, Pss. xcī, xciii-xcvii, xcix, civ (xc, xcii-xcvi, xcvi, ciii). The remainder are anonymous.—Bk. V has twenty-seven anonymous psalms out of forty-four. Pss. cviii-cx, cxii, cxiv, cxv, cxviii, cxviii-cxlv (cvii-cix, cxxi, cxxiii, cxv, cxvii, cxvii-cxlv) are Davidic. Ps. cxlvii is "of Solomon". The Septuagint and Vulgate assign Ps. cxlvii (cxlvii) to David, Ps. cxlvi-cxlviii (cxlv-cxlviii) to Aggeus and Zacharias.

Besides these title-names of authors and collections which are clear, there are several such names which are doubtful. —*Lāmenāṣṣēāh* (לַמְנַצֵּחַ); Septuagint, *eis tō tēlos*; Vulg., *in finem*; Douai, "unto the end"; Aquila, τῷ νικητορι, "for the victor"; St. Jerome, *victori*; Symmachus, ἐπὶ νίκης, "a song of victory"; Theodotion, *eis tō nīkos*, "for the victory" now generally interpreted "of the Director". The *Pi'el* of the root means, in I Par., xv, 22, "to be leader" over the basses in liturgical service of song (cf. Oxford Hebrew Dictionary, 664). The title "of the Director" is probably analogous to "of David", "of Asaph", etc., and indicates a "Director's Collection" of Psalms. This collection would seem to have contained 55 of our canonical psalms, whereof 39 were Davidic, 9 Korahite, 5 Asaphic, and 2 anonymous.

Al-Yedūthān, in Pss. lxii and lxxvii (lxii and lxxvi), where the preposition *al* might lead one to interpret *Yedūthān* as a musical instrument or a tune. In the title to Ps. xxxix (xxxviii), "of the Director, of *Yedūthān*, a song of David", *Yedūthān* is without *al* and seems to be the Director (*Menāṣṣēāh*) just spoken of. That David had such a director is clear from I Par., xvi, 41.

(b) Titles indicating the historical occasion of the song:—Thirteen Davidic psalms have such titles. Pss. vii, xviii, xxxiv, lii, liv, lvi, lvii, lix, cxlii (vii, xvii, xxxiii, li, liii, lv, lvi, lviii, cxli) are referred to the time of David's persecution by Saul; Ps. lx (lix) to that of the victories in Mesopotamia and Syria; Ps. li (l) to his sin; Pss. iii and lxiii (lxii) to his flight from Absalom.

(c) Titles indicating poetic characteristics of the psalm:—

Mizmōr (מִזְמוֹר); Septuagint, ψαλμός; Vulg., *psalmus*; a psalm), a technical word not used outside the titles of the Psalter; meaning a song set to stringed accompaniment. There are 57 psalms, most of them Davidic, with the title *Mizmōr*.

Shîr (שִׁיר); Septuagint, ᾠδή; Vulg., *Canticum*; a song), a generic term used 30 times in the titles (12 times together with *Mizmōr*), and often in the text of the Psalms and of other books. In the Psalms (xlii, 9; lxix, 31; xxviii, 7) the song is generally sacred; elsewhere it is a lyric lay (Gen., xxxi, 27; Is., xxx, 29), a love poem (Cant., i, 1.1), or a bacchanalian ballad (Is., xxiv, 9; Eccles., vii, 5).

Māskîl (מִשְׁכָּל); Septuagint, συνέσεως, or *els sūnēsion*; Vulg., *intellectus* or *ad intellectum*), an obscure form found in the titles of 13 psalms (xxxii, xlii, xliv, xlv, lii, lv, lxxiv, lxxviii, lxxxviii, lxxxix, cxliv). (a) Gesenius and others explain "a didactic poem", from Hiph'il of שָׁכַל (cf. Ps. xxxii, 8; I Par., xxviii, 19); but only Pss. xxxii and lxxviii are didactic *Māskîlîm*.

(b) Ewald, Riehm and others suggest "a skilful artistic song", from other uses of the cognate verb (cf. II Par., xxx, 22; Ps. xlvii, 7); Kirkpatrick thinks "a cunning psalm" will do. It is difficult to see that the *Māskîl* is either more artistic or more cunning than the *Mizmōr*. (c) Delitzsch and others interpret "a contemplative poem"; Briggs, "a meditation". This interpretation is warranted by the usage of the cognate verb (cf. Is., xli, 20; Job, xxxiv, 27), and is the only one that suits all *Māskîlîm*.

Tephillah (תְּפִלָּה); Septuagint, προσευχή; Vulg., *oratio*; a prayer), the title to five psalms, xvii, lxxxvi, xc, cii, cxlii (xvi, lxxxv, lxxxix, ci, cxli). The same word occurs in the conclusion to Bk. II (cf. Ps. lxxii, 20), "The prayers of David son of Yishai have been ended". Here the Septuagint ὕμνοι (Vulg., *laudes*) points to a better reading, הַלְלָה, "praise".

Tehillah (תְּהִלָּה); Septuagint, ᾠδὴς; Vulg., *laudatio*; "a song of praise"), is the title only of Ps. cxlv (cxliv).

Mikhtām (מִכְתָּם); Septuagint, στηλογραφία or *eis στηλογραφίαν*; Vulg., *tituli inscriptio* or *in tituli inscriptionem*), an obscure term in the title of six psalms, xvi, lvi-lx (xv, lv-lix), always joined to "of David". Briggs ("Psalms", I, lx; New York, 1906) with the Rabbis derives this title from כְּהֵב, "gold". The *Mikhtāmîm* are golden songs, "artistic in form and choice in contents".

Shiggāyōn (שִׁגְיֹן); Septuagint merely ψαλμός; Vulg., *psalmus*; Aquila, ἀγνόημα; Symmachus and Theodotion, ὑπὲρ ἀγνοίας; St. Jerome, *ignoratio* or *pro ignoratio*), occurs only in the title to Ps. vii. The root of the word means "to wander", "to reel", hence, according to Ewald, Delitzsch, and others, the title means a wild dithyrambic ode with a reeling, wandering rhythm.

(d) Titles indicating the musical setting of a psalm (a specially obscure set):—

Eight titles may indicate the melody of the psalm by citing the opening words of some well-known song:

Nehîlōth (נְהִלֹת); Septuagint and Theodotion, ὑπὲρ τῆς κληρονομουμένης; Aquila, ἀπὸ κληροδοσιῶν; Symmachus, ὑπὲρ κληρουχιῶν; St. Jerome, *super hæreditatibus*; Vulg., *pro ea quæ hæreditatem consequitur*), occurs only in Ps. v. The ancient versions rightly derive the title from נָחַל, "to inherit"; Baethgen ("Die Psalmen", 3rd ed., 1904, p. xxxv) thinks *Nehîlōth* was the first word of some ancient song; most critics translate "with wind instruments" wrongly assuming that *Nehîlōth* means flutes (הַלִּילִים, cf. Is., xxx, 29).

Al-tashhēth (אַל-תַּשְׁחֵת); Septuagint, Aquila, Symmachus, μὴ διαφθεῖρῃς, except Ps. lxxv, Symmachus, περὶ ἀφθαρσίας; St. Jerome, *ut non disperdas* (*David humilem et simplicem*); Vulg., *ne disperdas* or *ne corrumpas*), in Pss. lvii-lix, lxxv (lvi-lviii, lxxiv), meaning "destroy not", may be the beginning of a vintage song referred to in Is., lxxv, 8. Symmachus gives, in title to Ps. lvii, περὶ τοῦ μὴ διαφθεῖρῃς; and in this wise suggests that על originally preceded אַל.

Al-Muth-Labben (עַל-מוֹת לִבֵּן); Septuagint, ὑπὲρ τῶν κυφίων τοῦ υἱοῦ; Vulg., *pro occulis filii*, "concerning the secret sins of the son"; Aquila, νεανιότητος τοῦ υἱοῦ, "of the youth of the son"; Theodotion, ὑπὲρ ακμῆς τοῦ υἱοῦ, "concerning the maturity of the son" in Ps. ix, probably means "set to the tune 'Death Whitens'".

Al-ayyeleth hasshahar (עַל-אַיִלַת הַשָּׁחַר); Septuagint, ὑπὲρ τῆς ἀντιλήψεως τῆς ἑωθινῆς; Vulg., *pro susceptione matutina*, "for the morning offering"; Aquila, ὑπὲρ τῆς ἐλάφου τῆς ὀρθινῆς; Symmachus, ὑπὲρ τῆς βοηθείας τῆς ὀρθινῆς, "the help of the morning"; St. Jerome, *pro cervo matutino*, in Ps. xxii (xxi), very likely means "set to the tune 'The Hind of the Morning'".

Al Shoshannîm in Pss. xlv and lxix (xliv and lxxviii), *Shushan-eduth* in Ps. lx (lix), *Shoshannîm-eduth* in

Ps. lxxx (lxxix) seem to refer to the opening of the song, "Lilies" or "Lilies of testimony". The preposition is 'al or 'él. The Septuagint translates the consonants ὑπὲρ τῶν Ἀλλουωθησομένων; Vulg., *pro iis qui commutabuntur*, "for those who shall be changed".

'Al Yôdnath 'êlêm rehôqim, in Ps. lvi (lv) means "set to 'The dove of the distant terebinth'", or, according to the vowels of Massorah, "set to 'The silent dove of them that are afar'". The Septuagint renders it ὑπὲρ τοῦ λαοῦ τοῦ ἀπὸ τῶν ἀγίων μεμακρυσμένου; Vulg., *pro populo qui a sanctis longe factus est*, "for the folk that are afar from the sanctuary". Baethgen (op. cit., p. xli) explains that the Septuagint understands Israel to be the dove; reads êlêm for 'êlêm, and interprets the word to mean *gods* or *sanctuary*.

'Al Mahalath (Ps. liii), Mahalath leannoth (Ps. lxxxviii) is transliterated by the Septuagint Μαελέθ; by Vulg., *pro Maeleth*. Aquila renders ἐπὶ χορείᾳ, "for the dance"; the same idea is conveyed by Symmachus, Theodotion, Quinta, and St. Jerome (*pro choro*). The word 'Al is proof that the following words indicate some well-known song to the melody of which Pss. liii and lxxxviii (lii and lxxxvii) were sung.

'Al-Haggithith, in titles to Pss. viii, lxxxi, lxxxiv (vii, lxxx, lxxxiii). The Septuagint and Symmachus, ὑπὲρ τῶν ληνῶν; Vulg., and St. Jerome, *pro torcularibus*, "for the wine-presses". They read githoth, pl. of gath. The title may mean that these psalms were to be sung to some vintage-melody. The Massoretic title may mean a Gittite instrument (Targ., "the harp brought by David from Gath"), or a Gittite melody. Aquila and Theodotion follow the reading of Massorah and, in Ps. viii, translate the title ὑπὲρ τῆς γεθθιτιδος; yet this same reading is said by Bellarmine ("Explanatio in Psalmos", Paris, 1889, I, 43) to be meaningless.

One title probably means the kind of musical instrument to be used. Neginôth (נגינות; Septuagint, ἐν ψαλμοῖς, in Ps. iv, ἐν ὕμνοῖς elsewhere; Vulg., *in carminibus*; Symmachus, διὰ ψαλτηρίων; St. Jerome, *in psalmis*) occurs in Pss. iv, vi, liv, lxvii, lxxvi (iv, vi, liii, liv, lxvi, lxxv). The root of the word means "to play on stringed instruments" (I Kings, xvi, 16-18, 23). The title probably means that these psalms were to be accompanied in cantilation exclusively "with stringed instruments". Ps. lxi (lx) has 'Al Neginâth in its title, and was perhaps to be sung with one stringed instrument only.

Two titles seem to refer to pitch. 'Al-'Alâmôth (Ps. xlvi), "set to maidens", i. e. to be sung with a soprano or falsetto voice. The Septuagint renders ὑπὲρ τῶν κρυφίων; Vulg., *pro occultis*, "for the hidden"; Symmachus, ὑπὲρ τῶν αἰώνιων, "for the everlasting"; Aquila, ἐπὶ νεανιοτήτων; St. Jerome, *pro iuventutibus*, "for youth".

'Al-Hasshemînâth (Pss. vi and xii), "set to the eighth"; Septuagint, ὑπὲρ τῆς ὀγδόης; Vulg., *pro octava*. It has been conjectured that "the eighth" means an octave lower, the lower or bass register, in contrast with the upper or soprano register. In I Par., xv, 20-21, Levites are assigned some "with psalteries set to 'Alamoth" (the upper register), others "with harps set to Shemînâth" (the lower register).

(e) Titles indicating the liturgical use of a psalm: —Hamma'aloth, in title of Pss. cxx-cxxxiv (cxix-cxxxiii); Septuagint, ᾠδὴ τῶν ἀναβαθμῶν; St. Jerome, *canticum graduum*, "the song of the steps". The word is used in Ex., xx, 26 to denote the steps leading up from the women's to the men's court of the Temple plot. There were fifteen such steps. Some Jewish commentators and Fathers of the Church have taken it that, on each of the fifteen steps, one of these fifteen Gradual Psalms was chanted. Such a theory does not fit in with the content of these psalms; they are not temple-psalms. Another theory, proposed by Gesenius, Delitzsch, and others, refers "the steps" to the stair-like parallelism of the Gradual Psalms. This stair-like parallelism is not

found in all the Gradual Psalms; nor is it distinctive of any of them. A third theory is the most probable. Aquila and Symmachus read ἐλς τὰς ἀναβάσεις, "for the goings up"; Theodotion has ἄσμα τῷ ἀναβασέων. These are a Pilgrim Psalter, a collection of pilgrim-songs, of songs of those "going up to Jerusalem for the festivals" (I Kings, i, 3). Isaias tells us the pilgrims went up singing (xxx, 29). The psalms in question would be well suited for pilgrim-song. The phrase "to go up" to Jerusalem (ἀναβαίνειν) seems to refer specially to the pilgrim goings-up (Mark, x, 33; Luke, ii, 42, etc.). This theory is now commonly received. A less likely explanation is that the Gradual Psalms were sung by those "going up" from the Babylonian exile (I Esd., vii, 9).

Other liturgical titles are: "For the thank-offering", in Ps. c (xcix); "To bring to remembrance", in Pss. xxxviii and lxx (xxxvii and lxix); "To teach", in Ps. xl (xxxix); "For the last day or the Feast of Tabernacles", in the Septuagint of Ps. xxix (xxviii), ἐξοδίου σκηνῆς; Vulg., *in consummatione tabernaculi*. Psalm xxx (xxix) is entitled "A Song at the Dedication of the House". The psalm may have been used at the Feast of the Dedication of the Temple, the Encania (John, x, 22). This feast was instituted by Judas Machabeus (I Mach., iv, 59) to commemorate the rededication of the temple after its desecration by Antiochus. Its title shows us that Ps. xcii (xci) was to be sung on the Sabbath. The Septuagint entitles Ps. xxiv (xxiii) τῆς μᾶς σαββάτων, "for the first day of the week"; Ps. xlviii (xlvii) δευτέρᾳ σαββάτου, "for the second day of the week"; Ps. xciv (xciii), τετράδι σαββάτων, "for the fourth day of the week"; Ps. xciii (xcii) ἐλς τὴν ἡμέραν τοῦ προσαβάτου, "for the day before the Sabbath". The Old Latin entitles Ps. lxxxi (lxxx) quinta sabbati, "the fifth day of the week". The Mishna (Tamid, VII, 13) assigns the same psalms for the daily Temple service and tells us that Ps. lxxxii (lxxxi) was for the morning sacrifice of the third day (cf. James Wm. Thirtle, "The Titles of the Psalms, Their Nature and Meaning Explained", New York, 1905).

(2) Value of the Titles:—Many of the critics have branded these titles as spurious and rejected them as not pertaining to Holy Writ; such critics are de Wette, Cheyne, Olshausen, and Vogel. More recent critical Protestant scholars, such as Briggs, Baethgen, Kirkpatrick, and Fullerton, have followed up the lines of Ewald, Delitzsch, Gesenius, and Köster, and have made much of the titles, so as thereby to learn more and more about the authors, collections, occasions, musical settings, and liturgical purposes of the Psalms.

Catholic scholars, while not insisting that the author of the Psalms superscribed the titles thereof, have always considered these titles as an integral part of Holy Writ. St. Thomas (in Ps. vi) assigns the titles to Esdras: "Sciendum est quod tituli ab Esdra facti sunt partim secundum ea quæ tunc agebantur, et partim secundum ea quæ contigerunt." So comprehensive a statement of the case is scarcely to the point; most modern scholars give to the titles a more varied history. Almost all, however, are at one in considering as canonical these at times obscured directions. In this unanimity Catholics carry out Jewish tradition. Pre-Massoretic tradition preserved the titles as Scripture, but lost much of the liturgical and musical meaning, very likely because of changes in the liturgical cantilation of the Psalms. Massoretic tradition has kept carefully whatsoever of the titles it received. It makes the titles to be part of Sacred Scripture, preserving their consonants, vowel-points, and accents with the very same care which is given to the rest of the Jewish Canon. The Fathers give to the titles that respect

and authority which they give to the rest of Scripture. True, the obscurity of the titles often leads the Fathers to mystical and highly fanciful interpretations. St. John Chrysostom ("De Compunctione", II, 4; P. G., XLVII, 415) interprets *ὑπὲρ τῆς ὀγδόης*, "for the eighth day", "the day of rest", "the day of eternity". St. Ambrose (In Lucam, V, 6) sees in this title the same mystical number which he notes in the Eight Beatitudes of St. Matthew, in the eighth day as a fulfilment of our hope, and in eight as a sum of all virtues: "pro octava enim multi inscribuntur psalmi". In this matter of mystical interpretations of the titles, St. Augustine is in advance of the generally literal and matter-of-fact Sts. Ambrose and John Chrysostom. Yet when treating the worth and the genuineness of the titles, no Father is more decided and pointed than is the great Bishop of Hippo. To him the titles are inspired Scripture. Commenting on the title to Ps. li, "of David, when Nathan the Prophet came to him, what time he had gone into Bethsabee", St. Augustine (P. L., XXXVI, 586) says it is as inspired as is the story of David's fall, told in the Second Book of Kings (xi, 1-6); "Utraque Scriptura canonica est, utrique sine ulla dubitatione a Christianis fides adhibenda est". Some recent Catholic scholars who are of St. Augustine's mind in this matter are: Cornely, "Specialis Introductio in Libros V. T.", II, 85; Zschokke, "Hist. Sac. V. T.", 206; Thalhoffer, "Erklärung der Psalmen", 7th ed., 1904, 8; Patrizi, "Cento Salmi", Rome, 1875, 32; Danko, "Historia V. T.", 276; Hoberg, "Die Psalmen der Vulgata", 1892, p. xii. Only a very few Catholic scholars have denied that the titles are an integral part of Holy Writ. Gigot, in "Special Introduction to the Old Testament" (New York, 1906), II, 75, cites with approval this denial by Lesêtre, "Le Livre des Psaumes" (Paris, 1883), p. 1. Barry, in "Tradition of Scripture" (New York, 1906), 102, says: "It is plausible to maintain that inscriptions to which the Massorah, LXX, and Vulgate bear witness cannot be rejected. But to look on them, under all circumstances, as portions of Scripture would be to strain the Tridentine Decrees". Because of the danger that, without grave reason, these time-honoured parts of the Bible may be rated as extra-canonical, the Biblical Commission has recently (1 May, 1910) laid special stress on the value of the titles. From the agreement we have noted between the titles of Massorah and those of the Septuagint, Vulgate, Aquila, Symmachus, Theodotion, St. Jerome, etc., the Commission has decided that the titles are older than the Septuagint and have come down to us, if not from the authors of the Psalms, at least from ancient Jewish tradition, and that, on this account, they may not be called into doubt, unless there be some serious reason against their genuineness. Indeed, the very disagreements which we have noted lead us to the same conclusion. By the time the Septuagint was written, the titles must have been exceedingly old; for the tradition of their vocalization was already very much obscured.

III. AUTHORS OF THE PSALMS.—A. *Witness of Tradition.*—(1) Jewish tradition is uncertain as to the authors of the Psalms. Baba Bathra (14 f) mentions ten; Pesachim (10) attributes all the Psalms to David.

(2) Christian tradition is alike uncertain. St. Ambrose, "In Ps. xliii and xlvi" (P. L., XIV, 923), makes David to be the sole author. St. Augustine, in "De Civitate Dei", XVII, 14 (P. L., XLI, 547), thinks that all the Psalms are Davidic and that the names of Aggeus and Zacharias were superscribed by the poet in prophetic spirit. St. Philastrius, Hær. 130 (P. L., XII, 1259), brands the opposite opinion heretical. On the other hand, plurality of authorship was defended by Origen, "In Ps." (P. G., XII,

1066); St. Hilary, "In Ps. Procem. 2" (P. L., IX, 233); Eusebius, "In Ps. Procem. in Pss. 41, 72" (P. G., XXIII, 74, 368); and many others. St. Jerome, "Ad Cyprianum", Epist. 140, 4 (P. L., XXII, 1169), says that "they err who deem all the psalms are David's and not the work of those whose names are superscribed".

(3) This disagreement, in the matter of authorship of the Psalms, is carried from the Fathers to the theologians. Davidic authorship is defended by St. Thomas, the converted Jew Archbishop Paul of Burgos, Bellarmine, Salmeron, Sa, Mariana; multiple authorship is defended by Nicholas of Lyra, Cajetan, Sixtus Senensis, Bonfrère, and Menochio.

(4) The Church has come to no decision in this matter. The Council of Trent (Sess. IV, 8 April, 1546), in its decrees on Sacred Scripture, includes "Psalterium Davidicum 150 Psalmorum" among the Canonical Books. This phrase does not define Davidic authorship any more than the number 150, but only designates the book which is defined to be canonical (cf. Pallavicino, "Istoria del Concilio di Trento", I. VI, §91, Naples, 1853, I, 376). In the preliminary *vota*, fifteen Fathers were for the name "Psalmi David"; six for "Psalterium Davidicum"; nine for "Libri Psalmorum"; two for "Libri 150 Psalmorum"; sixteen for the name adopted, "Psalterium Davidicum 150 Psalmorum"; and two had no concern which of these names was chosen (cf. Theiner, "Acta Authentica Concilii Tridentini", I, 72 sq.). From the various *vota* it is clear that the Council had no intention whatsoever of defining Davidic authorship.

(5) The recent Decree of the Biblical Commission (1 May, 1910) decides the following points:

(a) Neither the wording of the decrees of the councils nor the opinions of certain Fathers have such weight as to determine that David is sole author of the whole Psalter.

(b) It cannot be prudently denied that David is the chief author of the songs of the Psalter.

(c) Especially can it not be denied that David is the author of those psalms which, either in the Old or in the New Testament, are clearly cited under the name of David, for instance ii, xvi, xviii, xxxii, lxix, cx (ii, xv, xvii, xxxi, lxviii, cix).

B. *Witness of Old Testament.*—In the above decision the Biblical Commission has followed not only Jewish and Christian tradition, but Jewish and Christian Scripture as well. The Old Testament witness to the authorship of the Psalms is chiefly the titles. These seem to attribute various psalms, especially of Books I-III, to David, Asaph, the sons of Korah, Solomon, Moses, and others.

(1) David:—The titles of seventy-three psalms in the Massoretic Text and of many more in the Septuagint seem to single out David as author: cf. Pss. iii-xli (iii-xl), i. e. all of Bk. I save only x and xxxiii; Pss. li-lxx (l-lxix), except lxvi and lxvii, in Bk. II; Ps. lxxxvi (lxxxv) of Bk. III; Ps. ciii (cii) in Bk. IV; Pss. cviii-cx, cxii, cxiv, cxxi, cxxiii, cxxxv-cxlv (evii-cix, cxxi, cxxiii, cxxx, cxxxiv-cxlv) of Bk. V. The Hebrew title is לְדָוִד. It is now generally held that, in this Hebrew word, the preposition *le* has the force of a genitive, and that the Septuagint *τῷ Δαυὶδ* "of David", is a better translation than the Vulgate *ipsi David*, "unto David himself". Does this preposition mean authorship? Not in every title; else both David and the Director are the authors of Ps. xix (xviii), and all the sons of Korah, together with the Director, are joint authors of the psalms attributed to them. In the case of such composite titles as "of the Director, a psalm of David" (Ps. xix), or "of the Director, of the sons of Korah, a psalm" (Ps. xlviii), we probably have indications not of authorship but of various collections of psalms—the collections entitled "David", "the Director", "the sons of Korah".

Just as the New Testament, the Council of Trent, and many Fathers of the Church speak of "David", "the Psalter of David", "the Psalms of David", not in truth to infer that all the psalms are David's, but because he was the psalmist *par excellence*, so the titles of many psalms assign them not so much to their authors as to their collectors or to the chief author of the collection to which they pertain. On the other hand, some of the longer titles go to show that "of David" may mean authorship. Take an instance: "Of the Director, to the tune 'Destroy not', of David, a chosen piece (*Mikhtām*), when he fled from the face of Saul into the cave" (Ps. lvii). The historical occasion of the Davidic composition of the song, the lyric quality of the song, its inclusion in the early collection "of David" and later in the Director's hymn-book, the tune to which the psalm was either written by David or set by the Director—all these things seem to be indicated by the very composite title under consideration. Of a sort with the Davidic titles is the ending subscribed to the first two books of the Psalms: "Amen, Amen; ended are the praises of David, son of Yishai" (Ps. lxxii, 20). This subscription is more ancient than the Septuagint; it would be altogether out of place were not David the chief author of the psalms of the two books whereto it is appended.

Further Old-Testament evidence of Davidic authorship of the Psalms, as suggested by the Biblical Commission's recent Decree, are David's natural poetic talent, shown in his songs and dirges of II Kings and I Par., together with the fact that it was he who instituted the solemn levitical cantilation of psalms in the presence of the Ark of the Covenant (I Par., xvi, xxiii-xxv). The songs and dirges attributed to David are significantly alike to the Davidic psalms in spirit and style and wording. Let us examine the opening lines of II Kings, xxii:—

"And David spoke to Jahweh the words of this song in the day that Jahweh saved him from the grasp of his foes and out of the hands of Saul, and he said:

2. Jahweh is my Cliff, my Fortress, my Way of Escape,

3. My God, my Rock to Whom I betake me,
My Shield, the Horn of my salvation, my Tower.
My Refuge, my Saviour, from wrong dost Thou save me.

4. Shouting praise, I cry to Jahweh,
And from my foe I get salvation".

This undoubtedly Davidic song it were well to compare, part for part, with Ps. xviii (xvii). We shall cite only the title and opening lines of this Davidic psalm:

"Of the Director, of the servant of Jahweh, David, who spake to Jahweh the words of this song in the day that Jahweh saved him from the grasp of his foes and out of the hands of Saul, and he said:

2. Heartily I love Thee, Jahweh, my Might,

3. Jahweh, my Cliff, my Fortress, my Way of Escape,

My God, my Rock to whom I betake me,
My Shield, the Horn of my Salvation, my Tower!

4. Shouting praise, I cry to Jahweh,
And from my foe I get salvation"!

The two songs are clearly identical, the slight differences being probably due in the main to different liturgical redactions of the Psalter. In the end the writer of II Kings gives "the last words of David" (xxiii, 1)—to wit, a short psalm in the Davidic style wherein David speaks of himself as "Israel's sweet singer of songs", "egregius psalter Israel" (II Kings, xxiii, 2). In like manner the Chronicler (I Par., xvi, 8-36) quotes as Davidic a song made up of Ps. cv, 1-13, Ps. xevi, and a small portion of Ps. cvi. Finally, the Prophet Amos addresses the Samaritans: "Ye that sing to the sound of the psaltery; they have thought themselves to have instruments of music like David" (vi, 5). The poetic power of David stands out as a characteristic of the Shepherd King. His

elegiac plaints at the death of Saul and Jonathan (II Kings, i, 19-27) reveal some power, but not that of the Davidic psalms. The above reasons for Davidic authorship are impugned by many who insist on the late redaction of II Kings, 21-24 and upon the discrepancies between the passages we have paralleled. The question of late redaction of the Davidic songs in II Kings is not within our scope; nor does such late redaction destroy the force of our appeal to the Old Testament, since that appeal is to the Word of God. In regard to the discrepancies, we have already said that they are explainable by the admission that our Psalter is the result of various liturgical redactions, and does not present all the psalms in the precise form in which they proceeded from their original writers.

(2) Asaph: Asaph is accredited, by the titles, with twelve psalms, l, lxxiii-lxxxiii (xlix, lxxii-lxxxii). These psalms are all national in character and pertain to widely-separated periods of Jewish history. Ps. lxxxiii (lxxxii), although assigned by Briggs ("Psalms", New York, 1906, p. lxvii) to the early Persian period, seems to have been written at the time of the havoc wrought by the Assyrian invasion of Tiglath-pileser III in 737 B. C. Ps. lxxiv (lxxxiii) was probably written, as Briggs surmises, during the Babylonian Exile, after 586 B. C. Asaph was a Levite, the son of Barachias (I Par., vi, 39), and one of the three chiefs of the Levitical choir (I Par., xv, 17). The "sons of Asaph" were set aside "to prophesy with harps and with psalteries and with cymbals" (I Par., xxv, 1). It is probable that members of this family composed the psalms which later were collected into an Asaph psalter. The features of these Asaph psalms are uniform: frequent allusions to the history of Israel with a didactic purpose; sublimity and vehemence of style; vivid description; an exalted conception of the deity.

(3) The Sons of Korah:—The Sons of Korah are named in the titles of eleven psalms—xlii-xlix, lxxxiv, lxxxv, lxxxvii, lxxxviii (xli-xlviii, lxxxiii, lxxxiv, lxxxvi, lxxxvii). The Korahim were a family of temple singers (II Par., xx, 19). It can scarcely be that each psalm of this group was jointly composed by all the sons of Korah; each was rather composed by some member of the guild of Korah; or, perhaps, all were gathered from the various sources into one liturgical hymnal by the guild of the sons of Korah. At all events, there is a oneness of style to these hymns which is indicative of oneness of Levitical spirit. The features of the Korahite psalms are: a great love for the Holy City; a yearning for the public worship of Israel; a supreme trust in Jahweh; and a poetic form which is simple, elegant, artistic, and well-balanced. From their Messianic ideas and historical allusions, these psalms seem to have been composed between the days of Isaia and the return from exile.

(4) Moses:—Moses is in the title of Ps. xc (lxxxix). St. Augustine (P. L., XXXVII, 1141) does not admit Mosaic authorship; St. Jerome (P. L., XXII, 1167) does. The author imitates the songs of Moses in Deut., xxxii and xxxiii; this imitation may be the reason of the title.

(5) Solomon:—Solomon is in the titles to Pss. lxxii and cxxvii (lxxi and cxxvi), probably for a similar reason.

(6) Ethan:—Ethan, in the title of Ps. lxxxix (lxxxviii), should probably be *Idithun*. The Psalter of *Idithun*, or *Yedāthān*, contained also Pss. xxxix, lxii, lxxvii (xxxviii, lxi, lxxvi).

C. *Witness of the New Testament*.—To Catholics, believing as they do fully in the Divinity of Christ and inerrancy of Holy Writ, New Testament citations render Pss. ii, xvi, xxxii, xxxv, lxix, cix, cx (ii, xv, xxxi, xxxiv, lxxviii, cviii, cix) David without the shadow of a doubt. When the Pharisees said that the Christ was the Son of David, Jesus put them the question: "How then doth David in spirit call him Lord, saying:

The Lord said to my Lord" (cf. Matt., xxii, 43-45; Mark, xii, 36-37; Luke, xx, 42-44; Ps. cx, 1). There can be here no question of the name of a collection "of David". Nor is there question of a collection when St. Peter, on the first Pentecost in Jerusalem, says: "For David ascended not into heaven; but he himself said: The Lord said to my Lord etc." (Acts, ii, 34). Davidic authorship is meant by Peter, when he cites Pss. ixix (lxviii), 26, cix (cviii), 8, and ii, 1-2 as "from the mouth of David" (Acts, i, 16; iv, 25). And when the chief Apostle has quoted Ps. xvi (xv), 8-11, as the words of David, he explains how these words were intended by the dead patriarch as a prophecy of centuries to come (Acts, ii, 25-32). St. Paul's testimony is conclusive, when he (Rom., iv, 6; xi, 9) assigns to David parts of Pss. xxxii, xxxv, and lxix (xxxi, xxxiv, lxviii). A non-Catholic might object that St. Paul refers to a collection called "David", especially as such a collection seems clearly meant by "in David", *ἐν Δαυιδ* of Heb., iv, 7. We answer, that this is an evasion: had St. Paul meant a collection, he would have dictated *ἐν Δαυιδ* in the letter to the Romans.

D. *The Critics* incline to do away with all question of Davidic authorship. Briggs says: "It is evident from the internal character of these psalms, with a few possible exceptions, that David could not have written them" (Psalms, p. lxi). Ewald allows that this internal evidence shows David to have written Pss. iii, iv, vii, xi, xv, xviii, first part of xix, xxiv, xxxix, xxxii, ci (iii, iv, vii, xi, xiv, xvii, xxiii, xxviii, xxxi, c).

IV. CANONICITY.—A. *The Christian Canon* of the Psalms presents no difficulty; all Christians admit into their canon the 150 psalms of the Canon of Trent; all reject Ps. cli of the Septuagint, probably a Machabean addition to the canon.

B. *The Jewish Canon* presents a vexing problem. How has the Psalter been evolved? The traditional Jewish opinion, generally defended by Catholic scholars, is that not only the Jewish Canon of the Psalms but the entire Palestinian Canon of the Old Testament was practically closed during the time of Esdras (see CANON). This traditional opinion is probable; for the arguments in its favour, cf. Cornely, "Introductio Generalis in N. T. Libros", I (Paris, 1894), 42.

(1) *The Critical View*:—These arguments are not all admitted by the critics. Says Driver: "For the opinion that the Canon of the Old Testament was closed by Ezra, or his associates, there is no foundation in antiquity whatever" ("Introduction to the Literature of the Old Testament", New York, 1892, p. x). In regard to the Psalms Wellhausen says: "Since the Psalter is the hymn-book of the congregation of the Second Temple, the question is not whether it contains any post-exilic psalms, but whether it contains any pre-exilic psalms" (Bleek's "Introduction", ed. 1876, 507). Hitzig ("Begriff der Kritik", 1831) deems that Books III-V are entirely Machabean (168-135 B. C.). Olshausen ("Die Psalmen", 1853) brings some of these psalms down to the Hasmonæan dynasty, and the reign of John Hyrcanus (135-105 B. C.). Duhm ("Die Psalmen", 1899, p. xxi) allows very few pre-Machabean psalms, and assigns Pss. ii, xx, xxi, lxi, lxiii, lxxii, lxxxiv (b), cxxxii [ii, xix, lx, lxii, lxxi, lxxxii (b), cxxx] to the reigns of Aristobulus I (105-104 B. C.) and his brother Alexander Jannæus (104-79 B. C.); so that the Canon of the Psalter was not closed till 70 B. C. (p. xxiii). Such extreme views are not due to arguments of worth. So long as one refuses to accept the force of the traditional argument in favour of the Esdras Canon, one must at all events admit that the Jewish Canon of the Psalms was undoubtedly closed before the date of the Septuagint translation. This date is 285 B. C., if we accept the authority of the

Letter of Aristeas (see SEPTUAGINT); or, at the very latest 132 B. C., the period at which Ben Sirach wrote, in the prologue to Ecclesiasticus, that "the law itself and the prophets and the rest of the books [i. e. the Hagiographa, of which were the Psalms] had been translated into Greek". This is the opinion of Briggs (p. xii), who sets the final redaction of the Psalter in the middle of the second century B. C.

The gradual evolution of the Book of Psalms is now quite generally taken by the critics as a matter of course. Their application of the principles of higher criticism does not result in any uniformity of opinion in regard to the various strata of the Psalter. We shall present these strata as they are indicated by Prof. Briggs, probably the least rash of those who have lately published what are called "critical editions" of the Psalms. His method of criticism is the usual one; by a rather subjective standard of internal evidence, he carves up some psalms, patches up others, throws out portions of others, and "edits" all. He assigns seven psalms to the early Hebrew monarchy; seven to the middle monarchy; thirteen to the late monarchy; thirteen to the time of exile; thirty-three to the early Persian period; sixteen to the middle Persian period (the times of Nehemias); eleven to the late Persian period; "the great royal advent psalm" (Pss. xciii, xcvi-c) together with eight others to the early Greek period (beginning with Alexander's conquest); forty-two to the late Greek period, and to the Machabean period Pss. xxxiii, cii (b), cix (b), cxviii, cxxxix (c), cxxix of the Pilgrim Psalter and cxlvii, cxlix of the Hallels.

Of these psalms and portions of psalms, according to Briggs, thirty-one are "psalms apart", that is never were incorporated into a Psalter before the present canonical redaction was issued. The rest were edited in two or more of the twelve Psalters which mark the evolution of the Book of Psalms. The earliest collection of psalms was made up of seven *Mikhtāmim*, "golden pieces", of the middle Persian period. In the late Persian period thirteen *Maskilim* were put together as a collection of meditations. At the same time, seventy-two psalms were edited, as a prayer-book for use in the synagogue, under the name of "David"; of these thirteen have in their titles references to David's life, and are thought to have formed a previous collection by themselves. In the early Greek period in Palestine, eleven psalms were gathered into the minor psalter entitled the "Sons of Korah".

About the same time in Babylonia, twelve psalms were made into a Psalter entitled "Asaph". Not long thereafter, in the same period, the exilic Ps. lxxxviii, together with two orphan Pss., lxvi and lxvii, were edited along with selections from "David", "Sons of Korah", and "Asaph", for public worship of song in the synagogue; the name of this psalter was "Mizmōrīm". A major psalter, the Elohist, Pss. xlii-lxxxiii (xli-lxxxii), is supposed to have been made up, in Babylonia, during the middle Greek period, of selections from "David", "Korah", "Asaph", and "Mizmōrīm"; the name is due to the use of *Elohim* and avoidance of *Jahweh* in these psalms. About the same time, in Palestine, a prayer-book was made up of 54 from "Mizmōrīm", 16 psalms from "David", 4 from "Korah", and 1 from "Asaph"; this major psalter bore the name of the "Director". The Hallels, or Alleluistic songs of praise, were made up into a psalter for temple service in the Greek period. These psalms have *halleluyah* (Praise ye Yah) either at the beginning (Pss. cxi, cxii), or at the close (Pss. civ, cv, cxv, cxvii), or at both the beginning and close (Pss. cvi, cxiii, cxxxv, cxlvi-cl). The Septuagint gives Ἀλληλουία also at the beginning of Pss. cv, cvii, cxiv, cxvi, cxix, cxxxvi. Briggs includes as Hallels all these except cxviii and cxix, "the former being a triumphal Machabean song,

the latter the great alphabetic praise of the law". A like minor psalter of the Greek period was the "Pilgrim Psalter" (Pss. cxx-cxxxiv), a collection of "Songs of Pilgrimage", the "Songs of Ascents", or "Gradual Psalms", which the pilgrims chanted while going up to Jerusalem for the three great feasts.

(2) The Catholic View:—So extensive an application of divisive criticism to the Psalter does not meet the approval of Catholic exegetes. Successive redaction of the Psalms they readily admit, provided the doctrine of the inspiration of Holy Writ be not impugned. The doctrine of inspiration has regard to the Psalms as they now stand in the canon, and does not impede a Catholic from admitting various redactions of the Psalter previous to our present redaction; in fact, even uninspired liturgical redaction of the inspired Psalms would not be contrary to what the Church teaches in the matter of inspiration, so long as the redactor had preserved intact and absolutely unaltered the inspired meaning of the Sacred Text. The Biblical Commission (1 May, 1910) will not allow that our present redaction contains many Machabean psalms; nor will Driver, Delitzsch, Perowne, Renan, and many other critical scholars. "Had so many psalms dated from this age, it is difficult not to think that they would have borne more prominent marks of it in their diction and style" (Driver, "Introduction to the Literature of the Old Testament", New York, 1892, 365). Pss. xlv, lxxiv, lxxix, and lxxxiii, which Delitzsch and Perowne on historical grounds admit to be Machabean, occasion to Davison (Hastings, "Dict. of the Bible", IV, 152) "unquestionable difficulties arising from their place in the second and third books". There are no certain proofs that these or any psalms are Machabean. The Biblical Commission does not, on this account, deny any of the psalms are Machabean; it leaves that question still open. In the matter of redaction, it allows that "for liturgical or musical or other unknown reasons, psalms may have been split up or joined together" in course of time; and that "there are other psalms, like the *Miserere mei, Deus* [Ps. li], which, in order that they might be better fitted to the historical circumstances and the solemnities of the Jewish people, were slightly re-edited and changed by the omission or addition of a verse or two, so long as the inspiration of the entire text remains intact". That is the important thing; the doctrine of the inspiration of Holy Writ must not suffer in the least. How, then, is the doctrine of the inspiration of the entire text kept intact? Were the previous redactors inspired? Nothing has been determined by any authority of the Church in these matters. We incline to the opinion that God inspired the meanings of the Psalms as originally written, and in like manner inspired every redactor who gathered and edited these songs of Israel until the last inspired redactor set them together in their present form.

V. TEXT.—The Psalms were originally written in Hebrew letters, such as we see only on coins and in a few lapidary inscriptions; the text has come down to us in square Aramaic letters. Only the versions give us any idea of the pre-Massoretic text. Thus far no pre-Massoretic MS. of the Psalms has been discovered. The Massoretic text has been preserved in more than 3400 MSS., of which none is earlier than the ninth century and only nine or ten are earlier than the twelfth (see MANUSCRIPTS OF THE BIBLE). These Massoretic MSS. represent two slightly variant families of one tradition—the texts of Ben Asher and of Ben Naftali. Their variations are of little moment in the interpretation of the Psalms. The study of the rhythmic structure of the Psalms, together with the variations between Massorah and the versions, have made it clear that our Hebrew text is far from perfect, and that its points are often wrong. The

efforts of critics to perfect the text are at times due to no more than a shrewd surmise. The metrical mould is chosen; then the psalm is forcibly adapted to it. It were better to leave the text in its imperfect condition than to render it worse by guess-work. The decree of the Biblical Commission is aimed at those to whom the imperfections in the Massoretic Text are an occasion, though no excuse, for countless conjectural emendations, at times wild and fanciful, which nowadays pass current as critical exegesis of the Psalms.

VI. VERSIONS.—A. *Greek*.—The chief version of the Psalms is the Septuagint. It is preserved to us in Cod. U, Brit. Mus. Pap. 37, seventh century, containing Pss. x-xxxiii; Leipzig Pap., fourth century, containing Pss. xxix-liv; A, Cod. Sinaiticus, fourth century, complete; B, Cod. Vaticanus, fourth century, complete, except Pss. cv, 27-cxxxvii, 6; A, Cod. Alexandrinus, fifth century, complete except Pss. xlix, 19-lxxvi, 10; I, Cod. Bodleianus, ninth century, complete; and in many other later MSS. The Septuagint Version is of great value in the exegesis of the Psalms. It provides pre-Massoretic readings which are clearly preferable to those of the Massoretes. It brings us back to a text at least of the second century B. C. In spite of a seeming servility to words and to Hebrew constructions, a servility that probably existed in the Alexandrian Greek of the Jews of the period, the Septuagint translator of psalms shows an excellent knowledge of Hebrew, and fears not to depart from the letter and to give the meaning of his original. The second-century A. D. Greek versions of Aquila, Symmachus, and Theodotion are extant in only a few fragments; these fragments are witnesses to a text pretty much the same as our Massoretic.

B. *Latin*.—About the middle of the second century the Septuagint Psalter was translated into Latin. Of this Old Latin, or Itala, Version we have only a few MSS. and the citations by the early Latin Fathers. At the request of Pope St. Damasus I, A. D. 383, St. Jerome revised the Itala and brought it back closer to the Septuagint. His revision was soon so distorted that he complained, "plus antiquum errorem quam novam emendationem valere" (P. L., XXIX, 117). This is St. Jerome's "Roman Psalter"; it is used in the recitation of the Office in St. Peter's, Rome, and in the Missal. The corruption of his first translation led St. Jerome to undertake an entirely new translation of the Hexapla edition of the Septuagint. He worked with great care, in Bethlehem, some time before A. D. 392. He indicated by asterisks the parts of the Hebrew text which had been omitted by the Septuagint and were borrowed by him from Theodotion; he marked with the obelus (+) the parts of the Septuagint which were not in the Hebrew. These critical marks came in course of time to be utterly neglected. This translation is the "Gallican Psalter"; it is part of the Vulgate. A third Latin translation of the Psalms, made from the Hebrew Text, with Origen's Hexapla and the other ancient versions in view, was completed by St. Jerome about the end of the fourth century at Bethlehem. This version is of great worth in the study of the Psalter. Dr. Briggs says: "Where it differs from H. and G., its evidence is especially valuable as giving the opinion of the best Biblical scholar of ancient times as to the original text, based on the use of a wealth of critical material vastly greater than that in the possession of any other critic, earlier or later" (p. xxxii).

C.—For other translations, see VERSIONS OF THE BIBLE; RHYMED BIBLES.

VII. POETIC FORM.—A. *Parallelism* (q. v.) is the principle of balance which is admitted by all to be the most characteristic and essential feature of the poetic form of the Psalms. By synonymous, synthetic, antithetic, emblematic, stair-like, or introverted parallelism, thought is balanced with thought, line

with line, couplet with couplet, strophe with antistrophe, in the lyric upbuilding of the poetic picture or imprecation or exhortation.

B. *Metre*.—Is there metre in the Psalms? The Jews of the first century A. D. thought so. Flavius Josephus speaks of the hexameters of Moses (Antiq., II, xvi, 4; IV, viii, 44) and the trimeters and tetrameters and manifold meters of the odes and hymns of David (Antiq., VII, xii, 3). Philo says that Moses had learned the "theory of rhythm and harmony" (De vita Mosis, I, 5). Early Christian writers voice the same opinion. Origen (d. 254) says the Psalms are in trimeters and tetrameters (In Ps. cxviii; cf. Card. Pitra, "Analecta Sacra", II, 341); and Eusebius (d. 340), in his "De præparatione evangelica", XI, 5 (P. G., XXI, 852), speaks of the same metres of David. St. Jerome (420), in "Præf. ad Eusebii chronicon" (P. L., XXVII, 36), finds iambs, Alcaics, and Sapphics in the Psalter; and, writing to Paula (P. L., XXII, 442), he explains that the acrostic Pss. cxi and cxii (cx and cxi) are made up of iambic trimeters, whereas the acrostic Pss. cxix and cxlv (cxviii and cxliv) are iambic tetrameters. Modern exegetes do not agree in this matter. For a time many would admit no metre at all in the Psalms. Davison (Hast., "Dict. of the Bible", s. v.) writes: "though metre is not discernible in the Psalms, it does not follow that rhythm is excluded". This rhythm, however, "defies analysis and systematization". Driver ("Introd. to Lit. of O. T.", New York, 1892, 339) admits in Hebrew poetry "no metre in the strict sense of the term". Exegetes who find metre in the Psalms are of four schools, according as they explain Hebrew metre by quantity, by the number of syllables, by accent, or by both quantity and accent.

(1) Defenders of the Latin and Greek metrical standard of quantity as applied to Hebrew poetry are Francis Gomarus, in "Davidis lyra", II (Lyons, 1637), 313; Mark Meibom, in "Davidis psalmi X" (Amsterdam, 1690) and in two other works, who claims to have learned his system of Hebrew metre by Divine revelation; William Jones, "Poeseos Asiaticæ commentariorum" (Leipzig, 1777), who tried to force Hebrew words into Arabic metres.

(2) The number of syllables was taken as the standard of metre by Hare, "Psalmorum liber in versiculos metricè divisus" (London, 1736); he made all feet dissyllabic, the metre trochaic in a line of an even number of syllables, iambic in a line of an odd number of syllables. The Massoretic system was rejected, the Syriac put in its stead. This opinion found chief defence in the writings of the learned Innsbruck Professor Gustav; and in Bickell's "Metricæ biblicæ" (Innsbruck, 1879), "Supplementum ad Metr. bibl." (Innsbruck), "Carmina veteris testamenti metricè" (1882), "Dichtungen der Hebräer" (1882-84). Gerard Gietmann, S.J., "De re metrica Hebræorum" (Freiburg im Br., 1880); A. Rohling, "Das Solomoniche Spruchbuch" (Mainz, 1879); H. Lesêtre, "Le livre des psaumes" (Paris, 1883); J. Knabenbauer, S.J., in "Job" (Paris, 1885), p. 18; F. Vigouroux, "Manuel biblique", II, 203, have all followed in Bickell's footsteps more or less closely. Against this system stand some patent facts. The quantity of a word is made to vary arbitrarily. Hebrew is treated as Syriac, a late dialect of Aramaic—which it is not; in fact, even early Syriac poetry did not measure its lines by the number of syllables. Lastly the Massorah noted metrical structure by accents; at least *sôph pâšûk* and *athnâh* indicate complete lines or two hemistichs.

(3) Accent is the determining principle of Hebrew metre according to C. A. Anton, "Conjectura de metro Hebræorum" (Leipzig, 1770), "Vindiciæ disput. de metr. Hebr." (Leipzig, 1771), "Specimen editionis psalmorum" (Vitebsk, 1780); Leutwein, "Versuch einer richtigen Theorie von der biblischen Verkunst" (1775); Ernst Meier, "Die Form der hebräischen Poesie nachgewiesen" (Tübingen, 1853);

Julius Ley, "Die Metrischen Formen der hebräischen Poesie" (Leipzig, 1886); "Ueber die Alliteration im Hebräischen" in "Zeitsch. d. Deutsch. Morgenlandisch. Ges.", XX, 180; J. K. Zenner, S.J., "Die Chorgesänge im Buche der Psalmen" (Freiburg im Br., 1896), and in many contributions to "Zeitsch. für kathol. Theol.", 1891, 690; 1895, 373; 1896, 168, 369, 378, 571, 754; Hontheim, S.J., in "Zeitsch. für kathol. Theol.", 1897, 338, 560, 738; 1898, 172, 404, 749; 1899, 167; Dr. C. A. Briggs, in "The Book of Psalms", in "International Critical Commentary" (New York, 1906), p. xxxix, and in many other publications therein enumerated; Francis Brown, "Measures of Hebrew Poetry" in "Journal of Biblical Literature", IX, 91; C. H. Toy, "Proverbs" in "Internat. Crit. Comm." (1899); W. R. Harper, "Amos and Hosea" in "Internat. Crit. Comm." (1905); Cheyne, "Psalms" (New York), 1892; Duhm, "Die Psalmen" (Freiburg im Br., 1899), p. xxx. This theory is the best working hypothesis together with the all-essential principle of parallelism; it does far less violence to the Massoretic Text than either of the foregoing theories. It does not force the Massoretic syllables into grooves that are Latin, Greek, Arabic, or Aramaic. It is independent of the shifting of accent; and postulates just one thing, a fixed and harmonious number of accents to the line, regardless of the number of syllables therein. This theory of a tonic and not a syllabic metre has this, too, in its favour that accent is the determining principle in ancient Egyptian, Babylonian, and Assyrian poetry.

(4) Of recent years the pendulum of Hebrew metrical theories has swung back upon quantity; the syllabic must not be utterly neglected. Hubert Grimme, in "Grundzüge der Hebräischen Akzent- und Vokallehre", Freiburg, 1896, and "Psalmenprobleme" (1902), builds up the metre chiefly upon the tonic principle, at the same time taking into account the *moræ* or pauses due to quantity. Schlögl, "De re metrica veterum Hebræorum" (Vienna, 1899), defends Grimme's theory. Sievers, "Metrische Studien" (1901), also takes in the unaccented syllables for metrical consideration; so does Baethgen, "Die Psalmen" (Göttingen, 1904), p. xxvii.

C. *Other Characteristics*.—Alliteration and assonance are frequent. Acrostic or alphabetic psalms are ix-x, xxv, xxxiv, xxxvii, cxi, cxii, cxix, cxlv (ix, xxiv, xxxiii, xxxvi, cx, cxi, cxviii, cxliv). The letters of the alphabet begin successive lines, couplets, or strophes. In Ps. cxix (cxviii) the same letter begins eight successive lines in each of the twenty-two alphabetic strophes. In Pss. xiii, xxix, lxii, cxlviii, and cl (xii, xxviii, lxi, cxlvii, and cxlix) the same word or words are repeated many times. Rhymes, by repetition of the same suffix, are in Pss. ii, xiii, xxvii, xxx, liv, lv, cxlii, etc. (ii, xii, xxvi, xxix, liii, liv, cxli, etc.); these rhymes occur at the ends of lines and in caesural pauses. Lines were grouped into strophes and antistrophes, commonly in pairs and triplets, rarely in greater multiples; at times an independent strophe, like the epode of the Greek chorus, was used between one or more strophes and the corresponding antistrophes. The word *Selah* (שֶׁלָּה) almost invariably marks the end of a strophe. The meaning of this word and its purpose is still a moot question. We think it was originally שָׁלַח (from שָׁלַל, "to throw"), and meant "a throwing down", "a prostration". During the antiphonal cantillation of the Psalms, the priests blew their trumpets to mark the end of a strophe, and at the signal the two choirs or the people or both choirs and people prostrated themselves (cf. Haupt, "Expository Times", May, 1911). The principle of parallelism determined these strophic arrangements of the lines. Köster, in "Die Psalmen nach ihrer strophischen Anordnung" (1837), distinguishes various kinds of strophic parallelism, corresponding to various kinds of

parallelism in lines and half-lines, synonymous, antithetical, synthetic, identical, introverted. Zenner, S.J., in his "Chorgesänge im Buche der Psalmen" (Freiburg im Br., 1896), has very cleverly arranged many of the psalms as choral odes, chanted by two or three choirs. Hermann Wiesmann, S.J., in "Die Psalmen nach dem Urtext" (Münster, 1906), has applied the metrical principles of Zenner, and revised and published the latter's translations and studies of the Psalms. This work takes too great liberty with the Sacred Text, and has lately (1911) been put on the Index.

VIII. POETIC BEAUTY.—The extravagant words of Lamartine in "Voyage en Orient" are classic: "Lisez de l'Horace ou du Pindare après un Psaume! Pour moi, je ne le peux plus". One wonders whether Lamartine ever read a psalm in the original. To criticise the Psalms as literature is very difficult. Their text has reached us with many losses in the matter of poetic form. The authors varied much in style. Their literary beauty should not be judged by comparison with the poetry of Horace and Pindar. It is with the hymns of ancient Egypt, Babylon, and Assyria that we should compare the songs of Israel. Those ancient hymns are crude and rude by the side of the Psalms. Even the imprecatory Pss. xviii, xxxv, li, lix, lxix, cix, cxxxvii (xvii, xxxiv, li, lviii, lxxviii, cviii, cxxxvi), those national anthems so full of love of Jahweh and of Israel and almost startling in their hatred of the foes of Jahweh and of Israel, if read from the viewpoint of the writers, are sublime, vivid, glowing, enthusiastic, though exaggerated, poetic outbursts, instances of a "higher seriousness and a higher truthfulness", such as Aristotle never would have found in a song of Babylonia or of Sumeria. Whether their tones are those of praise or blame, of sorrow or of joy, of humiliation or of exaltation, of deep meditation or of didactic dogmatism, ever and everywhere the writers of the Psalms are dignified and grand, true to the ideals of Jahweh's chosen folk, spiritual and devotional. The range of thought is immense. It takes in Jahweh, His temple, cult, priests, creation; man, friend and foe; beasts, birds; all nature, animate and inanimate. The range of emotions is complete; every emotion of man that is pure and noble has been set to words in the Psalms. As an instance of poetic beauty, we subjoin the famous Ps. xxiii (xxii), translated from the Hebrew. The poet first speaks in his own person, then in the guise of the sheep. The repetition of the first couplet as an *envoi* is suggested by Zenner and many commentators, to complete the envelope-form of the poem, or the introverted parallelism of the strophic structure:

The Poet: 1. Jahweh is my Shepherd;

I have no want,

The Sheep: 2. In pastures of tender grass he setteth me;

Unto still waters he leadeth me;

3. He turneth me back again;

He guideth me along right paths for his own name's sake.

4. Yea, though I walk through the vale of the shadow of death,

I fear no harm;

For thou art with me;

Thy bludgeon and thy staff, they stay me.

5. Thou settest food before me,

In the presence of my foes;

Thou has anointed my head with oil;

My trough runneth over.

The Poet: 6. Ah, goodness and mercy have followed me

All the days of my life;

I will go back to the house of Jahweh

Even for the length of my days.

Jahweh is my Shepherd;

I have no want!

IX. THEOLOGICAL VALUE.—The theological ideas of the Psalms are comprehensive; the existence and attributes of God, the soul's yearning for immortality, the economy of grace and the virtues, death, judgment, heaven, hell, hope of resurrection and of glory, fear of punishment—all the main dogmatic truths of Israel's faith appear again and again in her Psalter. These truths are set down not in dogmatic form, but now in the simple and childlike lyric yearning of the ingenuous soul, again in the loftiest and most vehement outbursts of which man's nature is capable. The Psalms are at once most human and most superhuman; they sink to the lowest depths of the human heart and soar to the topmost heights of Divine contemplation. So very human are the imprecatory psalms as to make some to wonder how they can have been inspired of God. Surely Jahweh cannot have inspired the singer who prayed:

"As for them that plan my soul to destroy,

Down to the depths of the earth shall they go;

To the grasp of the sword shall they be delivered;

A prey to the jackals shall they become".

[Ps. lxiii (lxii), 10-11.]

Such an objection is based upon a misunderstanding. The perfection of the counsels of Christ is one thing, the aim of the good Levite is quite another thing. The ideals of the Sermon on the Mount are of higher spirituality than are the ideals of the imprecatory psalm. Yet the ideals of the imprecatory psalm are not bad—nay, are good, are Divine in their origin and authority. The imprecatory psalms are national anthems; they express a nation's wrath, not an individual's. Humility and meekness and forgiveness of foe are virtues in an individual; not necessarily so of a nation; by no means so of the Chosen Nation of Jahweh, the people who knew by revelation that Jahweh willed they should be a great nation and should put out their enemies from the land which He gave them. Their great national love for their own people postulated a great national love for Jahweh. The love for Jahweh postulated a hatred of the foes of Jahweh, and, in the theocratic economy of the Jewish folk, the foes of Jahweh were the foes of Israel. If we bear this national purpose in mind, and forget not that all poetry, and especially Semitic poetry, is highly coloured and exaggerated, we shall not be shocked at the lack of mercy in the writers of the imprecatory psalms.

The chief theological ideas of the Psalms are those that have regard to the Incarnation. Are there Messianic psalms? Unaided by the authentic interpreting power of the Church and neglectful of the consensus of the Fathers, Protestants have quite generally come to look upon the Psalms as non-Messianic either in literal or in typical meaning; the older Messianic interpretation is discarded as worn-out and threadbare. Delitzsch admits only Ps. cx (cix) to be Messianic in its literal meaning. Cheyne denies both literal and typical Messianic meaning to the Psalms ("Origin of Ps.", 339). Davison (Hast., loc. cit.) says, "it may well be that the Psalter contains hardly a single instance of direct Messianic prophecy". Catholics have ever held that some of the Psalms are Messianic in meaning, either literal or typical. (Cf. articles INCARNATION; JESUS CHRIST; MESSIAS.) The New Testament clearly refers certain psalms to the Messias. The Fathers are unanimous in interpreting many psalms as prophecies of the coming, kingdom, priesthood, passion, death, and resurrection of the Messias. The coming of the Messias is predicted in Pss. xviii, l, lxviii, xcvi-xcviii (xvii, xlix, lxvii, xc-xcvii). St. Paul (Eph., iv, 8) interprets of Christ's ascent into heaven the words of Ps. lxviii, 18, descriptive of Jahweh's ascent after conquering the world. The kingdom of the Messias is predicted in Pss. ii, xviii, xx, xxi, xlv, lxi, lxxii, lxxxix, cx, cxxxii (ii, xvii, xix, xx, xlv, lx, lxxi, lxxxviii, cix, cxxxi); the priesthood in Ps. cx. The passion and death of the Messias

are clear in the sufferings of the Servant of Jahweh of Pss. xxii, xl, lxix (xxi, xxxix, lxxviii). Ps. xxii was used in part, perhaps entirely, by Christ on the Cross; the Psalmist describes as his own the emotions and sufferings of the Messias. Hence it is that the Biblical Commission (1 May, 1910) rejects the opinion of those who do away with the Messianic and prophetic character of the Psalms and refer only to the future lot of the Chosen People those words which are prophecies concerning Christ. Cf. Maas, "Christ in Type and Prophecy" (New York, 1893).

X. LITURGICAL USE.—A.—The use of the Psalms in Jewish liturgy has been spoken of. Cf. also articles **SYNAGOGUE**; **TEMPLE**.—B.—Christian liturgical use of the Psalter dates from the time of Christ and His Apostles. He recited the Hallel at the last Passover, Pss. cxiii-cxiv before the Last Supper, Pss. cxv-cxviii thereafter; Ps. xxii was His dying words; authoritative citations of other psalms appear in His discourses and those of His Apostles (cf. Luke, xx, 42; xxiv, 44; Acts, i, 20). The Apostles used the Psalms in worship (cf. Acts, xvi, 25; James, v, 13; I Cor., xiv, 26). The earliest liturgical service was taken from the Psalter. St. Paul represents the Ephesian Christians, to all seeming, psalmodizing, one choir answering the other; "Speaking to one another in psalms and hymns and spiritual songs, singing and psalmodizing [*ψάλλοντες*] in your hearts to the Lord, giving thanks [*εὐχαριστοῦντες*] always for all things" (Eph., v, 19). Probably the Eucharistic *agape* is referred to. A like reference is in Col., iii, 16. St. Basil (P. G., XXXII, 764) speaks of this psalmodizing in two choirs—*ἀντιψάλλειν ἀλλήλοις*. The custom of psalmody, or antiphonal singing, is said to have been introduced into the Church of Antioch by St. Ignatius (Socrates, "Hist. Eccl.", VI, viii). From Syria, this custom of the Synagogue would seem to have passed over to Palestine and Egypt, to Asia Minor, Constantinople, and the West. St. Ambrose was the first to inaugurate in the West the chanting of the Psalms by two choirs (cf. Batiffol, "Histoire du bréviaire romain", 1893). In the *Proprium de tempore* of the Roman Rite, all the Psalms are chanted at least once a week, some twice and oftener. In Matins and Lauds, according to the Vulgate's numeration, are Pss. i-cx, excepting a few that are fixed for Prime and other hours; in Vespers are Pss. cxi-cxlvii, excepting a few fixed for other hours. The great alphabetic praise of the Law, Ps. cxviii, is distributed between Prime, Terce, Sext, and None. The Benedictines, Franciscans, Carmelites, and Dominicans, who have their own rite, all chant the Psalter once a week; the Jesuits follow the Roman ritual.

In the Latin Rite, Pss. vi, xxxi, xxxvii, l, ci, cxix, cxlii (Douai) have long been recited, in the above order, as prayers of sorrow for sin; they are lyric cries of the sorrowing soul and have hence been called the "Penitential Psalms". Their recitation during Lent was ordered by Innocent III (1198-1216). Pius V (1566-72) established the custom, now no longer of general obligation, whereby these psalms became a part of the Friday ferial Office of Lent.

The Ambrosian Rite, still used in Milan cathedral, distributes the Psalms over two weeks. The Oriental Rites in union with Rome (Melchite, Maronite, Syriac, Chaldean, Coptic, Æthiopic, etc.), together with the heretical Oriental Churches, all keep up the recitation of the Psalter as their Divine Office.

The bibliography of the Psalms is naturally enormous and can be given only in small part.

Greek Fathers: ORIGEN, *Selecta in Psalmos* in P. G., XII, 1043; IDEM, *Homilies in Psalmos* in P. G., XII, 1319; IDEM, *Originis Hexaplorum quæ supersunt*, ed. FIELD; EUSEBIUS, *Comm. in Psalmos* in P. G., XXIII, 65; XXIV, 9; ST. ATHANASIUS, *Epist. ad Marcellinum* in P. G., XXVII, 11; IDEM, *Exegeses in Psalmos* in P. G., XXVII, 55; IDEM, *De Titulis Psalmorum* in P. G., XXVII, 645; ST. BASIL, *Homilies in Pss.* in P. G., XXIX, 209; ST. DIDYMUS OF ALEXANDRIA in P. G., XXIX, 1155; ST. GREGORY OF NYSSA in P. G., XLIV, 431, 608; ST. JOHN CHRYSOSTOM in P. G., LV, 35, 527; ST. CYRIL OF ALEXANDRIA in P. G., LXIX, 699; THEODORETUS in P. G., LXXX, 857.

Latin Fathers: ST. AMBROSE, *Enarrationes in XII Psalmos* in P. L., XIV, 921; ST. JEROME, *Liber Psalmorum juxta hebraicam veritatem* in P. L., XXVIII, 1123; IDEM, *Excerpta de Psalterio* (Maredsous, 1895); IDEM, *Epistole* in P. L., XXII, 433, 441, 837; IDEM, *Breviarium in Psalmos* in P. L., XXVI, 821; ST. AUGUSTINE, *Enarrationes in Pss.* in P. L., XXXVII, 67; IDEM, *Expositio in Pss. C-CL* in P. L., LI, 277; CASSIODORIUS in P. L., LXX, 9.

Commentators of the Middle Ages: BEDE, PETER LOMBARD, ST. THOMAS, ST. BONAVENTURE and others of the Middle Ages depend chiefly upon the Fathers for their interpretations. NICHOLAS OF LYRA, in his *Postilla*, and the converted Jew, PAUL, ARCHBISHOP OF BURGOS, in his *Additions to the Postilla*, give us much of rabbinic interpretation.

Moderns: BELLARMINE, *Explanatio in Psalmos* (1611), was by far the best commentator on the Psalms till recent times, as he used scientific methods in textual criticism; SCHEGG, *Die Psalmen* (Munich, 1845); ROHLING (1871); THALHOFER (Ratisbon, 1904); WOLTER, *Psallite Sapienter* (Freiburg im Br., 1904); BICKELL, *Der Psalter* (1884); VAN STEENKISTE (1870); PATRIZI, *Cento Salmi tradotti e commentati* (1875); MINOCHI, *I Salmi tradotti del Testo Ebreo* (1895); LE HIR, *Les Psaumes traduits de l'hébreu en latin avec la Vulgate en regard* (Paris, 1876); LESÈTRE (Paris, 1883); FILLION, *Les Psaumes commentés selon la Vulgate et l'Hébreu* (Paris, 1893); CRAMON (1889); PANNIER (1908); ZENNER-WIESMANN, *Die Psalmen nach dem Urtext* (Münster, 1906); NIGLUTSCH (Trent, 1905); EATON, *Sing ye to the Lord* (London, 1909); HOBERG, *Die Psalmen nach der Vulgata* (Freiburg, 1892); M'SWINEY, *Psalms and Canticles* (St. Louis, 1901).

Protestants: the commentaries of DE WETTE (1811-56); HITZIG (1863-65); OLSHAUSEN (1853); HUFFELD (1855-88); EWARD (1839-66); DELITZSCH (1895); DUHM (Freiburg im Br., 1899); BAETHGEN (Göttingen, 1904); CHEYNE (New York, 1892); *International Critical Commentary*, ed. BRIGGS (New York, 1907), the best of non-Catholic commentators on the Psalms; KIRKPATRICK in *Cambridge Bible* (1893-95).

WALTER DRUM.

Psalms, ALPHABETIC, are so called because their successive verses, or successive parallel series, begin with the successive letters of the alphabet. Some of these formations are perfectly regular, others are more or less defective. Among the regular Alphabetic Psalms must be reckoned Pss. cx, cxi, cxviii (Heb., Pss. cxi, cxii, cxix). The praise of the strong woman in Prov., xxxi, 10-31, and the first four chapters of Lamentations exhibit a similar regular formation. Pss. cx and cxi consist of twenty-two verses each, and each successive verse begins with the corresponding successive letter of the alphabet. Ps. cxviii consists of twenty-two strophes containing each eight distichs; the successive twenty-two strophes are built on the twenty-two letters of the alphabet in such a way that each of the eight distichs of the first strophe begins with the first letter, each of the eight distichs of the second strophe begins with the second letter, etc. Prov., xxxi, 10, consists of twenty-two distichs, each successive distich beginning with the successive corresponding letter of the alphabet. Lam., i, ii, iv, consist each of twenty-two short strophes beginning with the successive letters of the alphabet. In Lam., iii, each successive letter of the alphabet begins three lines, so that the chapter consists of sixty-six lines in which each letter of the alphabet occurs three times as the initial of the line. Defectively Alphabetic Psalms may be found in Pss. ix, xxiv, xxxiv, xxxvi, cxliv (Heb., ix, x, xxv, xxxvii, cxlv). But the device is not limited to the Book of Psalms; it is also found in other poetical portions of the Old Testament.

VIGOUROUX, *Dict. de la Bible* (Paris, 1895).

A. J. MAAS.

Psalterium.—The *Psalterium*, or Book of the Psalms, only concerns us here in so far as it was transcribed and used for liturgical purposes. As a manual of private devotion it has already been sufficiently discussed under **PRAYER-BOOKS**. In its liturgical use the *Psalterium* contained the bulk of the Divine Office. The other books associated with it were the Lectionary, the Antiphonary, and Responsoriale, and the Hymnary. The *Psalterium* contained primarily all the text of the Psalms, and it may be noted that for some centuries the Western Church used two different Latin versions, both due to St. Jerome. The earlier of these was a mere revision of the pre-existing Latin translation which closely followed the Septuagint, St. Jerome under-

took this revision in 383 at the request of Pope Damasus, and the text thus corrected was retained in use at Rome for many centuries afterwards. In 392, however, when at Bethlehem, the saint set about the same task much more seriously with the aid of the Hexapla. He produced what was almost a new version, and this being circulated in Gaul, through a copy sent to Tours in the sixth century, became commonly known as the "Psalterium Gallicanum", and in the end entirely supplanted the Roman. A precious manuscript at the Vatican (Regin. 11), of the sixth or seventh century, contains the "Psalterium Gallicanum" upon the left-hand page, and a version made from the Hebrew upon each page facing it.

INITIAL LETTER FROM THE PSALTER OF ST. LOUIS OF FRANCE
Bibliothèque Nationale, Paris

The Psalter proper is here followed, as nearly always in these liturgical books, by the principal canticles, e. g. the Canticle of the Three Children, the Canticle of Moses etc. and, what is not so general a feature, though sometimes found, by a collection of hymns or *Hymnarium*. These last were more commonly written in a book apart. The oldest Psalter of the British Museum, which comes from St. Augustine's, Canterbury, and which was long supposed to have been one of the actual books brought by St. Augustine to England, also contained the Canticles with two or three hymns.

In other similar books we find the Gloria, Credo, Quicunque vult, and the Litany of the Saints; at the beginning usually stands a calendar. Many of the more ancient *psalteria* which survive, as for example the "Psalterium Aureum", of St. Gall and the "Utrecht Psalter", both of them probably of the ninth century, are very richly illuminated or illustrated—a fact which has probably had much to do with their preservation. A certain tradition tended to establish itself at an early date with regard to the subjects and position of these embellishments. In particular the custom spread widely of dividing the whole Psalter into three parts containing fifty psalms each. Hence the first psalm, the fifty-first psalm, and the hundred and first psalm are usually introduced by a full-page miniature or by a richly-illuminated initial letter. Thus also in penitential codes and monastic documents of both England and Ireland during the early Middle Ages, it is common to find allusions to the recitation of "two fifties" or "three fifties", meaning two or three of the divisions of the Psalter. With regard to the Divine Office the recitation of the Psalms was in primitive times so arranged that the whole Psalter was gone through in the course of the Sunday and ferial Office each week. In many

psalteria marginal notes indicated which psalms belonged to each day and hour. Less commonly the psalms were not arranged in their numerical order, but, as in a modern Breviary, according to the order of their occurrence in the ferial Office. Both these classes of books were called *psalteria feriata*. In medieval cathedral chapters it was common to assign two or three psalms to each prebend for daily recitation, the psalms being so distributed that the bishop and canons got through the whole *Psalterium* between them. The repetition of the entire Psalter was, as many necrologies and monastic customals show, a favourite form of suffrage for the dead.

BRAMBACH, *Psalterium, Bibliographischer Versuch über die liturgischen Bücher des christ. Abendlandes* (Berlin, 1887); RAHN, *Das "Psalterium Aureum" von Sanct Gallen* (St. Gall, 1878); WORDSWORTH AND LITTLEHALES, *The Old Service Books of the English Church* (London, 1905); SWAINSON in *Dict. Christ. Antiq.*, s. v. *Psalter*; BEISSEL in *Stimmen aus Maria-Laach* (July, 1909), 28-41; GASQUET AND BISHOP, *The Bosworth Psalter* (London, 1908); BIRCH, *The Utrecht Psalter* (London, 1876); HARDY, *Utrecht Psalter Reports* (London, 1872-74).

HERBERT THURSTON.

Psaume (also PSAULME, PREAUME, Lat. PSALMÆUS), NICHOLAS, Bishop of Verdun, b. at Chaumont-sur-Aire in 1518; d. 10 August, 1575. Having studied classics at the Norbertine Abbey of St. Paul at Verdun, of which his uncle François Psaume was commendatory abbot, he completed a higher course of studies at the Universities of Paris, Orleans, and Poitiers; and then entered the Norbertine Abbey of St. Paul at Verdun. Ordained priest in 1540, he was sent to the University of Paris, where, after a brilliant defence of numerous theses, he won his doctorate of theology. But for the intrigues of François, Cardinal of Pisa, Psaume, who had already been made Abbô of St. Paul, Verdun, would have been elected Abbot General of Prémontré, for his nomination had already been confirmed by Francis I, King of France. In 1546 he was chosen to represent the Norbertine Order at the Council of Trent, but the Cardinal of Lorraine retained him and, with the pope's consent, resigned the Bishopric of Verdun in favour of Psaume, who was consecrated bishop, 26 August, 1548. In the following year he attended the Provincial Council of Trier, and in the same year he published its canons and decrees in his own diocese. He was also present at the General Council of Trent from May, 1551, until its prorogation on 28 April, 1552, distinguishing himself by his eloquence and learning and by his zeal in defence of the doctrine and the prerogatives of the Church. He was active in condemning certain abuses, especially those of the *commenda* (see COMMENDATORY ABBOT). On 2 January, 1552, he was charged by the papal legate with the editing of the canons of the council. In 1562 he returned to Trent, where the sessions of the council had been resumed. On both occasions Psaume kept a diary of all that passed at the various sessions; it was printed at Paris (1564-80), at Reims and at Verdun in the same year. Hugo, the annalist of the order, also edited it in two parts, but much was left out in the second part. Hugo's "Collectio" was edited by Le Plat in the fifth volume of his "Monumenta Conc. Tridentin." The parts omitted are supplied by Döllinger, "Ungedruckte Berichte u. Tagebücher z. Geschichte d. Konzils v. Trient", II (Nordlingen, 1876), p. 172. Psaume was also requested by the Archbishops of Reims and Trier to co-ordinate French ecclesiastical legislation and make it agree with the canons and decrees of the Council of Trent. He wrote much in defence of the Catholic doctrine against the Calvinistic and Lutheran heresies. To provide a sound education for youth he gave financial assistance to the Jesuits in founding a college at Verdun. He is buried near the altar of the Blessed Sacrament in the cathedral of Verdun.

HUGO, *Annales*, I, preface, §xvi; II, 523; CALMET, *Biblioth. Joraine*, II; SPILBECK, in *Précis Historique* (Brussels, 1888-89); GOOVAERT, *Dic. Bio-bibliog.*, II, 66 sqq. (Brussels, 1902).

F. M. GEUDENS.

Psellus, MICHAEL (Μιχαήλ ὁ Ψελλός), Byzantine statesman, scholar, and author, b. apparently at Constantinople, 1018; d. probably 1078. He attended the schools, afterwards learning jurisprudence from John Xiphilinos, later patriarch (John VIII, 1064-75). Psellus practised law, was appointed judge at Philadelphia, and under the Emperor Michael V (1041-2) became imperial secretary. Under Constantine IX (Monomachos, 1042-54) he became influential in the state. At this time he taught philosophy at the new Academy at Constantinople, arousing opposition among ecclesiastical persons by preferring Plato to Aristotle. Psellus attained a great reputation as a philosopher. His pedagogical career was cut short by his appointment as Secretary of State (πρωτοσηκρήτης) to Constantine IX. In 1054 he followed Xiphilinos to the monastery of Olympus, in Bithynia, where he took the name Michael. He soon quarrelled with the monks, however, and returned to the capital. He was one of the ambassadors sent to treat with the rebel Isaac Komnenos after the defeat of the imperial army near Nicæa in 1057. When Isaac I (1057-9) entered Constantinople in triumph Psellus had no scruple against transferring allegiance to him. Psellus drew up the indictment against the Patriarch Michael Cærularius in 1059, and preached the enthusiastic panegyric that the government thought advisable after Cærularius's death. Psellus maintained his influence under Constantine X (Dukas, 1059-67); under Michael VII (1071-8) he became chief Minister of State. Famous for oratory as well as for philosophy and statecraft, he preached the panegyric of the Patriarch John Xiphilinos in 1075. A work written in 1096-7 after Psellus's death has a commendatory preface by him. Krumbacher (*Byzant. Litteratur.*, 434) suggests that the preface may have been written before the work was begun. That Psellus was able to retain his influence under succeeding governments, through revolutions and usurpations, shows his unscrupulous servility to those in power. Krumbacher characterizes him as "grovelling servility, unscrupulousness, insatiable ambition, and unmeasured vanity" (op. cit., 435). Nevertheless his many-sided literary work and the elegance of his style give him a chief place among contemporary scholars. Compared with Albertus Magnus and Roger Bacon, he is to Krumbacher "the first man of his time". His important works are: commentary on Aristotle *περὶ ἐρμηνείας*; treatises on psychology; works on anatomy and medicine, including a poem on medicine and a list of sicknesses; a fragmentary encyclopedia, called "Manifold Teaching" (Διδασκαλία παντοδαπή); a paraphrase of the *Iliad*; a poem on Greek dialects; a treatise on the topography of Athens; a poetic compendium of law and an explanation of legal terms. His speeches are famous as examples of style, and contain much historical information. His best known panegyrics are on Cærularius, Xiphilinos, and his own mother. About five hundred letters, and a number of rhetorical exercises, poems, epitaphs, and occasional writings are extant. His most valuable work is his history (*χρονογραφία*) from 976 to 1077, forming a continuation to Leo Diaconus.

Works (incomplete) in P. G., CXXII, 477-1186, also in SATHAS, *Μεσαιωνική Βιβλιοθήκη*, IV and V: the history edited by SATHAS is published in METHUEN, *Byzantine Texts* (London, 1899); LEO ALLATUIS, *De Psellis et eorum scriptis* (Rome, 1634), republished in FABRICIUS-HARLES, *Bibliotheca græca*, X (Hamburg, 1790), 41-97, and in P. G., CXXII, 477-538; KRUMBACHER, *Byzantinische Litteraturgesch.* (2nd ed., Munich, 1897), 433-44; DIEHL, *Figures Byzantines*, I (Paris, 1906), x, xi.

Psychology (Gr. *ψυχῆ λόγος*; Lat. *psychologia*; Fr. *psychologie*; Ger. *Seelenkunde*), in the most general sense the science which treats of the soul and its operations. During the past century, however, the term has come to be frequently employed to denote the latter branch of knowledge—the science of the phenomena of the mind, of the processes or states of human consciousness. Moreover, the increasing differentiation, characteristic of the advance of all departments of knowledge in recent years, has manifested itself in so marked a manner in psychological investigation that there are already several distinct fields of psychological work, each putting forward claims to be recognized as a separate science. The term *psychologia* seems to have first come into use about the end of the sixteenth century (Goclenius, 1590, Casmann's "Psychologia Anthropologica", 1594). But the popularization of the name dates from Ch. Wolff in the eighteenth century.

History.—Aristotle may well be deemed the founder of this as of so many other sciences, though by him it is not distinguished from general biology, which is itself part of physics, or the study of nature. His treatise *περὶ ψυχῆς* ("De Anima") was during two thousand years virtually the universal textbook of psychology, and it still well repays study. In the investigation of vital phenomena Aristotle employed to some extent all the methods of modern science: observation, internal and external; comparison; experiment; hypothesis; and induction; as well as deduction and speculative reasoning. He defines the soul as the "Entelechy or form of a natural body potentially possessing life". He distinguishes three kinds of souls, or grades of life, the vegetative, the sensitive, and the intellectual or rational. In man the higher virtually includes the lower. He investigates the several functions of nutrition, appetency, locomotion, sensuous perception, and intellect or reason. The last is confined to man. The working of the senses is discussed by him in detail; and diligent anatomical and physiological study, as well as careful introspective observation of our conscious processes, is manifested. Knowledge starts from sensation, but sense only apprehends the concrete and singular thing. It is the function of the intellect to abstract the universal essence. There is a radical distinction between thought and sentiency. The intellect or reason (*νοῦς*) is separate from sense and immortal, though how precisely we are to conceive this *νοῦς* and its "separateness" is one of the most puzzling problems in Aristotle's psychology. Indeed, the doctrines of free will and personal immortality are not easily reconciled with parts of Aristotle's teaching.

Scholastic Period.—There is little effort at systematic treatment of psychology from Aristotle to the medieval philosophers. For Epicurus, psychology was a branch of physics in subordination to a theory of hedonistic ethics. With the introduction of Christianity certain psychological problems such as the immortality and the origin of the soul, free will and moral habits at once assumed a vastly increased importance and raised the treatise "De Anima", to one of the most important branches of philosophy. Moreover, the angels being assumed to be spirits in many ways resembling the human soul conceived as separate from the human body, a speculative theory of the nature, attributes, and operations of the angelic beings, partly based on Scriptural texts, partly deduced by analogical reasoning from human psy-

chology, gradually grew up and received its final elaboration in the Middle Ages in the metaphysical theology of the Schoolmen. The Christian mystics were naturally led to consider the character of the soul's knowledge of God. But their treatment of psychological questions is generally vague and obscure, whilst their language indulges much in allegory and symbolism. Indeed, the greatest of the mystics were not sympathetic with the employment of Scholastic or scientific methods in the handling of mystic experience. The great controversy between Realism and Nominalism from the early Middle Ages directed much attention to the theory of knowledge and the problem of the origin of ideas. However, although psychological observation was appealed to, the epistemological discussions were largely metaphysical in character during this period. To Albertus Magnus and St. Thomas the popularization of the psychology of Aristotle throughout Europe during the thirteenth century was mainly due. In Questions lxxv to xc of part I of the "Summa Theologica", St. Thomas gives a very fairly complete and systematic account of the leading topics connected with the soul. However, questions of biology, general metaphysics, and theology were constantly interwoven with psychology for many centuries afterwards. Indeed, the liberal use made of physiological evidence in psychological discussions is a marked feature in the treatment of this branch of philosophy throughout the entire history of scholastic philosophy. But although there is plenty of proof of acute observation of mental activities, the usual appeal in discussion is rather to metaphysical analysis and deductive argument than to systematic introspective observation and induction, so characteristic of modern psychology. The treatise "De Anima" of Suarez is a very good example of scholastic psychology at the close of the Middle Ages. The treatise, containing six books, starts in book I with an inquiry into the essence of the soul. Recalling Aristotle's definition of the soul as the form of the body, the author proceeds to examine the relations of the vegetative, sensitive, and rational soul. Next, in book II he treats of the faculties of the soul in general and their relation to the soul as an essence. In book III he investigates the nature and working of the cognitive faculties, and especially of the senses. In book IV he inquires into the character of the activity of the intellect. In book V he deals with faculties of appetency and free will. Book VI is devoted to a speculative consideration of the condition and mode of operation of the soul in a future life. In each question he begins with a summary of previous opinions and then puts forward his own solution. The order of treatment starting from the essence and passing thence to the faculties and their operations is characteristic of the scholastic treatises generally. The method is mainly deductive and the argument metaphysical, though in dealing with the senses there is constant appeal to recognized physiological authorities from Aristotle to Vesalius.

In psychology as well as in other branches of philosophy the influence of Descartes was considerable though indirect. His subjective starting-point, *cogito, ergo sum*, his insistence on methodic doubt, his advocacy of reflection on thought and close scrutiny of our fundamental ideas, all tended to encourage the method of internal observation, whilst the mechanical explanation of the "Traité des Passions" favoured the advent of physiological psychology. It was probably, however, John Locke's "Essay on the Human Understanding" (1690) which did most to foster the method of analytic introspection which constitutes the principal feature of modern psychological method. Notwithstanding the confused and inconsistent metaphysics and the many grave psychological blunders with which that work abounds, yet his frequent appeal to inner experience, his honest efforts to describe

mental processes, and the quantity of acute observations scattered throughout the work, coming also at an age when the inductive method was rapidly rising in popularity, achieved a speedy and wide success for his book, and gave a marked empirical bent to all future English psychology.

Psychological observation and analysis were still more skilfully used by Bishop Berkeley as a principle of explanation in his "Theory of Vision", and then employed by him to establish his psychological creed of Idealism. Finally, David Hume, the true founder of the Associationist school of psychology, still further increased the importance of the method of introspective analysis by the daring sceptical conclusions he claimed to establish by its means. The subsequent British adherents of the Associationist school, Hartley, the two Mills, Bain, and Herbert Spencer, continued this method and tradition along the same lines. There is constant direct appeal to inner experience combined with systematic effort to trace the genesis of the highest, most spiritual, and most complex mental conceptions back to elementary atomic states of sensuous consciousness. Universal ideas, necessary truths, the ideas of self, time, space, causality as well as the conviction of an external material world were all explained as the outcome of sensations and association. The reality of any higher activities or faculties essentially different from the lower sensuous powers was denied, and all the chief data formerly employed in establishing the simplicity, spirituality, and substantiality of the soul were rejected. Rational or metaphysical psychology was thus virtually extinguished and erased from English philosophical literature during the nineteenth century. Even the more orthodox representatives of the Scotch school, Reid and Dugald Stewart, who avoided all metaphysical argument and endeavoured to controvert Hume with his own weapons of appeal exclusively to experience and observation, had only further confirmed the tendency in the direction of a purely empirical psychology. The great need in English psychological literature throughout most of the nineteenth century, on the side of those defending a spiritual doctrine of the human mind, was a systematic and thorough treatment of empirical psychology. Excellent pieces of work on particular questions were done by Martineau, W. G. Ward, and other writers, but nearly all the systematic treatises on psychology were produced by the disciples of the Sensationist or Materialistic schools. Yet, if philosophy is to be based on experience, then assuredly it is on the carefully-scrutinized and well-established results of empirical psychology that any satisfactory rational metaphysical doctrine respecting the nature of the soul, its origin, and its destiny must be built. It was in their faulty though often plausible analysis and interpretation of our states of consciousness that the greatest errors in philosophy and psychology of Bain, the two Mills, Spencer, and their disciples had their source; it is only by more careful introspective observation and a more searching analysis of the same mental facts that these errors can be exposed and solid foundations laid for a true metaphysical psychology of the soul.

In France, Condillac, La Mettrie, Holbach, and Bonnet developed the Sensationalism of Locke's psychology into an increasingly crude Materialism. To oppose this school later on, Royer-Collard, Cousin, Jouffroy, and Maine de Biran turned to the work of Reid and the "common sense" Scotch school, appropriating their method and results in empirical psychology. Some of these writers, moreover, sought to carry their reasoning beyond the mere inductions of empirical psychology, in order to construct on this enlarged experience a genuine philosophy of the soul, as "principle" and subject of the states and activities immediately revealed to introspective observation.

In Germany the purely empirical tendency which had reduced psychology in England to a mere positivistic science of mental facts did not meet with quite the same success. Metaphysics and philosophy proper never fell there into the degradation which they experienced in England in the beginning of the nineteenth century. And although the old conception of a philosophical science of the nature and attributes of the soul was rejected by Kant, and abandoned in the systems of Fichte, Schelling, and Hegel, yet mere Phenomenalism was never completely triumphant in Germany. Herbart, whilst denying the reality of faculties, postulates a simple soul as the underlying subject of the presentations or ideas which form our conscious life. Hermann Lotze, laying similar stress on the importance of scientific observation of our mental states, insists even more strongly that our introspective experience correctly interpreted affords abundant metaphysical justification for the doctrine of an immaterial soul. Meanwhile the earlier attempts of Herbart to express mental activities in mathematical formulæ led to a more successful line of experimental research in the hands of Weber, Fechner, Wundt, and others. The aim of this school is to attain the possible quantitative measurement of conscious states. As this is ordinarily not directly possible, much industry and ingenuity have been devoted to measuring quantitatively, by the aid of skillfully devised instruments, the immediate physical antecedents and effects of sundry mental activities, by which it is hoped to secure accurate quantitative descriptions of the mental states themselves. Psychological laboratories devoted to research of this kind have been set up in several countries, especially in Germany and America. One of the most successful so far is that at the Catholic University of Louvain, and another has lately been established at that of Washington. In Great Britain, however, the special home of empirical psychology since Locke, the new movement in favour of experimental psychology has not, at all events down to the present time, met with much success. The advance of physiological science, and especially of that of the brain and nervous system, has also reacted on psychology, stimulating closer inquiry into the relations between mental and bodily processes. It cannot, however, be maintained that the progress of physiological knowledge, considerable though it is, has brought us appreciably nearer to the solution of the great problem, how body and mind act on each other. The study of nervous pathology, of mental disease and of abnormal mental states, such as those of hypnotism and double-consciousness, has also opened up new fields of psychological research, constantly widening with the last thirty years.

Scope of Psychology.—As we have already observed, recent writers commonly confine the term psychology to the science of the phenomena of the mind. Thus William James, probably the psychologist of widest influence during the past twenty years, defines psychology as "The Science of Mental Life, both of its phenomena and their conditions". ("Principles", I, 1). Wundt's definition is: "the science which investigates the whole content of Experience in its relations to the Subject". ("Outlines", 3rd ed., 3). Other writers describe it as, "the science of the facts apprehended by our internal sense", or again, "the science of our states of consciousness, their laws of succession and concomitancy". The common feature of all these definitions is the limitation of the scope of psychology to the phenomena of the mind directly observable by introspection. In this view it is a purely positivist science from which all philosophical problems are to be excluded, as rigorously as from chemistry or geology. It is, in fact, *la psychologie sans âme*. If such questions as the nature, origin, or destiny of the soul are to be discussed at all, it must be, according to these writers, not in psychol-

ogy, but in some branch of speculation to be styled the metaphysics or ontology of the human mind, and to be completely isolated from science.

In direct contrast with this view is that ordinarily adopted by Catholic writers hitherto. By them, psychology has usually been conceived as one of the most important branches of philosophy. In their view it may be best described as the philosophical science, which investigates the nature, attributes, and activities of the soul or mind of man. By soul, or mind, is understood the ultimate principle within me by which I think, feel, will, and by which my body is animated. Whilst the soul and the mind are conceived as fundamentally one, the latter term is usually employed to designate the animating principle viewed as subject of my conscious or mental operations; the former denotes it as the root of all vital activities. By terming their branch of knowledge a philosophical science, it is implied that psychology ought to include not only a doctrine of the laws of succession and concomitance of our conscious states, but an inquiry into their ultimate cause. Any adequate study of the human mind, it is contended, naturally presents itself in two stages, empirical or phenomenal psychology, and rational or metaphysical psychology. Though conveniently separated for didactic treatment the two are organically connected. Our metaphysical conclusions as to the nature of the soul must rest on the evidence supplied by our experience of the character of its activities. On the other hand, any effort at thorough treatment of our mental operations, and especially any attempt at explanation of the higher forms or products of consciousness, it is urged, is quite impossible without the adoption of some metaphysical theory as to the nature of the underlying subject or agents of these states. Professor Dewey has justly observed: "The philosophic implications embedded in the very heart of psychology are not got rid of when they are kept out of sight. Some opinion regarding the nature of the mind and its relations to reality will show itself on almost every page, and the fact that this opinion is introduced without the conscious intention of the writer, may serve to confuse both the author and his reader" ("Psychology", IV). Ladd, and others also, recognize the evil of "clandestine" metaphysics when smuggled into what claims to be purely "scientific" non-philosophical treatments of psychology.

Psychology is not in the same position as the physical sciences here. Whilst investigating a question in geology, chemistry, or mechanics, we may, at least temporarily, prescind from our metaphysical creed, but not so—judging from the past history—when giving our psychological accounts and explanations of mental products, such as universal concepts, the notions of moral obligation, responsibility, personal identity, time, or the perception of an external material world, or the simple judgment, two and two must make four. The view, therefore, of those philosophers who maintain that the intrinsic connexions between many of the questions of empirical and rational psychology are so indissoluble that they cannot be divorced, seems to have solid justification. Of course we can call the study of the phenomena of the mind, "Psychology", and that of its inner nature, the "Philosophy of the Mind"; and we may treat each in a separate volume. That is merely a matter of terminology and convenience. But the important point is that in the explanatory treatment of the higher intellectual and rational processes, it will practically be impossible for the psychologist to preserve a philosophically neutral attitude. A truly scientific psychology, therefore, should comprise: (1) a thorough investigation by introspective observation and analysis of our various mental activities—cognitive and appetitive, sensuous and rational—seeking to resolve all products of the mind back

to their original elements, determining as far as possible their organic conditions, and tracing the laws of their growth; (2) based on the results of this study, a rational theory or explanatory account of the nature of the agent or subject of these activities, with its chief properties.

Method of Psychology.—The primary method of investigation in empirical or phenomenal psychology is introspection or reflective observation of our own mental states. This is the ultimate source of all knowledge of mental facts; even the information gathered immediately from other quarters has finally to be interpreted in terms of our own subjective experience. Introspection is, however, liable to error; consequently, it has to be employed with care and helped and corrected by all the supplementary sources of psychological knowledge available. Among the chief of these are: the internal experience of other observers communicated through language; the study of the human mind as exhibited in different periods of life from infancy to old age, and in different races and grades of civilization; as embodied in various languages and literatures; and as revealed in the absence of particular senses, and in abnormal or pathological conditions such as dreams, hypnotism, and forms of insanity. Moreover, the anatomy, physiology, and pathology of the brain and nervous system supply valuable data as to the organic conditions of conscious states. Experimental psychology, psychophysics, and psychometry help towards accuracy and precision in the description of certain forms of mental activity. And the comparative study of the lower animals may also afford useful assistance in regard to some questions of human psychology. By the utilization of these several sources of information, the data furnished to the psychologist by the introspective observation of his own individual mind may be enlarged, tested and corrected, and may thus acquire in a certain degree the objective and universal character of the observations on which the physical sciences are built. Introspection is frequently spoken of as the subjective method, these other sources of information as supplementary objective methods of psychological study.

Branches of Psychology.—Indeed some of them have rapidly grown to be such large and important fields of research that they now claim to be recognized as special departments of psychology, or even sciences in their own right. Thus we have comparative psychology including animal psychology, child psychology, and race psychology. Again psychiatry or psychopathology, the science of mental disease, also physiological psychology, which, in a broad sense, includes all systematic study of the organic conditions of mental life, or, as Ladd defines it, "psychology approached and studied from the physiological side".

Experimental Psychology.—A special department of physiological psychology which has recently risen rapidly into favour in some countries is experimental psychology, alluded to above in our historical sketch. It is at times styled the "New Psychology" by its more enthusiastic supporters. It seeks to secure precision and an objective standard in the description of mental states by controlling their conditions by skilful devices and ingenious apparatus. Its chief success so far has been in its efforts to measure the varying intensity of sensations, the delicacy of sense-organs and "reaction-time" or the rapidity of a faculty's response to stimulation. Certain properties of memory have also been made the subject of measuring experiments and more recently considerable industry has been devoted, especially by Külpe and the Würzburg school, to bring some aspects of the higher activities of intellect and will within the range of the laboratory apparatus. Opinions still differ much as to both the present value and future prospects of experimental psychology. Whilst Wundt, the leader

of the new movement for the past fifty years, places the only hope of psychological progress in the experimental method, William James's judgment on the entire literature of the subject since Fechner (1840) was that "its proper psychological outcome is just nothing at all" ("Principles", I, 534). Apart, however, from the very modest positive results, especially in the higher forms of mental life, which the experimental method has achieved or may achieve in the future, its exercise may nevertheless prove a valuable agency in the training of the psychological specialist, both in increasing his appreciation of the value of the most minute accuracy in descriptions of mental states, and also by fostering in him habits of precision and skill in systematic introspection.

Classification. The Faculties.—In empirical psychology, with modern writers, the next step after determining the method of the science is to attempt a classification of the phenomena of mental life. In the scholastic philosophy the equivalent operation was the systematic division of the faculties of the soul. Apart from vegetative and locomotive powers the Schoolmen, following Aristotle, adopted a bipartite division of faculties into those of cognition and appetency. The former they subdivided into sensuous, and intellectual or rational. The sensuous faculties they again subdivided into the five external senses and the internal activities of imagination, sensuous memory, *sensus communis*, and *vis cogitativa*. But there was much disagreement as to the number, character, and boundary lines of these internal forms of sensuous cognition. There were also divergences of opinion as to the nature of the faculties in general in themselves and to what extent there was a *distinctio realis* between faculties and the essence of the soul. But, on the other hand, there was general agreement as to an essential difference between all sensuous and intellectual or spiritual powers of the mind. The possession of the latter constitutes the *differentia* which separates man from the irrational animals.

Content of Empirical Psychology.—The psychologist naturally begins with the treatment of the phenomena of sentience. The several senses, their organic structure and functions, the various forms of sentient activity with their cognitive, hedonic and appetitive properties and their special characteristics have to be carefully analyzed, compared, and described. Next, imagination and memory are similarly studied, and the laws of their operation, growth, and development diligently traced. The discussion of the organic appetites springing from sensations, and the investigation of the nature and conditions of the most elementary forms of pleasure and pain may also appropriately come here. Intellect follows. The consideration of this faculty includes the study of the processes of conception, judgment, reasoning, rational attention, and self-conscious reflection. These, however, are all merely different functions of the same spiritual cognitive power—the intellect. Psychology inquires into their modes of operation, their special features, and the general conditions of their growth and development. From the higher power of cognition it proceeds to the study of spiritual appetency, rational desire, and free volition. The relations of will to knowledge, the qualities of conative activity, and the effects of repeated volitions in the production of habit, constitute the chief subjects of investigation here. In connexion with these higher forms of cognition and desire, there will naturally be undertaken the study of conscience and the phenomena of the emotions.

Genetic Treatment a marked characteristic of Modern Empirical Psychology.—The constant aim of modern psychology is to analyse all complex mental operations into their simplest elements and to trace back to their first beginning all acquired or composite habits

and faculties, and to show how they have been generated or could have been generated from the fewest original aptitudes or fundamental activities of the mind. This is sound scientific procedure—recognized in the Scholastic aphorism, *Entia non sunt multiplicanda præter necessitatem*. We may not postulate a special faculty for any mental state which can be accounted for by the co-operation of already recognized activities of the soul. But the labour and skill devoted during the past century and a half to this combined analytic and synthetic procedure has developed one feature of modern psychology by which it is differentiated in a most marked manner from that of the Middle Ages and of Aristotle. The present-day treatment is pronouncedly genetic. Thus, whilst the Schoolmen in their account of mental operations, such as perception, conception, or desire, considered these processes almost solely as elicited by the normal adult human being already in full possession and control of matured mental powers, the chief interest of the modern psychologist is to trace the growth of these powers from their first and simplest manifestations in infancy, and to discriminate what is the product of experience and acquired habits from that which is the immediate outcome of the innate capabilities of the soul. This is particularly noticeable if we compare the treatment of the mental operation of perception as given in most Scholastic textbooks with that to be found in any modern handbook of psychology. The point of view is usually quite different. Since much of the most plausible modern attacks on Scholastic psychological doctrine has been made in this manner, the genetic treatment from the Thomist standpoint of many psychological questions seems to us to be among the most urgent tasks imposed nowadays on the neo-Scholastic psychologist. The value of such work from a philosophical standpoint would seem to be distinctly greater than that of any results likely to be achieved in quantitative experimental psychology. Obviously there is nothing in the Thomistic conception of the soul and its operations incompatible with a diligent investigation into the unfolding of its various aptitudes and powers.

Rational Psychology.—From the study of the character of the activities of the mind in experimental psychology, the student now passes on to inquire into the nature of the principle from which they proceed. This constitutes the more philosophical or metaphysical division of the science. For, as we have indicated, the analysis and explanatory accounts of the higher forms and products of mental activity, which the scientific psychologist is compelled to undertake even in phenomenal psychology, involve metaphysical assumption and conclusions which he cannot escape—certainly not by merely ignoring them. Still, it is in this second stage that he will formally evolve the logical consequences to which his previous study of the several forms of mental activity lead up. His method here will be both inductive and deductive; both analytic and synthetic. He argues from effect to cause. From the character of the mental activities already scrutinized with so much care, he now concludes as to the nature of the subject to which they belong. From what the mind does, he seeks to learn what it is. In particular, from the simple spiritual nature of the higher activities of intellect and will, he infers that the being, the ultimate principle from which they proceed, must be of a simple and spiritual nature. Consequently, it cannot be the brain or any corporeal substance. Having established the simplicity and spirituality of the soul, he then goes on to deduce further conclusions as to its origin, the nature of its union with the body, and its future destiny. In this way by rational arguments the Scholastic thinkers claim to prove that the human soul can only have

arisen by creation, that it is naturally incorruptible, and that the boundless aspirations of the intellect, the insatiable yearnings of the will, and the deepest convictions of the moral reason all combine to establish a future life of the soul after death.

Important special questions of psychology are treated under the articles ANIMISM; ASSOCIATION OF IDEAS; CONSCIOUSNESS; ENERGY; FACULTIES OF THE SOUL; FORM; FREE WILL; IDEA; IMAGINATION; IMMORTALITY; INDIVIDUAL, INDIVIDUALITY; INTELLLECT; LIFE; PERSONALITY.

General Psychology: among the Scholastic Latin manuals there is much uniformity of treatment. URRÁBURA, *Psychologia*, I, II (Rome and Paris, 1894), is exhaustive. HICKEY, *Psychologia* (2nd ed., Dublin and New York, 1910) is an easy useful introduction; BOEDDER, *Psychologia Rationalis* (4th ed., Freiburg and New York, 1903). English: MAHER, *Psychology, Empirical and Rational* (7th ed., New York and London, 1911). French: MERCIER, *Psychologie* (4th ed., Louvain, 1903); GARDAIR, *Philosophie de St Thomas* (Paris, 1892-95); FARGES, *Etudes Philosophiques*, I-VI (Paris, 1890-95). German: GUTBERLET, *Die Psychologie* (Münster, 1896). English works of various schools: LADD, *Psychology, Descriptive and Explanatory* (New York and London, 1895); IDEM, *Philosophy of Mind* (New York and London, 1895); JAMES, *Principles of Psychology* (New York and London, 1890); STOUT, *Analytical Psychology* (London and New York, 1902); SPENCER, *Principles of Psychology* (New York and London, 1904); BAIN, *Senses and Intellect*; IDEM, *Emotions and Will* (London, 1894). Physiological: LADD, *Elements of Physiological Psychology* (New York and London, 1894); WUNDT, *Principles of Physiological Psychology* (tr., New York and London, 1904). Experimental: TITCHENER, *Experimental Psychology*, parts I, II (4 vols., New York and London, 1901-05); KÜLPE, *Outlines of Psychology* (tr. New York and London, 1894); MEUMAN, *Vorlesungen, Experimentelle Pädagogik* (Leipzig, 1907). Comparative: WABMANN, *Instinct and Intelligence* (tr. New York and London, 1903); IDEM, *Psychology of Ants and Animals* (1905); MIVART, *Origin of Human Reason* (London, 1889). Child Psychology: TRACY, *Psychology of Childhood* (Boston, 1907); PREYER, *The Mind of the Child*, vol. I-II (tr. New York and London, 1901); PEREZ, *First Three Years of Childhood* (tr. New York and London, 1892); MARENHOLZ-BULON, *Child and Child Nature* (tr. London, 1904); SULLY, *Children's Ways* (London, 1898); BURKE, *Child Study* (Dublin, 1908). History: general histories of philosophy, such as TURNER, *History of Philosophy* (Boston and London, 1903); DE WULF, *History of Philosophy* (tr. London and New York, 1909); SRÖCKL, *History of Philosophy* (tr. New York and Dublin, 1887); PERRIER, *Revival of Scholastic Philosophy in the Nineteenth Century* (New York, 1909), contains also a useful bibliography of neo-Scholastic philosophy; SIEBECK, *Gesch. der Psychol.* (1904). See also: BALDWIN, *Dictionary of Philosophy and Psychology*; and EISLER, *Wörterbuch* (Berlin, 1904).

MICHAEL MAHER.

Psychophysics. See CONSCIOUSNESS, QUANTITATIVE SCIENCE OF CONSCIOUSNESS.

Psychotherapy (from the Greek *ψυχή*, "mind", and *θεραπεύω*, "I cure"), that branch of therapeutics which uses the mind to influence the body; first, for the prevention of disease by keeping worry from lowering resistive vitality; secondly, for reaction against disease during progress by freeing the mind from solicitude and tapping latent energies; thirdly, after the ailment retrogrades, to help convalescence through the removal of discouragement during weakness by inspiring suggestion. Psychotherapy is sometimes regarded as a comparatively new development consequent upon our recent advance in psychology and especially in physiological psychology; it is, however, as old as the history of humanity, and the priests in ancient Egypt used it effectively. Wherever men have had confidence in other men for their physical good there has always been a large element of psychic influence over disease. The first physician of whom we have any record in history was I-Em-Hetep, "The Bringer of Peace"; we know that it was much more the confidence that men had in him than anything which he did by physical means that brought him this complimentary title and enabled him to do so much good. He was so highly esteemed that the famous step pyramid at Sakkara, near Memphis, is called by his name, and after his death he was worshipped as a god. The Eastern nations always employed mental influences in medicine, and we have abundant evidence of its effectiveness among them.

Among the Greeks the influence of the mind on the body was recognized very clearly. Plato says in the "Charmides": "Neither ought you to attempt to

cure the body without the soul. . . . You begin by curing the soul [or mind]." These expressions occur in a well-known passage in which Socrates tells of curing a young man of headache by suggestion. He pretended to have a remedy that had been used at the court of an Eastern king to cure headache; though it was really indifferent in its effect, the employment of it produced the desired result. In this story we have the essence of psychotherapy at all times. The patient must trust the suggestor and must be persuaded that the suggestion has already been efficient on others, and then the cure results. There are many passages of Plato in which he discusses the influence of the mind in lessening physical ills and also in increasing them, and even creating them, so that he says in the "Republic" that in his generation men were educating themselves in disease instead of in health, and this was making many very miserable.

A special form of psychotherapy is by hypnotism. This consists in suggestion made to the patient while he is in a state of concentration of attention that may be so deep as to resemble sleep. We find traces of this from the early days in Egypt, and especially in the temple hospitals. The Eastern nations paid much attention to it and succeeded in producing many manifestations that we are likely to think of as quite modern. As the result of more careful investigation in modern times we have come to realize that whatever there is in hypnotism is due entirely to the subject and not to the operator. It is not the power of the operator's will, but the influence of the subject on himself that produces the condition. (See HYPNOTISM.) Hypnotism may be useful at the beginning of certain neurotic cases, but it depends for its efficiency on the patient's will. If repeated frequently it always does harm. The recurrence of attention to it in each succeeding generation is one of the most interesting phenomena in the history of the use of the mind to influence the body.

UNCONSCIOUS PSYCHOTHERAPY.—Besides deliberate psychotherapy, there is not a little unconscious psychotherapeutics in the history of medicine. Many remedies have been introduced, have seemed to benefit patients, have then had considerable vogue, and subsequently proved to be quite without effect. The patients were helped by the confidence aroused by the new remedy. Such therapeutic incidents make it difficult to determine the real value of new remedies. Remedies of comparatively slight efficiency acquire a reputation because of their recommendation by someone who commands confidence; only after this loses its effect can the true value of the remedy be estimated.

Nearly every branch of science has furnished medicine with supposed remedies which have been of benefit for a time and have subsequently proved to be of little or no avail. In the later Middle Ages magnets were supposed to draw diseases out of people and actually affected many patients favourably. As electricity developed, each new phase of it found applications in medicine that were very promising at first, but afterwards proved to be of little therapeutic value. The supposed effect of the Leyden jar shortly after its discovery is ludicrous reading. Galvani's work gave new impetus to electrical therapy. A wandering quack from America, Perkins, made a fortune in Europe by means of two metal instruments about the size of lead pencils with which he stroked patients. They were supposed somehow to make an application of Galvani's discovery of animal electricity to the human body. After a time, of course, "Perkins tractors" failed to produce any such results. In spite of disappointments, each new development has had the same results. When the stronger electrical machines, and then the methods of producing high-frequency currents, were invented, these were announced as having wonderful curative powers and

actually cured many patients, until the suggestive value of the new discovery failed to act favourably on the mind. When the Röntgen rays attracted attention, they too were used with the most promising results in nearly every disease, though now their range of therapeutic value is known to be very limited.

FAITH CURES.—Faith has always been a strong therapeutic agent. Science, or the supposed application of scientific principles, has probably been the responsible cause of more faith cures than anything else. The reason why astrology maintained its influence in medicine was because of faith in scientific knowledge transferred to the realm of human affairs. When light was studied, it too came into therapeutics. With the discovery of the ultra-violet rays and their actinic value, blue-glass therapy became a fad, thousands of tons of blue glass were sold, and people sat beneath it and were cured of all kinds of pains and aches. Each new development of chemistry and of physics led to new applications to therapeutics, though after a time most of them have proved to be nugatory. The faith in the scientific discovery had acted through the mind of the patient so as to bring about an amelioration of symptoms, if not a cure of the disease. The patients who are cured are usually sufferers from chronic diseases, who either have only a persuasion that they are ill or, having some physical ailment, inhibit through solicitude and worry the natural forces that would bring about a cure. This inhibition cannot be lifted until the mind is relieved by confidence in some wonderful remedy or scientific discovery that gives them a conviction of cure.

QUACKERY AND MIND CURES.—The history of quackery is really a chapter of psychotherapy. The quack's best remedy is always his promise to cure. This he does for all diseases. As a consequence he benefits people very much through their minds. Such patients have never before fully trusted that they could be cured, and, without having much the matter with them, they have suffered, or at least complained. When they lift the burden of solicitude from themselves, nature cures them by very simple means, but the cure is attributed to the last remedy employed. We have no remedies in medicine that have come to us from quacks: their wonderful cures have been obtained from simple well-known remedies *plus* mental influence. The same power over the mind helps nostrums, or special medicines, sold with the promise of cure. At times such remedies have worked so many cures that governments have purchased the special secret from its inventor and published it to the world. The secret has always proved to be some ordinary remedy known before, and just as soon as its secrecy was lost it failed to cure. The spread of popular education, instead of making such faith cures by nostrums less common, has rather served to give them wider diffusion. The ability to read leaves people open to the suggestive influence of print, though it does not necessarily supply the judgment requisite for a proper appreciation of what is thus presented. As a consequence our generation is nostrum-ridden and spends millions of money for remedies which are quite indifferent or, at most, trivially helpful, and sometimes are absolutely noxious. Government analysis of a score of the most popular remedies widely consumed throughout the country five years ago showed that the only active ingredient was alcohol and that a dose of the medicine was about equivalent to a drink of whisky. This lessened the sale of these remedies, however, only for the time being, and most of them have regained their old popularity. The most popular present source of scientific superstition concerns electricity. All sorts of rings, medals, and electrodes are bought at high prices with the confidence that they will produce wonderful results. Rheumatic rings and wristlets, foot electrodes, one of copper and the other of zinc, electric belts, shields

worn in the front and back of the chest—these are modern examples of superstitious practices.

SPECIAL PSYCHOTHERAPEUTICS.—Ordinarily, it is presumed that psychotherapy is only efficient in affections that are due to mental persuasions, so-called imaginary diseases, and that it cannot benefit organic affections. In recent years, however, abundant proof has been forthcoming that favourable influence upon the mind can modify even very serious physical conditions. It is not unusual for a cancer patient who has lost some twenty or thirty pounds in weight to regain this and more after an exploratory incision which has shown the condition to be inoperable. The patient, to save solicitude, is given to understand that now he ought to get better and he proceeds to do so. In one such case a gain of seventy pounds was recorded. The patient eventually died of cancer, but there had been months of strength and efficiency that would not otherwise have been secured. There are affections, too, in which unfavourable mental persuasion produces serious physical changes that may even prove fatal if any other cause intervenes. It is now very well known that a great many cases of so-called dyspepsia are really due to over-solicitude about food and the elimination from the diet of so many articles supposed to be indigestible that the patient's nutrition is seriously interfered with. Occupation of mind with the stomach is particularly likely to interfere with its activity. Certain thoughts bring a sense of nausea. Delicate people may reject a meal if they are reminded of something nauseating, or if a particular smell or some untoward incident disturbs them. Food eaten with relish and in process of satisfactory digestion may be rejected if something deterrent is heard in reference to its origin or mode of preparation, and rejection occurs whether the disgusting statement be true or false. A conviction that certain articles of food will disagree with us is almost sure to make them difficult of digestion: a great many people are quite sure that they cannot digest milk or eggs, but prove thoroughly capable of digesting those articles of diet without difficulty when, as in tuberculosis sanatoria, they are required to take them regularly.

HEART AND MENTAL INFLUENCE.—The heart might be presumed free from the influence of the mind, because of its great importance. It is probably through this organ, however, that most of the favourable and unfavourable influence of the mind on the body is exerted. The heart begins to beat in the embryo long before the nervous system is formed, but it very soon comes to have the most intimate relations with the nervous system. In excitement and joy the heart beats fast; in fright and depression it beats slowly; and any vehement emotion seriously affects its action. This is true in health, but is particularly true in disease of the heart itself. Sufferers from heart-disease die from joy as well as from fright. The state of mind may influence the heart favourably or unfavourably in the course of disease, and the physician must recognize this and use his understanding of it to good purpose. Many of our heart remedies are rather slow to act, taking twelve hours or more for their effect. An hour or two after the visit of a physician, however, most heart patients will be ever so much better than they were before, and their improvement may be attributed to the physician's remedies, though it is only due to confidence aroused by his presence and the feeling of relief afforded by his careful examination and assurance that there is no danger. By the time this feeling would begin to lose its effect, his remedies take hold and the patient continues to improve.

Great physicians have at all times recognized the strong influence that the mind has over the heart. Lancisi [*De subit. morte*, I (Geneva, 1718), xix, §3] tells of cases in which over-solicitude about the heart was the cause of the symptoms. Morgagni, in "*The Seats and Causes of Diseases*", I (London, 1769), Let-

ter xxiv, tells of a physician who, from worrying about his heart, caused it to miss beats. Sydenham and Boerhaave both note the unfavourable effect which the mind may have on the heart [Brown, "*Academical Lectures*", VI (London, 1757)]. In our own times Oppenheim ("*Letters to Nervous Patients*", tr. Edinburgh, 1907) tells one patient that whenever he feels the pulse, the patient being conscious of it, beats are missed; whenever he feels it without advertence on the part of the patient, it is quite regular in its actions. He insists that the heart resents surveillance, "which not only accelerates, but may even inhibit its action and render it irregular". He adds: "And so it is with all the organs of the body which act spontaneously; they get out of order and become functionally defective, if, as the result of the attention and self-observation directed towards them, impulses flow to them from the centres of consciousness and will in the same way as they flow to the organs [e. g. the muscles] which are normally under the control of the will." Prof. Broadbent, whose experience with heart disease was perhaps the greatest in our generation, frequently dwells, in "*The Action of the Heart*" ("*The Writings of Sir Wm. Broadbent*", Oxford, 1910), on the necessity for setting the mind at rest. MacKenzie, whose work on the mechanics of the heart was in a contrary direction, has been quite as emphatic in recognizing mental influence ("*Diseases of the Heart*", Oxford, 1910). Psychotherapy means more in heart disease than anywhere else, and in other diseases its effect upon the circulation through the heart is very important.

The absolutely automatic action of the lungs might seem to indicate that these were free from any emotional or mental influence. Most of the asthmatic conditions characterized by difficulty of breathing have large mental elements in them. Neurotic asthma is more dependent on the mental state than anything else. Most of the remedies that affect it have a distinct action on the mind as well as the lungs. Even tuberculosis is very largely influenced by the state of the patient's mind. A patient who gives up the struggle will succumb. "Consumption takes the quitters" is an axiom. Patients who bravely face the danger and the difficulties usually live on much longer and sometimes live their lives out, and in spite of serious invasion of the lungs die from other intercurrent disease. In all the functional nervous diseases—that is, those nervous affections not dependent on some organic change in the nervous system, yet often accompanied by pains and palsies—the conditions known as hysterical—treatment through the mind is most essential. Even when other remedies are used it is only if they affect the patient's mind that they do good. The ill-smelling remedies, the bread pills, the stronger cathartics and emetics formerly used in these cases produced their effect through the mind.

Even in organic nervous disease, however, there is a distinct place for mental healing. Patients become depressed when they learn that they are sufferers from some incurable nervous disease, the appetite is disturbed, the digestion impaired, constipation sets in, they go out less in the air and take insufficient exercise, and then many adventitious symptoms develop. The patient attributes these to the underlying nervous disease, though they are really due to the mental state and to confinement. The promise of a cure lifts up the despondent mind, tempts the patient to go out; the appetite will be improved, many symptoms will disappear, and the patient thinks that the underlying disease is being helped. Hence the many advertised remedies for even such absolutely incurable diseases as locomotor ataxia, multiple sclerosis, epilepsy, and the like.

DREADS.—Psychotherapy is of course most important in the treatment of such affections as depend on mental influence. We have a whole series of dreads,

of anxieties, of exaggerations and sensations, and then of habits and of lack of will power, that can only be properly treated through the mind. The dreads, or phobias, constitute a rather large class of nervous affections; perhaps the most common is mysophobia, or dread of dirt, sometimes under the form of bacteriophobia; acrophobia, the dread of heights, which may become so poignant as to make it impossible for a person to sit in the front row of a gallery or even to say Mass on a high altar; alurophobia, or the dread of cats, which may make life miserable. Then there is dread of the dark, the dread of wide open places, the dread of narrow spaces, the dread of walking beneath anything overhanging, and numbers of others. There is always a certain mental element in these, yet they occur in persons of intellect and character. Only suggestion and training will cure them. Usually they are worse when the patient is run down.

TREMORS AND TICS.—After the dreads come the tremors, the tics or habits, and then the conscious surveillance of actions usually automatic, such as talking, writing, even walking, which interfere with the accomplishment of them. Under emotional stress, as after a panic, men sometimes find themselves unable to sign their names when anyone is watching them. Some men cannot drink a glass of water at a strange table without spilling it. These are psychic rather than nervous conditions, and must be treated as such. There are a number of tremors that occur as a consequence of fright which can only be bettered in the same way. Many of the tics—as winking, head-nodding, slight convulsive movements of the arms, movements of the lips, and nose—must be looked on in this same way. Children must be watched and prevented from contracting them. They have a tendency to run in families by imitation. If noted early, they can be removed by the formation of a contrary habit. Some habits of children, especially certain sucking habits and tongue movements, lead to ugly deformities of the mouth when the jaws are in the plastic stage. Thumb-sucking is a habit that must be taken seriously, or the results on the mouth will be very marked. Biting the nails in older people is a corresponding affection. Such habits develop, as a rule, only in those with some psychasthenic condition, but the individuals may be very useful members of society.

ALCOHOLISM AND DRUG HABITS.—The greatest usefulness of psychotherapy is in alcoholism and in the drug habits. There is no remedy that will cure alcoholism. We have had, during the past half century, hundreds of advertised cures: we know now that all of them owed their success to influence on the patient's mind. When a new cure is first announced many are benefited by it. Afterwards it sinks to the ordinary level and comes to be recognized as only a helpful physical treatment with a strong mental factor attached. When the patients are in the midst of the attacks of alcoholism, their physical state makes them crave some stimulation. At this time they must be given other than alcoholic stimulants, and must be under such surveillance as shall help them to keep away from liquor. After a variable time—from a week to two or three weeks—they are quite capable of resisting the craving by themselves, if they really want to. The cure of alcoholism is easy, but relapses are easier still, because the patients think that they can take a glass and go no further. When they are tired or chilled, or fear that they are going to catch a cold, or when friends suggest it to them, they indulge in a glass and then in the second and third, and the old habit has to be broken again. We have any number of examples, however, of men who have not drawn a sober breath for ten, twenty, or thirty years who have resolved to drink no more and have kept their resolutions. If a man inclined to alcoholism is put in the way of temptation, he will almost surely fall;

he is more susceptible than others; he must be kept from contact with it in every way, and then it is comparatively easy for him not to relapse into the habit.

Probably the most helpful factor in the treatment of alcoholism is for the patient to have some friend, physician or clergyman, whom he thoroughly respects, to whom he turns with confidence in moments of trial. There is no reason, except in case of distinct deterioration, why he should not be completely cured; but not drugs, but mental influence and will power is the important remedy. The same is true of drug addictions, now grown so common in the United States. That country uses more than ten times as much opium and cocaine as is required in medicine. The special victims of the habits are those who can easily procure the drugs—druggists, physicians, and nurses. It is quite easy to cure a drug habit. It is even easier to resume it. Relapses take place because the patients persuade themselves that for this once they need a dose of their favourite remedy. One dose leads to another, and so the habit is resumed. After a time a habit of relapse into the habit develops and is most difficult to break. If the patients themselves want to, however, it is not hard as a rule to correct these habits. Moral factors mean much more than physical. Patients must have someone whom they take into their confidence, they must live normal, regular lives, with long hours in the open air and good hours of sleep, and must not be subjected to emotional strains. It is almost impossible to break up the habit in an actor or a broker, or a gambler, because every now and then he feels the need of the stimulant to enable him to accomplish some sudden call in his work. The same thing is true of a doctor or a nurse with many emergency calls to answer. Often the change of life necessary may be difficult, but as the wages of the drug habit is premature death, it should not be difficult to make patients understand the necessity.

Other habits—dietary, sexual, and the like—must be met in just the same way. The patient can be helped in the beginning by means of drugs. After that it depends on his will. His will may be helped very much, however, by having a confidant, a confessor, or a physician to whom he goes in relapses, and who advises him so that his surroundings may be made more favourable.

FAITH CURES AND MIRACLES.—It is often said that the cures at shrines and during pilgrimages are mainly due to psychotherapy—partly to confident trust in Providence, and partly to the strong expectancy of cure that comes over suggestible persons at these times and places. Undoubtedly many of the cures reported at shrines and during pilgrimages are of this character. An analysis of the records of cures carefully kept—as, for instance, at Lourdes—shows, however, that the majority of accepted cures have been in patients suffering not from mental persuasions of disease, nor from neurosis, nor from symptoms exaggerated by anxiety, but from such very concrete affections as tuberculosis, diagnosed by one or more physicians of standing, ulcers of various kinds, broken bones that have long failed to heal, and other readily demonstrable organic affections. When cures are worked in such cases, some force beyond that of nature as we know it must be at work. The physicians who have been most closely in touch with the patients at such shrines are those most confident in their expression that they have seen miracles take place. A visit to a shrine like Lourdes is sufficient to convince any physician that there is something more than psychotherapy, though he can see also abundant evidence of psychotherapy at work.

CYCLES OF PSYCHOTHERAPY.—Our time has seen a revival of psychotherapy in many forms. Interest in it runs in cycles. It is always most intense just after a period of such devotion to physical science as produces a general impression that at last the mys-

tery of life has been discovered. In the reaction that follows disillusionment mental healing becomes a centre of attention. Our phase will lose significance as preceding phases have done, and a juster estimation of the place of bodily and mental factors as co-ordinate influences for health will recur.

Ptolemæus, CLAUDIUS. See GEOGRAPHY AND THE CHURCH.

Ptolemais, a titular see in Egypt, metropolis of Thebais Secunda. Ptolemais owes its name to Ptolemy Soter who built it on the site of a village named Si (with the article, Psi, whence the Coptic Psōi, or Psōi; Arabic Absāy; Greek Sois and Syis). The capital of the nome of Thinite, it supplanted Thebes as capital of Thebais; as important as Memphis, its administration was copied from the Greek system. A special cult in honour of the Ptolemys, particularly of its founder, was established. In the sixth century it was the civil metropolis of Thebais Secunda. Le Quien (*Oriens christianus*, II, 605) mentions three bishops: the Melitian Ammonius; Heraclides, present at the Council of Ephesus (431); Isaac, who signed the letter of the bishops of Thebais to the Emperor Leo (457) and was present at the Council of Constantinople under the Patriarch Gennadius. A Greek "Notitia episcopatum" refers to the see about 820. It had also some Coptic bishops (Zoëga, "Catalogus codicum copticorum", 329). The Coptic "Notitiæ episcopatum" do not mention the see, but other Coptic documents cite it frequently, and allusion is made to its medical school. To-day it is known as Menshiyeh or Menshâh, contains 8000 inhabitants, belongs to the district of Girgeh, Province of Sohag, on the western bank of the Nile, and is a railway station between Cairo and Thebes.

S. PÉTRIDÈS.

Ptolemais (SAINT-JEAN D'ACRE), a titular metropolis in Phœnicia Prima, or Maritima. The city of Acre, now Saint-Jean d'Acre, was called Ptolemais in 281 or 267 B. C., by Ptolemy II, surnamed Philadelphus, and since then this name has subsisted conjointly with the primitive one, at least as the official name. Quite early it possessed a Christian community visited by St. Paul (*Acts*, xxi, 7). The first bishops known are: Clarus, present about 190 at a council held concerning the observance of Easter; Æneas, at Nicæa, 325, and at Antioch, 341; Nectabus at Constantinople, 381; Antiochus, friend and later adversary of St. John Chrysostom, and author of some lost works; Helladius at Ephesus, 431; Paul at Antioch, 445, and at Chalcedon, 451; John in 518; George at Constantinople, 553 (Le Quien, "*Oriens christianus*", II, 813). The see was a suffragan of Tyre, which then depended on the Patriarchate of Antioch. With the Latin conquest the province of Tyre was attached to the Patriarchate of Jerusalem. Latin bishops resided there, and a list of them from 1133 to 1263 may be found in Eubel (*Hier. Cath. med. ævi*, I, 66). From this date to the taking of the city by the Arabs in 1291 the bishopric was governed by the Patriarch of Jerusalem. Concerning the titular bishops up to 1592 see Eubel, *op. cit.*, I, also II, 88; III, 105. The official list of the Roman Curia (Rome, 1884) does not mention Ptolemais as a bishopric, but it may have been known as an archbishopric. The Greeks elevated the see to the rank of metropolitan depending on the

Patriarchate of Jerusalem. This occurred before 1672, when Joasaph, present at the Council of Jerusalem, was qualified as metropolitan; the same conditions now exist. The Melkite, or Greek, metropolis numbers 10,000 faithful, 36 priests, 30 churches or chapels, 17 schools, 3 orphanages, and a monastery of 23 monks. There is a Latin parish directed by the Franciscans, a hospital, school for boys, the Ladies of Nazareth with a school, and a Protestant school and hospital of the Church Missionary Society.

S. PÉTRIDÈS.

Ptolemy of Lucca. See BARTHOLOMEW OF LUCCA.

Ptolemy the Gnostic, a heretic of the second century and personal disciple of Valentinus. He was probably still living about 180. No other certain details are known of his life; Harnack's suggestion that he was identical with the Ptolemy spoken of by St. Justin is as yet unproved (*Text. u. Untersuch.* New Ser. XIII, Anal. z. ält. Gesch. d. Chr.). He was, with Heracleon, the principal writer of the Italian or Western school of Valentinian Gnosticism. His works have reached us in an incomplete form as follows: (1) a fragment of an exegetical writing preserved by Irenæus (*Adv. Hær.*, I, viii, 5); (2) a letter to Flora, a Christian lady, not otherwise known to us. This letter is found in the works of Epiphanius (*Hær.* XXXIII, 3-7). It was written in response to Flora's inquiry concerning the origin of the Law of the Old Testament. This law, Ptolemy states, cannot be attributed to the supreme God, nor to the devil; nor does it proceed from one law-giver. A part of it is the work of an inferior god; the second part is due to Moses, and the third to the elders of the Jewish people. Three different sections are to be distinguished even in the part ascribed to the inferior god: (1) The absolutely pure legislation of the Decalogue which was not destroyed, but fulfilled by the Saviour; (2) the laws mixed with evil, like the right of retaliation, which were abolished by the Saviour because they were incompatible with His nature; (3) the section which is typical and symbolical of the higher world. It includes such precepts as circumcision, fasting, and was raised by the Saviour from a sensible to a spiritual plane. The god who is the author of the law, in so far as it is not the product of human effort, is the demiurge who occupies a middle position between the Supreme God and the devil. He is the creator of the universe, is neither perfect, nor the author of evil, but ought to be called just. In his interpretation of the universe, Ptolemy resorted to a fantastic system of eons. Thirty of these, as he believes, rule the higher world, the pleroma. This system becomes the basis of a wild exegesis which discovers in the prologue of St. John's Gospel the first Ogdoad. (See GNOSTICISM.)

N. A. WEBER.

Publican, in the Gospels, is derived from the *publicanus* of the Vulgate, and signifies a member or employee of the Roman financial companies who farmed the taxes. From the time of the Republic the Roman State relieved itself of the trouble of collecting the taxes in the provinces by putting up the taxes of each in a lump sum to auction. The highest bidder received the authorization to extort the sum from the province in question. Such a system afforded ample opportunity for rapacious exactions on the part of the company and its officials, and the abuses were often intolerable. On account of these, and more, perhaps, because of the natural though impotent Jewish hatred of the Roman supremacy, those of the Jews who found it profitable thus to serve the foreign rulers were objects of execration to their countrymen. In the Gospel narrative we find

them ■ ■ class habitually coupled with "sinners" and the "heathen". The attitude of Christ towards this, as well as other despised classes, was that of an uplifting sympathy. One great reproach cast upon Him by His enemies, the self-righteous Scribes and Pharisees, was His friendship for, and association with publicans and sinners; and consistently with this conduct it pleased Him to choose as one of the twelve Apostles Levi or Matthew the Publican (Matt., ix, 9).

MAAS, *Comment. of Gospel of St. Matthew* (New York, 1898); DIETRICH, *Die rechtliche Natur der Societas publicanorum* (Meissen, 1889); THIBAUT, *Les douanes chez les Romains* (Paris, 1888).

JAMES F. DRISCOLL.

Public Honesty (DECENCY), a diriment matrimonial impediment consisting in a relationship, which arises from ■ valid betrothal, or from a marriage approved by the Church but not consummated. Marriage between the persons affected by this impediment, as described below, is null; were it possible for them to marry they might be exposed to incontinency, owing particularly to their intimacy and familiar intercourse.

Traces of this impediment are found under another name in Roman law, since according to Modestinus (D. XXIII, ii, 42, *De ritu nuptiarum*) not only what is lawful, but likewise what is eminently fitting, is to be observed in entering into wedlock. Hence in Roman law affinity arising from a valid marriage, whether consummated or not, constituted a diriment impediment between the affined in all degrees throughout the direct line, and to the second degree (civil method of computing) in the indirect or oblique line. Moreover, there was a quasi-affinity, which, for the safeguarding of public morals, rendered matrimony null and void: (1) between a man and his stepdaughter or between a woman and her stepson; (2) between a woman and the son or father of her betrothed, and conversely between a man and the daughter or mother of his affianced (D. XXIII, ii, 12 and 14); (3) lastly, between persons affined through concubinage (loc. cit., 14; and D. XXXVIII, x, 7).

The Church, imitating this legislation, admits an impediment, which, in her estimation, is required by public decency or good morals. In canon law carnal intercourse, licit or otherwise, is the principle of affinity; in Roman law, it is valid marriage, whether consummated or not. Public honesty then coincides at times with the affinity of the Romans, at times with their quasi-affinity. The institution of this impediment is sometimes attributed, but wrongly, to Boniface VIII. It doubtless owes its existence not to ■ positive law, but to custom, and probably dates back to the twelfth century (Berardi, III, diss. II, cap. iii). Canons xi, xiv, xv (Caus. II, Q. ii) in Gratian's *Decretum*, indicating an earlier existence of this impediment, are apocryphal (Gasparri, "*De Matrimonio*", n. 801).

According to our present legislation (Trent, Sess. XXIV, cap. iii, *De Ref. Matr.*) the impediment of public honesty arises from a valid betrothal between the male party to the contract and the blood relatives of the woman in the first degree (mother, daughter, sister), and conversely between the woman and the blood relatives of the man in the same degree (father, son, brother). Once existing, the impediment always remains, even though the betrothal is lawfully broken (see BETROTHAL). It is to be noted that betrothal, to be valid, must now ("*Ne temere*" of Pius X) be in writing, signed by the contracting parties and by the ordinary, or a parish priest within his own territory, or two witnesses. If one or the other of the contracting parties is unable to write, an additional witness is required. If the betrothal is conditional, the impediment does not arise till the condition is verified.

Second, this impediment, for a stronger reason, is

begotten by a marriage contract, not perfected by carnal relations—and this, too, though the marriage be invalid, unless the invalidity be due to lack of lawful consent. By carnal intercourse public decency gives way to affinity, and, though some deny this, all admit that in a petition for a dispensation it is sufficient to express the impediment of affinity, while public decency, if it still exist, is understood.

A civil marriage does not give rise to this impediment (S. C. C., 17 March, 1879), nor does public decency beget a second impediment prejudicial to a former betrothal; namely, a betrothal or marriage (unless consummated) with the mother, sister, or daughter of an affianced person does not prohibit the keeping of one's troth to the said person. Since the impediment of public decency is of ecclesiastical origin, it follows that the Church may dispense from it, and that it does not affect unbaptized persons, even though later they become Christians. A dispensation from "*Disparity of Worship*" includes one in public decency, where the baptized party requires such. Finally it is apparent that this impediment may be multiplied in the same person, as, for instance, if one were to enter into betrothal with several women related by blood in the first degree.

Puebla, ARCHDIOCESE OF. See TLAXCALA.

Pueblo Indians.—NAME: From the Spanish word meaning "village" or "town". A term used collectively to designate those Indians of central New Mexico and north-east Arizona, of sedentary and agricultural habits and dwelling in permanent communal stone-built or adobe houses, as distinguished from the surrounding tribes of ruder culture and roving habit. The name is strictly a cultural designation, without linguistic or proper tribal significance, although in former times each group of *pueblos* speaking the same language or dialect appears to have constituted a loose confederacy, or "province" as termed by the Spaniards.

DIVISIONS AND LANGUAGES: The ancient area of Pueblo culture, as indicated by the numerous prehistoric ruins, extended from about the Arkansas and Grand rivers, in Colorado and Utah, southward indefinitely into Mexico, and from about central Arizona eastward almost across the Texas Panhandle. This area seems to have been gradually narrowed down by pressure of the invading wild tribes from the north and east: Apache, Navaho, Ute, and Comanche—and by the slow drying up of the country, until at the beginning of the historic period in 1540 the Pueblo population centred chiefly on the upper Pecos and Rio Grande and about Zuñi in New Mexico, and upon the Hopi *mesas* in north-east Arizona. The inhabited *pueblos* at that date probably numbered close to one hundred, with an approximate population not far from 50,000, as against 25 now occupied, with a total population in 1910 of 11,153. This does not include the two small Americanized *pueblos* of Isleta del Sur (Texas) and Senecú (Mexico), in the immediate neighbourhood of El Paso, which might bring the total up to a few more than 11,200 souls. With the exception of these two, all but the seven Hopi *pueblos* (including Hano) are in New Mexico. In all, there were represented seven languages of four distinct linguistic stocks, classified as follows:

Tanoan Stock:

- | | |
|---|------------|
| 1a. Tewa group (" <i>Teguas province</i> ") | 1910 A. D. |

HISTORY: The history of the Pueblo tribes begins in 1539 with the expedition of the Franciscan monk, Marcos di Niza, who, lured by rumours of great cities in the North, set out from Mexico, accompanied by some Indian guides and by a negro survivor of the ill-fated Nawaez expedition, and after crossing the great deserts that intervened, arrived within sight of Zuñi, planted a cross and dedicated the country to St. Francis, and returned with the news of his discovery. A powerful expedition was at once organized under Francisco Vasquez de Coronado, for the conquest of the new country. In July, 1540, after nearly five months' march, the advance guard reached the principal Zuñi town, which was taken by storm. Exploring parties were sent out in every direction, over to the Hopi, the Colorado, and the buffalo plains, and the expedition finally went into winter quarters at Puaray, among the Tigua (Tigux province) about the present Bernalillo, North Mexico, on the Rio Grande. The province was rich and populous, having twelve *pueblos* with perhaps 8000 souls. The Indians were at first friendly, but the arbitrary conduct of the Spaniards soon provoked hostility and resistance, which was put down with terrible atrocity, one hundred surrendered prisoners being burnt at the stake, or shot down as they attempted to escape, and hundreds or thousands of others being butchered in a determined struggle. Coronado penetrated as far as Quivora (the Wichita country), in central Kansas, where Fr. Juan de Padilla remained to evangelize the natives (see WICHITA). After another winter in Tigux, which remained hostile, with explorations among the Jemez, Piros and other tribes, the expedition returned to Mexico in the spring of 1542. Besides Fr. Padilla with the Wichita, Fr. Lius de Escalona remained behind at Pecos ("Cicuye") and Brother

Juan de la Cruz at Puaray. The first, and it is believed, all three, were killed by the Indians, being the first missionary martyrs within the United States. Unless otherwise noted, all the Catholic mission workers in the Pueblo region are Franciscans.

No other entry of the Pueblo country was made until 1581, when Fr. Augustin Rodriguez asked and received permission for the undertaking. Accompanied by two other priests, Frs. Santa Maria and Lopez, with an escort of about twenty Indians and soldiers under Francisco Chamuscado, he reached Tigux late in the year. The escort was apparently frightened by the hostile attitude of the natives, but the priests remained, and all three soon afterward met the fate of their predecessors, being killed by the Tigua. In an attempt to ascertain the details of their death, and possibly recover their remains, a volunteer explorer, Don Antonio Espejo, accompanied by Fr. Bernardino Beltran, in the next year led a small expedition over the same route up the Rio Grande. Having accomplished this purpose he went on, visiting almost every Pueblo tribe from the Pecos to the Hopi, finally reaching Mexico in the fall of 1583. Late in 1590 a strong expedition under Castano de Sosa ascended the Rio Grande, stormed Pecos and visited a large number of *pueblos*, whose inhabitants either fled or made submission. One or two later contraband expeditions seem to have reached the buffalo plains. The real conquest of the country was accomplished in 1598-9 by Juan de Oñate of Zacatecas, with 400 men, including commissary Fr. Alonso Martinez and nine other Franciscans, who traversed the whole region to beyond the Hopi, generally establishing friendly relations with the natives, and organizing regular forms of government, with a priest in each district. A massacre of a Spanish detachment at the almost inaccessible cliff town of Acoma resulted in the storming of the *pueblo* and the slaughter of most of the inhabitants, 24 January, 1599. In 1605 Santa Fé was founded as the capital of New Mexico.

In 1617 eleven Franciscan churches had been built and 14,000 natives baptized. In 1621 Fr. Alonso de Benavides arrived as first custodian with 27 more Franciscans. In 1627 over 34,000 Indians had been baptized and 43 churches built, and 46 fathers and a number of laymen were at work. To Fr. Benavides we owe the "Memorial", the standard authority on early New Mexico and its missions, published at Madrid in 1630. Fr. Geronimo Salmeron, of the same period, is the author of a "Doctrina" in the Jemez language and of a valuable "Relaciones de Nuevo Mexico". In 1630 there were about 50 friars serving over 60,000 Indians in over 90 *pueblos* grouped into 25 mission jurisdictions, the work including even a part of the wild Apache and the unidentified Jumana in the eastern plains.

Shortly afterward began the difficulties between the administration and the missionaries, which led up to the great disaster of 1680. Revolts at various times of the Jemez, Tewa, Piros, and others were harshly repressed by the governors. Taos planned a general rising and several missionaries were killed. From about 1670 the Apache and Navaho raids became a constant check to Pueblo prosperity. The trouble culminated in August of 1680 in a general rising of all the Pueblos, with a few exceptions, under Popé, a Tewa chief of San Juan. Nearly four hundred Spaniards were killed, including twenty-one of the thirty-three missionaries then in the country; every mission was destroyed, with furnishings and records; Governor Otermin was besieged in Santa Fé, and finally compelled to withdraw with every Spaniard in the country into Mexico. Many of the Indians abandoned their *pueblos* and built new towns in inaccessible regions. For twelve years the Pueblos retained their independence until the reconquest of the country by Diego de Vargas in 1692-4. In Zuñi alone was found any in-

dication of former Christian teaching. The sacred vessels of the slain priests had been carefully preserved and candles were still burning upon the altar. The reconquest was assured by the retaking of Santa Fé from the hostile Tano, and the slaughter or enslavement of all the defenders, 29 December, 1693, but a spirited resistance was kept up by the various tribes, even at heavy loss, for nearly a year longer. The defeated hostiles were compelled to return to their abandoned towns or to gather into new ones, as their conquerors dictated. A part of the Yewa, who had fled from the Rio Grande to the far distant Hopi, remained with their protectors and now constitute the *pueblo* of Hano, still retaining their distinct customs and language. In June, 1696, half the *pueblos* rose again, killing five missionaries and a number of other Spaniards, but were finally reduced to submission. The missions were re-established among all but the Hopi, who showed such determined hostility to Christianity as to destroy one of their own towns, Awatobi, and massacre or enslave the entire population for having consented to receive missionaries (1700). Sporadic outbreaks and alarms continued for many years, together with increasingly bold inroads by the wild tribes. In a special junta held in 1714 the missionaries, against the civil and military authorities, defended the right of the Christian Indians to carry arms and paint their bodies. From 1719 to 1745 the Jesuits of Arizona made efforts to secure official charge of the Hopi, but without success. In 1747 an expedition against the wild Comanches, who had raided Pecos and other eastern *pueblos*, killed 107, captured 206 and took nearly 1000 horses.

In 1750 the hostility of the civil administration to the missionaries resulted in two counter reports, in one of which the Franciscans were accused of neglecting their duties, and it was recommended that the number of missions be reduced, while in the other the missionaries accused the governor and civil officers of all sorts of crimes and oppressions against the Indians. In 1748 Villaseñor reported 18 principal missions, besides visiting stations representing a total of nearly 9400 Indians. Only a part of these, however, could be considered as actual Christians. Pecos and Zuñi were the most important, the one with 1000 and the other with 2000 Indians, and each with two resident missionaries. In 1776 the Franciscan Fr. Francisco Garces ascended the Colorado to the obdurate Hopi, but was refused even a shelter. In 1780 Governor Anza took advantage of a terrible famine in the tribe to induce a few of them to remove to the mission *pueblos* (see Hopi). In this same year, 1780-1, besides the famine and pestilence which nearly exterminated the Hopi, the smallpox carried off over 5000 Indians of the mission *pueblos*, in consequence of which the governor in 1782 officially reduced the number of missions by eight, despite the protests of the friars. Says Bancroft: "It should be noted that the New Mexican missions were radically different from the Californian establishments of later years. Practically, except in being subject to their provincial and paid by the king, instead of being under the bishop and supported by parochial fees, these friars were mere parish priests in charge of Indian *pueblos*. There were no mission estates, no temporalities managed by the padres, and except in petty matters of religious observance the latter had no authority over the neophytes. At each *pueblo* the padre had a church, where he preached and taught and said Mass. With the performance of these routine duties, and of those connected with baptism, marriage and burials, he was generally content. The Indians, for the most part willingly, tilled a little piece of land for him, furnishing also a few servants from week to week for his household service and that of the church. He was in most instances a kind-hearted man, a friend of his Indians, spending much of his salary on them or on the church.

The Indians were in no sense Christians, but they liked the padre in comparison with other Spaniards, and were willing to comply with certain harmless church formalities (sic), which they neither understood nor cared to understand." Of the frequent charges brought against them he says, "with all their shortcomings, the padres were better men than their enemies." Official reports of this later period represent the Indians as constantly victimized by the traders and the Spaniards generally.

About the year 1800 the missions still existing were eleven, viz: at Sia (Asuncion), Isleta (San Agustín), Laguna (San José), Picures (San Lorenzo), San Felipe, San Juan, Dandia (Asuncion or Dolores), Poynaque (Guadalupe), Santa Clara, Santo Domingo, Toros (San Geronimo), Zuñi (Guadalupe). "Visitas" were Acoma, Cochiti (San Buenaventura), Galisteo, Jemes San Diego), Nambé (San Francisco), Pecos (Los Angeles), San Felipe, San Ildefonso, Santa Ana, Tesuque. With the increase of the Spanish population and the steady decrease of the Indians in importance as well as in number, the missions also declined, and in 1811 there were but five missionaries in nineteen *pueblos* of New Mexico. The establishment of the Republic of Mexico in 1821 tended further to weaken the mission support. In 1832 there were still five resident missionaries. There was no "secularization", as in California, because there was nothing to confiscate. In 1837 a part of the *Pueblos* attempted a revolution, and elected José Gonzalez of Taos as governor, but were defeated in the following January and the Indian leader taken and shot. In January, 1847, the same Indians of Taos resisted the newly established American government, killing Governor Charles Bent and about twenty other Americans, but were finally defeated, their *pueblo* being stormed, about 150 of their men killed, and several others executed. With some unimportant exceptions the *Pueblos* have since remained quietly under American rule, the treaty of Cession having conferred upon them the theoretic right of citizenship, with which however they seldom concern themselves, their affairs being administered through the Indian Office, and their *pueblo* lands being secured under old Spanish grants confirmed by act of Congress in 1858. Other legislation left them practically disfranchised. "They never cost the government a dollar of warlike expenditure, and they received much less aid from the civil department than any of the hostile tribes." In 1853 they suffered again from smallpox. With the changing conditions the *pueblos* lost their mission character, the old Franciscans being replaced by secular priests.

Excepting the Hopi of Arizona and about one-half of the people of Laguna, most of the Pueblo Indians are still under Catholic influence and at least nominally Catholic, although a majority undoubtedly still adhere to their ancient rites. Every *pueblo* is served either by a resident or visiting priest, including several Franciscans, with frequent instruction by sisters from Santa Fé or Bernalillo. Some of the old churches, however, are in ruinous condition and visits from the priest are at long intervals. Besides a number of Government schools there is a Catholic day school at Jemes, conducted by Franciscan Sisters and the two flourishing boarding-schools of Saint Catherine's at Santa Fé, in charge of the Sisters of the Blessed Sacrament, and Loretto at Bernalillo, under the Sisters of Loretto. Of Protestant work, past and present, the most important is that of the Presbyterians, at Laguna, begun about 1876 by Rev. John Menaul, who is the author of several booklets in the language. Although very few of the adult *Pueblos* speak any English, a large number speak Spanish fluently.

HOME LIFE AND INDUSTRIES: The primitive Pueblo culture stood alone. It centred about the house, an immense communal structure, sometimes in part several stories high, of many rectangular rooms and

PUEBLO DANCE AND GROUP OF PUEBLO INDIANS, ZUÑI, NEW MEXICO

narrow passage ways, of varying sizes and directions, with flat roofs which served as working or resting places, or as observation points for ceremonial occasions. The houses of the *pueblo* were usually built around a central open space or plaza in the middle of which was the "kiva" (Spanish "estufa") or sunken rock-hewn chamber dedicated to the sacred secret rites of the various priesthoods. For better defence against the wild tribes the outer walls were frequently solid, without door or window opening, entrance being effected by means of ladders—one on the outside for ascending to the flat roof, and another descending into the interior through a doorway in the roof itself. The material was either cut sandstone or volcanic tufa, faced with adobe, or adobe blocks of sun-baked clay. The roofs were of timbers reinforced with cornstalks laid in clay. The fire-place was in the centre or in the corner, and the smoke escaped through the doorway in the roof. At one end of the principal living-room was a low stone enclosure fitted with stone slabs of various smoothness and set slanting, on which the corn was ground into meal by means of stone *metates*. The "cliff dwelling" and the "cave dwelling" of the same region were simply variant forms of the same structure, from which the modern Pueblo house differs but very little. The prehistoric "cliff-dwellers" were in many cases the ancestors of the Pueblos of to-day. The Hopi, in fact, are still true cliff-dwellers, their villages being set, for defensive purposes, upon the summits of *mesas* several hundred feet above the surrounding desert.

Their main dependence was agriculture assisted by irrigation, corn and beans being the principal crops, with "chile", pumpkins, native cotton and tobacco, and, later, peaches introduced by the old missionaries. In spite of their arid surroundings they were industrious and successful farmers. They also hunted to some extent, particularly jackrabbits, which were taken by circle "drives" in which whole communities participated. Fish was never eaten. The dog was the only domestic animal, with the exception of the turkey and eagle occasionally kept for feathers. As weavers and potters they excelled all other tribes north of Mexico, their pottery being particularly beautiful in ornamentation, finish, and general workmanship. Their native cotton is now superseded by wool. They also made a great variety of baskets, the basket plaques of the Hopi being especially artistic. The men were expert carvers in wood. Their ordinary dress was of deerskin, with elaborate fabrics of woven cotton for ceremonial occasions; fabrics of woven yucca fibre were also used in ancient times. Blankets of woven strips of rabbit skin were worn in winter. In summer the men went practically naked except for the breechcloth and children under ten years were seldom clothed. Necklaces, earrings, and other ornaments of shell, turquoise, and more recently of worked coin silver, were worn by both sexes. The hair was cut off above the eyes in front, and either bunched up behind by the men, or at the side by the women, the unmarried girls being distinguished by a special hair arrangement. The women alone were the potters and breadmakers, but both sexes shared in farming, house-building, weaving and basket making. Weapons were the bow and arrow, lance, club, and knife, with a boomerang club for killing jackrabbits and shields for ceremonial occasions.

ORGANIZATION AND RELIGION.—All the Pueblo tribes had the clan system, some having as many as twenty or more clans, with descent generally, but not always, in the mother. Monogamy was the rule, unlike the condition in most tribes in the United States and northward, and the woman was the virtual owner of both the house and the garden, with correspondingly higher status than in other tribes. Each *pueblo* was an independent and separate community, the only larger bond being similarity of language or cus-

tom, the chief being simply the executive of the priesthoods. In some *pueblos* there is said to have been a summer and a winter chief. Since Spanish times the town government is vested in an elective chief or governor, a vice-chief and a council. Practically all affairs of importance—war, medicine, hunting, agriculture, etc.—were controlled by the numerous priesthoods or secret societies, whose public ceremonies made up a large and picturesque part of Pueblo life. Among these ceremonies the Snake Dance of the Hopi is probably most widely known. Their religion was an animism, with special appeal to the powers supposed to control the rain, the growing crops, hunting, and war. Some of their ritual myths were of great length and full of poetic imagery, while some of their ceremonials were of high dramatic character, often interwoven with features of the grossest obscenity. Special regard was paid also to the cardinal points, to which were ascribed both sex and colour. Belief in witchcraft was universal and witch executions were of frequent occurrence. The dead were buried in the ground. In temperament the Pueblos were, and still are, peaceable, kindly, industrious, and of rather jovial disposition. Their outward life has been but little changed by the white man's civilization beyond the addition of a few conveniences in house-keeping and working methods, and the majority still hold tenaciously to their old beliefs and ceremonials (see also HOPI INDIANS).

The literature upon the Pueblo Indians and region is so voluminous that it is only possible to note a few of the works most readily available.

JAMES MOONEY.

Puerto Viejo, DIOCESE OF. See PORTOVIEGO.

Puget, PIERRE, painter, sculptor, architect, and naval constructor, b. at Marseilles, 31 Oct., 1622; d. there 2 Dec., 1694. At fourteen he was apprenticed to a shipbuilder and showed much talent. In 1637 he set out on foot for Italy, and found work with the duke's cabinet-maker in Florence. Later at Rome he studied painting under Pietro da Cortona. In 1643 he returned to France, and was summoned to Toulon to build a man-of-war. In 1646 he was again in Italy as assistant to a religious of the Feuillants, whom Anne of Austria had commissioned to make drawings of all the principal monuments of antiquity. Puget's attention was thus directed to architecture. In 1653 he was back in France, painting altar-pieces for different churches, the "Annunciation and Visitation" (Aix); the "Salvator Mundi", the "Baptism of Constantine and of Clovis" (Marseilles). Some pictures believed to be his are probably the work of his son François. In 1660 Fouquet sent him to Carrara to buy marble for his palace. After the fall of Fouquet, Puget lingered in Genoa long enough to execute many works: "St. Sebastian"; "B. Alexander Sauli"; a

"Madonna" for the Balbi; another for the Carrega; "St. Philip Neri"; the "Rape of Helen", Palazzo Spinola; a relief of the "Assumption" for the Duke

PIERRE PUGET

of Mantua. His sculptures in the Louvre are "Hercules", "Janus and the Earth", "Perseus delivering Andromeda", "Milo of Crotona", "Alexander and Diogenes". At the Consigne, Marseilles, is his "Plague of Milan". Architectural works are the door and balcony of the Hotel de Ville, Toulon; the fish market, Marseilles; he also commenced the Church and Hospice of Charity

in that city, but left it unfinished at his death. LAGRANGE, *Pierre Puget, peintre, sculpteur, architecte* (Paris, 1868); CICOGNARA, *Storia della Scultura* (Venice, 1813); HENRY, *Sur la vie et les œuvres de P. Puget* (Toulon, 1853).

M. L. HANDLEY.

Pugh, GEORGE ELLIS, jurist and statesman, b. at Cincinnati, O., 28 November, 1822; d. there, 19 July, 1876. He was the son of Lot Pugh and Rachel Anthony. Educated at Miami University, Oxford, O., graduating A.M. in 1843, he was admitted to the bar of the Supreme Court of Ohio in 1844, and won high repute as a lawyer in Cincinnati, where he practised. He served in the Mexican War, 29 April, 1847–1 April, 1848, as captain Co. F., 4th Ohio V. I., and as aide-de-camp to General Lane, being commended for bravery at Atlixco, 19 Oct., 1847. He was a member of the Ohio House of Representatives from Hamilton County, 1848–9; city solicitor, Cincinnati, 1850; attorney-general, State of Ohio, 1852–54; and was elected to the United States Senate from Ohio, 3 Dec., 1855–3 March, 1861. He was the first native of Ohio to sit in that body. His principal services were in the committees on public lands and on the Judiciary. Displaying great ability in discussion of the measures arising from the question of slavery and in the organization of the territories of Kansas and Nebraska, he supported Douglass's doctrine of popular sovereignty, and was defeated for re-election to the Senate in 1861 by Chase. He was delegate in 1860 to the Charleston-Baltimore Convention of the Democratic party, acting as chairman of Ohio delegation and supporting the nomination of Douglass. The reply to Yancey on the slavery question was most effective. Yancey blamed the northern delegates for "admitting slavery to be wrong and thus surrendering the very citadel of their argument". Pugh answered: "You mistake us; we will not do so." He defined the position of the northern democrats, setting out that while they were not opposed to the institution of slavery in the states where it existed, they were unalterably opposed to its extension into any free state and any territory without the untrammelled consent of the residents thereof, as ascertained by an appeal to the ballot.

During the Civil War he advocated the exercise of every constitutional power by the Government to preserve the Union. Defeated for Lieutenant-Governor of Ohio in 1863, and for representative to the 29th Congress in the 1st Ohio district in 1864, he was elected a delegate to the constitutional convention of Ohio in 1872, but declined to serve. His most noted

legal argument was the appeal in habeas corpus proceedings on behalf of Vallandigham in 1863. The question involved was the power and duty of the court to free Vallandigham held in confinement under a military order. Pugh urged release on the ground that the civil courts of Ohio and of the United States were open and unimpeded in Ohio and that only through proceedings in them, and not by the exercise of military authority, could Vallandigham, a civilian, be lawfully imprisoned. Soon after his marriage to Therèse Chalfant, 22 Nov., 1855, both he and his wife were converted to the Church.

TAYLOR, *Ohio in Congress: Appleton's Cyc. Amer. Biog.*, s. v.

JOHN G. EWING.

Pugin, AUGUSTUS WELBY NORTHMORE, architect and archaeologist, b. in London, 1 March, 1812; d. at Ramsgate, 14 Sept., 1852; only child of Augustus Charles Pugin (originally de Pugin), a French Protestant of good family, who had fled from France and settled in London about 1798, and soon acquired distinction as a draughtsman in the office of John Nash, and as a teacher of architectural drawing. The young Pugin received his elementary education as a day-boy at Christ's Hospital, better known as the Blue-coat School. At an early age he took his place among his father's pupils, and in 1825 he accompanied a party to Normandy for the study of Gothic architecture. From his father he inherited a surprising delicacy and dexterity in drawing and from his mother, Catherine Welby, some of that force of character and piety which so distinguished him in after years. When fourteen he was entrusted with the responsibility of preparing drawings of Rochester Castle, and the year following, on occasion of his second visit to France, we find him suffering from overwork while sketching in the Cathedral of Notre Dame at Paris. In the same year he was engaged to design furniture for Windsor Castle. In his youth a passion for theatrical accessories took possession of him. He fitted up a model stage with mechanical appliances of all kinds on the upper floor of his father's house in Great Russell St.; he executed the scenery for the new ballet opera of "Kenilworth", which owed its success largely to the architectural effects of his scenery; and subsequently he worked at the rearrangement of the stage machinery of Drury Lane. While still a delicate youth he became intensely fond of the sea, had a smack of his own, did some small trading in carrying wood-carvings from Flanders, and was shipwrecked off Leith in 1830. This love of the sea was strong in him to the end of his life.

In 1831 he married Ann Garnett, and shortly afterwards was imprisoned for non-payment of rent. He then opened a shop in Hart Street, Covent Garden, for the supply of architects' drawings and architectural accessories. The venture, however, did not succeed. His wife died in childbirth 27 May, 1832. In 1833 he married Louisa Burton, who bore him six children, among whom were the two who successively carried on his business, the eldest, Edward (d. 1875) and the

AUGUSTUS WELBY PUGIN
From a portrait by Herbert

youngest, Peter Paul (d. 1904). Both received from the pope the decoration of the Order of St. Sylvester. After his second marriage he took up his residence at Salisbury, and in 1834 embraced the Catholic Faith, his wife following his example in 1839. Of his conversion he tells us that the study of ancient ecclesiastical architecture was the primary cause of the change in his sentiments, by inducing him to pursue a course of study, terminating in complete conversion. He never swerved in his fidelity to the Church, notwithstanding the bitter trials he experienced. He found that he had exchanged the noble English cathedrals with their service of chant for Moorfields chapel with its maimed rites.

In 1835 he bought a small plot of ground at Laverstock, near Salisbury, on which he built for himself a quaint fifteenth-century house, St. Marie's Grange. In 1837 he made the acquaintance of the authorities of St. Mary's College, Oscott, where his fame as a writer had preceded him. He found there men in sympathy with his ideas about art and religion. The president, Rev. Henry Weedall, was so impressed by him, that he accepted his services for the completion of the new chapel and for the decorations of the new college, which was opened in 1838. He designed the apse with its effective groinings, the stained glass of the chancel windows, the decorated ceiling, the stone pulpit, and the splendid Gothic vestments. He constructed the reredos of old wood-carvings brought from the Continent, he placed the Limoges enamels on the front of the super-altar, he provided the seventeenth-century confessional, altar rails, and stalls, the carved pulpit (from St. Gertrude's, Louvain), the finest in England, as well as the ambries and chests of the sacristy (see "The Oscotian", July, 1905). He built both lodges and added the turret called "Pugin's night-cap" to the tower. Above all he inspired superiors and students with an ardent enthusiasm for his ideals in Gothic art, liturgy, and the sacred chant. Tradition points out the room in which on Saturday afternoons he used to instruct the workmen from Hardman's, Birmingham, in the spirit and technic of their craft. The president appointed him professor of ecclesiastical antiquities (1838-44). While at the "Old College" he gave his lectures in what is now the orphans' dining-room, and at the new college in a room which still bears the inscription "Architectura". This association with one of the leading Catholic colleges in England afforded him valuable opportunities for the advancement of his views. During this period he did much of his best work in writing, teaching, and structural design. Although at different times he had visited France and the Netherlands either alone, or in the company of his father or the Earl of Shrewsbury, he did not visit the great cities of Italy until 1847. The ecclesiastical buildings of Rome sorely disappointed him; but he had his compensation in the gift from Pius IX of a splendid gold medal as a token of approval, which gratified Pugin more than any other event in his life. His second wife having died in 1844, he married in 1848 Jane, daughter of Thomas Knill of Typtree Hall, Herefordshire, by whom he had two children. In the meantime he had removed from Laverstock, and after a temporary residence at Cheyne Walk, Chelsea (1841), he took up his residence at Ramsgate, living first with his aunt, Miss Selina Welby, who made him her heir, and then in the house called St. Augustine's Grange, which, together with a church, he had built for himself. Of these he said that they were the only buildings in which his designs had not been curtailed by financial conditions.

Under a presentiment of approaching death, of which he had an unusual fear, he went into retreat in 1851 and prepared himself by prayer and self-denial for the end. At the close of the year his mind became affected and early in 1852 he was placed in the asylum

commonly called Bedlam, in St. George's Fields, Lambeth. At the urgent request of his wife and in opposition to the wishes of the rest of his friends, he was removed from the asylum, first to the Grove, Hammersmith, where after six weeks' care his condition had improved to such an extent that it was possible for him to return to Ramsgate; but two days after he reached home he had a fatal apoplectic seizure.

Pugin was somewhat below the middle stature and rather thick-set, with long dark hair and grey eyes that seemed to take in everything. He usually wore a sailor's jacket, loose pilot trousers, a low-crowned hat, a black silk handkerchief thrown negligently round his neck, and shapeless footwear carelessly tied. His form and attire suggested the seaman rather than a man of art. A voluble talker both at work and at table, he possessed a fund of anecdote and a great power of dramatic presentation; and when in good health overflowed with energy and good humour. And if sometimes his language was vigorous or personal, he was generous and never vindictive. Inured to industry from childhood, as a man he would work from sunrise to midnight with extraordinary ease and rapidity. His short thick hands, his stumpy tapering fingers, with the aid of a short piece of pencil, a pair of compasses and a carpenter's rule, performed their delicate work even under such unfavourable circumstances as sailing in his lugger off the South Coast. Most of his architectural work he entrusted to an enthusiastic builder whom he had known as a working-man at Beverley. He trained the workmen he employed, and was in turn idolized by them. In his home at Ramsgate he lived with the regularity and abstemiousness of a monk, and the intellectual eagerness of a student. His benevolence made him everywhere the father of the poor.

His life was a battle for truth and fitness in architecture. He fought for the Christian inspiration of medievalism as against the cold paganism of the classic style. The victory ultimately fell to his side. The Englishman of to-day can with difficulty realize the condition of bad taste and ignorance which prevailed in matters of art at the commencement of the nineteenth century. "When Welby Pugin began his labours", says Ferrey, "there was not a single building of modern date, either public or private, which was not a reproach and a disgrace to the country." And although not alone, still more than any other man Pugin worked for a restoration. He revealed the principles of the medieval builder and the enlightened skill of their craftsmen. Others have since applied his principles. The occasional exaggeration or narrowness of his views has been corrected or avoided; and it remains true that the restoration of our ancient churches, as well as the varied beauty of many of our new structures, is due to the ability and unconquerable energy of Pugin. He was the man for his time. Gothic art was being studied, and many were turning their thoughts to the Church out of which it had sprung. Still, prejudice had to be broken down and ignorance removed; but the spirit of Pugin triumphed in the end.

BUILDINGS.—The following may be set down as typical and fairly complete: *Cathedrals*:—Birmingham; Northampton (older portion); Nottingham; Southwark; Killarney; Enniscorthy; Salford (designed only). *Parish Churches*:—Diocese of Birmingham: Alton, Brewood, Cheadle, Dudley, Kenilworth, Rugby, Solihull, Stoke-upon-Trent, Uttoxeter. Diocese of Liverpool: in Liverpool, St. Marie's (some years ago removed stone by stone to its present site), St. Oswald's, Bishop-Eton (chapel now forming north aisle), St. Marie's, Southport (now north aisle). Diocese of Northampton: Cambridge (former chapel), Great Marlow; Lynn (former church). Diocese of Nottingham: Derby; Shepshed; Whitwick. Diocese

of Hexham and Newcastle: Newcastle-on-Tyne, Stockton-on-Tees.

To the above may be added churches or chapels at Barnstaple, Blairgowrie (Perthshire), Douai, Fulham, Gorey (Wexford), Guernsey; Kensington (London, Carmelite Church), Manchester (St. Wilfrid's), Parsonstown, Pontefract (Jesus Chapel), Salisbury, Stratford, Tagoat (Wexford), Waterford, Woolwich, a chapel for Sir William Stuart, and the high altar, Farm Street (London). *Convents*:—Alton, Bermondsey, Birmingham, Cheadle, Edge Hill, Gorey, Nottingham, Parsonstown, Stoke-upon-Trent, Tagoat. *Monasteries*:—Downside, Mount St. Bernard's (Leicestershire). *Colleges*:—Mount St. Mary's, Ratchliffe, Ushaw (additions), St. Edmund's, Ware (church), Oscott, (chapel completed), Maynooth (additions), Ushaw (church and refectory). *Domestic Buildings*:—Adare (seat of Lord Dunraven), Alton Castle (rebuilding), Alton Towers (completion), Bilton Grange (near Rugby), Chirk Castle (restoration), Grace-Dieu, Leicestershire (restoration and church), Hornby Castle (near Leeds; plans for rebuilding), Magdalen College, Oxford (gateway), Scarisbrick Castle, Sibthorpe Almshouses, Lincolnshire, Tofts, near Brandon (restoration).

Much discussion has arisen concerning the claims of Pugin to the credit of having designed the Houses of Parliament at Westminster. The old Palace of Westminster had been destroyed by fire in 1834; plans for the new buildings were invited, and those of Charles Barry (afterwards Sir Charles) received the approval of the Commissioners from among some eighty-four competitors. The first stone of the new erection was laid in 1840 and the queen formally opened the two houses in 1852. At the outset Barry called in Pugin (1836–37) to complete his half-drawn plans, and he further entrusted to him the working plans and the entire decoration (1837–52). Pugin's own statement on the subject is decisive: "Barry's great work", he said, "was immeasurably superior to any that I could at the time have produced, and had it been otherwise, the commissioners would have killed me in a twelve-month" (i. e., by their opposition and interference).

LITERARY WORK.—The influence he wielded must be ascribed as much to his vigorous writings and exquisite designs as to any particular edifice which he erected. His "Contrasts" (1836) placed him at once ahead of the pioneers of the day. His "Glossary" (1844), so brilliant a revival in form and colour, produced nothing short of a revolution in church decoration. Scarcely less important were his designs for "Furniture" (1835), for "Iron and Brass Work" (1836), and for "Gold and Silver-Smiths" (1836), to which should be added his "Ancient Timber Houses of the XVth and XVIth Centuries" (1836), and his latest architectural work on "Chancel Screens and Rood Lofts" (1851). Besides the above elaborately illustrated productions, many other explanatory and apologetical writings, especially his lectures delivered at Oscott (see "Catholic Magazine", 1838, April and foll.) gave powerful expression to the message he had to deliver. As closely allied with his idea of the restoration of constructive and decorative art, he brought out a pamphlet on the chant: "An Earnest Appeal for the Revival of the Ancient Plain Song" (1850). It is worthy of mention that some of his earliest drawing appears in the volumes published by his father ("Examples of Gothic Architecture", 1821, 226 plates; "Architectural Antiquities of Normandy", 1828, 80 plates; "Gothic Ornaments, England and France", 1831, 91 plates). In knowledge of medieval architecture and in his insight into its spirit and form, he stood above all his contemporaries. As a draughtsman he was without a rival. The success of his career is to be sought not so much in the buildings he erected, which, being mostly for the Catholic body, were nearly always shorn of their chief splendour by the

poverty of his patrons. He invented no new forms of design, though he freely used the old; his instinct led him not to Art as such, but to the Gothic embodiment of Art, which seemed to him the only true form of Christian architecture. He lacked the patience and breadth of the truly great mind, yet he may justly claim to rank as the architectural genius of the century. His unquestioned merit is the restoration of architecture in England and the revival of the forms of medieval England, which since his day have covered the land. Queen Victoria granted his widow a pension of £100 a year, and a committee of all parties founded the Pugin Travelling Scholarship (controlled by the Royal Institute of British Architects) as the most appropriate memorial of his work and a partial realization of the project which he had brought forward in his "Apology for the Revival of Christian Architecture in England" (1843).

Welby Pugin, and his Father, Augustus Pugin* (London, 1861), with an appendix by PURCELL; PURCELL, review of the above in *Dublin Review* (Feb., 1862); *The Gentleman's Magazine* (Nov., 1852); WISEMAN, *Catholicity in England in Dublin Review* (Feb., 1840); PUGIN, *The Present State of Catholicity in England in Dublin Review* (Feb., 1842); AMHERST, *The Oscotian* (July, 1837), 184–87.

HENRY PARKINSON.

Puiseux, VICTOR-ALEXANDRE, French mathematician and astronomer, b. 16 April, 1820, at Argenteuil (Seine-et-Oise); d. 9 September, 1883, at Frontenay (Jura). He went to school at Pont-à-Mousson (Lorraine). His brother persuaded the family to send the boy to a boarding-school in Paris (1834). In a year's time he entered the Collège Rollin, where he studied mathematics under Sturm. He took the competitive examinations of the Paris lycées and, having won the prizes in mathematics and physics, he was admitted to the Ecole Normale in 1837. Three years later he was appointed associate professor in science and in 1841 received the degree of doctor in mathematical sciences and the appointment to teach at the College of Rennes. In 1845 he was called to the new University of Besançon, where he taught science until 1849. He then returned to Paris as *maître de conférences* at the Ecole Normale. He substituted repeatedly both at the Sorbonne and at the Collège de France, lecturing for Sturm, Le Verrier, and Binet. In 1853 and 1854 he had charge of the examinations for admission to the polytechnic school. From 1855 to 1859 he was assistant astronomer at the Paris observatory, placed at the head of the bureau of calculation by Le Verrier. From 1857 until six months before his death Puiseux was the successor of Cauchy in the chair of celestial mechanics at the Sorbonne. He resigned, but was granted the right to keep his title. He also gave up his appointment as member of the Bureau des Longitudes (1868–1872), on account of failing health.

Puiseux excelled especially in mathematical analysis. In his account of algebraic functions, first published in the "Journal de Liouville" (1851), he introduced new methods, marking an epoch in this subject. His numerous contributions to celestial mechanics have considerably advanced knowledge in this direction. He supervised the new edition of Laplace's works, published under the auspices of the Academy of Sciences, revising all the formulæ and scrupulously verifying all his calculations in celestial mechanics. He performed a great deal of dry and laborious work himself, such as the reduction of the observations on the moon at Paris during the years 1801–29, and the intricate computations and deductions from the observations on the transit of Venus in 1874 and again in 1882. He had also a decided taste for botany and natural sciences in general. He was fond of philosophy and the classics.

While a student at the normal school he took part in the religious discussions of the day, displaying strong convictions and a keen intelligence. He seo-

ended the efforts of his friend and comrade in the school, Pierre Olivant, founding with him a Society of St. Vincent de Paul among the students and devoting a large part of his vacations to works of charity. His kindness, his charity, and above all his simple, unaffected modesty overshadowed even his talents. His election (1871) to the French Academy was unanimous. Bertrand says of it: "The election was due to his merit, but its unanimity, to his character". As a last wish he requested that no discourse should be held over his body. His profound faith helped him to bear with resignation the death of a devoted wife and of four grown children. A great number of his memoranda are to be found in "Journal des Savants", "Journal de Liouville", "Comptes Rendus", "Recueils des savants étrangers", "Annales de l'Observatoire de Paris". He edited "Connaissance des Temps" (Paris) from 1868 to 1872 and from 1864 with Bertrand "Annales scientifiques de l'école normale supérieure".

BERTRAND, *Eloge de V. Puiseux*; TISSERAND, *Notice sur la vie de Puiseux* in *Bulletin des sc. math. et astr.* (Paris, 1884), 2nd series, VIII, pt. i, 227-45.

WILLIAM FOX.

Pulaski, CASIMIR, patriot and soldier, b. at Winia, Poland, 4 March, 1748; d. on the Wasp, in the harbour of Savannah, 11 Oct., 1779; eldest son of Count Joseph Pulaski and Maria Zislinska. His father, a noted jurist, reared him for the bar, and he received

CASIMIR PULASKI
From a portrait by Oleszkiewicz

his military training, as a youth, in the guard of Charles, Duke of Courland. Pulaski was one of those who, under the leadership of his father, formed, 29 Feb., 1768, the confederation of Bar, to free Poland from Russia. Driven into Moldavia he, returning, seized the monastery of Berdichev and for several weeks withstood with slender forces a siege by the Russians. Again finding refuge in Moldavia in 1769

after the arrest and death of his father, Pulaski in a series of brilliant marches overran and raised in revolt the greater part of Poland and Lithuania. Defeated by Suvaroff at Lomazy, near Wladowa, he fled with only ten men into the Carpathian Mountains. There he spent the winter of 1769-70, making forays into Poland, and in August, 1770, seized the fortified monastery of Czenstochowa. He gallantly defended it against a siege in Jan., 1771, and forced the Russians to withdraw. Though he joined his compatriots in driving the Russians across the Vistula, his failure to co-operate with Dumouriez is considered to have caused the loss of the battle of Landskron, where Suvaroff overwhelmingly defeated the patriots. Beaten at Cartenow near Leopold and failing to take Zamose, he returned to Czenstochowa. Though modern historians hold him guiltless, he was convicted of treason and outlawed for complicity in the plot to seize and carry off King Stanislaus, 3 Nov., 1771. This plot led to the open intervention of Prussia and Austria, and Pulaski, after a gallant but futile defence of Czenstochowa, fled in 1772 to Turkey, and later to France.

XII.—36

On 17 Oct., 1776, he offered his services to Franklin, the American agent, landed at Boston in July, 1777, and joined Washington. He rendered signal service, 4 Sept., 1777, at Brandywine Creek; he was commissioned 15 Sept., 1777, by the Continental Congress commander of the horse with rank of brigadier. He saved the army from surprise at Warren Tavern, and took part, 4 Oct., 1777, in the battle of Germantown. He was prominent in the Jersey campaign during the winter, but resigned his command, 28 March, 1778, to organize an independent corps known as Pulaski's Legion. The banner of the legion was purchased by him from the Moravians at Bethlehem and not presented to him, as represented by Longfellow in his "Hymn of the Moravian Nuns". Ordered to Little Egg Harbor, New Jersey, the legion on 15 Oct., 1778, suffered severe loss through a night attack, which he repulsed. Dissatisfied with his assignments, he was only dissuaded by Washington from resignation. He entered Charleston, 8 May, 1779; he gallantly attacked the investing British on 11 May. Against the inclination of the authorities he held the city until it was relieved on 13 May. He rendered great services during the siege of Savannah, Georgia, and in the assault on the city, 9 Oct., he commanded both the American and French cavalry. He was wounded by a shot in the upper part of the thigh, and was taken on board the brig Wasp. He died as the vessel was leaving the river and was buried at sea off St. Helena's Island, South Carolina. It has been mistakenly held by some that his remains lie under the monument erected to his memory at Savannah. On 11 May, 1910, there was unveiled at Washington a monument to his memory, erected by order of Congress.

JOHN G. EWING.

Pulati, DIOCESE OF (PULATENSIS or POLATINENSIS). The ancient Pulati in Albania no longer exists; its name is borne by a district of European Turkey. The first Bishop of Pulati (877) was a suffragan of Dioclea, after the overthrow of which the bishops of Pulati were suffragans of Salonica (Thessalonica). During the tenth century and even later Pulati is not mentioned. From 1340 to 1520 there were two Dioceses of Pulati, Polata major and Polata minor; the bishops of the latter were known as *Episcopi Ssobrienses* from the Franciscan hospice in the village of Sosi. Owing to the Turks and the decay of its population, after the death of Vincenzo Giovanelli appointed in 1656, the bishops no longer resided at Pulati. After 1667 its bishops were vicars Apostolic for Pulati. The Franciscan, Peter Karagić, was nominated Bishop of Pulati in 1697 and Apostolic administrator of the Archdiocese of Scopia in Albania. Since 1867 Pulati is suffragan of Scutari. The present (forty-first) Bishop of Pulati is Nicholas Marconi, O.F.M., b. at Trent, Tyrol, 18 May, 1842, elected bishop 23 December, 1890. He resides at Giovagni. His coadjutor, with right of succession, is Bernardinus Selaku, O.F.M., b. at Scutari, 23 June, 1873; nominated bishop in January, 1910. The Diocese of Pulati comprises 13 parishes, all, except one, held by Franciscans. There are 14,644 Catholics; 9 secular priests; 14 churches or chapels.

Missiones Catholicae (Rome, 1907); MARKOVIĆ, *Dukljansko-barska Metropolitija* (Zagreb, 1902), 41; MIHACEVIĆ, *Iz albanijske*, XXIII (Serof. Perivoj, 1909), 126-9.

ANTHONY LAWRENCE GANCEVIĆ.

Pulcheria, SAINT, Empress of the Eastern Roman Empire, eldest daughter of the Emperor Arcadius, b. 19 Jan., 399; d. in 453. After the death of Arcadius (408), her younger brother, Theodosius II, then only seven, became emperor under the guardianship of

Anthimus. Pulcheria had matured early and had great administrative ability; she soon exerted salutary influence over the young and not very capable emperor. On 4 July, 414, she was proclaimed Augusta (empress) by the Senate, and made regent for her brother. She made a vow of virginity and persuaded her sisters to do the same, the imperial palace thus becoming almost a monastery (Socrates, "Hist. eccl.", VII, xxii). At the same time she fulfilled all her duties as a ruler for about ten years jointly with her brother. After the marriage, brought about by Pulcheria, of Theodosius II with Eudoxia, the new empress sought to weaken Pulcheria's influence over the emperor, and, with the aid of some courtiers, succeeded for a time. Nevertheless, Pulcheria had always a powerful position at Court, which she used in behalf of ecclesiastical orthodoxy, as shown by her opposition to the doctrines of Nestorius and Eutyches. Eudoxia supported Nestorius. St. Cyril of Alexandria sent Pulcheria his work "De fide ad Pulcheriam", and wrote her on behalf of the true Church doctrine, to which she held unwaveringly (letter of Cyril in Mansi, "Concil. coll.", IV, 618 sqq.). He also wrote to Eudoxia (ibid., 679 sq.). Theodosius allowed himself to be influenced by Nestorius to the prejudice of Cyril, whom he blamed for appealing to the two empresses (ibid., 1110). Pulcheria, however, was not deterred from her determination to work against Nestorius and to persuade the emperor to espouse Cyril's party which favoured the definition of the Council of Ephesus. In the further course of the negotiations over the Council of Ephesus, the Patriarch of Alexandria sought to gain Pulcheria's zeal and influence for the union and sent her presents as he did to other influential persons at the Court (Mansi, loc. cit., V, 987 sq.). There is no doubt that the final acknowledgement by the emperor of the condemnation of Nestorius was largely due to Pulcheria. The Nestorians, consequently, spread gross calumnies about her (Suidas, s.v. Pulcheria). Court intrigues obliged her (446) to leave the imperial palace and retire to a suburb of Constantinople, where she led a monastic life. When the Empress Eudoxia went to Jerusalem, Pulcheria returned (about 449) to Court. At the emperor's death (28 July, 450) she was proclaimed empress, and then married the able general, Marcian, but with the condition that her vow of virginity should be respected. At her order Marcian was proclaimed Augustus.

Meantime, at Constantinople, Eutyches had announced his heresy of the unity of the natures in Christ, and the Patriarch Flavian had expressed his opposition, as did also Pope Leo I. Once more Pulcheria took up the cause of the Church. On 13 June, 449, the pope had written both to Pulcheria and to Theodosius, requesting them to end the new heresy ("Leonis epist.", xxx, in Migne, LVI, 785 sq.). Nine other letters followed. Theodosius II confirmed the decisions of the Robber Synod of Ephesus (449) and the pope, who had rejected them, sought to bring the emperor back to orthodox opinions. On 13 Oct., 449, he wrote again to the emperor and also to Pulcheria (Epist. xlv), begging the latter for aid. The Roman Archdeacon Hilarius also wrote with the same object (Epist. xlvi in "Leonis Epist."), and at Leo's entreaty Valentinian III of the Western Empire, with Eudoxia and Galla Placidia, wrote to Theodosius and Pulcheria (Epist. lviii). Another letter to Pulcheria was sent by Leo on 16 July, 450 (Epist. lxx). After the death of Theodosius, conditions were at once changed. Marcian and Pulcheria wrote to Leo (Epist. lxxvii). She informed him that the Patriarch Anatolius had expressed his approbation and had signed the papal letter to Flavian concerning the two natures in Christ. She requested the pope to let it be known whether he would attend personally the council that had been summoned. The empress was influential in the Council of Chalcedon (451) and with the em-

peror attended the sixth session (25 Oct., 451). Leo in his letter of 13 April, 451 (Epist. lxxix), wrote Pulcheria that both the Nestorian and Eutychian heresies had been overcome largely by her efforts. He thanked her for the benefits she had bestowed on the Church, for her support of the papal legates, for the recall of the banished Catholic bishops, and for the honourable burial of the body of the Patriarch Flavian. Pulcheria showed no less zeal in promoting other interests of the Church. She built three churches in Constantinople in honour of Mary the Mother of God; one, erected after the condemnation of the Nestorian heresy, was exceedingly beautiful. In other places also she built churches, hospitals, houses for pilgrims, and gave rich gifts to various churches (Sozomen, "Hist. eccl.", IX, i). She had the bones of St. John Chrysostom, who had died in exile, brought back to Constantinople and buried in the church of the Apostles on 27 Jan., 438; this led to the reconciliation with the Church of the schismatic party of the Johannines (Socrates, "Hist. eccl.", VII, xlv). Pulcheria had the relics of the forty martyrs of Sebaste, which were found near Constantinople, transferred to a church (Sozomen, "Hist. eccl.", IX, ii). She is venerated as a saint in the Greek and other Oriental Churches as well as in the Latin Church. Her feast is given under 10 Sept. in the Roman Martyrology and in the Greek Menaia; in the other Oriental calendars it is under 7 Aug.

J. P. KIRSCH.

Pulci, LUIGI, Italian poet, b. at Florence, 15 Aug., 1432; d. at Padua in 1484. The Pulci gave many interesting writers to the history of Italian letters in the earlier period of the Renaissance. Luigi's brothers, Luca and Bernardo, as well as the latter's wife, also poetized. Luigi frequented the household of Lorenzo il Magnifico, who was very fond of him, and helped him in a material way, a debt which he repaid by imitating certain verses of his patron and fellow-poet. Some attempt has been made to convict him of heterodoxy, because of rather free passages in his most famous work. Those who have engaged in this attempt have failed to realize that Pulci was an inveterate joker and that the passages in question figure among the least serious of the poem. He had all the burlesquing and parodying instincts of his time, and spared no man or institution when the whim was on him. His chief title to fame is the chivalrous romantic poem, "Morgante", which on the basis of two antecedent Italian documents gives the history of Roland's peripatetic adventures, and marks a first serious attempt at an artistic treatment of the Carolingian epic matter imported from France. Dealing ostensibly with the adventures of a giant, Morgante, the author is far more concerned with the wandering career of Orlando, Rinaldo, and other legendary heroes of Charlemagne's court. The lesser compositions of Pulci are greatly inferior to "Morgante". They include the "Beca da Dicomano", which is a burlesque treatment of the idyll in verse, and follows the example set by Lorenzo's "Nencia da Barberino"; the octaves on the "Giostra" of Lorenzo; a number of briefer lyrics (*strambotti, rispetti, sonetti*); a prose tale; and a "Confessione" in terza-rima, which has too much the air of a parody of parts of Scripture.

Opere (Lucca, 1759); *Morgante*, ed. VOLPI (Florence, 1900), a truly scholarly ed. is still needed; RAJNA in *Propugnatore* (1869 and 1871); articles in *Giornale storico*, XVI, XVII; Rossi, *Il Quattrocento*.

Pullen (POLENIUS, PULLAN, PULLEIN, PULLENUS, PULLY, LA POULE), ROBERT, d. 1147 (?). Nothing is known of his early life except that he was of English parentage. The conjecture of a recent biographer (Williams, *op. cit. infra*) that he was born at Poole in Dorsetshire is not supported by any evidence. Other accounts state that he came from Devonshire. John of Hexham, in his continuation of the history of Symeon of Durham, written within half a century of Pullen's death, asserts that Henry I offered him a bishopric which he refused, being devoted to the study of philosophy. His early education was received in England, but during the troubles which began with the accession of King Stephen in 1135 he seems to have gone to Paris to continue his life of study in peace there. According to other accounts, he completed his education at Paris, where he subsequently lectured before returning to Oxford to teach. At Oxford he was one of the first masters whose names have been recorded. He opened schools there and taught without exacting fees; he is said to have supported many scholars at his own expense and to have been largely instrumental in fostering the growth of the Oxford schools. If these traditions are true, and it must be confessed that they rest on the statements of later writers, it would seem more probable that they happened during the reign of Henry I, when he refused to accept the bishopric offered. He was certainly Archdeacon of Rochester in 1134, and it is equally certain that he was absent from England for a notable time within the next few years, for at some date prior to 1143 he seems to have been in trouble with his bishop for being absent so long from his duties. This appears from an undated letter of St. Bernard addressed to the Bishop of Rochester, in which the saint makes his excuses for detaining Pullen in Paris "on account of the sound doctrine which is recognized in him". In the same letter he blames the bishop for seizing the archdeacon's goods, and he begs that Pullen may stay longer in Paris where he is necessary. Though Bishop Stubbs (*op. cit.*) has thrown doubt on the identity of this Archdeacon Robert Pullen with the cardinal of the same name, the statements of St. Bernard's biographer, William Abbot of Theodoric, and the Oseney Chronicle justify the identification.

While in Paris, Pullen taught logic and theology with great success. Among his pupils was John of Salisbury, who describes him as a man commended both by his life and his learning. That was in 1141 or 1142. In 1143 he is still described as Archdeacon of Rochester and in or about that year he probably went to Rome on the invitation of Innocent II, who died in September of that year, but Pullen found favour with the new pope, Celestine II, who created him a cardinal (Ciaconius). The Oseney chronicler, however, states that he was called to Rome by Lucius II who succeeded Celestine in 1144. Certainly it was Pope Lucius who appointed him Chancellor of the Holy Roman Church, an office which he was discharging through 1145 and 1146. When St. Bernard's disciple, Eugenius III, became pope in 1145 the saint wrote a letter to Cardinal Pullen begging him to console and counsel the new pontiff. As a theologian Cardinal Pullen used all his influence against the heretical teaching of Abelard, and embodied his doctrine in his work "Sententiarum Logicarum Libri VIII" reprinted in P. L., with the commentary prefixed to it by the Maurist, Dom Hugo Mathoud, originally written for his edition, published at Paris in 1655. In this treatise he was breaking new ground, being one of the first teachers to compile a book of "Sentences", but his work was soon supplanted by that of Peter Lombard. He covers a wide range of subjects, but his treatment lacks orderly arrangement, and he relies for his proofs on Scripture and reason in preference to the testimony

of tradition. Taking his stand on the authority of the Bible and of papal decisions, he proceeds to enter on speculative discussion. The first book treats of God and His attributes; the second, of the creation, of angels, of the soul, of the fall of man and of original sin; the third, of the ancient and the new law, and of the Incarnation; the fourth, of God's power, of Christ's Passion, and of hell and purgatory; the fifth, of the Resurrection, the descent of the Holy Ghost, the preaching of the Gospel, of baptism, confirmation, confession, and some virtues and vices. The sixth book deals with a variety of subjects, including ignorance, negligence, and frailty, good and bad spirits, the choirs of angels, merits, and the administration of the Sacrament of Penance; the seventh discusses the forgiveness of sins, penance and fasting, prayer, tithes, the civil power, the priesthood, its privileges and obligations, continency, the contemplative and active life, and matrimony. The eighth book deals with the Blessed Sacrament, the Second Advent, Antichrist, the Last Judgment and the ultimate state of the saved and the lost. The titles of some other works which remain unpublished are given by Pitts: "In Apocalypsim Sancti Johannis"; "Super aliquot psalmos"; "De contemptu mundi"; "Super doctorum dictis"; "Prælectiones"; "Sermones". A MS. copy of the sermons is preserved at Lambeth Palace, and Rashdall (*Dict. of Nat. Biog.*) observes of them that "the sermons, which breathe a very ascetic spirit, were evidently delivered to scholars". Chevalier is certainly in error in identifying him with the Cardinal Robert who was cardinal priest of St. Eusebius in December, 1134. This Robert, who also held the office of Chancellor of the Holy Roman Church, was created cardinal by Innocent II in 1130, a date inconsistent with the known facts of Pullen's life.

EDWIN BURTON.

Pulpit (Lat. *pulpitum*, a stage or scaffold), an elevated stand to preach on. To elucidate the meaning of the word Durandus refers (*Ration. div. offic.*, I) to Solomon (II Par., vi, 13), who prayed from "a brazen scaffold", and to Esdras (II Esd., viii, 4), who "stood upon a step of wood" and read the law of God. Their elevated position and public action suggest to Durandus the symbolical meaning of the pulpit: the position of the perfect. He also calls it *analogium* (*ἁναλογεῖον-ἀναγνωστήριον*), from the preaching of the word of God; and *ambo ab ambiendo, quia intrantem ambit et cingit*. The ambo (q. v.) was the immediate predecessor of the present pulpit. In the first Christian era the bishop preached from his *cathedra*; a survival of this is retained in the French and German words for pulpit, *chaire* and *predigtstuhl*. The other German word *kanzel* recalls the position of the ambo at the choir-screen (*cancelli*). Durandus clearly distinguishes the pulpit from the *cancelli* and *stalli* of the choir. The pulpit, characterized as part of the church furniture by its independent position and use, is found separated from the choir and pushed forward in the central part of the nave beyond the choir for singers, as indicated by a large circle in the building plan of St. Gall (820). The analogia, or reading desks for the Epistle and Gospel, remained at the sides of the choir, and were used for the same purpose as the ambo, which, as belonging to the choir, was considered a part of the *cancelli* and was chiefly used for reading or singing parts of the liturgy.

Just when it became customary to use the ambo mainly for the sermon, which gave it a new impor-

tance and affected its position, is not known. The pulpit is often connected with the appearance of the mendicant friars, but this can refer only to some innovations in its use and some external changes, ■ the Fathers of the Church had long before this constantly used the ambo for preaching. Although Paul of Samosata (Euseb., VII, xxx) spoke to the people from ■ high canopied seat in the apse, Socrates (Hist. eccl., VI, v) says of St. Chrysostom that he preached "sitting on the ambo". Sozomen (Hist. eccl., IX, ii) states the same, still characterizing the ambo as βήμα τῶν ἀναγνώστων. Chrysostom was the first to speak from the ambo "in order to be better understood"; Isidore of Seville first employed the word pulpit (Etym., XVI, iv), then "tribunal", because from this the priest gave the "precepts for the conduct of life", proclaiming law and justice. Isidore also derives "a nalogium" from λόγος, as "the addresses were given" from it. Thus the ambo became the regular place for the preacher, and its situation was dependent on local conditions. In the Church of St. Sophia it stood under the dome (Paul the Silentiary, P. G.,

PULPIT IN THE CHURCH OF S. ANDREA,
PISTOIA—GIOVANNI PISANO

LXXXVI, 2259 sqq.), but was united with the choir "like an island with the mainland". Similarly at Ravenna the ambo of Bishop Agnellus (sixth century) stood in the central aisle of the nave, on the inner side of the old chancel screen. In large churches, therefore, the bishops, e. g. Ambrose, Augustine, and Paulinus of Nola, preached from the ambo at a very early date. The desire to be more plainly understood was the reason why the preacher's platform was pushed towards the centre of the nave; which change led to its assuming the present form. It was not until modern times that the two terms attained clearly distinct meanings. At present the pulpit no longer serves for the reading of the Epistles and Gospels, nor as the tribune for singing, hence the eagle or dove formerly used as support of the book now has little meaning. A position in which the preacher could be heard throughout the church became necessary, and the pulpit was then adapted to receive a greater amount of adornment, having reference to the preaching of the Gospel.

The number of ambos still in existence which may be included among pulpits is undetermined. The ambo of Salonica, traditionally called "Paul's pulpit", appears to be the oldest remaining monument of this kind (fourth to sixth century). It is circular in form, about four metres in circumference, with two stairways, for ascending and descending, and is ornamented with carvings of the three Magi set in niches representing a shell; two ornamental bands are carried around above the niches ("Archives des missions scientifiques", III, 1876). Bishop Agnellus, builder of the ambo of the cathedral at Ravenna (sixth century), called it *pyrgus*, or tower-like structure. The exterior surface of the round middle part and the steps which come far forward on the sides have panels arranged like ■ chess-board in six parallel bands filled with symbolic animals: fish, ducks, doves, deer, pea-

cocks, and lambs in regular succession. Owing to the aversion of Byzantine art of that period to delineating the human figure, animals are here presented in symbolical dependence on the words: "Preach the Gospel to every creature". The ambo of St. Sophia was adorned with flowers and trees. The beautiful pulpit in the cathedral at Aachen was, according to the inscription, a present from Emperor Henry II (d. 1024). The ground-plan consists of three unequal segments of a circle. The wooden core is covered with sheets of copper overlaid with gold. Of the fifteen flat surfaces formed by slightly sunken panels, six contain ivory carvings belonging to an earlier period, and the others, precious stones, cups of rock-crystal, and enamels. There is no explanation as to what this was intended to represent: with large generosity the emperor had given whatever he had that was costly for the house of God. St. Bernard preached from this pulpit, and also from the pulpit preserved in the cathedral of Reims. In that era there were many wooden pulpits which were movable wherever occasion required.

In many places the pulpit was made a part of the rood-loft, which was a gallery or loft of wood or stone, existing as early as the eleventh century and used, instead of the *cancelli*, to separate the choir from the nave; it was called the *lectorium*, or *odeum*, as the loft where the singers were, and *doxale* from the singing of the doxologies. Statues of the Saviour and His Apostles, representing the Last Judgment and the Passion, frequently ornamented the rood-loft on the side towards the nave. At Wechselburg in Saxony a Romanesque pulpit from the beginning of the thirteenth century is still in existence; it probably belonged, together with the celebrated altar cross, to the partially preserved rood-loft, which, with a few others of that period, is still to be found. It is ornamented with well-executed reliefs, and rests on arcades and columns. In the central oval panel, or mandorla, there is a relief of Christ as teacher, surrounded by the symbols of the Evangelists; on either side are Mary and John trampling upon allegorical symbols of error. The other reliefs, viz., the sacrifices of Abel and Abraham and the Brazen Serpent, were chosen with reference to the cross and altar in the rood-loft, redemption by Christ's sacrificial death being a main topic of preaching. From the thirteenth century, rood-lofts were customary in France where they were called *jubé* from the formula, *Jube Domine benedicere*. Those still in existence belong to the Renaissance period. Pulpits like those of the present time were built in Italy as early as the thirteenth century. The pulpit at Pisa, completed by Niccola Pisano in 1260, is an unattached structure resting on seven columns, which opened the way to a new development for Italian sculpture. In addition to what is palpably borrowed from antiquity, e. g. the Virgin as Juno, there are figures taken entirely from the life of the time. Instead of the mosaic, six bas-reliefs surround the breastwork: the Annunciation, Nativity, Adoration of the Magi, Presentation in the Temple, Crucifixion, and the Last Judgment; they present the main contents of the doctrine of salvation. Between the trefoiled arches of the columns over the capitals, in the spandrels, are symbolical representations of the virtues and figures of the prophets. An allegorical meaning should also be attributed to the lion, griffin, and dog, which, together with three figures of men, ornament the seventh or middle column, and to the lions that carry three of the supports, or stand guard on the steps. The ornamentation of the cathedral pulpit of Siena was executed by the same master in a similar manner. It forms, however, an octagon, thus permitting two more large reliefs which represent the slaughter of the children at Bethlehem and further details of the Last Judgment. A third work of the same character, containing figures

that express feeling and motion, is the pulpit of the Church of San Andrea at Pistoia, which was completed by Niccola's son Giovanni in 1301.

The first examples of Renaissance pulpits are those of Donatello (fifteenth century). For funeral orations in the churchyard, for the preaching of pilgrimages, or for the exhibition of relics, pulpits were often built outside of the churches, as that of the cathedral at Prato. Donatello inserted here into the original round form of the pulpit seven white marble panels, on which in his customary manner he represented in bas-relief little cherubs in an animated dance; the ornamentation of the bronze capital below the pulpit, which rests on a single support, is also purely decorative in character. At an earlier era the platform of the pulpit was supported by an under-structure or by a number of columns, and during the Renaissance pulpits projected from a pillar or wall, like balconies. Both bronze pulpits in San Lorenzo at Florence rest on four Ionic columns, and are dec-

PULPIT IN THE CATHEDRAL OF LUCCA—MATTEO CIVITALE

orated with representations of the Passion, over which there is a frieze of cherubs borrowed from the art of antiquity. In the beautiful marble pulpit of Santa Croce at Florence, the panels of the breast-work are decorated with scenes from the life of St. Francis. The details of the work are executed with fine artistic feeling and proportion; the decorative statuettes and other accessories are dignified and graceful. The magnificent pulpit made by Master Pilgram for the Cathedral of St. Stephen at Vienna (sixteenth century) is decorated with busts of the Fathers of the Church and figures of other saints. The ornate decoration of the pulpit of the collegiate church at Aschaffenburg depicts the Church Fathers around the supporting pillar, busts of the same in the upper frieze, scenes from the Bible separated by spirited figures of the Evangelists, and angels in the place of consoles. In the Cathedral at Trier the ascent to the pulpit is covered by a magnificently ornamented archway with a high decoration at the top. On the string-piece of the steps are carved the Sermon on the Mount and the Last Judgment, and on the panels of the parapet the works of mercy are depicted. The pulpit of Freiberg in Saxony is fantastically developed from the root of a plant and on it in a naturalistic manner the figures of men and animals are formed.

The most striking pulpits of the Baroque period are those of Belgium. The base, stairway, and sounding-board were artistically or fantastically covered according to the taste of the time with luxurious and ornate carving. In Ste Gudule's at Brussels the banishment of Adam and Eve from Paradise is carved underneath the pulpit, while, in contrast, the Mother of God is represented above the sounding-board as a mighty female warrior and slayer of the

dragon. Underneath the pulpit of the cathedral of Mechlin there is a representation of the Crucifixion on Calvary with the people at Christ's feet, while below the rock Saul falls from his horse, overcome by the truth; above at the side are carvings of Adam and Eve with the Serpent. All these are rich in suggestions for the sermon. At the base of the pulpit of the Church of St. Andrew at Antwerp there is a splendid carving of Christ and the Apostles Peter and John in a little boat. Over the sounding-board angels hold on high the St. Andrew's cross, and beneath the dove, representing the Holy Spirit, sends rays in all directions. The whole structure of a pulpit in Cracow represents a ship, with sails, mast, and rigging, poised over sea monsters. The ornamentation of the pulpit should never be excessive, but subordinate to that of the high altar, whose view it should not obstruct. The latter difficulty is often removed by setting the pulpit slightly towards the side aisle, whereby a troublesome echo from the transept is avoided. Near which pillar of the nave the pulpit should be placed depends upon the acoustics of the church. The sounding-board should, above all, make the voice of the preacher perfectly distinct; by giving it the form of a shell the waves of sound are often sent in a definite direction. In order that the speaker may be readily understood, the pulpit should not stand too high. Its ornamentation should be appropriate: representations of the Evangelists or Church Fathers, scenes from the Bible, as the Sermon on the Mount, the dove as a symbol of the Holy Ghost on the under side of the sounding-board, and perhaps an angel over it. A simple pillar skillfully developed into the platform of the pulpit is satisfactory, when its decoration and that of the stairway and string-piece is subordinate to that of the central main part. The lack of a vertical support makes an unpleasant impression; a reading-desk or crucifix is apt to produce an overloaded effect. A well-arranged pulpit-cloth varied in colour to suit the various feasts and periods of the year would be proper.

OTTE, *Kunstarchäologie* (Leipzig, 1883-4); LÜBKE, *Plastik* (Leipzig, 1871); MARTIGNY, *Dictionnaire des antiquités chrétiennes* (Paris, 1877), 159-62, s. v. *Chaire*; ALLARD, *Rome souterraine* (Paris, 1874), 536-50; see also bibliography under AMBO. The pulpits for several hundred years past are described in the larger histories of art.

Punishment, CAPITAL, the infliction by due legal process of the penalty of death as a punishment for crime. The Latins use the word *capitalis* (from *caput*, head) to describe that which related to life, that by which life is endangered. They used the neuter form of this adjective, i. e., *capitale* substantively to denote death, actual or civil, and banishment imposed by public authority in consequence of crime. The idea of capital punishment is of great antiquity and formed a part of the primal concepts of the human race. When Cain committed fratricide (Gen., iv), and was rebuked therefor by God, he uttered the lament that his life would be in danger by reason of the hostility of others. A mark was set upon him by the Lord which was a guarantee of his personal safety. The first Divine pronouncement which seems to sanction the death penalty is found in Gen., ix, 6: "Whosoever shall shed man's blood, his blood shall be shed; for man was made to the image of God." When the ancient Israelites had departed from Egypt and were sojourning in the Sinaitic Peninsula, they received from the Lord a code of legislation wherein the death penalty was prescribed for many offences. Thus, in Ex., xxi, that penalty is prescribed for murder, for a wilful assault upon the father or mother of an offender, for cursing a man's father or mother, and for man-stealing. Down to their latest days the Kingdoms of

Israel and Juda preserved capital punishment as a feature of their criminal code.

No more cruel form of punishment for offences deemed capital existed in ancient times than that which prevailed among the Jews, i. e. stoning to death. This form of capital punishment is repeatedly mentioned in the Old and New Testaments. It would appear from the Book of Esther that hanging was the punishment which prevailed among the Assyrians. Two of the king's slaves who plotted against his life were thus punished (Esther, ii), and by that method the king's prime minister, Aman, was executed, the gibbet used for that purpose being said in Esther, vii, to be the same one which Aman had prepared, "fifty cubits high" (ibid., v), with the design of hanging thereon Mardochai, the Jew, who had incurred his displeasure, but who was "precious in the sight of the Lord".

The ancient Greeks punished homicide (*phonos*), committed by design, and many other offences with death. The court which prescribed this penalty was the Court of the Areopagus. The court was not invested with discretionary power in awarding punishment, since Demosthenes says that the law determined this according to the nature of the crime. Wilful murder was punished with death, and other degrees of homicide and malicious wounding were punished with banishment and confiscation of goods. Those who were convicted upon a charge of unintentional homicide, not perfectly excusable, were condemned to leave the country for a year. Treason (*prodosia*) was punished with death. The goods of traitors who suffered death were confiscated, and their houses razed to the ground. It was not permitted to bury their bodies in the country, but they were cast out into some desolate place. Hence, the bones of Themistocles, who had been condemned for treason, were brought over and buried secretly by his friends, as related by Thucydides. The posterity of a traitor received the treatment of outlaws. The Areopagus was the tribunal for the trial of cases wherein the charge against an individual was wilful murder and wounding, or a charge of arson or poisoning. The Attic legend tells us that the first notable trial before the Areopagus was that of Orestes upon a charge of having murdered his mother. Æschylus represents this trial as the origin of the court itself. Some authorities claim that the Ephetai acted as a court for the trial of murder in conjunction with that of Areopagus. The Ephetai certainly had jurisdiction over cases involving the lesser degrees of homicide.

The punishment of death at Athens was generally by poison in the case of freemen. After sentence, the condemned murderer was directed to take a cup of hemlock or other poison and drink it. In the case of the imposition of any penalty upon a criminal in the courts of Athens, the prosecutor proposed the penalty in the first instance and then the person condemned had the privilege of suggesting a different punishment. Thus it was that Socrates, when his death was proposed, after trial and conviction, suggested that instead of being punished by death he ought to be entertained at public expense for the rest of his life in the Prytaneum, the palatial quarters used by the Athenians for extending and providing municipal hospitality. Criminals of low social grade, such as slaves, were beaten to death with cudgels.

The Roman law was notably severe in regard to public offences. A law of the Twelve Tables contained some provision as to homicide (Plin., "H. N.", xviii, 3), but this is all that we know. It is generally assumed that the law of Numa Pompilius, quoted by Festus (s. v. *Parrii Quæstores*), "*Si quis hominem liberum dolo sciens morti duit paricida esto*" [If any one with guile, and knowingly, inflicts death upon a freeman, let him be (considered as) a parricide], was incorporated into the Twelve Tables,

and is the law of homicide to which Pliny refers; but this cannot be proved. It is generally supposed that the laws of the Twelve Tables contained provisions against incantations (*malum carmen*) and poisoning, both of which offences were also included under *parricidium* (parricide). The murderer of a parent was sewed up in a sack (*culeus* or *culleus*) and thrown into a river. It was under the provisions of some old law that the Senate by a *consultum* (decree) ordered the consuls P. Scipio and D. Brutus (138 B. C.) to inquire into the murder in the Silva Scantia. The *Lex Cornelia de sicariis et veneficiis* (concerning assassins and sorcerers) was passed in the time of Sulla (82 B. C.) and derives its distinctive name from his middle name, Cornelius. This law contained provisions as to death or fire caused by *dolus malus* (evil fraud) and against persons going about armed with the intention of killing or thieving. The law not only provided for cases of poisoning, but contained provisions against those who made, sold, bought, possessed, or gave poison for the purpose of poisoning; also against a magistrate or senator who conspired in order that a person might be condemned in a *judicium publicum* (public judgment), etc. To the provisions of this law was subsequently added a *senatus consultum* (decree of the senate) against *mala sacrificia* (evil sacrifices) otherwise called *impia sacrificia* (impious sacrifices), the agents in which were brought within the provision of this *lex*. The punishment inflicted by the law was the *interdictio aquæ et ignis* (prohibition of the use of water and fire), according to some modern writers. Marcianus (Dig. 49, tit. 8, s. 8) says that the punishment was *deportatio in insulam et bonorum ademtio*, that is, banishment to an island and deprivation of personal property. These statements are reconcilable when we consider that deportation under the emperors took the place of *interdictio*, and the expression in the "Digest" was suited to the times of the writers or the compilers. Besides, it appears that the *lex* was modified by various senatorial decrees and imperial rescripts.

The *Lex Pompeia de parricidiis*, passed in the time of Cn. Pompeius, extended the crime of parricide to the killing (*dolo malo*, i. e., by evil fraud) of a brother, sister, uncle, aunt, and many other relations enumerated by Marcianus (Dig. 49, tit. 9, s. 1); this enumeration also comprises step-father (*vitricus*), step-mother (*noverca*), step-son (*privignus*), step-daughter (*privigna*), a male or female patron (*patronus, patrona*), an *avus* (grandfather) who killed a *nepos* (grandson), and a mother who killed a *filius* (son) or *filia* (daughter); but it did not extend to a father. All privies to the crime were also punished by the law, and attempts at the crime also came within its provisions. The punishment was the same as that affixed by the *lex Cornelia de sicariis* (Dig., 1 c.), by which must be meant the same punishment that the *lex Cornelia* affixed to crimes of the same kind. He who killed a father or mother, grandfather or grandmother, was punished, *more majorum* (according to the custom of the fathers) by being whipped till he bled, sewn up in a sack with a dog, cock, viper, and ape, and thrown into the sea, if the sea was at hand, and if not, by a constitution of Hadrian, he was exposed to wild beasts, or, in the time of Paulus, to be burnt. The ape would appear to be a late addition. Only the murderer of a father, mother, grandfather, grandmother was punished in this manner (Modest. Dig. 49, tit. 9, s. 9); other parricides were simply put to death. From this it is clear that the *lex Cornelia* contained a provision against parricide, if we are rightly informed as to the provisions thereof, unless there was a separate *lex Cornelia* relating to the specific crime of parricide. As already observed, the provisions of these two laws were modified in various ways under the emperors.

It appears from the law of Numa, quoted by Festus (s. v. *Parrici Quæstores*), that a *parricida* was any one who killed another *dolo malo*. Cicero (pro Rose. Am., c. xxv) appears to use the word in its limited sense, as he speaks of the punishment of the *culleus*. In this limited sense there seems no impropriety in Catiline being called *parricida*, with reference to his country; and the dictator Cæsar's death might be called a *parricidium* (the crime of parricide), considering the circumstances under which the name was given (Suet., Cæs., c. lxxxviii). If the original meaning of *parricida* be what Festus says, it may be doubted whether the etymology of the word (*pater* and *cædo*) is correct; for it appears that *paricida* or *parricida* meant murderer generally, and afterwards the murderer of certain persons in a near relationship. If the word was originally *patricida*, the law intended to make all malicious killing as great an offence as parricide, though it would appear that parricide, properly so called, was, from the time of the Twelve Tables at least, specially punished with the *culleus*, and other murders were not.

Carnifex (flesh-maker) was the appellation given to the public executioner at Rome, who put slaves and foreigners to death (Plaut., "Bacch.", iv, 4, 37; "Capt.", v, 4, 22), but not citizens, who were punished in a manner different from slaves. It was also his business to administer the torture. This office was considered so disgraceful that he was not allowed to reside within the city (Cic., "Pro. Rabir.", 5), but lived without the Porta Metia, or Esquilina (Plaut., "Pseud.", i, 3, 98), near the place destined for the punishment of slaves (Plaut., "Cas.", ii, 6, 2; Tacit., "Ann.", xv, 60; Hor., "Epod.", v, 99) called *Sesterium* under the emperors (Plaut., "Galb.", 20). It is thought by some writers, from a passage in Plautus (Rud., iii, 6, 19), that the *carnifex* was anciently keeper of the prison under the *triumviri capitales*; but there does not appear sufficient authority for this opinion (Lipsius, "Excurs. ad Tacit. Ann.", ii, 32).

Crucifixion was a method of inflicting capital punishment by nailing or tying malefactors to pieces of wood transversely placed the one upon the other. The crosses used by the ancients were of several forms; one shaped like the letter X has often been called *crux Andreana* (Andrew's cross) because, according to tradition, St. Andrew suffered death upon a cross of that form; another was formed like the letter T, and a Roman writer, Lucian, uses that fact in disparagement of the letter itself. The third kind of cross, and that most commonly used, was made of two pieces of wood crossed so as to make four right angles. It was on this kind of a cross that Christ suffered, according to the unanimous testimony of the Fathers. Crucifixion, under the Roman law, was usually reserved for slaves and the worst kind of evildoers. The incidents of crucifixion were that the criminal, after the pronouncement of sentence, carried his cross to the place of execution, a custom mentioned by Plutarch and other writers as well as in the Gospels. Scourging was inflicted upon the persons executed as in the case of other capital punishments among the Romans. Grotius and other writers have called attention to the fact that the scourging of Christ was not in accordance with the Roman usage, because it was inflicted before the sentence of death was pronounced. The criminal was next stripped of his clothes, and nailed or bound to the cross. The latter was the more painful method, as the sufferer was left to die of hunger. Instances are recorded of persons who survived nine days. The Romans usually left the body on the cross after death.

During the Middle Ages, in spite of the zealous humanitarian efforts of the Church, cruel punishments were commonly employed, and the death penalty was very frequently inflicted. This severity

was, in general, an inheritance from the Roman Empire, the jurisprudence of which, civil and criminal, pervaded Europe. One of the most horrible forms of punishment, derived from ancient Roman usages, was burning at the stake. The nations of modern Europe, as they gradually developed, seemed to have agreed upon the necessity of extirpating all influences and agencies which tended to pervert the faith of the people, or which seemed to them to betray the potency of evil spirits. Therefore, the laws of all these nations provided for the destruction of contumacious unbelievers, teachers of heresy, witches, and sorcerers, by fire. The words of Exodus (xxii, 18), "Wizards thou shalt not suffer to live", sank deep into the consciousness of the mediæval people, were literally interpreted, and rigidly observed. Witches were burned in England as late as the time of Sir Matthew Hale (1609-76). The Statute of

THE GIBBET OF MONTFAUCON
Engraving in the National Library, Paris

Elizabeth in 1562 made witchcraft a crime of the first magnitude, whether directed to the injury of others or not. The Act of James the Sixth in 1603 defines the crime more minutely and provides the penalty of death. In Scotland, during the reign of the same monarch and even later, the prosecution and punishment of alleged witchcraft became a popular frenzy, to which the courts lent their zealous aid. The number of victims in Scotland from first to last has been estimated as more than four thousand. The last regular execution for witchcraft is said to have taken place at Dornoch in 1722, when an old woman was condemned by David Ross, Sheriff of Caithness. The same belief in witchcraft and the same overmastering dread of it pervaded New England. Many persons were convicted of witchcraft and were tortured, imprisoned, and burned. One of the leaders in ferreting out and punishing witches was the Reverend Cotton Mather who, although a man of prodigious learning and deep piety, betrayed in the prosecution of witches absolute fanaticism and merciless cruelty. The laws against witchcraft were formally repealed in England in 1736. They were not repealed in Austria until 1766.

Canon law has always forbidden clerics to shed human blood and therefore capital punishment has always been the work of the officials of the State and not of the Church. Even in the case of heresy, of which so much is made by non-Catholic controversialists, the functions of ecclesiastics were restricted invariably to ascertaining the fact of heresy. The punishment, whether capital or other, was both prescribed and inflicted by civil government. The infliction of capital punishment is not contrary to the

teaching of the Catholic Church, and the power of the State to visit upon culprits the penalty of death derives much authority from revelation and from the writings of theologians. The advisability of exercising that power is, of course, an affair to be determined upon other and various considerations.

Much less severity prevails in England at present than during the reign of George III, when Sir William Blackstone felt impelled to say in his "Commentaries": "Yet, though . . . we may glory in the wisdom of the English law, we shall find it more difficult to justify the frequency of Capital Punishment to be found therein, inflicted (perhaps inattentively) by a multitude of successive independent statutes upon crimes very different in their natures. It is a melancholy truth, that among the variety of actions which men are daily liable to commit, no less than one hundred and sixty have been declared by Act of Parliament to be felonious without benefit of clergy; or, in other words, to be worthy of instant death" (bk. IV, c. 1).

The traditional method of capital punishment in England has been by hanging the criminal by the neck until dead, although during the Middle Ages beheading was customary. The English law in the time of Blackstone provided that a person convicted of treason of any kind should be drawn or dragged to the place of execution; that in case of high treason affecting the king's person or government, the person convicted should be disembowelled while still alive, beheaded, and his body divided into four quarters. Murderers were not only hanged by the neck until they were dead, but their bodies were publicly dissected. A writ of execution upon a judgment of murder before the king in Parliament, delivered in May, 1760, recited the judgment: "That the said Lawrence Earl Ferrers, Viscount Tamworth, shall be hanged by the neck until he is dead and that his body be dissected and anatomized." This barbarous sentence was literally carried into effect. After death, the body was conveyed from Tyburn in his lordship's landau, drawn by six horses, to Surgeon's Hall in the City of London; and there, after being disembowelled and cut open in the neck and breast, was exposed to public view in a room on the first floor. The dissection of the bodies of criminals led to great abuse, and was abolished in 1832.

In England during the seventeenth and eighteenth centuries the people seemed to have a passion for witnessing public executions. Many hired windows at a considerable expense for such occasions. George Selwyn was very fond of executions. His friend, G. Williams, writing to him of the condemnation of a man named John Wesket (9 Jan., 1765) for robbery in the house of his master, the Earl of Harrington, says: "Harrington's porter was condemned yesterday. Cadogan and I have already bespoke places at the Brazier's. I presume that we shall have your Honour's company, if your stomach is not too squeamish for a single swim" (Selwyn's Correspondence, I, 323). The Earl of Carlisle, writing to Selwyn, speaks of having attended the execution of Hackman, a murderer, on 19 April, 1779 (ibid., IV, 25). Boswell, the biographer of Johnson, had a keen desire for witnessing executions, and often accompanied criminals to the gallows. He had a seat in the mourning coach conveying Hackman to Tyburn, and in the same carriage rode the ordinary of Newgate and the sheriff's officer. Visiting Johnson on 23 June, 1794, Boswell mentions that he has just seen fifteen men hanged at Newgate" (Boswell, "Life of Johnson", Croker's edition, VIII, 331).

During the French Revolution, executions in Paris were witnessed by vast throngs including many female Jacobins. These bloodthirsty women employed themselves with their knitting while attending daily at the scaffold, hence the familiar name *les tricoteuses* (the

knitters). Those were the palmy days of the guillotine, the instrument which is still used for the decapitation of criminals in France. It was introduced by the National Convention during the progress of the French Revolution and was named after its supposed inventor, Joseph-Ignace Guillotin, a physician. He was not the inventor, but was only the person who first proposed its adoption. It consists of two upright posts grooved on the inside and connected at the top by cross beams. In these grooves a knife, having a sharp blade placed obliquely, is allowed to fall with tremendous force upon the neck of the victim who is bound upon a board placed at the foot of the upright posts. It is said by some authorities that this machine was invented by the Persians. It was well known in Italy, and from the thirteenth century onward it was the privilege of the nobility to be put to death by a machine of this kind, which was called *mannaia*. Conradin of Swabia was executed by such a machine at Naples in 1268. An instrument closely resembling the guillotine was employed for public executions during the Middle Ages. In Scotland, a machine called the "Maiden", very similar to the guillotine, was used. A like machine was also used by the Dutch in the eighteenth century for executing slaves in their colonies. The ordinary mode in which capital punishment is performed in England and in the United States is by hanging. This was first established in England in 1241, when Maurice, a nobleman's son, was hanged for piracy. In the military service capital punishment is inflicted by shooting, except in the case of spies and traitors, who are killed by hanging; such punishment being considered very disgraceful and therefore suited to the offence. American civil and criminal procedure having been derived from the common law of England, legislation has generally been in close accord with that of the English in regard to the punishment of crime.

The punishment of death, universal in his day, was declared by the famous Marquess Beccaria to be absolutely without justification. In his famous work, "Crime and Punishment", he says (chap. xxviii): "The punishment of death is not authorized by any right; for I have demonstrated that no such right exists. It is, therefore, a war of a whole nation against a citizen, whose destruction they consider as necessary or useful to the general good. But, if I can further demonstrate that it is neither necessary nor useful, I shall have gained the cause of humanity. The death of a citizen can be necessary in one case only: when, though deprived of his liberty, he has such power and connexions as may endanger the security of the nation; when his existence may produce a dangerous revolution in the established form of government. But even in this case, it can only be necessary when a nation is on the verge of recovering or losing its liberty; or in times of absolute anarchy, when the disorders themselves hold the place of laws. But in a reign of tranquillity; in a form of government approved by the united wishes of the nation; in a state fortified from enemies without, and supported by strength within; . . . where all power is lodged in the hands of the true sovereign; where riches can purchase pleasure and not authority, there can be no necessity for taking away the life of a subject."

The learned marquess makes a most impressive argument in favour of penal servitude for life as a substitute for the judicial killing of criminals. Voltaire, in his commentaries on the treatise of Beccaria, emphasizes his opposition to capital punishment by saying, "It hath long since been observed that a man after he is hanged is good for nothing, and that punishments invented for the good of society ought to be useful to society. It is evident that a score of stout robbers, condemned for life to some public work, would serve the state in their punishment, and that hanging them is a benefit to nobody but the execu-

tioner." These two authorities, as well as Sir William Blackstone, refer to the favourable results which followed the abolition of capital punishment in Russia by the Empress Elizabeth and the continuance of the same policy by her successor, Catherine III. Beccaria makes a telling argument against the execution of criminals in saying: "The punishment of death is pernicious to society, from the example of barbarity it affords. If the passions, or necessity of war, have taught men to shed the blood of their fellow creatures, the laws which are intended to moderate the ferocity of mankind should not increase it by examples of barbarity, the more horrible as this punishment is usually attended with formal pageantry. Is it not absurd that the laws, which detect and punish homicide, should, in order to prevent murder, publicly commit murder themselves? What are the true and most useful laws? Those compacts and conditions which all would propose and observe, in those moments when private interest is silent, or combined with that of the public. What are the natural sentiments of every person concerning the punishment of death? We may read them in the contempt and indignation with which everyone looks on the executioner, who is nevertheless an innocent executor of the public will; a good citizen, who contributes to the advantage of society; the instrument of the general security within, as good soldiers are without. What then is the origin of this contradiction? Why is this sentiment of mankind indelible to the scandal of reason? It is, that in a secret corner of the mind, in which the original impressions of nature are still preserved, men discover a sentiment which tells them that their lives are not lawfully in the power of anyone, but that of necessity only, which with its iron sceptre rules the universe."

The opposite view was taken by Jeremy Bentham. In his work, "Rationale of Punishment" (1830) he says that death is regarded by most men as the greatest of all evils; and that especially among those who are attached to life by the ties of reputation, affection, enjoyment, hope, or fear, it appears to be more efficacious punishment than any other. Sir Samuel Romilly in his "Memoirs" (1840) takes issue with Beccaria. "Beccaria," he says, "and his disciples confess that it is not the greatest of evils, and recommend other punishments as being more severe and effectual, forgetting, undoubtedly, that if human tribunals have a right to inflict severer punishment than death, they must have a right to inflict death itself" (III, 278). It may be said in this connexion that Sir Samuel Romilly was one of the most strenuous and efficacious agents in reforming and humanizing the criminal code of England. The battle is still raging between the advocates and the opponents of capital punishment. It has been well observed by Montesquieu that the excessive severity of law hinders its execution, for when the punishment surpasses all measure the public will frequently, out of humanity, prefer impunity to such punishment. The same benevolent and philosophical idea was also expressed in the first statute enacted by the English Parliament in the reign of Queen Mary; and that statute recites in its preamble:

"That the state of every King consists more assuredly in the love of the subjects towards their prince than in the dread of laws made with rigorous pains; and that laws made for the preservation of the Commonwealth without great penalties are more often obeyed and kept than laws made with extreme punishments."

The policy at present pursued by the nations of the world generally favours capital punishment, although it has been abolished in Italy, Holland, most of the cantons of Switzerland, Belgium, Portugal, and Rumania, and in the States of Michigan, Rhode Island, Wisconsin, Iowa, and Maine. It has fallen into practical disuse in Finland and Prussia. It is retained in Russia only for treason and military insubordination. The State of Colorado abolished it in 1897, but as the result of a lynching outbreak in 1900 it was restored in 1901. The death penalty is inflicted by the guillotine in France, Belgium, Denmark, Hanover, and two cantons of Switzerland. In these countries the execution is public. Criminals are executed privately by the guillotine in Bavaria, Saxony, and in two cantons of Switzerland. Execution upon the gallows is in vogue in Austria and Portugal. Hanging is conducted privately in Great Britain and in most of the states of the Federal Union. In the States of New York, New Jersey, Massachusetts, Ohio, North Carolina, and Virginia, criminals are executed by electricity. In China and in fifteen cantons of Switzerland criminals condemned to death are publicly beheaded; in Prussia they are privately beheaded. In Ecuador, and in the Grand Duchy

THE CATHEDRAL, PUNO

of Oldenburg, they are shot. In Spain they are executed by means of an instrument called the garrote, and such executions are public. In China they are strangled in public with a cord. In Brunswick they are beheaded.

JOHN WILLEY WILLIS.

Puno, DIOCESE OF (PUNIENSIS), suffragan of the Archdiocese of Lima in Peru. Its jurisdiction extends over the whole territory of the Department of Puno, with a Catholic population (1909) of 260,810 souls; 85 priests; 62 parishes; 320 churches and chapels. The residence of the bishop is at the City of Puno. The bishopric was created by law of the republic, 26 November, 1832, and by a Bull of Pius IX of 6 Nov., 1861, approved by executive resolution, 6 Sept., 1865. Dr. Mariano Chacon y Becerra was nominated the first Bishop of Puno on 17 June, 1861, and consecrated 7 April, 1862, but resigned before assuming his duties. His successor, Dr. Juan Ambrosio Huerta was nominated 17 June, 1865, and in 1875 transferred to the See of Arequipa. He was succeeded by Mgr. Pedro José Chavez, whose consecration took place on 25 July 1875. The next Bishop of Puno was Mgr. Juan Este-

báñez y Seminario, a Discalced Recollect, who was consecrated on 26 Feb., 1881, and died in the same year. The diocese was then left vacant until 1909, its last Apostolic administrator being Mgr. Ismael Puirredon, until Sept., 1909, when the present bishop, Mgr. Laisson, was consecrated.

The Diocese of Puno is divided into 9 ecclesiastical provinces, viz.: Cercado; Baja de Chucuito; Alta de Chucuito; Lampa; Baja de Lampa; Huancani; Azangaro; Carabaya, and Sandia. There is in the City of Puno a *seminario conciliar* for the education of the priesthood. The diocese is well supplied with public and private schools, some of the latter connected with the parishes. (See PERU.)

JULIAN MORENO-LACALLE.

Purcell, JOHN BAPTIST, Archbishop of Cincinnati, b. at Mallow, Ireland, 26 Feb., 1800; d. at the convent of the Ursulines, Brown County, Ohio, 4 July, 1883. Of his early education but few particulars can be found. His parents, Edward and Johanna Purcell, being industrious and pious, gave their children all the advantages of the education attainable at a time when the penal laws were less rigorously enforced. John displayed remarkable talent and mastered all the branches of the school curriculum before his eighteenth year. Entrance into the colleges of Ireland was an impossibility. He therefore decided to seek in the United States the higher education denied him in his native country. Landing at Baltimore he applied for and obtained a teacher's certificate in the Asbury College. He spent about one year in giving lessons as private tutor in some of the prominent families of Baltimore. His ambition was to become a priest, and this he never lost sight of while teaching others as a means of obtaining a livelihood. On 20 June, 1820, he entered Mount St. Mary's Seminary, Emmitsburg. His previous knowledge of the classics made it an easy task for him to take charge of important classes in the college, and at the same time prepare himself for the priesthood by the study of philosophy, theology, and other branches of ecclesiastical science. After three years' study in the seminary he received tonsure and minor orders from Archbishop Mareschal, of Baltimore, at the close of 1823. On 1 March, 1824, in the company of Rev. Simon Gabriel Bruté, one of the professors of the seminary, afterwards first Bishop of Vincennes, he sailed for Europe to complete his studies in the Sulpician Seminaries of Issy and Paris. On 26 May, 1826, he was one of the three hundred priests ordained in the cathedral of Paris by Archbishop de Quelen. After his ordination he continued his studies until the autumn of 1827, when he returned to the United States to enter Mount St. Mary's Seminary as professor. He afterwards became president, until his appointment as Bishop of Cincinnati, Ohio, to succeed the saintly Fenwick. He received notice of his appointment in Aug., 1833, and was consecrated bishop in the cathedral of Baltimore, 13 Oct., 1833, by Archbishop Whitfield. He attended the sessions of the Third Provincial Council of Baltimore, which opened on the day of his consecration and continued for one week.

After winding up his affairs in connexion with the

seminary, he set out for the scene of his life's work. Going from Baltimore by stage to Wheeling, and from Wheeling to Cincinnati by steamboat, he reached his destination 14 Nov., 1833. Bishops Flaget, David of Bardstown, Rese of Detroit, and a few priests met him and conducted him to his cathedral, which was on Sycamore Street. He was canonically installed by Bishop Flaget, who made the address of welcome. After the installation Bishop Rese, who had been administrator of the diocese during the vacancy, made the legal transfer of the property in his charge. The site of the first cathedral and at that time the only church in the city, a humble structure, is now occupied by the imposing St. Xavier's Church, accommodating over one thousand families, under the care of the Jesuit Fathers. On his arrival in 1833 Bishop Purcell found himself in a city of about 30,000 inhabitants and only one church. The diocese embraced the whole State of Ohio.

JOHN BAPTIST PURCELL

The prospect presented to the young bishop, then in his thirty-third year, was enough to fill his mind with misgiving and dread. The difficulties increased, for soon the tide of immigration turned towards Ohio. Immigrants from Germany and Ireland came in thousands, and as they were all Catholics it became his duty to provide for their spiritual wants, and that had to be done quickly. A seminary had been founded by Bishop Fenwick in the Athenæum, which stood near the cathedral. The number of students was of course very small, but Bishop Purcell had to rely on this little band to help him in his work. He began his work as a bishop with an energy and earnestness that never flagged during his whole life. He was untiring in his labour, preaching and giving lectures, writing articles for the "Telegraph", a Catholic paper founded by Father Young, a nephew of Bishop Fenwick, the first Catholic paper published in the West. He taught classes in the seminary. At his first ordination he raised to the priesthood Juncker, afterwards first Bishop of Alton, Illinois. He lost no time in providing for the wants of the growing Church in Cincinnati. Holy Trinity on Fifth Street, the first church built for the German-speaking Catholics, was soon followed by another, St. Mary's, at Clay and Thirteenth Streets. Finding it impossible to provide professors or give his own time to the seminary, he called to his aid the Jesuit Fathers, to whom he gave over the church property on Sycamore Street, and purchased a site for his new cathedral on Plum and Eighth Streets, and Western Row, then the western boundary of Cincinnati. Western Row is now Central Avenue. The new cathedral, a magnificent structure 200 feet long and 80 feet wide, built of Dayton limestone, with its beautiful spire of solid stone rising to the height of 225 feet, is one of the finest in the West. This grand temple was completed and consecrated by Archbishop Eccleston of Baltimore, 26 Oct., 1846, thirteen years after Bishop Purcell's arrival at Cincinnati. After trying several locations for his diocesan seminary, he finally located it on Price Hill, west of the city limits. The main building was completed and opened for the theologians in 1851. He called it Mount St. Mary's of the West, after his own Alma Mater at Emmitsburg. Two orphan asylums were established, St. Aloysius's for the chil-

lren of German-speaking parents, and St. Peter's, now St. Joseph's, for children of English-speaking people, and provision was made for their maintenance.

He made a complete visitation of his extensive diocese the first year of his administration, providing for the spiritual care of his scattered flock, either placing resident pastors in parishes or having priests to visit regularly the smaller communities that were unable to support a resident pastor. In 1840 the canal and railway systems that were to revolutionize the existing conditions of commerce were begun and continued without interruption until 1854. Little Miami Railroad from Xenia to Cincinnati, a distance of 65 miles, was opened for traffic in 1841. It is now a link in the great Pennsylvania system. These public works brought immense numbers of emigrants to the state. What were villages soon grew into cities; Cleveland, Toledo, Columbus, Dayton, and Hamilton became the cities of the state. New parishes were formed, and churches and schools were built. Cleveland became a bishopric in 1847, and Columbus in 1868. He was obliged to call on Europe for help to meet the fast-growing wants of his diocese.

Bishop Purcell made several trips to Europe, visiting the various seminaries there, and soliciting students having the missionary spirit to share his labours in Ohio. On his return from one of these trips to Europe he was accompanied by a band of zealous young priests, Fathers Machebeuf, Lamy, Gacon, Cheymol, and Navaron. Father Machebeuf afterwards became first Bishop of Denver; Father Lamy, first Archbishop of Santa Fé. The others lived to a ripe old age, doing missionary work in the diocese till God called them to their reward. While the state was growing in population, the city of Cincinnati did not lag behind. Cist's "Cincinnati" (1851), in its church statistics, gives the Catholics 13 parishes and 11 parish schools, with an enrollment of 4494 pupils. Bishop Purcell from the beginning was an earnest advocate of the establishment of parish schools. The rapid growth of Ohio and the West was recognized in Rome, and in 1850 Cincinnati was made an archbishopric. The pallium was conferred on Archbishop Purcell by Pope Pius IX, who at the same time made him assistant at the pontifical throne, in appreciation of his personal worth. The new ecclesiastical province of Cincinnati had for suffragans the Diocese of Cleveland, Detroit, Indianapolis, and Louisville.

In 1861 the archbishop did not hesitate in making known his views on the Civil War. He decided to fly the flag from the cathedral spire. This action of the archbishop called forth a great deal of adverse criticism, as there was at the time an influential party in the North opposed to the war. Many Catholics were in sympathy with this party. The archbishop boldly took his stand and ignored the adverse criticism. The event showed the wisdom of his course. The last vestige of insane Know-nothingism and its hatred of the Church disappeared. This wave of bigotry which spread over the whole country in the early fifties had showed itself decidedly hostile to Catholics in Cincinnati in 1854, when Archbishop Bedini was the guest of Archbishop Purcell. The firm stand taken by the German and Irish Catholics under the direction of the archbishop overawed the mob that threatened to destroy the cathedral and thus prevented bloodshed.

Archbishop Purcell attended the Council of the Vatican, and in the discussion of Papal Infallibility he took the side of the minority which opposed the opportuneness of the decision, but on his return from Rome, which he left before the question was decided, he gave in his adhesion to the doctrine as soon as he learned of the signing of the decree by Pope Pius

IX. This he did in a sermon he preached in the cathedral saying, "I am here to proclaim my belief in the infallibility of the pope in the words of the Holy Father defining the doctrine".

He celebrated his golden jubilee of priesthood 26 May, 1876. He was joined in this celebration not only by his diocese but by the whole country. Bishops and archbishops came personally or sent representatives. He had reason to rejoice when he saw the result of his work. When he came to Cincinnati he found a small city with but one church, and a diocese with a few Catholics scattered through the state. After forty-three years of toil he found the city grown to a population of nearly 300,000, with forty well-organized parishes having schools giving Catholic education to 20,000 children, a well-equipped seminary, colleges, and charitable institutions to take care of the poor and sick. Throughout the diocese were well-organized parishes, churches, and parish schools. Forty years before he had only a few priests; in 1876 he could count on the help of 150 diocesan and 50 regular priests, and a Catholic population of 150,000. In reply to the addresses of congratulation on the occasion, he modestly referred the success to the cordial assistance of the priests and the generous aid of the laity.

The serious financial disaster that clouded his last years was the result of circumstances for which he could hardly be responsible. Giving all his time to the spiritual management of the diocese, he left the material part altogether in the hands of his brother, Father Edward Purcell. He received deposits from people who were mistrustful of the banks, which were unstable institutions until the general government adopted the national banking system during the War of Rebellion. The large amount involved represented the accumulation of compound interest. This financial disaster crushed out the lives of the archbishop and his brother. The crash came in the autumn of 1878, and the archbishop died five years later. His brother had passed away in the spring of the preceding year.

After fourteen years of litigation and the mismanagement of the assignees, the affair came to an end, when the court found the amount due on the cathedral and diocesan institutions to be \$140,000. Archbishop Elder accepted the findings of the court and made arrangement by a system of assessments on the parishes to meet the loans made to pay the amount required by the final decision. This decision was made in 1892. Under the wise administration of Archbishop Elder, who succeeded Archbishop Purcell, all the loans have been paid off.

In 1837 Bishop Purcell, wishing to come in touch with the learned men of Ohio, became a member of the Ohio College of Teachers. At one of the meetings the discussion turned on religion, and some remarks were made reflecting on the Church. Bishop Purcell asked leave to reply to them at length. This permission could not be granted under the rules limiting speeches to ten minutes. In a spirit of fairness, Dr. Wilson offered the bishop the use of his church on Fourth and Main Streets to reply. This offer was gladly accepted, and the bishop delivered a masterly discourse. The position and teaching of the Catholic Church were put before the people of Cincinnati so clearly and forcibly as to cause many who heard the bishop at least to reconsider the ideas they had formed of Catholic teaching and practice. The Catholic Church was unfavourably known by non-Catholics at the time, owing to the false charges made by preachers and the spread of anti-Catholic literature giving false views of her teaching and practice. The lecture was a surprise to many who had up to that time looked upon Catholics as a danger to the country. It stirred up a great deal of discussion in the community, so much so that Alexander Campbelle,

founder of the Campbellite wing of the Presbyterian Church, felt called to take upon himself the defence of Protestantism. He sent a letter to Bishop Purcell challenging him to a public debate. The bishop with a great deal of reluctance accepted the challenge, and invited Mr. Campbelle to call at his residence in the Athenæum on Sycamore Street to arrange for the debate. The meeting took place at 2 p. m. on 11 Jan., 1837. It was agreed to hold a debate in the Baptist Church, now St. Thomas's Catholic Church, on Sycamore Street. The debate was to begin 13 Feb. and to continue seven days, exclusive of Sunday. Two sessions were to be held each day, the morning session from 9 to 12.30, the afternoon from 3 to 5. The debate was to be held under the direction of five moderators, two to be chosen by each of the disputants, these four to choose a fifth.

Mr. Campbelle was to open the discussion, Bishop Purcell to reply. The discussion was to be taken down by shorthand writers, printed after revision by the disputants, and sold, the net proceeds to be distributed equally among Catholic and Protestant charities. The moderators selected were Messrs. Samuel Lewis, Thomas J. Briggs, William Disney, John Rogers, and J. W. Piatt.

Mr. Campbelle's charges were:

(1) The Catholic Church is not now nor was she ever Catholic, Apostolic, or Holy, but is a sect in the fair import of the word, older than the sects now existing, not the Mother and Mistress of Churches, but an apostasy from the Church of Christ.

(2) The notion of Apostolic succession is without foundation in the Bible and reason.

(3) She is not uniform in faith, but fallible and changeable as other sects in religion and philosophy.

(4) She is the Babylon of St. John.

(5) Purgatory, indulgences, confession, and transubstantiation are immoral in their tendencies, injurious to the well-being of society, political and religious.

(6) The world is not indebted to the Church for the Bible.

(7) If the Church is infallible and unchangeable, she is opposed to the spirit of the institutions of the United States, which means progress.

At the close of the debate one of the city papers said "Catholicity lost nothing and Protestantism gained nothing by the discussion." It made a profound impression on the community at large. Catholic doctrine was brought before the people in a way they had never understood it before. Thinking men were led to lay aside the prejudice caused by their ignorance of the Church. Bishop Purcell's ability as a public teacher was recognized and his learning respected. The reputation and standing he acquired by this discussion he maintained during his entire administration. The members of his own flock were encouraged when they found their bishop so competent to teach them their faith and defend it against the attacks of non-Catholics. The discussion brought him into prominence throughout the whole country. He was called upon to deliver lectures and preach sermons in nearly every diocese. He was looked upon as the representative bishop of the West, as Archbishop Hughes was of the East.

In 1867 Mr. Vickers preached a sermon at the laying of the corner-stone of St. John's Evangelical Church, in which he made charges against the Church. Archbishop Purcell felt called upon to take notice of Mr. Vickers's sermon. This he did in a sermon preached at the laying of the corner-stone of St. Rose's Church. This brought on a discussion in the columns of the "Catholic Telegraph" and the "Cincinnati Gazette". The discussion attracted little attention, the archbishop had to patiently follow

his opponent, refuting the oft-repeated false charges against the Church.

The observatory corner-stone was laid on Mount Adams 9 Nov., 1842, by John Quincy Adams, ex-president of the United States. He is reported to have said in the course of his speech, "this observatory is to be a beacon of true science, that should never be obscured by the dark shadows of superstition and intolerance symbolized by the Popish Cross". The position is now the site of the Holy Cross Monastery of the Passionist Fathers. The monastery was solemnly dedicated 22 June, 1873, when the archbishop preached a most eloquent sermon on the "Triumph of the Cross". This was his reply to the remarks of John Quincy Adams and his slur on the Cross of Christ. He had before that placed the cross above the observatory when he built his votive church called the "Immaculata" on Mount Adams.

The following religious orders came to the archdiocese during the incumbency of Archbishop Purcell:—the Sisters of Charity, founded at Emmitsburg, came to Cincinnati in 1829, in union with the Sisters of Charity of France. In the changes, the Sisters formed an independent community, taking the name of the Sisters of Charity of Cincinnati. Archbishop Purcell received their vows in 1852. The Jesuit Fathers took charge of the college in 1840, and the congregation in 1847. The Sisters of Notre Dame of Namur, Belgium, came to Cincinnati in 1840. The Precious Blood Fathers came to Ohio in 1840. The Franciscan Fathers came to the diocese in 1844; the Good Shepherd Sisters in 1857; the Sisters of Mercy in 1858; Little Sisters of the Poor in 1868; Sisters of the Poor of St. Francis in 1858; Ladies of the Sacred Heart in 1869; and the Passionist Fathers in 1870.

JOHN B. MURRAY.

Purgative State. See STATE OR WAY.

Purgatorial Societies, pious associations or confraternities in the Catholic Church, which have for their purpose to assist in every possible way the poor souls in purgatory. The Catholic doctrine concerning purgatory, the condition of the poor souls after death, the communion of saints, and the satisfactory value of our good works form the basis of these associations, although they were called into life by pure Christian charity for one's neighbour which reaches beyond the grave. This brotherly love was the distinguishing mark of Christ's Church from the very beginning; the first Christian communities and the whole Church of the early centuries down to the time of the catacombs was one grand purgatorial society. The clearest evidence of this is supplied by the prayers for the dead in the oldest liturgies and breviary prayers, and by the earliest Christian inscriptions.

In the centuries which followed, wherever the Christian and ecclesiastical spirit manifested itself in the form of associations, zeal and love for the poor souls were revealed in the same degree (cf. Kraus, "Christl. Altertümer", s. v. *Fraternitas*). The old religious orders, e. g. the Benedictine Order with all its branches, especially the Order of Cluny which inaugurated All Souls' Day, furnish the most convincing proof of this. Religious confraternities are likewise distinguished in their early beginnings by a special devotion to the sick and deceased, e. g. the Brotherhood of Constantinople which flourished in 336 [Baronius, "Annales", ad an. 336, IV (Lucca, 1739), 295; cf. VII (Lucca, 1741), 869 "Parabolani"], and in the West the *Confratriæ* or *Confraternitates* of the Middle Ages. Even the medieval *geldoniæ* or guilds, established primarily for secular purposes,

never forgot in their constitutions and practical corporate life special works of charity for deceased members [Michael, "Gesch. des deutschen Volkes", I (1897), 146, 150 sq.; Janssen, "Gesch. d. deutsch. Volkes", I (1st ed.), 319 sqq.].

Although affording one of the best proofs of the existence of lively faith, especially among Anglo-Saxons, Franks, and the Germanic people in general, the mediæval associations of brotherhoods of prayer called "fraternitates", "societates", "consortium", "societates fraternæ", and "consortium fraternitatis" (cf. Adalbert Ebner, "Die klösterl. Gebets-Verbrüderungen", Ratishon, 1890; Georg Zappert, "Ueber Verbrüderungsbücher u. Nekrologien im Mittelalter", Vienna, 1853) are little known. They were founded chiefly, though not solely, to assist deceased members with prayers, Mass, and all works of Christian charity. Critical investigators, therefore, simply designate these institutions "Totenbünde" (associations for the dead). Ducange-Favre defines a Confraternitas "as . . . a society formed between various churches and monasteries, which bind themselves to hold exequies for the deceased members of one another as for their own brothers". These were soon formed between monasteries, abbeys, bishops, and noblemen; later kings, princes, bishops, priests, and the laity, especially ecclesiastical benefactors, were admitted. In the certificate of admission or the document instituting the brotherhood it was usually stated in detail how many Masses, what prayers, and good works would be offered on their death for the repose of the souls of deceased members, in the monasteries and churches or by individuals. The names of all members were enrolled in the register of brotherhood (*Liber vitæ*), a development of the ancient diptychs. A messenger was immediately dispatched with a circular (*rotulus*) to announce the death of a member to all the affiliated monasteries, where the name was inserted in the dead list (see *NECROLOGIES*) for constant commemoration; these lists were, like the earlier diptychs (q. v.), read aloud so that special prayers might be said for the deceased mentioned, and a special commemoration made by the priest during the Holy Sacrifice (Kraus, "Christl. Altertümer", II, 486 sq.).

The revival of the regular life in the West, emanating from England in the sixth century, marks the rise of these confraternities, which attained their greatest prosperity during the period of the Carolingians, maintained their position throughout the Middle Ages, and declined with its close. From England also issued the first public opposition to these associations, proclaimed by Wyclif about 1400 in his "Trialogus" (IV, xxx sq.), and followed by all religious innovators of these times. These brotherhoods may be divided into those formed of several monasteries, churches, or individual bishops, priests, abbots, and monks. However, kings, princes, and other laymen, especially benefactors, were admitted into these three classes, and even the frequently very numerous subordinates of a monastery. Especially during their most flourishing period, confraternities were formed among monasteries. In the ninth century Reichenau was affiliated with more than a hundred other monasteries and chapters in Germany, Switzerland, France, and Italy; this was chiefly due to the reform of the monastery by St. Benedict of Aniane (d. 821), and is the largest brotherhood known to us. Alcuin worked in the west of the Frankish Empire, and, before him, St. Boniface had sought with eager zeal to establish and foster in Germany such unions and brotherhoods with England and Italy (cf. *Monumenta Germaniæ historica*, "Libri confraternitatum"; "Necrologia"). In this connexion it is interesting to note the "Act of Spiritual Association" between the Abbeys of St. Denis of France and St. Remy of Reims (Bibl.

Nat., MS. lat. 13090, fol. 70), in which it is arranged that, within thirty days after the death of a member, the entire Office be recited by each of the surviving members, that the priests say Masses corresponding to the various offices, and that vigils be held in common on the first, seventh, and thirtieth days.

At the provincial and national synods of the Middle Ages the bishops and abbots present frequently formed themselves into such brotherhoods, often extending to the cathedral chapters and monasteries whose superiors were members, and to the kings and princes present at the councils. In the eighth and ninth centuries there was a whole series of such synods, e.g.: Attigny (762); Dingolfing (769); Frankfort (794); Salzburg (799); Freising (805); Clechyt (815: Synodus Calchuthensis anno X, i, 816); Savonnières near Toul (859); brotherhoods were also formed at other English and Italian synods [cf. Mansi, XII sqq. ad annos cit.; Wilkins, "Concilia Britanniae", I (London, 1737, 171)]. At diocesan synods all the clergy of a diocese with their bishop formed themselves into a brotherhood, and frequently priests of still smaller districts (rural chapters) formed lesser associations of prayer to which the laity were also admitted [cf. P. L., CVI, 866, 878; Baluze, "Miscell.", I (Lucca, 1761), 112, lviii; Harduin, "Conc.", VI, 420, xx]. Individuals of every station, rank, and sex eagerly joined these associations, while numerous rich persons founded monasteries, or made large benefactions to secure a special share in their suffrages after death. English kings, bishops, abbots, and especially Carolingian kings gave them an excellent example, as did St. Boniface and Alcuin. Even the laity of the lower classes joined the brotherhoods of St. Gall and Reichenau ["Mon. Germ. Hist.", "Libri confraternitatum", and "Necrologia"; Mansi, "Concil.", XIX, 283 sq., "Concil. Tremonienae" (i. e. of Dortmund), 1005]. The communion of spiritual goods and indulgences, granted by monasteries in the last centuries to another monastery, to benefactors and friends outside the cloister, or to other confraternities, is more than a memorial of the old brotherhoods, since in these grants, or *communicationes*, the promise of spiritual help for the deceased is one of the chief features.

With these brotherhoods of prayer there appeared at an early period *Confraternitates* more closely resembling the associations which are to-day known under that name. Their chief object was care for the poor souls. Among these might be included the above-mentioned associations from the earliest times, which devoted themselves especially to the spiritual welfare of the dying and the burial of the dead. Of the confraternities for the dead, of which we have information, only examples can be cited from the earlier centuries, but these show sufficiently clearly how widespread these must then have been. According to an inscription in the church of Sts. Cosmas and Damian in Rome [Baronius, "Annal.", XVI (Lucca, 1744), 272] a number of priests and bishops in Rome formed themselves into an association of sodales (c. 985), each promising that on the death of a member he would immediately sing forty Masses for the repose of his soul. At the beginning of the eleventh century Orc, the friend of Knut the Great, erected in honour of God and St. Peter a confraternity at Abbotsbury, according to the statutes of which each member should on the death of another contribute one penny for the repose of his soul [Dugdale, "Monasticon Anglicanum", III (London, 1821), 55]. In 1220 Bishop Peter of Sens ratified a confraternity formed by thirteen clergy, who bound themselves to celebrate annually four anniversaries for the benefactors and members of the confraternity ["Gallia Christiana", XII (Paris, 1770), Appendix 363]. In 1262 twenty-four secular priests united to practice works of mercy for the dead, read Masses for the repose of their souls, etc. (Quix, "Beschreibung der Münster-

kirche zu Aachen", 58, 157, 161 sq.). In 1355 there existed at Glocknitz a lay confraternity for the dead, which accepted members from other parishes (Monum. Boica, IV, 168 sqq.) and cared especially for the burial of the poor. Ducange-Favre (s. v. Purgatorium) speaks of a pious association, founded in 1413, expressly under the name of purgatory, in the old church of Maria Deaurata (Daurade) at Toulouse.

These confraternities concerned themselves almost exclusively with the souls of deceased members and benefactors, while the distinguishing mark of the later associations is their foundation for all poor souls. Provision for burials was first made by "La Compagnia della Pietà", founded in Rome, 1448 (cf. A. Berignani in "Archivio storico R. di Stor. Patr.", XXXIII, 5 sqq.), and nearly related to the confraternities here described. In the newly-erected church of the German cemetery (Campo Santo), a confraternity, "in honour of the bitter Passion of Christ and of the Sorrowful Mother, to comfort and assist all the faithful souls", was erected (1448) by the penitentiary, Johannes Goldener of Nuremberg, later titular Bishop of Accon and Auxiliary Bishop of Bamberg (cf. De Waal, "Der Campo Santo der Deutschen zu Rom", Freiburg, 1896, pp. 46 sqq.), and in 1579 raised by Gregory XIII to an archconfraternity, enriched with new indulgences, and empowered to aggregate other confraternities throughout the world (loc. cit., 107 sqq.). Although it has undergone many changes, this confraternity still exists, combined towards the end of the nineteenth century with a special Requiem Mass Association for assisting souls of deceased members (loc. cit., 307; cf. Beringer, "Die Ablässe", 13th German ed., 1906, pp. 685 sqq.), and it is the first purgatorial society according to the present meaning of the name. The "Black Penitents", who marched in procession through Rome under the banner of mercy, were founded in 1488 to assist before execution those condemned to death, and afterwards to provide for their burial, exequies, and Requiem Mass [cf. Raynald, "Annales", XI (Lucca, 1754), 178 sq. ad an. 1490]. The Confraternity of Our Lady of Suffrage (S. Maria del Suffragio) existed in Rome from 1592, expressly for the relief of the poor souls. It had numerous members, and since 1615 has aggregated other confraternities with the same object (Decr. auth. S. C. Indulg., n. 83, p. 67; Moroni, II, 309; LI, 328).

The Archconfraternity of Death and Prayer (*mortis et orationis*), founded in Rome, 1538, to provide for the burial of the poor and abandoned, still exists (cf. Berignani, loc. cit.); at the beginning of the seventeenth century it was granted new indulgences by Paul V (Rescr. auth. S. C. Indulg., n. 26, pp. 448 sqq.; Moroni, II, 303). About 1687 the rules of a special confraternity "for the Relief of the Most Needy Souls in Purgatory" under the invocation of the Sacred Names of Jesus, Mary, and Joseph were approved in Rome (Moroni, XVI, 130). The confraternity for the relief of the departed under the title of "Jesus Christ on Mount Calvary and the Sorrowful Mother" enjoyed special popularity and inaugurated, 8 Sept., 1760, the processions of the Way of the Cross in the Roman Coliseum; among its illustrious members was St. Leonard of Port Maurice (Rescr. auth. Summ. 39, pp. 497 sqq.; Moroni, loc. cit.). The Ingoldstadt Mass Association, formed by the Franciscans of Ingoldstadt in 1726 to procure for all members the grace of a happy death and for those already deceased speedy assistance and liberation from the pains of purgatory, was erected into a formal ecclesiastical confraternity under the title of the Immaculate Conception in 1874. An ancient, highly venerated picture of the Mother of God was adopted as the titular picture of the association, which has received all the indulgences of the confraternity of the same name in the Ara Coeli at Rome, i. e. the indulgences of the Blue

Scapular (Rescr. auth. n. 393; Summ. 58, pp. 580 sqq.). It numbers its members by tens and hundreds of thousands; almost 2000 Masses are daily celebrated for the intentions of the Marian Mass Association, which includes the intention of particularly assisting the most recently deceased members.

At the close of the Middle Ages the old confraternities, generally confined to a town or small district, gradually disappeared, as did also many of the later ones in the confusion at the end of the eighteenth century, while others preserved only a semblance of life. Since the beginning of the nineteenth century they have been replaced by vigorous new associations, which, richly endowed with indulgences by ecclesiastical authorities, have rapidly extended to the entire Church. By Brief of 5 October, 1818, Pius VII endowed the Archconfraternity of Our Mother of Sorrows and the Poor Souls in Purgatory (Archconfraternitas B. M. V. Dolorosæ sub invocatione Animarum purgatorii), which was erected in the basilica of S. Maria in Trastevere, with rich indulgences (Rescr. auth. Summ. 28, pp. 455 sqq.). First among the later confraternities which have extended throughout Christendom is the "Archconfraternity for the Relief of the Poor Souls in Purgatory under the title of the Assumption of Mary in the Redemptorist church of S. Maria in Monterone at Rome", founded in 1841. It rapidly developed, especially in England and North America, and was endowed with indulgences in 1841-63. Priests empowered to receive the faithful into the confraternity enjoy various other faculties. This confraternity is especially adapted for rapid expansion, because in 1861 it was expressly authorized to aggregate every confraternity of whatever name and object and to communicate to them its graces and privileges, provided they added to their original titles "and for the Relief of the Poor Souls in Purgatory"; they must not, however, be already aggregated to another archconfraternity, nor have been endowed with indulgences on their own account (Rescr. auth. Summ., n. 48, pp. 543 sqq.). The Redemptorist fathers conduct this archconfraternity (cf. Seeberger, "Key to the Spiritual Treasures", 2nd ed., pp. 296 sqq.).

At Nîmes in France a confraternity similar to that of Our Lady of Suffrage was established in 1857, received the faculty of aggregating other confraternities in the Diocese of Nîmes in 1858, and in 1873 received the same right for the whole world. In addition to the indulgences of the Roman confraternity, that of Nîmes has received others: the recital of the Rosary of the Dead was approved especially for its members by Pius IX in 1873 (Beringer, "Die Ablässe", II, 3rd ed., pp. 470 sqq.). In accordance with its ancient traditions, the Benedictine Order formed a twofold Confraternity of the Poor Souls at Lambach, Diocese of Linz, Austria. In 1877 the Archconfraternity of the Perpetual Adoration of the Blessed Sacrament under the Protection of St. Benedict for the Poor Souls in Purgatory was erected with right to aggregate other confraternities of the same name and object in Austria-Hungary. In 1893, with the same title and objects, this confraternity was erected in the abbey church of St. John the Baptist at Collegeville, Minnesota; it shares in all the indulgences of the Lambach confraternity, and possesses, as the archconfraternity for North America, the faculty of aggregating all confraternities of the same name and communicating to them its indulgences. Finally, by Brief of 2 March, 1910, Pius X granted to the Lambach archconfraternity the right of aggregation for the whole world (Acta Ap. Sed., III, 93 sqq.). There was also founded, in 1878, in the same abbey church of Lambach a Priests' Association under the Protection of St. Benedict for the Relief of the Poor Souls in Purgatory. This was approved and recommended by the diocesan bishop, Franz Joseph Rudigier. Many other bishops,

especially in North America, recommended it to their clergy. The direction of the association is in the hands of the general-director of the Archconfraternity of Lambach, who enters the members in a special register. The official organ for both is the "Benediktusstimmen", published by the Abbey of Emaus in Prague (cf. Seeberger, op. cit., 301 sqq.).

A work of atonement to procure relief and liberation for the most needy and abandoned souls in purgatory by the celebration of many Masses was founded in 1884 in the parish of La Chapelle-Montligeon, Diocese of Séez, France. Until 1893 this association was aggregated to the archconfraternity of S. Maria in Monterone, but it was declared by Brief of 2 October, 1893, an honorary archconfraternity and prima-primaria. Only associations united with that of Montligeon may adopt the same title and statutes. This association of many million members is blessed by the pope, and recommended by numerous bishops. To become a member, one must have one's name enrolled, and contribute five centimes annually for the objects of the association; persons who make a single contribution of five francs have a permanent share in all the Masses celebrated for the deceased. Seven Masses are said weekly for the souls in purgatory, three monthly for deceased priests, and in addition many thousand Masses are offered annually. A monthly organ of the association is issued in various languages (cf. Seeberger, loc. cit., 304 sqq.; Beringer, op. cit., II, 478 sqq.). The Order of Cluny have always been conspicuous for their special devotion to the poor souls. Since 998, St. Odilo, Abbot of Cluny, had All Souls' Day celebrated by his monks on 2 November, which day was gradually devoted by the entire Church to the relief of the poor souls. In memory of this fact, a new archconfraternity was erected at Cluny in the parish church of Our Lady. By Brief of 25 May, 1898, Leo XIII granted this "Archconfraternity of Prayer for the Poor Souls of Purgatory" the indulgences of the old Roman Confraternity of Prayer and Death (see above), and authorized it to aggregate similar confraternities throughout France and its colonies ("Analecta eccles.", 1898, p. 328; Beringer, "Die Ablässe", II, 475 sqq.). The "Associazione del Sacro Cuore di Gesù in suffragio delle Anime del Purgatorio" was canonically established in Rome (Lungotevere, Prati) in a church of the Sacred Heart, and granted indulgences and privileges by Leo XIII (1903-5). The director of this association, which includes non-residents of Rome in its membership, is Victor Jouet, who edits "Rivista mensile dell' Associazione".

Having named the best-known and most widespread modern confraternities for the poor souls, we must not forget that, among the numerous other confraternities and pious associations, there is scarcely one—if indeed any—which does not seek to promote with special devotion the intercession for, and help of, the poor souls. Indulgences of the confraternities are ever applicable to the souls in purgatory, and the privilege of the altar for churches and for priests, who are members, may be used in favour of dead members or of all the poor souls. The formation of the "Catholic League for Constant Intercession for the Poor Souls in Purgatory" was proposed by certain pious citizens of Rome, approved by Leo XIII in the last years of his reign, and enriched with indulgences. The only requisite for membership is to recite thrice daily the prayer, "Requiem æternam dona eis Domine et lux perpetua luceat eis. Requiescant in pace. Amen", thereby gaining once daily an indulgence of 200 days (cf. Raccolta, 1898, pp. 539 sq.). In conclusion we must mention the thousands and perhaps millions of the faithful, who have made the heroic act of charity (q. v.), thus assisting in the most perfect manner the souls in purgatory, and finally the crown of all these associations, in this work, is the Order of the Helpers of the Holy Souls.

Purgatory.—The subject is treated under these heads: I. Catholic Doctrine; II. Errors; III. Proofs; IV. Duration and Nature; V. Succouring the Dead; VI. Indulgences; VII. Invocation of Souls; VIII. Utility of Prayer for the Departed.

I. CATHOLIC DOCTRINE.—Purgatory (Lat., *purgare*, to make clean, to purify) in accordance with Catholic teaching is a place or condition of temporal punishment for those who, departing this life in God's grace, are not entirely free from venial faults, or have not fully paid the satisfaction due to their transgressions. The faith of the Church concerning purgatory is clearly expressed in the Decree of Union drawn up by the Council of Florence (Mansi, t. XXXI, col. 1031), and in the decree of the Council of Trent which (Sess. XXV) defined: "Whereas the Catholic Church, instructed by the Holy Ghost, has from the Sacred Scriptures and the ancient tradition of the Fathers taught in Councils and very recently in this Œcumenical synod (Sess. VI, cap. xxx; Sess. XXII, cap. ii, iii) that there is a purgatory, and that the souls therein detained are helped by the suffrages of the faithful, but principally by the acceptable Sacrifice of the Altar; the Holy Synod enjoins on the Bishops that they diligently endeavour to have the sound doctrine of the Fathers in Councils regarding purgatory everywhere taught and preached, held and believed by the faithful" (Denzinger, "Enchiridion", 983). Further than this the definitions of the Church do not go, but the tradition of the Fathers and the Schoolmen must be consulted to explain the teaching of the councils, and to make clear the belief and the practices of the faithful.

Temporal Punishment.—That temporal punishment is due to sin, even after the sin itself has been pardoned by God, is clearly the teaching of Scripture. God indeed brought man out of his first disobedience and gave him power to govern all things (Wis., x, 2), but still condemned him "to eat his bread in the sweat of his brow" until he returned unto dust. God forgave the incredulity of Moses and Aaron, but in punishment kept them from the "land of promise" (Num., xx, 12). The Lord took away the sin of David, but the life of the child was forfeited because David had made God's enemies blaspheme His Holy Name (II Kings, xii, 13, 14). In the New Testament as well as in the Old, almsgiving and fasting, and in general penitential acts are the real fruits of repentance (Matt., iii, 8; Luke, xvii, 3; xiii, 3). The whole penitential system of the Church testifies that the voluntary assumption of penitential works has always been part of true repentance and the Council of Trent (Sess. XIV, can. xi) reminds the faithful that God does not always remit the whole punishment due to sin together with the guilt. God requires satisfaction, and will punish sin, and this doctrine involves as its necessary consequence a belief that the sinner failing to do penance in this life may be punished in another world, and so not be cast off eternally from God.

Venial Sins.—All sins are not equal before God, nor dare anyone assert that the daily faults of human frailty will be punished with the same severity that is meted out to serious violation of God's law. On the other hand whosoever comes into God's presence must be perfectly pure, for in the strictest sense His "eyes are too pure to behold evil" (Hab., i, 13). For unrepented venial faults, for the payment of temporal punishment due to sin at time of death, the Church has always taught the doctrine of purgatory.

So deep was this belief ingrained in our common humanity that it was accepted by the Jews, and in at least a shadowy way by the pagans, long before the coming of Christianity (*"Æneid"*, VI, 735 sq.; Sophocles, *"Antigone"*, 450 sq.; cf. Mommsen, *"Rome"*, I, xiii).

II. ERRORS.—Epiphanius (*Hær.*, lxxv, P. G., XLII, col. 513) complains that Aërius (fourth cent.) taught that prayers for the dead were of no avail. In the Middle Ages, the doctrine of purgatory was rejected by the Albigenses, Waldenses, and Hussites. St. Bernard (*Serm.* lxvi in *Cantic.*, P. L., CLXXXIII, col. 1098) states that the so-called *Apostolici* denied purgatory and the utility of prayers for the departed. Much discussion has arisen over the position of the Greeks on the question of purgatory (*"Perpétuité de la foi"*, III, col. 1123 sq.). It would seem that the great difference of opinion was not concerning the existence of purgatory, but concerning the nature of purgatorial fire; still St. Thomas proves the existence of purgatory in his dissertation against the errors of the Greeks, and the Council of Florence also thought necessary to affirm the belief of the Church on the subject (Bellarmine, *"De Purgatorio"*, lib. I, cap. i). The modern Orthodox Church denies purgatory, but is rather inconsistent in its way of putting forth its belief (Fortescue, *"Orthodox Eastern Church"*, London, 1907, 389).

At the beginning of the Reformation there was some hesitation especially on Luther's part (Leipzig Disputation) as to whether the doctrine should be retained, but, as the breach widened, the denial of purgatory by the Reformers became universal (Centuriat. Magdeburg, cent. IV, cap. iv), and Calvin termed the Catholic position *"exitiale commentum quod crucem Christi evacuat . . . quod fidem nostram labefacit et evertit"* (*Institutiones*, lib. III, cap. v, § 6). Modern Protestants, while they avoid the name purgatory, frequently teach the doctrine of "the middle state", and Martensen (*"Christian Dogmatics"*, Edinburgh, 1890, p. 457) writes: "As no soul leaves this present existence in a fully complete and prepared state, we must suppose that there is an intermediate state, a realm of progressive development, (?) in which souls are prepared for the final judgment" (Farrar, *"Mercy and Judgment"*, London, 1881, cap. iii; A. Campbell, *"The Doctrines of the Middle State . . . of Prayers for the Dead etc."*, London, 1721; Hodge, *"Systematic Theology"*, New York, 1885, III, 741).

III. PROOFS.—The Catholic doctrine of purgatory supposes the fact that some die with smaller faults for which there was no true repentance, and also the fact that the temporal penalty due to sin is at times not wholly paid in this life. The proofs for the Catholic position, both in Scripture and in Tradition, are bound up also with the practice of praying for the dead. For why pray for the dead, if there be no belief in the power of prayer to afford solace to those who as yet are excluded from the sight of God? So true is this position that prayers for the dead and the existence of a place of purgation are mentioned in conjunction in the oldest passages of the Fathers, who allege reasons for succouring departed souls. Those who have opposed the doctrine of purgatory have confessed that prayers for the dead would be an unanswerable argument if the modern doctrine of a "particular judgment" had been received in the early ages. But one has only to read the testimonies hereinafter alleged to feel sure that the Fathers speak, in the same breath, of oblations for the dead and a place of purgation; and one has only to consult the evidence found in the catacombs to feel equally sure that the Christian faith there expressed embraced clearly a belief in judgment immediately after death. Wilpert (*"Roma Sotteranea"*, I, 441) thus concludes chap. xxi, *"Che tale esaudimento"* etc.,

"Intercession has been made for the soul of the dear one departed and God has heard the prayer, and the soul has passed into a place of light and refreshment." "Surely", Wilpert adds, "such intercession would have no place were there question not of the particular, but of the final judgment."

Some stress too has been laid upon the objection that the ancient Christians had no clear conception of purgatory, and that they thought that the souls departed remained in uncertainty of salvation to the last day; and consequently they prayed that those who had gone before might in the final judgment escape even the everlasting torments of hell. The earliest Christian traditions are clear as to the particular judgment, and clearer still concerning a sharp distinction between purgatory and hell. The passages alleged as referring to relief from hell cannot offset the evidence given below. (Bellarmine, *"De Purgatorio"*, lib. II, cap. v; Gihl, *"Holy Sacrifice of the Mass"*, tr. St. Louis, 1902, p. 50.) Concerning the famous case of Trajan, which vexed the Doctors of the Middle Ages, see Bellarmine, loc. cit., cap. viii.

Old Testament.—The tradition of the Jews is put forth with precision and clearness in II Machabees. Judas, the commander of the forces of Israel, "making a gathering . . . sent twelve thousand drachms of silver to Jerusalem for sacrifice to be offered for the sins of the dead, thinking well and religiously concerning the resurrection (For if he had not hoped that they that were slain should rise again, it would have seemed superfluous and vain to pray for the dead). And because he considered that they who had fallen asleep with godliness, had great grace laid up for them. It is therefore a holy and wholesome thought to pray for the dead, that they may be loosed from sins" (II Mach., xii, 43-46). At the time of the Machabees the leaders of the people of God had no hesitation in asserting the efficacy of prayers offered for the dead, in order that those who had departed this life might find pardon for their sins and the hope of eternal resurrection.

New Testament.—There are several passages in the New Testament that point to a process of purification after death. Thus, Jesus Christ declares (Matt., xii, 32): "And whosoever shall speak a word against the Son of man, it shall be forgiven him: but he that shall speak against the Holy Ghost, it shall not be forgiven him, neither in this world, nor in the world to come." According to St. Isidore of Seville (*De ord. creatur.*, c. xiv, n. 6) these words prove that in the next life "some sins will be forgiven and purged away by a certain purifying fire". St. Augustine also argues "that some sinners are not forgiven either in this world or in the next would not be truly said unless there were other [sinners] who, though not forgiven in this world, are forgiven in the world to come" (*De Civ. Dei*, XXI, xxiv). The same interpretation is given by Gregory the Great (*Dial.*, IV, xxxix); St. Bede (commentary on this text); St. Bernard (*Sermo* lxvi in *Cantic.*, n. 11) and other eminent theological writers (cf. Hurter, *"Theol. Dog. Compend."*, tract. X).

A further argument is supplied by St. Paul in I Cor., iii, 11-15: "For other foundation no man can lay, but that which is laid; which is Christ Jesus. Now if any man build upon this foundation, gold, silver, precious stones, wood, hay, stubble: Every man's work shall be manifest; for the day of the Lord shall declare it, because it shall be revealed in fire; and the fire shall try every man's work, of what sort it is. If any man's work abide, which he hath built thereupon, he shall receive a reward. If any man's work burn, he shall suffer loss; but he himself shall be saved, yet so as by fire." While this passage presents considerable difficulty, it is regarded by many of the Fathers and theologians as evidence for the

existence of an intermediate state in which the dross of lighter transgressions will be burnt away, and the soul thus purified will be saved. This, according to Bellarmine (*De Purg.*, I, 5), is the interpretation commonly given by the Fathers and theologians; and he cites to this effect St. Ambrose (commentary on the text, and *Sermo* xx in Ps. cxvii), St. Jerome (*Comm.* in Amos, c. iv), St. Augustine (*Comm.* in Ps. xxxvii), St. Gregory (*Dial.*, IV, xxxix), and Origen (*Hom.* vi in Exod.). See also St. Thomas, "*Contra Gentes*", IV, 91. For a discussion of the exegetical problem, see Atzberger, "*Die christliche Eschatologie*", p. 275.

Tradition.—This doctrine that many who have died are still in a place of purification and that prayers avail to help the dead is part of the very earliest Christian tradition. Tertullian "*De corona militis*" mentions prayers for the dead as an Apostolic ordinance, and in "*De Monogamia*" (cap. x, P. L., II, col. 912) he advises a widow "to pray for the soul of her husband, begging repose for him and participation in the first resurrection"; he commands her also "to make oblations for him on the anniversary of his demise", and charges her with infidelity if she neglect to succour his soul. This settled custom of the Church is clear from St. Cyprian, who (P. L. IV, col. 399) forbade the customary prayers for one who had violated the ecclesiastical law. "Our predecessors prudently advised that no brother, departing this life, should nominate any churchman as his executor; and should he do it, that no oblation should be made for him, nor sacrifice offered for his repose." Long before Cyprian, Clement of Alexandria had puzzled over the question of the state or condition of the man who, reconciled to God on his death-bed, had no time for the fulfilment of penance due his transgression. His answer is: "the believer through discipline divests himself of his passions and passes to the mansion which is better than the former one, passes to the greatest torment, taking with him the characteristic of repentance for the faults he may have committed after baptism. He is tortured then still more, not yet attaining what he sees others have acquired. The greatest torments are assigned unto the believer, for God's righteousness is good, and His goodness righteous, and though those punishments cease in the course of the expiation and purification of each one, 'yet'" etc. (P. G. IX, col. 332).

In Origen the doctrine of purgatory is very clear. If a man depart this life with lighter faults, he is condemned to fire which burns away the lighter materials, and prepares the soul for the kingdom of God, where nothing defiled may enter. "For if on the foundation of Christ you have built not only gold and silver and precious stones (I Cor., 3) but also wood and hay and stubble, what do you expect when the soul shall be separated from the body? Would you enter into heaven with your wood and hay and stubble and thus defile the kingdom of God; or on account of these hindrances would you remain without and receive no reward for your gold and silver and precious stones? Neither is this just. It remains then that you be committed to the fire which will burn the light materials; for our God to those who can comprehend heavenly things is called a cleansing fire. But this fire consumes not the creature, but what the creature has himself built, wood, and hay and stubble. It is manifest that the fire destroys the wood of our transgressions and then returns to us the reward of our good works." (P. G., XIII, col. 445, 448).

The Apostolic practice of praying for the dead, which passed into the liturgy of the Church, is as clear in the fourth century as it is in the twentieth. St. Cyril of Jerusalem (*Catechet. Mystog.*, V, 9, P. G., XXXIII, col. 1116) describing the liturgy,

writes: "Then we pray for the Holy Fathers and Bishops that are dead; and in short for all those who have departed this life in our communion; believing that the souls of those for whom prayers are offered receive very great relief, while this holy and tremendous victim lies upon the altar." St. Gregory of Nyssa (P. G., XLVI, col. 524, 525) states that man's weaknesses are purged in this life by prayer and wisdom, or are expiated in the next by a cleansing fire. "When he has quitted his body and the difference between virtue and vice is known he cannot approach God till the purging fire shall have cleansed the stains with which his soul was infested. That same fire in others will cancel the corruption of matter, and the propensity to evil." About the same time the Apostolic Constitution gives us the formularies used in succouring the dead. "Let us pray for our brethren who sleep in Christ, that God who in his love for men has received the soul of the departed one, may forgive him every fault, and in mercy and clemency receive him into the bosom of Abraham, with those who in this life have pleased God" (P. G., I, col. 1144). Nor can we pass over the use of the diptychs where the names of the dead were inscribed; and this remembrance by name in the Sacred Mysteries—a practice that was from the Apostles—was considered by Chrysostom as the best way of relieving the dead (*In I Ad Cor.*, *Hom.* xli, n. 4, P. G., LXI, col. 361, 362).

The teaching of the Fathers, and the formularies used in the Liturgy of the Church, found expression in the early Christian monuments, particularly those contained in the catacombs. On the tombs of the faithful were inscribed words of hope, words of petition for peace and for rest; and as the anniversaries came round the faithful gathered at the graves of the departed to make intercession for those who had gone before (Wilpert, "*Roma sotteranea*", xxi, 396 sq.). At bottom this is naught else than the faith expressed by the Council of Trent (*Sess.* XXV, "*De Purgatorio*"), and to this faith the inscriptions in the catacombs are surely witnesses (Kirsch, "*Die Aclamationen und Gebete der altchristlichen Grabschriften*", Cologne, 1898, pp. 70–78).

In the fourth century in the West, Ambrose insists in his commentary on St. Paul (I Cor., iii) on the existence of purgatory, and in his masterly funeral oration (*De obitu Theodosii*), thus prays for the soul of the departed emperor: "Give, O Lord, rest to Thy servant Theodosius, that rest Thou hast prepared for Thy saints. . . . I loved him, therefore will I follow him to the land of the living; I will not leave him till by my prayers and lamentations he shall be admitted unto the holy mount of the Lord, to which his deserts call him" (P. L., XVI, col. 1397). St. Augustine is clearer even than his master. He describes two conditions of men; "some there are who have departed this life, not so bad as to be deemed unworthy of mercy, nor so good as to be entitled to immediate happiness" etc., and in the resurrection he says there will be some who "have gone through these pains, to which the spirits of the dead are liable" (*De Civ. Dei*, XXI, 24). Thus at the close of the fourth century not only (1) were prayers for the dead found in all the Liturgies, but the Fathers asserted that such practice was from the Apostles themselves; (2) those who were helped by the prayers of the faithful and by the celebration of the Holy Mysteries were in a place of purgation; (3) from which when purified they "were admitted unto the Holy Mount of the Lord". So clear is this patristic Tradition that those who do not believe in purgatory have been unable to bring any serious difficulties from the writings of the Fathers. The passages cited to the contrary either do not touch the question at all, or are so lacking in clearness that they cannot offset the perfectly open expression of

the doctrine as found in the very Fathers who are quoted as holding contrary opinions (Bellarmine "De Purg.", lib. I, cap. xiii; Billot, "Quæst. de Novissimis", Rome, 1903, p. 97; Chr. Pesch, "Prael. Dogmat.", 2nd ed., Freiburg, 1902).

IV. DURATION AND NATURE.—Duration.—The very reasons assigned for the existence of purgatory make for its passing character. We pray, we offer sacrifice for souls therein detained that "God in mercy may forgive every fault and receive them into the bosom of Abraham" (Const. Apost., P. G., I, col. 1144); and Augustine (De Civ. Dei, lib. XXI, cap. xiii and xvi) declares that the punishment of purgatory is temporary and will cease, at least with the Last Judgment. "But temporary punishments are suffered by some in this life only, by others after death, by others both now and then; but all of them before that last and strictest judgment."

Nature of Punishment.—It is clear from the Liturgies and the Fathers above cited that the souls for whose peace sacrifice was offered were shut out for the time being from the sight of God. They were "not so good as to be entitled to eternal happiness". Still, for them "death is the termination not of nature but of sin" (Ambrose, "De obitu Theodos."); and this inability to sin makes them secure of final happiness. This is the Catholic position proclaimed by Leo X in the Bull "Exurge Domine" which condemned the errors of Luther (Bullarium, ed. Taurin., V, 751).

Are the souls detained in purgatory conscious that their happiness is but deferred for a time, or may they still be in doubt concerning their ultimate salvation? The ancient Liturgies and the inscriptions of the catacombs speak of a "sleep of peace", which would be impossible if there was any doubt of ultimate salvation. Some of the Doctors of the Middle Ages thought uncertainty of salvation one of the severe punishments of purgatory (Bellarmine, "De Purgat." lib. II, cap. iv); but this opinion finds no general credit among the theologians of the medieval period, nor is it possible in the light of the belief in the particular judgment. St. Bonaventure gives as the reason for this elimination of fear and of uncertainty the intimate conviction that they can no longer sin (lib. IV, dist. xx, p. 1, a. 1, q. iv): "Est evacuatio timoris propter confirmationem liberi arbitrii, qua deinceps scit se peccare non posse" (Fear is cast out because of the strengthening of the will by which the soul knows it can no longer sin), and St. Thomas (dist. xxi, q. i, a. 1) says: "nisi scirent se esse liberandas suffragia non peterent" (unless they knew that they are to be delivered, they would not ask for prayers).

Merit.—In the Bull "Exurge Domine" Leo X condemns the proposition (n. 38) "Nec probatum est ullis aut rationibus aut scripturis ipsas esse extra statum merendi aut augendæ caritatis" (There is no proof from reason or Scripture that they [the souls in purgatory] cannot merit or increase in charity). For them "the night has come in which no man can labour", and Christian tradition has always considered that only in this life can man work unto the profit of his own soul. The Doctors of the Middle Ages while agreeing that this life is the time for merit and increase of grace, still some with St. Thomas seemed to question whether or not there might be some non-essential reward which the souls in purgatory might merit (IV, dist. xxi, q. i, a. 3). Bellarmine believes that in this matter St. Thomas changed his opinion and refers to a statement of St. Thomas ("De Malo", q. vii, a. 11). Whatever may be the mind of the Angelic Doctor, theologians agree that no merit is possible in purgatory, and if objection be urged that the souls there merit by their prayers, Bellarmine says that such prayers avail with God because of merit already acquired "Solum impetrant

ex meritis præteritis quomodo nunc sancti orando pro nobis impetrant licet non merendo" (They avail only in virtue of past merits as those who are now saints intercede for us not by merit but by prayer). (loc. cit., II, cap. iii).

Purgatorial Fire.—At the Council of Florence, Bessarion argued against the existence of real purgatorial fire, and the Greeks were assured that the Roman Church had never issued any dogmatic decree on this subject. In the West the belief in the existence of real fire is common. Augustine in Ps. xxxvii, n. 3, speaks of the pain which purgatorial fire causes as more severe than anything a man can suffer in this life, "gravior erit ignis quam quidquid potest homo pati in hac vita" (P. L., XXXVI, col. 397). Gregory the Great speaks of those who after this life "will expiate their faults by purgatorial flames", and he adds "that the pain will be more intolerable than any one can suffer in this life" (Ps. 3 pœnit., n. 1). Following in the footsteps of Gregory, St. Thomas teaches (IV, dist. xxi, q. i, a. 1) that besides the separation of the soul from the sight of God, there is the other punishment from fire. "Una pœna damni, in quantum scilicet retardantur a divina visione; alia sensus secundum quod ab igne puniuntur", and St. Bonaventure not only agrees with St. Thomas but adds (IV, dist. xx, p. 1, a. 1, q. ii) that this punishment by fire is more severe than any punishment which comes to men in this life; "Gravior est omni temporali pœna, quam modo sustinet anima carni conjuncta". How this fire affects the souls of the departed the Doctors do not know, and in such matters it is well to heed the warning of the Council of Trent when it commands the bishops "to exclude from their preaching difficult and subtle questions which tend not to edification, and from the discussion of which there is no increase either of piety or of devotion" (Sess. XXV, "De Purgatorio").

V. SUCCOURING THE DEAD.—Scripture and the Fathers command prayers and oblations for the departed, and the Council of Trent (Sess. XXV, "De Purgatorio") in virtue of this tradition not only asserts the existence of purgatory, but adds "that the souls therein detained are aided by the suffrages of the faithful and principally by the acceptable sacrifice of the altar". That those on earth are still in communion with the souls in purgatory is the earliest Christian teaching, and that the living aid the dead by their prayers and works of satisfaction is clear from the tradition above alleged. That the Holy Sacrifice was offered for the departed was received Catholic Tradition even in the days of Tertullian and Cyprian, and that the souls of the dead were aided particularly "while the sacred victim lay upon the altar" is the expression of Cyril of Jerusalem quoted above. Augustine (Serm. clxxii, n. 2) says that the "prayers and alms of the faithful, the Holy Sacrifice of the altar aid the faithful departed and move the Lord to deal with them in mercy and kindness, and" he adds, "this is the practice of the universal Church handed down by the Fathers". Whether our works of satisfaction performed on behalf of the dead avail purely out of God's benevolence and mercy, or whether God obliges himself in justice to accept our vicarious atonement, is not a settled question. Suarez thinks that the acceptance is one of justice, and alleges the common practice of the Church which joins together the living and the dead without any discrimination (De pœnit., disp. xlviii, § 6, n. 4).

VI. INDULGENCES.—The Council of Trent (Sess. XXV) defined that indulgences are "most salutary for Christian people" and that their "use is to be retained in the Church". It is the common teaching of Catholic theologians that (1) indulgences may be applied to the souls detained in purgatory; and (2)

that indulgences are available for them "by way of suffrage" (*per modum suffragii*).

(1) Augustine (De Civ. Dei, XX, ix) declares that the souls of the faithful departed are not separated from the Church, which is the kingdom of Christ, and for this reason the prayers and works of the living are helpful to the dead. "If therefore", argues Bellarmine (De indulgentiis, xiv) "we can offer our prayers and our satisfactions in behalf of those detained in purgatory, because we are members of the great body of Christ, why may not the Vicar of Christ apply to the same souls the superabundant satisfaction of Christ and his saints—of which he is the dispenser?" This is the doctrine of St. Thomas (IV, Sent., dist. xlv, q. ii, a. 3, q. 2) who asserts that indulgences avail principally for the person who performs the work for which the indulgence is given, but secondarily may avail even for the dead, if the form in which the indulgence is granted be so worded as to be capable of such interpretation, and he adds "nor is there any reason why the Church may not dispose of its treasure of merits in favour of the dead, as it surely dispenses it in favour of the living".

(2) St. Bonaventure (IV, Sent., dist. xx, p. 2, q. v) agrees with St. Thomas, but adds that such "relaxation cannot be after the manner of absolution as in the case of the living, but only as suffrage (*Hæc non tenet modum iudicii, sed potius suffragii*). This opinion of St. Bonaventure, that the Church through its Supreme Pastor does not absolve juridically the souls in purgatory from the punishment due their sins, is the teaching of the Doctors. They point out (Gratian, 24 q. ii, 2, can. 1) that in case of those who have departed this life judgment is reserved to God; they allege the authority of Gelasius (Ep. ad Faustum; Ep. ad. Episcopos Dardanæ) in support of their contention (Gratian *ibid.*), and they also insist that the Roman Pontiffs, when they grant indulgences that are applicable to the dead, add the restriction *per modum suffragii et deprecationis*. This phrase is found in the Bull of Sixtus IV "Romani Pontificis provida diligentia", 27 Nov., 1477.

The phrase *per modum suffragii et deprecationis* has been variously interpreted by theologians (Bellarmine, "De indulgentiis", p. 137). Bellarmine himself says: "The true opinion is that indulgences avail as suffrage, because they avail not after the fashion of a juridical absolution 'quia non prosunt per modum iudiciæ absolutionis'." But according to the same author the suffrages of the faithful avail at times *per modum meriti congrui* (by way of merit), at times *per modum impetrationis* (by way of supplication) at times *per modum satisfactionis* (by way of satisfaction); but when there is question of applying an indulgence to one in purgatory it is only *per modum suffragii satisfactorii*, and for this reason "the pope does not absolve the soul in purgatory from the punishment due his sin, but offers to God from the treasure of the Church whatever may be necessary for the cancelling of this punishment".

If the question be further asked whether such satisfaction is accepted by God out of mercy and benevolence, or *ex iustitia*, theologians are not in accord—some holding one opinion, others the other. Bellarmine after canvassing both sides (pp. 137, 138) does not dare to set aside either opinion, but is inclined to think that the former is more reasonable while he pronounces the latter in harmony with piety (*admodum pia*).

Condition.—That an indulgence may avail for those in purgatory several conditions are required: (1) The indulgence must be granted by the pope. (2) There must be a sufficient reason for granting the indulgence, and this reason must be something pertaining to the glory of God and the utility of the Church, not merely the utility accruing to the souls in purgatory. (3) The pious work enjoined must be

performed by the living and if the enjoined satisfaction requires the state of grace, this must be verified as in the case of indulgences for the living.

If the state of grace be not among the required works, in all probability the person performing the work may gain the indulgence for the dead, even though he himself be not in friendship with God (Bellarmine, *loc. cit.*, p. 139). Suarez (De Pœnit., disp. liii, s. 4, n. 5 and 6) puts this categorically when he says: "Status gratiæ solum requiritur ad tollendum obicem indulgentiæ" (the state of grace is required only to remove some hindrance to the indulgence), and in the case of the holy souls there can be no hindrance. This teaching is bound up with the doctrine of the Communion of Saints, and the monuments of the catacombs represent the saints and martyrs as interceding with God for the dead. The prayers too of the early liturgies speak of Mary and of the saints interceding for those who have passed from this life. Augustine believes that burial in a basilica dedicated to a holy martyr is of value to the dead, for those who recall the memory of him who has suffered will recommend to the martyr's prayers the soul of him who has departed this life (Bellarmine, lib. II, xv). In the same place Bellarmine accuses Dominicus A Soto of rashness, because he denied this doctrine.

VII. INVOCATION OF SOULS.—Do the souls in purgatory pray for us? May we call upon them in our needs? There is no decision of the Church on this subject, nor have the theologians pronounced with definiteness concerning the invocation of the souls in purgatory and their intercession for the living. In the ancient liturgies there are no prayers of the Church directed to those who are still in purgatory. On the tombs of the early Christians nothing is more common than a prayer or a supplication asking the departed to intercede with God for surviving friends, but these inscriptions seem always to suppose that the departed one is already with God. St. Thomas (II-II, Q. lxxxiii, a. 11, ad 3^{um}) denies that the souls in purgatory pray for the living, and states that they are not in a position to pray for us, rather we must make intercession for them. Despite the authority of St. Thomas, many renowned theologians hold that the souls in purgatory really pray for us, and that we may invoke their aid. Bellarmine (De Purgatorio, lib. II, xv) says the reason alleged by St. Thomas is not at all convincing, and holds that in virtue of their greater love of God and their union with Him their prayers may have great intercessory power, for they are really superior to us in love of God, and in intimacy of union with Him. Suarez (De pœnit., disp. xlvii, s. 2, n. 9) goes farther and asserts "that the souls in purgatory are holy, are dear to God, love us with a true love and are mindful of our wants; that they know in a general way our necessities and our dangers, and how great is our need of Divine help and divine grace".

When there is question of invoking the prayers of those in purgatory, Bellarmine (*loc. cit.*) says it is superfluous, ordinarily speaking, for they are ignorant of our circumstances and condition. This is at variance with the opinion of Suarez, who admits knowledge at least in a general way, also with the opinions of many modern theologians who point to the practice now common with almost all the faithful of addressing their prayers and petitions for help to those who are still in a place of purgation. Scavini (Theol. Moral., XI, n. 174) sees no reason why the souls detained in purgatory may not pray for us, even as we pray for one another. He asserts that this practice has become common at Rome, and that it has the great name of St. Alphonsus in its favour. St. Alphonsus in his work the "Great Means of Salvation", chap. I, III, 2, after quoting Sylvius, Gotti, Lessius, and Medina as favourable

to his opinion, concludes: "so the souls in purgatory, being beloved by God and confirmed in grace, have absolutely no impediment to prevent them from praying for us. Still the Church does not invoke them or implore their intercession, because ordinarily they have no cognizance of our prayers. But we may piously believe that God makes our prayers known to them". He alleges also the authority of St. Catharine of Bologna who "whenever she desired any favour had recourse to the souls in purgatory, and was immediately heard".

VIII. UTILITY OF PRAYER FOR THE DEPARTED.—It is the traditional faith of Catholics that the souls in purgatory are not separated from the Church, and that the love which is the bond of union between the Church's members should embrace those who have departed this life in God's grace. Hence, since our prayers and our sacrifices can help those who are still waiting in purgatory, the saints have not hesitated to warn us that we have a real duty toward those who are still in purgatorial expiation. Holy Church through the Congregation of Indulgences, 18 Dec., 1885, has bestowed a special blessing on the so-called "heroic act" in virtue of which "a member of the Church militant offers to God for the souls in purgatory all the satisfactory works which he will perform during his lifetime, and also all the suffrages which may accrue to him after his death" (Heroic Act, vol. VII, 292). The practice of devotion to the dead is also consoling to humanity and eminently worthy of a religion which seconds all the purest feelings of the human heart. "Sweet", says Cardinal Wiseman (lecture XI), "is the consolation of the dying man, who, conscious of imperfection, believes that there are others to make intercession for him when his own time for merit has expired; soothing to the afflicted survivors the thought that they possess powerful means of relieving their friend. In the first moments of grief, this sentiment will often overpower religious prejudice, cast down the unbeliever on his knees beside the remains of his friend and snatch from him an unconscious prayer for rest; it is an impulse of nature which for the moment, aided by the analogies of revealed truth, seizes at once upon this consoling belief. But it is only a flitting and melancholy light, while the Catholic feeling, cheering, though with solemn dimness, resembles the unfailing lamp, which the piety of the ancients is said to have hung before the sepulchres of their dead."

EDWARD J. HANNA.

Purgatory, St. PATRICK's, Lough Derg, Ireland. This celebrated sanctuary in Donegal, in the Diocese of Clogher, dates from the days of St. Patrick, but it is also known as the Lough Derg pilgrimage, named from Lough Derg, a sheet of water covering 2200 acres, about thirteen miles in circumference, and 450 feet above sea level, on which are eleven islands, the principal of which are Saints Island and Station Island. The sanctuary lands on Saints Island were known in the Middle Ages as Termon Dabheoc (from the sixth-century St. Dabheoc who presided over the retreat), and were subsequently

called Termon Magrath from the family of Magrath, who were *coarbs* or stewards of the place from 1290. St. Patrick's connexion with the purgatory which bears his name is not only a constant tradition, but is supported by historical evidence, and admitted by the Bollandists. In 1130, or 1134, the Canons Regular of St. Augustine were given charge of Lough Derg—it being constituted a dependent priory on the Abbey of Sts. Peter and Paul, Armagh. Its fame became European after the knight Owen's visit in 1150, although it had been previously described in 1120 by David, the Irish rector of Würzburg. Numerous accounts of foreign pilgrimages to St. Patrick's Purgatory are chronicled during the thirteenth, fourteenth, and fifteenth centuries, including the vision related in the "Legenda Aurea", printed in 1482.

In 1470, Thomas, Abbot of Armagh, got the priory *in commendam*, and in 1479 the community had almost died out, the revenues being farmed by Neill Magrath. Pope Alexander VI ordered the cave to be closed on Saints Island, and the papal decree was executed on St. Patrick's Day, 1497. A few years later, in 1502, the station was transferred to Station Island, where the Purgatory had originally existed. The cave was visited by a French knight in 1516, and by the papal nuncio, Chiericati, in 1517. Chiericati gives an interesting account of his visit, and relates that there were three Austin Canons in the priory. Though formally suppressed by the English Government in 1632, the lay owner permitted the Austin Canons to resume their old priory, and in 1660 we find Rev. Dr. O'Clery as prior, whose successor was Father Art Maccullen (1672-1710). The Franciscan Friars were given charge of the Purgatory in 1710, but did not acquire a permanent residence on the Island till 1763, at which date they built a friary and an oratory dedicated to St. Mary of the Angels. In 1780 St. Patrick's Church was built, and was subsequently remodelled. From 1785 the priory has been governed by secular priests appointed by the Bishop of Clogher. In 1813 St. Mary's Church was rebuilt, but it was replaced by the present Gothic edifice in 1870, and a substantial hospice was opened in 1882. The number of pilgrims from 1871 to 1911 has been about 3000 annually, and the station season lasts from June to 15 August. The station or pilgrimage lasts three days, and the penitential exercises, though not so severe as in the days of faith, are austere in a high degree, and are productive of lasting spiritual blessings.

Purification of the Blessed Virgin Mary, FEAST OF THE. See CANDLEMAS.

Purificator. See ALTAR, sub-title ALTAR LINENS; CHALICE.

Purim (PHURIM).—The origin of the name is disputed: some derive it from the Persian *pure* (part lot), or *pur* (full); others from the Aramaic *purah* (root *parar*, to break into pieces). The feast was instituted to commemorate the deliverance of the Jews from the machinations of Xerxes's minister, Haman, who had obtained from the king an edict for their extermination, date of the massacre, 13 Adar, being appointed by lot (Esth., ix, 26). Through the intercession of Esther, Jewess and queen of the realm, the edict was recalled, and on 13 Adar the Jews, certain of royal protection, defended themselves and killed a large number of their enemies (ix, 16). In Susa (then the Persian capital) Jewish vengeance reigned for two days, in other parts of the realm for one day (ix, 17, 18). Hence the Purim was celebrated

on 15 Adar in Susa, and in other parts on 14 Adar. Reuss (Gesch. des Alten Test., § 473) identifies it with "Nicanor Day", and holds the Book of Esther responsible for the name Purim, but this theory is refuted by the "Mégillah Ta'anith" (second century, A. D.), where 13 Adar is still called "Nicanor Day". Fürst (Kanon des A. T.) and Meier (Heb. Wörterb.) identify the feast with the Persian spring festival, which the Jews are supposed to have adopted in Susa; the Book of Esther is then a mere allegory, intended to cast a national halo about the feast. Von Hammer (Wien. Jahrb. Lit., 1827) calls the Purim a transformation of the Zoroastrian feast *Farwadiġân* (Festival of the Dead), observed during the last ten days of the year. Lagarde (Beitrag zur Gesch. der Religion, 1887) elaborated this theory and brought to its support linguistic considerations of little value. Grätz (Monatschr. Gesch. u. Wiss. der Jud., xxxv, 10-12) derives Purim from *purah* (winepress), and accordingly identifies the feast with the observance of the Greek and Roman Bacchanalia, forgetting that the wine season is passed when the Purim is celebrated. Others, like Zimmern (Zeitschrift für d. alttest. Wiss., 1891), Jensen (Wiener Zeitschr. für die Kunde des Morgenlandes, VI, 47-209), and Wildeboer ("Comment. on Esther" in Marti's "Kurzer Handcomm.", p. 173) wish to make the Book of Esther a mere metamorphosis of mythological legends. These hypotheses, however, have a very weak and doubtful historical basis.

Originally the Purim was celebrated without liturgical services. Later the Book of Esther, the *Mégillah par excellence*, was read on the evening of the vigil and on the morning of the feast. When the name of Haman occurs in the reading, the congregation hisses, stamps, and gesticulates, shouting: "Let his name be blotted out! Let the name of the wicked perish!" The reader names ten sons of Haman in one breath to indicate that they died at the same moment. The vigil is observed by a strict fast called the "fast of Esther". The feast is celebrated with great solemnity, gifts being exchanged. Sometimes, however, the feast degenerated into an occasion for debauchery and licence, gruesome details (e. g. the burning on a gibbet of an effigy of Haman) being added to the diversions. At times a cross was burned to manifest hatred for the Christians (Cod. Theodos., XVI, viii, 18). When the feast occurred in an intercalary year it was celebrated twice: on 15 Adar (Little Purim) and on 15 Ve-adar (Great Purim). This feast was generally observed as early as the time of the Machabees (II Mach., xv, 37) and Josephus (Antiq., XI, vi, 13). The Purim frequently contributed to the preservation of the Jewish faith, when in imminent danger. To this fact the Cairene Purim and the Purim Vincent bear witness. The first commemorates the deliverance of the Jews in Cairo (1524); the latter in Frankfort (1616).

CHARLES L. SOUVAY.

Puritans.—One of the chief difficulties in studying the various movements loosely spoken of as Puritanism is to frame an exact definition capable of including the varied and sometimes mutually inconsistent forms of belief usually classified under that name. In its original meaning it signified "those who strove for ■ worship purified from all taint of popery" (Maitland, *op. cit. inf.*, 590). A more recent writer adopting and expanding this definition adds: "The many various sects and persons who fall under this definition, were usually characterized both

by an aversion from gaiety and by a passionate love of civic freedom" (Trevelyan, *op. cit. inf.*, 60). We may see the first beginnings of English Puritanism in the attitude of those who in 1563 entered into the "Vestiarian Controversy" by opposing the use, by the clergy, of the cap and gown in daily life and of the surplice in church. English exiles from Geneva were active in the cause, and by 1565 their resistance to the queen's wishes subjected some of them to loss of benefices. This controversy of rights and vestments developed into a controversy of polity, until Presbyterianism emerged in antagonism to Episcopalianism. Yet in the process the movement developed on such divergent lines that Puritanism soon included three different theories of Church government. First there were the moderates who were willing to retain government by bishops, though they preferred the title "superintendent", but who wished the usages of the Establishment to conform more nearly to Genevan practices. Those who held this system were in agreement with the Scottish Presbyterianism which had been established by John Knox. Secondly there were the strict Presbyterians who wished for the Calvinistic form of government as well as the theology and order of worship. In England the movement was led by Thomas Cartwright of Cambridge, whose doctrine that there should be equality of authority and that bishop and presbyter were all one was soon adopted in Scotland. Thirdly there were the Free Churchmen or Independents who repudiated all coercive power in the Church and wished all men to be free in forming congregations. Their leader was Robert Brown, whose followers were at first persecuted by Anglicans and Presbyterians alike, but whose descendants grew in power and influence until under Oliver Cromwell they became the predominant party.

The three bodies differed from one another in doctrine, in ecclesiastical polity, and in their view of toleration. The strength of Puritanism as common to these three bodies lay in the results effected by the general study of the Bible, in which the Puritans learned the relations of man with God as exemplified in the histories and parables of Holy Writ. This private study of the Scriptures was carried on by the aid of private interpretation which inevitably resulted in the multiplication of minor sects such as Fifth Monarchy men, Levellers, Diggers, and others. Thus Puritanism could never attain a recognized dogmatic system. At first it shared many Calvinistic views with the theologians of the Established Church, but these were abandoned by some and Calvin's doctrines were rejected first by the Baptists and afterwards by the Quakers and the Unitarians. However, the lack of a consistent theology was the less felt because of the great stress which the Puritans laid upon "serving God in spirit and in truth"—by feeling and conduct rather than by doctrine. This spirit is most pronounced in the Puritan works which achieved the highest popularity: Bunyan's "Pilgrim's Progress", George Foxe's "Journal", Thomas Ellwood's "History of My Own Life" and Baxter's "Saint's Everlasting Rest". In matters of Church government some kind of system became necessary and the Scottish Presbyterians evolved a plan, embodied in the First Book of Discipline which had been drawn up in the Edinburgh Assembly of 1560, and which was concerned chiefly with the congregation itself. This was supplemented by the Second Book of Discipline of 1578 which regulated the dependence of the congregation on the higher courts. By it Presbyterianism was fully established; for the superintendents were abolished and all authority was transferred from individual ministers to four bodies, the Kirk Session, the Presbytery, the Provincial Synod, and the General Assembly.

The English Puritans regarded this system from two diametrically opposed points of view. It was approved by the Presbyterians and condemned by the Independents. But for a time they were kept united by the common necessity of opposing the alliance between the High Church party and the Crown which took place under James I. The struggle became political, and the Arminianism, Episcopalianism, and divine right of the sovereign maintained by the one party were opposed by the Calvinism, Presbyterianism, and Republicanism of the other. When the enactments of the Long Parliament had resulted in victory for the Puritans, their own internal differences clamoured for settlement and the Westminster Assembly of 1643 was an unsuccessful attempt at composing them. The four parties, Moderate Presbyterians, Scottish Presbyterians, Erastians, and Independents having quarrelled fiercely, agreed on a compromise favouring the Moderates. The Presbyterians, however, gradually lost ground, owing to the growing power of the Independents who had the strong support of Cromwell and his army. They in their turn were destroyed as a political power by the Restoration, since when Puritanism ceased to be a force in England under that name, and survived only in the various Nonconformist sects which have increased and multiplied in number down to the present day, without, however, any augmentation of collective strength. Many of these bodies have long ceased to represent Puritanism in any respect save that of dissent from the Established Church. One of the most picturesque incidents in the history of Puritanism and one of far reaching influence on subsequent American history was the departure of the "Pilgrim Fathers"—seventy-four English Puritans and twenty-eight women—who sailed from England in the May Flower and landed on Plymouth Rock, 25 December, 1620. There they founded a colony, representing both types, the Plymouth colony being Congregationalists, the Massachusetts Bay settlers, Presbyterians.

EDWIN BURTON.

Pusey and Puseyism.—Edward Bouverie Pusey, b. at Pusey House, Berkshire, 22 Aug., 1800; d. at Ascot Priory, Berkshire, 16 Sept., 1882; divine of the Established Church of England, patristic scholar, voluminous writer, preacher and controversialist, after whom the "Catholic" revival among Anglicans was termed Puseyite. His father, Philip Bouverie, was the youngest son of the first Viscount Folkestone; his mother was Lady Lucy Sherard, daughter of the fourth Earl of Harborough. The family was of Huguenot descent. In 1807 he went to school at Mitcham in Surrey and began the course of education which made him afterwards a deeply learned man, according to the older, uncritical, but massive scholarship of the seventeenth century. From Mitcham he passed to Eton in 1812. Always delicate, shy, and serious, he made few friends and took little part in boys' games. In January, 1819, he proceeded to Christ Church, Oxford, where he was destined to spend his life, except for an interval of study abroad. He formed an attachment, while a mere youth, to

Maria Barker whom he married in 1828 after vicissitudes which almost shook his reason, and which revealed the intensely emotional character of Pusey's temperament. His affections counted for much in the part that he played as a champion of orthodoxy; but his principles were sternly held, and to them he sacrificed more than one friendship. He became an enormous reader, cultivated acute verbal accuracy, showed no turn for metaphysics, and was always religious-minded.

At Easter, 1822, he took a First Class with distinction, one of the examiners being John Keble. He was elected Fellow of Oriel in 1823; won the Latin Essay in 1824; and at Bishop Lloyd's instance went off next year to Germany, intending to combine the study of languages with a theological training. He attended lectures by Eichhorn, made acquaintance with Hengstenberg and Tholuck, learned something from Schleiermacher, and brought home a tinge of Liberalism in theology which did not go deep. His affinities were with devout mystics; he admired the teaching of Spener and was himself a pietist, feeling kindly at all times towards the English "Evangelicals". In 1826-27 he paid a second visit to Berlin etc. and became an excellent Arabic scholar under Freitag.

His long and almost unbroken career of controversy was opened by the volumes (1828, 1830), afterwards withdrawn, in which he defended German religion against H. J. Rose. Both writers had the same object in view; they became friends; and Pusey's covert intention was to warn Englishmen against the dangers of Rationalism. The Tractarian movement found him in sympathy with Newman, but he did not join it formally until 1835. His tracts on Holy Baptism (67-8-9) were, like all Pusey's writings, too long, but impressive from their weight of erudition and pleading earnestness. He neglected style, was often obscure, and could not throw himself into the mind of his opponents. "Imperturbably sanguine", he took the movement to be simply Anglican; hence, when it betrayed tendencies towards Rome he was shocked, but not alarmed. The friendship between himself, Keble, and Newman, romantically devoted to one another, made them triumvirs in an agitation of which the double issue became only by degrees apparent. In 1840 the world talked of "Puseyism", and with a sure instinct, for Newman had gone upon the solitary path where the High Church host would not follow him. But, although with hesitations, it followed Pusey. During the Hampden troubles (1836) he had fought for Catholic dogma and denounced the Nominalism which made short work of creeds. His position never wavered. It was founded, he said, on the teaching of the Fathers "anterior to the separation of East and West". When Tract 90 appeared he upheld it on principle as giving a Catholic interpretation, i. e. the sanction of antiquity, to the Thirty-Nine Articles. He acted on Newman's behalf in the negotiations with the Bishop of Oxford. But when the Bench of Bishops charged against the Tract, their condemnations, which Newman reckoned to be the voice of the Church, left Pusey undismayed.

He was himself suspended from preaching by the authorities of the university, in consequence of his sermon on the Holy Eucharist in 1843. The proceedings were flagrantly unjust as well as grotesque, and they helped to destroy the old Oxford constitution. Pusey, like other great scholars, was very simple-minded; he let himself be circumvented by the astute Provost Hawkins and put in the wrong. However, in 1846 he repeated from the same pulpit his former doctrine, which was in its drift Anglican, while much of the language had been taken from St. Cyril of Alexandria. Newman's submission to the Catholic Church in October, 1845, though a stunning

blow, did not break their friendship, even when their correspondence was interrupted for years. But it threw upon Keble and Pusey the task of maintaining under assaults from Catholics, Evangelicals, and Broad Churchmen, what they conceived to be the "pure and Apostolic" doctrines of the Prayer Book, for this was in effect their rule of faith. Neither admitted the principle of development; both allowed the Roman primacy, but insisted on the independence of local Churches; and they saw in the papal claims, as in modern "Marian" devotions, a departure from antiquity. There was never any likelihood that they, as individuals, would enter the Catholic fold.

Pusey's unbounded activities, under domestic trials and continual bad health, were directed, from 1843 onwards, to the restoration of piety on these lines. He took a leading part in the fierce battles which raged round Hampden's appointment to Hereford (1846), the Gorham Case (1850), the Denison Trial (1854), Essays and Reviews (1861), the Purchas Judgment (1871), the Athanasian Creed (1873-74), the public Worship Bill (1874), the Bonn Conference of Old Catholics (1876), the Ridsdale Case (1877), the Lambeth Conference and habitual Confession (1878), Dr. Farrar on Everlasting Punishment (1879), and many other topics of dissension between members of his own Church. The argument was invariably an appeal to the Fathers, to English divines of the Laudian school, and to the verdict of ecclesiastical as distinct from lay tribunals. Again, it was Pusey who, by his preaching and extensive practice, made private confession the feature which it has now become of Anglican religious life. With help from the remarkable Miss Sellon he founded sisterhoods, largely increased since his time. As a work of penance he built and endowed St. Saviour's, Leeds; but most of the clergy attached to it came over to Rome, and he suffered grievous things on that account from the impetuous Dr. Hook. With so-called "Ritualism" he had little fellow-feeling; it was a younger and less learned movement which thrust his friends aside. But he influenced many through Canon Liddon; and during his last twenty years exercised a sway over his own party which made of him a gentle dictator to the English Church Union. After Keble's death in 1866 he was the patriarch of High Churchmen, holding no preferment but his canonry, revered as a saint, and in secret leading the most austere of lives. His penances, charities, and studies were alike distinguished for their unsparing self-sacrifice.

Though a convinced Anglican, he prayed and wrought on behalf of "Reunion", as he understood it, which was a different idea from that of submission, simply and without making terms, to the Holy See. In pursuance of this object he put forth his "Eirenicon" in 1865. Newman in a gracious answer happily described it as an "olive branch from a cata-pult". It offended Catholics by its handling of the cultus of Our Lady; it provoked the average Protestant, and even men like Dean Church, to utter the cry of "scandal" over various unfortunate quotations; but Pusey had never been able to calculate the effect of his arguments on any who differed from him. A second and third pamphlet, addressed not very pertinently to Newman, exhausted the subject. In 1869, on the eve of the Vatican Council, Pusey and Bishop Forbes of Brechin joined in a fresh effort towards conciliation; but their communications with Archbishop Darboy, Bishop Dupanloup, and Father de Buck, S.J., bore no fruit. There was a divergence on first principles which the council made so clear that after 1870 Pusey gave up all thought of re-union. He would not countenance the Old Catholics, who, as the event proved, were forsaking the standard of dogma. Pusey remained faithful, as Keble did, to the conception of the Via Media, while

others have drawn nearer to Rome and seem willing, if they might keep their orders, to accept the whole of the papal teaching without demur.

Pusey's works have never been collected; there is a complete bibliography in Vol. IV of his Life by Liddon (pp. 394-446). That copious work also includes a large selection from his correspondence. Of purely scientific or professional undertakings may be noted his "Catalogue of Arabic MSS. in the Bodleian" (1835), "The Minor Prophets" (1860), "Daniel the Prophet" (1864). This latter treatise was held on its appearance to contain the best defence of the traditional views regarding the Book of Daniel.

Life, in 4 vols., begun by LIDDON, finished and published by JOHNSTONE, WILSON, NEWBOLT (London, 1893-97). See also bibliographies under NEWMAN; OXFORD MOVEMENT.

WILLIAM BARRY.

Pustet, the name of a family of well-known Catholic publishers. The original home of the Pustets was the Republic of Venice, where the name Bustetto is common even to-day. Probably in the seventeenth century, the founder of the Ratisbon line emigrated to South Germany, where one of his descendants, Anton Pustet, lived as a poor bookbinder in the Lower Bavarian borough of Hals (near Passau) at the close of the eighteenth century. To him and his wife Anna (*née* Scheueröcker) was born on 25 March, 1798, a son, Friedrich. Having learned bookbinding under his father, Friedrich started a small book-store in Passau in 1819, and in 1822 founded a separate printing establishment. This business developed so favourably, thanks to Pustet's energy and skill, that, in 1826, he was able to transfer his publishing business to Ratisbon. Establishing business relations with prominent Catholic authors, he extended the range of his publications to all branches of literature, while paying special attention to theology. In 1830 he married Theresa von Schmid; ten children were the fruit of this marriage. To extend his business undertakings, in 1833 Pustet set up one of the first printing-machines, and in 1836 erected near Ratisbon a paper factory, for which he procured the first paper machine in Bavaria. In 1845 he began printing liturgical works; with this he associated a department for church music, with the co-operation of Dr. Proske, for the purpose of carrying out the latter's ideas for the reform of ecclesiastical music. Men like Dr. Witt, Dr. Haberl, Haller, later rendered valuable services in this department. In 1860 he handed over the business to his sons Friedrich (b. 1831), Karl (b. 1839), and Klemens (b. 1833), and two years later acquired in Munich the Royal Bavarian Central Schoolbook-Publishing Company, which he conducted until 1874. He died on 5 March, 1882. Inheriting their father's ability, the sons continued the extension of the business. Friedrich chose for his department liturgical publications, Karl German works, and Klemens the paper factory. The success of Friedrich earned for him in 1870 the title "Typographus S. R. Congregationis"; among various other distinctions, the firm was entrusted by the Vatican with the world-famous *editio typica* of all the liturgical works. After a most successful business activity, which extended also to politico-religious life, Friedrich died on 4 August, 1902. Klemens had died before him (1898), and Karl's death followed on 17 January, 1910. The last, who was a Privy Counsellor of Commerce, had raised the German publications of the firm to the highest repute; among its publications may be mentioned the "Regensburger Marienkalender" and the illustrated family magazine, the "Deutscher Hausschatz". The present heads of the Pustet firm are Friedrich Pustet, son of Friedrich, and Ludwig, son of Karl. Among the model productions of the firm may be also mentioned the illustrated monthly, "Der Aar", appearing since October, 1910. It remains to add that branch firms

have been established in New York (1865), Cincinnati, Ohio (1867), and Rome (1898).

FRIEDRICH PUSTET.

Putative Marriage.—Putative (Lat., *putativus*, supposed) signifies that which is commonly thought, reputed, or believed. A putative marriage, consequently, in canon law is a matrimonial alliance which is commonly reputed to be valid, and is sincerely believed by one at least of the contracting parties to be ■ in the eyes of the Church, because entered into in good faith; but which in reality is null and void, owing to the existence of a diriment impediment. The Church too in her external forum recognizes such ■ marriage, until its invalidity be proved; and concedes to the children born thereof the rights of legitimacy.

GASPARRI, *De Matrimonio*, I, nn. 47, 1375 (3rd ed., Paris, 1904); ROSSET, *De Sac. Matr.*, n. 17.

ANDREW B. MEEHAN.

Puteanus, ERYCIUS (ERRICK DE PUT), b. at Venloo, in Dutch Limbourg, 4 Nov., 1574; d. at Louvain, 17 Sept., 1646. A Belgian humanist and philologist, he studied at the schools of Dordrecht and Cologne (Collège des Trois-Couronnes), where he took the degree of Master of Arts, 28 Feb., 1595. He then followed, at Louvain, the lectures on ancient history given by Justus Lipsius. In 1597 he repaired to Italy, and lived in intimacy with the learned men of that country, especially the famous Cardinal Federigo Borromeo, through whom he was appointed professor of Latin at the Palatine School of Milan from 1600 to 1606, when the States of Brabant offered him the chair left vacant by Lipsius at Louvain. He taught with éclat at the Collège des Trois-Langues for forty years, and was loaded with favours by reigning princes: the Archduke Albert appointed him his honorary counsellor (1612), and increased his annual pension by 200 ducats (1614), and added the reversion of Château-César. At the same time he filled, after 1603, the post of historiographer to King Philip IV, on behalf of the Milanese, with other appointments, often ill-paid in consequence of a treasury depleted by continual wars. His rash language provoked political animosities, and he was almost driven into exile by request of King James I of England, who wrongly believed him to be the author of an injurious lampoon.

His family numbered seventeen children, of whom four died in infancy. The services he rendered to his native Guelders, the Low Countries, and individuals were considerable. Puteanus was an encyclopedist; his ideal, which saw in numerous and varied acquirements the fullest measure of wisdom and the surest means of arriving at virtue the end of all knowledge, had been suggested to him by his master Justus Lipsius. During a certain period of his literary activity (1603-19), he detached himself from Lipsius by aiming at personal leadership of a school. He dreamed of re-establishing in Belgium the splendid classical period and the cult of eloquence which he had derived from Italy. When he saw the uselessness of his efforts, the indifference of a too utilitarian age inclined towards positive sciences, he again threw himself into encyclopedic authorship and produced his best chronological works. His merit ■ a philologist is somewhat limited; but his dissertations, reproduced in the *Thesauri* of Græviue and Gronovius, are of real value and may still be consulted. As a whole, his influence on Belgian philology has been unfortunate.

For the history of the numerous writings and editions of Erycius Puteanus see ROERSCH and VANDERHAECHEN in *Bibliotheca Belgica* (1904-5), nos. 166, 167, 168, 171; also ROERSCH in *Biographie Nationale de Belgique*, XVIII (1904); SIMAR, *Etude sur Erycius Puteanus* (Louvain, 1909).

Putzer, JOSEPH, theologian and canonist, b. at Rodaneck, Tyrol, 4 March, 1836; d. at Ilchester, Md., 15 May, 1904. He entered the Congregation of the Most Holy Redeemer and made his religious profession, 14 Aug., 1856. Having finished his theological studies at Mautern, Austria, he was ordained 7 Aug., 1859. He arrived in New York, 7 Aug., 1876, was assigned to St. Alphonsus', Baltimore, until 1880, and was occupied in parish work at St. Michael's church until 1884, when he was chosen Superior of St. Mary's, Buffalo, and in 1887 was called to Ilchester, Md., to occupy the chair of moral theology and canon law. With great learning, he possessed a fund of genuine, solid piety, of which humility and simplicity were characteristic traits. His opinion was constantly sought on questions of theology and canon law; he wrote frequently for periodicals and journals, generally signing his articles: "J. P." He is best known by his "Commentarium in Facultates Apostolicas", five editions, first undertaken by Father Konings. Father Putzer revised and enlarged it into practically a new work. On its appearance the "Civiltà Cattolica" (7 Oct., 1893) and "Il Monitore" (31 Aug., 1897) among others praised its clearness, depth, precision, and learning. Father Putzer also published an "Instructio de confessariis religiosorum exemptorum" (two editions) and "Jubilæum anni 1901—Commentarium". He left an abundance of unpublished manuscripts. The "American Ecclesiastical Review" says of him that he is entitled "to the gratitude of all who believe themselves debtors to Holy Church. His memory, his judgment, his keen power of analysis were rarely at fault in difficult questions of moral theology."

C. J. WARREN.

Puvis de Chavannes, PIERRE, French painter, b. at Lyons, 14 Dec., 1824; d. at Paris, 24 Oct., 1898. Through his father Puvis was Burgundian—"Burgundian salt", says the proverb, that is the strongest French race, which produced such men as Bossuet, Buffon, and Lamartine. His Lyonnaise idealism, which he inherited through his mother, never allowed him to lose the sense of the real, his dreams were always possible and probable. His vocation was slow in manifesting itself. His parents intended him for the Ecole Polytechnique, and he was twenty-three years old when after his return from a first journey to Italy he showed the inclination to paint. Determining to adopt art as a profession, he studied for a year without much profit in the studio of Henry Scheffer, the brother of Ary, and afterwards entered

JOSEPH PUTZER

those of Delacroix and Couture. Another sojourn in Italy, where he remained a year, fixed his ideas and determined his creed. He returned convinced of the artistic dignity and great eminence of decorative painting. The art of the great Italian masters, their manner of expressing in large compositions stamped with simplicity, the marvellous thoughts and the beliefs common to a period or a people, was thenceforth the object which he set about realizing for his contemporaries. Without being positively Christian his inspiration preserves a clearly spiritual character. In the midst of the materialistic invasion of the second half of the nineteenth century Puvis (with Eugène Carrière) was the noblest champion of religious art in France. As a painter his originality freed him from early influences and tendencies. In a sense he was really self-taught. While admiring Delacroix, he detested the Romantic anarchy, with its disordered passions, and despised academic conventions, the timid taste and feeble ideas of the so-styled classicals. If he was in sympathy with any section of the school, it was doubtless with the small group of landscape painters. In view of the importance with which he endowed landscape, the atmosphere which he instils into his frescoes, his liking for familiar horizons and lowly countrysides, together with his way of depicting and ennobling them, it seems evident that Puvis studied Corot. Finally in the paintings of Théodore Chassériau the young artist found an ideal similar to his own, a kindred spirit and a model for his Amiens pictures.

Puvis's first "Salon" was a "Pietà" exhibited in 1852, but he was constantly rejected for some years afterwards. His already remarkable pictures, such as his "Salome" or his "Julia", shocked the public by a determined absence of shadows (as in mosaics) and by an hieratic and Byzantine strangeness. At the Salon of 1859 he showed a "Return from the Hunt" (Museum of Marseilles), which is a striking work of youthful, heroic, barbarous movement. A great decorative talent became more and more evident in these stray works. Then came the opportunity to paint a hall for a private citizen: "At last", said the artist, "I have water to swim in." Henceforth he forced himself to that regimen of work which he observed all his life, the regimen of a Carthusian or cenobite in art; one meal a day at about seven in the evening, two rapid walks lasting an hour before and after work between his dwelling at Montmartre and his studio at Neuilly, sessions of nine or ten hours of incessant work, in the evening, reading, drawing, music, and conversation with his friends. Several journeys interrupted this regular life.

It is not known to whom the merit belongs of having singled out the young painter and appointed him to the work which was his true vocation, nor who commissioned him to paint the frescoes of the staircase in the museum of Amiens, but it was through this chance that Puvis undertook the work which became his true sphere, that of monumental painting. In 1861 appeared "War" and "Peace"; in 1863 "Work" and "Rest"; in 1865 these were completed by a new work "Ave Picardia Nutrix". There is nothing simpler or nobler than these paintings. They

are considered by more than one authority his best work, and in any case are the manifestation of a singularly new art. He showed an admirable faculty for generalization, a power of expressing life in universal features without cold allegories or romantic disturbances, while retaining a rustic realism and accent. But because of its very novelty, its mural simplicity, this new and vigorous work created astonishment and scandal, with which the artist had to contend for many years. Still sharper criticisms were aroused by his "Autumn", "Sleep", "Harvest" (1870), and especially by the "Poor Sinner" (Salon of 1875), in which the touching archaism had the effect of a challenge. Puvis was accused of not knowing how to paint or draw. His ideas and projects seemed incomprehensible and like a defiance of public taste. There was no attempt to understand the methods of synthesis and simplification due to the particular circumstances of fresco; these pieces being persistently regarded from

PIERRE PUVIS DE CHAVANNES
Engraved by Lafosse, 1868

the same standpoint as the other Salon pictures. The result was a prolonged misunderstanding lasting fifteen years, during which much ink was wasted. Finally the intelligent initiative of the Marquis de Cheunevières, the best director of the fine arts France has ever had, afforded the unjustly criticised painter the opportunity for a decisive triumph. This was in connexion with the paintings of the "Childhood of St. Genevieve" (1876-8), in the ancient church of that name, now the Pantheon. All that had been misunderstood at the Salon became clear here, all that, seen at close range amid factitious surroundings, had seemed a defect vanished and acquired a meaning in the perfect accord of the work with the monument. For the first time it was perceived that decoration had its own laws and that in this light each of the artist's apparent weaknesses became a charm

and a necessity. Thenceforth the master held a unique position in the French school. Without the title he was a sort of painter laureate. During his last twenty years each of his successive works increased his henceforth undisputed reputation; they were "Ludus pro patria" (1880-2), for the Museum of Amiens; "Doux pays" (1882), for M. Leon Bonnat; for the Lyons Museum, the "Sacred Wood Dear to the Arts and Muses" (1884) with the "Antique Vision", "Christian Inspiration", the "Saône" and the "Rhône" (1886); "Inter artes et naturam" (Rouen Museum); "Summer", "Winter", "Victor Hugo Presenting his Lyre to Paris", for the Paris Hôtel de Ville (1893-5), and his last pictures, two new scenes from the legend of St. Genevieve: "St. Genevieve Revivifying the Parisians" (1897) and "St. Genevieve Watching over Paris" (1898). After an interval of twenty years this last picture met with the same popularity as that which had welcomed the first scene of the "Childhood". It is a sublime picture, showing a single figure, in a monastic costume, standing erect and motionless in the night, watching over the blue roofs of the sleeping city.

During this last portion of his life the master exercised a wholly new jurisdiction over art; without being the leader of a school, or even strictly speaking having disciples, his word was law. To him the Government had recourse on solemn occasions, for instance the

decoration of the vast and grandiose hemicycle of the new Sorbonne (1887-9). Large cities, such as Paris, Lyons, Rouen, Bordeaux, Marseilles, followed the example of Amiens, and when Boston (U. S. A.) wished to decorate the monumental staircase of its library it was Puvis de Chavannes who was chosen to execute that great work (1896). All these works breathe the same love of noble ideas, the same confidence in the higher destinies and ideals of the human race; it may even be said that what the theological painters of the Middle Ages wrought in the Spanish Chapel and what Raphael did for the Renaissance in the Camera della Segnatura, Puvis did in our era. He wrought his "Parnassus" and his "School of Athens", different it is true from those of old, but equally beautiful and sacred. He never lacked clear, ingenious and definite symbols for the plastic expression of general ideas. He upheld the rights of the ideal in the modern world, making it known and detaching it from dreams, art, and poetry. He always had an unshakable faith in the holiness of the spiritual side of humanity and in the supreme importance of continuous search, aspiration, and unrest which form the moral capital of our race. As an artist he did much to maintain religion among men. After the death of Meissonier (1894), Puvis was elected by acclamation to the presidency of the National Society of French Artists. He was commander of the Legion of Honour. The moral dignity and the rectitude of his character and his life increased the respect paid to the artist and the thinker. He married the Princess Marie Cantacuzene whom he had met in Chassériau's studio. He survived her by only a few months. His last work, the lovely "Watch of St. Genevieve", reproduces her features and consecrates the memory of that charming companion. It is perhaps this sorrow mingled with an immortal hope which imparts to this supreme work a haunting poetry and unforgettable beauty. (See PARIS, coloured plate.)

Puy. See LE PUY, DIOCESE OF.

Puyallup Indians, an important tribe of Salishan linguistic stock, formerly holding the territory along the river of the same name entering near the head of Puget Sound, Washington, and now occupying an allotted reservation, together with several kindred tribes, in the neighbourhood of Tacoma, Pierce County. Their near neighbours, the Nisqually, speak a dialect of the same language. The name is said to mean "shadow", referring to the dense forest shades, and to have been applied originally to the country about the mouth of the stream.

The tribes of the Puget Sound region made acquaintance with Catholic priests and laymen as far back as the advent of the Spanish explorers in 1774-95, and from the accompanying Franciscans obtained rosaries and crucifixes which they still treasured sixty years later. This Catholic memory was kept up through the French Canadians in the service of Mackenzie, Fraser, and the Hudson Bay Company. In 1838 the secular missionaries, Norbert Blanchet and Modeste Demers, arrived on the Columbia from Canada, making headquarters at Fort Vancouver, from which point Father Demers in 1839-41 visited the tribes northward along Puget Sound, instructing and baptizing many. In 1843 another secular, Father Jean-Baptiste Bolduc, made another successful tour of Puget Sound and lower Vancouver Island. In 1847

arrived the first party of Oblates destined for the same mission, chief among whom was the famous Father Casimir Chirouse, the Apostle of Tulalip (d. 1891). In 1854 they joined with other tribes of that region in the treaty of Medicine Creek, by which they gave up their free range and agreed to come upon the reservation assigned them. In the next year they joined the Nisqually and others in the general outbreak of the Washington tribes, known as the Yakima War, which was not finally brought to an end until 1858, when the work of civilization and Christianization was again taken up; but it has been sadly checked by the demoralization consequent upon the removal of reservation restrictions under the recent Individual Allotment Act. Upon this point both official and mission authorities agree. With whiskey and pauperization by white swindlers the end seems not far off. More than half of the tribe are classed as Catholic, and besides the Government reservation school, the St. George mission school, established in 1888, and in charge of a secular priest assisted by six Franciscan sisters and a lay teacher, has an attendance of sixty pupils of the several confederated tribes. From perhaps 800 souls sixty years ago the Puyallup have decreased to 556 in 1900 and 461 in 1910. In aboriginal custom and belief they resembled the Tulalip tribes.

Pyrker, JOHANN LADISLAUS VON OBERWART (FELSÖ-EÖR), b. at Langh near Stuhlweissenburg, Hungary, 2 Nov., 1772; d. at Vienna, 2 Dec., 1847. He was descended from an old Hungarian noble family. His father was one of the eighteen brave hussars who distinguished themselves in the battle of Kunersdorf. Graduated from Stuhlweissenburg and Fuenfkirchen, he applied for a civil service position in Ofen, but was unsuccessful. In 1792 he entered the Cistercian chapter house at Lilienfeld, where he was ordained priest (1796). In quick succession he was steward, chancellor, prior, abbot, for a time, parish priest at Tünnitz, and brought the monastery to the greatest material and spiritual prosperity. He was appointed Bishop of Zips (1818), Patriarch of Aquileia and Primate of Dalmatia with his see in Venice (1820), and finally Archbishop of Erlau, earning the love and veneration of his diocesans. He founded health resorts in Karlsbad and Gastein for sick soldiers, a seminary for country school teachers at Erlau, and donated 10,000 florins toward the adornment of the cathedral at Erlau. His great collection of paintings forms the basis of the Hungarian National Museum. For these charitable gifts he was knighted by the emperor with the title of Felsö-Eör.

Pyrker wrote dramatic, epic, and lyric poetry. His first dramatic work, "Historische Schauspiele", appeared in 1810, and contained three five-act tragedies: "Die Corvinen", "Karl der Kleine, König von Ungarn", and "Zrinis Tod". It was not even considered worthy of discussion or criticism, and the various editions of his collected works do not contain the dramas. The "Tunisia", an epic in twelve cantos, describing the conquest of Tunis by Charles V, appeared in 1820, and there have been frequent later editions. A sketch of a "Tunisia" with striking resemblances was found in the textbooks of the Jesuit Jacob Masen. It is possible that the Jesuit's textbook (*Palæstra eloquentiæ*) was used at the time of Pyrker's youth. Another epic, "Rudolphias", glorifies Rudolph of Hapsburg, and was printed in Vienna in 1824. Grillparzer dramatized the same material in his "Ottokars Glück und Ende", which has many similarities with the well-known "Ode to Hapsburg" written by the Latin poet Avancini, S.J., probably read in the

ST. GENEVIEVE WATCHING OVER THE SLEEPING CITY
PUVIS DE CHAVANNES, THE PANTHEON, PARIS

schools at the end of the eighteenth century. Pyrrker also wrote several short stories: "Die Perlen der heiligen Vorzeit" (1821); "Bilder aus dem Leben Jesu und der Apostel" and "Legenden der Heiligen auf alle Sonntage und Festtage des Jahres" (1842). As a lyric poet Pyrrker published only a few monographs, e. g. "Lilienfelds Freude", and "Lieder der Sehnsucht nach den Alpen" (1845).

Pyrrhonism, a system of scepticism, the founder of which was Pyrrho, a Greek philosopher, about whom very little is known except that he died in 270 B. C. The best known of Pyrrho's disciples was Timon of Philius, known as the sillographer. Pyrrho's scepticism was so complete and comprehensive that the word Pyrrhonism is sometimes used as a synonym for scepticism. The scepticism of Pyrrho's school covered three points. (1) All the dogmatists, that is to say, all the philosophers who believed that truth and certitude can be attained, were mere sophists; they were self-deceived and deceivers of others. (2) Certitude is impossible of attainment, not only because of the possibility that our faculties deceive us, but also because, in themselves, things are neither one thing nor the other, neither good nor evil, beautiful nor ugly, large nor small. Or, rather, things are both good and evil, beautiful and ugly, large and small, so that there is no reason why we should affirm that they are one thing rather than the other. This conviction was expressed in the famous saying, *οὐδὲν μᾶλλον*, nothing is more one thing than another; the paper is not more white than black, the piece of sugar is not more sweet than bitter, and so forth. (3) The reality of things being inaccessible to the human mind, and certitude being impossible of attainment, the wise man doubts about everything; that is, he recognizes the futility of inquiry into reality and abstains from judging. This abstention is called *ἐποχή*. It is the foundation of happiness. Because he alone can attain happiness who cultivates imperturbability, *ἀταραξία*; and then only is the mind proof against disquietude when we realize that every attempt to attain the truth is doomed to failure.

From this account of the principles of Pyrrhonism, it is evident that Pyrrho's aim was ethical. Like all the philosophers of the period in which he lived, he concerned himself principally with the problem of happiness. The Stoics sought to found happiness on the realization of the reign of law in human nature as well as in nature. The Epicureans grounded happiness on the conviction that transitory feeling is the one important phenomenon in human life. The Eclectics placed the intellectual basis of happiness in the conviction that all systems of philosophy are equally true. The Pyrrhonist, as well as the other sceptics of that period, believed that there is no possibility of attaining happiness unless one first realizes that all systems of philosophy are equally false and that the real truth of things cannot be attained. Pyrrhonism is, therefore, an abdication of all the supposed rights of the mind, and cannot be dealt with by the ordinary rules of logic or by the customary canons of philosophical criticism.

WILLIAM TURNER.

Pythagoras and Pythagoreanism.—Pythagoras, the Greek philosopher and mathematician and

founder of the Pythagorean school, flourished about 530 B. C. Very little is known about the life and personality of Pythagoras. There is an abundance of biographical material dating from the first centuries of the Christian era, from the age of neo-Pythagoreanism, but, when we go back to the centuries nearer to Pythagoras's time, our material becomes very scanty. It seems to be certain that Pythagoras was born at Samos about the year 550 or 560 B. C., that he travelled to Magna Græcia in Southern Italy about the year 530, that he founded there a school of philosophy, and that he died at Metapontum in Sicily. The detailed accounts of how he invented the musical scale, performed miracles, pronounced prophecies, and did many other wonderful things, belong to legend, and seem to have no historical foundation. Similarly the story of his journey into Egypt, Asia Minor, and even to Babylon is not attested by reliable historians. To the region of fable belongs also the description of the learned works which he wrote and which were long kept secret in his school. It is certain, however, that he founded a school, or, rather, a religious philosophical society, for which he drew up a rule of life. In this rule are said to have been regulations imposing secrecy, a protracted period of silence, celibacy, and various kinds of abstinence. The time-honoured tradition that Pythagoras forbade his disciples to eat beans, for which various reasons, more or less ingenious, were assigned by ancient and medieval writers, has been upset by some recent writers, who understand the phrase, "Abstain from beans" (*κνάμων ἀπέχετε*), to refer to a measure of practical prudence, and not to a gastronomic principle. Beans, black and white, were, according to this interpretation, the means of voting in Magna Græcia, and "Abstain from beans" would, therefore, mean merely "Avoid politics"—a warning which, we know, was warranted by the troubles in which the school was involved on account of the active share which it took during the founder's lifetime in the struggles of the popular with the aristocratic party in Southern Italy. The school was instructed by its founder to devote itself to the cultivation of philosophy, mathematics, music, and gymnastics, the aim of the organization being primarily ethical. The theoretical doctrines taught by the master were strictly adhered to, so much so that the Pythagoreans were known for their frequent citation of the *ipse dixit* of the founder. Naturally, as soon as the legends began to grow up around the name of Pythagoras, many tenets were ascribed him which were in fact introduced by later Pythagoreans, such as Philolaus and Archytas of Tarentum.

It seems to be certain that, besides prescribing the rules that were to govern the society, Pythagoras taught: (1) a doctrine of transmigration of souls which he probably borrowed from the Bacchic and Orphic mysteries, the whole spirit of the doctrine being religious and ethical, intended to show, by successive incarnations of the soul in the bodies of different animals a system by which certain vices and virtues were to be punished and rewarded after death; (2) in a general way, the doctrine that mathematics contains the key to all philosophical knowledge, a germ, so to speak, which was afterwards developed into an elaborate number-theory by his followers; and (3) the notion that virtue is a harmony, and may be cultivated not only by contemplation and meditation but also by the practice of gymnastics and music. The subsequent elaboration of these three central doctrines into a complicated system is the work of the followers of Pythagoras. The Pythagorean philosophy in its later elaboration is dominated by the number-theory. Being the first, apparently, to observe that natural phenomena, especially the phenomena of the astronomical world, may be expressed in mathematical formulas, the

Pythagoreans were carried on by the enthusiasm characteristic of discoverers to maintain that numbers are not only the symbols of reality, but the very substance of real things. They held, for example, that one is the point, two the line, three the surface, and four the solid. Seven they considered to be the fate that dominates human life, because infancy ceases at seven, maturity begins at fourteen, marriage takes place in the twenty-first year, and seventy years is the span of life usually allotted to man. Ten is the perfect number, because it is the sum of one, two, three, and four—the point, the line, the surface, and the solid. Having, naturally, observed that all numbers may be ranged in parallel columns under "odd" and "even", they were led to attempt a similar arrangement of the qualities of things. Under odd they placed light, straight, good, right, masculine; under even, dark, crooked, evil, left, feminine. These opposites, they contended, are found everywhere in nature, and the union of them constitutes the harmony of the real world.

The account given by the Pythagoreans of the "harmony of the spheres" is the best illustration of their method. There are, they said, ten heavenly bodies, namely, the heaven of the fixed stars, the five planets, the sun, the moon, the earth, and the counter-earth. The counter-earth is added because it is necessary to make up the number ten, the perfect number. It is a body under the earth, moving parallel with it, and, since it moves at the same rate of speed, it is invisible to us. The five planets, the sun, the moon, and the earth with its counter-earth, moving from west to east at rates of speed proportionate to the distance of each from the central fire, produce eight tones which give an octave, and, therefore, a harmony. We are not conscious of the harmony, either because it is too great to be perceptible by human ears, or because, like the blacksmith who has grown accustomed to the noise of his hammer on the anvil, we have lived since our first conscious moments in the sound of the heavenly music and can no longer perceive it. In their psychology and their ethics the Pythagoreans used the idea of harmony and the notion of number as the explanation of the mind and its states, and also of virtue and its various kinds. It was not these particular doctrines of the school so much as the general notion which prevailed among the Pythagoreans of the scope and aim of philosophy, that influenced the subsequent course of speculation among the Greeks. Unlike the Ionians, who were scientists and related philosophy to knowledge merely, the Pythagoreans were religiously and ethically inclined, and strove to bring philosophy into relation with life as well as with knowledge. Aristotelianism, which reduced philosophy to knowledge, never could compete, in the estimation of its advocates, with Christianity, as neo-Pythagoreanism did, by setting up the claim that in the teachings of its founder it had a "way of life" preferable to that taught by the Founder of Christianity.

Pyx.—The word pyx (Lat., *pyxis*, which transliterates the Greek, *πύξις*, a box-wood receptacle, from *πύξος*, box-tree) was formerly applied in a wide and general sense to all vessels used to contain the Blessed Eucharist. In particular it was perhaps the commonest term applied to the cup in which the Blessed Sacrament actually rested when in the Middle Ages it was suspended above the altar. Thus the Custumal of Cluny in the eleventh century speaks

of the "deacon taking the golden pyx (*auream pyxidem*) out of the dove (*columba*) which hangs permanently above the altar". In later times however it has come about that the term pyx is limited in ordinary usage to that smaller vessel of gold, or silver-gilt, in which the Eucharist is commonly carried to the sick. Such vessels are sometimes made flat like a watch, sometimes mounted upon a little stand like a miniature ciborium. From the resemblance in size and shape the word pyx is also used to denote the small silver vessel or *custode* in which the Sacred Host is commonly kept in the Tabernacle, that it may be transferred thence to the monstrance when the Blessed Sacrament is exposed for the service of Benediction. In the Middle Ages pyxes for carrying the Eucharist to the sick were not unfrequently made of ivory. In spite of synodal decrees it is to be feared that there were many churches both in medieval

Pyx

and later times which preserved no proper pyx for taking Viaticum to the sick. In these cases the custom seems to have prevailed, even if it was not officially tolerated, of carrying the Host wrapped in a corporal in a burse which was suspended round the priest's neck or even of placing it between the leaves of a breviary.

The "pyx-cover", or "pyx-cloth", of which we sometimes read in medieval inventories, was a veil which hung over the pyx as it was suspended above the altar, and it was consequently a cloth of considerable size. At the present day the pyx when carried secretly to the sick, as is the case in most Protestant and many Catholic countries, is generally carried in a burse or pyx-bag, i. e. a silken bag suspended round the priest's neck within which the pyx is wrapped in a diminutive corporal used for that purpose.

PYX CLOTH

Q

Quadragesima (Lat., the fortieth) denotes a season of preparation by fasting and prayer, to imitate the example of Christ (Matt., iv). Several such were observed by the early Christians, viz. before Christmas, Easter, and the feast of St. John the Baptist; the Greeks had four, the Maronites six, and the Armenians eight (Du Cange, "Gloss."). The major, before Easter, is commonly known. It is mentioned in the fifth canon of the Council of Nicæa, in the sixty-ninth of the Apostolic Canons, and in the Pilgrimage of Ætheria (Duchesne, 499). In the Anglo-Saxon Church Mass was said on the weekdays of Quadragesima late in the afternoon and food was taken only near sunset (Rock, IV, 76). According to the Roman Rite, the *feriæ* of this time, beginning with Ash Wednesday, are major (see *FERIA*). The season has a proper preface. In ferial masses a special oration is added after the ordinary postcommunion, with the invitation: "Humiliate capita vestra Deo". Octaves are forbidden, and if, by special concession, they are allowed they must be interrupted on Sundays. The first Sunday of Lent, known as *Invocabit* from the first word of the Introit, is for the Greeks a commemoration of the veneration of images (19 Feb., 842). For Gaul it was the *jour de bures* or *fête des brandons* and for Germany *Funkentag* or *Halffeuer*, because on that day the young people ran about the streets with burning torches (Nilles, II, 102). The second Sunday, *Remiscere*, was marked by the Greeks as *vacat* (Nilles, II, 122). The third Sunday, *Oculi*, was for the Greeks *Adoratio Crucis* with a ceremony similar to that of the Latins on Good Friday. For the Bohemians it was the *Ned. Kychávná* in memory of the sneezing plague at the end of the sixth century and of *Litania septiformis* of Gregory the Great. The remaining Sundays are *Lætare*, Passion and Palm Sunday (q. v.). (See also *LENT*; *SEPTUAGESIMA*.)

FRANCIS MERSHMAN.

Quadratus, the first of the Christian apologists. He is said by Eusebius (Chron. ad ann. Abrah. 2041, 124 A. D.) to have been a disciple of the Apostles (*auditor apostolorum*). He addressed a discourse to the Emperor Hadrian containing an apology for the Christian religion, during a visit which the latter made to Athens in 124 or 125. With the exception of a short passage quoted by Eusebius (Hist. Eccl., IV, iii), this apology has entirely disappeared. Eusebius states (Chron.) incorrectly, however, that the appeal of Quadratus moved the emperor to issue a favourable edict. Because of the similarity of name some scholars have concluded (e. g. Bardenhewer, "Patrology", p. 46) that Quadratus the apologist is the same person as Quadratus, a prophet mentioned elsewhere by Eusebius (Hist. Eccl., III, xxxvii). The evidence, however, is too slight to be convincing. The later references to Quadratus in Jerome and the martyrologies are all based on Eusebius or are arbitrary enlargements of his account.

Quality (Gr. ποιότης—Plato, Aristotle—ποιόν; Lat. *qualitas*, *quale*) is used, 1st, in an extended sense, as whatever can be attributed to the subject of discourse; and 2nd, in its exact signification, as that category which is distinguished from the nine others enumerated by Aristotle. In the present article the word is treated in its stricter sense. The eighth chapter of the "Categories" treats of quality, as distinct from substance and the other predicaments. It is described, however, in the opening words of the sixth chapter of the same book as that on account of which we say that anything is such or such—ποιότητα δὲ λέγω, καθ' ἣν ποιοῦντι τινες εἶναι λέγονται. It is thus the accidental form which determines the subject to a special mode of being. It is the reply to the question *Qualis sit res?*, as St. Thomas Aquinas remarks; and is the correlative to *Talis* (as *Quantus* to *Tantus*), as is pointed out by James Mill in his "Analysis". As the notion is a simple one, it is not possible strictly to define it; for, to do this, it would be necessary to split it up into genus and *differentia*—an impossibility where the simplest concepts are concerned. It is itself not a real genus, since many particular things, not generically identical, can be subjects of the same predicate, analogically employed. Quality is the category according to which objects are said to be like or unlike; and, in view of the tendency introduced into modern science by the mechanist theories of Descartes, and fostered by the postulate of the transformation of energy, it is of importance that the qualitative should be distinguished from the quantitative differences of objects (cf. QUANTITY). Aristotle's classification of the heads of discourse in the "Categories" is a logical one, in which the attributes are considered as possible predicates of a subject. But they are further understood metaphysically; and, in this sense, quality is one or other of the four modes in which substance is determined to being *talis* or *talis*, i. e. such or such. Considered thus, it is an accidental determination (cf. FORM).

The four divisions of quality are: (1) Habit, or condition (*habitus*); a permanent and comparatively stable quality by which man, considered as to his nature or operation, is well or ill-adapted towards his natural end. Strictly speaking, only man can be the subject of habit. It is thus distinguished from disposition; which is used of other than human beings. Less stable conditions, as hot, cold, sick, well, are also mentioned here. (2) Natural powers or incapacities (*potentia activa et impotentia*). These are distinguished, as accidents, from the substance; and are further distinguished among themselves as are the distinct acts from which they are inferred. The important Scholastic thesis of the real distinction of nature from its faculties arises in this connexion. (3) Power of causing sensations and results of the modification of sense; the one belonging, as quality, to the objects of sense; the other to the senses that are modified. (4) Figure, or circumscribing form of extended bodies. St. Thomas Aquinas insists upon the fact that this mode of quality (morphology) is the most certain index of the identity or diversity of species, especially in plants and animals. Quality admits in the concrete, though not in the abstract, of more and less; and in some cases, though not in all,

of contrariety. A figure cannot be more or less triangular than another, though one man may be more wise than another; and there is no contrary to red; though just is contrary to unjust. The category, in its predicamental sense, involves that of relation, ■■ is noted by Aristotle. The answer to *Qualis?* asked of the concrete man, is *talis*—such as so-and-so. Metaphysically considered, no relation of this kind need be involved. The substance, or nature, is *talis* because of the accidental form that determines it absolutely, without reference to any standard of comparison.

FRANCIS AVELING.

Quamichan Indians, the largest of the numerous small bands attached to Cowichan agency, at the south-east end of Vancouver, British Columbia. They are of Salishan stock and speak the Cowichan language, which is spoken also by several of the associated bands as well as upon the opposite mainland. Their chief settlement is in Cowichan valley, about forty miles north of Victoria. In their primitive condition they subsisted by fishing, hunting, and the gathering of wild berries and roots. Their customs, beliefs, and ceremonials were practically the same as those of their neighbours, the Songish and Sechelt. Frs. J. B. Bolduc and Modeste Demers visited them as early as 1847, but they were chiefly converted by the Oblate Fathers, who arrived at Victoria in 1857. They are now civilized, industrious, and moral, in fairly good houses, living by farming, fishing, hunting, and by working on the railway, in canneries, etc. From probably 1000 souls sixty years ago, they have been reduced by smallpox and other diseases to 300 in 1901, and 260 in 1909, of whom all but about 60 are reported to be Catholics, the rest Methodists (see also SONGISH INDIANS).

JAMES MOONEY.

Quam singulari, a decree of the Sacred Congregation of the Sacraments, 8 August, 1910, on the age at which children are to be admitted to first Communion, officially promulgated 15 August, 1910 (*Acta Apost. Sedis*, 15 August, 1910). The historical facts narrated in the "*Quam singulari*" prove that (a) it is not a decree inaugurating a new discipline, but one restoring the ancient and universal law of the Church, wherever it has not been observed (Pius X to Card. Abp. of Cologne, 31 December, 1910); (b) the custom of giving Holy Communion to infants immediately after baptism, and frequently before the beginning of their rational life, has been modified but never condemned; it is even approved to-day among the Greeks and Orientals; (c) the decree of the Fourth Lateran Council (1215, can. xxi) has never been revoked or modified, and in virtue of it all are obliged, as soon as they arrive at the years of discretion, to receive both the Sacraments of Penance and Holy Communion at Easter time; (d) the "testimony of the greatest authority, St. Thomas Aquinas", interpreting the Council, states that the Lateran decree obliges "children when they begin to have some use of reason" (also Ledesma, Vasquez, St. Antoninus); (e) the Council of Trent confirmed the Lateran decree pronouncing anathema against all who deny "that the faithful of both sexes who have attained the use of reason are obliged to receive Holy Communion every year, at least at Easter time" (Sess. XIII, de Euch., c. viii, can. ix).

Errors condemned by the "*Quam singulari*".—(a) A greater discretion is required for first Communion than for first Confession. (b) To receive Holy Communion a more complete knowledge of the articles of

Faith is required. This erroneous opinion, demanding with Jansenism (1) extraordinary preparation, thereby deferring Communion "for the riper age" of twelve, fourteen, or even older ("absolutely forbidden"), makes (2) "the Holy Eucharist a reward and not a remedy for human frailty", which is contrary to the teaching of the Council of Trent that Holy Communion is "an antidote by which we are freed from our daily faults and preserved from mortal sins". The error assumes (3) what may be false—that riper years and more complete instruction give better dispositions than the innocence and candour of more tender years. As first Communion is not essentially different from any other Communion the extraordinary preparation heretofore demanded is (4) contrary to the "*Sacra Tridantina*", which for daily communicants, including children, requires only the state of grace and a good intention.

Abuses following from errors.—(a) Depriving the child from the beginning of its rational life of the right of living in Christ through Holy Communion, a right given by baptism; (b) causing the loss of angelic first innocence in many by those years of deprivation of Christ and of graces, years for many the seed-time for snares and vices, all of which might have been avoided; (c) causing, by the custom of some places, children to live in the state of sin by not allowing them to go to confession until the age determined for first Communion, or of denying them absolution when they confessed ("absolutely condemned" and "to be done away with by ordinaries as the law permits"); (d) denying the Viaticum to dying children who had not received their first Communion, and burying these as infants, thereby depriving them of the suffrages of the Church, to which they were entitled ("utterly detestable", "ordinaries to proceed severely against these").

Conditions for first Confession and first Communion.

—(a) The age of discretion, which applies equally to both sacraments. This may be judged (1) by the first indication of the child using its reasoning powers; (2) by the child knowing what is right from wrong. No determined age is placed as a condition; the age of seven is mentioned because the majority of children arrive at the years of discretion, that is, begin to reason, about this period, some sooner, some later. (b) A knowledge such as a child just beginning to reason can have about one God, Who rewards the good and punishes the wicked, and about the mysteries of the Trinity and the Incarnation. It is not necessary that the child should commit to memory accurate theological definitions, which may convey no idea to the little mind just beginning to unfold. (c) A child must be able to distinguish the Eucharistic from the common bread; that is, to know that what looks like bread is not bread, but contains the real, living Body and Blood of Christ. (d) Children should be taught to receive Holy Communion devoutly. (e) Children should be instructed on the necessity of being in the state of grace and of having a good intention, also (f) of fasting from midnight before Communion.

Obligation of admitting children to first Communion.

—When children begin to reason, the obligation of receiving Holy Communion is Divine as well as ecclesiastical. The subject-matter of the decree (a) is therefore a grave one obliging under serious sin, (1) children themselves if they know of and maliciously neglect their obligation; (2) those responsible for the children: father, mother, instructors, rectors of colleges, principals of schools, superiors of communities and children's asylums, all who have parental responsibility, confessors, and pastors. (b) A grave obligation devolving on all above mentioned is to encourage children after first Communion to approach the altar frequently, even daily, if possible. Those (c) responsible for children should regard as "their most important duty" that the incomplete instruction given before first Communion

be continued afterwards by sending the children to the public catechetical instructions, or by supplying their religious instruction in some other way. The formal admission of the child to first Communion rests with the father, or the one taking his place, and with the confessor. The decree supposes these to act together, and when they agree on the admission no one may interfere. Where the parents are negligent or indifferent or opposed to their children's first Communion, the confessor can assume the entire responsibility. Should the confessors oppose the admission of children whose parents know they have begun to reason, the prudent course in practice is to present the children to another confessor, for every confessor has a right to admit a child to private first Communion.

General Communion.—A public ceremony devolving not on the confessor but on the parish priest, who is required to have yearly one or several of these general Communions, which may be simple or solemn. The simple (a) will admit the (1) little children making their first Communion, also (2) those who have previously approached the Holy Table. The decree requires some days of instruction and preparation for both classes of children when they receive in a body. This can be given as conditions and circumstances permit, attention being paid to the spirit and substance of this provision. Every pastor can arrange a solemn ceremony in which those would participate who had completed a course in Christian Doctrine. Every year during the time the faithful can satisfy their Easter duty, the "*Quam singulari*" must be read to the people in the vernacular. Every five years in their *ad limina*, ordinaries will be obliged to report the observance of the decree to the Holy See.

JOHN T. MCNICHOLAS.

Quanta Cura. See SYLLABUS OF PIUS IX.

Quantity (Gr. ποσόν; Lat. *quantitas*, *quantum*, correlate to *tantum*). Aristotle, in his "*Categories*", places quantity (with which he deals at length from the logical standpoint in the sixth chapter) first in his enumeration of the nine accidents. His list of the possible heads of classification of predicates has reference to a concrete, material subject, and, as shown by the last two predicaments (*jacere* and *habere*), principally to man. Quantity does not, therefore, as philosophy is at present divided, fall properly under the treatment of ontology, but of cosmology. It presupposes the material. In "*Metaphysics*", IV, the concrete *quantum* is described as "that which is divisible into the parts included in it, of which any and each is potentially one and *hoc quid*". By this description the in-existent parts of the *quantum* are discriminated from the elements in the compound, the matter and the form, which are not each potentially "one and *hoc quid*". Quantity is distinguished into (1) continuous, and (2) discrete. Continuous (geometrical) quantity is that which consists of parts having position in reference to each other, so that the limit of the one is the limit of the next. These parts, each potentially "one and *hoc quid*", do not form a multitude, an aggregate of units, but one divisible *quantum*, or measurable size. They are not actual entities. (This doctrine is not unanimously held in the School.) Continuous quantity is further subdivided into (1)

successive, and (2) permanent. Time and movement are examples of successive, the line, surface or tridimensional body of permanent continuous quantity. It is to be noted that time and movement have no reality apart from quantified things which move, and of which the movement is measurable; and that the line and superficies are no more than abstractions practised upon the real *quantum*—tridimensional body. Discrete (arithmetical) quantity is made up of discontinuous parts. The resultant whole is a unity *per accidens*, in which the elements coexist as a plurality. Number and speech are given as examples. Quantity has no contrary, nor does it admit degrees. There is no contrary to a given length or superficies; nor is any one quantity, as such, more a quantity than another is. Large, small, etc., as used in reference to extended things, fall more properly under the category of relation. Equal and unequal are affirmed of objects in virtue of their quantity alone. Not only is material substance affected by the accidental form of quantity; but all the other accidents are measurable, at least *per accidens*, as when we say "much and little white". St. Thomas ("*Summa*", III, Q. lxxvii, a. 2) makes all the accidents "related to their subject by the medium of dimensive quantity, as the first subject of colour is said to be the superficies".

An important question is raised as to the nature of the distinction to be drawn between substance and quantity. The School generally, following Aristotle, holds that, as quantity is that reality which makes the indivisible substance potentially divisible (Physics, l. 2), the distinction to be admitted is a real one. There is considerable diversity of opinion as to whether this can be demonstrated by arguments of natural reason. Aristotle's own argument lies in the consideration that length, breadth, and depth are quantities, but are not substances. But against this it has been urged that these things do not exist as such at all. They are abstractions formed by the dissociation produced by varying concomitants. Suarez, Pesch, De San, Nys, and others hold that the distinction is demonstrable; but most of the arguments advanced are negative ones. For Descartes and his school, quantity, or extension, is the essence of corporeal substance. The distinction to which allusion has just been made has no place in the system (cf. DESCARTES). The definition of the Council of Trent, however, teaches that quantity is really distinct from substance. It is of faith that the substances of bread and wine in the Eucharist are changed at the consecration (Sess. XIII, cap. iv); but the quantity remains sensibly unaltered. To escape this difficulty, the Cartesians had recourse to several explanations, none of which seems to be in any way satisfactory. Continuous quantity is seen to be, in the philosophy of the School, an attribute and accident of body. Corporeal substance, as such, is not quantitatively divisible. When actuated by quantity it becomes so; but is not yet spatially displayed. The accident is thus distinguished by Scholastics from the further accident of formal extension which is complementary to it, and by which the parts, already rendered distinct by quantity, are localized in space. Through the aptitude to being determined by this accidental form, matter is held to be individuated; the principle of individuation of corporeal beings is *materia quantitate signata*.

FRANCIS AVELING.

Quapaw Indians.—A tribe now nearly extinct, but formerly one of the most important of the lower Mississippi region, occupying several villages about

the mouth of the Arkansas, chiefly on the west (Arkansas) side, with one or two at various periods on the east (Mississippi) side of the Mississippi, and claiming the whole of the Arkansas River region up to the border of the territory held by the Osage in the north-western part of the state. They are of Siouan linguistic stock, speaking the same language, spoken also with dialectic variants, by the Osage and Kansa (Kaw) in the south and by the Omaha and Ponca in Nebraska. Their name, properly Ugakhpa, signifies "down-stream people", as distinguished from Umahan or Omaha, "up-stream people". To the Illinois and other Algonquian tribes they were known as Akansea, whence their French name of Akensas and Akansas. According to concurrent tradition of the cognate tribes the Quapaw and their kinsmen originally lived far east, possibly beyond the Alleghenies, and, pushing gradually westward, descended the Ohio River—hence called by the Illinois the "river of the Akansea"—to its junction with the Mississippi, whence the Quapaw, then including the Osage and Kansa, descended to the mouth of the Arkansas, while the Omaha, with the Ponca, went up the Missouri.

The Quapaw, under the name of Capaha or Pacaha, were first encountered in 1541 by de Soto, who found their chief town, strongly palisaded and nearly surrounded by a ditch, between the Mississippi and a lake on the Arkansas (west) side, apparently in the present Phillips County, where archæologic remains and local conditions bear out the description. The first encounter, as usual, was hostile, but peace was finally arranged. The town is described as having a population of several thousand, by which we may perhaps understand the whole tribe. They seem to have remained unvisited by white men for more than 130 years thereafter, until in 1673, when the Jesuit Father Jacques Marquette, accompanying the French commander Louis Jolliet, made his famous voyage down the Mississippi, to the villages of the "Akansea" who gave him warm welcome and listened with attention to his exhortations, during the few days that he remained until his return. In 1682 La Salle passed by their villages, then five in number, of which one was on the east bank of the Mississippi. The Recollect, Zenobius Membré, accompanying La Salle, planted a cross and attempted to give them some idea of the Christian's God, while the commander negotiated a peace with the tribe and took formal possession of the territory for France. Then, as always, the Quapaw were uniformly kind and friendly toward the French. In spite of frequent shiftings the Quapaw villages in this early period were generally four in number, corresponding in name and population to four sub-tribes still existing, viz. Ugahpahti, Uzutiuhi, Tiwadimañ, and Tañwañzhita, or, under their French forms, Kappa, Ossoteoue, Touriman, and Tonginga.

In 1683 the French commander, Tonti, built a post on the Arkansas, near its mouth at the later Arkansas Post, and thus began the regular occupation of the Quapaw country. He arranged also for a resident Jesuit missionary, but apparently without result. About 1697 a smallpox visitation greatly reduced the tribe, killing the greater part of the women and children of two villages. In 1727 the Jesuits, from their house in New Orleans, again took up the work, and Father Du Poisson was sent to the Quapaw, with whom he remained two years. On the morning of 27 November, 1729, while on his way to New Orleans on behalf of his mission, he was preparing to say Mass at the Natchez post on request of the garrison, when the signal for slaughter was given and he was struck down in front of the altar, the first victim in the great Natchez massacre. In the ensuing war, which ended in the practical extermination of the Natchez, the Quapaw rendered efficient ser-

vice to the French against the hostile tribes. A successor (Father Cavette) was appointed to the Arkansas mission, but details are unknown. It was vacant in 1750, but was again served in 1764 by Father S. L. Meurin, the last of the Jesuits up to the time of the expulsion of the order. Fathers Pierre Gibault (1792-94), Paul de St. Pierre (c. 1795-98), and Maxwell undoubtedly attended the Indians.

Shortly after the transfer of the territory to the United States in 1803 the Quapaw were officially reported as living in three villages on the south side of Arkansas River about twelve miles above Arkansas Post. In 1818 they made their first treaty with the government, ceding all claims from Red River to beyond the Arkansas and east of the Mississippi, with the exception of a considerable tract between the Arkansas and the Saline, in the south-eastern part of the state. In 1824 they ceded this also, excepting eighty acres occupied by the chief Saracen (Sarrasin) below Pine Bluff, expecting to incorporate with the Caddo of Louisiana, but in this they were disappointed, and after being reduced to the point of starvation by successive floods in the Caddo country about Red River, most of them wandered back to their old homes. In 1834, under another treaty, they were removed to their present location in the north-east corner of Oklahoma. Sarrasin, their last chief before the removal, was a Catholic and friend of the Lazarist missionaries (Congregation of the Missions) who arrived in 1818 and ministered alike to white and Indians. He died about 1830 and is buried adjoining St. Joseph's Church, Pine Bluff, where a memorial window preserves his name. The pioneer Lazarist missionary among the Quapaw was Rev. John M. Odin, afterward Archbishop of New Orleans. In 1824 the Jesuits of Maryland, under Father Charles Van Quickenborne, took up work among the native and immigrant tribes of the present Kansas and Oklahoma. In 1846 the Mission of St. Francis was established among the Osage, on Neosho River, by Fathers John Shoenmakers and John Bax, who extended their ministration also to the Quapaw for some years. The Quapaw together with the associated remnant tribes, the Miami, Seneca, Wyandot and Ottawa, are now served from the Mission of "Saint Mary of the Quapaws", at Quapaw, Okla., in charge of a secular priest and several Sisters of Divine Providence, about two-thirds of the surviving Quapaw being reported as Catholic. From perhaps 5000 souls when first known they have dwindled by epidemics, wars, removals, and consequent demoralization to approximately 3200 in 1687, 1600 in 1750, 476 in 1843, and 307 in 1910, including all mixed bloods.

Besides the four established divisions already noted, the Quapaw have the clan system, with a number of gentes. Polygamy was practised, but was not common. Like the kindred Osage they were of ceremonial temperament, with a rich mythology and elaborate rituals. They were agricultural, and their architecture and general culture when first known were far in advance of that of the northern tribes. Their towns were palisaded and their "town houses", or public structures, sometimes of timbers dovetailed together, and roofed with bark, were frequently erected upon large artificial mounds to guard against the frequent inundations. Their ordinary houses were rectangular, and long enough to accommodate several families each. They dug large ditches, constructed fish weirs, and excelled in the pottery art and in the painting of skins for bed covers and other purposes. The dead were buried in the ground, sometimes in mounds or in the clay floors of their houses, being frequently strapped to a stake in a sitting position and then carefully covered with earth. They were uniformly friendly to the whites, while at constant war with the Chickasaw and other southern tribes, and are described by the earlier explorers as differing

from the northern Indians in being better built, polite, liberal, and of cheerful humour. Their modern descendants are now fairly prosperous farmers, retaining little of their former habit or belief. Of the Quapaw dialect proper, little has been recorded beyond some brief vocabularies and word lists, but of the so-called Dhegiha language, including the dialects of the Omaha, Ponca, Osage, Kansa, and Quapaw, extended study and publication have been made, particularly by Rev. J. O. Dorsey under the auspices of the Bureau of American Ethnology (see Pilling, "Siouan Bibliography").

JAMES MOONEY.

Quarantines is an expression frequently used in the grants of indulgences, and signifies a strict ecclesiastical penance of forty days, performed according to the practice of the early Church. Hence an indulgence of seven quarantines, for instance, implies the remission of as much temporal punishment as would be blotted out by the corresponding amount of ecclesiastical penance.

A. J. MAAS.

Quaresmius, FRANCISCUS, writer and Orientalist of the seventeenth century, b. at Lodi (Lombardy), 4 April, 1583; d. at Milan, 25 Oct., 1650. His father was the noble Alberto Quaresmi and his mother Laura Papa. At an early age he was enrolled among the Franciscan Observantines at Mantua. For many years he held the chairs of philosophy, theology, and canon law, and became successively guardian, *custos*, and minister of his province. Later (1645-8) he occupied the two highest posts in the order, that of definitor and procurator general. The memoirs of the order extol his consummate virtue, particularly his piety, prudence, and extraordinary meekness. His long apostolate in the East and the magnificent works he has left us have secured for Quaresmius world-wide fame, especially among earlier historians, Biblical scholars, and Orientalists. On 3 March, 1616, he went to Jerusalem, where he became Guardian and Vice-Commissary Apostolic of Aleppo in Syria (1616-8), and Superior and Commissary Apostolic of the East (1618-9). During this period he was twice imprisoned by the Turks. In 1620 he returned to Europe, but in 1625 was back in Jerusalem, whence the following year he addressed from the Holy Sepulchre an appeal to Philip IV of Spain, inviting him to reconquer the Holy Land, and at the same time dedicating to him his work, "*Hierosolymæ afflictæ*". Between 1616 and 1626 he wrote his classical work, "*Elucidatio terræ sanctæ*", adjudged by the learned a monumental contribution to history, geography, archæology, Biblical and moral science. During 1627-9 he was at Aleppo as papal commissary and as vicar-patriarch for the Chaldeans and Maronites of Syria and Mesopotamia. In 1629 he went

to Italy to render an account to the Holy See of the state of the Eastern Churches; he then returned to the East, but how long he remained is not known. Meanwhile he journeyed through Egypt and Sinai, the Holy Land, Syria, Mesopotamia, Cyprus, Rodi, Constantinople, and a large part of Asia Minor; he also visited Germany, France, Belgium, and Holland. In 1637 he was guardian of S. Angelo (Milan), where in 1643 he completed his other great work on the Passion of Christ.

No bibliographer has yet given us a complete list of his works. His published works are: (1) "*Historica, theologica et moralis terræ sanctæ elucidatio: in qua pleraque ad veterem et præsentem ejusdem terræ statum spectantia accurate explicantur*" (2 fol. vols., pp. xxx-924-98 and 1014-120, Antwerp, 1639); second edition edited by P. Cypriano da Treviso (4 pts. in 2 fol. vols., Venice, 1880-1); (2) "*De sacratissimis D. N. J. Christi quinque vulneribus, varia, pia et luculenta tractatio . . .*" [5, not 3, fol. vols.; I, 202; II, 258; III, 368; IV, 400; V, 271, besides an index of pp. 200 (Venice, 1652)], approved by the examining theologians in 1643, but unknown to bibliographers; only three copies are extant—one in the library of Brera, the Ambrosiana of Milan, and the National Library (Florence); (3) "*Jerosolymæ afflictæ et humiliatæ deprecatio ad suum Philippum IV Hispaniarum et Novi Orbis potentissimum ac Catholicum Regem*" (1 quarto vol., pp. 74, Milan, 1631), very rare; there is a copy in the Ambrosiana of Milan; (4) "*Ad SS. DD. N. Alexandrum VII Pont. Opt. Max. Fr. Francisci Quaresmii Laud. Ord. Min. Pia Vota pro anniversaria Passionis Christi solemnitate*" (1 quarto vol., pp. xx-58, Milan, 1656), of which there is one copy in the Ambrosiana; (5) "*Pro confraternitate SS. Stellarii B. Virginis Mariæ tractatus*" (1 quarto vol., Palermo, 1648); (6) "*Itinerario di Caldea del Rev. P. Francesco Quaresmio e di Fr. Tomaso da Milano suo compagno. Min. Oss. e Giov. Batt. Eliano. Maronita, ed Elia Patriarca e con li Nestoriani etc. l'anno 1629*", edited by Marcellino da Civezza in "*Storia delle Missioni Francescane*", XI, 595-608.

Still in manuscript are: (1) "*Apparatus pro reductione Chaldæorum ad catholicam fidem*" ("six manuscript volumes", says Fr. Cyprian), which Quaresmius wrote when among the Chaldeans, and to which he refers in "*Elucidatio terræ sanctæ*", I, li; (2) "*Adversus errores Armenorum*" ("three volumes in folio", says Sbaralea), preserved in the Convent of Lodi; (3) "*Deipara in Sanguine Agni dealbata*", left incomplete by the author; (4) "*Epistolæ ex oriente*", in the archives of the Propaganda Fide. These and other manuscript works are said to be preserved, some in the municipal library of Pavia and Lodi and some at Jerusalem.

Quartodecimans. See EASTER CONTROVERSY.

Quebec, ARCHDIOCESE OF (QUEBECENSIS), in Canada, comprises the counties of Beauce, Bellechasse, Dorchester, Kamouraska, Levis, L'Islet, Lotbinière, Megantic, Montmagny, part of Temiscouata, Montmorency, Portneuf, and Quebec. The early missionaries, the Récollets (1615-29) and the Jesuits (1625), depended directly on the Holy See. The Jesuits having returned alone in 1632, the Archbishop of Rouen extended his jurisdiction over the country. According to the Bull of erection (1674), the See of Quebec comprehended all the possessions of France in North America: Newfoundland, Cape

Breton, Acadia, Ile St. Jean, all New France from the Atlantic to the plains of the far West, the valley of the Mississippi and Louisiana, a territory much larger than Europe. After the treaty of Paris (1783), the Bishop of Quebec kept Newfoundland and what now forms the Dominion of Canada. That immense diocese was successively diminished by the erection of new sees until by the formation of Chicoutimi (1878) it was reduced to its present boundaries (see CANADA, CATHOLICITY IN).

Bishops.—(1) François de Montmorency Laval (q. v.), consecrated (1658) Bishop of Petráa and Vicar Apostolic of New France, landed at Quebec (1659) and, having happily overcome the pretensions of the Archbishop of Rouen, set about the organization of his diocese. His first report to the Holy See (1660) states that there were only twenty-six priests, of whom sixteen were Jesuits; eight churches or chapels in Quebec and the neighbourhood, with three others in Montreal, Three Rivers, and Tadoussac; about 2000 inhabitants. No house, no revenue for the bishop, no cathedral, and no income for churches. Two orders of nuns applied themselves to the instruction of girls: the Ursulines (founded in 1639 by Venerable Marie de

FRANCIS DE LAVAL, FIRST BISHOP OF QUEBEC

of l'Incarnation, and the Congregation of Notre Dame founded by Ven. Marguerite Bourgeoys (1659) and granted approbation by Bishop Laval in 1669 and 1676. The Sisters of St. Joseph of La Flèche kept the hospital established in Montreal (1642) by Jeanne Mance, and the Quebec Hôtel-Dieu (1639) was entrusted to the order of St. Augustine, the Sisters of the

Mercy of Jesus. Bishop Laval founded the seminary of Quebec (1663), which became a lower seminary in 1668, but had no classes before the Conquest. The pupils attended the lectures of the Jesuit college opened in 1635, and where, on the bishop's request, classes in theology were soon added to philosophy. For its maintenance the institution was granted the tithes established in 1663; parish priests and parishes were to be served by its members; what remained of tithes was devoted to the building of churches and priests' houses. The first parish erected was that of Quebec (1664) which, suppressed by the Bull of erection of the diocese, was re-established by the bishop in 1684 and united to the seminary; he also instituted a chapter. The parish church of Quebec, begun in 1647, consecrated in 1666 by the prelate, became and remains the cathedral. Eleven other parishes were erected in 1678. In 1683 eighteen priests of the seminary did parish work along the St. Lawrence. The Montreal parish, with Our Lady of Bon-Secours, was united to the seminary of the Sulpicians (1678). In Acadia, Port-Royal was served by the Abbé Petit, sent in 1676, and the Abbé Thury founded the Pentagoet mission in 1684. There were numerous Indian missions, some residential, some among wandering tribes, almost all in the hands of the Jesuits. Bishop Laval, in spite of material obstacles, faithfully visited his diocese and confirmed nearly 5000. The population (1683) was 10,278 in Canada, 600 Acadians, and 1512 converted Indians.

The census of 1686 states that there were 44 priests, 12 students in theology, 43 Jesuits, 12 Récollets (returned in 1670), 28 Ursulines, 26 Hospitallers of the Mercy of Jesus, 16 Hospitallers of St. Joseph, and 13 Sisters of the Congregation of Notre Dame.

(2) Jean-Baptiste de la Croix Chevreton de St. Vallier, b. 1653; d. 1727, visited Canada as vicar-general of Bishop Laval (1685-6) and became his successor in 1688. A yearly grant of eight thousand francs from the king enabled him to increase the number of parish priests from twenty to thirty-six. The Jesuits were entrusted with the mission of the Illinois (1690) and other Indians of that region; the Récollets, with the Royal Island (Cape Breton), and the Seminary of Quebec with Acadia and the mission of the Tamarois on the left shore of the Mississippi, which it kept until after the Conquest. Two of its members, the Abbés St. Cosme and Foucault, fell victims there to their zeal. Parishes were rendered independent of the seminary (1692). For the improvement of science in the clergy and of church discipline, ecclesiastical conferences were organized (1700), four synods held, and a ritual with a catechism published. The General Hospital of Quebec was founded (1693), also the Ursuline convent at Three Rivers (1697), which was in the meantime a hospital and a school. He approved (1688) the Charron Brothers, founders of the General Hospital of Montreal (1694). They were Hospitallers and schoolmasters and, until their extinction, half a century later, kept schools in Montreal, Three Rivers, and a few other places. Instruction was more common at that epoch than is generally admitted by historians. The Jesuits and the Sulpicians early established primary schools, teachers went about from place to place, and mostly all parish priests were schoolmasters. Though a most charitable man, he was not amiable. He had hurt the feelings of many, chiefly in the separation of parishes from the seminary (1692), and complaints had reached France. His resignation was called for by the king and, upon his refusal, he was retained in Paris several years (1694-7), and again from 1709 to 1713, after having been five years a prisoner in England (1704-9). During that voyage he had gone to Rome and obtained the canonical union to the See of Quebec, chapter, and seminary, of the abbeys of Maubec, Lestrées, and Benevent, granted by the king to Bishop Laval.

(3) Louis-François Duplessis de Mornay, b. 1663; d. 1741, coadjutor of Bishop St. Vallier (1713), and his successor (1727-33). He never went to Canada, sending, to administer in his stead, his coadjutor, Bishop Dosquet.

(4) Pierre-Herman Dosquet (q. v.), consecrated (1725) Bishop of Samos, bishop from 1733 to 1739. His chief acts were the establishment of the sisters of the congregation of Notre Dame at Louisbourg (1735) and the resignation to the king of the abbey of Benevent, more a burden than a source of revenue for the Quebec bishops. A yearly allowance of nine thousand francs was granted in return. He resigned his see in 1739, and received the abbey of Breine with an income of six thousand francs.

(5) François-Louis Pourroy de L'Auberivière, b. 1711; d. 1740, consecrated in Paris (1739) by Bishop Mornay, unfortunately died a few days after landing at Quebec.

(6) Henri-Marie de Pontbriand, b. 1708; d. 1760, was consecrated in Paris (1741). A man of great science and zeal, most devoted to his pastoral duties, he visited several times his diocese, even the distant missions of the Presentation (Ogdensburg) and Detroit, occasionally taught theology in the seminary, and established yearly retreats for priests. The new order of Grey Nuns, recently founded in Montreal by Madame D'Youville and entrusted with the General Hospital, received his encouragement and

approval (1755). He aided the victims of the plague in 1746, 1757, and 1758, enabled the Ursulines to rebuild their convent at Three Rivers, destroyed by fire (1752), and retrieved a similar disaster fallen upon the Quebec Hôtel-Dieu (1755). In his pastoral letters, he exhorted the clergy to grant to the king for his wars a part of their tithes and encouraged Canadians to do their duty to their country, recalling the fate of the Acadians in 1755. During the siege of Quebec, broken in health by work and cares, he retired to a nearby parish and could see after the surrender, his palace and the seminary, the churches of the Jesuits and the Recollects greatly damaged by bullets and shells, half of the city houses, the church of the Lower-Town and the cathedral, which he had recently (1744-9) rebuilt on a larger scale, entirely destroyed.

(7) Jean-Olivier Briand (q. v.), bishop from 1766 to 1784. One of the vicars-general charged with the administration of the diocese during the vacancy, he ruled the district of Quebec. The Canadians, by two delegates, and the chapter, by an address, had entreated the King of England to maintain the Catholic hierarchy. More successful than the Abbé Montgolfier, rejected by England, the Abbé Briand, elected by the chapter in his place, was indirectly notified that the Government would not oppose his consecration, which took place in Paris (1766). He had to thwart the intentions of England of anglicizing her new subjects in faith and language. Circumstances besides seemed most unfavourable. The population, 42,000 in 1739, was in 1760, 60,000; of 181 priests only 138 remained. The Recollects and Jesuits were forbidden to receive novices. The chapter, prevented from filling its vacancies, soon died. Canonically notified—or not (it may be doubted)—of the suppression of their order, the Jesuits were left, until the death of the last, Father Casot (1800), in peaceful possession of their estates, which were afterwards forfeited to the Crown. In Louisiana they had been all banished after 1763, with the exception of Father Meurin, and their several chapels among the Illinois destroyed, while the properties of the mission of the Tamarois were sold for a farthing by the Abbé Forget-Duverger, the last priest sent by the seminary. The Recollects disappeared one by one, Father Berey, the superior, who received an annuity of £500, dying in 1800, and the last priest of the order, in 1813. The college of the Jesuits having been changed into military stores and barracks, the hope of education rested upon the seminary of Quebec, where classes opened in 1765. The loyalty of the bishop during the American War of Independence greatly contributed to obtain religious liberty for Canada. He could write in 1775: "Religion is perfectly free. I can exercise my ministry without any restriction." As a proof that he united firmness with the respect of civil authority, it may be remembered that he refused to take the Test Oath, until the formula was made acceptable to a Catholic, and once said to General Murray: "My head shall be cut off before allowing you to appoint priests to any parish." The Government granted him an annuity of £250 besides £150 for the episcopal palace that he had rebuilt and rented for public use. With three thousand francs voted by the clergy of France in 1765, it formed nearly all his revenue. Nevertheless, he found means for frequent and abundant charities. The number of parishes was about one hundred, more than twenty-five having been erected since the Conquest. A pastoral letter of 1777 contains interesting statistics: 46,323 births and 24,731 burials from 1759 to 1769, and 43,995 births with 26,127 burials from 1769 to 1777, giving a net increase of 39,460 for the whole period between 1759 and 1777. From 1767 Bishop Briand regularly visited his diocese. He ordained ninety priests. Having been allowed by Rome, for fear of a vacancy, to choose and consecrate a coadjutor with future succession, he consecrated in

1772 the Bishop of Dorylæa and gave him authority in 1784.

(8) Louis-Philippe Mariauchau D'Esglis (q. v.) was the first Quebec bishop born in Canada. He was pastor of Saint-Pierre-d'Orléans and kept until his death his small parish. According to the Ursuline annals, in 1782 priests were very scarce and several parishes without pastors. Vacancies were quickly filled, whereas, in 1788-90, the number of parishes being 121, the census of 1790 numbers 146 priests, of whom 142 were in office. Returning Acadians settled in several of the maritime provinces and were served by Vicar-General Bourg and the Fathers Girouard, Le Roux, and Donat, of the congregation of the Holy Ghost, while the Irish and Scotch Catholics of the same region were attended by the Abbés Phelan and Jones, who resided at Halifax.

(9) Jean-François Hubert (q. v.), consecrated Bishop of Almire and coadjutor of Quebec (1786),

HOUSE IN QUEBEC WHERE THE NUNS OF THE HÔTEL DIEU AND THE URSULINES LODGED ON THEIR ARRIVAL FROM FRANCE IN 1637, NOW KNOWN AS THE HOTEL BLANCHARD

filled the see from 1788 to 1797. Every year he spent three months visiting the religious communities and a part of his diocese. In 1795 he visited Baie-des-Chaleurs. He ordained 53 priests and confirmed 45,148 people. The number of priests, in 1794, was 160 for a population of 160,000 Catholics. During the French Revolution, 34 came from France. Nine were sent to Acadia and four to Upper Canada. The seminary of Montreal, on the verge of ruin, obtained recruits, and kept possession of its estates, which, thanks to the firmness of Bishops Plessis and Panet, were declared, under Queen Victoria, its lawful property. Bishop Hubert, to please Lord Dorchester, appointed coadjutor the Abbé Bailly de Messein, parish priest of Pointe-aux-Trembles (Portneuf co.), consecrated Bishop of Capsa in 1789. A distinguished man in some regards, successful missionary in Acadia (1767-71), professor of the seminary (1772-7), and afterwards (1778-82) private teacher of the governor's children, he favoured the establishment of the mixed university contemplated by some New England loyalists settled in Canada, and which Bishop Hubert considered and firmly opposed as an anti-Catholic agency. The coadjutor died in 1794, apologizing for his errors. Another and different coadjutor was chosen, Pierre Denault, to whom Bishop Hubert resigned his authority in 1797.

(10) Pierre Denault (q. v.) was pastor of Longueuil and kept his parish even after his consecration as Bishop of Canathe (1795). The parishes of Lower Canada numbered then about one hundred and forty, some of which he visited every year. He also visited Upper Canada in 1801 and 1802, and created, for English-speaking Catholics, the parishes of St. Andrew and St. Raphael, which he entrusted to Rev.

Alex. McDonell. On his visit to the maritime provinces in 1803, he confirmed 8800 people. The primary school founded by Abbé Brassard at Nicolet he made a classical school (1803), now the seminary of Nicolet. His generous contributions to the new college of the Sulpicians (1804-5) also show his devotion to education.

(11) Joseph-Octave Plessis (q. v.), consecrated Bishop of Canathe in 1801, Bishop of Quebec from 1806 to 1825. His great achievement was the organization of the Church in Canada in which he was providentially aided by the American invasion of 1812-13. After the treaty of Ghent (1814) he was for the first time officially acknowledged as Catholic Bishop of Quebec, and granted by the king an annuity of £1000. He obtained from Rome, besides the erection of the Vicariate Apostolic of Nova Scotia (1817), the

appointment of bishops for Upper Canada, Montreal, New Brunswick, including Prince Edward's and the Magdalen Islands, and for the North-West, where the Abbés Provencher and Dumoulin had begun (1818) the mission of the Red River. England assented, but on the express condition that these bishops would be only auxiliaries and vicars-general of Quebec. He also obtained from the pope not to use, while the Government objected, the title of archbishop granted to him in 1819. All the new prelates were consecrated by him

MONUMENT TO MONTCALM AND WOLFE
ON THE HEIGHTS OF ABRAHAM,
QUEBEC

on his return: McDonell (1820), McEachern and Lartigue (1821), Provencher (1822). He ordained 114 priests, preserved the college of Nicolet, and encouraged St. Hyacinth College, begun by Abbé Girouard (1811). Like his predecessors, he firmly opposed the royal institution which placed education in Protestant hands, and endeavoured to obtain Catholic primary schools. A more favourable law was voted in 1824. As a member of the Legislative Council from 1817, he had great influence. In 1822 he contributed to prevent the union of the Canadas intended by the English House of Commons.

(12) Bernard-Claude Panet, b. 1753; d. 1833, parish priest of Rivière-Ouelle, consecrated Bishop of Salades and coadjutor of Quebec (1807), was bishop from 1825 to 1833. The chief events of his administration were: the building of Nicolet College (1827), to which he contributed the sum, large for the time, of \$32,000; the foundation of the College of Ste-Anne-de-la-Pocatière (1827) by the Abbé Painchaud; the educational law of 1829 which granted allowances for the creation of parish schools and the maintenance of colleges, convents, and academies already in existence; the erection in Quebec, with his help, of St. Patrick's church for the Irish; the sale to the Government of the episcopal palace built by Mgr Briand. An annual rent of £1000 was paid, which, although irredeemable, was redeemed in 1888 by the sum of \$74,074, given to Cardinal Taschereau.

(13) Joseph Signay, b. 1778; d. 1850, Bishop of

Fussala and coadjutor of Quebec (1827), administrator (1832), bishop (1833), archbishop from 1844 to 1850. There were epidemics of cholera in 1832, 1834, and 1849. Quebec was almost entirely destroyed by fire in 1845. In 1847 typhus visited the Irish exiles at Grosse-Ile. Among many priests deserving grateful memory must be mentioned the Abbé Félix Cazeau, then secretary to the bishop and afterwards vicar-general, who found homes for nearly five hundred Irish orphans. Important events were: the law on education (1841) which allowed the election of school commissioners having power to build new schools, to choose teachers and raise funds therefor; the erection of Quebec (1844) into a metropolis with three suffragan sees, Kingston, Montreal, and Toronto; the Oblates (1844) and the Jesuits (1849) admitted into the diocese and charged respectively with the Saguenay mission and the Sodality of the Blessed Virgin of the Upper-Town; societies for the Propagation of the Faith (1837), colonization (1838), and temperance (1843). The report of Bishop Signay to the Holy See in 1843 states that the diocese contained 200,000 Catholics, 145 churches and chapels, 4 orders of nuns, and 3 colleges or seminaries. In the Red River mission, under Bishop Provencher, out of 5140 souls, more than 2700 were Catholics. Vicar-General Norbert Blanchet and Modeste Demers had opened (1838) the mission of British Columbia, while other missionaries worked among the Indians of Lake Abbittibi. Bishop Signay was the last to receive the annuity of £1000 granted to Mgr Plessis. In 1847 he entered the present episcopal palace.

(14) Pierre-Flavien Turgeon, b. 1787; d. 1867, elected in 1831 and consecrated in 1834 Bishop of Sydime and coadjutor of Quebec, became administrator in 1849, and bishop in 1850. That same year a meeting of the bishops at Montreal prepared the first Council of Quebec, held in 1851 under his presidency. After directions on liturgy and discipline, against social and moral dangers, its most important decree is that on Catholic universities and normal schools, which gave birth (1852) to Laval University and to Laval Normal School in 1857. Pius IX was also petitioned to form new sees. St. Hyacinth and Three Rivers were erected in 1852, while Halifax became a metropolis. A second council took place at Quebec in 1854. The foundation of the Quebec Sisters of Charity (1849) and of the Good Shepherd (1850), the reorganization of ecclesiastical conferences, the publication of a new catechism and the approval of Butler's for English-speaking Catholics are the chief acts of Bishop Turgeon's administration. In 1855, owing to ill-health, he left the administration of the diocese to his coadjutor.

(15) Charles-François Baillargeon (q. v.), as parish priest of Quebec (1831-50), procured for his parish the Brothers of the Christian Schools, and established the conferences of St. Vincent de Paul. As bishop, the great events of his administration were the third (1863) and fourth (1868) Councils of Quebec, attended by the suffragan Bishops of Montreal, Ottawa, St. Boniface, Three Rivers, St. Hyacinth, Hamilton, Sandwich (now London), Kingston, Toronto, and (in 1868) Rimouski. Besides several disciplinary decrees, the erection of the ecclesiastical provinces of Toronto and St. Boniface was decided and a petition was added for the canonization of Sister Marie de l'Incarnation, foundress of the Quebec Ursulines. Bishop Baillargeon attended the Vatican Council (1869), but was forced by ill-health to return before voting for papal infallibility, which he favoured. He died soon after. He had consecrated five bishops and ordained one hundred and ninety priests.

(16) Elzéar-Alexandre Taschereau, b. 1820; d. 1898, for several years teacher of philosophy in the seminary, and was one of the founders of Laval University; he was rector (1860-6), and again, in 1869, vicar-

general (1862), theologian of Archbishop Baillargeon at the Vatican Council, administrator (1870), archbishop (1871), cardinal of the title of Santa Maria della Vittoria (1886). Among the many facts of his administration may be quoted: the foundation of the Hospital of the Sacred Heart, which he entrusted to the Sisters of the General Hospital (1873); the erection of the Chicoutimi college and see (1878); the inauguration of a classical course of studies in the Commercial College of Levis (1879); the creation of more than fifty parishes with the funds of colonization and of the Propagation of the Faith, kept since 1876 for local wants; the foundation (1892) of the now prosperous order of Our Lady of Perpetual Help, by the Abbé Brousseau; the fifth (1873), sixth (1878), and seventh (1886) Councils of Quebec. Among the decrees must be mentioned that on the improvement of theological and philosophical studies after St. Thomas's principles, according to Leo XIII's direction. Archbishop Taschereau had to deal with some perplexing cases: he was papal delegate for the division of Notre Dame parish in Montreal (1871), and the conclusion of his report was adopted by Cardinal Barnabo. In the exciting question of Catholic Liberalism, his pastoral letters of 1875 and 1877 procured for the country a lasting peace. Another cause of discord was the university question, finally settled by establishing at Montreal (1876) a branch of Laval, which, by the Decree "Jamdudum" (1896), has become nearly independent. In 1888 the long pending debate on the Jesuits' estates ended by an agreement between Prime Minister Mercier and Father Turgeon, S.J., authorized by Rome. The Government paid an indemnity of \$400,000 to be divided among the Jesuits, Laval University, and the bishops for educational purposes. A share of \$60,000 was granted to the Protestant Board of Education. When Cardinal Taschereau handed over the administration to his coadjutor (1894), the archdiocese contained 320,000 Catholics, 392 secular priests, 33 regulars, 3 colleges or seminaries, 65 convents, 195 churches and chapels, 192 parishes and missions, although more than 50 had been cut off for the new sees of Rimouski and Chicoutimi.

(17) Louis Nazaire Begin, b. 1840, after several years of studies in Rome, where he was ordained in 1865, filled in the seminary of Quebec the successive positions of professor of theology, director of students, and prefect of studies. Principal of the Laval Normal School (1884), Bishop of Chicoutimi (1888), coadjutor of Quebec (1891) with the title of Archbishop of Cyrene, granted future succession (1892), he took possession of the see in 1898. He has written books on infallibility, the rule of faith, and the veneration of the saints. During his administration the archdiocese has greatly developed by the admission of several orders of men and women, and by the creation of many new parishes. He played a leading part in the struggle of the Canadian bishops (1896) against the unjust law of 1890, by which the Catholics of Manitoba had been deprived of their schools. After the delegation of Mgr. Merry del Val, now Secretary of State to Pius X, he received (1898) the Encyclical letter "Affari vos" (1897), in which Leo XIII, while he praised the bishops for their vindication of Catholic principles of education, advised union and charity when claiming justice. On the tercentenary of the foundation of Quebec (1908) a monument was erected to Bishop Laval. Important events are: the organization of the "Action sociale catholique", a branch of which is the paper "L'Action Sociale", edited at Quebec since 1907; the first Plenary Council of Canada (1909), attended, under the presidency of Archbishop Sbaretti, delegate Apostolic, by 7 archbishops, 26 bishops, 1 prefect Apostolic, 1 mitred abbot, and 5 episcopal proxies. At this date (April, 1911), the decrees have not yet been published. Mgr Paul-Eugene Roy, b. 1859, was consecrated auxiliary

bishop in 1908. His classical course was made in Quebec; after taking in France the degree of licentiate in letters, he was professor of rhetoric and prefect of studies in the Quebec seminary, became pastor of the Canadians at Hartford, Conn., and in 1901 was first parish priest of Jacques-Cartier in Quebec. He is the chief force in the "Action Sociale".

Organization.—The Archdiocese of Quebec is incorporated under the title "La Corporation Episcopale Catholique Romaine de Québec" by XII Victoria, ch. 36, which also grants (§ 7) incorporation to all dioceses then existing or to be afterwards erected in Canada. "L'Evêque catholique de Québec" was personally, and remains, incorporated by letters patent of Queen Victoria in 1845. Parishes receive civil incorporation after canonical erection, but possess their legal rights even without it. Church property, administered under the pastor's presidency by church-wardens elected by parishioners, cannot be legally alienated without the bishop's assent. In the ecclesiastical province of Quebec, a mutual insurance, with its seat in Quebec, covers risks on church buildings and parsonages to the amount of \$7,500,000. A similar insurance exists for Catholic educational or charitable institutions. The parish church of Quebec is the cathedral. Begun in 1647, consecrated by Bishop Laval in 1666, rebuilt on a larger scale by Bishop Pontbriand (1744-9) and again, after the siege by Bishop Briand (1767-71), it was honoured in 1874 by the title of basilica. With the exception of a few students, sent every year to Europe to receive a training as professors, most of the clergy are educated in the higher seminary of Quebec. None is admitted until after satisfactory classical studies and two years of philosophy. The course of theology lasts four years. Four times a year all priests in office have to meet by groups of ten and twelve to treat of questions of theology or church history determined by the bishop, to whom report must be sent. Two retreats every year are preached in the seminary, so that all the clergy may attend one or the other. An ecclesiastical association ("La Caisse St. Joseph") grants a pension to its members out of office through sickness or old age.

Charities.—Two hospitals (Hôtel-Dieu) for the sick; 12 for old persons of both sexes; 7 orphanages; 3 patronages for foundlings; 1 refuge for repentant girls—all entrusted to religious orders; several prosperous societies or conferences of St. Vincent de Paul; a Tabernacle Society and an Association for the Protection of Maid Servants.

Religious Orders.—Male.—(The asterisk shows which have in the diocese a novitiate or at least a preparatory house or postulate.) Jesuits, Franciscans*, Capuchins*, Dominicans, White Fathers, Oblates, Fathers of the Sacred Heart*, Brothers of the Christian Schools, of Christian Instruction, of St. Viateur, of the Sacred Heart, Marists*, Fathers and Brothers of St. Vincent de Paul. The Fathers of Ste Croix have a house and 9 students following the course of theology at Laval. The Franciscans have their own classes of theology

CHURCH OF NOTRE-DAME-DES-VICTOIRES, QUEBEC

with 30 students.—Female.—Ursulines*, Sisters of the Good Shepherd*, Congregation of Notre Dame, Servants of the Holy Heart of Mary*, Dominican Sisters of the Infant Jesus*, Franciscan Missionaries of Mary*, Sisters of the Mercy of Jesus*, of Charity*, of Jésus-Marie*, of the Holy Family, of Charity of St. Louis*, of St. Francis of Assisi, of the African Missions (White Sisters)*, of St. Joseph of St. Vallier*, of the Perpetual Help*, of the Holy Redeemer (Redemptoristines)*, of the Precious Blood*, of Hope, and Cistercian Sisters (Trappistines)*.

Statistics (1910): 359,000 Catholics; 510 secular and 100 regular priests; 218 parishes and 25 missions; 266 churches and chapels (only two parishes are exclusively composed of Irish or English Catholics; about fifteen are mixed, but mostly all with a much larger proportion of French-Canadians); 1 university (Laval) with 405 students, of whom 116 for theology; 3 colleges or seminaries with 1601 students; Laval Normal School, with 95 young ladies and 61 young men trained for teaching, and 174 other pupils; 49 academies and 143 high schools (*écoles modèles*), with 27,579 children educated by 196 brothers, 745 sisters of different orders, 21 lay schoolmasters and 136 schoolmistresses; 1279 primary schools (*écoles élémentaires*), in which 14 brothers, 108 sisters, 4 schoolmasters and 1293 schoolmistresses give instruction to 43,933 children.

H. A. SCOTT.

Quebec, PROVINCE OF.—GEOGRAPHY.—The province of Quebec occupies mainly the two slopes of the vast basin formed by the St. Lawrence River whose course runs chiefly between the Laurentian and Alleghany ranges. Its boundaries are: to the north, the district of Ungava; to the northeast, Labrador; to the east, the Gulf of St. Lawrence; to the southeast, New Brunswick, and the States of Maine and New Hampshire; to the south, the States of Vermont and New York, and the Counties of Glengarry and Prescott in Ontario; to the west, the province of Ontario. Quebec is comprised between the 45th and 54th degrees of latitude north, and the 57th and 79th degrees of longitude west of Greenwich. Its area measures 354,873 square miles; about equal to that of the United Kingdom, France, Belgium, and Holland united. No country in the world of the same extent possesses so many and so abundant waterways, chief of which are the St. Lawrence, discharging the Great Lakes, and navigable to its very source, and its principal tributaries: the Ottawa, the St. Maurice, and the Saguenay, each of which surpasses in navigableness the largest rivers of Europe. Innumerable cascades falling from the Laurentian heights represent boundless mechanical forces; the forest resources of Quebec are still immense, and its asbestos mines the richest in the world. The principal cities are:—

Quebec, the capital, founded in 1608, population,

according to the last census (1901), 68,840; Montreal, founded 1642, population, exclusive of lately annexed municipalities, 267,730; Three Rivers, founded 1634, population, 9981; Sherbrooke, 11,765; Hull, 13,993; Valleyfield, 11,055. Quebec, the capital, long enjoyed a political, military, and commercial superiority over all Canada. Although since surpassed in material prosperity, it still appeals to the scholar and student, teeming as it is with historical interest, while to the tourist it offers a view of magnificence and picturesqueness perhaps unique in the world. Here landed the discoverers of the country and the founders of the nation; hither came the bare-footed Recollect, the black-robed Jesuit, the Ursuline and the hospital Sisters; here the noble and saintly Laval ruled the infant Church of New France; from hence the Faith radiated throughout North America. Here was born Joliet, the discoverer of the Mississippi; here the viceroys held court; here flourished, from the very outset, many of the dearest devotions of the Church. Laval's first cathedral was dedicated in 1666 to the Immaculate Conception; the cult of the Holy Family was approved in 1665, a fact lauded by Leo XIII in his Letter "Neminem fugit" (14 June, 1892); the first celebration of the Feast of the Sacred Heart of Jesus in the New World took place in the Ursuline chapel (1700). Traditions of courtesy as well as of piety were created that have left their impress on the people's character. Almost the entire population of the province of Quebec, i. e. about five-sixths, consists of French-Canadians; the remainder comprises chiefly the descendants of English, Scotch, and Irish immigrants. About 12,000 Indians and half-breeds of the Iroquois, Huron, Micmac, Abenaki, and Montagnais tribes occupy reservations in different sections of the province. With one or two exceptions, these aborigines are instructed by missionaries in their respective tongues, which they have faithfully preserved in spite of their environment.

PRESENT CONDITIONS.—Although there is no state religion, and freedom of worship is sanctioned by law, the immense majority of the population being Catholic in faith and practice, the relations between Church and State are, as a rule, harmonious. The hierarchy and clergy are habitually treated with due consideration and respect, in recognition not only of their sacred character, but also of the efficient part they have ever taken in the moral as well as the social well-being of the country. Public order, education in every degree, agriculture, colonization, and even industry, all owe a debt to the influence of the Church, which the political authorities are prone to recognize. In all public religious demonstrations, such as the procession of Corpus Christi, the dignitaries of the State occupy a prominent rank. The province of Quebec comprises three metropolitan sees: Quebec, Montreal, and Ottawa. That of Quebec counts four suffragan dioceses: Three Rivers, Rimouski, Chicoutimi, Nicolet, and one vicariate apostolic, the Gulf of St. Lawrence. The suffragan sees of Montreal are: St. Hyacinth, Sherbrooke, Valleyfield, and Joliette. The ecclesiastical province of Ottawa, partly situated in Ontario, comprises the Diocese of Pembroke and the Vicariate Apostolic of Temiscamingue. The Catholic population of the province, according to the last government census (1901), was 1,449,716, out of a total of 1,648,898. Later statistics (ecclesiastical), including 1910, show an increase for the two ecclesiastical provinces of Quebec and Montreal, and exclusive of that portion of the civil province depending on the metropolitan See of Ottawa, of 163,611, giving a total Catholic population for 1910 of 1,613,327, Quebec and suffragan sees having a total of 731,609, and Montreal, with its suffragans, of 789,502. This increase in a province where race-suicide is unknown and families

QUEBEC

proverbially numerous, in spite of a notable infantile death-rate, should be far greater, were it not for the continuous flow of emigration to the United States and to the western provinces of Canada, with a comparatively small immigration from Europe. This emigration of French Canadians, according to authentic statistics, amounted to 10,000 for the single year of 1909. (For history, see CANADA.)

CORRECTION AND EDUCATION.—All penitentiaries and prisons are provided with Catholic chaplains subsidized by the State, and feast-days of obligation, as well as Sunday, are observed. Reformatories for youth are managed at the public expense by the Brothers of Charity for older boys, by the Sisters of the Good Shepherd for girls, and by the Sisters of Charity for younger children of both sexes, the Government contributing in the last two cases a per capita sum for a limited number of juveniles. The two largest sanitarium in the province are managed, by government contract, by the Sisters of Providence and of Charity, in Montreal and Quebec, respectively. Homes for idiots, enjoying government subsidies, are likewise in the care of religious. According to the latest criminal statistics (1908), the province of Quebec, with a ratio of 13.91 per 10,000 of population, comes fourth in order of excellence, after the three maritime provinces, where there has been no immigration within the last decade; and third for number of convictions according to population, being one for each 96 inhabitants, Prince Edward Island and New Brunswick alone surpassing Quebec.

Schools.—The public-school system in the province of Quebec, without being ideal, is, in a notable measure, respectful of the rights of the family and of the Church. This desirable condition results mainly from the constitution of the Council of Public Instruction, composed, ex officio, of the hierarchy of the province representing the Church, and of an equal number of laymen. The latter are nominated exclusively by the lieutenant governor in council. The council is presided over by a superintendent of public instruction who represents the State; there is no minister of education, and politics are thereby partly excluded from the administration. Several principals of normal schools and lay professors have lately been added to the council. The council has the power to distribute a limited portion of the public moneys for primary and classical schools, to propose certain nominees to normal schools and to the board of examiners for teaching licences, to approve or reject all text-books. But its powers are more advisory than legislative, nearly all its deliberations being subject to government sanction. A committee similarly organized attends to the educational interests of the Protestant minority. The most striking feature of the Quebec school law is the absolute liberty enjoyed by each of the two chief religious denominations of controlling its own schools agreeably to the wishes of parents. In municipalities where they form the majority, Catholics cannot interfere with the rights of Protestants, and vice versa. In this respect, of all the school laws of the dominion, that of Quebec may justly be considered as the fairest and most conducive to religious harmony; never was a majority so liberal towards a minority. The school grants are even proportionally larger to the latter (the Protestant minority) than to the former. It has been rightly proclaimed that nowhere has the separate school law been more generously and conscientiously applied, and that, to the honour of French Catholic Quebec, there has never been any occasion to invoke government interference for the protection of the minority. This fair treatment extends likewise to the language. The French-speaking province of Quebec amply provides for the requirements of the English-speaking minorities, as

regards education in their mother tongue. Moreover, a course of English, in many cases quite efficient, is given in every French school of the intermediate and higher grades. It must be noted that there is only one school law for the province, under which all schools, Catholic and Protestant, are organized. To interest the people more deeply in the schools and give greater unity and strength to the system, the legislature has grafted it on the parish organization. Each parish is thus incorporated three times: (1) for church affairs; (2) for municipal affairs; (3) for school affairs. The parish priest is eligible as school commissioner, and has the right to visit the schools with the exclusive choice of textbooks relating to religion. In parishes where there is a Protestant minority, the minority has a right to a dissentient separate school, controlled by special trustees. Lay inspectors, nominated by the governor in council, visit all schools under control of the school commissioners; diocesan clerical inspectors, chosen by the respective bishops, are authorized to visit even schools receiving a partial grant from the Government. Normal or training schools, based on the principle of denominationalism, were definitively created in 1857, two for the Catholics, one in Quebec for both sexes, the Laval, and one in Montreal, the Jacques-Cartier, for male teachers, and one for Protestants, in Montreal, the McGill. Recently, normal schools for women teachers only have been established in Montreal, Three Rivers, Rimouski, Chicoutimi, St. Hyacinth, Hull, Sherbrooke, Valleyfield, Nicolet, and Joliette, under the management of religious communities, and grafted on pre-existing educational institutions. In each of the ten Catholic normal schools of the province, the principal is a priest nominated by the Catholic committee. Another late improvement is the establishment of special schools of domestic economy under the management of sisters. (For legislation relating to the Church, see CANADA.)

The latest report of the superintendent of public education for the school year 1909-10 gives the following general statistics for the province of Quebec: schools, 6760; teachers, 14,000; pupils, 394,945; average attendance, 308,982; average per cent, 78.23. The same report shows an increase above the figures of the year previous of 7552 in the number of pupils. There has also been a considerable increase in the expenditure, due to grants for technical schools, and to the newly organized normal schools. The total government outlay for 1909-10 was \$6,210,530, showing an increase above that of 1907-08 of \$1,744,993. The contrast between the amount spent and the number of schools, teachers, and pupils, instead of signifying an inferior quality of education, testifies to the economy wrought by the employment of teaching religious orders, 5805 of whose members (out of a total of 14,000 teachers) are employed in the public schools. (For statistics regarding universities, classical colleges, and the several teaching orders, see CANADA.)

The accompanying table of comparative school statistics for the entire dominion was published officially

	SCHOOLS	TEACHERS	PUPILS	AVERAGE ATTENDANCE	EXPENDITURES
Canada . . .	22,971	44,896	1,214,457	776,968	\$19,370,538
Alberta . . .	1,070	1,171	39,109	*17,311	282,205

by the Department of the Interior in 1908. (Those marked with an asterisk are estimated.)

Of the two oldest provinces of the dominion, Ontario and Quebec, the latter stands first as regards the number of schools, of teachers, and of average attendance, being inferior only in the number of pupils (irrespective of the ratio to each population), and in expenditure. About one-eleventh of the number of pupils in the province of Quebec are non-Catholics. The following table, based on the preceding statistics, shows the relative standing of each province of the dominion, according to the percentage of average attendance for 1908:

PROVINCES	AVERAGE ATTENDANCE	PERCENTAGE OF AVERAGE ATTENDANCE
Alberta.....	17,311	44-26
British Columbia.....	23,558	70-71
Manitoba.....	37,279	55-52
New Brunswick.....	38,584	56-42
Nova Scotia.....	58,343	57-35
Ontario.....	284,988	59-55
Prince Edward Island.....	11,646	64-65
Quebec.....	285,418	76-36
Saskatchewan.....	19,841	52-73

Quelen, HYACINTHE-LOUIS DE, Archbishop of Paris, b. at Paris, 8 Oct., 1778; d. there 31 Dec., 1839. He was educated at the Collège de Navarre, and under

LOUIS HYACINTHE QUELEN

the private tuition of M. Emery and other ecclesiastics. Ordained in 1807, he served a year as Vicar-General of St. Brieuc and then became secretary to Cardinal Fesch. When the latter was sent back to his diocese, de Quelen exercised the sacred ministry at St. Sulpice and in the military hospitals. Under the Restoration of 1814 he became successively spiritual director of the schools in the archdiocese, Vicar-General of Paris, and coadjutor archbishop to Cardinal de Talleyrand-Périgord, succeeding the latter in 1821. The favours of Louis XVIII and Charles X did not make him subservient. As a peer of the realm he opposed, on behalf of the middle classes, the conversion of the national debt. At his reception into the French Academy he publicly lauded Chateaubriand, then in disgrace. While blessing the corner-stone of the *Chapelle Expiatoire* he demanded, though in vain, an amnesty for the exiled members of the Convention; and the ordinance of 1828, disbanding the Jesuits and limiting the recruiting of the clergy,

was issued against his advice. Although de Quelen had not approved the royal ordinance of July, 1830, which aimed at restoring absolute monarchy, he was nevertheless held in suspicion by the House of Orléans. On one occasion Louis-Philippe said to him: "Archbishop, remember that more than one mitre has been torn asunder". "Sire", replied the archbishop, "God protect the crown of the king, for many royal crowns too have been shattered".

Apart from some official functions such as the christening of the Comte de Paris, the obsequies of the Duke of Orléans and the Te Deum sung in honour of the French victory in Africa, he confined himself to his episcopal duties, visiting the parishes of his jurisdiction, looking after the religious instruction of military recruits, and organizing the metropolitan clergy. In the outbreaks which followed the Revolution of 1830 the archbishop, twice driven from his palace, had to seek refuge in humble quarters and to bear in silence the worst calumnies against his person. However, when the epidemic of 1832 broke out, he nobly transformed his seminaries into hospitals, personally ministered to the sick at the Hôtel-Dieu, and founded at his own expense the "Œuvre des orphelins du choléra". He died shortly after, having the joy of witnessing the conversion of the apostate Bishop of Autun, the Prince de Talleyrand. Ravignan eulogized him at Notre-Dame, and de Molé at the French Academy. From de Quelen's episcopate date the "Société de St. Vincent de Paul", the "Conferences apologétiques de Notre-Dame" and several religious institutes, among which are the nursing Sisters of Bon-Secours. Besides the eulogies on Louis XVI (Paris, 1816), on Madame Elizabeth (Paris, 1817), on the Duke de Berry (Paris, 1830), his "Discours de réception à l'académie française" (Paris, 1824), and some 120 pastoral letters, we have from his pen "Manuels pour l'administration des Sacrements de l'Eucharistie et de l'Extrême-Onction: du Baptême des Enfants: du Mariage" (3 vols., Paris, 1837-38) collected in the "Rituel de Paris".

Biographies by D'EXAUVILLEZ (Paris, 1840), and HENRION (Paris, 1840); PISANI in *L'Episcopat français* (Paris, 1907), s. v.; D'AVENEL, *Les évêques et archevêques de Paris* (Tournai, 1878); see also *Mémoires de Jauffret*, III (Paris, 1824); *Ami de la Religion* (Paris, 1840); CIV; *Revue Ecclésiastique*, II (Paris, 1840).

J. F. SOLLIER.

Quem terra, pontus, sidera.—An ancient hymn in honour of the Blessed Virgin, ascribed to Fortunatus by Thomasius and Mone without question but also without assigning any reason. Kayser (*Beiträge* etc., I, 393) remarks that it is not found in the MSS. of Fortunatus's works, to whom, however, Dreves ("Analecta Hymnica", L, Leipzig, 1907, 86-8) and Blume (see *Hymnody*) refer it. The Roman Breviary divides it into two parts: the first, beginning with "Quem terra, pontus, sidera", assigned to Matins in the Common Office, and also the Little Office of the Blessed Virgin; the second, beginning with "O gloriosa virginum", similarly assigned to Lauds. Both parts conclude with the doxology of Marian hymns, "Jesu tibi sit gloria etc." As found thus, the hymns are revisions, in the interest of classical prosody, of the older hymn, "Quem terra, pontus, æthera", found in many old breviaries, and in MSS. dating from the eighth century. In the Cistercian office it was sung at Compline during Advent. Sometimes it was divided into two parts, as now in the Roman Breviary, the second part beginning with "O gloriosa Domina" (or "femina"). Including both the older and the revised form, there are eighteen translations into English of the first part and fourteen of the second part, nearly all of which are by Catholics. In the Marquess of Bute's "The Roman Breviary" (1879), however, the versions selected are those of the Anglican translators, J. M. Neale and R. F. Littledale. The beautiful versions of Father Caswall, appearing originally

in his "Lyra Catholica" (1849), are easily accessible in the reprinted work (London, 1884). For first lines of the various translations, sources, authors, see Julian, "Dict. of Hymnology" (2nd ed., London, 1907, 944). To his list should be added the translations of Archbishop Bagshawe ("Breviary Hymns and Missal Sequences", London, 1900, 106-7), and Judge Donahoe ("Early Christian Hymns", New York, 1908, 80-1). The revised form of the Latin text as well as the older forms, with variant readings and some interesting notes, may be found in Daniel ("Thesaurus Hymnologicus", I, 172; II, 382; IV, 135), and in Mone (Lateinische Hymnen des Mittelalters, II, 128-31). For Latin text and English tr., ancient plain song harmonized, and alternative musical setting, see "Hymns, Ancient and Modern" (London, 1909, Hymn 222). The official or "typical" melody will be found in the "Antiphony".

H. T. HENRY.

Quercia, JACOPO DELLA, sculptor, b. (it is said) at Quercia Grossa, near Siena, 1374; d. 20 October, 1438. His father, a goldsmith, taught him design. When about sixteen he made an equestrian wooden statue for the funeral of Azzo Ubaldini; he is believed to have left Siena soon after this, owing to party strife and disturbances. In 1401 he reappeared in Florence, a competitor for the gates of S. Giovanni (assigned to Ghiberti); in 1408 he executed in Ferrara various sculptures, notably the Madonna of the Pomegranate. One of his most exquisite works, the tomb of Ilaria del Carretto, second wife of Paolo Guinigi, in the Cathedral of Lucca dates about 1413. The Gothic altar-piece at S. Frediano, Lucca, with figures of Our Lady and saints (c. 1413) is by him. He spent ten years on his Fonte Gaia, in the Piazza del Campo, Siena; it has figures of Our Lady and of the theological and cardinal virtues, reliefs of the creation of man and expulsion from paradise, and various waterspouting animal forms. The fountain was restored by Tito Sarocchi in 1868. Also in Siena (Baptistery of S. Giovanni) is the font made from Jacopo's designs (1417-30). The surmounting statuette, the Baptist, the marble reliefs of the Prophets, and one of the six bronze-gilt panels (Zacharias led out of the Temple) are from his hand. A very important work is the great doorway of S. Petronio, Bologna, with fifteen bas-reliefs from Genesis (1425-38). Raphael and Michelangelo are both indebted to these sculptures. In the ambulatory of S. Giacomo, Bologna, is the monument of Antonio Bentivoglio (d. 1435). The *mandorla* of the Assumption, Sta Maria del Fiore, Florence, has been claimed for Jacopo, but modern authorities give it to Nanni del Banco. The forms of Jacopo are highly tactile, graceful, and animated.

M. L. HANDLEY.

Querétaro, DIOCESE OF (DE QUERETARO), in Mexico, suffragan of Michoacan. Its area is that of the state of the same name, 4492 sq. miles, population, 243,515 (census of 1910). The principal city, residence of the bishop and the governor, is Querétaro, population (1910), 35,011, founded by the Otomis Indians in 1446, and occupied by the Spaniards since 1531. The Carmelites established themselves there in 1601, the Dieguinos in 1613, the Fathers of Mercy in 1636, the Dominicans in 1692; the Augustinians and the Fathers of the Oratory of St. Philip also had houses in Querétaro. The Jesuit college of Saint Francis Xavier was suppressed in 1767 by Charles III on the occasion of the expulsion of all Jesuits from the Spanish possessions. One of the most notable institutions of Querétaro was the college of Apostolic missionaries, which Innocent XI called the greatest influence for the propagation of the Faith in the

Indies. Missionaries went forth from it to evangelize Sonora, California, Texas, and Tamaulipas. In 1848 the Government of the Republic asked for some of its members to take charge of the missions of Sierra Gorda. Almost all of the present diocese

CHURCH OF LA CRUZ, QUERÉTARO

of Querétaro formed part of the Archdiocese of Mexico until 26 January, 1862, when by the Bull "Optimum Maximum" of Pius IX, the See of Querétaro was created. The diocese has two seminaries with 128 students; it numbers 101 parochial schools and nine Catholic colleges, which together contain 5195 students. There are one Protestant college with 65 students and two Protestant churches. Adjoining the residence of the bishop, in the capital near the church of La Cruz, is the Convent of La Cruz, occupied as headquarters by Maximilian during the siege of the city by General Escobedo in May, 1867. The Capuchin Convent was used as a prison for the Emperor Maximilian and his two generals, Miramon and Mejia. It was on the hill of Las Campanas on the outskirts of the town that these generals were shot, 19 June, 1867. An elaborate mortuary chapel

MONUMENT TO MAXIMILIAN, MIRAMÓN, AND MEJÍA, QUERÉTARO

has replaced the former modest monument erected on the site. At Querétaro was ratified in 1848 the treaty by which Mexico ceded to the United States, at the close of the war, the territory covered by Texas, New Mexico, Arizona, and Upper California.

CAMILLUS CRIVELLI.

Quesnel, PASQUIER (PASCHASE), b. in Paris, 14 July, 1634; d. at Amsterdam, 2 December, 1719. Descended from an ancient noble family he completed at the Sorbonne a brilliant course in philosophy and theology. At the age of twenty-three he entered the congregation of the Oratory where his talents were

profitably employed in the direction of the young. He composed for the use of the students under his charge, and published in 1671 an "Epitome of the Morals of the Evangelists, or Christian Thoughts on the Texts of the Four Evangelists". By important successive developments, this work became "The New Testament in French with Moral Reflections on each verse" (Paris, 1687-92) and gave rise to lively polemics until at last, in 1708, his doctrines were condemned by Clement XI (see JANSENIUS). But the edition of 1671 already contained five of the 101 propositions (12, 13, 30, 60, and 65) later censured in the Bull "Unigenitus". Quesnel was profoundly imbued with the errors of Baius and the Jansenists, and he had

PASQUIER QUESNEL

skilfully spread these views in his "Moral Reflections" on the New Testament. Furthermore, he had adopted, in relation to the papacy, the teachings of Marco Antonio de Dominis (q. v.) and of Richer. He published (Paris, 1675; Lyons, 1700) a complete edition of the works of Leo the Great. The notes and dissertations which he added, though very learned, are spoiled by his attacks upon infallibility, and even Roman primacy.

In consequence, this work was placed under the ban of the Index, and Quesnel's only reply to the condemnation was disrespectful recrimination. On account of his Jansenist opinions, which he emphasized more and more, he was relegated to Orléans. In 1684, having refused to subscribe to the formula which the General Assembly of the Oratory felt obliged to draw up against the current errors, he was compelled to quit the congregation. He then went to Belgium to join Antoine Arnauld, at whose death (1694) he was present, and whose place he took at the head of the party.

The difficulties of a sojourn in a foreign land failed to dampen his ardour for proselytizing or abate his literary activity. The dictionary of Moreri attributes to him some sixty discourses, ascetic or polemical, several of which were published under assumed names or anonymously at Brussels, where for some time he remained in hiding. But in 1703 Philip V, acting in concert with the Archbishop of Mechlin, Humbert of Precipiano, had him arrested and imprisoned in the archiepiscopal palace. Nevertheless, he succeeded in escaping and reaching Holland, finding an asylum at Amsterdam, where he continued, despite all bans and censures, to write in support of his ideas. Obstinate in the pursuit of his aims, he was not always delicate in his choice of means. When the royal commissioners discovered him disguised in secular dress and crouching behind a cask, and wished to assure themselves of his identity, he declared that his name was Rebecq, one of his numerous pseudonyms. On the part of a man who like all those of his party scorned mental restrictions and equivocations, the expedient, to say the least, was singular. Still more disloyal was his attempt to cloak his doctrines with the authority of Bossuet. The latter had been requested to examine the text of the "Réflexions morales" and had consented to do so. He had even

drawn up an advertisement as a preface to a new edition, insisting, however, on the correction of one hundred and twenty propositions which he had found reprehensible. As this condition was not accepted, he refused his co-operation and held back his proposed "Avertissement". But later on Quesnel obtained from the heirs of Bossuet the materials which the latter had prepared, and which he published as an authentic work under the title "Justification of the Moral Reflections, by the late M. Bossuet". Up to the time of his death the ardent Jansenist was inconsistent and insincere. He requested and received the last sacraments, and in presence of two Apostolic prothonotaries and other witnesses, he made a profession of faith over his own signature, in which he declared "that he wished to die, as he had always lived, in the bosom of the Catholic Church, that he believed all the truths taught by her, condemned all the errors condemned by her, that he recognized the Sovereign Pontiff as the chief Vicar of Jesus Christ, and the Apostolic See as the centre of unity". That these formulas concealed some inadmissible restrictions is proved by their very tenor. On this point we are left in no doubt in view of Article 7 which completes them, and in which it is said the writer "persists in his appeal to a future General Council, regarding the constitution 'Unigenitus', and regarding the grievances à propos of which he sought the judgment of the Church".

Among the numerous works of Quesnel besides those already mentioned we may cite especially: "Lettres contre les nudités adressées aux religieuses qui ont soin de l'éducation des filles"; "L'Idée du Sacerdoce et du Sacrifice de Jésus Christ"; "Les trois consécrations: la consécration baptismale, la sacerdotale et la consécration religieuse"; "Elévation à N. S. J. C. sur sa Passion et sa Mort"; "Jésus pénitent"; "Du bonheur de la mort chrétienne"; "Prières chrétiennes avec des pratiques de piété"; "Office de Jésus avec des réflexions"; "Recueil de lettres spirituelles sur divers sujets de la morale et de la piété"; under the pseudonym of Gély, "Apologie historique de deux censures (contre Lessius) de l'Université de Douai"; under the pseudonym of Germain, "Tradition de l'Eglise Romaine sur la prédestination des saints et sur la grâce efficace"; "La discipline de l'Eglise tirée du Nouveau Testament et de quelques anciens conciles"; "Causa Arnaldina", a work produced under another form as "La justification de M. Arnauld"; "Entretiens sur le Décret de Rome contre le Nouveau Testament de Châlons accompagnées de réflexions morales"; finally seven "Mémoires" serving as a history of the constitution "Unigenitus". This list, however incomplete, comprises in its first part only the most generally useful and edifying works; as an offset the seven last numbers are either impregnated with the Jansenist principles or consecrated principally to their defence.

QUESNELISM.—The theological errors of Quesnel found their most complete expression in his "Réflexions morales". Although they appear there only on occasions, disjointedly, in a fragmentary way, and are moreover hidden in the expression of pious considerations, they really form a systematic whole; they show their author to have adopted a radically false but coherent system, which is fundamentally only a synthesis of the systems of Baius and Jansenius. To make this clear, one has only to compare the hundred and one propositions condemned in the Bull "Unigenitus", and faithfully extracted from the "Réflexions morales" with the theories previously defended by the Bishop of Ypres and his predecessor in the University of Louvain. For Quesnel, like Baius, conceived human nature in its three successive states: innocence, fall, and restoration. All his essential theses are based on a confusion between the natural and the supernatural order, which neces-

sarily entailed the assertion of an intrinsic difference in regard to gratuity as well as to efficacy, between the grace of the Creator and the grace of the Redeemer. "The grace of Adam produced only human merits" (prop. 34); but "being a consequence of the creation, it was due to nature when whole and unimpaired" (prop. 35). Its loss through the original fall mutilated our nature, and man having become "a sinner is, without the grace of the Liberator, free only to do evil" (prop. 38). Moreover, this grace "is never given except by faith" (prop. 26). Faith which "is the first grace and the source of all the others" (prop. 27), is to be understood as "operative faith, and it works only by charity" (prop. 51). Consequently "outside of the Church no grace is given" (prop. 29), and "the first grace given to the sinner being the remission of sins" (prop. 28), all his acts, as long as he remains a sinner, are sins (prop. 44-8), so that "the prayer of the wicked is a new sin, and what God grants to them is a fresh condemnation" (prop. 59).

This is all resumed in the thesis of the double contrary love: "There are only two loves, from which all our volitions and all our actions spring: the love of God (charity properly so called) which refers everything to God and which God rewards; and love of self and of the world, which is evil as it does not refer to God what should be referred to Him" (prop. 44). From this follow not only the uselessness, but the malice and the evil effects of attrition, that is, of all repentance which does not arise from pure charity; for, "fear restrains only the hands; the heart remains attached to sin, as long as it is not led by the love of justice" (prop. 61); and "he who refrains from evil only through fear of punishment has already sinned in his heart" (prop. 62). Thus, the erroneous conception of the really gratuitous and supernatural character of the original grace bore its legitimate fruits, rigorism and despair; it resulted, as far as concerns attrition, in a conclusion already condemned by the Council of Trent. In Quesnel we find likewise the doctrine of the "Augustinus" (see JANSENIUS). Like that famous book, the "Réflexions Morales" did not admit either purely sufficient grace or real liberty of indifference; on the contrary, it denied them in many formulas "Grace is the operation of the omnipotent hand of God, which nothing can hinder or retard" (prop. 10), "it is nothing but the omnipotent will of God who commands and who executes his commands" (prop. 11). "When God, no matter when or where, wishes to save a soul, the will of God is infallibly carried into effect" (prop. 12). "When God wills to save a soul and touches it with the interior hand of his grace, no human will can resist it" (prop. 13); "there is no attraction but yields to the attraction of grace, because nothing resists the Omnipotent" (prop. 16). In a word, the action of grace can and must be likened to that by which God created the world, realized the Incarnation, raised Jesus Christ from the dead, and by which He worked every other miracle (prop. 20-5).

Having admitted all this, it is not astonishing that the Divine precepts cannot be observed by men of good will who make the effort. For, on the one hand, "the grace of Jesus Christ, the efficacious principle of all good, is necessary for any good work whatsoever; without it not only is nothing done but nothing can be done" (prop. 2); "the will without prevent grace has no light save to go wrong, no zeal but to hasten to destruction, no strength but to wound itself: it is capable of all evil, and incapable of any good" (prop. 39). On the other hand, when grace is present and acting one never resists it. If therefore anyone fail in his duty, it can only be because he has not received the indispensable grace. For "grace is that voice of the Father teaching men interiorly and leading them to Jesus Christ; who-

ever, having heard the exterior voice of the Son, does not come to him, has not been taught by the Father" (prop. 17). And yet, according to Quesnel, man will be held guilty and condemned for those transgressions which he cannot possibly avoid (prop. 40). But, since the observing of commandments and therefore of the conditions necessary for salvation is not within the reach of all, it is evident that neither the intention of God to save nor the efficacy of the sufferings of the Saviour extend to all mankind. So "all those whom God wishes to save through Christ are infallibly saved" (prop. 30), and if "Christ Himself delivered Himself up to death", it was solely "to snatch the first-born, that is the elect, from the hand of the exterminating angel" (prop. 32).

All these extraordinary ideas of Quesnel's concerning grace, and his obstinate defence of them against legitimate authority had, as a practical and logical result, a second group of errors no less serious about the Church, its membership, discipline, and government in general. According to Quesnel, the Church is invisible; for it comprises "as members only the saints" or "the elect and the just" (prop. 72-7), and "a person is separated from it by not living according to the Gospel as much as by not believing in the Gospel" (prop. 78). It is an abuse in the Church "to forbid Christians to read the Holy Scriptures and especially the Gospel" (prop. 85), for this reading "is necessary to all, in every place and at all times" (prop. 79-84). "It is the Church that has the power of excommunicating, to be used by the chief pastors with the consent, at least presumed, of the whole body" (prop. 90). This, as the author states explicitly in his seventh "Mémoire", supposes that the multitude of the faithful, without distinction of rank, is properly speaking the sole depository of all ecclesiastical power; but, as it cannot exercise this power by itself, the community entrusts it to the bishops and the pope, who are its agents and its mandatories; and, in this sense, the pope is only "the ministerial head" of the episcopal body. Moreover, "the fear of an unjust excommunication must never keep us from doing our duty" (prop. 91), "to suffer in peace an undeserved excommunication and anathema rather than betray the truth is to imitate St. Paul" (prop. 92). The directly personal character and object of these last declarations are apparent. The same may be said of the articles that protest against the abuse of multiplying oaths among Christians (prop. 101), or speak of the contempt, intolerance, and persecution to which truth is subjected (prop. 93-100), and which, crowning this sad arraignment with an assertion more offensive than the others, see in the abuses pretended to have been discovered "one of the most striking proofs of the senile decay of the Church" (prop. 95).

J. FORGET.

Quevedo, JUAN DE, Franciscan, native of Bejori, Old Castile, Spain; d. at Barcelona, 24 December, 1519. His antecedents are unknown. At the request of King Ferdinand, husband of Queen Isabella, Pope Leo X, on 28 August, 1513, appointed Quevedo bishop of Santa Maria de la Antigua, or Darien, on the Isthmus, and he thus became the first bishop on the mainland of America. Accompanied by several Franciscans, Bishop Quevedo on 12 April, 1514, embarked at San Lucar with Pedrarias (Pedro Arias de Avila, or Davila), who had been named governor of Darien. The expedition reached its destination 30 June. The governor and his officers, despite royal warnings to heed the advice of Quevedo, committed the most frightful cruelties, not only against the Indians, but also against rivals, of which the beheading of Vasco Nuñez de Balboa, the discoverer of the

Pacific Ocean, is not the least. Las Casas accused Quevedo of having violated a trust, accumulated wealth, and neglected the Indians; but Las Casas was frequently unjust in his condemnations. It is impossible to determine how much truth or untruth his charges contain. Quevedo returned to Spain (1518) and presented two memorials to King Charles. One was against Pedrarias, and the other advocated restricting the powers of all governors in the New World for the better protection of the natives. When these documents were shown to Las Casas, he offered to countersign them. Quevedo declared that all the aborigines of America, as far as he had observed them, appeared to be a race of men whom it would be impossible to instruct or improve unless they were collected in villages or missions and kept under continual supervision. In this he was right, as all subsequent experience has shown. Bishop Quevedo soon fell sick and died at Barcelona.

ZEPHYRIN ENGELHARDT.

Quiche (UTLATECA), the principal aboriginal tribe or nation of Guatemala. They belong to the great Mayan linguistic stock (see MAYA INDIANS), as do also their neighbours in the same state, the Cakchiquel, Pokonchi, and Tzutnhil, the four dialects constituting but one language. The Quiche occupied north-central Guatemala, including the present districts of Quiche, Totonicapan, and a part of Quezaltenango. Like those of the other Mayan tribes, their traditions pointed to a northern or north-eastern origin, and their fairly authentic history went back to about A. D. 700. (Maya history seems fairly authentic as far back as the second century.) They were subjugated by Pedro de Alvarado about 1525, with even more than the customary atrocities, and rapidly declined under the system of slavery and heavy tribute imposed, notwithstanding the warnings of the pope and the humane laws promulgated by the Spanish monarch, at the instance of Las Casas. Even before the conquest was complete the Dominican Fathers Pontaz and de Torres had taken up their residence among the Quiche and begun the work of Christianization. In 1530 Father Francisco Marroquín (d. 1563) arrived from Spain to organize the Church in Guatemala, and in 1533 was confirmed as bishop. He gave special attention to the Indians and their languages, becoming particularly proficient in the Quiche, into which language he translated the catechism. On his appeal Father Las Casas (1536) established at Santiago a convent of Dominicans for the conversion of the natives. They were reinforced two years later by Fathers Zambrano and Dardon, of the Order of Mercy (*Merced*), who established a convent of that order in the same city. Under these two orders, working in harmony together with the Franciscans, who entered the field in 1541, the conversion of the Indians was gradually effected, the new converts being gathered into towns for their better government and instruction. The entire tribe is long since Christian, although many of the ancient rites and beliefs persist in daily life. Their present number is near 150,000.

In agricultural habit, architecture, literary method and productiveness, religious ceremonial, and general culture, the ancient Quiche resembled the Maya, with only minor differences. In their genesis myth (as recorded in the "Popol Vuh"), the earth was brought into form by Gugumatx, the Plumed Serpent (equivalent to the *Quetzalevati* of the Aztec), who finally created four men and four women, who became the ancestors of the race, assigning to each pair at the same time a special tutelary god, whose first duty it was to produce fire and light, to clear the world

of evil monsters and to institute ceremonies and sacrifices.

The "Popol Vuh", or "National Book", the great literary monument of the Quiche, is a compendium of their ancient traditions handed down from before the conquest. The present version, evidently a copy from an older record, was written in the Quiche language by one of the tribe, apparently shortly after the conquest. It was first brought to attention through a Spanish translation by the Dominican Father Francisco Ximénez (c. 1725). In 1861 a more correct French translation, with the original text, was published in Paris by the Abbé Brasseur de Bourbourg. Of the work Brinton says: "This may well be considered one of the most valuable monuments of ancient American literature and its substantial authenticity cannot be doubted."

JAMES MOONEY.

Quichua Indians, formerly the dominant people of the Empire of Peru, and still the largest homogeneous body of Indians in existence, constituting the bulk of the rural population of Peru and Ecuador. The name—written also Qquichua, Quechua, Kechua—most probably signifies those who "speak correctly", as distinguished from tribes from alien stock. The numerous tribes or small nations comprising the Quichuan linguistic stock occupied a territory nearly

QUICHUA TYPES

conterminous with that of the empire at its greatest extent, but reaching out somewhat beyond its borders on the north, and extending on the south, with interruptions, to about Coquimbo, Chile, at 30° S. lat. The Inca seem to have had their original territory somewhere between Paucartambo and Cuzco. The Quichua proper, living south from Cuzco, were among their earliest conquests. Of the cognate tribes the principal were the Huancavilca, Manta, Cara, Cañari, and Quito (Ecuador); the Lamano, Rucana, and Quichua proper (Peru), the latter about Cuzco and the upper Apurimac in central Peru, all of a high stage of civilization; the cognate Malaba and other small tribes above Esmeraldas, on the Ecuador-Colombia frontier, remained unconquered and uncivilized. Of the nations or tribes conquered and incorporated by the empire, but of alien stock, the principal were the Aymará tribes, on the Peru-Bolivia border; the Yunca tribes, on the coast from the Gulf of Guayaquil to below Truxillo; and the Calchaqui, in north-west Argentina. The Aymará were probably the direct originators and inspirers of the Quichua civilization, and still preserve their separate identity and language to the number of over half a million souls of pure or

mixed blood. At the period of its greatest expansion, about the year 1500, the Empire of Peru probably contained at least ten million souls. Under the Spaniards the natives rapidly decreased. In 1580 an official census gave them as 8,280,000 souls. In 1839 d'Orbigny

STONE PILLARS OF HATUNCOLLA, PERU

estimated the Quichua and Aymará groups respectively at approximately 1,393,000 and 561,000 souls, about one third of each being of mixed blood. The present total probably approximates 2,500,000, but separate Indian figures are not available.

The foundations of Quichua history are laid in

the mythic period, but the sequence of events may be traced with fair degree of probability back to about the year 1000. According to tradition their culture hero appeared first at Tiahuanuco (Lake Titicaca); he brought about order upon earth and apportioned its sovereignty among four rulers, one of whom was Ayra-Manco. Ayra-Manco was one of three wonder-working brothers, who, with their three sisters, had their residence at Pavac-tambo, "House of Veneration", south of the site of Cuzco, or according to another version, at Paucar-tambo, "House of Beauty", some two hundred miles to the north-west. Owing to a dispute over the possession of a magic golden sling the brothers separated, two of them being finally transformed into stone statues, while the third by supernatural command journeyed to Cuzco (i. e. navel, or centre), where he built a temple to the sun and established his capital as the first Inca king of Peru, under the title of Manco Capac, "Manco the Ruler". Eliminating the mythic features, Manco Capac's period is fixed by Bollaert at about the middle of the eleventh century. Without conceding the extravagant claims of Montesinos, who gives a list of 101 Inca rulers up to the Spanish conquest, we may assume that his work fairly summarizes the historical traditions of the Quichua. The earlier rulers seem to have devoted their attention largely to the elaboration of a calendar, the regulation of religion, and the building up of their kingdom by concessions of land to refugees from various quarters. Almost from the beginning there were established cloistered orders of priests and virgins of the sun.

There is probably no foundation for the claim advanced by Montesinos that the use of letters was known in remote antiquity, but subsequently lost. So far as known, the *quipu* was the only mnemonic system in use in Peru. Rocca, the eleventh (?) ruler before the conquest, is said to have been the first to assume to himself and his successors the title of Inca. The Calchaqui of Tucuman were subdued under Viracocha (about 1330?); the Chincha and Chimú, to the latter of whom belonged the great temple of Pachacamac, about 1400. The Moxos of eastern Bolivia were brought into alliance by Yupanqui (d. 1439). Tupac Yupanqui, toward the close of the fifteenth century, subdued the Cañari of Ecuador, and began the conquest of Quito, which was accomplished by his son, Huayna Capac, in 1487. Huayna Capac divided the sovereignty between his two sons, giving Quito and the northern provinces to Atahualpa, and leaving the southern provinces, or Peru proper, to Huascar. On his death in 1525 civil war soon broke out, and almost at the same time Pizarro's band landed on the

coast. Huascar was captured by his royal brother and was killed in 1533. Within the year the Empire of Peru was brought to an end, after a short struggle, by the treacherous seizure of Atahualpa himself by Pizarro, by whom he was executed on 29 August, 1533 (see PERU). Tupac Amaru, nephew of Huascar and last of the direct claimants to imperial dignity, was beheaded by order of the viceroy in 1571.

The natives were now parcelled out into *repartimientos* and *mitayos* as slaves, or forced labourers, the result being the swift and terrible wasting of their numbers. Although the spirit of the Indians was well-nigh broken there were occasional outbreaks, the most notable of which was the great rising of 1780 led by another Tupac Amaru, claiming descent from the old Inca race, who for a time restored Indian supremacy over a large extent of territory. Being finally taken he was butchered at Cuzco, together with his wife, children and all his relatives, with a

INCA PRINCE IN ROYAL COSTUME

barbarous cruelty never exceeded in history. His sacrifice, however, resulted in a mitigation of the oppressive system, which was finally abolished at the close of the war of independence (1824), in which the Indians bore their full part. With the establishment of settled conditions after the Conquest, the work of Christianizing the natives was begun, chiefly by the Dominicans and Jesuits, and before the close of the seventeenth century practically the whole of the native race of the former empire, west of the Cordilleras, was converted.

The civilization of the ancient Quichua was not quite equal in some respects to that of the Maya nations of Yucatan and Guatemala. The social organization, while imperial in form, was really based upon the clan system. For administrative purposes the empire was divided into four great districts (*suyu*), respectively north, south, east, and west from Cuzco, the capital. Land was held and tilled by the clan in common, and every able-bodied person, not assigned to other service, was a producer. Of the crop, one-fourth was assigned to the workers and their families; one-fourth to the dependent sick, widows, and orphans; one-fourth to the Government,

and one-fourth to religion. From the one-half claimed for Government and religion a portion was held in reserve for famine seasons and other emergencies. Seeds, wool, leather, and cotton were also distributed, under supervision of the Government, which also regulated the ownership of livestock. Military service was a universal obligation. To hasten the assimilation of the conquered peoples large bodies of them were regularly colonized in the older portions of the empire, the inhabitants of these

EARTHEN VASE FROM TRUJILLO, PROBABLY OF YUNCA ORIGIN

latter districts being transplanted to the new possessions. The religion of the Sun was made obligatory throughout the empire as was also, so far as possible, the use of the Quichua language.

There seems to be no doubt that the ancient Peruvians had attained the monotheistic idea. Their great god was the Sun, from whom the Incas themselves claimed descent, although the white-skinned and bearded culture

hero, Vriacocha, "Sea Foam" (?), apparently a personification of the dawn, was regarded with almost equal veneration. The emperor was the great high priest of the nation. The ceremonial forms were elaborate and magnificent and without the bloody rites so frequent and sickening in other native systems. The great Temple of the Sun in Cuzco contained a massive golden image of the sun, and the walls and roof were covered with plates of solid gold, which the unfortunate Atahualpa in vain delivered as a ransom to the faithless Pizarro. The great Sun temple at Quito and the temple dedicated to the Yunca god Pachacamac were of nearly equal magnificence. The dead were wrapt in cloths and deposited in graves or tombs of various construction. At Ancon on the coast is a vast necropolis from which thousands of mummified bodies have been resurrected. Near Trujillo, in the Yunca country, are several great burial pyramids, one of them two hundred feet high, filled with bodies in separate niches. From one of these pyramids sixteen millions of dollars in gold are said to have been taken.

The golden wealth of Peru under the Incas almost surpasses belief. The country was rich in the precious metal, which was systematically mined by the Government. Silver was mined in due proportion and worked, like gold, into objects of skill and beauty. Tools, weapons and household implements were fashioned of copper, bronze, and stone. Iron was unknown. Emeralds and porphyry were in use for decorative or sculptural purposes. Their potters excelled in general workmanship and in variety and ingenuity of design. Head flattening prevailed. Clothing, blankets, and other textile fabrics were woven from cotton and from the hair of their flocks. Agriculture had reached a high standard, with systematic irrigation, mountain terracing and use of guano manure from the coast islands. Great herds of llamas and alpacas were kept as burden-bearers or for their hair. The vicuña was protected for game purposes. It is in architecture and engineering that

the Quichua have left their most enduring monument. Their temples, fortresses, canals, and stupendous mountain roads are still the wonder of every traveller; and the great imperial highway stretching along the Andes for a thousand miles from Cuzco to Quito was the equal of any of the famous Roman roads, and is still in good preservation.

The modern Quichua is of medium height, with large chest, dark-brown skin, and well-marked features; strong, enduring and long lived; industrious, gentle, and disposed to melancholy. He is given to music and song recitation. He is fond of church ceremonial, with which he frequently mingles some of his ancient rites, and loves to set up wayside shrines and decorate them with flowers. Their houses, outside of the towns, are of stone or wood, and thatched with grass, of one room, without window or chimney. Their favourite dish is *chupe*, a highly peppered meat stew, and the favourite intoxicant is *chicha*, of corn chewed, boiled with water, and fermented. They are great smokers. They are dressed in woollen clothing of their own weaving, generally surmounted by a cloak, and a white sombrero or skull-cap. The Quichua language has been extensively cultivated; it is capable of expressing fine shades of meaning. Of the several dialects, that of Cuzco is considered the standard and that of Quito the most remote. It is still the language of Ecuador and Peru, outside of the principal cities, and even of the wild tribes formerly attached to the Jesuit and Franciscan missions of the upper tributaries of the Amazon. The earliest study of it is the "Gramática de la lengua general del Perú", by the Dominican Father Domingo de Santo Tomás (Valladolid, 1560). Between that date and 1754 nine other grammars and dictionaries by the missionaries were published at Lima. Of modern studies the most important are: Markham, "Grammar and Dictionary of Quichua"

MEGALITHIC "SUN CIRCLE" SILLUSTANI NEAR RENO, SOUTH PERU, PROBABLY OF AYMARU ORIGIN

(London, 1864); Anchorena, "Gramática Quechua" (Lima, 1874); von Tschudi, "Organismus der Khetsua Sprache" (Leipzig, 1887); and Middendorf, "Das Ruma Simi oder die Keshua Sprache" (Leipzig, 1890). Of its abundant native literature the most remarkable example is the pre-Conquest drama of Allanta, of which the best of many editions is that of Zagarra, "Ollanta: Drame en vers Quechnas du temps des Incas" (Paris, 1878, tr. London, 1871). A collection of modern native folk songs, under the title of "Yaravies. Quitenos", was published by Espada at Madrid in 1881.

London, 1581).

JAMES MOONEY

Quicumque Christum Quæritis, the opening line of the twelfth (in honour of the Epiphany) and last poem in the "Cathemerinon" of Prudentius (q. v.). This twelfth poem or hymn contains 52 iambic dimeter strophes, and an irregular selection from its 208 lines has furnished four hymns to the Roman Breviary, all of which conclude with the usual Marian doxology ("Jesu tibi sit gloria" etc., not composed by Prudentius), slightly varied to make the doxology appropriate for the several feasts employing the hymns. The four centos are:

(1) *Quicumque Christum quæritis* (Matins and first and second Vespers of the feast of the Transfiguration), comprising sixteen lines (1-4, 37-44, 85-88) and the doxology (which changes its second line):

Jesu, tibi sit gloria,
Qui te revelas parvulis, etc.

Although written for the Epiphany, the lines forming the cento apply well to the Transfiguration, as Daniel notes (Thes. Hymnol., I, p. 136). Of the 18 translations in English verse, twelve are by Catholics.

(2) *O sola magnarum urbium* (introduced by Pius V into the office of the Epiphany and assigned to Lauds), comprises sixteen lines (77-80, 5-8, 61-4, 69-72) with the doxology (which changes its second line):

Jesu, tibi sit gloria,
Qui apparuisti gentibus, etc.

The Roman Breviary changes the opening words of the second strophe, "Hæc stella" into "Quem stella". The hymn has never been adopted by the Carthusians, Cistercians, Dominicans (these last using at Lauds the hymn "A patre unigenitus"). Of the seventeen translations into English verse, six are by Catholics.

(3) *Audit tyrannus anxius* (Matins of the Holy Innocents and of the octave day), comprising twelve lines (93-100, 133-6) and the (unchanged) doxology, "Jesu tibi sit gloria" etc. The Roman Breviary changes the opening word of the third strophe "Quo proficit" into "Quid proficit".

(4) *Salvete flores martyrum* (Lauds and Vespers of feast of the Holy Innocents and of the octave day), comprising (in the Roman Breviary cento) 8 lines (125-132) and the (unchanged) doxology, "Jesu, tibi sit gloria" etc. The third line of the second strophe is, in the Roman Breviary, "Aram sub ipsam . . .", instead of the original "Aram ante ipsam . . ."; (or the other variants of this much-disputed line)—a change which not only consults the interests of classical prosody but happily suggests the words of the Apocalypse (vi, 9): "Vidi sub altare animas inter-

fectorum . . .". Until the middle of the sixteenth century the Roman Breviary had no special hymns for this feast, but in 1568 hymns (3) and (4) were assigned by Pius V. The two hymns have never been adopted by the Carthusians, the Cistercians, the Dominicans, these last chanting at Lauds only the strophe from the abecedarium of Sedulius (lines 37-40):

Caterva matrum personat
Collisa deflens pignora,
Quorum tyrannus millia
Christo sacrauit victimas.

Clicthoue, Cassandre, Tommasi, favour the doxology:

Sit trinitati gloria,
Virtus, honor, victoria,
Quae dat coronam testibus
Per sæculorum sæcula—

But the Roman Breviary retains the usual doxology, which better connects the feast with its true background of the Christmas cycle. In selections of various length and arrangement, the "Salvete flores martyrum" was in ancient liturgical use, and substantially comprised both hymns (3) and (4) (Daniel, I, p. 124; IV, p. 120; Dreves, *Anal. Hymn.*, L., p. 27, giving many MSS. references, some dating back to the tenth century), and other strophes not now in use. The older breviaries inverted the order of Prudentius, placing the "Salvete flores" etc., before the "Audit tyrannus" etc.; but the Roman Breviary follows the original order, showing us at Matins the bloody spectacle, and at Lauds saluting the victors, the "flores martyrum". The Marquess of Bute's Roman Breviary (1879) gives Neale's translation

All hail! ye infant Martyr flowers!
Cut off in life's first dawning hours,
As rose-buds snapped in tempest strife,
When Herod sought your Saviour's life.

The version has the value of retaining the similarity of rhythm with the original; but if ever a departure from this course is justifiable, Father Caswall has vindicated his action in changing the rhythm:

Flowers of martyrdom, all hail!
Smitten by the tyrant foe
On life's threshold—as the gale
Strews the roses ere they blow.

Not to speak of the beauty and fidelity of the rendering, the trochaic rhythm vividly conveys the sense of suddenness of the onslaught, the ruthlessness and swiftness of the destruction. Caswall's version has been adopted by the (Baltimore) Manual of Prayers (with the first line changed into "Lovely flowers of Martyrs, hail!"). The Paris Breviary text had five strophes (exclusive of doxology), but altered the first strophe as follows (in order to avoid unpleasant elisions):

Salvete flores martyrum,
In lucis ipso limine
Quos sævus ensis messuit,
Ceum turbo nascentes rosas.

There are in all about twenty-five versions into English, of which about half are by Catholics.

JULIAN, *Dict. of Hymnology* (2nd ed.), 946, 1690, for first lines of translations, etc. To his list should be added the trans. of all four hymns in BAGSHAW, *Breviary Hymns and Missal Sequences* (London, 1900), and in DONAHOE, *Early Christian Hymns* (New York, 1908); also, HENRY, *Hymns of the Holy Innocents in Ecclesiastical Review* (Dec., 1896), 557-65, for Latin text and English versions and comment; KAYSER, *Beiträge zur Geschichte u. Erklärung der ältesten Kirchenhymnen* (Paderborn, 1881), 294-317, for texts of four hymns and extensive comment; PIMONT, *Hymnes du bréviaire romain*, II (Paris, 1878), 65-77, for texts and much comment on the hymns of the Holy Innocents; TRENCH, *Sacred Latin Poetry* (3rd ed., London, 1874), gives Latin text (in 36 lines) of no. (4); *Hymns Ancient and Modern*, historical ed. (London, 1909), nos. 72, 82, for Latin and English texts, musical settings, and comment on (2) and (4). The official or "typical" melodies for the four hymns will be found in the Antiphonary now passing through the Vatican press. No. 2 (p. 213) and no. 4 (p. 192) have appeared in proof sheets (1911).

H. T. HENRY.

Quierzy, COUNCILS OF (KIERZY, CARISIACUM). Several councils were held at Quierzy, a royal residence under the Carolingians, but now an insignificant village on the Oise in the French Department of Aisne. The synod of September, 838, ordered the monks of Saint Calais in the Diocese of Le Mans to return to their monastery, from which they falsely claimed to have been expelled by their bishop. It also condemned some of the liturgical opinions of Amalarius of Metz (q. v.). The two succeeding councils, held respectively in 849 and 853, dealt with Gottschalk (q. v.) and his peculiar teaching respecting predestination. The first of these meetings sentenced the recalcitrant monk to corporal castigation, deposition from the priestly office and imprisonment; his books were to be burned. At the second synod the famous four decrees or chapters (*Capitula*) drawn up by Hincmar (q. v.) on the predestination question were published. They asserted: (1) the predestination of some to salvation, and, in consequence of Divine foreknowledge, the doom of others to everlasting punishment; (2) the remedy for the evil tendencies of free will through grace; (3) the Divine intention of saving all men; (4) the fact of universal redemption. The council held in February, 857, aimed at suppressing the disorders then so prevalent in the kingdom of Charles the Bald. The synod of 858 was attended by the bishops who remained loyal to Charles the Bald during the invasion of his dominions by Louis the German. It addressed a firm but conciliatory letter to the invader stating its attitude towards him for the intentions which he expressed, but which his actions belied.

HEFELE-LECLERCQ, *Histoire des conciles*, IV (Paris, 1911), i, 101-3, 150-6, 197-9, 212, 214-5, good bibliography.

N. A. WEBER.

Quiet, PRAYER OF.—The Prayer of Quiet is regarded by all writers on mystical theology as one of the degrees of contemplation. It has to be distinguished therefore from meditation and from affective prayer. It holds an intermediary place between the latter and the prayer of union. As the name implies the prayer of quiet is that in which the soul experiences an extraordinary peace and rest, accompanied by delight or pleasure in contemplating God as present. In this prayer God gives to the soul an intellectual knowledge of His presence, and makes it feel that it is really in communication with Him, although He does this in a somewhat obscure manner. The manifestation increases in distinctness, as the union with God becomes of a higher order. This mystic gift cannot be acquired, because it is supernatural. It is God Himself who makes His presence felt in the inmost soul. The certain sight of God therein obtained is not the same as the light of faith, though it is founded upon faith. The gift of wisdom is especially employed in this degree, as it is in every degree of contemplation. According to Scaramelli the office of this gift, at least to a certain extent, is to render God present to the soul and so much the more present as the gift is more abundant. Some authors say that this is not to be understood of the ordinary gift of wisdom which is necessarily connected with sanctifying grace and is possessed by every just man, but of wisdom as one of the *charismata* or extraordinary graces of the Holy Ghost, specially granted to privileged souls.

(1) At first the prayer of quiet is given from time to time only and then merely for a few minutes. (2) It takes place when the soul has already arrived at the prayer of recollection and silence, or what some authors call the prayer of simplicity. (3) A degree of prayer is not a definite state excluding reversions to former states. (4) A time often comes when the prayer of quiet is not only very frequent but *habitual*. In this case it occurs not only at the time set for prayer, but every time that the thought of God presents itself.

(5) Even then it is subject to interruptions and alterations of intensity, sometimes strong and sometimes weak.

The prayer of quiet does not entirely impede the exercise of the faculties of the soul. The will alone remains captive. The intellect and memory appear to have greater activity for the things of God in this state, but not so much for worldly affairs. They may even escape the bounds of restraint and wander on strange and useless thoughts, and yet the will, attracted by the charm of the Divine presence, continues its delights, not wholly in a passive way, but capable of eliciting fervent affections and aspirations. As to the bodily senses St. Francis de Sales tells us that persons during the prayer of quiet can hear and remember things said near them; and, quoting St. Teresa, he observes that it is a species of superstition to be so jealous of our repose as to refrain from coughing, and almost from breathing for fear of losing it. God who is the author of this peace will not deprive us of it for unavoidable bodily motions, or even for involuntary wanderings of the imagination. The spiritual fruits are, interior peace which remains after the time of prayer, profound humility, aptitude and a disposition for spiritual duties, a heavenly light in the intellect, and stability of the will in goodness. It is by such fruits true mystics may be discerned and distinguished from false mystics.

ST. TERESA, *The Way of Perfection*; IDEM, *The Interior Castle*; ST. JOHN OF THE CROSS, *The Obscure Night*; IDEM, *Ascent of Mount Carmel*; ST. FRANCIS DE SALES, *Treatise on the Love of God*; POULAIN, *The Graces of Interior Prayer* (London, 1910).

A. DEVINE.

Quietism (Lat. *quies, quietus*, passivity) in the broadest sense is the doctrine which declares that man's highest perfection consists in a sort of psychical self-annihilation and a consequent absorption of the soul into the Divine Essence even during the present life. In the state of "quietude" the mind is wholly inactive; it no longer thinks or wills on its own account, but remains passive while God acts within it. Quietism is thus generally speaking a sort of false or exaggerated mysticism (q. v.), which under the guise of the loftiest spirituality contains erroneous notions which, if consistently followed, would prove fatal to morality. It is fostered by Pantheism and similar theories, and it involves peculiar notions concerning the Divine co-operation in human acts. In a narrower sense Quietism designates the mystical element in the teaching of various sects which have sprung up within the Church, only to be cast out as heretical. In some of these the Quietistic teaching has been the conspicuous error, in others it has been a mere corollary of more fundamental erroneous doctrine. Quietism finally, in the strictest acceptation of the term, is the doctrine put forth and defended in the seventeenth century by Molinos (q. v.) and Petrucci. Out of their teaching developed the less radical form known as Semiquietism, whose principal advocates were Fénelon (q. v.) and Madame Guyon (q. v.). All these varieties of Quietism insist with more or less emphasis on interior passivity as the essential condition of perfection; and all have been proscribed, in very explicit terms, by the Church.

In its essential features Quietism is a characteristic of the religions of India. Both Pantheistic Brahminism and Buddhism aim at a sort of self-annihilation, a state of indifference in which the soul enjoys an imperturbable tranquillity. And the means for bringing this about is the recognition of one's identity with Brahma, the all-god, or, for the Buddhist, the quenching of desire and the consequent attainment of Nirvana, incompletely in the present life, but completely after death. Among the Greeks the Quietistic tendency is represented by the Stoics. Along with Pantheism, which characterizes their theory of the world, they present in their *ἀπάθεια* an ideal which

recalls the indifference aimed at by the Oriental mystics. The wise man is he who has become independent, and free from all desire. According to some of the Stoics, the sage may indulge in the lowest kind of sensuality, so far as the body is concerned, without incurring the least defilement of his soul. The Neoplatonists (q. v.) held that the One gives rise to the *Nous* or Intellect, this to the world-soul, and this again to individual souls. These, in consequence of their union with matter, have forgotten their Divine origin. Hence the fundamental principle of morality is the return of the soul to its source. The supreme destiny of man and his highest happiness consists in rising to the contemplation of the One, not by thought but by ecstasy (*ἔκστασις*).

The origin of these Quietistic tendencies is not hard to discover. However strongly the Pantheistic conception of the world may appeal to the philosophic mind, it cannot do away with the obvious data of experience. To say that the soul is part of the Divine being or an emanation from God enhances, apparently, the dignity of man; but there still remains the fact that passion, desire, and moral evil make human life anything but Divine. Hence the craving for deliverance and peace which can be obtained only by some sort of withdrawal from action and from dependence on external things, and by a consequent immersion, more or less complete, in the Divine being. These aberrations of Mysticism continued even after the preaching of Christianity had revealed to mankind the truth concerning God, the moral order, and human destiny. Gnosticism (q. v.), especially the Antinomian School, looked for salvation in a sort of intuitive knowledge of the Divine which emancipated the "spiritual" from the obligations of the moral law. The same Quietistic tendency appears in the teaching of the Eucharites, or Messalians (q. v.), who maintained that prayer frees the body from passion and the soul from evil inclination, so that sacraments and penitential works are useless. They were condemned at the Synod of Side in Pamphilia (383) and at Ephesus (431). The Bogomili (q. v.) of the later Middle Ages were probably their lineal descendants.

Medieval Quietism is further represented in the vagaries of Hesychasm (q. v.), according to which the supreme aim of life on earth is the contemplation of the uncreated light whereby man is intimately united with God. The means for attaining to such contemplation are prayer, complete repose of body and will, and a process of auto-suggestion. Among the errors of the Beguines (q. v.) and Beghards condemned by the Council of Vienne (1311-12) are the propositions: that man in the present life can attain such a degree of perfection as to become utterly impeccable; that the "perfect" have no need to fast or pray, but may freely grant the body whatsoever it craves; that they are not subject to any human authority or bound by the precepts of the Church (see Denzinger-Bannwart, 471 sqq.). Similar exaggerations on the part of the Fraticelli (q. v.) led to their condemnation by John XXII in 1317 (Denzinger-Bannwart, 484 sqq.). The same pope in 1329 proscribed among the errors of Meister Eckhart (q. v.) the assertions that (prop. 10) we are totally transformed into God just as in the sacrament the bread is changed into the Body of Christ; that (14) since God wills that I should have sinned I do not wish that I had not sinned; that (18) we should bring forth the fruit not of external actions, which do not make us good, but of internal actions which are wrought by the Father abiding within us (Denzinger-Bannwart, 501 sqq.).

Quite in accord with their Pantheistic principles, the Brethren and Sisters of the Free Spirit (thirteenth to fifteenth century) held that they who have reached perfection, i. e. complete absorption in God, have no need of external worship, of sacraments, or of prayer;

they owe no obedience to any law, since their will is identical with God's will; and they may indulge their carnal desires to any extent without staining the soul. This is also substantially the teaching of the Illuminati (Alumbrados), a sect that disturbed Spain during the sixteenth and seventeenth centuries.

It was the Spaniard Michael de Molinos who developed Quietism in the strictest sense of the term. From his writings, especially from his "*Dux spiritualis*" (Rome, 1675), sixty-eight propositions were extracted and condemned by Innocent XI in 1687 (Denzinger-Bannwart, 1221 sqq.). The key-note of the system is contained in the first proposition: man must annihilate his powers and this is the inward way (*via interna*); in fact, the desire to do anything actively is offensive to God and hence one must abandon oneself entirely to God and thereafter remain as a lifeless body (prop. 2). By doing nothing the soul annihilates itself and returns to its source, the essence of God, in which it is transformed and divinized, and then God abides in it (5). In this inward way, the soul has not to think either of reward or of punishment, of heaven or hell, of death or eternity. It must not concern itself about its own state, its defects, or its progress in virtue; having once resigned its will to God it must let Him work out His will without any action of the soul itself (7-13). He who has thus committed himself entirely to God must not ask anything of God, or render thanks to Him; must take no account of temptations nor offer any active resistance; "and if nature be stirred one must permit its stirring because it is nature" (14-17). In prayer one must not use images or discursive thought, but must remain in "obscure faith" and in quiet, forgetting every distinct thought of the Divine attributes, abiding in God's presence to adore, love, and serve Him, but without producing any acts because with these God is not pleased. Whatever thoughts arise during prayer, even though they be impure or against faith, if they are not voluntarily encouraged nor voluntarily expelled but are suffered with indifference and resignation, do not hinder the prayer of faith but rather enhance its perfection. He who desires sensible devotion is seeking not God but himself; indeed, every sensible effect experienced in the spiritual life is abominable, filthy, unclean (18-20).

No preparation is required before Communion nor thanksgiving after other than that the soul remain in its usual state of passive resignation; and the soul must not endeavour to arouse in itself feelings of devotion. Interior souls resign themselves, in silence, to God; and the more thorough their resignation the more do they realize that they are unable to recite even the "*Pater Noster*". They should elicit no acts of love for the Blessed Virgin or the saints or the Humanity of Christ, because, as these are all sensible objects, love for them is also sensible. External works are not necessary to sanctification, and penitential works, i. e. voluntary mortification, should be cast off as a grievous and useless burden (32-40). God permits the demon to use "violence" with certain perfect souls even to the point of making them perform carnal actions either alone or with other persons. When these onsets occur, one must make no effort but let the demon have his way. Scruples and doubts must be set aside. In particular, these things are not to be mentioned in confession, because by not confessing them the soul overcomes the demon, acquires a "treasure of peace", and attains to closer union with God (41-52). The "inward way" has nothing to do with confession, confessors, cases of conscience, theology, or philosophy. Indeed, God sometimes makes it impossible for souls who are advanced in perfection to go to confession, and supplies them with as much grace as they would receive in the Sacrament of Penance. The inward way leads on to a state in which passion is extinguished, sin is no more, sense is

deadened, and the soul, willing only what God wills, enjoys an imperturbable peace: this is the mystic death. They who pursue this path must obey their superiors outwardly; even the vow of obedience taken by religious extends only to outward actions, only God and the director enter into the soul's interior. To say that the soul in its interior life should be governed by the bishop is a new and very ridiculous doctrine; for on hidden things the Church passes no judgment (55-68).

From this summary it is readily seen why the Church condemned Quietism. Nevertheless, these doctrines had found adherents even in the higher ranks of the clergy, such as the Oratorian, Pietro Matteo Petrucci (1636-1701), who was made Bishop of Jesi (1681), and raised to the cardinalate (1686). His works on Mysticism and the spiritual life were criticized by the Jesuit Paolo Segneri, and a controversy ensued which resulted in an examination of the whole question by the Inquisition, and the proscription of fifty-four propositions taken from eight of Petrucci's writings (1688). He submitted at once, resigned his bishopric in 1696, and was appointed by Innocent XII Apostolic visitor. Other leaders of the Quietist movement were: Joseph Beccarelli of Milan, who retracted before the Inquisition at Venice in 1710; François Malaval, a blind layman of Marseilles (1627-1719); and especially the Barnabite François Lacombe, the director of Mme. Guyon, whose views were embraced by Fénelon.

The doctrine contained in Fénelon's "Explication des Maximes des Saints" was suggested by the teachings of Molinos, but was less extreme in its principles and less dangerous in its application; it is usually designated as Semiquietism. The controversy between Bossuet and Fénelon has already been noticed (see FÉNELON). The latter submitted his book to the Holy See for examination, with the result that twenty-three propositions extracted from it were condemned by Innocent XII in 1699 (Denzinger-Bannwart, 1327 sqq.). According to Fénelon, there is an habitual state of the love of God which is wholly pure and disinterested, without fear of punishment or desire of reward. In this state the soul loves God for His own sake—not to gain merit, perfection, or happiness by loving Him; this is the contemplative or unitive life (Props. 1, 2). In the state of holy indifference, the soul has no longer any voluntary deliberate desire in its own behalf except on those occasions in which it does not faithfully co-operate with all the grace vouchsafed to it. In that state we seek nothing for ourselves, all for God; we desire salvation, not as our own deliverance or reward or supreme interest, but simply as something that God is pleased to will and that He would have us desire for His sake (4-6). The self-abandonment which Christ in the Gospel requires of us is simply the renunciation of our own interest, and the extreme trials that demand the exercise of this renunciation are temptations whereby God would purify our love, without holding out to us any hope even in regard to our eternal welfare. In such trials the soul, by a reflex conviction that does not reach its innermost depths, may have the invincible persuasion that it is justly reprobated by God. In this involuntary despair it accomplishes the absolute sacrifice of its own interest in regard to eternity and loses all interested hope; but in its higher and most inward acts it never loses perfect hope which is the disinterested desire of obtaining the Divine promises (7-12). While meditation consists in discursive acts, there is a state of contemplation so sublime and perfect that it becomes habitual, i. e. whenever the soul prays, its prayer is contemplative, not discursive, and it needs not to return to methodical meditation (15-16). In the passive state the soul exercises all the virtues without adverting to the fact that they are

virtues; its only thought is to do what God wills; it desires even love, not as its own perfection and happiness, but simply in so far as love is what God asks of us (18-19). In confession the transformed soul should detest its sins and seek forgiveness not as its own purification and deliverance but as something that God wills and that He would have us will for His glory (20). Though this doctrine of pure love is the evangelical perfection recognized in the whole course of tradition, the earlier directors of souls exhorted the multitude of the just only to practices of interested love proportioned to the graces bestowed on them. Pure love alone constitutes the whole interior life and is the one principle and motive of all actions that are deliberate and meritorious (22-23).

While these condemnations showed the determined attitude of the Church against Quietism both in its extreme and in its moderate form, Protestantism contained certain elements which the Quietist might have consistently adopted. The doctrine of justification by faith alone, i. e. without good works, accorded very well with Quietistic passivity. In the "visible Church" as proposed by the Reformers, the Quietist would have found a congenial refuge from the control of ecclesiastical authority. And the attempt to make the religious life an affair of the individual soul in its direct dealings with God was no less Protestant than it was Quietistic. In particular, the rejection, in part or in whole, of the sacramental system, would lead the devout Protestant to a Quietist attitude. As a matter of fact, traces of Quietism are found in early Methodism and Quakerism (the "inward light"). But in its later developments Protestantism has come to lay emphasis on the active, rather than the inert, contemplative life. Whereas Luther maintained that faith without work suffices for salvation, his successors at the present day attach little importance to dogmatic belief, but insist much on "religion as a life", i. e. as action. The Catholic teaching avoids such extremes. The soul indeed, assisted by Divine grace, can reach a high degree of contemplation, of detachment from created things and of spiritual union with God. But such perfection, far from leading to Quietistic passivity and Subjectivism, implies rather a more earnest endeavour to labour for God's glory, a more thorough obedience to lawful authority and above all a more complete subjugation of sensuous impulse and tendency.

Quigley, James Edward. See CHICAGO, ARCHDIOCESE OF.

Quignónes. See QUIÑONES, FRANCIS.

Quilon, Diocese of (QUILONENSIS), in India on the Malabar coast, suffragan of Verapoly, comprises the southern half of the native state of Travancore, and the British territories of Tangacherry and Anjengo. It stretches from the northern branch of the River Ranees down to Cape Comorin, is bounded on the east by the slope of the Ghauts, and on the west by the Indian Ocean, on the coast of which, however, there is one narrow strip belonging to the Diocese of Cochin. Out of a total population of 1,600,000, the Catholics number 116,090, having 161 churches and 29 chapels, served by 59 priests, of whom 17 are Discalced Carmelite Fathers from various provinces of Europe, the rest being native clergy. The bishop's residence, cathedral, and the preparatory seminary with 32

students are all at Quilon, and there are 9 candidates for the priesthood at Kandy Seminary, Ceylon.

HISTORY.—Down to 1838 the territory comprised by this diocese formed part of the Padroado Diocese of Cochin (see COCHIN, DIOCESE OF). In that year, by the Brief "Multa Præclare", jurisdiction was withdrawn from the See of Cochin, and this portion of its territory was placed under the Vicar Apostolic of Malabar (Verapoly). In 1845 its separation into a distinct vicariate was decreed by the Holy See. This arrangement was effected in 1853, and on the establishment of the hierarchy in 1886 it was finally elevated into an episcopal see, suffragan to Verapoly.

List of prelates (all Carmelites):—

Bernardino Baccinelli of St. Teresa, pro-vicar Apostolic, 1845–53;

Bernardino Pontanova of St. Agnes, nominated 1853 but died shortly after;

Maurice of St. Albert, nominated 1854 but died shortly after;

Charles Hyacinth Valerga, 1854–64;

Marie Ephrem Garrelon, 1866–68;

Ildephonsus Borgna, 1871–83;

Ferdinand Maria Ossi, 1883, became first bishop in 1887, died 1905;

Aloysius Maria Benziger, present bishop from 1905.

RELIGIOUS COMMUNITIES.—Disalced Carmelite missionaries, 17; Convent of Disalced Carmelites at Trivandrum, 5 fathers; Sisters of the Third Order Apostolic of Our Lady of Mount Carmel, 37 (of whom five are Europeans) and 2 novices, for the education of girls and the care of orphans, with convents at Trivandrum, Quilon, and Tangacherry; Missionary Canonesses of St. Augustine, 14 European sisters and 13 native lay sisters, for the education of girls and the care of orphans, with convents at Mulagamude, Cape Comorin, and Nagercoil; Sisters of the Holy Cross (from Menzingen), 9 sisters, for nursing the sick in government hospitals at Trivandrum and Quilon; Sisters of the Holy and Immaculate Heart of Mary (from Pondicherry), 8 sisters, 3 novices, and 5 postulants, for instruction of girls in vernacular schools, with convent and novitiate at Cagneracode.

BOYS' SCHOOLS.—The Children's Friend Normal School, Quilon, for training Malayalam schoolmasters, with 59 students; St. Francis's Normal School, Nagercoil, for training Tamil schoolmasters, with 72 students; St. Joseph's English High School, Trivandrum, with 633 pupils; St. Aloysius's English High School, Quilon, with 413 pupils.

GIRLS' SCHOOLS.—Under Sisters of Third Order of Carmel: Holy Angels' Convent, Trivandrum, boarding establishment with 32 boarders, English high school with 435 pupils, industrial and technical school with 37 pupils; St. Joseph's Convent, Quilon, boarding establishment with 27 boarders, English middle school with 173 pupils, industrial school with 37 pupils; Convent of Our Lady of Mount Carmel, Tangacherry, boarding establishment with 15 boarders, English middle school with 71 in the English and 39 in the Malayalam department, industrial school with 31 pupils.

Under Canonesses of St. Augustine: Convent of the Holy Infant Jesus, Mulagamude, vernacular school with 350 pupils, industrial school with 276 pupils, besides 1250 outdoor lace-workers; Convent of the Immaculate Conception, Cape Comorin, vernacular and industrial schools with 120 pupils; St. Joseph's School, Nagercoil, with 200 pupils.

Under Sisters of the Holy Heart of Mary: Blessed Margaret's Home, Cagneracode, vernacular school with 60 pupils.

Besides these there are two mixed schools, viz., St. Joseph's Middle English School, Anjengo, with 173 pupils; St. Leo's vernacular middle school, Tekekaray, with 113 pupils. In other places, 132 ver-

nacular primary schools with 7060 pupils. Total number of schools in the diocese, 144; total of pupils, 10,857.

CHARITABLE INSTITUTIONS.—Orphanage for boys at Mulagamude, with 15 inmates; Holy Angels' Orphanage, for girls, Trivandrum, with 83 inmates; St. Joseph's Orphanage, for girls, Quilon, with 47 inmates; Mount Carmel Orphanage, for girls, Tangacherry, with 21 orphans; Infant Jesus Orphanage, Mulagamude, with 276 inmates, foundling home and widows' home; dispensary at Mulagamude; nursing department in general hospital, Trivandrum, women and children's hospital, Trivandrum, and district hospital, Quilon, under Sisters of the Holy Cross.

Madras Catholic Directory (1910).

ERNEST R. HULL.

Quimper, DIOCESE OF (CORISOPITENSIS), includes the Department of Finistère; as re-established by the Concordat of 1802 it embraces a large portion of the

THE CATHEDRAL, QUIMPER

ancient Diocese of Quimper, also known as the Diocese of Cornouailles, the whole of the Diocese of St. Pol de Léon, and a small part of the Dioceses of Tréguier and Vannes. From 1802 to 1859 it was suffragan of Tours, and since 1859 it has been a suffragan of Rennes.

I. DIOCESE OF QUIMPER.—We have two versions of the catalogue of the bishops of Quimper: one in the Cartulary of Quimperlé, of the twelfth century; the other preserved in a Quimper cartulary of the fifteenth century. Both mention a St. Corentinus as first Bishop of Quimper; his biography is of very late origin. Nothing accurate is known about him, but he is supposed by some to have been ordained by St. Martin in the fourth century, while others claim that he was a sixth-century monk. Duchesne has proved that the Diocese of Quimper must have been represented at the Council of Angers (453) by one of the four prelates, Sarmatio, Chariato, Rumoridus, and Viventius, and at the Council of Vannes (c. 465) by one of the two prelates Albinus and Liberatus. He puts little credence in the traditions that make St.

Gonoganus (Goennoc) or St. Allorus (Alori) successors of St. Corentinus. Among the bishops may be mentioned: Philippe de La Chambre, Cardinal de Boulogne (1546-50); Nicholas Cajetan (1550-60); Cardinal de Sermonetta, in 1536.

II. DIOCESE OF ST. POL DE LÉON.—The Christian religion seems to have been preached in Léon twenty years before the evangelization of Cornouaille, but ancient Breton chronology is very uncertain. The legend of St. Paul Aurelian, written in 884, shows that the Breton monks believed the See of Léon had been founded in the Merovingian epoch. Paul Aurelian, a Gallic monk, founder of monasteries at Ouessant on the north-west coast of Brittany and on the Island of Batz, was believed to have founded in an abandoned fort a monastery which gave origin to the town of St. Pol de Léon, afterwards the seat of a diocese. He was the first titular of the see, a wonder-worker and prophet, and was held to have died in 575 at the age of 140 years, after having been assisted in his labours by three successive coadjutors. Some of the legends give the names of three saints among his successors: Golvinus (Goulven), Tenenanus (Thénénan), and Guesnoveus (Gouesnon). Duchesne accepts as certain that the monastery of Léon was founded by Paul Aurelian during the sixth century. As for the see it would appear that the *civitas* of the Ossismi, to which the territory of Léon belonged, was represented at the Council of Angers (453) and of Vannes (c. 465) by a bishop; but the chief town of that *civitas* (afterwards known as Carhaix) was soon after included in the Diocese of Quimper; and this ancient Diocese of the Ossismi, from which the chief town in the *civitas* was thus cut off, was translated to St. Pol de Léon at an uncertain date. Duchesne thinks that the Lithardus Uxomensis (not Oximensis) who assisted in 511 at the Council of Orléans was a Bishop of Séez and not of Léon. It is at least certain that there are traces in history of a Diocese of Léon as far back as the middle of the ninth century.

Jean François de La Marche, Bishop of St. Pol de Léon from 1772, took refuge in England in 1792, and organized material assistance for the *émigré* clergy, as well as spiritual comfort for the French prisoners detained in England; he obtained a grant of the Castle of Winchester for the French priests, and gathered there no less than eight hundred of them. He died in 1806.

The hermit, St. Ronan, a native of Ireland, often held to be one of the 350 bishops consecrated by St. Patrick, was in the fifth century one of the apostles of Cornouailles and the neighbourhood around Léon. In his honour, every six years, on the second and third Sunday of July, the "Great Tromènie" is held, an immense procession of fifteen or twenty thousand persons, through 5 parishes, halting at 12 improvised chapels. It was mainly the Dioceses of Quimper and St. Pol de Léon that saw the zeal of the great apostles of Brittany in the seventeenth century: the Dominican Michel Le Nobletz (1577-1652), who has been declared Venerable, native of Plouguerneau in the Diocese of Léon, and who preached the catechism in the churches and in the public squares with the help of symbolical painted charts; and his famous disciple, the Venerable Julien Maunoir, S.J. (1606-83), whose sermons were extremely popular. The Dominican Albert Le Grand, born at Morlaix, assisted this great religious revival by his "Lives of the Saints of Brittany" (1636). Maunoir found time to publish a Breton dictionary, and some devotional works in Breton. He was the founder of Breton philology.

The cornerstone of Quimper Cathedral was laid in 1424, but the building was still unfinished at the beginning of the sixteenth century. When Alexander VI granted that church the same indulgences as could be gained at the Roman Jubilee, funds came in which allowed its completion.

The Cathedral of St. Pol de Léon was built between the thirteenth and sixteenth centuries. The church of Notre Dame de Creisker, in the same town, restored in the fourteenth century, has a belfry which the Bretons claim to be the handsomest in the world. Formerly Quimperlé had an important Benedictine abbey, Sainte Croix, founded in 1029, and where the Benedictines of St. Maur took up their residence in 1665. It was suppressed by the Revolution. Brest, one of the great fortified harbours of France, is in the diocese.

Among saints specially honoured in the diocese are St. Hiltutus (Iltut or Ydeuc), disciple of St. Cadoc and founder of the monastery of Lan-Iltut, where he had for disciples St. David, St. Gildas the Albanian, St. Samson, St. Magloire; St. Guengalaenus (Guénolé), founder and first Abbot of Landevennec, who died, according to some, about 448, according to others in 532, or as others compute in 616; St. Gildas, founder and first Abbot of Rhuys and many other monasteries in Cornouailles (sixth century); St. Guevroc, Archdeacon of St. Pol de Léon, disciple of St. Tudgual, and founder of the church of Notre Dame de Creisker (sixth century); the hermit, St. Hervæus (sixth century); St. Melorius (Melar), a Breton prince, a victim of a political conspiracy, and honoured as a martyr (sixth century); the Cistercian St. Maurice (d. 1191), founder of the monastery of Carnoët; St. Jean Discalceat (d. 1349), founder of the convent of St. Francis at Quimper.

Le Coz (1740-1815), who under the Revolution ■ Archbishop of Rennes (1790-1802), was one of the mainstays of the constitutional schism, had previously been principal of Quimper College.

Among those born in the Diocese of Quimper are: the Jesuit Bougeant (1690-1743), author of the "History of the Treaty of Westphalia"; the Jesuit Hardouin (1646-1729); the critic Fréron (1719-71), who opposed Voltaire; Abbé Legris Duval (1765-1819), who under the Revolution directed the "Congrégation" for a time, after having founded many charitable and philanthropic institutions.

The principal shrines of the diocese are: Notre Dame de Folgoet, near Lesneven, a pilgrimage dating from 1419; Notre Dame de Locmaria at Quimper, a church which dates from the eleventh century, when the Abbey of Locmaria was founded by Count Alain Canihart (1013-40); Notre Dame de Rumengol, near Faou, a chapel founded 1500 years ago, replaced in 1536 by a large church where the unique religious festivals known as "Great Pardons" take place.

Before the application of the Associations Law (1901), there were in the diocese Jesuits, Benedictines of the "Pierre qui vire", and many teaching orders of brothers. An important religious community for women originated in the diocese, the Religious de la Retraite du Sacré-Cœur. In 1899 the religious congregations in the Diocese of Quimper had charge of 1 foundling hospital, 35 nurseries, 1 orphanage for boys, 9 orphanages for girls, 10 workrooms, 4 refuges, 29 hospitals, 166 district nursing houses, and 8 houses of retreat. In 1905 there were in the Diocese of Quimper 773,614 inhabitants, 48 parishes, 262 auxiliary parishes, and 280 curacies supported by state funds.

GEORGES GOYAU.

Quin, MICHAEL JOSEPH, originator of the "Dublin Review", b. at Thurles, Co. Tipperary, Ireland, 1796; d. at Boulogne-sur-Mer, 19 Feb., 1843. Coming to London he was called to the Bar at Lincoln's Inn and while waiting for practice devoted himself to journalism. For the "Morning Herald" he wrote an account of his experiences in Spain during the latter part of 1822 and the first four months of 1823. This he published in book-form as "A Visit to Spain" (1823). In the following year he issued two translations, "Memoirs of Ferdinand VII" and "A Statement of some of the principal events in the public life of Don Agustín de Iturbide". He became editor of the "Monthly Review" in 1825 and held that post for seven years. During this period he contributed many articles on foreign policy to the "Morning Chronicle", and edited "The Catholic Journal", a weekly newspaper which ran for one year only. Further travels in Hungary, Wallachia, Servia, and Turkey furnished him with material for a new book in 1835, called "A Steam Voyage down the Danube", which was so successful that it was translated into French and German. But his most lasting work was the "Dublin Review", which has ever since remained the leading Catholic periodical in the British Isles. Of its first beginnings Cardinal Wiseman wrote: "It was in 1836 that the idea of commencing a Catholic Quarterly was first conceived by the late learned and excellent Mr. Quin, who applied to the illustrious O'Connell and myself to join in the undertaking". Quin became the editor and chief contributor, writing five articles in the first number and four in the second. But the enterprise was not remunerative. After two numbers he resigned the editorship, being unable to devote so much time and trouble without financial advantage, but continued to contribute articles to succeeding issues. During 1842 he edited "The Tablet", pending the disputes between Lucas and the publishers. His remaining works are: "The Trade of Banking in England" (1833); a pamphlet on the proposed abolition of local probate courts (1834); "Nourmahal, an Oriental Romance" (1838); "Petra", translated from the French (1839), and "Steam Voyages on the Seine, the Moselle and the Rhine" (1843). He married a daughter of Edward Wallis of Burton Grange, York, and had three daughters by her.

GILLOW, *Bibl. Dict. Eng. Cath.*, s. v.; COOPER in *Dict. Nat. Biog.*, s. v.; RUSSELL in *Irish Monthly*, XXI, 80; CASARELLI in *Dublin Review* (April, 1896), 250 sqq.

EDWIN BURTON.

Quinctianus (QUINTIANUS), SAINTS.—(1) Under the date of 1 April the present "Roman Martyrology" mentions a saint of this name, together with a companion named Irenæus. In the "Martyrologium Hieronymianum" the same saint is mentioned with three companions under the same date, the topographical note "in Asia Minor" being appended [ed. De Rossi-Duchesne (38)]. We have no further information concerning these martyrs.

(2) A bishop Quinctianus, probably identical with the "episcopus Urcitanus", suffered martyrdom with several other confessors in Africa during the persecution under the Vandal king, Huneric (476-84), as related by Victor Vitensis ("De persecutione Vandalica", I, xxix; II, xxviii; ed. Halm in "Mon. Germ. Hist.: Auct. antiq.", I, 8, 18). His feast is celebrated on 23 May. In the "Martyrologium Hieronymianum" several other African martyrs of this name are mentioned on various other days, but nothing further is known of them.

(3) A long list of Christian martyrs from Catania in Sicily are found in the above-mentioned Martyrology [ed. cit., (3)], and also in the present "Roman Martyrology" on 31 December; among these occurs the name of a Saint Quinctianus. Concerning this whole group, however, we have no historical information.

(4) In the list of Roman confessors who languished in prison during the Decian persecution (A. D. 250) a certain Quinctianus also occurs ("Epist. Luciani ad Celerinum" inter Epist. Cypriani, XXII, iii; ed. Hartel, II, 535).

(5) The Synod of Agde (506) was attended by a Quinctianus, then Bishop of Rodez. A native of Africa, he had fled from the Arians to Gaul, and been appointed Bishop of Rodez. During the war between the Franks and the West Goths, he was a zealous supporter of Chlodwig I. He was, therefore, compelled to leave the territory of the West Goths, and proceeded to Auvergne, where he was hospitably received by Bishop Euphrasius. King Theodoric I appointed Quinctianus successor to St. Apollinarius, Bishop of Clermont. On the death of the latter, Quinctianus succeeded to the See of Clermont, which he occupied until his death on 13 November, 525 or 526. His feast is celebrated on this date, except at Rodez, where it is kept on 14 June. In the "Roman Martyrology" his name stands under both dates.

J. P. KIRSCH.

Quiñones (QUIGNONEZ), FRANCIS, cardinal, b. in the Kingdom of Leon, Spain, c. 1482; d. at Veroli, Italy, 5 Nov., 1540. He was the son of Diego Fernandez de Quiñones, Count of Luna, was educated as a page of Cardinal Ximenes, and at the age of sixteen entered the Order of Friars Minor in the convent of Los Angeles (Spain), taking the name of Francis of the Angels (1498). Having completed his studies, he successively discharged all the various offices of his order as custos, commissary general, and minister general. In 1521 he had obtained special permission and faculties from Leo X to go to the missions in America, together with Father Glapion, O.F.M., confessor of Charles V, but Glapion died in the same year, and Quiñones was elected commissary general of the Ultramontane Franciscans (1521-23). In the general chapter of the order at Burgos, in 1523, he was elected minister general (1523-27). As general, he visited the convents of Spain (1523-25) and a great part of Italy and Belgium (1525-27), promoted studies, maintained general discipline, and was not less active in behalf of missions. In 1524 he sent twelve missionaries to Mexico, among them Father Juan Juarez, who later became the first bishop within the present territory of the United States. (See Engelhardt, "The Missions and Missionaries of California", San Francisco, 1908, I, 604.)

After the sack of Rome and the imprisonment of Clement VII (May, 1527), Quiñones, who was distantly related to Charles V, and also his confidant, seemed the aptest man to effect the release of the pope, and a full reconciliation between him and the emperor. He was thrice sent to the emperor for this purpose, and his efforts were crowned with success by the deliverance of Clement (Dec., 1527), and the treaties of Barcelona (1528) and Cambrai (1529). As these embassies rendered his effective government of the order impossible, Quiñones renounced the generalship in December, 1527, and in September of the following year he was created cardinal of the title of S. Croce in Gerusalemme, hence his name "Cardinal of the Holy Cross". From 1530 to 1533 he was also Bishop of Coria, in Spain, and for a short time, in 1539, administrator of Acerno (Naples), but he was never Cardinal Bishop of Palestrina, as some authors assert. Cardinal Quiñones always occupied a distinguished position in the Sacred College and closely followed the movement of the Reformation in Germany. When Paul III contemplated assembling a general council at Mantua, he sent (1536) the Cardinal of the Holy Cross to Ferdinand I, King of

the Romans and of Hungary, to promote that cause. The cardinal, however, did not live to see the opening of the Council of Trent in 1545. His body was brought from Veroli to Rome and buried in his titular church in a tomb which he had prepared for himself.

Quiñones left some legislative compilations for his order, but is best known for his reform of the Roman Breviary undertaken by order of Clement VII (see *BREVIARY: VI. Reforms*).

LIVARIUS OLIGER.

Quinquagesima (fiftieth), the period of fifty days before Easter. It begins with the Sunday before Ash Wednesday, called *Dominica in Quinquagesima* or *Esto Mihi* from the beginning of the Introit of the Mass; it is a Sunday of the second class, and the colour of the Mass and Office is violet. For many early Christians it was the beginning of the fast before Easter, hence called, as with the Syrians, *Dom. ingressus jejunii*. For some, Quinquagesima marked the time after which meat was forbidden and was therefore called *Dom. carnis privium, ad carnes tollendas, carnevala*; by the Poles, *Ned. zapustna*. Since these regulations affected mainly the clergy, we find the name *carnis privium sacerdotum* and in Germany *herren fastnacht*. Where abstinence from meat began earlier, this Sunday introduced the time in which neither milk nor eggs, etc. (*ova et lactinia*) were allowed, hence called by the Greeks *Dom. casei comestrix et ovorum*; Melchites, *sublationis ovorum et casei*; Austrians, *Käse- or Milchfaschingsonntag, Sonntag in der Butterwoche*; Italians, *de' latticini*; and Servians, *bele poklade* (white meats). The Slavs name it *Ned. III. predpepelnična*, i. e. the third Sunday before Ash Wednesday; the Bohemians, *Ned. II. po devitniku*, i. e. the second Sunday after the ninth before Easter. In many places this Sunday and the next two days were used to prepare for Lent by a good confession; hence in England we find the names Shrove Sunday and Shrovetide. As the days before Lent were frequently spent in merry-making, Benedict XIV by the Constitution "Inter Cetera" (1 Jan., 1748) introduced a kind of Forty Hours' Devotion to keep the faithful from dangerous amusements and to make some reparation for sins committed. Quinquagesima also means the time between Easter and Pentecost, or from the Saturday after Easter to the Sunday after Pentecost; it is then called *Quinquagesima Paschæ, paschalis, or lætitiæ*.

FRANCIS MERSHMAN.

Quintana, AGUSTÍN, missionary and Indian philologist, b. at Antequera, the capital of Oaxaca, Mexico, about 1660; d. at Oaxaca, 1734. He entered the Order of Preachers in that city in 1688, and was soon thereafter sent as missionary priest to the Mixe Indians of southern Oaxaca, among whom he laboured for twenty-eight years, mastering their difficult language to a degree never attained by any other white man. He was then appointed superior of the convent of Zacavila, but on account of broken health was soon afterward retired to the main convent at Ante-

quera, where he devoted the rest of his life to writings in the Mixe language. This being the earliest publication in that language, in spite of age and infirmity, he made several journeys to Puebla, to supervise the making of special types. His most important work was a grammar and a series of articles on the principal articles of the Faith, under the title, "Institución cristiana, que contiene el Arte de la Lengua Mije etc." (Puebla, 1729). (See also *MIXE INDIANS*.)

JAMES MOONEY.

Quiricus and Julitta (CIRYCUS AND JULITTA), SAINTS, martyred under Diocletian. The names of these two martyrs, who in the early Church enjoyed a widespread veneration, are found in the "Martyrologium Hieronymianum" (ed. De Rossi-Duchesne, 79) and also in the calendars and menologies of the Greek and other Oriental Churches. According to the Acts of their martyrdom, which appeared later, and a letter of the sixth century, Julitta fled with her three-months-old child, Quiricus, from Lycaonia, when the Maximinian persecution broke out there, to Isauria and thence to Tarsus in Cilicia. She suffered martyrdom in the last-named city after her child had first been killed before her eyes. The veneration of the two martyrs was common in the West at an early date, as is proved by the chapel dedicated to them in the Church of Santa Maria Antiqua at Rome, as well as by testimony from Gaul. Their relics are said to have been brought to the monastery of Saint-Amand (*Elmonense monasterium*) in the Diocese of Tournai. The feast is observed on 16 June; in the Synaxarium of Constantinople it is set under the date of 15 July.

Quirinal. See ROME.

Quirini (QUERINI), ANGELO MARIA, cardinal and scholar, b. at Venice, 30 March, 1680; d. at Brescia, 6 January, 1755. In 1696 he entered the Benedictine Order at Florence, and was appointed professor of Sacred Scripture in his monastery in 1705. Five years later he started on an educational journey through Germany, the Netherlands, England, and France. In 1718 the pope appointed him a member of the commission instituted for the revision of the Greek liturgical books, and in 1723 named him Bishop of Corfu. A few years later Quirini was transferred to the Bishopric of Brescia and elevated to the cardinalate. He was placed at the head of the Vatican Library in 1730, and became subsequently prefect of the Congregation of the Index. He was elected a member of the Vienna Academy of Sciences in 1747 and of the Berlin Academy the following year. About this time his opposition to the proposed reduction in the number of holy days involved him in a controversy with Muratori, which lasted until Rome enjoined silence on both parties in 1750. His part in the discussions concerning the Patriarchate of Aquileia resulted in his enforced retirement from Rome the following year. Quirini generously contributed from his personal means to the relief of the financial needs of the German missionary districts. His writings include works on the liturgy and history of the Greek Church, the history of the papacy (Paul II), and that of Corfu and Brescia. They also include an edition of Cardinal Pole's correspondence (Brescia, 1744-57).

N. A. WEBER.

Quirinius, CENSUS OF. See CHRONOLOGY, BIBLICAL.

Quirinus, SAINTS.—Several martyrs of this name are mentioned in the "Martyrologium Hieronymianum" and in the historical Martyrologies of the early Middle Ages, and the feasts of these saints are still to be found in the catalogue of saints of the Roman Church.

(1).—According to the legendary Acts of the martyrs St. Maris and St. Martha, a Roman martyr Quirinus (Cyrinus) was buried in the Catacomb of Pontian. However, the Itineraries to the graves of the Roman martyrs do not mention him. His feast is celebrated on 25 March. Perhaps this Quirinus is meant by the expression "Romæ sancti Cyri" found in the "Martyrologium Hieronymianum" of 24 March (cf. "Acta SS.", III, March, 543 sqq.; Dufoureq, "Les Gesta martyrum romains", I, 240). In the eighth century the relics of the martyr were translated to the Benedictine abbey of Tegernsee in Bavaria.

(2).—Another Roman martyr named Quirinus was buried in the Catacomb of Prætextatus on the Via Appia. Both the name and the place of burial are mentioned in the "Martyrologium Hieronymianum" (ed. De Rossi-Duchesne, 52), as also in the Itineraries to the graves of the Roman martyrs (De Rossi, "Roma sotterranea", I, 180-1). His name undoubtedly appeared in the catalogue of Roman martyrs of the fourth century under date of 30 April, which is the day that the Martyrology of Jerome assigns him. He is introduced into the legendary Acts of Sts. Alexander and Balbina, where it is said he was a tribune (Dufoureq, loc. cit., 175). Ado took the name from these Acts and put it in his Martyrology under date of 30 March, on which day it is now also found in the Roman Martyrology (Quentin, "Les martyrologes historiques", 490). In 1050 the relics of Quirinus were given by Leo IX to his sister Gepa, Abbess of Neuss. In this way the relics came to the beautiful Romanesque Church of St. Quirinus at Neuss which still exists.

(3).—The relics of a third St. Quirinus, now in Rome, were brought thither from Pannonia. This St. Quirinus was Bishop of Siscia, now Sissek in Croatia, and suffered martyrdom in 309. He was thrown into the water with a millstone about his neck and drowned. The genuine Acts of the martyrdom of the saint are still in existence (Ruinar, "Acta mart.", Ratisbon, 522), also a hymn in his honour by Prudentius (loc. cit., 524). Upon the incursion of the barbarians into Pannonia at the beginning of the fifth century the inhabitants fled to Italy and took the bones of St. Quirinus with them. The remains were taken to Rome and interred in a vaulted burial chamber near the Church of St. Sebastian on the Via Appia (De Waal, "Die Apostelgruft ad Catacumbas an der via Appia", Rome, 1894). His feast is observed on 4 June.

(4).—The name of a martyr Quirinus, who is venerated in Tivoli, is found in the present Roman Martyrology under the same date of 4 June. There is no historical account of him; he is, perhaps, identical with one of the martyrs of this name who are mentioned in the Martyrology of Jerome among groups of martyrs under the dates of 12 March, 3 and 4 June. Under 4 June a Quirinus is mentioned with a statement of the place, "Nividuno civitate" (Mart. Hieron., 31, 73, 75).

(5).—At Malmedy, in Rhenish Prussia, is venerated a St. Quirinus. It is related that at the beginning of the ninth century his relics were translated to the abbey church there. According to the legend he was put to death, together with a companion Nicasiu, in the *pagus Vulcassinus* (Vexin). No trustworthy historical reports of him exist. His feast is observed on 11 October.

See *Acta SS.*, for the various dates mentioned; *Bibl. hagiogr. Latina*, s. v. *Quirinus*; POTTHAST, *Bibl. historica mediæ ævi*, 2nd ed., II, s. v. *Quirinus*. For St. Quirinus of Rome see URBAIN, *Ein Martyrologium d. christl. Gemeinde zu Rom* (Leipzig, 1901), s. v. *Quirinus*. J. P. KIRSCH.

Quito, ARCHDIOCESE OF (QUITENSIS).—The city of Quito, formerly known as San Francisco de Quito, capital of the Republic of Ecuador, is situated 14' south of the Equator, and 114 miles inland from the Pacific Ocean. It stands at an elevation of about 9300 feet, and has a population of some 70,000, mostly mestizos. It was the capital of the Incas Huaynacapac and Atahualpa, and was burnt by Rumiñahui in 1533. Sebastián de Belalcázar captured Quito the following year. In 1541 it was made a city by Charles V; in 1565 it became the headquarters of a separate Franciscan province. Quito formed part of Peru till 1718, when it was included in Nueva Granada. The seminary in charge of the Jesuits was the centre of ecclesiastical studies for all middle and northern South America. The Dominicans and Augustinians had high schools in Quito. In 1735 the city was ruined by an earthquake. Independence was declared there on 19 August, 1809; and the following year witnessed a terrible massacre of the nobility, even women and children being put to the sword. President Montes defeated the patriots two years later in the Panecillo; Sucre gained his great victory hard by in 1822. In 1829 Quito became the capital of Ecuador.

The city is built on very uneven ground, and the streets run in parallel lines. The most important square is the Plaza Mayor, on the southern side of which is the cathedral, on the eastern the city hall, and on the western the government house. The square was turned into a beautiful garden by President García Moreno, who was assassinated here 6 Aug., 1875. Quito is remarkable for its many beautiful churches, especially the old seventeenth-century Jesuit Church of Santa Ana, San Francisco, La Merced, and El Sagrario. The present university, which was founded by Sixtus V and Philip II in 1586, but opened only in 1621 by the Jesuits, still occupies a portion of the old Jesuit college and has an excellent library, formed in part from that of the San Luis seminary. There are 32 professors and 216 students. The observatory was erected under the direction of the celebrated astronomer Father Menten. García Moreno invited the German Jesuits to lecture in the university; they have since been expelled by the Masonic parties. The College of St. Ferdinand contains a tablet with a Latin inscription commemorative of the French and Spanish mathematicians who measured the degree of the meridian here in 1736-41. The chief manufactures of the city are woollens, laces, rugs, carpets, and tobacco. There is also a large export trade in religious oil-paintings.

The Diocese of Quito was erected by Paul III on 8 Jan., 1545, at the request of Charles V, and made suffragan of Lima. The first bishop was Mgr. Garcidia, who died in 1563. In 1853 the Holy See proceeded to the beatification of María Ana de Jesús de Paredes y Flores, the "Lily of Quito" (b. 31 Oct., 1618; d. 26 May, 1645). By the Bull "Nos semper Romanis Pontificibus" of 13 Jan., 1848, Pius IX made Quito a metropolitan see, with the Dioceses of Cuenca and Guayaquil as suffragans, to which have since been added the Sees of Ibarra, Riobambo, Loja, and Portoviejo. The first archbishop, Mgr. Francisco Xavier de Garaycos, previously Bishop of Guayaquil, was appointed 5 Sept., 1851. The present archbishop, Mgr. González y Suárez, was born at Quito 2 Jan., 1845; consecrated Bishop of Ibarra, 30 July, 1895; transferred to Quito, 14 Dec., 1905, and entered into possession on 6 July, 1906, succeeding Mgr. Pedro Rafael González (b. at Quito, 14 Oct., 1839; Bishop of Ibarra, 29 Sept., 1876; coadjutor titular

Archbishop of Synnade, 15 June, 1893, succeeding to the archbishopric in Aug., 1893). The Archdiocese of Quito includes the provinces of Pichincha, León, and Tunguragua, and contains 81 parishes, 195 priests, and 420,560 Catholics. The seminary is in care of the Lazarists.

A. A. MACERLEAN.

R

Rabanus (HRABANUS, RHABANUS), MAURUS MAGNENTIUS, Blessed, Abbot of Fulda, Archbishop of Mainz, celebrated theological and pedagogical writer of the ninth century, b. at Mainz about 776 (784?); d. at Winkel (Vinicellum) near Mainz on 4 February, 856. He took vows at an early age in the Benedictine monastery of Fulda, and was ordained deacon in 801. A year later he went to Tours to study theology and the liberal arts, under Alcuin. He endeared himself to his aged master, and received from him the surname of Maurus in memory of the favourite disciple of St. Benedict. After a year of study he was recalled by his abbot, became teacher and, later, head-master of the monastic school of Fulda. His fame as teacher spread over Europe, and Fulda became the most celebrated seat of learning in the Frankish Empire. In 814 he was ordained priest. Unfortunately, Abbot Ratgar's mania for building temporarily impeded the progress of the school, but under Abbot Eigil (818-82) Rabanus was once more able to devote himself entirely to his vocation of teaching and writing (see CARLOVINGIAN SCHOOLS; FULDA, DIOCESE OF). In 822 Rabanus was elected abbot, and during his reign the monastery enjoyed its greatest prosperity. He completed the new buildings that had been begun by his predecessor; erected more than thirty churches and oratories; enriched the abbey church with artistic mosaics, tapestry, baldachina, reliquaries, and other costly ornaments; provided for the instruction of the laity by preaching and by increasing the number of priests in country towns; procured numerous books for the library, and in many other ways advanced the spiritual, intellectual and temporal welfare of Fulda and its dependencies. In the political disturbances of the times he sided with Louis the Pious against his rebellious sons, and after the emperor's death he supported Lothair, the eldest son. When the latter was conquered by Louis the German, Rabanus fled from home in 840, probably to evade taking the oath of allegiance. In 841 he returned and resigned his abbacy early in 842, compelled, it is believed, by Louis. He retired to the neighbouring Petersberg, where he devoted himself entirely to prayer and literary labours. In 845 he was reconciled with the king and in 847 succeeded Otgar as Archbishop of Mainz. His consecration took place on 26 June. He held three provincial synods. The 31 canons enacted at the first, in the monastery of St. Alban in October, 847, are chiefly on matters of ecclesiastical discipline (Acts in Mansi, "Conc. Coll. Ampl.", XIV, 899-912). At the second synod, held in October, 848, in connexion with a diet, the monk Gottschalk of Orbais and his doctrine on predestination were condemned. The third synod, held in 852 (851?), occupied itself with the rights and discipline of the Church. Rabanus was distinguished for his charity towards the poor. It is said in the "Annales Fuldenses" that, during the famine of 850, he daily fed more than 300 persons. Mabillon and the Bollandists style him "Blessed", and his feast is celebrated in the Dioceses of Fulda, Mainz, and Limburg on 4 February. He was buried in the monastery of St. Alban at Mainz, but his relics were transferred to Halle by Archbishop Albrecht of Brandenburg.

Rabanus was probably the most learned man of his age. In Scriptural and patristic knowledge he had

no equal, and was thoroughly conversant with canon law and liturgy. His literary activity extended over the entire field of sacred and profane learning as then understood. Still, he cannot be called a pioneer, either as an educator or a writer, for he followed in the beaten track of his learned predecessors. A complete edition of his numerous writings is still wanting. Most of them have been edited by Colvenerius (Cologne, 1627). This uncritical edition is reprinted with some additions in P. L., CVII-CXII. His poems were edited by Dümmler in "Mon. Germ.: Poetæ lat. ævi Carol.", II, 154-244. He was a skilful versifier, but a mediocre poet. His epistles are printed in "Mon. Germ.: Epist.", V, 379 sq. Most of his works are exegetical. His commentaries, which include nearly all the books of the Old Testament, as well as the Gospel of St. Matthew and the Pauline Epistles—a commentary on St. John is probably spurious—are based chiefly on the exegetical writings of St. Jerome, St. Augustine, St. Gregory the Great, St. Isidore of Seville, Origen, St. Ambrose, and St. Bede. His chief pedagogical works are: "De universo", a sort of encyclopedia in 22 books, based on the *Étymologies* of Isidore; "De computo", a treatise on reckoning; "Excerptio de arte grammatica Prisciani", a treatise on grammar, etc. Other important works are: "De ecclesiastica disciplina"; sermons, treatises, a martyrology, and a penitential.

A contemporaneous biography, written by his disciple, the scholasticus RUDOLPH, is printed in P. L., CVII, 40-68. MABILLON, *B. MICHAEL OTT.

Rabbi and Rabbinitism.—The special condition which prevailed in Palestine after the Restoration led to the gradually increasing importance of the Temple, and of the priesthood ministering in it. The spirit of Esdras's reform outlasted the reformer and survived in the authority henceforth attached to the Law, an authority soon to overshadow the prestige of the Temple and of the priesthood itself; and tended to put into prominence the teachers and expounders of the Law, the Scribes (*Sopherim*). Originally the word *scribe* meant "scrivener"; but rapidly it was accepted as a matter of course that the scribe who copies the Law knows the Law best, and is its most qualified expounder: accordingly the word came to mean more than it implies etymologically. Knowledge of the Law became the chief passport to fame and popularity. The earliest scribes, like Esdras, who came to be hailed as the model of the "ready scribe" (i. e. skilful) in the Law of Moses (I Esd., vii, 6), were

priests; but in time a large body of lay teachers came to swell the ranks of the scribes. As gradually the spell of Hellenistic fashions fell upon the priesthood, the lay scribes found themselves more and more the only guardians and exponents of the Law. When the Pharisees began to be recognized as a distinct sect (about 150 B.C.) the scribes as a rule adhered to them as being the most scrupulous observers of the Law (yet Mark, ii, 16; Luke, v, 30, and Acts, xxiii, 9, seem to imply that some scribes belonged to the party of the Sadducees). At any rate, from that time onwards the scribes were accepted as the accredited teachers of the people. Until the fall of Jerusalem they were chiefly congregated in Judea; but in later times we hear of their presence in Northern Palestine, even in Rome, and in every important centre of the Dispersion.

From the earliest times the scribes seem to have conceived an exalted opinion of their merits: "The wisdom [knowledge] of the scribe cometh by his time of leisure: and he that is less in action [less steeped in business] shall receive wisdom. With what wisdom shall he be furnished [what knowledge can he acquire] that holdeth the plough, and that glorieth in the goad, that driveth the oxen therewith, and is occupied in their labours, and his whole talk is about the offspring of bulls?" (thus Hebrew; Eccles., xxxviii, 25, 26). Evidently the scribe in his own estimation belonged to a higher caste. And so it was understood by the people who, after the time of Hillel, introduced the custom of saluting them "Rabbi". The word, derived from the Hebrew *Rab*, "great", originally seems to have been equivalent to "my lord"; when it became the distinctive title of the scribes the specific force of its pronoun was lost, and "Rabbi" was used very much like our "Doctor". That this title was far from unpleasant in the ears of the scribes we know from Matt., xxiii, 7. In point of fact a pupil never would omit it when speaking to or of his teacher (Berach., xxvii, 1), and it became a universal usage never to mention the name of a doctor of the Law without prefixing "Rabbi". Nay more, in order to show the person greater honour, this title was intensified into "Rabban", "Rabboni", so that in the course of time custom established a kind of hierarchy among these various forms: "Rabbi", the doctors said, "is more than Rab, Rabban more than Rabbi, and the proper name more than Rabban." The latter part of this traditional regulation has particularly in view the two great Doctors Hillel and Shammai, always designated by their unqualified proper names; the successors of Hillel, as Gamaliel, were titled Rabban, and so also was by exception Johanan ben Zakkai; Palestinian doctors are commonly known as Rabbi So-and-so, yet Rabbi Judas the Saint, who composed the Mishna, is not infrequently called merely Rabbi (*par excellence*); in the same manner, Rab, without the proper name, designates Abba Arika (d. A.D. 247), the founder of the School of Sora, while Rab is the title prefixed to the names of the Amoras of Babylon.

The Law, of course, must be the exclusive study of a Rabbi, as it is the one source of religious knowledge, the perfect embodiment of the will of God, and the people's sole binding rule of daily life. But the Law does not cover explicitly every possible case; yet, as it is a Divinely-given Law, it must, in the mind of the learned Rabbi, participate in the infinitude of the Divine Lawgiver; therefore, not only the sentences but the individual words, even the number of letters, nay more, the "jots and tittles", must convey a meaning, since God willed every one of them, and since in all that He does He acts for a reason: thus does the Law apply itself to all possible occurrences. Hence arose in the schools that immense mass of inferential teaching deduced from the written word according to the rules of a special process of reasoning, handed

down for generations in the esoteric teaching of the faithful scribes as the official interpretation of the Law, and finally committed to writing, particularly in the Mishnas and Talmuds. Under this parasitic vegetation of traditional teaching the Law itself came gradually almost to be entirely lost sight of and stifled; yet every word designating the tradition was calculated to remind the Rabbi of the connexion of this tradition with the Law. Mishna means "repetition of the Law": its sources were the sayings of the Tannaite or "repeating" doctors; a *baraita* is a saying of some early doctor not included in the Mishna; the *baraitoth* are gathered either into the *Tosephta* (addition) or in the *Ghemara* (complement), the Mishna and the *Ghemara* constituting the *Talmud* or "teaching" (of the Law). This teaching is either *halaka* (way) or "customary law", or *agada*, "information", given by or about the Law. The Law is therefore understood to be at the root of every tradition, even when, in practice, tradition as good as makes void the letter of the Law (Matt., xv, 1-6; Mark, vii, 8-13); nay more, we hear of Rabbis pretending to prove by the Law itself (Ex., xxxiv, 37) that oral traditions should be preferred to the written word (Megill., iv, 74d; cf. Sanhedr., xi, 3). This exaggerated authority these oral traditions obtained on account of the origin attributed to them. They generally purported to have been handed down from Esdras, who received them by Divine inspiration as esoteric wisdom to be imparted to the initiated disciples. Some claimed for them a still higher antiquity, going back to Moses himself (thus at least is usually understood the opening sentence of the "Pirke Abhoth"; cf. "Peah", tr. Schwab, ii, 37), even in part to the twelve Patriarchs, Enoch, and Adam. This voluminous body of exegetical traditions, the logical system according to which inferences are drawn and the theological conceptions upon which this whole oral teaching is grounded, are commonly designated as a whole by the name of Rabbinism. What has been said above of its theological basis may suffice to show the two radical errors which lie at the bottom of it: infinity of the Scriptures, and necessity of interpreting them in every detail in accordance with that severe precision which alone is worthy of God.

A few words on the principles of Rabbinical logic may not be useless to help form a judgment of the whole system. The traditional exegesis was of two kinds. The one, the *Halaka*, was legal and casuistic: the *Halaka* it was that so "fenced about the Law" to render it impossible; the other, the *Hagada*, was illustrative and practical, embracing innumerable legends and allegories intended to illustrate and enlarge Biblical history, but in reality obscuring it in a maze of idle and fanciful inventions. Hillel is credited with having codified the rules of the *Halaka*; his original seven rules were later on enlarged to thirteen by R. Israel. Some of these rules are excellent, as when, for instance, it is stated that the meaning of a word is determined by the context, and the sentence by the scope of the passage (rule 12); others, good in themselves, do not sufficiently take into account the vast differences of times which separate the inspired writers and the dissimilar religious and social conditions which prevailed at different periods; others, finally, are the expression of a somewhat fallacious mode of reasoning. As a whole the *Halaka* is an artificial system, jaundiced by its evident purpose to offer the means of engrafting the tradition on the stem of Scripture (Mielziner). The *Hagada* method, still more extravagant, was elaborated by R. Eliezer into thirty-two rules, on which it is useless to dwell at any length.

From the *Halaka* and *Hagada* were subsequently derived the *Peshat*, or determination of the literal sense, and the *Sodh*, or determination of the mystical or allegorical sense. The *Peshat*, used in ancient times only

in the Targum of Onkelos and the Greek version of Aquila, acquired prominence later on, seemingly owing to the influence of Arabic learning, especially among the Qaraites. The Sodh first found favour among the Essenes and the Zealots, but attained its full development only in the Kabbalistic system of the thirteenth century. If the tree should be judged by its fruits, the vagaries of the Kabbala, the last term of the natural evolution of the Hagada, make evident the falsity of the principles underlying the method of Rabbinical exegesis.

CHARLES L. SOUVAY.

Rabbulas, BISHOP OF EDESSA, in the later years of his life one of the foremost opponents of Nestorianism, was the son of a heathen priest and a Christian mother. He was converted by Eusebius, Bishop of Chalcis (his native town), and Acacius, Bishop of Aleppo. After his conversion he became a monk. For a time he was a devoted admirer of Theodore of Mopsuestia, but there was some quarrel, the details of which are not known, and Theodore publicly rebuked him at a synod. In 412 he was appointed Bishop of Edessa and died in 435. According to the anonymous panegyrist who wrote his Life, he from the first took a decided stand against Nestorius and denounced the heresiarch to his face. At the Council of Ephesus, however, he was on the side of John of Antioch, and his name is found among the subscriptions to two letters (Labbe, I, p. 1532 and p. 1557) in which St. Cyril's doctrine is denounced as heretical. But a few months later he realized that St. Cyril was in the right, and became his most uncompromising ally against Nestorianism. His task was not an easy one, for his diocese, owing chiefly to the prestige of Theodore of Mopsuestia, was a stronghold of Nestorianism. The zeal with which Rabbulas endeavoured to suppress Theodore's writings was unfairly attributed by Ibas, in his letters to Maris, to personal rancour against the memory of the deceased (Ibas' letter was read at the Council of Chalcedon and may be found in Labbe, Hardouin, Mansi, or Hefele). Most of the surviving works of Rabbulas were published by Overbeck, "S. Ephræmi Syri, Rabulæ Episc. Edesseni, Balæi aliorumque opera selecta" (Oxford, 1865). Rabbulas' Syriac translation of St. Cyril's "De Fide Recta" was first published by Philip Pusey (Oxford, 1877). Most of the writings of Rabbulas were translated into German by Bickell in Thalhoffer's "Bibliothek der Kirchenväter". According to Burkitt, "St. Ephraim's quotations from the Gospel" (Cambridge Texts and Studies, VII, 2) and "Evangelion Da Mephareshe" (Cambridge, 1901), Rabbulas was the author of the Peshitto. The chief authority for his Life is an anonymous panegyric composed soon after his death by a cleric of Edessa. This was published by Overbeck and translated by Bickell.

F. J. BACCHUS.

Rabelais, FRANÇOIS.—The life of this celebrated French writer is full of obscurities. He was born at Chinon in Touraine in 1483, 1490, or 1495. Ac-

cording to some, his father was an apothecary, according to others a publican or inn-keeper. He began his studies with the Benedictines and finished them with the Franciscans near Angers. He became a Franciscan in the convent of Gontenay-le-Comte, where he remained fifteen years and received Holy orders. But the spirit of his order not being favourable to the studies then esteemed by the Renaissance and for which he himself displayed great aptitude, he left the convent. Through the mediation of Bishop Geoffroy d'Estissac he secured pardon from Clement VII, who authorized him to enter the Benedictine abbey of Maillezais. In 1630 he was at Montpellier as a medical student, and the following year professor of anatomy at Lyons and head physician at the hospital of Pont-du-Rhône. At Lyons he was much in the society of Dole and Marot, and became the father of a child who died young. In 1534 Cardinal du Bellay brought him to Rome as a physician, and in 1536 he obtained from Paul III an indult which absolved him from his infractions of conventual discipline and allowed him to practise medicine. The next year he received the degree of Doctor of Medicine at Montpellier. In 1540 the pope permitted him to abandon the conventual life and to join the canons of St-Maur-les-Fossés. He took advantage of this to resume his wandering life. In 1541 he was at Turin as physician to the governor, Guillaume du Bellay. Perhaps through fear of prosecution which his works might draw upon him he went in 1546 to practise medicine at Metz, where he was in the pay of the city, but Cardinal du Bellay, being again sent to Rome, induced him to go thither. Du Bellay returned to France at the beginning of 1450 and secured for him the benefices of St-Martin de-Meudon and St-Christophe-du-Jambet, both of which he resigned two years later, after having, it is said, fulfilled his duties with regularity and seriousness. He died most probably at Paris either, as is generally thought, in 1553, or in 1559. Statements regarding his last moments are contradictory. According to some he died as a free-thinker and jester, saying, "Draw the curtain, the farce is played out", according to others his end was Christian and edifying.

Rabelais wrote various works, including almanacs, but he was chiefly known for the celebrated romance entitled, "La Vie de Gargantua et de Pantagruel". This work comprises four books which appeared from 1532 (or 1533) to 1552; a fifth, the most daring in its ideas, appeared after the death of its author (1562-64); it is not certain that it is his. This history of giants is a chaos wherein are found learning, eloquence, coarse humour, and extravagances. It is impossible to analyse it.

Rabelais was a revolutionary who attacked all the past, Scholasticism, the monks; his religion is scarcely more than that of a spiritual-minded pagan. Less bold in political matters, he cared little for liberty: his ideal was a tyrant who loves peace. His strange

PORTRAIT OF FRANÇOIS RABELAIS
Frontispiece to an early edition
of his works

fictions seem to be a veil behind which he conceals his ideas, for he desires his readers to imitate the dog to whom a bone has been thrown and who must break it in order to reach the marrow. But many of his gigantic buffooneries were merely the satisfaction of a vast humour and a boundless imagination. He took pleasure in the worst obscenities. His vocabulary is rich and picturesque, but licentious and filthy. In short, as La Bruyère says: "His book is a riddle which may be considered inexplicable. Where it is bad it is beyond the worst; it has the charm of the rabble; where it is good it is excellent and exquisite; it may be the daintiest of dishes." As a whole it exercises a baneful influence.

Ed. MARTY-LAVEAUX, *Opp.* (Paris, 1872); STAFFER, *Rabelais* (Paris, 1889).

GEORGES BERTRIN.

Raccolta (Ital., "a collection"), a book containing prayers and pious exercises to which the popes have attached indulgences. The full title of the last official edition is: "Raccolta di orazioni e pie opere, per le quali sono state concesse dai Sommi Pontefici le SS. Indulgenze" (Rome, 1898). The *Raccolta* was first published at Rome in 1807 by Telesforo Galli, one of the consultors of the Congregation of Indulgences. In the sixth edition there is printed a Decree, dated 30 Nov., 1825, which recognizes the indulgences as authentic, and in the eleventh—the last published by Canon Galli—there is a Decree, dated 13 Nov., 1843, which approves the *Raccolta* as "prælaudatum opus omnibus Christifidelibus vivis atque defunctis maxime perutile". Two new editions were published by Aloysius Prinzivalli, substitute secretary of the congregation, and were specially approved by a Decree of 15 Dec., 1854. The editions of 1877, 1886, and 1898 are the official publications of the Sacred Congregation of Indulgences and Holy Relics (see ROMAN CURIA). The *Raccolta* contains, arranged in convenient order, the prayers, novenas, pious practices, etc. to which general indulgences have been attached, as well as the decrees and rescripts granting the indulgences, and the conditions requisite for gaining them. All the indulgences contained in the *Raccolta* are applicable to the souls in purgatory. It is forbidden to publish a translation of the entire *Raccolta* without the approval of the Roman congregation (Decret. auth., nn. 361, 415). There is an approved edition of the *Raccolta* in English, especially adapted for the use of the faithful.

Decreta authentica (Ratisbon, 1883); *Collection des décrets authentiques des sacrées congrégations romaines* (Paris, 1868); BERINGER, *Die Ablassé, ihr Wesen und Gebrauch* (Paderborn, 1900); French tr., Paris, 1905); MAUREL, *The Christian Instructed in the Nature and Use of Indulgences*, tr. (1875); *The New Raccolta* (Philadelphia, 1900).

F. X. DELANY.

Race, HUMAN.—Mankind exhibits differences which have been variously interpreted. Some consider them so great that they regard the varieties of the human race as distinct species; others maintain the unity of the human race, looking upon the differences as not sufficiently great to constitute different species. The apparently unlimited fertility of crossed races is a fact in favour of the unity of mankind. The diversities are indeed only quantitative, the difference between the most opposite varieties (e. g. the darkest blacks and the lightest whites) being bridged over by numerous intermediate stages. The unity of mankind is moreover supported by the intellectual similarity apparent between the most primitive savages and the representatives of the highest culture. The various types of human beings now living are only different races. G. Schwalbe thought that the primitive Quaternary type of man with the prominent bridges, low braincap, chinless lower jaw, etc. (the *homo primigenius*), must be

distinguished as a separate species from the *homo sapiens*. The peculiarities of this *homo primigenius*, he claimed, did not fall within the limits of the variations of the *homo sapiens*. However, the researches of H. Klaatsch, especially his investigation of the skulls of the aboriginal Australians, show that the same peculiarities are to be found even in men now living. Consequently, the *homo primigenius* is simply one of the races of mankind, although a primitive one.

The physical differences found in the human race may be grouped together into basic types or "races", which are divided further into sub-races. Another grouping is into "nations" and "tribes", which may be described as political units of men of like speech and customs. The investigation of physical differences is the task of anthropology (the science of man), whose duty it is to establish numerically in the most exact manner possible the conspicuous differences between the fundamental types and between the mixed races arising from them. A number of methods may be used to attain this end. The method of height and measurement aims at expressing mathematically the differences in size, whether of the whole body or of its parts. The ratio of the different measurements is computed, thus obtaining relative measurements or indices, and the angles which different parts of the body form with one another are determined. For this purpose the greatest possible number of individuals of a race are measured; the average of the results is regarded as the expression of the racial peculiarity, or the results are represented in the form of curves which express the numerical values derived from the study of a group. As absolute and relative measurements alone do not suffice to determine racial peculiarities, outline drawings have of late been resorted to, and the forms thus obtained have been compared. This method has the advantage that all possible dimensions and angles can be measured later independently of the object. On these outline drawings or projections H. Klaatsch constructed triangles and quadrangles (cranio-trigonometry), or sought to define the curves as segments of circles (cyclography of the skull).

To the graphical method and that of measurement should also be added the description of morphological peculiarities. The most striking difference in men is that of stature. Consequently, it has been attempted to separate races into groups according to this criterion. Even in Europe, marked differences have been shown to exist between the tall northern peoples of Scandinavia, England, and North Germany on the one hand, and the low statured peoples of the Mediterranean (especially the Italians) on the other. In other regions also tall races are found, e. g. the Fuegians; other races are distinguished by their extremely low stature, e. g. the Bushmen of Africa, the Lapps of the Arctic, above all the extremely small tribes of the forests of Central and Western Africa (stature generally under four feet eleven inches), who are now grouped together as Pygmies, and the natives of the Andaman Islands in the Bay of Bengal, the Semand of Malacca, and the Negrites of the Philippines. While the weight of the body, depending greatly on external causes, is not serviceable for differentiation, the proportions of the body on the other hand vary in different races. The primitive races are characterized in particular by a short trunk, long arms, and long legs, in contrast to the civilized peoples, who have a long trunk, short arms, and short legs. The differences, however, are not greater than those between members of different classes in one and the same people, as J. Ranke has proved. G. Fritsch made use of the length of the spinal column for the comparison of the bodily proportions (*modulus*). In this way he constructed a canon or general rule, which Stratz utilized in comparing various peoples: the white race has the pro-

portions of the canon, the Fuegians undue length of the arms, the negro undue length of all four extremities, and the Chinese deficient length of all four extremities.

As regards the skeleton the attempt was made, in the first place, to determine racial peculiarities by the study of the skull. The length, breadth, and height of the cranium were determined, and from these were calculated the length-breadth, length-height, and breadth-height indices—that is, the breadth and height were expressed as percentages of the length or breadth. According to the Frankfort Agreement of 1882 skulls are divided into narrow or dolichocephalic (up to 74.9), medium or mesocephalic (75.0 to 79.9), and broad or brachycephalic (over 80.0); and further into low or chamæcephalic (up to 70.0), medium or orthocephalic (70.1 to 75.0), and high or hypsicephalic (over 75.0). According to the international agreement of 1883 the following designations were added to those already in use: ultradolichocephalic (55.0 to 59.9) hyperdolichocephalic (60.0 to 64.9), hyperbrachycephalic (85.0 to 89.9) and ultrabrachycephalic (90.0 to 94.9). The French call skulls with a length-breadth index of 75.01 to 77.77 subdolichocephalic, of 80.01 to 83.33 subbrachycephalic; only the indices 77.78 to 80.0 are looked upon by them as mesocephalic. For the front of the skull the criteria used in determining the peculiarities of a race are the height and breadth, the facial angle, and the form of the nostrils, orbital entrance, and palate. The ratios of the breadth of the zygomatic arch (supposing it equal to 100) to the height of the entire face (from the nasion to the gnathion), and to the height of the upper face (from the nasion to the prosthion), give facial indices which are divided by R. Martin into the following groups: (1) Index for the entire face: hyperuryprosopous (to 79.9), euryprosopous (80.0 to 84.9), mesoprosopous (85.0 to 89.9), leptoprosopous (90.0 to 94.9), hyperleptoprosopous (over 95.0). (2) Index for the upper face: hypereuryonic (to 44.9), euryonic (45.0 to 49.9), mesial (50.0 to 54.9), leptous (55.0 to 59.9), hyperleptous (over 60.0). The expressions euryprosopous and euryonic correspond to the chamæconchous of the Frankfort Agreement; leptous is the same as leptoprosopous. According to the Frankfort Agreement the orbits are chamæconchous (to 80.0), mesoconchous (80.1 to 85.0), hypsiconchous (over 85.0); the nostrils are leptorhine (to 47.0), mesorhine (47.1 to 51.0), platyrhine (51.1 to 58.0), hyperplatyrhine (over 58.0); the palate is leptostaphyline (to 80.0), mesostaphyline (80.0 to 85.0), brachystaphyline (over 85.0). The facial part of the skull with a facial angle up to 82 is called prognathous; with an angle of 83 to 90, orthognathous; with an angle of 91 and over, hyperorthognathous. By facial angle is meant that formed by the line connecting the naso-frontal suture and the point farthest forward on the upper jaw between the central incisors (the alveolar point) with the German horizontal plane. The German horizontal plane passes through the lowest point of the under edge of the orbits and the upper edge of the ear-aperture. Besides these indices, to which correspond groups more or less generally recognized, other points of importance for the shape of the braincap and the facial part of the skull are: the ratio of the greatest breadth of the braincap to the smallest frontal breadth (smallest distance between the temporal lines over the zygomatic process of the frontal bone); also the ratio of the breadth of the zygoma to the smallest breadth of the forehead, and to the breadth of the face at the two angles of the lower jaw. At the base of the skull measurements can be taken of the angle formed by the plane of the occipital foramen with the German horizontal plane, and of the angle formed by this German plane with the surface between the occipital foramen and the spheno-basilar joint.

In the comparison of crania, especially of the ratios of angles, it is necessary to place the skull in a definite position. To attain this, various methods have been used besides the German horizontal plane already mentioned. G. Schwalbe has recently used the glabella-inion line (glabella, the central point between the arches of the eyebrows; inion, the protuberance of the occiput at the median line) for the comparison of the brainpans at the sagittal sutures, while H. Klaatsch has returned to the glabella-lambda line formerly proposed by Hamy (lambda, the point of union of the lambdoid and sagittal sutures). In the first case the height of the cap (the distance of the highest point from the glabella-inion line), the height of the bregma (the linear distance of the bregma from the point of comparison, i. e. the distance between the point of intersection of the coronal and sagittal sutures by the glabella-inion line), and their ratios to the glabella-inion line (which is taken as 100), can be determined. On this line Schwalbe traced the frontal angle (that between the tangent of the frontal bone at the glabella and the glabella-inion line), the bregma angle (bregma-glabella-inion); the lambda angle (lambda-inion-glabella); the opisthion angle (glabella-inion-opisthion); the opisthion is the posterior border of the occipital foramen). Schwalbe also determined the position of the bregma (distance of the base point of the bregma-verticals from the glabella) and the index of this position to the glabella-inion line, the glabella-cerebral index (ratio of the tendon of the glabella arch to the tendon of the arch of the frontal bone). The other bones of the skeleton were not made the object of exhaustive study until more recent times. Particular mention should be made, as important in the comparative anatomy of races, of the cross-section of the diaphysis of the long bones, and of the position of the epiphyses to the diaphysis.

Not only the structure of the skeleton, but also the musculature and the general formation of the soft parts are taken into consideration. As regards the musculature attention is given especially to the varieties found in the face; measuring the thickness of the soft parts of the face (by piercing with needles such parts in fresh or preserved cadavers) also yields good results, when there are sufficient subjects for investigation. Apparently, the flat, broad face of the Mongol is mainly conditioned by the great thickness of the soft parts in the region of the cheek. Racial differences are also shown by the nose. The nose of Europeans and Asiatic Indians is long, narrow, with a more or less decided projection; the roots are high and narrow, the back straight or convex, the wings are appressed, the nostrils set vertically to the upper lip, the elevation (that is the height of the point above the lip) relatively large. According to Topinard's theory noses are divided into aquiline, straight, flat, hooked, and Semitic noses. The nose of the aboriginal Australians is poorly developed; it does not project, the roots are low and broad, the back broad and rather concave, the wings decidedly projecting; the nostrils lie parallel to the upper lip, and the elevation is slight. There are a large number of intermediate forms between these extreme ones (e. g. according to Topinard, the Mongoloid, negroid, and Australoid). The roots of the nose may enter the forehead without depression, by a sharp bend, or in a flat curve. The region above the orbits and between the borders of the orbits varies. Either the entire part projects in a ridge (brow ridges, *torus supraorbitalis*), or only the glabella, that is the prominent part of the forehead just above the root of the nose, seems to be curved, or projections arise from a somewhat depressed glabella and extend to about the middle of the upper orbital border, the sections on the sides being then flat (*planum supraorbitale*). The forehead is either flat and receding, or is full, domed, and rises more or less abruptly. The position of the sockets of the

eyes is horizontal in the white race and inclines obliquely upwards in Mongols; in the latter case the lacrimal caruncle is generally not free, but is covered by a fold that inclines downward in a curve (the Mongolian fold). In the same way the edge of the Mongolian eyelid, which in other cases is free, generally lies under a transverse fold. The forms of the ear and mouth are less used as racial characteristics. They display only individual variations, although a peculiarity of the negro race is the great protrusion and thickness of the lips.

Especially important for the differentiation of races are the colour of the eyes and skin, and the form and colour of the hair. The colour of these parts of the body is conditioned by a brownish pigment, on the amount and seat of which the shade of colour depends. Eyes are called blue and blue-grey when only the black layers of the iris contain the pigment, which appears blue through the cloudy outer layers of tissue. If the other layers of the iris also contain pigment, the eye appears from light to dark brown. The pupils are like a dark circle, the blood-vessels of the retina appearing red only in albinos (persons with very little or no pigment). The other parts of the eye also contain more or less pigment. The pigment of the skin is found chiefly in the epidermis; in new-born children of coloured races (at times also in white infants), as the Mongolians and negro, pigment in the true skin or corium produces blue spots in the region of the loins, called the blue Mongolian spot. In hair the horny outer portion is the main seat of the pigment. Besides the amount of air in the hair is also of importance; hair containing a great amount of air (appearance of age) looks grey or white, this condition being usually accompanied by a disappearance of the hair-pigment. Hair is divided as to colour into flaxen, light brown, black, red, and grey; it is lank, smooth, wavy, or curly. Lank hair generally shows a round cross-section, and curly an oval one; there are other cross-sections (e. g. the reniform or elliptical). In the same individual the eyes, hair, and skin may be of different colours. Blue eyes, flaxen hair, and white skin constitute the blonde type; brown eyes, brown hair, and dark skin make the brunette type. Between these two types are all possible variations and mixtures.

Although the human race must be regarded as a unit intellectually and physically, there have existed and still exist differences which permit a classification into various groups and races. Even the most ancient remains of man, dating from the glacial period in Europe, show differences that justify the acceptance of at least two races. Remains of skeletons that certainly belong to the Quaternary age have been found in France, Germany, and Austria. The shape of the crania found at Spy, Krapina, La Chapelle aux Saintes, Le Moustier, etc., resembles that of the skull discovered at Neandertal, the geological stratification of which is uncertain. These remains can be grouped together as the "Neandertal race", which had a long, narrow, low skull with very retreating forehead, enormous brow ridges (*torus supraorbitalis*), powerful masticating apparatus, upper jaw without the *fossæ caninæ*, heavy under jaw with broad ascending branch, no chin, and chin part with an outward convex curve. Some of these characteristics are still to be found among the Eskimo and aboriginal Australians. The bones of the skeletons indicate a bulky, relatively low-sized frame. The gait was upright, but it would seem with knees somewhat bent. Variations existed even in this era. The Krapina remains belong to crania somewhat broader than do the remains of the Neandertal race of Western Europe. The strata in which the remains of the skeletons were found must be regarded as belonging to the last warm intermediate period (or the last glacial period), and were found

with remains of the early Palæolithic period, the stage of civilization represented by the Saint-Acheul and Le Moustier remains. During the glacial period, particularly during the late Palæolithic period (as represented by the remains found at Aurignac, Solutr , and La Madeleine), human beings of a different form existed. Their remains, as those found at Laugerie-Basse, Chancelade, Mentone, and Combe-Capelle, may be grouped together as the "Cro-Magnon Race". The peculiarities of the Neandertal race are not to be found; the generally long dolichocephalic crania have a good vault, and are relatively high without great brow ridges; the apparatus for mastication is less powerful; the upper jaw contains plainly *fossæ caninæ*; the under jaw is less massive, the chin being fine and projecting. In the structure of the cranium the Cro-Magnon race on the whole resembled the modern European. Local variations are recognizable. It is not impossible that both diluvial races lived at the same era, so that crossings appeared, as would seem the case from the skulls found at Galley Hill and at Briinn. The bones of the skeletons indicate a higher stature. Variations with a broader skull appeared in Europe very soon after this, if not along with the long-skulled Cro-Magnon race in the diluvial epoch, so that the present different shapes of crania found in Europe seem to go back to the earliest era. Schliz ascertained two main forms of crania in the remains found in a layer of the Ofnet cave near N rdlingen (Bavaria) belonging to the transition period between the Quaternary and the present geological era: one was a low, short skull and the other a moderately high, long skull, both with a low, broad face. These skulls recall, on one hand, the form of the skull of the *homo alpinus*, and, on the other, the structure of the skull of the later lake-dwellers and of the Mediterranean type.

While in the course of the prehistoric epochs in Europe the variations in the form of the skull multiplied, Schliz believes that the various prehistoric ages (Stone age, Bronze age, Iron age) show races with well-defined forms of the skull. At present time the European, of all the branches of mankind, has been the most thoroughly investigated anthropologically. Notwithstanding the crossings which have occurred continuously for centuries, certain groups with definite somatological peculiarities are recognizable. Stature, the shape of the skull, and the colour of the complexion have been taken as the criteria of these groups. According to this classification there is in the interior of Europe, in Alpine territory, a brunette population of medium stature and with a broad head; towards the north the crania are narrower, the colour of the skin, hair, and eyes is lighter, the stature is higher; towards the south the stature decreases, the complexion is darker, but the skull in the south, as in the north, is narrower than in the case of the first-named class. Starting from the north to the south, Ripley names these three types: (1) Teutonic race: long head and face, very light hair, blue eyes, high stature, narrow and partly curved nose; (2) Alpine race: round head, broad face, light chestnut brown hair, nut-brown eyes, robust medium stature, variable but generally broad, strong nose; (3) Mediterranean race: long head, long face, hair dark-brown to black, dark eyes, medium to small stature, rather broad nose. Between these pure types there are innumerable crossings.

It is exceedingly difficult, if not impossible, to include the various races of mankind in one system. All attempts made hitherto contain certain defects which are perhaps unavoidable. Linn us sought to establish the characteristic physical and intellectual peculiarities of the inhabitants of the four quarters of the globe then known. Later investigators have selected one or a few peculiarities of the body (e. g.

the shape of the cranium or hair, the colour of the skin) as the principle of classification, or have used a combination of several characteristics. Finally ethnological peculiarities (especially the language and degree of civilization) were invoked for aid in characterization. Linnæus differentiated four varieties of the *homo diurnus* (a sub-division of the *homo sapiens*): (1) American; (2) European; (3) Asiatic; (4) African. Not only were the colour of the skin and eyes, the colour and form of the hair, and the form of the nose used as criteria of these four divisions, but the different temperaments of the four races were also distinguished, other criteria being their peculiarities of character, mode of dress, and whether the individual races were governed by customs, laws, beliefs, or arbitrary rule.

Blumenbach already attempted to group the races of mankind on the basis of purely somatological peculiarities, selecting five typical forms of the cranium as the criteria of the five races of men. He took as the normal type the skull of the Caucasian race, which is distinguished by harmony of the individual parts, none being unduly prominent: with roundness (mesocephaly) are united a massive high forehead, narrow cheek-bones, round alveolar arch, and an orthognathous upper jaw. To the Caucasian type belong: Europeans (except the Lapps and Finns), Western Asiatics, and North Africans. Around this type are grouped the others, which are related both to it and one another. The Mongolian race includes most Asiatics, the Finnish tribes, the Lapps and the Eskimo; it has an almost square skull (exceedingly brachycephalic), flat nose, flat projecting malar bone, somewhat broad alveolar arch, and projecting chin. The American race has a higher forehead, highly developed superciliary arch, deeply sunken bridge of the nose, cheek-bones strongly projecting sideways, and high, broad, and strong lower jaw. In this race Blumenbach included all aboriginal Americans except the Eskimo. The skull of the Malay race is brachycephalic; the parietal bones project strongly sideways, the nose and cheek-bones are flat, and the upper jaws slightly prognathous. To this race belong the inhabitants of Malacca in Asia and the natives of the islands of the Pacific and Indian Oceans. The Ethiopian race includes the inhabitants of Africa except the Caucasian Africans in the north; the skull is dolichocephalic, the forehead full, the cheek-bones prominent, the nostrils wide, the alveolar arch narrow and prominent, the jaws prognathous, and the lower jaw large and strong. Blumenbach added to these craniological criteria others of a general somatological character, deduced from the observation of the members of the body, chiefly of the head and its parts. Blumenbach's classification still has adherents, B. P. Ehrenreich, for example, being a vigorous supporter of it. He adds to the classification, however, those races that have become known or at least better known since Blumenbach's time. These are mainly the blacks of Asia and the aboriginal races of Australia and Oceania. According to Ehrenreich, the classification is: (1) Caucasian-Mediterranean; (2) African-Nigritian; (3) Mongolian; (4) American; (5) Malay Polynesian; (6) Australian. In addition there is (7) the Papuans and the blacks of Asia, including the Dravidians and the Kolarian tribes of India, whose position in Ehrenreich's anthropological system must still be regarded as uncertain.

Blumenbach's classification was based on observation and description. There now followed a series of attempts to determine the different types by measurements. For the determination of the variations in the facial part of the skull Camper had already settled by measurement the facial angle, that is the angle made by the profile line and the auriculo-subnasal line (the line from the ear orifice to the lowest

part of the nose). A. Retzius introduced the word orthognathism to signify an almost right facial angle (90°), and called the more acute facial angle prognathy. Having noticed that in Sweden the Germans had narrow skulls, while the skulls of the Lapps were broad, Retzius sought to determine these shapes mathematically by the length-breadth index. He combined the groups of dolichocephalic and brachycephalic crania gained in this way with the groups of facial angles, and thus arrived at four main types of crania: orthognathous dolichocephalic, orthognathous brachycephalic, prognathous dolichocephalic, and prognathous brachycephalic. However, this classification of the shapes of the cranium was unsatisfactory, even when mesocephalic crania were separated from the others, since the various forms appear within every race, although perhaps with varying frequency. Welcker's investigations proved that crania ranging from dolichocephalic to hyperbrachycephalic are found in the Mediterranean, Malayan, and American races; the Monoglians appear to be rather mesobrachycephalic and hyperbrachycephalic, while the black races incline more to dolichocephaly. J. Kollmann also based his racial classification on the shape of the skull and face. He supposed six sub-species: chamæprosopous dolichocephalic, chamæprosopous mesocephalic, chamæprosopous brachycephalic, leptoprosopous dolichocephalic, leptoprosopous mesocephalic, leptoprosopous brachycephalic. These sub-species have, through migrations and penetrations, spread over the entire world, and may be grouped into eighteen varieties according to the nature of the hair (smooth, bristly or coarse, and woolly).

Besides the shape of the skull, other somatological peculiarities have been employed by P. Topinard in the classification of races. Following Cuvier's classification, he takes as his main divisions the white, yellow, and black races, which he characterizes mainly by the shape of the nose. The narrow-nosed (leptorhine) white race has wavy hair with oval cross-section. Of those with dolichocephalic crania, one division is blonde and large (Anglo-Scandinavian or Cymric); another large with red hair (first type of the Finns); a third brunette and relatively small (Mediterranean races). The mesocephalic type with brown hair and relatively small stature is found in the Semites and Egyptians. The brachycephalic type is composed of the little Lapps and Ligurians with brown hair, and the Celto-Slavs of medium height. The yellow race with nose of medium width (mesorhine), coarse, straight hair of round cross-section, also contains dolichocephalic, mesocephalic, and brachycephalic types. The Eskimo are small, dolichocephalic, and have a yellow skin; the Tehuelches are large, dolichocephalic, and have a reddish skin; the Polynesians are large, mesocephalic, and have a reddish skin. The brachycephalic type is represented by the Quaranni and Peruvians, the former being of medium size with yellow skin, and the latter small with olive skin. The broad-nosed (platyrhine) black race was divided by Topinard into one group with straight hair of oval cross-section, and a second group with woolly hair of elliptical section. The first group, comprising the aboriginal Australians, are dolichocephalic, tall, and have a black skin; all three types of skull appear in the second group. The very small yellowish Bushmen, the large black Melanesians, and the African negroes are dolichocephalic, the medium-sized black Tasmanians mesocephalic, the small black Negritos brachycephalic.

A summary according to somatological principles has been given lately by J. Deniker (cf. "The Races of Man", p. 225), a Frenchman, who has selected the divisions of the earth as the principle of classification in the description of the several races and tribes.

A. Frizzly hair, broad nose.—(a) yellow skin: (1)

the Bushman races, comprising Hottentots and Bushmen—yellow skin, steatopygous, small stature, dolichocephalic;

(b) dark skin: (2) Negrito races, comprising both Negrillo and Negrito—reddish-brown skin, stature very small, sub-brachycephalic or sub-dolichocephalic; (3) Negro, comprising the Nigritian and Bantu stocks—black skin, dolichocephalic; (4) Melaneseans, comprising Papuans and Melaneseans—blackish-brown skin, medium stature, dolichocephalic.

B. Hair frizzly or wavy.—(a) dark skin: (5) Ethiopians—reddish-brown skin, narrow nose, large stature, dolichocephalic; (6) aboriginal Australians—chocolate brown skin, broad nose, medium stature, dolichocephalic; (7) Dravidians—blackish-brown skin, broad or straight nose, small stature, dolichocephalic;

(b) skin dirty white: Assyrioids—nose narrow, and convex with thick end.

C. Hair wavy, brown or black in colour, eyes dark.—(a) skin light brown: (9) Indo-Afghan—hair black, nose narrow, straight or convex, tall stature;

(b) dirty white skin, black hair: (a) tall stature, long face: (10) Arabians and Semites—aquiline nose, projecting occiput, dolichocephalic, elliptical face; (11) Berbers—nose straight and thick, dolichocephalic, square face: (12) Inhabitants of the European coasts—nose straight and small, mesocephalic, face oval;

(β) Small stature: (13) Inhabitants of the Iberian island—dolichocephalic;

(c) dull white skin, hair brown: (14) Inhabitants of Western Europe—small stature, strongly brachycephalic, face round: (15) Inhabitants of countries on the Adriatic—tall stature, brachycephalic, long face.

D. Hair wavy or straight, flaxen in colour, eyes light, skin pinkish white.—(16) Northern Europeans—hair generally wavy, flaxen or reddish, tall stature, dolichocephalic; (17) Eastern Europeans—hair generally straight, tow-coloured, small stature, sub-dolichocephalic.

E. Hair straight or wavy and black, dark eyes.—(a) Skin light brown: (18) Ainos—body very hairy, nose broad and concave, dolichocephalic;

(b) Skin yellow, body without hair: (19) Polyne- sians—nose projecting and often convex, tall stature, elliptical face, brachycephalic or mesocephalic; (20) Indonesians—small stature, nose flat and often concave, projecting cheek-bones, face lozenge-shaped, dolichocephalic: (21) Native races of South America—small stature, nose projecting and straight, mesocephalic or dolichocephalic.

F. Straight hair.—(a) Sallow skin: (a) Straight or aquiline nose: (22) North American races—tall stature, mesocephalic; (23) Native races of Central America—small stature, brachycephalic; (β) Straight nose: (24) Patagonians—tall stature, brachycephalic, square face;

(b) Skin yellow-brown: (25) Eskimo—small stature, face round and flat, dolichocephalic;

(c) Skin pale yellow: (26) Lapps—snub-nose, small stature, brachycephalic; (27) Ugrian race—nose straight or concave, small stature, mesocephalic or dolichocephalic, projecting cheek-bones; (28) Turks or Turko-Tatars—straight nose, medium stature, very brachycephalic;

(d) Skin sallow: (29) Mongolians—projecting cheek-bones, Mongolian fold, slightly brachycephalic.

Huxley classifies mankind on a somatic-anthropological basis. He divided the human race into four main types: the Australioid, Negroid, Xanthocroi, and Mongoloid, to which he afterwards added the Melanochroi. The aboriginal Australians are the chief representatives of the dolichocephalic Australioid type (dark skin and eyes, wavy black hair, flat nose, pronounced osseous superciliary arch, and very prognathous). Outside Australia, Huxley claimed to have found the Australioid type in the interior of the Deccan, and among the Egyptians. The standard for

the Negroid type is the African negro. Huxley wrongly considered this type as almost without exception dolichocephalic. It generally lacks a bony superciliary arch; skin and eyes are brown to black; the hair black, short and frizzly or woolly; the nose flat and broad; the lips thick and protruding, while prognathism is universal. According to Huxley, the particular modifications of the Negroid type are: the small Bushmen with lighter skin; the partly brachycephalic Negritos with heavy superciliary arch, living in southern and south-eastern Asia (the Malay Peninsula), and in the Andaman, Philippine, and South Sea Islands (Papuans) as far as Tasmania. Among these Negritos there has been a considerable crossing with Polynesians and Malaysians. Huxley grouped together the inhabitants of the greater part of Central Europe as the Xanthocroi or fair-white type. This group is characterized by an almost colourless soft skin, blue or grey eyes, and light hair; the shape of the skull ranges from dolichocephalic to brachycephalic. In the south and west this type comes into contact with the Melanochroi; in the north and east, where it extends to Hindustan, with the Mongoloid type. According to Huxley all Asia and its surrounding islands in the east and south-east, the east and north-east of Europe, and the whole of America are inhabited by the Mongoloid type (yellowish-brown skin, black eyes, black, lank hair, small, flat nose, oblique fold of the eyelid, but no projecting bony superciliary arch); the type is partly brachycephalic, partly dolichocephalic. The Melanochroi or brunettes live around the Mediterranean Sea, and extend through Asia Minor across Arabia and Persia to Hindustan. The skin is brownish, the fine wavy hair almost black, the eyes dark. Huxley considered the Melanochroi the result of a mixture of the Xanthocroi and Australioids.

The attempt of Linnæus to employ intellectual peculiarities as criteria has also been repeatedly imitated. Thus, Friedrich Müller has combined somatic (form of the hair) and linguistic peculiarities to form the basis of his racial classification. According to his theory mankind is divided, according to the shape of the head, into woolly-haired and sleek-haired. The woolly-haired races are subdivided into those with tuft-like hair (Hottentots, Papuans), and those with fleecy hair (African negro, Kafir); the sleek-haired races into the straight-haired (as the Australians, Hyperboreans, Americans, Malaysians, Mongolians) and the curly-haired (as the Dravidians, Nubians, and Mediterranean races). These races are subdivided into a number of family groups on the basis of language and of the intellectual culture arising from it. Müller distinguished: the Indo-Germanic family of languages (Germanic, Romanic, Slavonic, Celtic, Greek, Albanian, Iranian, Indian); the Ural-Altaic family (Finno-Ugrian, Turkish and Yakutish, Mongolian, Tungusian, Samoyedic); the South-Asiatic family (Chinese, Siamese, Annamite, Burmese, and Thibetan); the Hamito-Semitic family (Semitic-Arabic, and Hamitic); the Malayo-Polynesian group (the Malayan, Polynesian, and Melanesian languages); the Bantu family, and along with it the American languages (related to this group only as to structure), the Dravidian, and various isolated languages.

Following Cuvier and Topinard, W. H. Flower, an Englishman, separates mankind into three main divisions:

I. Ethiopian or Negroid Races: (a) The African type of negro; (b) Hottentots and Bushmen; (c) The Oceanic negro or Melanesians; (d) Negritos.

II. Mongolian Race: (a) Eskimo; (b) The Mongols proper, comprising the Mongolo-Altaic group; and the southern Mongolian group; (c) Malaysians; (d) Polynesians, Maoris; (e) Americans.

III. Caucasians, comprising Xanthocroi and Melanochroi. From these three main races (called

archimorphic by C. H. Stratz), G. Fritsch has distinguished the mixed races derived from them as *metamorphic*. Both divisions have a strongly developed instinct for migration (nomadic peoples), which has promoted the growth of civilization. At the same time Fritsch and Stratz assumed a series of tribes without an instinct for migration (non-nomadic peoples); these were named by Stratz *protomorphic*. These theories, however, have scientific value as working hypotheses, even though the one or the other may prove to be incorrect.

Following in part the investigations made by Klaatsch of the skeleton, Stratz takes as protomorphic criteria: great individual variability; normal proportions (according to the calculations of Fritsch) with slightly excessive length of the arm; total height six or seven times the height of the heads; external appearance little different in the two sexes; women with small hips and *mamma areolata*; light to dark brown skin; hair of the head very variant with oval cross-section; hair on the body moderately developed; pronounced protuberance of frontal bone; inclination to dolichocephaly and prognathism; strong, broad jaws; facial part of the skull large in proportion to the back of the skull; coarse features; broad nose; small orbits widely separated from each other; pointed ear, like the ear of the *Macaca* monkey; graceful, slender frame; narrow vertebrae; slighter curvature of the vertebral column; narrow pelvis; platyknic tibia; nates weak; femur slight; no calves; tendency to a crouching position and to turning the foot inwards; foot adapted for climbing; prehensile foot; weaker development of the ankle-bone (*talus*), of the heel-bone (*calcaneus*), of the cuboid bone (*os cuboideum*), of the toe; very slight arch to the sole of the foot; entire sole set on the ground in walking; early development of sexual instinct. Stratz has selected the following as the criteria for the three archimorphic races. Those of the melanodermic or black race are: excessive length of the legs; total height 7 to 7.5 heads; skin from dark brown almost to black; the hair of the head thick, black, and frizzly, with an elliptical cross-section; hair on the body scant; an inclination to dolichocephaly (with a very decided breadth of the skull behind); pronounced prognathism; powerful broad, and high jaws. Among the characteristics of the yellow or xanthodermic race are: deficient length of the limbs; total height 7 to 7.5 heads; *mamma papillata*; brownish-yellow to light yellow skin, coarse and black hair of the head, with a round cross-section; hair on the body scant; inclination to brachycephaly; broad, short jaw; slight frontal ridge; short, small, strong foot with moderate arch. Among the criteria of the leucodermic or white race are: normal proportions; stature, 7.5 to 8 heads; *mamma papillata*; light brown to almost white skin; orthognathism; from slight to hardly noticeable frontal ridge; narrow, high jaws; large muscles of the seat and calves; narrow, long foot with powerful arch; strong ball of the great toe; powerful heel.

Stratz has also sought to compare the different races according to their relationship and development. According to him, the aboriginal Australians of to-day are the nearest to the common monogenetic original form. The second earliest protomorphic races are the Papuans, Koikoin, and kindred races. After the black races in Africa had become separated from the main stock of mankind, the third earliest protomorphic group separated from the first stock (the American races, Malays of the interior of the peninsula, Kanakas, and Andamans). After the main yellow race had been thrown off from the main stock, the fourth earliest protomorphic group was formed (according to Stratz, the Ainos, Veddahs, Dravidians, Basques, and Celts). Finally the main white race was developed. The metamorphic races

are to be regarded as races still in the process of formation. Fritsch regards the three archimorphic main races as centres of radiation: the white race in South-Western Asia, the yellow race in North-Eastern Asia, and the black race in Central Africa. The white stock divided into the Semitic and Sanskritist branches; the yellow into the Chinese and Scythian branches; while the Finno-Tatar branch belongs to both the white and yellow stocks. The black stock divided into the Pelagic branch (living on the islands south and south-east of Asia) and the African branch. According to Fritsch, owing to the universal fertility of crosses among mankind, the contact of the main stocks with one another and with the protomorphic races gave rise at the points of contact to the metamorphic races. Fritsch took as protomorphic non-nomadic peoples (i. e. as remains of original primitive peoples): in Africa, the Bushmen, Akkas Obongos, Batuas; in Australia, the natives of Queensland; in Asia, the Dravidians, Veddahs, Guang, Senoi, Kubu-kubu, Hieng, Miao-Tse, Ainos; in America, the Makus, the Ges tribes of Eastern Brazil, Fuegians; in Europe, the Neandertal race, the Alpine race, the European dwarf race, and the Lapps living in stone huts.

On the basis of the theories of Stratz and Keane, Schurtz makes the following classification:

I. Early races (that is the almost disappeared remains of earlier races): (1) Palæo-Asiatic, non-Mongolian race (the Ainos); (2) Ethiopian race (the Nubians); (3) dwarf race.

II. Chief family groups: A. Light colour or European-West-Asiatic group of races: northern Alpine, and Mediterranean main races; B. Asiatic-Polynesian group of races: Mongolian stock, Malayo-Polynesian stock; C. Nigritian group of races: (1) Negro; (2) dark-coloured Indian (Dravidic races); (3) Indonesian and Oceanic Nigritian (Negritos, Melanesians); (4) Australians and Tasmanians; D. American group of races.

III. Hybrid races: (1) Finno-Ugrian hybrid race; (2) Berber hybrid race.

Most of the above racial classifications offer certain advantages, but also show faults that may not be overlooked. All contain three great groups which may be characterized from the most striking attributes as the smooth to wavy-haired white race, the coarse-haired yellow race, and the frizzly-haired black race. In addition, however, these races all exhibit a series of other differences, somatological and ethnological. However, it is difficult to group together a number of branches of these three main stocks. Most writers who desire to give a descriptive summary of the races and peoples of the world (as Deniker, Buschan, Schurtz, and others) have, therefore, primarily guided themselves by the abodes of these races, and have grouped them according to the divisions of the earth within which it can be shown that various branches and subordinate groups live.

FERDINAND BIRKNER

ETHNOLOGICAL TABLE OF THE HUMAN RACE

WHITE RACES

FAMILIES	BRANCHES	SPECIAL CHARACTERISTICS OF BRANCHES
I. INDO-GERMANIC OR ARYAN: skin white to brunette; hair flaxen to dark-brown, straight, wavy, or curly; eyes horizontal, blue to brown; face narrow to broad; nose narrow and prominent; dolichocephalic to brachycephalic; orthognathous to slightly prognathous.	(1) <i>Teutonic</i> (Germans, English, Scandinavians, Frisians, Netherlands). (2) <i>Romanic</i> (Italians, French, Spaniards, Portuguese, Rhoeto-Romans, Ladins, Friauls, Roumanians). (3) <i>Slav</i> .—(a) West Slavs: Wends, Poles, Tchechs, Slovaks; (b) East Slavs: the Great, White, and Little Russians (Ruthenians); (c) South Slavs: Slovenes and Serbocroats. (4) <i>Greek</i> (with strong Slav strain). (5) <i>Celtic</i> .—(a) Gauls; (b) Cymri (Welsh and Cornish); (c) Bretons; (d) Gaels (Irish and Scotch). (6) <i>Lettic or Lithuanian</i> . (7) <i>Iranian</i> (Persians, Afghans, Baluchis, Ossetians, Kurds). (8) <i>Indian</i> (Hindu), <i>Kafir</i> . (9) <i>Armenian</i> (mixed type). (10) <i>Albanian</i> . (11) <i>Sart and Tate</i> . (12) <i>Dard</i> (Hindu and Mongolian).	{ White skin, flaxen hair, blue eyes, dolichocephalic, tall (towards the South, brunette, brachycephalic, smaller). { Brunette; physical characteristics of various types; speech derived from various dialects of the Latin language. { Blond (in the north) to brunette (in the south); face flat and frequently broad. { Noble features. { Speech, Slavo-Lettic language; physical resemblance to Teutons. { Brunette, strong profile. { Brunette, strong profile.
II. SEMITIC: fair to brunette; strong profile; nose large, and narrow.	(1) <i>Jewish</i> ; (2) <i>Syrian</i> ; (3) <i>Arabian</i> ; (4) <i>Kufrah</i> ; (5) <i>Maronite and Druse</i> .	
III. HAMITIC: dark skin; hair sleek and frizzly; stature moderate; dolichocephalic; prognathous.	(1) <i>Berber</i> (in Morocco; Kabyles in Algeria; Tuaregs). (2) <i>Nubian</i> : Nubians proper, Agau, Danakil, Gallas, Somalis, and Wahuma.	
IV. MIXED RACES.	(1) <i>Hamite</i> × <i>Semite</i> : Egyptians, Abyssinians; (2) <i>Hamite</i> × <i>Negro</i> : Fulahs, Masai, Niam-Niam, Mangbuttu, Kanembu, Kanuri; (3) <i>Hamite</i> × <i>Semite</i> × <i>Negro</i> : Tibbus.	
V. REMAINS OF PRIMITIVE RACES.	{ Basques; Ainus; certain tribes of the Caucasus.	

YELLOW RACES

FAMILIES	BRANCHES
I. MONGOL: yellowish skin; straight hair, dark-brown to black; eyes dark and oblique; face flat and broad; nose low and broad; brachycephalic; of medium stature.	(1) <i>East Mongol</i> : Khalkhas, Chakhars, Ordus; (2) <i>West Mongol</i> (Kalmucks): Sungar, Khoshod, Torgod, Dörböd, Hill Kalmucks, Teleutes; (3) <i>Mongol</i> × <i>Iranian</i> : Shi'ites, Sunnites.
II. TURK (TURCO-TATAR): of larger stature; less brachycephalic; Aryan features.	{ Tatars (Siberian, Kazan, etc.), Yakuts, Kirghiz, Usbeks, Kashgarias, Nogais, Kiptchaks, Turkomans, Ottomans.
III. THIBETAN: well-built; Aryan strain.	{ Thibetans proper, Tanguts, Ladakis, Ghoorkhas, Chinese hill tribes (Lolos, Miao-tsze).
IV. CHINESE, JAPANESE, and COREAN.	{ Two types are distinguished: (1) the <i>Northern</i> or <i>Manchu-Corean</i> , the finer type, with oval face; (2) the <i>Southern</i> or <i>Mongolo-Malay</i> , the coarser, with broad, triangular face.
V. TUNGUS.	{ Tungus proper, Manchu, Lamuts, Daurians, Golds.
VI. SAMOYEDIC.	{ Samoyedes proper, Karagasses, Soyotes, Motors, Kaibals, Kamasins.
VII. FINNO-UGRIAN: combines with Mongolian characteristics fair skin, flaxen hair, and blue eyes.	(1) <i>Finnic</i> : Finns proper, Esthonians, Livonians, Lapps, Volga tribes (Mordvinian, Tcheremissian), Bulgars, Permians, Siryenians (Finland), Votyaks; (2) <i>Ugric</i> : Ostyaks, Voguls, Magyars.
VIII. MALAY: hair long and generally brown; face flat; nose small, low, and flat; oblique eyes; prominent malar bone.	(1) <i>Sundanese</i> : Malays proper (Malacca), Battaks (Sumatra), Dayak (Borneo), Javanese, Bugis (Celebes), Alfuros (East Indies); (2) <i>Philippine</i> : Tagalas (Luzon), Visaya (Mindanao); (3) <i>Malagasy</i> ; (4) <i>Polynesian</i> , in the Pacific Ocean (except the Fiji Islands); (5) <i>Micronesian</i> , connecting link between the Polynesian and Melanesian.
IX. ESKIMO: light-brown skin; straight hair; eyes dark and oblique; dolichocephalic; face broad; superior maxillary and malar bones prominent; nose flat; of low stature.	
X. INDIAN: skin yellow to reddish brown; hair straight and black; face broad; superior maxillary bone prominent; nose large and elevated to broad and flat; dolichocephalic to brachycephalic; stature small to very large.	(1) <i>North-Western America</i> : Nutkas (Thlinkeets, Haidas, Chimmesyan); (2) <i>North America</i> : Athabascans, Algonquins, Iroquois and Hurons, Dakotas (Sioux), Shoshones, Muskogees, Aztecs, Zapotecs, Mixtecas, Chichimecs; (3) <i>Central America</i> : Mayans, Zapotecs; (4) <i>South America</i> : Arawaks, Caribians, Tupi, Ges; Guaicuri; Araucanians; Patagonians; Fuegians.
XI. REMAINS OF PRIMITIVE RACES.	{ Moiss, Kuis, Mons, Ciampas, Karens, Nagas.
XII. MIXED RACES.	{ Khmers (Cambodia); Annamites; Burmese and Aracans (Burmah); Thaïs or Shans (Siam and Laos); Igorrotes (dolichocephalic); Nicobars.

BLACK RACES

I. BANTU: light-brown to black; black hair with a spiral curl; eyes dark; face flat and prognathous; blubber-lipped; nose broad, flat; dolichocephalic.	{ Kafirs (Zulus, Matabeles, Bechuanas, Mafitis), Hereros, Ovampos, Borotses, Bakubas, Balubas, Kalundas, Wasagaras, Ugogos, Wanjamwes, Wadschaggas, Fans, Dualas, Bakwiris, Jaundes.
II. SUDANESE NEGRO (Negro × fair races): skin mostly fairer; face frequently with stronger profile.	{ Nilotic tribes (Schilluks, Dinkas, Baris, Berbas), Hausas, Ashantees, Krus, Weis, Mandingos, Jolofs, Jorubas, Dahomans, Ewes.
III. HOTTENTOT (KHOI-KHOIN): flabby skin, light-brown to yellow; triangular faces; superior maxillary bone very prominent; pointed chin; steatopygous.	(1) Namaquas, Korannas; (2) Hill Damaras (Hottentot × Herero), Griquas and Oerlaam (Hottentot × White).
IV. BUSHMEN: similar to the Hottentot; very small.	
V. AFRICAN DWARF RACES: similar to the negro; very small.	{ Akkas, Wambuttis, Batuas, Babongos, Ashangos.
VI. NEGRO × brown-black skin: hair frizzly and long; face moderately prognathous; nose broad and bent; thick lips; brachycephalic.	{ Aetas (Philippines), Semangs and Sakai (Malacca), Minkopis (Andaman Islands).
VII. MELANESIAN (Papuan in New Guinea): resembles the Negro; dolichocephalic.	
VIII. AUSTRALIAN: skin yellowish brown to black; hair dark, straight, curly, frizzly; abundant beard; strong superciliary arch; nose low and broad; blubber-lipped; chin small, retreating.	{ Dravidians proper (Tampuls, Telugu, Kanarese, Malabars, Toda, Gond, Khond), Brahui, Mundas tribes.
IX. DRAVIDIAN: skin light to medium brown; hair wavy and long; strong superciliary arch; nose moderately high, narrow, straight; prognathous; blubber-lipped; frequently noble-featured.	
X. VEDDAHS: skin medium to dark-brown; hair of varying length, wavy, somewhat frizzly; strong superciliary arches; nose broad, depressed, small.	
XI. CINGALESE: skin light-brown to yellow; hair long, thick, wavy; nose high, straight or bent, broad; medium stature.	

Race, NEGRO.—The term negro, derived from the Spanish and the Latin words meaning "black" (*negro; niger*), may be applied to a large portion of mankind, but it is more strictly confined to certain peoples and tribes of Central Africa and their descendants in various parts of the world. The Blumenback fivefold division of mankind considers the negro in the first place under Ethiopian, embracing the Kafir, Hottentot, Australian, Alforian, and Oceanic negroes. Pritchard and Latham rightly protest against the error of considering the term negro synonymous with African. There are dark-skinned people of various types throughout the tropical countries of the world. The negro properly so called is dark-skinned, with woolly hair and other characteristics, while differing in minor traits. It is a mistake to hold, as some do, that all negroes have common traits. Professor Jerome Dowd, a Southern white man, declares that "to speak of all negroes in Africa as one race having common characteristics, is as misleading and is as unscientific as if we should consider all Europeans and Americans as of one race and attribute to all of them the same traits". Observations and the records of the African continent go to show that it is not necessarily the races with the blackest skins that are lowest in the scale of civilization. The negro is originally a native of the Sudan and other parts of West and Central Africa, where there is now a population of about 128,000,000 blacks. In the West Indies, South America, and the United States they are the descendants of Africans, though in the United States those of mixed blood, the mulattoes, and even those with a preponderance of white blood are classed as negroes.

HISTORY.—The origin of the negro race dates from the formation of races in the twilight of human history. Like the origin of the human race in general, it is a subject for anthropologists and theologians. The ethnological aspects of the question are many and varied. The original African is said to be the Bushman, who is rather brown than black; the negro, the real black man, probably came from other regions. This, however, must have occurred at a remote period. The chief divisions of the native population of Africa are the negro, or black, the Bushman, and the Bantu, or mixed, races, generally brown in colour, who invaded South Africa, driving out the original Bushman. But centuries of slavery have so broken and intermingled the different stocks that it is difficult to find the negro without any mixture of foreign blood.

The history of the black man in America, with which this article is more especially concerned, begins with the African slave-trade. Under the compulsion and rod of the slave-master the negro became part of the population of the New World. The negro slavery of modern times followed the discovery of America. The Portuguese, who possessed a large part of the west African coast, began the employment of negroes as slaves, in which they were followed by others colonizing the New World. The first country in the New World to which negroes were extensively brought was Haiti, or Hispaniola. The aboriginal race had at first been employed in the mines there, but this kind of labour was found so fatal to them that Las Casas, Bishop of Chiapa, the celebrated protector of the Indians, although at a later period he disapproved of slavery, urged Charles V to substitute African slaves as a stronger race. Accordingly, the emperor, in 1517, authorized a large importation of negroes. Sir John Hawkins was the first Englishman who engaged in the traffic. Others of his countrymen soon followed his example on an extensive scale. England is said to have taken, between 1680 and 1700, no fewer than 300,000 slaves from Africa, and between 1700 and 1786 Jamaica alone absorbed 610,000. A Dutch ship brought from the Guinea Coast to Jamestown, Virginia, a cargo of twenty negroes in 1620;

this was the beginning of slavery in the English colonies of America. An English company obtained the monopoly of supplying negro slaves to the Spanish colonies for thirty years; the contract was annulled by Spain in 1739, and England thereupon declared war on Spain. The number of slaves annually exported from Africa amounted, at the end of the eighteenth century, to 74,000. Between 1680 and 1786 there were 2,130,000 negro slaves brought into the British colonies of America, including the West Indies. Altogether it is estimated that probably 12,000,000 slaves were landed in North and South America from the beginning to the end of the slave-trade. An equal number is supposed to have perished in the African slave raids and on their way to America. The slave-trade was usually attended with extreme cruelty; the ships which transported the slaves from Africa to America were overcrowded to such an extent that a large proportion died on the passage. The treatment of the slave after his arrival depended much on the character of his master; restraints, however, were imposed by law in the various settlements to protect slaves from injury.

Early in the seventeenth century Cartagena, in Colombia, was a noted slave market. This was the field of labour of St. Peter Claver, of the Society of Jesus, the apostle of the negroes. As many as twelve thousand slaves were landed annually at Cartagena. They were usually in a wretched condition, and the saint sought to alleviate their hardships and sufferings. In time a strong Christian sentiment asserted itself against the traffic. In Catholic times in Europe and the East, under the benign influence of the Catholic Church, the nations gradually emancipated the slaves. From the beginning of the African slave-trade the popes, from Pius II, in the fifteenth century, to Leo XIII, in the nineteenth, issued encyclicals and directed anathemas against the barbarous and inhuman treatment of human beings in slavery. The traffic and its cruelties were condemned by the Holy See before the discovery of America. In America the Friends, or Quakers, of Pennsylvania, in 1776, required their members holding slaves to emancipate them. Abolition societies were formed to discourage and oppose the slave-trade. On a great increase in the traffic, action was taken by the British Government and further importation of slaves into the colonies was prohibited in 1805. The United States prohibited the importation of slaves from Africa in 1808, though to some extent slaves continued to be brought into the country secretly and unlawfully up to the emancipation of the slaves during the Civil War. The importation of slaves was likewise forbidden in the South American republics. Eventually, all the states of Europe passed laws or entered into treaties prohibiting the traffic.

The next thing sought was the total abolition of slavery and the emancipation of slaves. This was brought about in the British colonies in 1834. The French emancipated their negroes in 1848. In Haiti slavery ceased as far back as 1791; its abolition was one of the results of the negro insurrection of that year. Many of the Spanish-American states abolished slavery on declaring their independence; the others have since that time abolished the institution. Brazil passed a law of gradual emancipation in 1871. Pope Leo XIII, in 1888, wrote to the bishops of Brazil setting forth the position of the Church on slavery: he condemned the cruelties of the slave-trade and commended the abolition of slavery. In the United States slavery was firmly established at the time of the Declaration of Independence and was recognized by the Constitution, ratified in 1788. There were then several hundred thousand slaves in the republic. Slavery declined in the Northern states, but not in the South, where negro labour was required for the cultivation of sugar and cotton. The diversity of

feeling and interest between the North and the South on the question of slavery brought about the Civil War. Negro slavery was then brought to an end in the United States, when, in the interest of the Union and as a military measure, President Lincoln issued his Proclamation of Emancipation (1 January, 1863).

Since acquiring freedom the negro has increased in numbers and advanced in a material way. Discrimination, prejudice, and fierce criticism have spurred on the more ambitious and more respectable class among them to acquire education and property. In less than forty years of freedom, up to the year 1900, the number of blacks that could read and write rose from 5 per cent to 55½. The rate of increase of the negro population is estimated by United States Census authorities to be about 15 per cent for the ten years preceding the Census of 1900. The Census Reports for 1900 give 8,833,994 negroes for the Continental United States. There are also 363,742 persons of pure or mixed negro blood under United States jurisdiction in Porto Rico. The Census statistics for 1910 in relation to the various races are not as yet available, but by using the normal percentage of increase, we may estimate the approximate figures for that year, placing the present negro population of the Continental United States at 10,158,092. The census of mulattoes or those of mixed blood of varying degree was taken in the years 1850, 1860, 1870, and 1890. While this enumeration is acknowledged to be very subject to error, some general results have been obtained. The indications are that from 11 to 16 per cent of those classed as negroes have some degree of white blood. The figures warrant the belief that between one-sixth and one-ninth of the negro population of the Continental United States have been regarded by four groups of enumerators as bearing evidence of an admixture of white blood. In the South negroes form about one-third of the population. In 1900 three-tenths of the entire negro population of the country were living in the adjoining states of Georgia, Alabama, and Mississippi. These, together with the adjacent Atlantic-Coast states (Virginia, North and South Carolina) and the Gulf states (Louisiana and Texas), had then each over half a million negroes. In 1900 the negro population was distributed by states as follows:—

Georgia.....	1,034,813
Mississippi.....	907,630
Alabama.....	827,307
South Carolina.....	782,321
Virginia.....	660,722
Louisiana.....	650,804
North Carolina.....	624,469
Texas.....	620,722
Tennessee.....	480,243
Arkansas.....	366,856
Kentucky.....	284,706
Maryland.....	235,064
Florida.....	230,730
Missouri.....	161,234
Pennsylvania.....	156,845
New York.....	99,232
Ohio.....	96,901
District of Columbia.....	86,702
Illinois.....	85,078
New Jersey.....	69,844
Indiana.....	57,505
Kansas.....	52,003

The remaining states had less than 50,000 each, making up the total of 8,833,994.

LEADING OCCUPATIONS.—The Census Reports show that negro agricultural labourers, farmers, planters, and overseers, unclassified labourers, servants, waiters, launderers, and laundresses constituted 83·6 per cent, or about five-sixths, of the negroes in all wage-earning occupations in the Continental United States. The same documents also show that 27 occupations

include 95·4 per cent, or over nineteen-twentieths, of all negroes in wage-earning occupations. More than three-fourths (77·3 per cent) of the negroes live in the country. In 1900 there were in the United States 746,717 farms operated by negroes. These farms covered 38,233,933 acres, valued at \$499,943,734. Of the 746,717 farms operated by negroes 21 per cent were owned entirely, and an additional 4·2 per cent owned in part, by the farmers operating them; in other words, forty years after emancipation 25·2 per cent, or about one-fourth, of all negro farmers had become land owners. The value of all taxable property now owned by the coloured people in the United States is estimated at \$550,000,000.

EDUCATION.—Statistical summaries which are available from 16 former slave states give for 1908–9 in the common schools for coloured children an average daily attendance of 1,116,811. In these schools are employed 30,334 coloured teachers. There are 141 public high schools for the coloured race with 10,935 pupils and 473 teachers. The governmental education report for 1910 also gives statistics of 189 secondary and higher schools, colleges, industrial schools, etc., for coloured students (excluding public high schools). These schools are usually under the control of various religious denominations. Some are controlled by private corporations and are classed non-sectarian. The list is admitted to be incomplete. Only two Catholic schools are given in the list, namely, St. Joseph's Industrial School, Clayton, Delaware, and St. Francis's Academy, Baltimore, Maryland. There are, besides these, two other Catholic boarding schools for coloured boys, one at Rock Castle, Virginia, the other at Montgomery, Alabama, besides the Van de Vyer College, at Richmond, Virginia, and others. There are also several Catholic boarding schools for coloured girls where academic and industrial branches are taught. The Sisters of the Blessed Sacrament have institutes at Rock Castle, Virginia, Nashville, Tenn., and Cornwells, Pennsylvania. The coloured Oblate Sisters, of Baltimore, and the Holy Family Sisters, of New Orleans, have each several boarding institutions. The Catholic day schools for coloured children number about one hundred. No education is given in the South except in separate schools.

Many of the schools described in the Government report of non-public high schools are termed normal and industrial schools and institutes. Others are termed missionary colleges. They are supported largely by the religious denominations of the North. Considerable income is also derived from tuition fees and private subscriptions. Generous allotments are also received by the non-Catholic institutes from educational funds established for freedmen by Northern philanthropists, such as the Peabody Fund, the John F. Slater Fund of New York. The John F. Slater Fund alone disbursed \$72,950 (about £14,590) to various coloured institutes throughout the South in 1909–10. The so-called non-sectarian colleges receive also state and municipal aid. In 1868 Samuel Chapman Armstrong, a celebrated friend of the negro, founded Hampton Institute of Virginia for the education of negroes and Indians. At the present writing (1911) Hampton Normal and Industrial Institute has 1374 students, male and female, with 112 white and coloured teachers. Hampton has been the inspiration of an extensive system of similar educational and industrial institutes for the coloured race throughout the South. The most noted offspring of Hampton is Tuskegee Normal and Industrial Institute, Tuskegee, Alabama, which now has 1698 students, 1137 of them male, and 561 female. There are 185 instructors, all coloured. The property of the institute is valued at \$1,278,635 (£255,727). It has a large endowment, which is being increased. The total income of the school for 1909–10 was \$258,940.

RELIGION.—The negro has a religious nature. His

docile, cheerful, and emotional disposition is much influenced by his immediate environment, whether those surroundings be good or evil. Catholic faith and discipline are known to have a wholesome effect on the race. Observing men and judges of courts have remarked on the law-abiding spirit existing in Catholic coloured communities. Some elements of the white man's civilization do not always tend to elevate the morality of the negro. The negro is naturally gregarious, and the dissipations and conditions of city life in many instances corrupt the native simplicity of the younger generation to the sorrow of their more conservative elders. (For a view of religion in these later times among the blacks in the native African home of the race, see AFRICA.) Contrary to a prevalent opinion, the negro, when well grounded in the Catholic faith, is tenacious of it.

In the United States the negroes and their descendants naturally adopted more or less the religion of their masters or former owners. Thus it comes that, outside of Maryland and the Gulf Coast, in a large section of the South comprising former slave states and colonized by English Protestants, the negroes who claim affiliation to any Church are for the most part Baptists and Methodists. Catholics and the Catholic faith were entirely unknown to the negroes in those states. In colonial times the religion of Catholics and the religion of negroes were regarded with equal disfavour, the latter being considered non-Christian. Under the law of Virginia as it was in 1705, Catholics, Indians, and negro slaves were denied the right to appear "as witnesses in any case whatsoever, not being Christians". The negro Methodists comprise those who are in a manner affiliated to the white Methodists, as also those who form independent bodies having no connexion with the white bodies. The three more important organizations of coloured Methodists are the African Methodist Episcopal Church, the African Methodist Episcopal Zion Church, and the Coloured Methodist Episcopal Church. These bodies claim together 869,710 members. With other African Methodists the total number of coloured Methodists is probably nearly 1,500,000, with 13,000 churches. The greater number of coloured Protestants are Baptists. After the manner of the Baptist sect, the Baptist congregations are independent of each other. However, according to statistics given for 1908, there are eighty-nine state organizations and six hundred district associations with 18,307 organized negro Baptist churches and 17,088 ordained preachers in the United States. The entire number of coloured Baptists is given as 2,330,535. The number of negroes adhering to other Protestant sects is comparatively insignificant. Taken together there are probably about 4,000,000 negroes who profess Protestantism in the United States. There are probably about 200,000 coloured Catholics, which leaves over 5,000,000 who profess no Christianity. Remembering that some of the Baptist sects do not baptize young children, we may conclude that there are over 6,000,000 negroes in the United States unbaptized. On the other hand, the vast majority of those who claim adherence to some Protestant denomination have no definite notions of Christian doctrine and have equally vague ideas about Christian morality. This state of things may be largely attributed to the lack of definite religious training in youth. The negroes of the West India Islands and of South America have for the most part the religion of the original conquerors and settlers of those regions, and the matter is treated under the respective proper titles.

As before stated, the Catholic negroes of the United States live chiefly in those Southern states originally settled in part by Catholics. Among these are Maryland and the states on the Gulf of Mexico, namely, Florida, Mississippi, and especially Louisiana, where the larger number dwell. The bishops of the Catholic

Church, in times past, made zealous endeavours to spread the elevating influence of the Catholic Faith among the coloured people of this country. The two later councils of Baltimore, in burning words, urge work among the coloured race. The Second Plenary Council implores priests "as far as they can to consecrate their thoughts, their time and themselves, wholly and entirely, if possible, to the service of the coloured people". The want of men and means has much hampered the work. At one time it was reported that many thousands had lost the Faith for want of priests to care for them. It is said that in one portion of Louisiana alone as many as 30,000 strayed away. But strenuous efforts are now being made to reclaim them. The supply of priests devoted to the interests and salvation of the negro race is recognized as a serious problem, as there seems to be hardly a sufficient number of vocations among white youth. Some time before his death, Pope Leo XIII issued a letter urging a native clergy. Pope Pius X has also encouraged missionary work among the negroes.

It is almost impossible to obtain the exact number of Catholic negroes in the United States. While a great number live in coloured parishes and have their own churches, to the number of about sixty, many others are mingled among whites in widely separate parishes, where no report is ever made of the colour of the members. However, a conservative estimate gives 225,000 as the approximate number in the Continental United States. There are about ninety-five priests labouring exclusively among coloured people. Of these the Fathers of the Society of St. Joseph, about fifty in number, labour in twelve Southern dioceses and have their mother-house at Baltimore, Maryland. The remainder are twenty-eight diocesan priests in various dioceses and priests of the Society of African Missions, in the Diocese of Savannah; of the Society of the Divine Word, in the Dioceses of Natchez and Little Rock; of the Congregation of the Holy Ghost, in Pennsylvania and Virginia. There are five priests in the country who are coloured men. Some white sisterhoods are assisting the good work for the race, teaching 11,000 children in the parish and mission schools. Besides these, there are two communities of coloured sisters. One of these is the Oblate Sisters of Providence. The Sisters of the Holy Family, another order of coloured women, now has 116 sisters, who have charge of seventeen schools and asylums situated in the Archdiocese of New Orleans and in the Dioceses of Galveston and Little Rock. They also conduct a Government school with 295 pupils in British Honduras.

A commission established by the Third Plenary Council of Baltimore for the Catholic missions among the coloured people and Indians, consisting of three archbishops, distributes the funds collected for this purpose annually throughout the United States; and a special "Catholic Board for Mission Work among the Coloured People", incorporated by the hierarchy in 1907, fosters a missionary spirit among Catholics in favour of the coloured people and labours also to provide funds for this object. JOSEPH BUTSCH.

Rachel (רַחֵל, "a ewe"), daughter of Laban and younger sister of Lia. The journey of Jacob to the "east country" (Mesopotamia) in quest of a bride of his own kin, and his providential meeting with Rachel at the well in the open country followed by his introduction into the household of Laban are told with idyllic charm in the twenty-ninth chapter of Genesis. Jacob, being in love with Rachel, agreed to serve her father for her seven years. Laban accepted the proposal, and the seven years seemed to Jacob "but a few days, because of the greatness of his love". He was deceived, however, by Laban, who at the end of the term of service gave him to wife, not Rachel, who "was well favoured, and of a beautiful countenance", but her elder sister Lia, who was "blear-eyed", and Jacob received the younger daughter to wife only on condition of serving seven years more. Rachel, being for a time without offspring and envious of her sister, to whom four children were born, gave to Jacob as a secondary wife her handmaid Bala, whose issue, according to a custom of the times, would be reckoned as her own. From this union were born Dan and Nephtali. In the quarrel which arose between Jacob and Laban, Rachel as well as Lia sided with the former, and when departing from her father's home she carried away with her the *teraphim* or household gods, believing in their protecting influence over herself and her husband (Gen., xxxi, 19). Among the sons of Rachel after the "Lord remembered" her were Joseph and Benjamin, in giving birth to the latter of whom Rachel died. At the point of death "she called the name of her son Benoni, that is, The son of my pain: but his father called him Benjamin, that is, The son of the right hand". Rachel was buried "in the highway that leadeth to Ephrata, this is Bethlehem. And Jacob erected a pillar over her sepulchre: this is the pillar of Rachel's monument, to this day" (Gen., xxxv, 18-20). The exact location of the grave of Rachel is a disputed point. A passage in Jeremias (xxxi, 15) would seem to indicate that it was on the northern border of Benjamin towards Ephraim, about ten miles north of Jerusalem. Tradition, however, has from at least the fourth century fixed the spot four miles south of Jerusalem and one mile north of Bethlehem.

JAMES F. DRISCOLL.

Racicot, ZOTIQUE. See MONTREAL, ARCHDIOCESE OF.

Racine, JEAN, dramatist, b. at La Ferté-Milon, in the old Duchy of Valois, 20 Dec., 1639; d. in Paris, 21 April, 1699. Left an orphan at a very early age, his relatives sent him to the College of Beauvais, which was intimately connected with Port Royal, whither he went in 1655. Here, though only sixteen years of age, he made such progress that he not only read Greek at sight, but wrote odes both in Latin and in French. In 1658, he entered the Collège d'Harcourt. While boarding with his uncle, Nicolas Vitart, he formed too close an acquaintance with some theatrical people, and in order to guard him against temptation his relatives sent him to another uncle, the Abbé Sesvrin, at Uzès; but failing to obtain any position there, he returned to Paris in 1663, where he wrote two odes which made him known to the court. In 1664 his first play, "La Thébaïde, ou les Frères ennemis", was performed. It was followed by "Alexandre", another drama equally insignificant. "Andromaque", in 1667, proved a great success, and was followed by his only comedy, "Les Plaideurs" (1668). "Britannicus" followed in 1669, "Bérénice" (1670), "Bajazet" (1672), "Mithridate" (1673), "Iphigénie" (1674). After the failure of "Phèdre" in 1677, Racine abruptly severed his connexion with the stage, partly because he was weary of unjust criticism and unfair rivalry, and partly from conscientious motives. He remained silent for twelve years, but in 1689, at the request of Madame de Maintenon, he wrote "Esther", and "Athalie" in 1691.

Racine's dramas were variously received. "Andromaque" achieved as great a success as "Le Cid", and deservedly; the author devoted his most delicate and refined art to the portrayal of the most tragic passion. No characters on the French stage are more interesting and attractive than "Hermione", the type of passionate love, and "Andromaque", of maternal. His comedy, "Les Plaideurs", inspired by the "Wasps" of Aristophanes, failed at first, but, being applauded by Louis XIV, it subsequently met with great favour. "Britannicus" was called by Voltaire *la pièce des connoisseurs*. "Bérénice" was written in competition with a play on the same subject by Corneille, which it far surpassed. His two tragedies on Oriental subjects, "Bajazet" and "Mithridate", do not breathe the Oriental spirit. "Iphigénie" is full of pathos. "Phèdre", which may dispute with "Andromaque" and "Athalie" the title of Racine's masterpiece, was represented at the Hôtel de Bourgogne, while the "Phèdre" of Pradon was performed by the king's actors. From the first, Racine had been bitterly opposed by various cabals, whom his success and his sarcasm had irritated. His own "Phèdre" was a failure, while Pradon's triumphed. He now ceased all dramatic work, married, and became very pious, devoting himself entirely to domestic life and to his duties as royal historiographer. In the remaining twenty years of his life he wrote only two plays. Madame de Maintenon, who had established an institution at Saint-Cyr for the education of poor girls of noble

JEAN RACINE

family, asked Racine for a drama to be represented by her protégées. He wrote "Esther", which had an enormous success. Every critic admires in it the splendour of the chorus, the perfection of the characters, and the wonderful art of the play as a whole. The other was "Athalie", a drama of the same kind.

As a dramatic writer, Racine is one of the leaders of the classical school. His dramatic art was a protest against the heroic and bombastic tragedies which, until that time, had been the fashion. We read in the preface to "Britannicus": "What can I do to satisfy my stern critics? It would be very easy to do so if I were willing to sacrifice common sense. I need only disregard nature and rush into the sensational." Corneille liked an action rather complicated, "full of incident, a large number of theatrical surprises, and numberless high-flown speeches". Racine, to quote his own words, always chose "a simple action, not overlaid, which, progressing steadily to the catastrophe, is sustained by the interest, the feelings, and the passions of the characters". Again, while in Corneille the characters are secondary to the action, in Racine the action is suited to the characters. Hence we do not find sensational situations in his tragedies, but rather a deep and complete study of the passions to which the human heart is a prey and, above all, of love. Racine is the great painter of love, but love as he conceives it is always violent, impetuous, jealous, and sometimes criminal. The effect of his new method was to bring about a change in that of the French drama. Racine's style is simple and smooth, always pure, elegant, harmonious, and, nevertheless, when necessary, strong and bold. Racine was a sensitive, vain, and irritable man, with deeply religious feelings, and a keen, supple, and strong intellect. He displays in his work almost unique powers of psychological analysis, a wonderful delicacy of sentiment, and an exquisite sense of literary art.

The standard text of his works is MESNARD (7 vols., Paris, 1865-73); tr. BOSWELL, in BOHN's Library (London, 1889-91); DE BURY, *Racine and the French Classical Drama* (London, 1845); TROLOPE, *Corneille and Racine in Foreign Classics Series* (Edinburgh, 1881); BRUNETIÈRE, *Les Époques du théâtre français* (Paris, 1892); LARROUNET in *Les grands écrivains français* (Paris, 1898); STENDHAL, *Racine et Shakespeare* (Paris, 1882); SAINTE-BEUVE, *Port Royal*, VI (4th ed., Paris, 1878); DE GROUCHY, *Documents inédits relatifs à Jean Racine* (Paris, 1892); LEMAITRE, *Impressions de théâtre*, I, II, IV (Paris, 1888-); FIGUET, *Dix-Septième Siècle*. Rader, MATTHEW, philologist and historian, b. at Innichen in the Tyrol in 1561; d. at Munich, 22 December, 1634. At the age of twenty he entered the Society of Jesus and subsequently taught the humanities for twenty-one years in different Jesuit institutions. He wrote several school dramas, but was particularly known among Catholics and non-Catholics for his scholarly attainments. In 1599 he published an improved and expurgated edition of Martial, and in 1628 one of Quintus Curtius. His edition of the Acts of the Eighth Œcumenical Council was incorporated by Labbe and Cossart in their collection of the Acts of councils; that of the works of St. John Climacus, published in 1614, was reprinted by Migne in his Greek patrology (LXXXVIII, 585 sqq.). More important than the publications just mentioned were his now very rare works: "Bavaria Sancta" (Munich, 1615-27), and "Bavaria Pia" (Munich, 1628). Both were reprinted in 1704 at Dillingen and Augsburg, and the former was partly published in a German translation by Father Rassler at Straubing in 1840.

N. A. WEBER.

Radewyns, FLORENS, co-founder of the Brethren of the Common Life, b. at Leyderdam, near Utrecht, about 1350; d. at Deventer, 25 March, 1400. He passed a brilliant university course, took his M.A. degree at Prague. Returning home, he was installed canon of St. Peter's, Utrecht. For some little time he led a gay life, until converted by a sermon of Gerard Groote. Thereupon he resigned his canonry, placed himself unreservedly under Groote's direction, at his instance was ordained priest, and accepted a poor benefice at Deventer, where Groote resided. There he powerfully seconded his friend's apostolate, especially among the poor clerical scholars of Deventer, and it was at his suggestion and in his house that the first community of the Brethren of the Common Life was formed. It was also from his house that the six brethren who established the Congregation of Windesheim went forth in 1386, and among them John, the elder brother of Thomas a Kempis. Thomas himself was under the immediate care and guidance of Radewyns from his thirteenth to his twenty-first year. He wrote a loving and edifying sketch of his master, wherein he describes Florens as a man learned in the Scriptures and all sacred science, exceedingly devout, humble, simple, zealous, charitable, and excessively mortified. His austerities enfeebled his health, possibly hastened his end. He was commonly regarded among the brethren as a saint. His skull, with that of Groote, is still preserved in the Catholic church (Broedern Kerk) of Deventer. Of his correspondence we have only one letter, preserved for us by a Kempis, who also gives us a collection of his notable sayings.

VINCENT SCULLY.

Radowitz, JOSEPH MARIA VON, b. at Blankenburg, 6 February, 1797; d. at Berlin, 25 December, 1853. Radowitz was of Hungarian descent, though his family had lived in Germany since 1745. In his youth he fought with the French in the War of Liberation, but had no feeling against the German cause. While an army officer in the service of the Elector of Hesse (1815-23) he gained an extensive knowledge of modern languages and history, and laid the foundation of his religious and political convictions. As the child of a mixed marriage he had lived in purely Protestant surroundings, but in time he grasped the historic fact of the Incarnation of God, the founding of the Church by Christ, and the superiority of the truth of Christian dogma and the Catholic view of life over all philosophy, thus becoming a strong Catholic. Repelled in politics by Liberalism, which he considered superficial, he studied Burke and Haller, adopted the theories of the latter, and became an opponent of Absolutism in every form. His preference was for constitutional government by the Estates, but he considered a representative constitution unavoidable at that time. In 1823 Radowitz entered the Prussian army, and from this time served Prussia with enthusiasm. The king took a kindly interest in him, the crown prince was his friend, and by his marriage with Countess Voss, a Protestant, he came into connexion with the higher aristocracy. His efforts to improve Prussian military training and artillery were rewarded by repeated promotion, but on account of his birth and faith he met with opposition among the bureaucracy and army officers. In 1831 he combined with the "Christian-German" followers of Haller in issuing at Berlin the "Politisches Wochenblatt" (see JARCKE) and wrote largely for the publication. For this transgression of military traditions the king removed him from Berlin in 1835. Until 1848 he

was Prussian military attaché at the German Diet at Frankfort, and from 1842 also Prussian ambassador at the Courts of Karlsruhe, Stuttgart, and Darmstadt. He had nothing to do with the dispute between the government and Prussian Catholics in 1837.

After Frederick William IV ascended the throne in 1840 Radowitz was frequently called to Berlin to give advice and was also sent on missions to other countries. Notwithstanding the secret opposition of Austria and the open opposition of the States of central Germany, his duties as military attaché led him to examine the constitution of the German confederation, the immediate reform of which he declared to be a necessity if Germany were to be preserved from a revolution. He soon felt himself called to become the reformer of the Confederation, and, in view of the difficulties in the way, advocated the stimulation of the German people by a war whenever the opportunity offered itself (e. g. in 1840, during the strained relations between France and Germany, and in 1846, when the Schleswig-Holstein question became acute); victory was to be utilized to strengthen the German position among the European Powers and to develop Germany internally. He desired to make Germany, including Austria, a unit and to enlarge it by the addition of Switzerland and the Netherlands. He wished Prussia to take the lead in the

JOSEPH MARIA VON RADOWITZ

reorganization of internal affairs, as he had discovered at Frankfort that Austria's interests lay in eastern and southern Europe, and could not be depended on for German interests. To attain these internal reforms by peaceful means, he considered it necessary to place military matters and legislation under the control of the Confederation; a strong central power could then be formed as need

required. To accomplish his desires he advised the king to attain the unity which the "public opinion" of the German people demanded by introducing a constitutional form of government, in which the parliament should be less powerful than the crown and independent of the bourgeoisie and capitalists.

He proposed social legislation to win the workmen for the government, but on account of the weak character of Frederick William IV, these plans were not carried out. While in Baden Radowitz watched the approach of the revolution. In 1846 he wrote the "Gespräche über Staat und Kirche", setting forth in the form of a dialogue all the antitheses in the German life of his time and pointing out in a clear, simple manner what he would have done to improve conditions. In a memorial presented in November, 1847, he urged the king to take up at last the reform of the Confederation, as Germany had been carried into the revolutionary movement. He was sent on this business to Vienna and Paris, but before he was able to accomplish anything Metternich was overthrown in March, 1848, and Frederick William IV, after granting a parliamentary constitution, called a Liberal ministry. Radowitz withdrew from public affairs, but without any effort on his own part was elected member of the preliminary Parliament of

Frankfort, where he brilliantly represented more as orator than as leader the Christian and conservative principles. Though the majority of Catholics were adherents of the Liberal party and opposed to forming a confederation under the leadership of Prussia, Radowitz worked both to attain this end, and to prevent the whole national movement from failing. He was willing that Austria should merely be connected with the German states in a "new confederation", thus he was among those who elected Frederick William IV as German Emperor, March, 1849, though the king had declined the election.

In April Radowitz was called to Berlin and by his advice the king invited all the German governments except Austria to carry out the principles of the constitution agreed upon at Frankfort in a freer confederation called the "Union", all revolutionary elements being suppressed. To Austria he offered to exchange guarantees of their possessions. Fear of Prussia led most of the German governments to accept this proposition, to which the moderate Liberals also agreed. Radowitz, however, was not made minister, and the Conservative party was rapidly growing in strength in Prussia. They opposed him because he was willing in the plan of the Confederation to concede an assembly that would represent the people. At too late an hour (26 September, 1850) the king appointed Radowitz minister of foreign affairs. Austria had gained time to plan its measures, and Radowitz wished to settle the matter by war. Austria and Prussia mobilized their armies, but Frederick William gave up the idea of war. Radowitz retired from his post on 2 November, and went to London as extraordinary ambassador but could gain no diplomatic success on account of the weakness Prussia had shown. In the spring of 1851 he retired into private life. In 1852 the king prevailed upon him to come again to Berlin, where, however, he performed only military duties. He was an active author all his life. At the close of his twentieth year he had written an "Ikonographie", and later he published numerous pamphlets. The pamphlet issued, April, 1848, on "Deutschland und Friedrich Wilhelm IV" attracted much attention. The "Gespräche" was followed during the fifties by five volumes of collected writings. The first volume of his comprehensive biography, published by Hassel in 1905, gives the remainder of his literary works up to May, 1848. The second volume, which is being prepared by Meinecke, is expected to give a detailed explanation of much that is not clear in the Prussian-German policy of 1848-50. His son has had a brilliant diplomatic career. He came especially into notice in 1885 when threatenings of war disturbed European diplomacy, and lately when he was the representative of Germany at the conference at Algieras.

MARTIN SPAHN.

Radulph of Rivo (or OF TONGRES; RADULPH VAN DER BEEKE), historian and liturgist, b. at Breda, in Dutch Brabant, about the middle of the fourteenth century; d. at Tongres, 3 Nov., 1403. He pursued his studies in various parts of Europe—in Italy, where he was in 1362, at Paris, and at Orléans (1367-75), where he studied canon and civil law. In 1371 at the latest he was subdeacon. Invested in 1371 with the deanery of Tongres by a Bull of Gregory IX, he took possession of his charge in 1383. In the interval he returned to Italy; in 1381 he was still at Rome, where he had as master Simon of Constantinople, Archbishop of Thebes, who taught him Greek. After 1390 he was replaced at Tongres by a vice-dean. During this time he had matriculated at the new University of Cologne (founded in 1388), where for a time he was

rector (1397). He made his last journey to Rome somewhat prior to that date. In 1398 he returned to Tongres, where he resumed his duties as dean. Here he occupied himself, as during his first stay, with firm and enlightened zeal in the maintenance of discipline during the period disturbed by the beginning of the Great Schism of the West. He exerted himself especially for the reform of the liturgy. He was the friend, protector, and guide of the new institutions of Windersheim and Corsendonck. Several of his works date from this period, while his liturgical writings were chiefly composed during his second stay at Rome. He was buried in the cloisters of the church of Ste-Marie at Tongres.

Radulph wrote a great deal. Besides some works on grammar, mention must be made of his chronicle of the bishops of Liège published by Chapeville (3 vols., Liège, 1612-16) and his liturgical works. The last-named are the most important and the best of his writings, especially for the history of the Breviary and the Mass. Here he displays a great spirit of piety, showing at the same time much critical ability, learning, and wide reading. He is decidedly in favour of maintaining ancient Roman liturgical customs and rejects recent modifications. Among his writings (many still unedited) especially notable are: "Liber de canonum observantia" (ed. Hilthorp, Cologne, 1508, and in "Maxima Patrum Bibliotheca", Lyons, vol. XXVI, 289); "Calendarium ecclesiasticum Generalis" (Louvain, 1508); "De psalterio observando" and "Liber de Officiis ecclesiasticis", the last two unpublished.

BALAU, *Sources de l'histoire de Liège* (Brussels, 1903); BATIFFOL, *Histoire du Breviaire* (Paris, 1911); FOPPENS, *Bibliotheca belgica* (Brussels, 1739); MOHLBERG, *Radulph de Rivo* (Louvain, 1911).

J. DE GHELLINCK.

Raffeix, PIERRE, missionary, b. at Clermont, 1633; d. at Quebec, 1724. He entered the Society of Jesus in 1653, and came to Canada in 1663. In 1668 he established near Montreal a settlement for converted Iroquois (now Caughnawaga). In 1671 he replaced Father Carheil in the Cayuga mission, and afterwards went to the Senecas until 1680, receiving an ample share of the hardships and dangers inseparable from the Iroquois mission. Raffeix was a learned cartographer, as the following maps still preserved in Paris bear witness: (a) "Carte des regions les plus occidentales du Canada", dated 1676, and bearing a legend relating to the voyage of discovery of Marquette and Joliet; (b) "Le lac Ontario avec les pays adjacents et surtout les cinq nations iroquoises"; (c) "La Nouvelle-France, de l'Océan au lac Erié, et, au sud, jusqu'à la Nouvelle-Angleterre". After his return to Quebec he acted as procurator to the mission. He spent two years at Jeune-Lorette (1699-1700), shortly after the final migration of the remnants of the Huron nation.

ROCHEMONTEIX, *Les Jésuites et la Nouvelle-France* (Paris, 1896); LINDSAY, *Notre-Dame de la Jeune-Lorette* (Montreal, 1900); CAMPBELL, *Pioneer Priests of North America* (New York, 1908); THWAITES, *Jesuit Relations* (Cleveland, 1896-1901).

LIONEL LINDSAY.

Ragueneau, PAUL, Jesuit missionary, b. in Paris, 18 March, 1608; d. 8 Sept., 1680. He entered the society in 1626. In 1636 he went to Quebec, and was soon sent to the Hurons with Le Moyne, Dupéron, Jogues, and Garnier, to labour under Brébeuf during the long and painful period preceding the conversion of that nation. He was one of the heroic band who, in 1637, being exposed to death at every moment, signed and sent to their superior as their last will a joint act of resignation to martyrdom. In 1645 Ragueneau was superior of the Huron mission which counted eighteen workers. He possessed a perfect mastery of the language. The death of the martyr Jogues was the signal for many conversions, and Ragueneau writes with admiration of the fervour of his neophytes. Five of his fellow-missionaries won the martyr's crown in different posts under Ragueneau's direction, the first being Father Daniel (4 July, 1648). He remained at his post at St. Mary's on the

Wye until persuaded by the Huron captains to join the fugitives on St. Joseph's island (1649). The notable increase in the number of conversions (3000 Indians being baptized in 1649) rewarded his zeal. After a bloody defeat, followed by the massacre of Fathers Chabanel and Garnier, Ragueneau, yielding to the entreaties of the few whom famine, pestilence, and the fury of the Iroquois had spared, led the small band of 400 survivors, the remnants of a nation of ten thousand, to their final refuge, Quebec, after

a long and perilous journey. In 1650 he became vice-rector of the college of Quebec and superior of the Canadian mission. It was during this time that he directed in the ways of holiness a highly privileged soul, Sister Catherine of St-Augustine, whose life he wrote. His influence in the supreme council and with Governor de Lauzon was the occasion of his removal to Three Rivers (1656). The year following he was sent as superior to the Iroquois mission. On his way to Onondaga he witnessed the butchery of his Huron companions, for which he reproved the murderers, the Senecas and Onondagas, at the peril of his own life. Informed of the impending massacre of all the French in the Iroquois country, Ragueneau's genius planned and realized their escape and return to Quebec (1658). He returned to France (1662) with Bishop Laval, and remained there as procurator of the mission. Besides a life of Sister Catherine of St-Augustine (Paris, 1671), Ragueneau wrote "Relations" of 1648-9, 1649-50, 1650-1, and 1651-2. No other Jesuit in Canada wrote so much as he. On one of his missions he saw and mentioned Niagara Falls thirty-five years before Hennepin, the alleged discoverer, described the cataract.

ROCHEMONTEIX, *Les Jésuites et la Nouvelle-France* (Paris, 1896); CAMPBELL, *Pioneer Priests of North America* (New York, 1908); PARKMAN, *The Jesuits in North America* (Toronto, 1899); THWAITES, *Jesuit Relations* (Cleveland, 1896-1901).

LIONEL LINDSAY.

Ragusa (EPIDAUROS), DIOCESE OF (RAGUSINA), a bishopric in Dalmatia, suffragan of Zara. The episcopate of its first bishop Fabricianus was followed

THE CATHEDRAL, RAGUSA

by a long series of bishops. For more than a thousand years Ragusa was an independent republic and consequently had archbishops. The first archbishop was Joannes II (d. 970). After the dissolution of the republic (1806) the see was vacant for a long time, until in 1830 Ragusa was once more the see of a bishop. At the present day the diocese has a Catholic population of 73,000, with 115 secular priests; religious orders of men, 93 members in 19 houses; religious orders of women, 51 members.

C. WOLFSGRUBER.

Raibolini, FRANCESCO. See **FRANCIA**.

Raich, JOHANN MICHAEL, Catholic theologian, b. at Ottobeuren in Bavaria, 17 January, 1832; d. at Mainz, 28 March, 1907. Raich pursued his gymnasial studies under the Benedictines at St. Stephen's at Augsburg, and studied philosophy and theology at the Collegium Germanicum at Rome (1852-5). On 29 May, 1858, he was ordained priest at the same place. In the autumn of 1859 he left Rome and went to Mainz as secretary of Bishop von Ketteler. He accompanied the bishop on journeys and thus was at Rome during the Vatican Council. He was also a cathedral prebend from 4 May, 1867. After the death of Bishop von Ketteler, during the years of the *Kulturkampf*, Raich had a position in the episcopal Chancery. On 29 November, 1890, Bishop Haffner appointed him cathedral canon, and on 11 April, 1900, he became cathedral dean.

Raich did much notable literary work. Among his writings are: "Die Auflehnung Döllingers gegen die Kirche u. ihre Autorität" (Mainz, 1871); "Ueber das Alter der Erstcommunicanten" (Mainz, 1875); "Shakespeare's Stellung zur katholischen Religion" (Mainz, 1884); "Die innere Unwahrheit der Freimaurerei" (first issued at Mainz, 1884, under the pseudonym of Otto Beuren; 2nd ed. under his own name Raich, 1897); "St. Augustinus u. der Mosaische Schöpfungsbericht" (Frankfort-on-Main, 1889). Besides these original works he edited the following: Liebermann's "Institutiones theologicæ" (10th ed., 2 vols., Mainz, 1870); "Joannis Maldonati Commentarii in quatuor Evangelistas" (new ed., 2 vols., Mainz, 1874); "Predigten des Bischofs von Ketteler" (2 vols., Mainz, 1878); "Briefe von u. an Wilhelm Emmanuel Freiherrn von Ketteler, Bischof von Mainz" (Mainz, 1879); "Hirtenbriefe von Wilhelm Emmanuel Freiherrn von Ketteler, Bischof von Mainz" (Mainz, 1904); "Novalis' Briefwechsel mit Schlegel" (Mainz, 1880); "Dorothea von Schlegel geb. Mendelssohn und deren Söhne Johannes und Philipp Veit, Briefwechsel" (2 vols., Mainz, 1881); J. B. Radey's "Geschichte der katholischen Kirche in Hessen" (Mainz, 1904). After the death of Heinrich and Moufang, Raich was editor of "Der Katholik" from 1891 to 1907. From 1887 he also revised the "Frankfurter zeitgemässen Broschüren".

FORSCHNER, *Dr. Johann Michael Raich, Domdekan zu Mainz in Der Katholik* (1907), I, 243-51, with portrait; the same ■ ■ separate publication (Mainz, 1907).

FRIEDRICH LAUCHERT.

Raimondi, MARCANTONIO, engraver, b. at Bologna, 1475 (1480?); d. there, 1530 (1534?). He studied under the goldsmith and niellist Francia, and later often signed his work M-A. F., F referring to his teacher. His earliest plate (1505), "Pyramus and Thisbe", shows a goldsmith-like shading. His first artistic stimulation came from seeing plates by Dürer, some of which he copied (1506) with such perfection that they sold as originals. When rebuked by the Venetian Senate on Dürer's complaint, the young man subsequently added his own to Dürer's initials.

From Lucas of Leyden Raimondi also learned much; his burin gained in mellowness from engraving Perazzo's work. Rapidly assimilating and always simplifying, Marcantonio's "Mars and Cupid" (1508) finds him master of technic and finished in style.

About this time Raimondi left for Rome, stopping at Florence to sketch Michelangelo's (lost) cartoon "The Climbers", which he afterwards engraved in Rome (1510). Seeing a proof of this Raphael exclaimed: "It is the finest I have ever seen and the finest that can be seen!" The two artists became friends and Raimondi's next work was Raphael's "The Death of Lucretia". This and later plates show the darks becoming less dramatic and the burin work more "open". Raphael left much to Raimondi, never giving him a finished picture but a pencil or pen outline-drawing, knowing that the proper treatment and elaboration would come from his engraver; and hence there is often a marked discrepancy between an

MARCANTONIO RAIMONDI
Detail from "The Expulsion of Heliodorus", Raphael, Vatican

oil by Raphael and Raimondi's engraving thereof. Marcantonio's triumphs in Rome equalled those of Raphael; Dürer wrote for proofs from his hand, and German engravers flocked to Rome to study under him. Romano and Aretino subsequently induced him to engrave obscene or suggestive plates, for which he was imprisoned by Pope Clement, who, however, freed him several months later at the solicitation of Cardinal de Medici. In 1527, at the sack of Rome, he is said to have escaped, leaving a fortune and his plates in the victors' hands. Some authorities record that he died four years before this, heartbroken at the death of Raphael. Raimondi opened up a new province of the burin—reproduction; he inspired the largest following that ever an engraver had, and he drew as well as da Vinci or Raphael. "His sentiment was noble, his taste pure" (Delaborde); his style, simple and sober, his modelling of figures beautiful, and he was the first engraver who omitted details. Of texture, tone, and local colour of modern engravers he had not a trace. Raimondi engraved about six hundred plates. His best are: "Adam and Eve" (probably the finest); "Virgin with the Bare Arm"; "Massacre of the Innocents"; "The Plague"; "The Judgment of Paris" (with a trace of goldsmith-like shading).

LEIGH HUNT.

Rainald of Dassel, b. probably not before 1115; d. in Italy, 14 August, 1167. A younger son of a rich Saxon count, Rainald I, and destined as such to be an ecclesiastic, he was sent to the cathedral school at Hildesheim. At a later date he probably went to Paris. As early as 1130 he is said to have had a high reputation for classical learning, and to have been a member of the cathedral chapter of Hildesheim. According to documentary evidence he was provost in 1148, and in 1154 received the provostship of Petersberg at Goslar and of St. Moritz at Hildesheim. Soon after 1154 he was also provost of the cathedral chap-

ter at Münster, but declined the See of Hildesheim. As a member of the embassy sent by Frederick I in 1153 to Eugenius III at Rome he first revealed his political ability, and in 1156 the emperor appointed him chancellor of the empire. The Diet of Besançon (October, 1157) left no doubt as to the drift of his policy. He inaugurated a German policy which insisted upon the rights and the power of the German kings, the strengthening of the Church in the German Empire, the lordship of Italy, and the humiliation of the papacy. Full of life, at times rough and blunt and again careful and calculating, Rainald, who, in spite of his ecclesiastical dignities, knew how to wield the sword, henceforth influenced the policy of his imperial masters. Though he did not wish to separate Germany entirely from Rome and still held the medieval respect for the Church, his temperament carried Barbarossa much further than the latter desired, or than was advantageous under the circumstances. When Frederick finally submitted, it was Rainald who prevented him from making concessions which might have proved of advantage. The struggle with the *curia* began at the Diet of Besançon, where Rainald vigorously rejected the use of the word *beneficium*, which might mean fief as well as benefit. In the expression used, that the pope would have been glad to grant the emperor even greater *beneficia* (or benefits), it was thought that the old desire of the *curia* for the mastery of the world was to be found. In 1158 Rainald undertook a diplomatic journey into Italy to prepare the way for the emperor. In 1159 he was appointed Archbishop of Cologne, and during the schism between Alexander III and Victor IV supported the imperial pope. In 1160 he was the ambassador of the emperor to the courts of the French and English kings, whom he endeavoured to win to the side of the antipope, but he did not succeed. In 1161 he joined the emperor before Milan and influenced him to consent to the destruction of the city. Rainald was also employed in diplomatic negotiations with Genoa, Pisa, and Louis VII; these, however, failed. In 1163 Alexander III excommunicated Rainald, who had loudly proclaimed in these negotiations the right of the emperor to dispose of the papal see. Basing his action on the Roncalian decrees, Rainald was once more successfully employed in Italy in the affairs of the emperor. When Victor IV died, Rainald, of his own volition and without waiting for the consent of the emperor, elected at Lucca a new antipope, Paschal III. Frederick would hardly have continued the schism. Rainald knew this and therefore wished to force the emperor to continue the struggle for imperial supremacy. In 1164 he was again in Germany, and brought the bones of the Three Kings with him. In the meantime the number of the adherents of the lawful pope increased in Germany. Finally only Rainald supported the antipope. Rainald won the consent of the King of England to common ecclesiastico-political action in behalf of Paschal and once more took up arms in defence of his one ambition, which he hoped the proposed canonization of Charlemagne at Aachen in 1165 would advance. In 1166 he was again in Italy, actively engaged in preparing the way for the emperor. While there with a few mounted soldiers he defended himself in Tusculum against a much larger force of Roman troops. His death was caused by the pest; he was buried in the Lady Chapel of the cathedral at Cologne.

Rainalducci, PIETRO, ANTIPOPE. See JOHN XXII, POPE.

Rajpootana, Prefecture Apostolic of, in India, attached to the Province of Agra, comprises ap-

proximately the collection of Native States which form the Rajpootana Agency. To the north it is bounded by the Bahawalpur State and the Punjab; on the east it extends to Abahari, Pipli, Rania, Sirsa, Hissar, Rewari, the Native States of Alwar, Bharatpur, Dholpur, and as far as Sipri (which however belongs to Agra), then to Lallitpur and Bina; on the south it reaches to the limits of the Bhopal State and the River Nerbudda; on the west to the borders of the Bombay Presidency—excepting Mount Abu and Abu Road station, which belong to the Archdiocese of Bombay. Out of a total population of 10,800,000 the Catholics number about 3846 (Europeans 656, Eurasians 609, natives 2581) who have 9 churches and 8 chapels served by 29 Capuchin Fathers of the Province of Paris, assisted by 10 lay brothers of the same order. The residence of the Prefect Apostolic is at Ajmere.

HISTORY.—Originally a portion of the Vicariate Apostolic of the Great Mogul, and later on of the Thibet-Hindustan mission, Rajpootana had no ecclesiastical history down to the year 1891, when it was separated from the Archdiocese of Agra, and made into a prefecture apostolic. At this date the district had only one mission station, Jaipur. Besides this, a priest was residing at Ajmere in charge of a small community of Eurasians and Goanese, and there were also stations for troops at Nasirabad, Neemuch, and Mhow, served by three military chaplains. Since the coming of the French Capuchins other stations have been established at Ratlam, Thandla, Mariapur, Jhabua, Jhalrapatan, Parbatpura, and Bhawanikhera, besides sub-stations visited from time to time. There have been two prefects Apostolic:—Father Bertram, 1892–1902, and Father Fortunatus, present prefect Apostolic from 1903.

INSTITUTIONS.—The Third Order of St. Francis of Assisi, with 35 members, besides various confraternities numbering 347 members. For education of boys: St. Anselm's School, Ajmere, with 37 boarders and 17 day scholars; St. Joseph's School, Jaipur, for training teachers and catechists, with 25 native orphans; School of the Sacred Heart, Mhow, with 35 boarders and 8 day scholars; besides 25 elementary schools attended by native boys from the villages. For education of girls: under the Franciscan Nuns of St. Mary of the Angels—Convent of the Assumption, Mhow, 15 nuns and 4 lay sisters, convent high school with 21 boarders and 47 day scholars, St. Joseph's School with 12 boarders, St. Anne's School with 37 native pupils, of whom 10 are orphans; Convent of St. Mary Magdalen, Ajmere, with 10 nuns and 4 lay sisters, convent high school with 34 boarders and 105 day scholars. Charitable institutions: besides those attached to the foregoing, there are agricultural orphanages at Mariapur with 72 inmates, and at Thandla with 29 Bhil orphans; St. Joseph's Convent, Thandla, for Bhil girls; surgical home at Indore attended by 4 nuns;—also dispensaries in seven places.

ERNEST R. HULL.

Râle (RASLE), SEBASTIAN, missionary, b. at Pontarlier, Diocese of Besançon, France, 20 Jan., 1654(?); shot by the English force attacking Norridgewock Mission, Maine, 23 August, 1724. He entered the Jesuit novitiate at Dole, province of Lyons, in 1675. He made his first studies at Carpentras, taught for a time at Nîmes, finished his theology at Lyons in 1688, volunteered for the missions in America, and sailed the next year with a party under Frontenac from Rochelle. His first missionary work was at an Abenaki village near Quebec, whence he was recalled to Quebec in 1691. Next he laboured for two years among the Illinois Indians. In 1694 he went to the Abenaki mission on

the Kennebec. The colonists of New England regarded with suspicion and hatred the arrival of a Frenchman in the midst of savages who were for the most part hostile to the English. The latter presumed that the missionary would do his best to keep alive this hostility. Hence the Indian outrages perpetrated on the eastern frontier of New England during Râle's long residence among the Abenakis were for the most part attributed, either directly or indirectly, to him. Râle made his headquarters at Norridgewock, where in 1698 he built a church. During Queen Anne's war, frequent attacks were made by the English upon Norridgewock, and in 1705 the church was burned. Râle and his converts escaped capture by flight.

The Treaty of Utrecht, 1713, established relatively peaceful conditions for a short time. A conference was held by the English and the Indians at Portsmouth, of which we have two conflicting reports. According to Penhallow (*Indian Wars*) the Indians acknowledged themselves subjects of Great Britain, who, in return, promised them free possession of their lands about the Kennebec. Râle denies, however, that the Indians promised subjection to England. His source of information was the verbal report of the Abenakis, who, if they had made any promises, carefully concealed them from the missionary. It is most likely, however, that the savages had no idea of what a promise of subjection to England meant. This is Parkman's opinion (*Half-Century of Conflict*, I, 212-13). Ere long English encroachments upon Indian lands again stirred up the Abenakis. As a result, hostilities broke out in Sept., 1721. In the following January an English expedition started for Norridgewock with the purpose of apprehending Fr. Râle. The missionary escaped, however, and soon returned to his mission. In August, 1724, another English expedition set out to capture him. The attacking party came upon Norridgewock unexpectedly; the Indians were routed, and fled, leaving behind them many wounded and dead, among the latter their beloved missionary. Râle's long residence with his flock, over a quarter of a century, gave him an intimate knowledge of their tongue. As evidence of this he prepared a dictionary of the Abenaki language, the MS. copy of which is preserved in the library of Harvard College. Some Indian prayers and a catechism, still in use among the Penobscots and Passamaquoddies, are attributed to him. In "The Jesuit Relations", LXVII, are two lengthy letters written by him from Norridgewock.

H. C. SCHUYLER.

Ralph Crockett, VENERABLE, English martyr, b. at Barton, near Farndon, Cheshire; executed at Chichester, 1 October, 1588. Educated at Cambridge, and ordained at Reims in 1585, he was captured on board ship at Littlehampton, Sussex, 19 April, 1586, with three other priests, Thomas Bramston, George Potter, and his fellow-martyr, Edward James (b. at Breaston, Derbyshire, about 1557,) educated at Derby Grammar School, St. John's College, Oxford, and the English colleges at Reims and Rome; ordained by Bishop Goldwell of St. Asaph in October, 1583; all were sent up to London and committed

to prison 27 April, 1586. After the failure of the Armada the Government determined to revenge itself on some of the priests in its custody. Crockett and James with two others, John Oven and Francis Edwardes, were selected for trial, which took place at Chichester on 30 September, 1588. All were condemned to death, under 27 Eliz. c. 2, for being priests and coming into the realm; but Oven on taking the oath of supremacy was respited. The other three were drawn on one hurdle to Broyle Heath, near Chichester, where Edwardes recanted, but the other two suffered with great constancy after absolving each other.

JOHN B. WAINEWRIGHT.

Ralph Sherwin, BLESSED, English martyr, b. 1550 at Rodesley, near Longford, Derbyshire; d. at Tyburn, 1 December, 1581. In 1568 Sir William Petre nominated him to one of the eight fellowships which he had founded at Exeter College, Oxford, probably acting under the influence of the martyr's uncle, John Woodward, who from 1556 to 1566 had been rector of Ingatstone, Essex, where Sir William lived. There Blessed Ralph took the degree of M.A., 2 July, 1574, and was accounted "an acute philosopher, and an excellent Grecian and Hebraic". In 1575 he fled abroad and went to the English College at Douai, where 23 March, 1577, he was ordained priest by the Bishop of Cambrai. On 2 Aug., 1577, he left for Rome, where he stayed at the English College nearly three years, becoming leader of the movement which placed it under the supervision of the Jesuits. On 18 April, 1580, he set out for England, a member of a party of fourteen; at Milan they were the guests of St. Charles for eight days, and Blessed Ralph preached before him. On 9 November, 1580, he was imprisoned in the Marshalsea, where he converted many fellow-prisoners, and on 4 Dec. was transferred to the Tower, where he was severely racked, 15 Dec., and afterwards laid out in the snow. The next day he was racked again, after which second torture he "lay for five days and nights without any food or speaking to anybody. All which time he lay, as he thought in a sleep, before our Saviour on the Cross. After which time he came to himself, not finding any distemper in his joints by the extremity of the torture". After over a year's imprisonment he was brought to trial, on an absurd charge of treasonable conspiracy, in Westminster Hall 20 Nov., 1581, and being found guilty was taken back to the Tower, whence he was drawn to Tyburn on a hurdle shared by Blessed Alexander Briant. He suffered very bravely, his last words being, *Jesu, Jesu, Jesu, esto mihi Jesus!*

JOHN B. WAINEWRIGHT.

Ram, Pierre François Xavier de, b. at Louvain 2 Sept., 1804; d. there 14 May, 1865; Belgian historian and rector of the Catholic University of Louvain. He belonged to an ancient family, originally from the Province of Zealand. De Ram entered the seminary at Mechlin, where he was ordained in 1827. During the trying period when King William I of the Netherlands was carrying on his campaign against the Catholic faith and traditions of the Belgians, and whilst de Ram was still young, he took an active part in the struggle maintained by the Belgian clergy against the government of the Netherlands, republishing eighteenth-century works, in which, in a series of historical studies refuting the doctrines of Joseph II, he combated the latter's disciple, King William I. He was next appointed keeper of the diocesan records

and professor in the episcopal seminary at Mechlin. In order to stay the spread of Protestantism in the Netherlands he collaborated with a movement for the publishing of religious works, bringing out "*Levens von de voornaemste Heyligen en roemwerdige peersonen der Nederlanden*" (Lives of the most prominent saints and celebrities of the Netherlands). His chief study for many years was hagiography, and he published an edition of Butler's "*Lives of the Saints*" (Louvain, 1828-35). Between 1828 and 1858 appeared the "*Synodicon Belgicum*", a collection of unpublished documents upon the ecclesiastical history of the Netherlands since Philip II (Louvain, 4 vols., in quarto). These books met with a warm appreciation and showed remarkable ability. His position as keeper of the records facilitated his researches to a great extent.

Then came the Belgian Revolution of 1830. Nothing need be said of the political and philosophical opinions of de Ram, as they are but secondary features of his career. He is best known as a prolific writer upon history and the restorer and first rector of the Catholic University of Louvain. He showed a remarkable talent for organization and administration during his tenure of office. He still continued his historical researches, and the history of the university was treated by him in numerous monographs. For this purpose he had at his disposal the material in the National Archives at Brussels. Upon the reorganization of the Bollandists, de Ram ceased his work upon hagiography, but still continued to produce works upon ecclesiastical and University history. De Ram was an active member of the "*Académie Royale de Belgique*" and a foreign associate of the Bavarian Academy. The complete list of his works given in the "*Bibliographie de l'Université Catholique de Louvain*" (Louvain, 1880) comprises 205 volumes. Many of these are of considerable length, and the majority contain hitherto unpublished papers of great value. Among the many tributes paid to the historian, that of Gachard, the renowned keeper of the national records, is remarkable for its sincerity and warmth. No complete biography of de Ram has as yet appeared, although such, considering his influential position and important work, would awaken no inconsiderable interest.

Revue Cath., XXIII (Louvain, 1865), 317-30; DE BUCK, *Mgr de Ram* (Paris, 1865); THORRISSEN in *Annuaire de l'Académie royale de Belgique* (Brussels, 1866); NAMECHE in *Annuaire de l'Université de Louvain* (Louvain, 1866).

VICTOR BRANTS.

Ramadan. See MOHAMMED AND MOHAMMEDANISM.

Ramatha, a titular see in Palestine, suppressed in 1884 by the Roman Curia. It was never an episcopal see properly so called, but, in the Middle Ages, the crusaders established the Diocese of Lydda and Rama, the titular of which was generally called Bishop of Rama, i. e. of Ramlet, a town near Lydda, but more populous than the latter. Later this was forgotten and there was a titular see of Lydda, as well as of Rama or Ramatha; the mistake has been discovered and rectified (see LYDDA).

S. VAILHÉ.

Rambler, THE, a Catholic periodical (not of course to be confused with the older "Rambler", published a century earlier by the famous Dr. Johnson), has an importance in the history of English Catholicism during the nineteenth century which is not to be measured by its mere duration as a journal. Closely associated with the names of Sir John (afterwards Lord) Acton (q. v.), Richard Simpson and, for a brief period, Newman himself, it represented a phase of convert thought which was in opposition to the extreme ultramontanistism of W. G. Ward and Manning, and which eventually led to increasing friction with

the leading members of the newly established English hierarchy. The chief external facts in the history of the periodical are recounted in an announcement which appeared in the last number published under the old name (May, 1862) headed "Enlargement of the 'Rambler'": "The Rambler was commenced on 1st of January 1848 as a weekly magazine of home and foreign literature, politics, science and art. Its aim was to unite an intelligent and hearty acceptance of Catholic dogma with free enquiry and discussion on questions which the Church left open to debate and while avoiding, as far as possible, the domain of technical theology, to provide a medium for the expression of independent opinion on subjects of the day, whether interesting to the general public or especially affecting Catholics". Before the year 1848 was over the new venture succeeded so well that it was found necessary to increase the size of the magazine and to issue it in a monthly form. It continued to be published as a monthly serial from 1 Sept., 1848, to 1 Feb., 1859. "During this period of ten years and a half", says the same announcement, "we at first endeavoured to restrict it to topics of social and literary interest, without entering directly into the graver problems of moral or political philosophy, but the events of the time and the circumstances of English Catholicism—compelled us more and more to open our pages to investigations of a deeper and more complex nature."

In view then of the fact that "The Rambler" had thus "assumed a less ephemeral character than ordinarily belongs to a monthly periodical", a new series was started in May, 1859, of which the numbers, in a slightly enlarged form, appeared only every two months. This came to an end in May, 1862, and, in accordance with the announcement above quoted, a quarterly journal, "The Home and Foreign Review", under the same editorial management, appeared in its place in July. For some time before this "The Rambler" had contrived to give considerable offence to the Catholic authorities in England and particularly to Cardinal Wiseman. Before June, 1861, we find Manning writing confidentially to Rome that he hoped soon to be able to announce the cessation of "The Rambler" (Purcell, "Life of Manning", II, 384). The change from a monthly to a two-monthly form had really marked a crisis in the journal's history, for in May, 1859, at the intervention of Cardinal Wiseman, Simpson had withdrawn from the editorship and Newman had consented to take it over, though his connexion with the periodical was to prove a very brief one. Acton then succeeded to the direction, Simpson, however, continuing to write a great number of the articles. Amongst the other leading contributors were Wetherell and H. N. Oxenham. "The Home and Foreign Review", which was supported by the same staff of writers, soon came into conflict with the authorities, notably both with Cardinal Wiseman and Bishop Ullathorne, and it lasted only until April, 1864.

GASQUET, *Lord Acton and his Circle* (London, 1906), consisting mainly of letters written by Acton as editor of *The Rambler*, and its successor; WARD, *Life of Cardinal Wiseman* (London, 1897), XXIV; IDEM, W. G. Ward and the Catholic Revival (London, 1893), X; GILLOW, *Bibl. Dict. Eng. Cath.*, s. v. Simpson, Gillow, etc.

HERBERT THURSTON.

Rameau, JEAN-PHILIPPE, musician, b. at Dijon, Burgundy, 25 Sept., 1683; d. at Paris, 12 Sept., 1764. His father, himself an organist, was his first master. At the age of seven he was able to perform every kind of music. For his further education he was sent to a Jesuit college; but even during class he was either singing or writing music. Excepting a short stay in Italy, he always lived in France, was twice organist at Clermont, and from 1723 remained constantly in Paris, where he was organist in several churches. Rameau was very tall and extraordinarily

thin, so that he had more the appearance of a ghost than of a human being. He was a great thinker, fond of solitude, and out of place in society. In 1726 he married Marie-Louise Mangot, and had four children, a son and three daughters, one of whom entered the Order of the Visitation. Without denying the merits of Lully (1633-1687) and Couperin (1663-1733), the founders of the French opera, and even admitting that Rameau was not right in all the details of his theory, we must acknowledge that he opened up a new road, which was followed by all who came after him. His main principle, for the defence of which he had to sustain hard struggles, was that melody, far from being sufficient for a good piece of music, itself depends on the rules of harmony, so that the real guide of every composer is harmony, not melody. His chief merit consists in having established the relations between science and art, and in having highly developed the symphonic part of the opera. His most famous theoretical works are: "Traité de l'harmonie réduite à son principe naturel" (1722); "Génération harmonique" (1737); "Démonstration du principe de l'harmonie" (1750); "Code de musique pratique" (1760). Only at the age of fifty did he begin to write for the stage, and in sixteen years (1733-1749) he composed about thirty operas and ballets, the best of which are: "Castor et Pollux", "Les Indes Galantes", "Dardanus and Zoroastre". Of his church music some motets only are known. He left many compositions for the piano, either alone or with other instruments, eighteen of which have been lately published by Vincent d'Indy. Durand, in Paris, has undertaken a complete edition of Rameau's works, under the direction of Saint-Saëns.

MARÉ, *Eloge historique de M. Rameau* (Paris, 1766); POUGIN, *Rameau, Essai sur sa vie et ses œuvres* (Paris, 1878); LAURENCIE, *Mercur musical du 15 Juin* (1907); LALOY, *Rameau* (Paris, 1909), 2 edit.

A. WALTER.

Ramsey Abbey, Huntingdonshire, England, was founded by Ailwine (Ethelwine, Egelwine), a Saxon noble, in 969. He was encouraged in the undertaking by St. Oswald of York, who advised him that where men have renounced the world "the air becomes salubrious, the fruits of the earth are gathered in abundance, famines and pestilence disappear, the State is duly governed, prisons are opened, and captives set free, those wrecked at sea are relieved, the sick are healed and the weak find means for their convalescence". The site chosen, Ramsey (Ram + eie, *insula arietis*), was then the largest and finest of the islands of a great marsh formed by the waters of the Ouse. It was afterwards connected with the mainland by a causeway constructed by the monks. Here Aednoth, nephew of Ailwine, commissioned by Oswald to make preparations, built a wooden church and offices, and as soon as all was ready, the saint sent twelve monks from his monastery of Westbury (Worcester) to take possession. The wooden minster was dedicated by Oswald and St. Dunstan of Canterbury to St. Mary, all Holy Virgins, and St. Benedict. Soon a fine stone church with towers was erected and consecrated by St. Oswald, Archbishop of York, assisted by Aescwio, Bishop of Dorchester, in 991. The year following (992) the two founders, Ailwine and Oswald, died, and the monastery, governed till then by priors (Germanus and Aednoth), was permitted to elect an abbot. Aednoth, son of Aednoth the prior, was the first to hold the office.

Ailwine handsomely endowed his foundation with lands and privileges. He also presented the new church with an altar-frontal (*tabula in fronte eminentioris altaris*) of wood, covered with silver plates and many-coloured jewels. King Edgar, Henry I, Henry II, and others extended and confirmed the possessions and liberties. In 1002 the body of St.

Ives (Ivo) was miraculously discovered in the neighbourhood and this led to the establishment of the dependent priory of St. Ives. Another dependent priory or cell was Modney, in Norfolk. The abbot had a seat in Parliament and ranked next after Glastonbury and St. Alban's. At the Dissolution (1539) John Wardeboys, *alias* Lawrence, willingly resigned the abbey into the king's hands and received a pension of £266. 13s. 4d. per annum. The estates were granted by Henry VIII to Sir Richard Williams, *alias* Cromwell. The revenue, according to Dugdale, was £1716. 12s. 4d., but according to Speed, £983. 15s. 3¼d. Nothing important remains of the buildings but a ruined Late Gothic gateway.

Chronicon Abbatiae Ramesiensis in Rolls Series (1886); *Cartularium Monasterii de Ramesia in Rolls Series* (3 vols.); DUGDALE, *Monasticon Anglicanum*, II (London, 1846); REYNER, *Apostolatus Benedictinorum*, 149; WISE, *Ramsey Abbey, its rise and fall* (1881).

J. C. ALMOND.

Ramus, PETER (PIERRE DE LA RAMÉE), Humanist and logician, b. at Cuth in Picardy, 1515; d. in Paris, 1572. In spite of many difficulties, including poverty and the loss of both his parents at an early age, he succeeded in obtaining a good education, and graduated at the University of Paris in 1536 as Master of Arts. The thesis which he defended "Quaecumque ab Aristotele dicta sunt, commentitia sunt" ("All Aristotle's doctrines are false") indicates the direction of his thoughts even at that time.

He was an outspoken and uncompromising opponent of the Aristotelean philosophy which was at that time the authoritative philosophy in every European centre of learning. His two principal works, "Aristotelicae Animadversiones" and "Dialecticae Institutiones", both of which were written in elegant humanistic Latin and published in Paris in 1543, brought him into still sharper conflict with the official world of scholarship. The books were condemned by the University of Paris, an act which was made the subject of debate in the French Parliament, until Francis I interposed by appointing a committee to listen to a disputation between Ramus and his principal opponent, Anthony of Govea. The majority of the committee decided against Ramus, and condemned him as "rash, arrogant and impudent". This decision was confirmed by the king. In 1547, after the accession of Henry II, and owing to the protection of the Cardinal of Lorraine, Ramus was accorded greater liberty, and succeeded in obtaining a position as teacher, or "royal lecturer", at the College of Navarre. In 1562, he renounced Catholicism and became a Calvinist. In the massacre of St. Bartholomew, in 1572, he was singled out by his enemies and put to death with every circumstance of cruelty and brutality. Ramus was a writer of more than ordinary brilliancy and effectiveness. He sought out the weak points in the method of teaching logic then in vogue, and directed his attack against them with the ability, and indeed, very much in the manner, of the celebrated Italian Humanist, Vives. He objected especially to what he called the sterility of the logic

then currently taught, and pleaded for a reform of the science along lines of broader human interest. In his positive teaching, that is to say, in the logic which he wished to substitute for the Aristotelean, he was not very successful. In a general way, he may be said to have advocated a closer union between rhetoric and logic, between the art of exposition and the art of argumentation. Among his following, the "Ramists", as they were called, were the Englishman, William Temple, and the Germans, Sturm, Freige, and Fabricius. In the official academic world he met with opposition not only at the University of Paris but also at Wittenberg, Helmstadt, and elsewhere. His opponents were called Anti-Ramists. For a time, his campaign against Aristotle had the effect of rallying to his views the Anti-Aristoteleans of every country in Europe. His influence, however, did not last long, although some writers find evidences of it as late as 1662 in the famous "Port Royal Logic".

WILLIAM TURNER.

Rancé, JEAN-ARMAND LE BOUTHILLIER DE, abbot and reformer of Notre Dame de la Trappe, second son of Denis Bouthillier, Lord of Rancé, Councillor of State, etc., b. at Paris, 9 Jan., 1626; d. at La Trappe, 27 Oct., 1700. Originally intended for the Knights of Malta, the illness of his elder brother caused his father to dedicate him to ecclesiastical service, in order to preserve in the family the former's numerous benefices. On the death of his brother, 1637, he became Canon of Notre Dame de Paris, Abbot of La Trappe, and of several other

ARMAND DE RANCÉ
From a drawing by Jacquand

places, which gave him a revenue of about 15,000 livres. He early gave evidence of great precociousness in study, publishing, at the age of twelve years, an edition of Anacreon, with Greek notes, dedicated to his godfather, Cardinal Richelieu. In 1651, he was ordained priest by his uncle, the Archbishop of Tours. This dignity did not effect a change in his manner of life, which was worldly in the extreme. In 1652 his father died, leaving him a further increase in estate. At the age of twenty-six he was thus left absolutely his own master, handsome of person, polished and with practically unlimited wealth. Feasting, and the pleasures of the chase, to which he was passionately attached, divided his time with preaching and other sacerdotal ministrations. His uncle, who desired him as coadjutor, made him archdeacon, caused him to be elected deputy of the second order to the General Assembly of the French Clergy in 1655, and had him appointed first chaplain to Gaston, Duke of Orleans, in 1656.

For several years his conscience reproached him for his scandalous conduct, but he paid little heed to its voice. The death of the Duchess of Montbazou, in 1657, gave him the first serious thought leading to

his conversion. He retired to his Château de Verets, where he gave himself to reflection on the vanities of life; put himself under capable directors, and began to live more in conformity with his obligations. In 1660 he assisted at the death of the Duke of Orleans, which made so great an impression on him that he said: "Either the Gospel deceives us, or this is the house of a reprobate." After having taken counsel, he disposed of all his possessions, except the Abbey of La Trappe, which he visited for the first time in 1662. He decided to become a religious, and obtained permission from the king, in 1663, to become its regular abbot and reformer. After having passed through his novitiate and made profession, he took formal possession of his monastery as its regular abbot, and began the work of its reform, which, after he had overcome immense difficulties, was solidly established in his own abbey, from whence it was adopted into numerous other monasteries. His time and energy were so taken up with this work that, during the first years of his retirement he obliged himself to an entire separation from the world. He devoted his spare time to manual labour, and to the compilation of spiritual books. These latter were by no means inconsiderable. Amongst the most important are: "Vies de plusieurs solitaires de La Trappe"; "Le traité de la sainteté et des devoirs de la vie monastique"; "La règle de s. Benoît, traduite et expliquée selon son véritable esprit"; etc. His penitential mode of life made him many enemies, and caused him to be accused of Jansenism, but he refrained from defending himself, until finally, at the request of his most intimate friends, he wrote to the Maréchal de Bellefonds, stating that he had signed the "Formula" (against Jansenism) without restriction or reservation of any kind; adding that he had always submitted himself absolutely to those whom God had placed over him, i. e. the pope and his bishop. If this is considered insufficient to vindicate his orthodoxy, the letters and pamphlets with which he attacked the Jansenists, as published by Bossuet, are certainly enough to justify him from this charge. In 1695, feeling his health to be declining, he obtained permission from the king to resign his position, and for several years continued to give an example of humility and resignation. His remains are interred at the Monastery of La Grande Trappe.

EDMOND M. OBRECHT.

Randall, JAMES RYDER, journalist and poet, b. 1 Jan., 1839, at Baltimore, Maryland; d. 15 Jan., 1908, at Augusta, Georgia. As author of "Maryland, my Maryland", the famous war song of the Confederacy, he has been frequently styled the "Poet Laureate of the Lost Cause". He received his education at Georgetown University, but did not graduate. He travelled in South America and the West Indies and upon returning to the United States, accepted the chair of English Literature at Poydras College, Pointe-Coupée, La., then a flourishing Creole institution. Hearing of the attack upon the Federal troops in Baltimore on 21 April, 1861, in which a classmate had been wounded, his Southern sympathies were so aroused that during the night by the light of a candle he composed what is generally acknowledged to be America's most martial poem, which first appeared in the New Orleans "Sunday

Delta" of 26 April, 1861. Reaching Baltimore, it was set to the music of "Lauriger Horatius" by Miss Jennie Cary, who added "My Maryland" to each stanza. A German musician of Southern sympathies eventually set the poem to "Tannenbaum, O Tannenbaum", the original of "Lauriger Horatius". After the close of the war, Randall engaged in newspaper work, holding several important editorial positions, eventually becoming Washington correspondent for the Augusta "Chronicle". He was the author of numerous other poems, none of which, however, attained the popularity of "Maryland, my Maryland". His later work breathed a deeply religious tone.

Maryland, My Maryland, and other Poems (Baltimore, 1908); *Poems of James Ryder Randall*, ed. ANDREWS, with a biographical sketch of the poet (New York, 1910).

WILLIAM J. DWYER.

Ransom, FEAST OF OUR LADY OF, 24 Sept., a double major, commemorates the foundation of the Mercedarians (q. v.). On 10 Aug., 1223, the Mercedarian Order was legally constituted at Barcelona by King James of Aragon and was approved by Gregory IX on 17 Jan., 1235. The Mercedarians celebrated their institution on the Sunday nearest to 1 Aug. (on which date in the year 1233 the Blessed Virgin was believed to have shown St. Peter Nolasco the white habit of the order), and this custom was approved by the Congregation of Rites on 4 April, 1615 (Anal. Juris Pont., VII, 136). But the calendar of the Spanish Mercedarians of 1644 has it on 1 Aug., double. Proper lessons were approved on 30 April, 1616. The feast was granted to Spain (Sunday nearest to 1 Aug.) on 15 Feb., 1680; to France, 4 Dec., 1690. On 22 Feb., 1696, it was extended to the entire Latin Church, and the date changed to 24 September. The Mercedarians keep this feast as a double of the first class, with a vigil, privileged octave, and proper Office under the title: "Solemnitas Descensionis B. Mariæ V. de Mercede". Our Lady of Ransom is the principal patron of Barcelona; the proper Office was extended to Barcelona (1868) and to all Spain (second class, 1883). Sicily, which had suffered so much from the Saracens, took up the old date of the feast (Sunday nearest to 1 Aug.) by permission of the Congregation of Rites, 31 Aug., 1805 (double of the second class). The Mercedarians have a special feast (double major), Apparition of Our Lady to St. Peter Nolasco in the choir of Barcelona, on the Sunday after 24 Sept. In England the devotion of Our Lady of Ransom was revived in modern times to obtain the rescue of England as Our Lady's Dowry.

F. G. HOLWECK.

Raphael (רַפָּאֵל, "God has healed"), SAINT.—The name of this archangel does not occur in the Hebrew Scriptures, and in the Septuagint (Ῥαφαήλ) only in the Book of Tobias. Here he first appears disguised in human form as the travelling companion of the younger Tobias, calling himself "Azarias the son of the great Ananias". The story of the adventurous journey during which the protecting influence of the angel is shown in many ways including the binding "in the desert of upper Egypt" of the demon who had previously slain seven husbands of Sara, daughter of Raguel, is picturesquely related in Tob., v-xi, to which the reader is referred. After the return and the healing of the blindness of the elder Tobias, Azarias makes himself known as "the angel Raphael, one of the seven, who stand before the Lord" (Tob., xii, 15. Cf. Apoc., viii, 2). Of these seven "archangels" which appear in the angelology of post-Exilic Judaism, only three, Gabriel, Michael, and Raphael, are mentioned in the canonical Scriptures. The others, according to the Book of Enoch (cf. xxi) are Uriel, Raguel, Sariel, and Jerahmeel, while from other apocryphal sources we get the variant names Izidkiel,

Hanael, and Kepharel instead of the last three in the other list.

Regarding the functions attributed to Raphael we have little more than his declaration to Tobias (Tob., xii) that when the latter was occupied in his works of mercy and charity, he (Raphael) offered his prayer to the Lord, that he was sent by the Lord to heal him of his blindness and to deliver Sara, his son's wife, from the devil. The Jewish category of the archangels is recognized in the New Testament (I Thess., iv, 15; Jude, 9), but only Gabriel and Michael are mentioned by name. Many commentators, however, identify Raphael with the "angel of the Lord" mentioned in John, v. This conjecture is based both on the significance of the name and on the healing rôle attributed to Raphael in the Book of Tobias. The Church assigns the feast of St. Raphael to 24 Oct. The hymns of the Office recall the healing power of the archangel and his victory over the demon. The lessons of the first Nocturn and the Antiphons of the entire Office are taken from the Book of Tobias, and the lessons of the second and third Nocturns from the works of St. Augustine, viz. for the second Nocturn a sermon on Tobias (sermon I on the fifteenth Sunday), and for the third, a homily on the opening verses of John, v. The Epistle of the Mass is taken from the twelfth chapter of Tobias, and the Gospel from John, v, 1-4, referring to the pool called Probatica, where the multitude of the infirm lay awaiting the moving of the water, for "an angel of the Lord descended at certain times into the pond; and the water was moved. And he that went down first into the pond after the motion of the water was made whole of whatsoever infirmity he lay under". Thus the conjecture of the commentators referred to above is confirmed by the official Liturgy of the Church.

VIGOUROUX, *Dict. de la Bible*, s. v. Raphaël.

JAMES F. DRISCOLL.

Raphael, the most famous name in the history of painting, b. at Urbino, 6 April (or 28 March), 1483; d. at Rome, 6 April, 1520. He belongs to the Umbrian School. Raphael is only a Christian name, the full name being Raphael (Raffaele) Santi (Sanzio is an absolutely incorrect form). His father, Giovanni Santi, held an important but indefinite post at the Court of Urbino. He was the artistic factotum of Duke Frederick, one of the most intellectual princes and most enlightened art-lovers of his age. The best painters, Piero della Francesca, Melozzo, and Justus of Ghent, were in his service and had made Urbino one of the most prominent art centres of the time. The ducal palace is still one of the wonders of Italy. Nor was the social and worldly life less advanced; at this Court was written the "Cortegiano" of Baldassare Castiglione, the complete handbook of the man of the world, according to the ideal of the Renaissance. The relations which Raphael formed in these early surroundings (especially about 1506), the serene and pure moral atmosphere which he breathed and which is characteristic of his genius, followed him throughout his life.

Giovanni Santi died on 1 August, 1494. The orphan, placed under the guardianship of his maternal uncle, entered the studio of a charming painter, Timoteo Viti, pupil of Francia, who had just returned to take up his residence in the country. Probably to the beginning of this apprenticeship, perhaps somewhat previous to it, belongs Raphael's famous sketch-book of the Academy of Venice. This book was discovered in 1803 by Bossi and purchased by Cicognara for the City of Venice. It is a small portfolio, now mutilated, consisting of a hundred pen-and-ink drawings; the author copied, in particular, the "Savants" and the "Philosophers" attributed to Justus of Ghent, which were then in the palace of Urbino (half of them are now at the Louvre and the other half at the Barberini

Palace). Morelli (Lermolieff) thinks he recognizes in these drawings the hand of Pintoricchio, but the old opinion has prevailed over his criticism. These are rather the first studies and attempts of Raphael between his twelfth and fifteenth years. Though childish, they already reveal the masterly genius of the artist, his singular, divine sentiment of beauty. In Timoteo's studio and under his influence were painted the earliest pictures of his illustrious pupil which have reached us, four small exquisite pictures, of the shape and value of miniatures, the "Dream of the Knight" (National Gallery), "St. George and St. Michael" (Louvre), and the most charming of the four, the "Three Graces" of the Tribune of Chantilly.

In June, 1499, Raphael had not yet left Urbino. In May, 1500, he must have been at Perugia, but could not have entered Perugino's studio prior to that date, for the latter, who had been away for twelve years, returned then to paint the Cambio frescoes. Therefore, Vasari's story of Raphael's education by Perugino is not to be believed, being pure fable. Perugino's influence was important to a young man of eighteen, and, in fact, with his wonderful faculty of assimilation, Raphael had soon succeeded in mastering the suggestions and methods of the older painter, his poetic sense of light and space, his harmoniously symmetrical system of composition. He shortly became a sort of foreman, or head of the studio, supervising the making of those countless Madonnas for which Perugino's "workshop" was the best patronized in Italy. This period of somewhat commercial production is the least interesting of Raphael's life. The "Virgin of the Book" at the Hermitage and the "Virgin between St. Jerome and St. Francis" (Berlin) are among his most insignificant works. The "Crucifixion" of 1502 (National Gallery) shows an archaic and "primitive" dryness. But his genius soon threw off its half slumber. The "Coronation of the Virgin", painted in 1503 for the Franciscans of Perugia (Pinacoteca of the Vatican), shows qualities apparently borrowed from Perugino, but vivified by new imagination and youth, the three panels of the predella especially displaying great progress. A very important work, unfortunately lost since the Revolution, seems to have been the "Triumph of St. Nicholas of Tolentino". But the pearl of this period is the "Espousal of the Virgin", preserved at Milan (1504). A similar picture in the Museum of Caen is not the model wrongly ascribed to Perugino, but a copy of Raphael's picture, the work of the mediocre Spagna. This masterpiece worthily ends the period of Raphael's youth. The final word of Umbrian art of the fifteenth century was spoken in this page of youth and divine modesty.

FLORENTINE PERIOD (1504-08).—After a short visit in the summer at Urbino, Raphael went to live at Florence towards the end of 1504. The four years he spent there were a new and decisive stage in his career. At that date Florence was the most intense and active centre of the Renaissance (and the period was pregnant with artistic development). Leonardo da Vinci and the young Michelangelo, the two leaders of the movement, revealed (1506) in their rival "cartoons" (now lost) of the Signory perfect models of historical composition. In the stimulating atmosphere of a perpetual contest dominated by an impassioned love of beauty and fame Raphael found fresh incentive. The knowledge and skill of the least of the Florentine painters were calculated to amaze the young provincial and sharpen his ideas, which proved most profitable to his talent. At Florence he began his education over again; he resumed his studies and in a few years learned more about form than he had acquired from Timoteo and Perugino. His earnings were still modest. During his stay in Florence Raphael was a young, unknown artist with a good future. He had few acquaintances and not many

commissions. He was only given small pictures to paint, portraits of middle-class people, such as Angelo and Maddalena Doni (Uffizi, 1506) and the "Donna Gravidia" (pregnant woman) of the Pitti Palace, and an especially large number of Madonnas which he executed for private oratories. But nothing could show more advantageously the progress he had made since his Umbrian period. He had found a model of a more regular type, a fuller oval and a richer form than was Perugino's usual model. His sense of life became more natural without losing any of its poetry. Raphael's Madonnas are all his own; they have not the melancholy affectation of those of Botticelli, nor the mysterious smile of those of Leonardo. They are all near to us, material and human. Their familiarity,

HOUSE IN WHICH RAPHAEL WAS BORN, URBINO

of a thoroughly Franciscan grace, is expressed with the greatest tact. They retain the easy good-humour, sometimes excessive, indulged in by the painters of the North. They are not intended to be "edifying", properly speaking, but in these matters degree is a matter of taste. As Burckhardt has said, for the first time since Phidias, art reached those heights where human beauty by its nobility and perfection of form undertakes to call forth the divine.

The Madonnas of the Florentine period may be divided into three groups according to the nature of the *motif* and the composition. The oldest and most simple are those which represent the Madonna with the features of a young Italian woman, standing and at half length, holding the Christ Child in her arms. The masterpiece of this class is the "Madonna of the Grand Duke" (Florence, Pitti Palace, 1505). Despite a trace of timidity in the arrangement the Virgin is so charming that one cannot prefer even the more perfect Madonnas of the next period. This simple composition has given rise to many variations, such as the little "Cowper Madonna" (Panshanger), so tenderly pensive, and the charmingly spirited, sweet, and impassioned "Madonna Casa Tempi" (Munich). The second group does little more than modify the first by the introduction of new elements, such as interior decoration or landscape, for example the "Virgin of Orleans" (Chantilly), the "Bridgewater Madonna", the "Colonna Madonna" (Berlin), and the great

"Cowper Madonna" (Panshanger), the two last-named being contemporaries (1506 or 1507) and to a certain extent twins. The third group, however, shows a new stage, a superior type of composition and style. Raphael was then obviously under the influence of the great Dominican painter, Fra Bartolommeo, one of those who did most in the sixteenth century to organize the truly Florentine pictorial tradition. This learned painter who was gifted to a high degree with a sense of balance and beautiful composition, greatly influenced the young Umbrian, the influence becoming apparent as early as 1505, when Raphael executed at San Severino, Perugia, a fresco of which he painted only the upper part (it was completed in 1521 by the aged Perugino). This fresco, which was important inasmuch as it contained the germ of the "Disputa", merely reproduces the arrangement of Fra Bartolommeo's "Last Judgment". To him Raphael owes the methods by which he produced the Virgins of the third group, in which the Madonna appears at full length in a landscape with the Infant and the young St. John. The sublime trio in such compositions as "La Belle Jardinière" (Louvre, 1507), the "Madonna of the Meadow" (Vienna), or the "Madonna of the Goldfinch" (Uffizi, Florence) is an idea directly derived from the teachings of the artist-monk. Here Raphael detaches himself from the external symmetry of Perugino's art, attaining a harmony at once more complex, intimate, and living.

From this period date several more important works in which the young man practised painting in the "noble" style. He began to receive orders and to gain a reputation. On setting out for Rome he left unfinished the "Madonna of the Baldacchino" (Pitti Palace, 1508), and it is not known when it was completed, but it is without originality and might pass for a picture by Fra Bartolommeo. Preferable to it is his "Madonna Ansdei" (National Gallery, 1507), less "modern" and more "Peruginique", but one of the loveliest things conceivable in this traditional style. From 1508 dates the "Entombment" of the Casino Borghese. This work, ordered by Atalanta Baglioni for the chapel of her son Griffonetto at Perugia, is Raphael's first attempt in the historic manner. His client was important and he had an opportunity to gain distinction; it is evident that he spared no pains. Prepared for by an extraordinary number of drawings, the work is nevertheless one of the artist's least fortunate ventures. It is spoiled by excessive labour. Raphael wished to display all his knowledge and resources, uniting on the same canvas the qualities of the two masters of the "cartoons" of the Signory, the men whom he most admired and who tantalized him most, Leonardo da Vinci and Michelangelo. Too many contradictory ambitions injured the result and the great attempt ended in failure. But his contemporaries judged otherwise, and the "Entombment" ranked Raphael among the foremost of the Florentine painters. Thenceforth all eyes were on him. The period of beginnings and attempts was over. In the summer of 1508 the young man went to Urbino. Julius II had just ascended the papal throne. Duke Guidobaldo recommended Raphael to the pope who was having the Vatican repainted and re-decorated. In October, 1508, Raphael reached Rome.

ROMAN PERIOD (1508-20).—The twelve years of Raphael's life in Rome are unparalleled. In this short space of time the young master multiplied masterpieces and left behind him the most complete, serene, and harmonious expression of the Renaissance. The painter of the Madonnas and of the little pictures of the Florentine period underwent the most surprising transformation, becoming all at once a most productive decorative painter on a vast scale. His genius set itself to the most exalted

as well as the most diverse tasks, his inexhaustible resources permitting him to conceive of and complete within a few years the Stanze or Chambers of the Vatican, the "Acts of the Apostles", the Farnesina, and the Loggia, not to mention other undertakings as architect, archæologist, and sculptor, and fifty pictures or portraits, nearly all of which are masterpieces. It is a metamorphosis without precedent or explanation. When we consider that this vast and immortal work was accomplished in less than twelve years by a young man who was twenty-six when he began and who died at thirty-seven, we must question whether the world has twice beheld the wonder of such a genius.

Julius II, the reigning pope, was one to whom modern speech willingly accords the title "superman" or "hero". He was one of the first to conceive of and pursue the policy of Italian unity. Beyond doubt this warrior pontiff, who entered the citadel of Mirandola through the breach, had a somewhat temporal idea of his power, but through art he endowed the Church with an intellectual importance which it seemed to have lost since the Great Schism. In his powerful hands Rome became what it only recently ceased to be, the capital of the civilized world. Space does not permit adequate treatment of this point; but when face to face with the chief problems of the sixteenth century; when the question arose as to whether the Church would absorb or reject and condemn progress, whether or not it would associate itself with the humanistic spirit, Julius II deserves the credit for having taken sides with the Renaissance and prepared the stage for the moral triumph of the Church. The great creations of Julius II, Bramante's St. Peter's and Raphael's Vatican, are inseparable from the great ideas of humanity and culture represented by the Catholic Church. Here art surpasses itself, becoming the language of something higher, the symbol of one of the noblest harmonies ever realized by human nature. At the will of this extraordinary man Rome became at the end of the sixteenth century the meeting place and centre of all that was great in art and thought. With the infallible sense and discernment of great judges of men, the pope had immediately called to his service those who would do most honour to his reign. He did not make a mistake, and posterity can only ratify his choice. But his infallible divination is best shown in his selection of Raphael. There was nothing in the young man's work to presage the wholly new genius he was to display nor the unequalled powers of composition, nobility, and beauty which slumbered in that privileged soul. It is probable that Bramante who, like Raphael, was a native of Urbino, actively furthered his young townsman's interest with the pope, and caused him to be received among the inner circle of artists whom Julius II had engaged for the works in his palace. It must have been chiefly to the great architect, whose magnificent frescoes were at the Castle of Milan, to the conversations, the example, and familiar intercourse with this powerful genius, that Raphael owed the sudden broadening of his ideas and the unforeseen maturity of his style; the young Umbrian became worthy of the grandeur of Rome. But nothing completely explains this singular metamorphosis; it remains the miracle of Raphael's existence.

The pope, weary of dwelling in the apartments of his predecessor (the famous Appartamento Borgia, decorated by Pinturicchio), decided to remodel the lower chambers which had already been used by Nicholas V. A whole colony of painters, including the aged Signorelli and the aged Perugino, Sodoma and Bramantino, Peruzzi, Lotto and the Fleming Ruysch, in 1502 took up their residence in the Vatican and once more Raphael worked beside his former master. But his first attempts showed such mastery that the

pope dismissed all the others and unhesitatingly confided to the youngest and the latest comer (1509) the vast task of decorating the Chambers. The first of these was called the *Stanza della Segnatura*, it being that of a tribunal of the Roman Curia. It is a somewhat irregularly vaulted hall with two windows on each side which are not on the same axis. These unfavourable conditions (which were repeated in the other chambers) the young artist turned to his advantage. This hall contains a plenitude of art and an intellectual harmony which will never be surpassed. On the four triangles of the ceiling he painted four large circular medallions representing, in the guise of young women crowned and surrounded by genii, Theology, Law, Science, and Poetry. In the spaces between these four circles he painted as many bas-reliefs representing a scene or "story" typical of the four disciplines: Original Sin (Theology), The Judgment of Solomon (Law), Apollo and Marsyas (Poetry). Unable to find a similar subject for Science, he gracefully depicted Astronomy in the form of a beautiful young woman leaning over the celestial sphere and by a gesture signifying the discovery of the stars. These figures on the ceiling sound the keynote of the paintings on the walls, which have always been regarded as the most perfect expression of the genius of the Renaissance, the harmonious agreement of all the human faculties, reason, and faith, justice and poetry, the balancing of all the forces and needs of our nature, and the joy resulting from the peaceful and happy exercise of all our activities. It is difficult to believe that Raphael himself conceived so extensive and complicated a design. The theme was certainly set by a cleric, a Humanist, or man of letters, such as Phædrus Inghirani or Sigismondo de' Conti (for whom Raphael painted the "Foligno Madonna" as a thank-offering). Furthermore, the ideas which he had to represent were not new in art. To go back no further than the fourteenth century painting had been endeavouring to express ideas. The frescoes at the Spanish Chapel of Andrew of Florence (c. 1355), that of Giusto at Padua, Traini's picture at St. Catherine's of Pisa, or the fresco of Filippino Lippi at the Minerva representing the "Triumph of St. Thomas Aquinas" are well-known examples of what may be called philosophic painting. Raphael was largely inspired by these models. His work, novel in the style and spirit of its forms, merely takes up again on a larger scale, and with consummate art brings to perfection ideas which had been a national tradition in Italy since the Middle Ages.

Lack of space forbids a detailed description of these celebrated frescoes, permitting only a general outline of the principal ones. One of their most remarkable characteristics is the incomparable clearness of the composition, the faculty of adapting it to one order of ideas and so placing the spectator, previous to any analysis on his part, in a mood appropriate to each scene represented. That is, a spectator standing before the "Disputa" or the "School of Athens", even though he did not know the names of the persons and the meaning of the subject, would nevertheless immediately receive from the combination of forms and

the general arrangement, an informing impression of the things represented. With its two and even three planes, its hierarchical aspect, its regular movement descending from the Father to the Holy Ghost, from the Son to the Host placed vertically below Him, to rebound in concentric waves through the two parallel hemicycles of the celestial and the terrestrial Church, the "Disputa" is stamped with theological majesty. In contrast to this presentment of august solemnity, in which everything follows an emphatically Scholastic method—the deduction from principles of a rigorous chain of reasoning like that of ontology—the "School of Athens" displays the most varied action, effervescence, scattered groups, and the agitation of a scientific congress. Ideas, methods, everything is changed; we pass from one world to another.

No other painter could sensibly express the most delicate nuances by the pure language of forms. On the other hand, in such subjects it was allowable for the artist to make abundant use of allegory. There existed for the personification of abstract ideas a whole body of figures often characterized by complicated attributes; often long inscriptions, streamers, phylacteries, completed the explanation. Pinturicchio proceeded in this manner in the Borgia apartments, as did also the author of the magnificent tapestries of Madrid. With better taste Raphael forbore this confusion of kinds, the mingling of fiction with reality, of personifications with persons. For the representation of ideas he made use only of real and historical persons, philosophy being represented by Socrates, Plato, Aristotle, and Democritus.

Thus this chamber of the Vatican became a sort of mirror of the tendencies of the human mind, a summary of

RAPHAEL'S PORTRAIT OF HIMSELF IN THE
UFFIZI GALLERY, FLORENCE

all its ideal history, a sort of pantheon of spiritual acquirements. Thereby the representation of ideas acquired a dramatic value, being no longer, as in the Middle Ages, the immovable exposition of an unchangeable truth, but the impassioned search for knowledge in all its branches, the moral life of humanity. Finally these historic figures conceived of as portraits for which the artist made use of all the documents possessed by the iconography of his time, blended in heroic familiarity with contemporary persons, the very circle of Julius II and Raphael. There are found Bramante, the Duke of Urbino, Raphael, Sodoma, and twenty others named by Vasari. Thus abstract ideas became animated, and we are afforded the magnificent spectacle of the world of the spirit, the society formed of the harmonious concert of the highest intelligences. Nevertheless these frescoes, which are so full of life, are perhaps the most highly decorative ever imagined. It is wonderful to see how the artist's thought adapts itself to the law of architecture, readily inventing simple and monumental motifs which endow his ideas with imperishable grandeur. Berenson is perhaps mistaken in reducing Raphael's genius to the incomparable mastery of the language of extent which he calls "composition in space". This is to cheapen his unique and enchanting qualities as designer and painter, plastic gifts which no other mortal ever possessed in the same degree. It is none the less true that the ease with which Raphael moves

about in space, the aerial, spacious qualities which characterize his frescoes, is one of the essential parts of his particular magic. He is the greatest decorator who ever lived.

[It is worthy of note that the titles of these two famous frescoes are a later and incorrect invention of the eighteenth-century engravers. The "Disputa" is really a picture of the life of the Church and an affirmation of the dogma of the Real Presence. The title of the "School of Athens" is due to mistaking the figures of Aristotle and Plato, although they are designated, by the titles of their writings, for those of St. Paul and Dionysius the Areopagite. Moreover, the whole of this second scene is but a new illustration of the traditional theme of the seven liberal arts or the seven disciplines of the trivium and quadrivium].

JULIUS II

Detail from "The Expulsion of Heliodorus", Raphael, Vatican

The paintings on the other two walls were, as has been said, obstructed by a window. Raphael easily found a most ingenious solution of the difficulty. The painting of "Law" was divided into three parts: on the lintel he painted the three theological virtues (they are among his most exquisite creations), to left and right of the window he depicted in two symmetrical scenes "Civil Law" (Justinian bestowing the Pandects; this scene is imitated in Melozzo's fresco in the Vatican Library) and "Canon Law" (Gregory IX, with the features of Julius II, publishing the Decretals). These two frescoes are unfortunately much damaged. On the opposite wall Raphael painted Parnassus. This shows a mountain-top crowned with laurel where Apollo, surrounded by the Muses, his divine daughters, plays on the lyre; Homer sings, and about the inspired blind man is gathered his ideal family: Virgil leading Dante, Petrarch conversing below with Anacreon, Alcæus, and the wonderful Sappho. Thus on the poetic mount beside the source of Helicon the dream of Humanism is fulfilled in the joy of living and intellectual pleasures. The whole code of classic art is formulated in these unrivalled pictures. In them beauty, nobility of posture, purity and grace of form, the sense of rhythm and life—all combine to form one joyous whole. The serenity of Greek art is recovered without effort, and the noblest harmony is the result. It is the most complete ex-

pression of the magnificent ideal which for a time was believed realizable in the Church and which was called Humanism.

The decoration of the second Chamber or Stanza of Heliodorus is quite different. The pope was not one to be satisfied for long with impersonal allegories. He was eager for glory and greatness and his own apotheosis or rather the papacy personified by Julius II, forms the subject of the new chamber. His portrait was to appear on all sides, and in fact it is found in two out of every four of these frescoes. They were begun in 1511 and completed in 1514 under Leo X, whose countenance appears in the last fresco, "St. Leo halting Attila". This picture, which was done by pupils, shows, despite the beauty of the picturesque idea, inferior execution. The "Deliverance of St. Peter", with its night effects, its various lights (the moon, torches, and the nimbus or radiance of the angel) is one of the most famous but not the most beautiful or purest of the artist's works. But the frescoes of the other two walls, "The Expulsion of Heliodorus from the Temple" and the "Mass of Bolsena" are among his finest creations. The "Heliodorus" (an obvious allusion to the despoilers of the Papal States and the war-cry of Julius II, "*Fuori i barbari!*") is a splendid work of dramatic art wherein everything is simultaneously composed and expressed with startling clearness and energy. The "Mass of Bolsena" is perhaps still more beautiful. Raphael never produced a richer or more profound composition; never was he more picturesque and noble, more dramatic and strong. Furthermore, as regards colouring, it is impossible to imagine anything more beautiful than the portrait of the pope or the Swiss Guard grouped kneeling at his feet. In this instance the always-impressionable artist was influenced by the Venetian, Sebastiano del Piombo. With his usual genius and rapidity of assimilation he added the Venetian palette to his art.

Julius II died on 21 Feb., 1513. His successor, Leo X, lost no time in restoring or assuring to Raphael all his commissions and duties. But the work in the Chambers was almost neglected. In the third in point of time Raphael painted only one fresco, the "Incendio del Borgo" (1514). The other three are all by his pupils and are very poor. The "Incendio" itself is one of his least happy and personal works. Michelangelo had just uncovered the ceiling of the Sistine Chapel, and this masterpiece was obviously in Raphael's thoughts. He sought only to assemble nude bodies in sculptural attitudes. Though it displayed more skill and beauty in detail, it repeated the mistake made six years previous in the "Entombment". The entire fourth Chamber, that of Constantine, was painted after the death of Raphael, under the direction of Giulio Romano, and it is very difficult to state precisely what remains of the spirit and original ideas of Raphael.

The frescoes of the Hall of Constantine were painted to convey the impression of immense tapestries. Tapestries were the fashion, after Raphael, by command of Leo X, had painted the cartoons for the "Acts of the Apostles" which were to be copied in the studio of Pieter van Aelst at Brussels. Ordered in 1514, the hanging, composed of ten pieces, was suspended on the walls of the Vatican in 1519. Stolen in 1527 during the sack of Rome, these tapestries were not restored to the Vatican till 1808, and then in a ruined condition. Seven of the original cartoons, discovered by Rubens at Brussels in 1630, are now preserved at the South Kensington Museum in London. This work de luxe, woven of threads of silk and gold, is the most robust and easily intelligible of all Raphael's productions. In it is found after an interval of a century the epic inspiration of Masaccio. Many of the details are textual reminiscences of the frescoes of the Carmine. At the same time

Raphael's genius rarely manifested itself so freely or with such happiness in so beautiful a story. This happiness, the joy of creating, ease, and fertility are the beneficent characteristics of all the later works of Raphael's life. It is evident that the artist profoundly enjoyed the beauty of his inventions and the feeling is communicated to the spectator, lifting him above himself. Once more antiquity and Christianity, the profane and the sacred, were mingled but in a new and properly "historic" form. To revive the Temple with its twisted columns (two of which are preserved at St. Peter's and which Bernini imitated in the *baldacchino* in the following century), to reproduce according to a bas-relief a scene of sacrifice (Sacrifice of Lystra) to imagine an *agora*, a sort of Athenian forum, surrounded by porticoes and temples in which all antiquity lived again, and to set in this scene the "Preaching of St. Paul" was to Raphael an uninterrupted pleasure.

Such works have remained the unsurpassable models of historic composition, each of them begetting for more than two centuries a lengthy posterity and stirring many echoes in art. The "Death of Ananias" inaugurated the series of lurid miracles. Without such examples as the "Sacrifice of Lystra" and the "Preaching of St. Paul" Poussin's art would hardly be understood. The "Conversion of St. Paul" is a marvel of noble and luminous composition in a subject which seventeenth-century art often treated with vulgarity. But the finest examples of this splendid series

are the first two scenes which form the evangelical prelude or prologue to the "Acts"; the "Calling of the Apostles" and the "Pasce Oves" are works in which the Umbrian soul, the serene and poetic sensibility of Raphael could not be surpassed. Here the artist has given us the true colour of things, the pastoral charm and original atmosphere of the preaching of Christ. The idyllic and confident sense of life as it is expressed in the catacombs or on the tomb of Galla Placidia, in the type of the Good Shepherd, the moral perfume so long vanished or evaporated were successfully revived by the wonderful divination and tact of a great artist. Raphael's genius would seem to have been bestowed by Providence to restore lost feelings to Christianity.

This same poetry as of a higher kind of eclogue characterizes the second of the great works undertaken by Raphael at the command of Leo X, the decoration of the Loggia, known as the Loggia of the Vatican. This was a story added by Raphael to the two stories of the façade built by Bramante. It comprised three arcades and as many little cupolas, each of which received four small pictures. In the decoration of this gallery Raphael's idea was to rival the *Thermae* of Titus, the recent discovery of which had stirred artistic and literary Rome. The walls were covered with charming stuccoes by John of Udine; trellises painted so as to deceive the eye framed the pictures on the vaulted ceilings. Nothing equals the gaiety and grace of this aerial portico, flooded with sunlight and completed by the horizon

of the Roman Campagna. The ceiling was painted from 1513 to 1519, but Raphael had not time to make it his own handiwork, executing only the designs, and those of the last three cupolas are not at all worthy of him. Here he delineates sacred history from the Creation to the Last Supper. The first "scenes" illustrate the same subject from Genesis which Michelangelo had just painted on the ceiling of the Sistine Chapel. But Raphael does not outshine his rival, being only *spirituel* and charming where the latter is magnificent. In the succeeding compositions often occurs a reflection of the lovely pictures which Pietro Cavallini had painted about 1280 in the basilica of S. Lorenzo, reproduced in a MS. of the Vatican still extant. But the pastoral scenes are wholly original with Raphael, especially those in which landscape figures largely. Nothing could be more nobly graceful than the "Angels received by Abraham", the "Meeting of Jacob and Rachel", or "Moses saved from the waters". "Raphael's Bible", as it is often called, is a series of epic miniatures, the clearness of interpretation of which rivals their simplicity, perfect equilibrium of arrangement, charm of motifs, and grace of style.

But the service of Leo X did not stop here. The artist had to respond to the most unforeseen whims; now it was the decoration of the theatre which he had to plan, again his holiness desired the life-size portrait of an elephant and again there were the baths of Cardinal Bibbiena to be decorated.

But neither

CARDINAL BEMBO'S ELEGIAC COUPLET
Ille est hic Raphael timuit quo sospite vinci
Rerum magna parens et moriente mori

these nor many other tasks exhausted the activity of Raphael. In 1512 the desire to compete with Michelangelo caused him to consent to paint at S. Agostino for the Luxemburger John Göriz a figure of Isaias which is almost a plagiarism, and in 1514 for the Sienese banker, Agostino Chigi, the four celebrated "Sibyls" of S. Maria della Pace. By their divine elegance the latter recall the sublime qualities of the *Camera della Segnatura*. For Chigi were also painted in 1516 the cartoons for the mosaics which were to adorn Santa Maria della Popolo, his funeral chapel, but only the figures of God the Father and the planets were finished. Finally this Mæcenas conceived the ostentatious idea of having the pope's favourite painter decorate the villa which he was building in the Trastevere and which in the seventeenth century was called the Farnesina. This delightful summer palace, one of Peruzzi's most charming creations, is a perfect type of a country house, a patrician dwelling of the Renaissance period, and was decorated by the most popular masters of the age. Sodoma decorated the first story with subjects from the "Marriage of Alexander" which form an heroic and voluptuous epithalamium. Raphael had to decorate the large gallery on the ground floor. The first fresco was the "Triumph of Galatea". Raphael took as his theme the celebrated verses from Politian's "Giostra" which had already inspired Botticelli. But what is the mythology of this charming artist beside the resurrection of an immortal and chaste paganism? Zeuxis and Apelles did not do

otherwise. It is curious that Raphael made the purest profession of faith in idealism with regard to this figure of a woman which arouses all the *veneres cupidinesque* of painting. "With regard to the 'Galatea,'" he writes to his friend Castiglione, "I should consider myself a great master if it had only half the merits of which you write. I know that to paint a beautiful woman I should see several and should have you also to assist me in my choice. But as I have few good judges or good models I work according to a certain idea which presents itself to my mind. If this idea possesses any perfection I do not know it, though this is what I endeavour to attain." Plato might recognize himself in these exquisite lines, or they might be a recovered fragment of the "Ion" or "Phædrus".

The "History of Psyche" on the ceiling of the large gallery was painted in 1518 when Raphael, overburdened with work, had no leisure and confided to his pupils, chiefly to Giulio Romano, the task of executing his sketches and designs. His original sketches are marvels, and the composition of the frescoes, despite their rather heavy and vulgar colouring, is calculated to charm an artist's eye. With his spiritually inclined imagination Raphael feigns that the loggia opening on the garden is a large trellis, an arched and vine-covered pergola through which appear in mid-heaven the winged whiteness of the goddesses. Two or three figures fill these azure triangles. These ideal and floating figures are a very festival. But the middle of the pergola is covered with a *velum* formed by a double tapestry which depicts in two scenes the "Entrance of Psyche to Olympus" and the "Marriage of Psyche". Giulio Romano's coarse execution and the still more regrettable retouching of Maratta could not wholly dishonour these incomparable works.

Pictures and portraits of the Roman period.—Together with these vast decorative works Raphael continued to produce as though for pastime works of small size but great importance, for they are the sole means whereby his art could be known outside of Italy, and Raphael become more than a name to the great European public. Moreover, there are many masterpieces among these works of small compass. The Madonnas of the beginning of the Roman period still retain somewhat of the relative timidity of the preceding period. The lovely little "Virgin of the Casa Alba" (St. Petersburg, 1510), the Leonardo-like "Madonna Aldobrandini" (National Gallery), the charming "Madonna of the Veil" of the Louvre (1510), still preserve a remnant of the Florentine grace and simplicity. The "Foligno Madonna", painted in 1511 for Sigismundo Conti after the *Camera della Segnatura*, marks the transition to a new manner. The graceful figure of the Virgin seated amid clouds on a sunlit throne with her Child in her arms recalls the celestial figures of the "Disputa"; the three saints and the donor kneeling below on the earth before the beautiful landscape, the Child with a cartel on which was formerly written the ex-voto, show brilliant and scholarly painting, but perhaps too evident symmetry. The "Virgin of the Fish" (Madrid, 1513), the "Virgin of the Candlesticks" (London, 1514), the "Virgin of the Curtain" (*Madonna della Impannata*, Pitti, 1514) are unfortunately among his pupils' works. There is a coldness, a lack of the artist's personal qualities and peculiar sensibility, which chills works otherwise charming in conception. Execution is a part of art which seems material but which is in reality quite spiritual; through it the artist betrays his emotion, gives us his confidence, and communicates his impressions. The work of another hand always lacks the most valuable qualities of style. Raphael was therefore not sufficiently careful of his reputation when he confided his most original inspirations to his pupils, for they lost in being ex-

pressed by others. The division of labour which has but few inconveniences in decorative works becomes fatal in works of a "lyric" or familiar nature, and which are only valuable in so far as the artist endows them with his personality. It is this which injures or spoils irreparably some of his most famous works, such as the "Spasimo" of Madrid, the "Madonna of the Rose" (or "La Perla") of the same museum, the "St. Michael" of the Louvre, and the "Holy Family" known as that of Francis I (all these belong to the years 1516-18). A thought of Raphael's translated even by such a master as Giulio Romano or Francesco Penni has nevertheless only the value of a shadow or a copy. Translation in such a case too often means betrayal.

Some works of this period are nevertheless by the artist himself and are rightly numbered among his most popular works. The "Madonna of the Chair" (Pitti Palace) is perhaps the best liked by women. No other links so happily the familiar charm of the Florentine period with the maturity of the Roman period. She is only a peasant in the costume of a *contadina* with the national kerchief on her hair, but Raphael never found in such simple materials a more profound and natural combination of forms, such curving lines, such an expressive, enfolding arabesque. The whole of maternal love seems to be enclosed within the perfect circle of this picture. It is the perfection of *genre* pictures, wherein the most ordinary human life reaches its noblest expression, a universal beauty. Art has lived for four centuries on this sublime idea. Though from Giulio Romano to Ingres it has been imitated a thousand times, no one has discovered the secret of its perfection. Among *tableaux de grace* must be mentioned together with the little "Vision of Ezechiel" of the Pitti Palace, the splendid picture of St. Cecilia of Bologna (1515). This canvas, as well as its contemporaries the "Madonna of the Chair" and the "Sistine Madonna", coincides with the appearance of a new model whose portrait we have in the famous "Donna Velata" of the Pitti Palace. It was she who posed for the St. Cecilia as for the Dresden picture. These two pictures, especially the second, occupy a place apart in Raphael's works. Here the artist directly attempts the expression of the supernatural. The Dresden picture is the most beautiful devotional picture in existence. The impression is obtained not only by the idealism of its form, but by the vision-like representation of space, by the scheme of clouds on which the Virgin is upheld, and the solemnity of the drapery. An almost forbidding mystery fills this majestic canvas, truly unequalled in Raphael's work. It would perhaps have had a companion had death not interrupted the "Transfiguration" (Vatican Gallery, 1520). The upper part, which is all Raphael had time to complete, is one of his highest inspirations. In uniting this "glory" with the earthly and agitated scene below, he was confronted with a problem which it required all his genius to solve. The devotion of his pupils, who assumed the task of completing this well-nigh unrealizable task, produced only a cold and confused work.

This is why we often prefer Raphael's portraits, which the taste of those days neglected, to his most talked-of works, his most famous Virgins. It is now the fashion to praise the portrait painter at the expense of the painter of the Madonnas and even of the decorator. It is truly said that in the first two Chambers the beauty of the portraits adds much to the life of the whole. Later, starting with the Chamber of the Incendio, Raphael, doubtless following Michelangelo's example, ceased to introduce portraits into his historical works; he no longer represented individuals, but only the general species. Nevertheless he continued to paint portraits and even here, though he has equals, no one excels him. The half-dozen portraits he has left, the Julius II of the Uffizi, the Leo X of the

Pitti Palace, the portrait of Phædrus Inghirami (Boston, Fenway Court), and that of Castiglione (Louvre) are rivals of the most perfect work of Titian, Velasquez, and Rembrandt. There is no doubt that the original of the splendid "Donna Velata" of the Pitti Palace, who so often inspired him, played a part in his life, but she keeps her secret and no one has ever succeeded in piercing her incognito. It is only certain that she was not the Fornarina, who seems to be an invention of a romance dating only from the end of the eighteenth century. The rather indecent portrait of a woman in the Barberini Palace, which bears on a bracelet the name of Raphael, is the work of Giulio Romano, and the signature is a forgery of the seventeenth century.

Raphael's fame, after three centuries of unclouded splendour, has been violently attacked during the last century. The progress of historical criticism and the discovery of the "Primitives" were the beginning of a reaction as violent as it was unjust. It was asserted that the Renaissance, instead of furthering the progress of art, was a source of decadence. A school was founded bearing the standard of the Pre-Raphaelites. This school, whose herald was John Ruskin, did much good, but without denying it its due, it is time to reject some of its narrow and prejudiced judgments. There is no doubt that Raphael, like other men of genius, had no pupils worthy of him. It would be strange to reproach him with the fact that his art was quite personal to himself. It may be that compared with Leonardo and especially with Michelangelo, Raphael seems less great or less original. He made no discoveries in nature like those of his great rivals, he added nothing to our knowledge of anatomy, of modelling, or construction; he is not a colourist like Titian, nor even a draughtsman in the absolute sense of the word, such as was Dürer or Pollaiuolo. It is probable that Raphael will never recover the singular position ascribed to him in the schools as the faultless master and the professor whose instructions are always to be consulted. On the other hand, he appears more and more the most exquisite and perfect expression of an age and a society which will never return. Nevertheless the fact remains that if there have been rarer or more learned painters than he, he excels them all in his incomparable sense of beauty. No other has shown us so much nobility in nature, no one ever had or led us to form a better opinion of human nature. No other painter handled so completely all the resources of his art. He has never been equalled as a portrait painter and decorator. No one has known so well how to invest the highest and most precious ideas with plastic forms. He has given form to our dreams.

The most comprehensive source of information is the work of MÜNTZ, *Les biographies et les critiques de Raphaël* (Paris, 1883); VASARI, *Le vite*, ed. LOUIS GILLET.

Raphael Society. See EMIGRANT AID SOCIETIES.

Raphoe, DIOCESE OF (RAPOTENSIS), comprises the greater part of the Co. Donegal (Gael. *Tirconail*), in the ecclesiastical Province of Armagh. Raphoe

(Gaelic *Rathboth*, fort of cottages) was the first of St. Columba's Irish foundations to become an episcopal see. The monastery which he founded there in the middle of the sixth century was renovated about the year 700 by Adamnan, who succeeded him in Raphoe as well as in Iona. Though Adamnan died in Iona (704) he spent the last six years of his life in Ireland, and his mother's kindred were the clan that occupied the Raphoe district. It has been suggested that then, though not before, he may have been in episcopal orders with a *sedes* at Raphoe (Cuimhne Coluimille, 12). Be that as it may, for Eunan, who is venerated as first Bishop of Raphoe and so recorded by early Irish writers and the ancient calendars, is no other than Adamnan, whose name has the same pronunciation with Irish speakers. There is no record

HOLY WELL, GLENCOLUMBKILLE

of a break in the line of the Catholic succession in Raphoe. But from the death of Nial O'Boyle in 1610 to the appointment of James O'Gallagher in 1725, owing to the violence of persecution, the diocese was administered by vicars except during the episcopate of John O'Culenan from 1625 to 1661. The sufferings of this prelate are characteristic of the times. He was arrested, taken to Dublin, and twice brought before the viceroy and Privy Council. About 1643 he again fell into the hands of his enemies. Along with some prominent men of his diocese he was besieged by English soldiers and forced to surrender. Though promised quarter, seventy-two of his followers were put to the sword, and the bishop was given a choice between death by drowning and death at the hands of the military. Electing the latter fate he was stripped naked, and as the crossbows and matchlocks failed to discharge against the kneeling victim, pikemen were advancing to dispatch him, when Colonel Sir James Askin arrived upon the scene and prevented the murder, severely rebuking the soldiers. The bishop was then confined for four years in Derry in a dark dungeon where cold, hunger, and thirst were his portion. In the exchange of prisoners after Owen Roe O'Neill's victory at Benburb he regained his liberty in 1647. But when the remnant of the Irish army under Heber MacMahon was defeated near Letterkenny in 1650, O'Culenan's life was once more in daily peril. He made his way out of the country in 1653, and died at Brussels 24 March, 1661. Six brothers, all older than himself, held high offices in the Church. The eldest, Gelasius, a doctor of the Sorbonne and Abbot of Boyle, was imprisoned in Dublin, tortured, and hanged. The next Bishop of Raphoe, whose appointment comes just a hundred years after that of O'Culenan, had also to fly for his life. In 1734 James O'Gallagher escaped capture by mounting a horse in the dead of

night shortly before soldiers came to seize him. He sought refuge on a remote island in an Irish lake and, during a year's concealment there, wrote for publication the Irish sermons which he had been accustomed to deliver to his flock, and which, when printed in 1736, became a powerful reminder of the duties of a Christian life throughout the western half of Ireland at a time of fierce aggression on the Faith. A marked man, he could not show himself again in Raphoe, and he was transferred to Kildare in 1737, where he found it needful to make a secluded spot in the Bog of Allen the centre of his apostolic labours.

Driven out at the Reformation, a Catholic bishop has never since resided at Raphoe. Even before the flight of the earls from Rathmullen (1607) Donald MacCongail, a remarkable prelate, who was present at the Council of Trent in 1563 and at the Ulster provincial council in 1587, seems to have resided most of his time at Killybegs on ground now occupied by structures connected with St. Columba's Marine Industrial School. A remnant of the ancient cathedral church of Raphoe still shows in the chancel of the Protestant cathedral there; but no ruin marks the site of the ancient monastery. It is different with the foundations at Gartan, Glencolumbkille and Kilnacrenan, associated with Columba. More striking to the eye are the remains of the remarkable abbeys founded during the Middle Ages in the Diocese of Raphoe. The Cistercians were at Asaroe, near Ballyshannon, the Carmelites at Rathmullen, the Franciscans in almost every district of Tirconail. The most celebrated of these foundations was the Franciscan Abbey of Donegal under whose shelter, after it was dismantled, the "Annals of the Kingdoms of Ireland" were compiled by the Four Masters (1632-1636). After the plantation of Ulster in the seventeenth century not an acre of good land remained in the hands of a Catholic in Tirconail. To this day some of its confiscated abbey lands yield an annual income of close on £9000 sterling to Trinity College, Dublin.

Dr. Patrick McGettigan (1820-1861) brought the Loreto Sisters into the Diocese of Raphoe (1854); Dr. Daniel McGettigan (1861-1871), afterwards Primate of all Ireland, introduced the Sisters of Mercy (1867), and Dr. James McDevitt (1871-1879) established the Raphoe Diocesan Society (1872); the Presentation Brothers came to Letterkenny in 1894. The year 1901 is an important date in the history of Raphoe; it was then that the ancient cathedral chapter was re-established by Leo XIII and St. Columba declared joint patron with St. Eunan of the diocese and of the new cathedral. In that year also the new cathedral, which together with the bishop's residence is at Letterkenny, was solemnly dedicated. Cardinal Logue, a native and former bishop (1879-1887) of Raphoe, presided, and Archbishop Keane of Dubuque, also a native, preached the dedication sermon. St. Eunan's (Adamnan's) College was begun at Letterkenny on 23 September, 1904, the twelfth centenary of St. Adamnan, and opened in 1906. There are many pilgrimages in Raphoe, the most frequented being Doon Well, Inniskeel, St. Catherine's Well, and Glencolumbkille.

PATRICK O'DONNELL.

Rapin, RENÉ, French Jesuit, b. at Tours, 1621; d. in Paris, 1687. He entered the Society in 1639, taught rhetoric, and wrote extensively both in verse and prose. His first production, "Eclogæ Sacræ" (Paris, 1659), won him the title of the Second The-

ocritus, and his poem on gardens, "Hortorum libri IV" (Paris, 1665), twice translated into English (London, 1673; Cambridge, 1706), placed him among the foremost Latin versifiers. Of his critical essays, the best known are: "Observations sur les poèmes d'Horace et de Virgile" (Paris, 1669); "Réflexions sur l'usage de l'éloquence de ce temps" (Paris, 1672); "Réflexions sur la poésie d'Aristote et sur les ouvrages des poètes anciens et modernes" (Paris, 1676). He is also the author of several theological and ascetic treatises like "De nova doctrina dissertatio seu Evangelium Jansenistarum" (Paris, 1656); "L'esprit du christianisme" (Paris, 1672); "La perfection du christianisme" (Paris, 1673); "La foi des derniers siècles" (Paris, 1679). These books and many other pamphlets were collected in "Œuvres complètes" published at Amsterdam, 1709-10. Rapin's best titles to celebrity are his two posthumous works: "Histoire du jansénisme", edited by Domenech (Paris, 1861), and "Mémoires sur l'église, la société, la cour, la ville et le jansénisme", edited by Aubineau (Paris, 1865). The latter book is the counterpart of the Jansenistic "Mémoires de Godefroi Hermant sur l'histoire ecclésiastique du XVII^e siècle", edited by Gazier (Paris, 1905). Ste-Beuve in his "Port Royal" tries on every occasion to find Rapin at fault, but recent studies on Jansenism show that he is, in the main, reliable.

Rapolla. See MELFI AND RAPOLLA, DIOCESE OF

Raskolniks (Russian *raskolnik*, a schismatic, a dissenter; from *raskol*, schism, splitting; that in turn from *raz*, apart, and *kolot'*, to split; plural, *raskolniki*), a generic term for dissidents from the Established Church in Russia. Under the name *Raskolniki*, the various offshoots and schismatic bodies originating from the Greek Orthodox Church of the Russian Empire have been grouped by Russian historians and ecclesiastical writers. Strictly speaking, the name *Raskolniki* refers merely to those who have kept the outward forms of the Byzantine Rite; the others who have deserted its ritual as well as its teachings are grouped under the general Russian name of *Sektanstvo* (sectarianism). In the present article they are both treated together, since either form of dissent is but slightly known outside of Russia. The *Raskolniks* represent in the Russian Church somewhat the antithesis of Protestantism towards the Catholic Church. Protestants left the Church because they claimed a desire to reform it by dropping dogmas, beliefs, and rites; the *Raskolniks* left the Russian Church because they desired to keep alive the minutest rites and practices to which they were accustomed, and objected to the Russian Church reforming them in any respect. In doing so they fell into the greatest of inconsistencies, and a section of them, while keeping up the minutiae of ritual, rejected nearly every doctrine the Church taught throughout the world.

I. TRUE RASKOLNIKS.—Even from the time that the Russians were converted to Christianity there were various dissident sects among them, reproducing in some respects the almost forgotten heresies of the early ages of the Church. These are mere names today, but the main separation from the Russian Established Church came in 1654 when Nikon, Patriarch of Moscow, convened a synod at Moscow for the reform of the ritual and correction of the church books. At the time the air in Southern Russia was filled with the idea of union with Rome, in Central and Northern Russia there was the fear of the Polish invasion and the turning to Latin customs. When Nikon corrected

the Church service books, into which many errors had crept by careless copying, and conformed them with the original Greek text, great complaint was expressed that he was departing from old Slavonic hallowed words, and was making cause with the stranger outside of Russia. When he undertook to change the style of popular forms and ceremonies, such as the sign of the cross, the spelling and pronunciation of "Jesus", shaving the beard, or to differ in the number of Alleluias before the Gospel, he aroused popular resentment, which rose until there came an open break in which every point he proposed was rejected. Afterwards when Peter the Great came to the throne (1689-1725) and introduced western customs, abolished the Patriarchate of Moscow, substituted the Holy Synod and made himself the head of Church authority, changed the forms of the ancient Russo-Slavonic letters, and set on foot a host of new things in Church and State, the followers of the old order of things publicly condemned him as the Antichrist and renounced the State Church for ever, while clinging to the older forms of their fathers. But both Nikon and Peter had the whole Russian episcopate with them as well as the great majority of the Russian clergy and people. The dissenters who thus separated from the established Greco-Russian Orthodox Church became also known as *Starobriadtsi* (old Ritualists) and *Starovierts* (old Believers), in allusion to their adherence to the forms and teaching prevailing before Nikon's reforms.

As none of the Russian bishops seceded from the Established Church the Raskolniks therefore had but an incomplete form of Church. Of course a number of priests and deacons adhered to them, but as they had no bishops they could not provide new members of the clergy. Soon death began to thin the ranks of their clergy and it became apparent that within a brief period they would be left without any priesthood whatever. Then some of their leaders began to deny that a priesthood was necessary at all. This led to the splitting of the Raskolniks into two distinct branches: the *Popovtsi* (Priestly, i. e. "Pope"-ly), who insisted on the hierarchy and priesthood, and the *Bezpopovtsi* (Priestless, i. e. without "Popes"), who denied the necessity of any clergy whatever. The latter, however, accepted their ministrations. The fortunes of these two denominations or sects were quite different. The former grew to great importance in Russia, and are now said to have between thirteen and fifteen millions of adherents. The latter subdivided again and again into smaller sects, and are said to number between three and four millions, all included. They will be taken up separately.

Popovtsi or Hierarchical Raskolniks.—At first these renewed their clergy by taking over dissatisfied or dismissed priests from the established Orthodox Church, after having them take an oath against all the reforms instituted by Nikon and Peter; but this method was hardly satisfactory, for in most cases the material thus obtained was of a low moral grade. They believed that the whole Russian episcopate had gone over to Antichrist, but still were valid bishops, and hence endeavoured to have priests ordained by them, but in vain. They searched the Eastern world for a bishop who held their peculiar ideas, and it seemed almost as though they must eventually change for lack of clergy, when chance aided them. A community of *Popovtsi* monks had settled at Bielo-krinitsa (White Fountain) in Bukowina. Ambrose (1791-1863), a Greek monk, was appointed Bishop of Sarajevo in Bosnia, and was consecrated by the Patriarch of Constantinople. Subsequently a later patriarch deposed him, and when his resentful feelings against the Constantinople authorities were at their height, the Raskolniks approached him with the request to become their bishop. On 16 April, 1846,

Ambrose agreed to go over to their faith and adopt all the ancient practices, consecrate other bishops for them, and become their metropolitan or archbishop. On 27 October, 1846, he was solemnly received in the monastery of Bielo-krinitsa, took the necessary oaths, celebrated pontifical Mass and assumed episcopal jurisdiction. Bielo-krinitsa is only a few miles from the Russian border, and a hierarchy was soon brought into being for Russia. After bishops were consecrated for Austria and Turkey, bishops were consecrated and installed in Russia. The Russian Government could not crush the head of the Raskol Church, for it was in Austria. The *Popovtsi* grew by leaps and bounds, commenced to provide for a regular educated clergy and vied with the Established Church. At present they have, since the decree of toleration in 1905, a well-established hierarchy in Russia, with a metropolitan at Moscow, and bishops at Saratoff, Perm, Kazan, Caucasus, Samara, Kolomea, Nijni-Novgorod, Smolensk, Vyatka, and Kaluga.

Their chief stronghold is the Rogozhsky quarter in Moscow, where they have their great cemetery, monastery, cathedral, church, and chapels. In 1863, at the time of the Polish insurrection the Raskolnik archbishop and his lay advisers sent out an encyclical letter to the "Holy Catholic Apostolic Church of the Old Believers", supporting the tsar and declaring that on all main points they were in agreement with the Established Church. This again split their Church into two factions which last to this day: the *Okruzhniki* or Encyclicalists and the *Razdorniki* or Controversialists, who denied the points of agreement with the national Church. In addition to this the Established Church has now set up a section of these Raskolniks in union with it, but has permitted them to keep all their peculiar practices, and these are called the *Yedinovertsi* or "Uniates". A great many of the controversial section of the Raskolniks are coming into the Catholic Church, and already some eight or ten priests have been received.

Bezpopovtsi, or the *Priestless*, seemed to represent the despairing side of the schism. They have their great stronghold in the Preobrazhenky quarter in Moscow, and are strong also in the Government of Archangel. They took the view that Satan had so far conquered and throttled the Church that the clergy had gone wrong and had become his servants, that the sacraments, except baptism, were withdrawn from the laity, and that they were left leaderless. They claimed the right of free interpretation of the Scriptures, and modelling their lives accordingly. They recognize no ministers save their "readers" who are elected. Lest this be said to duplicate Protestantism, one must remember that they have kept up all the Orthodox forms of service as far as possible, crossings, bowings, icons, candles, fastings, and the like, and have regularly maintained monasteries with their monks and nuns. But they had no element of stability; and their sects have become innumerable, ever shifting and varying, with incessant divisions and subdivisions. The chief of the subdivisions are: (1) *Pomorts*; or dwellers near the sea, a rural division which is very devout; (2) *Feodocei* (Theodosians) who founded hospitals and laid emphasis on good works; (3) *Bezbrachniki* (free lovers) who repudiated marriage, somewhat like the Oneida community in New York; (4) *Stranniki* (wanderers) a peripatetic sect, who went over the country, declaring their doctrines; (5) *Molchalniki* (mutes), who seldom spoke, believing evil came through the tongue and idle conversation; and (6) *Niemoliaki* (non-praying), who taught that as God knows all things it is useless to pray to him, as He knows what one needs. These various divisions of the Priestless are again divided into smaller ones, like many of the strange sects in England and America, so that it is almost impossible to follow them. Often they indulge in the wildest immorality, justify-

ing it under the cover of some distorted text of Scripture or some phrase of the ancient Church service.

II. SECTARIANS.—The various bodies which make up the *Sektanstvo* have seceded from the national Russian Church quite independently of the schism at the time of Nikon and the reform in the Church books. They correspond more closely with the various sects arising from Protestantism, and are founded upon some distorted idea of the Church, or a rule of life or doctrines of the Faith. Some of them are older than the schism, but most of them are later in point of time. The principal ones comprise between one and two millions and may be subdivided or classified as follows: (1) *Khlysti* (Flagellants), who believe in severe penances, reject the Church, its sacraments and usages. They are also called the *Ludi Bozhi*, or "God's People", and also the "Farmazoni" (Free-masons) on account of the secret initiations they have. They hold secret meetings in which they sing wild, stirring hymns, dress in white, and jump, dance, or whirl, much like the negro revivals in the Southern States.

(2) *Skoptsi* (Eunuchs) who not only teach absolute celibacy, but mutilate themselves so as to be sexless. They boast that they are pure like the saints and walk untainted through this world of sin, and take the literal view of Matt., xix, 12. Women are also mutilated, particularly after they have borne children to recruit the sect, but these children are not born in wedlock. The *Skoptsi* are said to be usurers and money changers.

(3) *Molokani* (Milk-drinkers) said to be so named because they make it a point to drink milk and use other prohibited foods during Lent and fast days, to show their objection to the Orthodox Church. They abhor all external ceremonies of religion, but lay stress upon the Bible. They say there is no teacher of the Faith but Christ himself, and that we are all priests; and they carry their logic so far as to have neither church nor chapel, simply meeting in one another's houses.

(4) *Dukhobors* (Spirit wrestlers) are those who deny the Holy Ghost and who place but a minor importance upon the Scriptures. They are better known to America, for some thousands of them emigrated to Canada, where they are now good colonists. They give a wide place to tradition, and designate man as "the living book", in opposition to dead books of paper and ink. In some respects they are pantheists, saying that God lies within us, that we must struggle with the spirit of God to attain the fulness of life. They do not give an historical reality to the Gospel narratives, but take them figuratively. Their idea of the Church is in conformity with their belief; they consider it an assembly of the righteous on earth, whether Christians, Jews, or Moslems. Yet they have all the peculiarities and fanaticism of the Slav.

(5) *Stundists*, or a kind of Russian Baptists. These seem to be an offshoot from the Lutherans or Mennonites who settled in Russia. The name is derived from the German *Stunde* or hour, because they assembled at stated hours to read the Bible or worship. They rejected the sacraments, even baptism at first, but yet retain it. They gave up all Church holidays, and agreed with the *Melokani* in repudiating the idea of a clergy. They are nearly all Little Russians, in the South of Russia.

(6) *Subbotniki* (Sabbatarians), who have substituted Saturday, the Jewish Sabbath, for Sunday. They have also taken up a great many Jewish practices from the Old Testament along with such elemental Christian forms which they retain. They are practically Unitarians, and expect the Messias; and they are also said to be like the Mormons, living in polygamy in many instances, although most of them are content with one wife. Besides these principal sects there are numerous smaller ones. One can run almost the same round of strange and

erratic religious beliefs in Russia as in the United States. There are the *Pliassuny* (Dancers), *Samobogi* (Self-gods), *Chislenniki* (Computers), who have changed Sunday so as to fall on Wednesday, and Easter to the middle of the week, *Pashkovites*, *Radstockites* (so named after their founders), and numerous others, which exploit some peculiar tenet of their various founders and believers. In addition to these are the various missionary enterprises and local churches of Western Protestantism, of which the Lutherans and Baptists are the leading ones.

ANDREW J. SHIPMAN.

Räss, ANDREAS, Bishop of Strasburg, b. at Sigolsheim in upper Alsace, 6 April, 1794; d. at Strasburg, 17 November, 1887. After receiving his classical training at Schlettstadt and Nancy, Räss studied philosophy and theology at the seminary at Mainz under Liebermann and was ordained priest in 1816. At first he was a teacher in the seminary for boys at Mainz. In 1822 he received the degree of doctor from the theological faculty of Würzburg. When Liebermann left Mainz for Strasburg Räss was made, in 1825, director of the seminary at Mainz and professor of dogmatics at the same place. After failing to be elected Bishop of Mainz in 1828, on account of the opposition of the Hessian Government, he had charge for a short time of the theological seminary at Molsheim; in 1829 he became superior of the seminary for priests at Strasburg and professor of dogmatics, theology, and homiletics. On 5 August, 1840, he was made coadjutor Bishop of Strasburg with the right of succession, and was consecrated on 14 February, 1841. In 1842 he became Bishop of Strasburg. As bishop he devoted himself particularly to the training of the clergy and the extension of religious societies. He was one of the most determined defenders of Papal Infallibility at the Vatican Council. His declaration in 1874 in the German Reichstag that the Treaty of Frankfort was recognized by the Catholics of Alsace and Lorraine did much to shatter the great popularity he had until then enjoyed among his fellow-countrymen of Alsace.

In his earlier years, before he was raised to the episcopate, Räss showed great and very creditable activity as an author. One undertaking which is much to his honour is the founding, with Nicholas Weis, of the "Katholik" at Mainz in 1821. In the years 1819–39, also with the aid of Weis, he published a large number of works, chiefly translations and revisions of French and English originals. Among the most important of these are Alban Butler's "Leben der Väter und Märtyrer" (20 vols., Mainz, 1823–26; 2nd ed., 23 vols., 1838–40); a brief summary of this work: "Leben der Heiligen Gottes" (4 vols., Mainz, 1826—); later, completely revised by J. Holzwarth (2 vols., Mainz, 1854—); 13th ed. (1903); another was the "Bibliothek der katholischen Kanzelberedsamkeit" (18 vols., Frankfort, 1829–36). Räss also brought about the German translation of the "Annalen der Verbreitung des Glaubens", which he edited, and in this way did much to promote the interest in missions to the heathen. During his episcopate Räss published his well-known and most important work: "Die Convertiten seit der Reformation nach ihrem Leben und aus ihren Schriften dargestellt" (13 vols. and index, Freiburg, 1866–80).

BERNHARD (pseudonym for GUERBER), *Andreas Räss, Bischof von Strassburg* (Würzburg, 1873) in the series "Deutschlands Episcopat in Lebensbildern", I, pt. IV; RÄSS, *Mgr A. Räss, évêque de Strassbourg*, biographical notice in *Revue catholique d'Alsace*, new series, XXI (1901), sqq.; RÄSS, *André Räss, l'œuvre de la propagation de la foi* (Rixheim, Strasburg, 1902).

FRIEDRICH LAUCHERT.

Rathborne, JOSEPH, priest and controversialist (sometimes erroneously called RATHBONE), b. at Lincoln, 11 May, 1807; d. at Cowes, 12 August, 1842. He was educated at Ushaw (1813-22), and St. Edmund's, Old Hall (1823-30), where he was ordained 18 Feb., 1830. In November he was appointed by Bishop Bramston to the mission at Cowes, where the rest of his life was spent. He published "Letters of Alethphilos" (1839), which dealt with a local controversy about prayers for the dead. Under the same pseudonym he published a series of other pamphlets, "Good Friday and Easter Sunday" (1839); "Letters to the Protestants of the Isle of Wight on the Catholic Religion" (1839); "A Reply to the Reverend Barnabas Rodriguez Almeda" (1840); "A Letter to Dr. Adams, shewing Purgatory inseparably connected with Prayers for the Dead" (1840); "Are the Puseyites sincere?" (1841); and "The Church in its Relations with Truth and the State"—a reply to Mr. Gladstone (1841). Under his own name he published "The Clergy of the French Revolution", an obituary sermon on the Rev. Dr. de Grenthe.

Tablet, III, 423, 455, 583; DAVIES, *History of Cowes Mission* (Cowes, 1897); GILLOW, *Bibl. Dict. Eng. Cath.*, s. v. Rathbone.

EDWIN BURTON.

Ratherius of Verona, b. about 887; d. at Namur 25 April, 974. He belonged to a noble family which lived in the territory of Liège. While still a boy he was sent as an oblate to the Benedictine Abbey of Lobbes in the Hennegau, where he was a diligent student, acquired much learning, and became a monk of the abbey. At an early age he displayed a restless nature, a disposition difficult to get along with, great ambition, and a zeal that was harsh. Consequently, notwithstanding his strict orthodoxy, his wide learning, and sobriety of conduct, he met with great difficulties in every position he assumed, and nowhere attained permanent success. His entire life was a wandering one and not in reality fruitful. When Abbot Hilduin of Lobbes went in 926 to Italy, where his cousin, Hugo of Provence, was king, he took Ratherius with him as companion. After many difficulties Ratherius received from the king the Diocese of Verona in 931. Yet he only ruled his see for two years. He soon fell into a quarrel with both the members of his diocese and with the king, so that the latter sent him to prison and had him brought to Como. In 939 he escaped from Como into Provence, where he was tutor in a noble family until he returned to the Abbey of Lobbes in 944. In 946 he went again to Italy and, after he had been held for some time as a prisoner by Berengar, the opponent of King Hugo, he obtained once more the Diocese of Verona. The difficulties that arose were again so great that after two years he fled to Germany and for some time wandered restlessly about the country. He took part in the Italian expedition of Ludolph of Swabia, the son of Otto I, but was not able to regain his diocese, and in 952 returned to Lobbes. From Lobbes he was called to the cathedral school of Cologne by Archbishop Bruno of Cologne, who soon afterwards, in 953, gave Ratherius the Diocese of Liège. However, as early as 955, a revolt of the nobility against him obliged Ratherius to leave this see, and he now retired to the Abbey of Aulne. In 962 the Emperor Otto restored to him the Diocese of Verona, but after seven years of constant quarrels and difficulties he was obliged once more to withdraw. In 968 he went to Lobbes, where he incited such opposition against the Abbot Folwin that Bishop Notker of Liège restored order by force, and in 972 sent Ratherius to the Abbey of Aulne, where he remained until his death.

His writings are as unsystematic as his life was changeable and tumultuous. While his style is confused and lacks clearness, his writings generally had reference to particular occasions and were pamphlets

and invectives against his contemporaries. He also wrote complaints against himself in his own affairs. Among his writings should be mentioned: "Præloquia", in six books, a criticism of all the social ranks of the period; "Conclusio deliberativa", and "Phrenesis", both in defence of his right to the Diocese of Liège; "Dialogus confessionum" and "Qualitatis conjunctura", reckless self-accusation; "De contemptu canonum", "Synodica", "Discordia inter ipsum et clericos", and "Liber apologeticus", against the ecclesiastics of his era and in defence of himself. Some of his sermons and letters have also been preserved. The writings throw much light upon his era. His works were edited by the brothers Ballerini (Verona, 1765); also in "P. L.", CXXXVI. Unedited letters are to be found in "Studie documenti di storia e diritto" (1903), 51-72.

HURTER, *Nomenclator* (3rd. ed., Innsbruck, 1903), I, 901-06; VOGEL, *Ratherius von Verona und das X. Jahrhundert* (2 vols. Jena, 1854); HAUCK, *Kirchengesch. Deutschlands*. III (Leipzig, 1896), 285 sqq.

J. P. KIRSCH.

Rationale, an episcopal humeral, a counterpart of the pallium, and like it worn over the chasuble. At the present time it is only used by the Bishops of Eichstätt, Paderborn, Toul, and Cracow. As worn by the Bishops of Eichstätt, Paderborn, and Toul, the rationale is in the form of a humeral collar, ornamented in the front and back with appendages. The one used by the Bishop of Cracow is made of two bands crossing the shoulder and joined at the breast and at the back, having the appearance of a discoid connected by medallions. During the Middle Ages the use of the rationale was affected by a number of German bishops, e. g. the Bishops of Würzburg, Ratisbon, Eichstätt, Naumburg, Halberstadt, Paderborn, Minden, Speier, Metz, Augsburg, Prague, Olmutz, and by the Bishops of Liège and Toul, whose dioceses at that time belonged to the German Empire. There is no account of this rationale being worn by any other bishops except a few in territories adjoining that of Germany (Cracow, Aquileia). Of the above-mentioned bishops many only used it temporarily. The earliest mention of the rationale dates from the second half of the tenth century. The earliest representations are two pictures of Bishop Sigebert of Minden (1022-36), a miniature and an ivory tablet, which were both incorporated in a Mass Ordo belonging to Bishop Sigebert. The form of the rationale during the Middle Ages was manifold. Besides the two forms which have survived to our time, there were two other types, one closely resembling a Y-form pallium, the other like a T-form pallium, with the difference that instead of being striped vertically, it was simply tasselled in front and at the back. There were no rules governing the ornamentation of the rationale, as is clearly seen by representations of it on monuments, and by such rationales as have been preserved (Bamberg, Ratisbon, Eichstätt, Paderborn, Munich). The edges were generally adorned with small bells.

The Rationale is an imitation and an equivalent of the pallium. That this is the case is evident, apart from other papal Bulls, from the Bull of John XIX (1027), conferring on the Patriarch Poppo of Aquileia the pallium and the rationale at the same time, with the condition that he could only wear the pallium on high festivals. It appears, however, that the humeral ornaments of the Jewish high-priests (ephod, etc.) were not without influence in evoking this pontifical adornment, as may be seen from the original rationales preserved at Bamberg and Ratisbon. The name at least is derived from the appellation of the breast ornament of the high-priest Aaron.

From the tenth to the thirteenth century the rationale was also the name of an episcopal ornament similar to a large pectoral clasp, made of precious metal,

ornamented with diamonds, and worn over the chasuble. It is frequently met with in pictures of the twelfth and thirteenth centuries, and is generally square, seldom round in form. Its use was discontinued in the course of the thirteenth century, and it is only at Reims that its use can be traced to the beginning of the sixteenth century. It originated undoubtedly in the pomp developed in episcopal vestments during the tenth century, and took its name from the breast ornament of the Jewish high-priest.

BRAUN, *Die liturgische Gewandung im Occident und Orient* (Freiburg, 1907).

JOSEPH BRAUN.

Rationalism (Latin, *ratio*=reason, the faculty of the mind which forms the ground of calculation, i.e. discursive reason. See APOLOGETICS; ATHEISM; BIBLE; DEISM; EMPIRICISM; ETHICS; EXEGESIS, BIBLICAL; FAITH; MATERIALISM; MIRACLE; REVELATION). The term is used: (1) in an exact sense, to designate a particular moment in the development of Protestant thought in Germany; (2) in a broader, and more usual, sense to cover the view (in relation to which many schools may be classed as rationalistic) that the human reason, or understanding, is the sole source and final test of all truth. It has further: (3) occasionally been applied to the method of treating revealed truth theologically, by casting it into a reasoned form, and employing philosophical categories in its elaboration. These three uses of the term will be discussed in the present article.

(1) The German school of theological Rationalism formed a part of the more general movement of the eighteenth-century "Enlightenment". It may be said to owe its immediate origin to the philosophical system of Christian Wolff (1679-1754), which was a modification, with Aristotelean features, of that of Leibniz, especially characterized by its spiritualism, determinism, and dogmatism. This philosophy and its method exerted a profound influence upon contemporaneous German religious thought, providing it with a rationalistic point of view in theology and exegesis. German philosophy in the eighteenth century was, as a whole, tributary to Leibniz, whose "Théodicée" was written principally against the Rationalism of Bayle: it was marked by an infiltration of English Deism and French Materialism, to which the Rationalism at present considered had great affinity, and towards which it progressively developed; and it was vulgarized by its union with popular literature. Wolff himself was expelled from his chair at the University of Halle on account of the Rationalistic nature of his teaching, principally owing to the action of Lange (1670-1774; cf. "*Causa Dei et religionis naturalis adversus atheismum*", and "*Modesta Disputatio*", Halle, 1723). Retiring to Marburg, he taught there until 1740, when he was recalled to Halle by Frederick II. Wolff's attempt to demonstrate natural religion rationally was in no sense an attack upon revelation. As a "supranaturalist" he admitted truths above reason, and he attempted to support by reason the supernatural truths contained in Holy Scripture. But his attempt, while it incensed the pietistic school and was readily welcomed by the more liberal and moderate among the orthodox Lutherans, in reality turned out to be strongly in favour of the Naturalism that he wished to condemn. Natural religion, he asserted, is demonstrable; revealed religion is to be found in the Bible alone. But in his method of proof of the authority of Scripture recourse was had to reason, and thus the human mind became, logically, the ultimate arbiter in the case of both. Supranaturalism in theology, which it was Wolff's intention to uphold, proved incompatible with such a philosophical position, and Rationalism took its place. This, however, is to be distinguished from pure Naturalism, to which it led, but with which it never became theoretically identified. Revelation was not

denied by the Rationalists; though, as a matter of fact, if not of theory, it was quietly suppressed by the claim, with its ever-increasing application, that reason is the competent judge of all truth. Naturalists, on the other hand, denied the fact of revelation. As with Deism and Materialism, the German Rationalism invaded the department of Biblical exegesis. Here a destructive criticism, very similar to that of the Deists, was levelled against the miracles recorded in, and the authenticity of the Holy Scriptures. Nevertheless, the distinction between Rationalism and Naturalism still obtained. The great Biblical critic Semler (1725-91), who is one of the principal representatives of the school, was a strong opponent of the latter; in company with Teller (1734-1804) and others he endeavoured to show that the records of the Bible have no more than a local and temporary character, thus attempting to safeguard the deeper revelation, while sacrificing to the critics its superficial vehicle. He makes the distinction between theology and religion (by which he signifies ethics).

The distinction made between natural and revealed religion necessitated a closer definition of the latter. For Supernaturalists and Rationalists alike religion was held to be "a way of knowing and worshipping the Deity", but consisting chiefly, for the Rationalists, in the observance of God's law. This identification of religion with morals, which at the time was utilitarian in character (see UTILITARIANISM), led to further developments in the conceptions of the nature of religion, the meaning of revelation, and the value of the Bible as a collection of inspired writings. The earlier orthodox Protestant view of religion as a body of truths published and taught by God to man in revelation was in process of disintegration. In Semler's distinction between religion (ethics) on the one hand and theology on the other, with Herder's similar separation of religion from theological opinions and religious usages, the cause of the Christian religion, as they conceived it, seemed to be put beyond the reach of the shock of criticism, which, by destroying the foundations upon which it claimed to rest, had gone so far to discredit the older form of Lutheranism. Kant's (1724-1804) criticism of the reason, however, formed a turning-point in the development of Rationalism. For a full understanding of his attitude, the reader must be acquainted with the nature of his pietistic upbringing and later scientific and philosophical formation in the Leibniz-Wolff school of thought (see KANT, PHILOSOPHY OF). As far as concerns the point that occupies us at present, Kant was a Rationalist. For him religion was coextensive, with natural, though not utilitarian, morals. When he met with the criticisms of Hume and undertook his famous "*Kritik*", his preoccupation was to safeguard his religious opinions, his rigorous morality, from the danger of criticism. This he did, not by means of the old Rationalism, but by throwing discredit upon metaphysics. The accepted proofs of the existence of God, immortality, and liberty were thus, in his opinion, overthrown, and the well-known set of postulates of the "categorical imperative" put forward in their place. This, obviously, was the end of Rationalism in its earlier form, in which the fundamental truths of religion were set out as demonstrable by reason. But, despite the shifting of the burden of religion from the *pure* to the *practical* reason, Kant himself never seems to have reached the view—to which all his work pointed—that religion is not mere ethics, "conceiving moral laws as divine commands", no matter how far removed from Utilitarianism—not an affair of the mind, but of the heart and will; and that revelation does not reach man by way of an exterior promulgation, but consists in a personal adaptation towards God. This conception was reached gradually with the advance of the theory that man possesses a religious sense, or faculty, distinct from

the rational (Fries, 1773-1843; Jacobi, 1743-1819; Herder, 1744-1803;—all opposed to the Intellectualism of Kant), and ultimately found expression with Schleiermacher (1768-1834), for whom religion is to be found neither in knowledge nor in action, but in a peculiar attitude of mind which consists in the consciousness of absolute dependence upon God. Here the older distinction between natural and revealed religion disappears. All that can be called religion—the consciousness of dependence—is at the same time revelational, and all religion is of the same character. There is no special revelation in the older Protestant (the Catholic) sense, but merely this attitude of dependence brought into being in the individual by the teaching of various great personalities who, from time to time, have manifested an extraordinary sense of the religious. Schleiermacher was a contemporary of Fichte, Schelling, and Hegel, whose philosophical speculations had influence, with his own, in ultimately subverting Rationalism as here dealt with. The movement may be said to have ended with him—in the opinion of Teller “the greatest theologian that the Protestant Church has had since the period of the Reformation”. The majority of modern Protestant theologians accept his views, not, however, to the exclusion of knowledge as a basis of religion.

Parallel with the development of the philosophical and theological views as to the nature of religion and the worth of revelation, which provided it with its critical principles, took place an exegetical evolution. The first phase consisted in replacing the orthodox Protestant doctrine (i. e. that the Sacred Scriptures are the Word of God) by a distinction between the Word of God contained in the Bible and the Bible itself (Töllner, Herder), though the Rationalists still held that the purer source of revelation lies rather in the written than in the traditional word. This distinction led inevitably to the destruction of the rigid view of inspiration, and prepared the ground for the second phase. The principle of accommodation was now employed to explain the difficulties raised by the Scripture records of miraculous events and demoniacal manifestations (Senf, Vogel), and arbitrary methods of exegesis were also used to the same end (Paulus, Eichhorn). In the third phase Rationalists had reached the point of allowing the possibility of mistakes having been made by Christ and the Apostles, at any rate with regard to non-essential parts of religion. All the devices of exegesis were employed vainly; and, in the end, Rationalists found themselves forced to admit that the authors of the New Testament must have written from a point of view different from that which a modern theologian would adopt (Henke, Wegscheider). This principle, which is sufficiently elastic to admit of usage by nearly every variety of opinion, was admitted by several of the Supernaturalists (Reinhard, Storr), and is very generally accepted by modern Protestant divines, in the rejection of verbal inspiration. Herder is very clear on the distinction—the truly inspired must be discerned from that which is not; and de Wette lays down as the canon of interpretation “the religious perception of the divine operation, or of the Holy Spirit, in the sacred writers as regards their belief and inspiration, but not respecting their faculty of forming ideas. . . .” In an extreme form it may be seen employed in such works as Strauss’s “Leben Jesu”, where the hypothesis of the mythical nature of miracles is developed to a greater extent than by Schleiermacher or de Wette.

(2) Rationalism, in the broader, popular meaning of the term, is used to designate any mode of thought in which human reason holds the place of supreme criterion of truth; in this sense, it is especially applied to such modes of thought as contrasted with faith. Thus Atheism, Materialism, Naturalism, Pantheism, Scepticism, etc., fall under the head of rationalistic systems. As such, the rationalistic tendency has al-

ways existed in philosophy, and has generally shown itself powerful in all the critical schools. As has been noted in the preceding paragraph, German Rationalism had strong affinities with English Deism and French Materialism, two historic forms in which the tendency has manifested itself. But with the vulgarization of the ideas contained in the various systems that composed these movements, Rationalism has degenerated. It has become connected in the popular mind with the shallow and misleading philosophy frequently put forward in the name of science, so that a double confusion has arisen, in which (i) questionable philosophical speculations are taken for scientific facts, and (ii) science is falsely supposed to be in opposition to religion. This Rationalism is now rather a spirit, or attitude, ready to seize upon any arguments, from any source and of any or no value, to urge against the doctrines and practices of faith. Beside this crude and popular form it has taken, for which the publication of cheap reprints and a vigorous propaganda are mainly responsible, there runs the deeper and more thoughtful current of critical-philosophical Rationalism, which either rejects religion and revelation altogether or treats them in much the same manner as did the Germans. Its various manifestations have little in common in method or content, save the general appeal to reason as supreme. No better description of the position can be given than the statements of the objects of the Rationalist Press Association. Among these are: “To stimulate the habits of reflection and inquiry and the free exercise of individual intellect . . . and generally to assert the supremacy of reason as the natural and necessary means to all such knowledge and wisdom as man can achieve”. A perusal of the publications of the same will show in what sense this representative body interprets the above statement. It may be said finally, that Rationalism is the direct and logical outcome of the principles of Protestantism; and that the intermediary form, in which assent is given to revealed truth as possessing the *imprimatur* of reason, is only a phase in the evolution of ideas towards general disbelief. Official condemnations of the various forms of Rationalism, absolute and mitigated, are to be found in the Syllabus of Pius IX.

(3) The term *Rationalism* is perhaps not usually applied to the theological method of the Catholic Church. All forms of theological statement, however, and pre-eminently the dialectical form of Catholic theology, are rationalistic in the truest sense. Indeed, the claim of such Rationalism as is dealt with above is directly met by the counter claim of the Church: that it is at best but a mutilated and unreasonable Rationalism, not worthy of the name, while that of the Church is rationally complete, and integrated, moreover, with super-rational truth. In this sense Catholic theology presupposes the certain truths of natural reason as the *preambula fidei*, philosophy (the *ancilla theologiæ*) is employed in the defence of revealed truth (see APOLOGETICS), and the content of Divine revelation is treated and systematized in the categories of natural thought. This systematization is carried out both in dogmatic and moral theology. It is a process contemporaneous with the first attempt at a scientific statement of religious truth, comes to perfection of method in the works of such writers as St. Thomas Aquinas and St. Alphonsus, and is consistently employed and developed in the Schools.

FRANCIS AVELING.

Ratio Studiorum.—The term "Ratio Studiorum" is commonly used to designate the educational system of the Jesuits; it is an abbreviation of the official title, "Ratio atque Institutio Studiorum Societatis Jesu", i. e. "Method and System of the Studies of the Society of Jesus". The Constitutions of the Society from the beginning enumerated among the primary objects of the Society: teaching catechism to children and the ignorant, instructing youth in schools and colleges, and lecturing on philosophy and theology in the universities. Education occupied so prominent a place that the Society could rightly be styled a teaching order. Even during the lifetime of the founder, St. Ignatius, colleges were opened in various countries, at Messina, Palermo, Naples, Gandia, Salamanca, Alcalá, Valladolid, Lisbon, Billom, and Vienna; many more were added soon after his death, foremost among them being Ingolstadt, Cologne, Munich, Prague, Innsbruck, Douai, Bruges, Antwerp, Liège, and others. In the fourth part of the Constitutions general directions had been laid down concerning studies, but there was as yet no definite, detailed, and universal system of education, the plans of study drawn up by Fathers Nadal, Ledesma, and others being only private works. With the increase of the number of colleges the want of a uniform system was felt more and more. During the generalate of Claudius Acquaviva (1581-1615), the educational methods of the Society were finally formulated. In 1584 six experienced schoolmen, selected from different nationalities and provinces, were called to Rome, where for a year they studied pedagogical works, examined regulations of colleges and universities, and weighed the observations and suggestions made by prominent Jesuit educators. The report drawn up by this committee was sent to the various provinces in 1586 to be examined by at least five experienced men in every province. The remarks, censures, and suggestions of these men were utilized in the drawing up of a second plan, which, after careful revision, was printed in 1591 as the "Ratio atque Institutio Studiorum". Reports on the practical working of this plan were again sent to Rome, and in 1599 the final plan appeared, the "Ratio atque Institutio Studiorum Societatis Jesu", usually quoted as "Ratio Studiorum". Every possible effort had been made to produce a practical system of education; theory and practice alike had been consulted, suggestions solicited from every part of the Catholic world, and all advisable modifications adopted. The Ratio Studiorum must be looked upon as the work not of individuals, but of the whole Society.

At the present time the question of origin is a favourite topic of historical investigation. It has been asserted that the Ratio was modelled chiefly on the theories of the Spanish Humanist, Luis Vives (see VIVES, JUAN LUIS), or on the plan of the famous Strasburg "reformer" and educationist, John Sturm. No such dependence has been proved, and we can unhesitatingly point to other sources. The method of teaching the higher branches (theology, philosophy, and the sciences) was an adaptation of the system prevailing in the great Catholic universities, especially in Paris, where St. Ignatius and his first companions had studied. The literary course is modelled after the traditions of the humanistic schools of the Renaissance period; it is probable that the flourishing schools of the Netherlands (Louvain, Liège, and others) furnished the models for various features of the Ratio. Certain features common to the Ratio and the plan of Sturm are

accounted for naturally by the fact that the Strasburg educationist had studied at Liège, Louvain, and Paris, and thus drew on the same source from which the framers of the Ratio had derived inspirations. Several Jesuits prominent in the drawing up of the Ratio were natives of the Netherlands, or had studied in the most celebrated schools of that country. But, as is evident from the description of the origin of the Ratio, its authors were not mere imitators; the most important source from which they drew was the collective experience of Jesuit teachers in various colleges and countries. The document of 1599 remained the authoritative plan of studies in the schools of the order until the suppression of the latter in 1773. However, both the Constitutions and the Ratio explicitly declared that, according to the special needs and circumstances of different countries and times, changes could be introduced by superiors. As a consequence, there was and is a great variety in many particular points found in different countries and periods. After the restoration of the Society in 1814, it was felt that the changed conditions of intellectual life necessitated changes in the Ratio and, in 1832, the Revised Ratio was published; nothing was changed in the essentials or the fundamental principles, but innovations were made in regard to branches of study. In the colleges Latin and Greek remained the principal subjects, but more time and care were to be devoted to the study of the mother-tongue and its literature of history, geography, mathematics, and the natural sciences. In more recent times still greater emphasis has been laid on non-Classical branches. Thus the Twenty-third General Congregation (legislative assembly of the Society) specially recommended the study of natural sciences. Non-Classical schools were pronounced proper to the Society as well as Classical institutions. In regard to methods, the present general declared in 1910 that, "as the early Jesuits did not invent new methods of teaching but adopted the best methods of their age, so will the Jesuits now use the best methods of our own time". This voices the practice of Jesuit colleges, where physics, chemistry, biology, physiology, astronomy, geology, and other branches are taught according to the established principles of modern science. From this it is clear that it is not the intention of the Society to make the Ratio Studiorum stationary and binding in every detail; on the contrary, it is intended that the educational system of the order shall adapt itself to the exigencies of the times.

Concerning the character and contents of the Ratio a brief description must suffice. The final Ratio did not contain any theoretical discussion or exposition of principles. Such discussions had preceded and were contained in the trial Ratio of 1585. The document of 1599 was rather a code of laws, a collection of regulations for the officials and teachers. These regulations are divided as follows: I. Rules for the provincial superior; for the rector, in whose hands is the government of the whole college; for the prefect of studies, who is the chief assistant of the rector and has direct supervision of the classes and everything connected with instruction, while another assistant of the rector, the prefect of discipline, is responsible for all that concerns order and discipline; II. Rules for the professors of theology: Scripture, Hebrew, dogmatic theology, ecclesiastical history, canon law, and moral theology; III. Rules for the professors of philosophy, physics, and mathematics; IV. Rules for the teachers of the *studia inferiora* (the lower department), comprising the literary branches. In this department there were originally five classes (schools), later frequently six; the three (or four) Grammar classes, corresponding largely with a Classical high school; then the class of Humanities and the class of Rhetoric (freshman and sopho-

more). Besides Latin and Greek, other branches were taught from the beginning under the name of "accessories"—especially history, geography, and antiquities. As was said above, gradually more attention was paid to the study of the mother-tongue and its literature. Mathematics and natural sciences were originally taught in the higher course (the department of Arts), together with philosophy; in more recent times they are taught also in the lower department. In philosophy Aristotle was prescribed as the standard author in the old Ratio, but he is not mentioned in the revised Ratio; St. Thomas Aquinas was to be the chief guide in theology. The Ratio Studiorum does not contain any provisions for elementary education. The cause of this omission is not, as some have thought, contempt for this branch of educational activity, much less opposition to popular instruction, but the impossibility of entering that vast field to any great extent. The Constitutions declared elementary education to be "a laudable work of charity, which the Society might undertake, if it had a sufficient number of men". In missionary countries, however, Jesuits have frequently devoted themselves to elementary education.

If it be asked what is most characteristic of the Ratio Studiorum, the following features may be mentioned: It was, first of all, a system well thought out and well worked out, and formulated at a time when in most educational establishments there was little system. The practical rules and careful supervision insured efficiency even in the case of teachers of moderate talent, while to the many teachers of more than ordinary ability sufficient scope was left for the display of their special aptitudes. The arrangement of subjects secured a combination of literary, philosophical, and scientific training. The Ratio insisted not on a variety of branches taught simultaneously (the bane of many modern systems), but on a few well-related subjects, and these were to be taught thoroughly. To secure thoroughness, frequent repetitions (daily, weekly, and monthly) were carried on in all grades. What the teacher presented in his *prælectio* (i. e. explanation of grammar or authors in the lower grades, or lecture in the higher faculties) was to be assimilated by the student through a varied system of exercises: compositions, discussions, disputations, and contests. Attention was paid to the physical welfare of the students, school hours and work being so arranged as to leave sufficient time for healthful play and exercise. Compared with the severity of many earlier schools, the discipline was mild, the barbarous punishments not unfrequently inflicted by educators of the seventeenth and eighteenth centuries being strictly forbidden. For the moral training of the pupils much was expected from the personal contact with the teacher, who was supposed to take an interest in every individual pupil. Religious training was the foremost object, and religious influence and inspiration were to pervade all teaching.

In modern times objections have been raised against various features of the Ratio Studiorum, but most of them are either based on a misunderstanding of the Ratio, or directed against features which are entirely unessential. Thus the supervision and examination of students by other pupils, the constant colloquial use of Latin, etc. are secondary features which have been abolished in most Jesuit schools. Much has been said against the supposed disastrous influence of emulation and rivalry, encouraged by the Ratio, and the awarding of prizes and premiums. This system is not necessarily dangerous and, if properly and cautiously used, may become a wholesome stimulus. At the time when the elective system was looked upon by many as the greatest modern discovery in education, the Ratio Studiorum was

severely censured for upholding the "antiquated system of prescribed courses". As the free elective system is now considered a failure by the foremost educationists, it is not necessary to refute this charge against the Ratio. Besides, there is nothing in the Jesuit system which prohibits a reasonable amount of election, and many American Jesuit colleges have introduced certain elective branches in the higher classes. In regard to the numerous controversies concerning Jesuit education, Mr. Brown, U. S. Commissioner of Education (1911), has well observed that "in most of these controversies the Jesuit side is the side of many who are not Jesuits" (Educational Review, Dec., 1904, p. 531). Even critics who judge the Ratio with excessive severity are compelled to admit that it contains "much educational wisdom and experience, practical skill, and a pedagogical insight which never swerves from the main purpose" (Professor Fleischmann). Most of its essential features can well be retained and will prove advantageous no matter what new branches of study or methods of teaching are introduced.

Some points deserve to be specially treated on account of the serious objections raised against the Ratio. We hear frequent, and often animated, discussions concerning the aim or scope of educational systems and of various branches of study. What was the intellectual scope of the Ratio Studiorum? It cannot be better defined than in the words of the general of the Society, Father Martin, who said in 1892: "The characteristics of the Ratio Studiorum are not to be sought in the subject matter, nor in the order and succession in which the different branches are taught, but rather in what may be called the 'form', or the spirit of the system. This form, or spirit, consists chiefly in the training of the mind [*efformatio ingenii*], which is the object, and in the various exercises, which are the means of attaining this object." This training or formation of the mind means the gradual and harmonious development of the various powers or faculties of the soul—of memory, imagination, intellect, and will; it is what we now call a general and liberal education. The training given by the Ratio was not to be specialized or professional, but general, and was to lay the foundation for professional studies. In this regard the Ratio stands in opposition to various modern systems which aim at the immediately useful and practical or, at best, allot a very short time to general education; it stands in sharp contrast with those systems which advocate the earliest possible beginning of specialization. Jesuit educationists think, with many others, that "the higher the level on which the professional specializing begins, the more effective it will be". Besides, there are many spheres of thought, many branches of study, especially literary and historical, which may not be required for professional work, but which are necessary for a higher, broader, and truly liberal culture. The educated man is to be not merely a wage-earner, but one who takes an intelligent interest in the great questions of the day, and who thoroughly understands the important problems of life, intellectual, social, political, literary, philosophical, and religious. To accomplish this a solid general training, preparatory to strictly professional work and reasonably prolonged, is most valuable. One of the means, in fact the most important one, for this liberal training, the Ratio finds in the study of the Classics. Much has been said and written, within the past decades, for and against the value of the Classics as a means of culture. The Ratio does not deny the educational value of other branches, as sciences, modern languages, etc., but it highly values the Classical curriculum not merely because it is the old traditional system, but because, so far, it has proved to be the

best means for giving the mind the much desired liberal training and general culture. It cannot be denied that the study of Latin, in particular, is excellently fitted to train the mind in clear and logical thinking. Immanent logic has been called the characteristic of the Latin language and its grammar, and its study has been termed a course in applied logic. Some writers have asserted that the Ratio prescribed Latin because it was the language of the Church, and of political and scholarly intercourse of former centuries, and that for this reason the perfect mastery of Latin, the acquisition of a Ciceronian style, was the primary aim of Jesuit education. It is true that in former ages, when Latin was the one great international tongue of the West, the study of this language had an eminently practical purpose, and both Protestant and Catholic schools aimed at imparting a mastery of it. But this was by no means the only object even in those days. As a distinguished French Jesuit educationist expressed it in 1669: "Besides literary accomplishments gained from the study of the Classical languages, there are other advantages, especially an exquisite power and facility of reasoning", that is, in modern terms, mental training. The same is evident from the fact that Greek was always taught, certainly not for the purpose of conversation and intercourse. As there are many other advantages, besides the formal training, to be derived from the study of the Classics, the Ratio needs no apology for the high value it set on them.

As was said above, the various exercises (the "prelection", memory lessons, compositions, repetitions, and contests) are the means of training the mind. The typical form of Jesuit education, minutely described in the Ratio, is called *prælectio*; it means "lecturing" in the higher faculties, and its equivalent (*Vorlesung*) is even now used in German for the lectures in the universities. In the lower grades it means "explanation", but, as it has some special features, it is best to retain the word in an English dress as "prelection". It is applied both to the interpretation of authors and to the explanation of grammar, prosody, precepts of rhetoric, poetry, and style. In regard to the authors, the text was first to be read by the teacher, distinctly, accurately, and intelligently, as the best introduction to the understanding of the text. Then follow the interpretation of the text, formerly a paraphrase of the contents in Latin, now a translation into the vernacular; linguistic explanations of particular sentences; study of poetical or rhetorical precepts contained in the passage; finally, what is called "erudition" (i. e. antiquarian and subject explanation, including historical, archæological, geographical, biographical, political, ethical, and religious details, according to the contents). From many documents it is evident that a great deal of interesting and useful information was given under this head. But what is more important, the systematic handling of the text, the completeness of the explanation from every point of view, was an excellent means of training in accuracy and thoroughness.

Still it has been maintained that this method of teaching was too "formal", too "mechanical", and that as a result "originality and independence of mind, love of truth for its own sake", were suppressed (Quick). Should this "independence of mind" be taken as unrestrained liberty of thought in religious matters, as outspoken or disguised Rationalism which places itself above the whole deposit of Divine Revelation, it must, indeed, be admitted that the Ratio and the whole Jesuit teaching are opposed to this kind of "originality and independence of mind". This, however, is a question of philosophy and theology rather than of pedagogical methods. Still, even some Catholic writers have thought that the

Jesuit system is unfavourable to the development of great individualities, at least among the members of the order. Cardinal Newman says: "What a great idea, to use Guizot's expression, is the Society of Jesus! What a creation of genius is its organization; but so well adapted is the institution to its object that for that very reason it can afford to crush individualities, however gifted" (Hist. Sketches, III, 71). Whether the great cardinal here fully endorses Guizot's sentiments or not, it is certain that he virtually refutes them in another passage, when he states that the order was not over-zealous about its theological traditions, but suffered its great theologians to controvert with one another. "In this intellectual freedom its members justly glory; inasmuch as they have set their affections not on the opinions of the Schools, but on the souls of men" (ibid., II, 369). The history of the Society is the best refutation of the charge of crushing individualities. The literary and scientific activity of the order has been admired by its bitterest enemies. It has produced not only great theologians (Suarez, Vasquez, Molina, de Lugo, and others), but men prominently mentioned among the earlier Orientalists and writers on comparative language, as Hervas, Beschi, Ricci, Prémare, Gaubil; in the field of mathematics and natural sciences high distinction has been obtained by Clavius, called "the Euclid of his age", chief agent in the reformation of the Calendar under Gregory XIII; Grimaldi, Scheiner, and Secchi are famous as astronomers; Athanasius Kircher was a polyhistor in the best sense of the term; Hardouin, though frequently hypercritical and eccentric, was a most acute critic and in many ways far in advance of his age; Petavius was the father of the historical treatment of dogma and a leader in chronology; and the Bollandists have achieved a work which is truly a *monumentum ære perennius*. If the number of great men be taken as a criterion of the merit of an educational system, a long roll can be exhibited of pupils who were among the most prominent men in Europe: poets like Calderon, Tasso, Corneille, Molière, Goldoni; orators like Bossuet; scholars like Galileo, Descartes, Buffon, Muratori, Montesquieu, Malesherbes; statesmen like Richelieu; church dignitaries like St. Francis de Sales and Benedict XIV, called "the most learned of the Popes". All these men were trained under the Ratio, and, though it would be puerile to claim all their greatness for the system of education, one thing is certain, namely that the Ratio did not crush the originality and individuality of these pupils, whether members of the order or outside it. Nor has the educational system of the Society been sterile in more recent times in this regard; among its pupils it numbers men who have become distinguished in every walk of life.

The history of the practical working of the Ratio is the history of the colleges of the Society. In 1706 the number of collegiate and university institutions was over 750; Latin America alone had 96 colleges before the suppression of the Society. Some of the Jesuit colleges had over 2000 pupils each; while it is impossible to give an absolute average, 300 seems to be the very lowest. This would give the 700 and more colleges a sum total of over 210,000 students, all trained under the same system. Even non-Catholics bestowed great praise on the educational efficiency of the Jesuit schools; it was a common complaint among Protestants that many non-Catholic parents sent their sons to Jesuit schools because they considered the training given there superior to that obtained elsewhere. The suppression of the Society in the second half of the eighteenth century meant the total loss of property, houses, libraries, and observatories. After its restoration it had to struggle into existence under altered and unfavourable conditions. During the nineteenth

century the Jesuits were persecuted almost without cessation in one country or other, and driven out again and again. These persecutions seriously hampered the educational work of the Society and prevented it from obtaining the brilliant success of former days. Still, the Jesuits possess now a respectable number of colleges, which is continually increasing, particularly in English-speaking countries.

ROBERT SCHWICKERATH.

Ratisbon (REGENSBURG), DIOCESE OF (RATISBONENSIS), suffragan of Munich-Freising. It embraces the greater portion of the administrative district of Oberpfalz, and portions of the districts of Upper and Lower Bavaria, and Upper Franconia (see GERMANY, map), an area of about 5340 square miles. It is divided into the three episcopal commissariates of Ratisbon, Amberg, and Straubing, and into thirty deaneries. In 1910 it numbered 473 parishes, 167 benefices (exclusive of 74 united with other prebends), 80 expositurships, 371 curacies, and 36 other pastoral offices, 1283 clergy (including 442 pastors and 159 regular priests), and over 865,000 Catholics. In addition to the ordinary, there is a coadjutor bishop (consecrated 18 April, 1911); the cathedral chapter consists of a provost, 8 capitulars, 6 cathedral vicars, and a cathedral preacher. There is also a chapter at the collegiate Church of Our Lady "Zur Alten Kapelle" in Ratisbon, with 11 members, and a chapter in the collegiate Church of Sts. John the Baptist and John the Evangelist at Ratisbon, with 7 members. The diocesan institutions include the episcopal seminary for the ecclesiastics at Ratisbon, with four courses in theology and one in philosophy, and the episcopal seminaries for boys at Ratisbon, Metten, and Straubing. For philosophical and theological studies there exists at Ratisbon a state lyceum, in which 10 religious and a few lay professors lecture.

The monasteries and monastic institutes are: for the Benedictines, the Abbey of Metten with a *gymnasium* and episcopal seminary for boys (43 fathers, 8 clerics, and 15 lay brothers) and the Priory of Weltenburg (6 fathers, 2 clerics, and 12 lay brothers); 3 monasteries of the Discalced Carmelites, with 22 fathers, 3 clerics, and 21 brothers; 2 monasteries of the Calced Carmelites, with 13 fathers, and 11 brothers; 5 monasteries of the Franciscans, with 21 fathers, and 46 brothers; 1 Capuchin monastery, with 7 fathers and 7 brothers; 2 hospices of the Minorites, with 4 fathers and 6 brothers; 2 Augustinian priories, with 7 fathers, and 6 brothers; 3 Redemptorist colleges with 27 fathers, and 26 brothers; 4 monasteries of the Brothers of Mercy, with 5 fathers and 100 brothers; 1 brotherhood of hermits, with 30 brothers, in 25 hermitages; 3 convents of the Poor Clares; 2 of the Dominican Sisters; 2 of the Cistercian Sisters; 1 of the Ursulines; 1 of the Elizabethines; 1 of the Franciscan Sisters of the Third

Order; 1 of the Ladies of the Good Shepherd; 76 establishments of the Poor School Sisters; 3 of the English Ladies; 23 of the Sisters of Mercy, in 12 townships; 1 mother-house and 67 branches of the Sisters of the Third Order of St. Francis of Mellersdorf; 5 establishments of the Franciscan Sisters from the mother-house at Dillingen; 1 institute for the Daughters of the Divine Redeemer from the mother-house at Niederbronn in Alsace; 1 convent of Carmelite Sisters. The total number of sisters is 2400. The religious and social societies are highly developed; it will be sufficient to mention here the Confraternity of Perpetual Adoration, the Congregations of Mary for men, boys, and girls, the Catholic associations for workmen, journeymen, and apprentices, the students' associations, the Albertus Magnus association, the Volksverein for Catholic Germany, and the Catholic Press Association for Bavaria.

Among the churches of the diocese may be mentioned: the Gothic cathedral of St. Peter, begun in 1275, but not completed until the nineteenth century; the old cathedral, or St. Stephanskirche (end of tenth century); the Churches of St. Emmeram (eleventh century), St. Jakob (twelfth century), the former Dominican Church of St. Blasius (1273-1400), all at Ratisbon; the churches of Amberg, Straubing, Naabburg; numerous old monastery churches, such as those of Weltenburg, Prüfening, Ober-Alteich etc. Much-frequented places of pilgrimage are: Mariahilf, near Amberg; the Eichelberg, near Hemau; the Kreuzberg, near Schwandorf; and Neukirchen beim hl. Blut.

Ratisbon, the oldest town in Bavaria, had its origin in the Roman camp, *Castra Regina*, the remains of whose walls exist to-day. Christianity was introduced during the time of the Romans. In the sixth century Ratisbon was the chief town of Bavaria, and the seat of the apostolic labours of several holy evangelists, such as St. Rupert (about 697), St. Emmeram (about 710), St. Erhard (about 720), and Blessed Albert (about 720). In 739 St. Boniface divided the Duchy of Bavaria into the four Dioceses of Ratisbon, Passau, Freising, and Salzburg, and appointed as first Bishop of Ratisbon Blessed Gawibald or Gaubald (739-61). The early bishops were chosen alternately from the canons of the Church of St. Peter and the monks of the Benedictine monastery of St. Emmeram, of which monastery they were simultaneously abbots; after the elevation of Salzburg to metropolitan rank by Leo III, Ratisbon was placed under it. Through the favour of the native dukes and, after their removal, through that of the Carolingians and Ottos, the bishops received much property and many gifts for their churches. The possessions of the chapter consisted of the three free imperial domains Donaustauf, Wörth (both on the Danube), and Hohenburg on the River Lautrach, the domain of Pechlarn below the Enns, and the administration of a few places in Lower Bavaria. During the early period the chief care of the bishops was the conversion of the Slavs, Bohemia being for the most part won for Christianity by Ratisbon. Bishop Bahurich (817-48) baptized fourteen Bohemian princes at Ratisbon in 847, and Bohemia long belonged to the diocese. Under Ambricho (864-91) Louis the German built the celebrated "Alte Kapelle" in which his spouse Emma and the last Carolingian emperors Arnulf and Louis the Child found their resting-places. During the reign of Blessed Tuto (894-931) the see suffered much from the inroads of the Hungarians; Bishop Michael (942-72) took personal part in the wars against these invaders, especially in the battle of Lechfeld. St. Wolfgang (972-94) agreed to the separation of Bohemia from the Diocese of Ratisbon, and also separated the property of the cathedral from the Monastery of St. Emmeram.

The era of the following bishops is characterized by

the foundation of numerous monasteries. Gebhard I (995–1035) founded the Abbey of Pruhi; his attempt to annul the separation between the diocese and Emmeram gave rise to much dispute; he received from Otto III the right of coinage. Gebhard III (1036–60) received from Henry III the Abbey of Kempten; during his episcopate the collegiate chapter of Ohringen and the convent of Geisenfeld were founded. Otto of Ritenberg (1061–89) espoused the cause of the emperor in the Conflict of Investitures, while Blessed William, provost of St. Emmeram and later abbot of the renowned monastery of Hirsau, the “hero of monasticism and champion of reform”, worked in the spirit of Pope Gregory. Under Gebhard IV, who received neither papal ratification nor consecration, the Benedictine abbey of Oberalteich was founded; under Hartwich I (1105–26) were founded the Scots monastery of St. James at Ratisbon, and the Benedictine monasteries of Maltersdorf, Prüfening, Reichenbach, and Ensdorf; under the zealous Konrad I (1126–32), the Cistercian abbey of Waldsassen, the Benedictine monastery of Biburg; under Heinrich I (1132–55), the Premonstratensian monastery of Windberg and several chapters of Augustinian Canons. Konrad III (1186–1204) took part in Barbarossa’s crusade; Konrad IV again confirmed the dominion of the bishops over the city of Ratisbon, which in the following period gradually acquired independence and developed into a free town of the empire; in 1226 Konrad gave the recently-founded Franciscan Order a residence and chapel in the city. Under Siegfried the Carmelites and Dominicans also established themselves in the diocese. Prominent among the Franciscans was Blessed Bernhard of Ratisbon, one of the most powerful preachers of the Middle Ages; the Dominicans gave to the diocese the great bishop, Albertus Magnus, on whose voluntary retirement Leo Thundorfer (1262–77), who began the building of the noble cathedral, was elected. The building was continued vigorously under Heinrich II of Rotteneck (1277–96), who led a truly holy life and proved himself an excellent spiritual and secular prince. Konrad of Luppurg (1296–1313), Nikolaus of Stachowitz (1313–40), and Konrad VI (1368–81) were also distinguished bishops. Albert of Stauf (1409–21), an adherent of the popes of Pisa, devoted himself zealously to the reform of the monasteries and the clergy; in 1419, at a diocesan synod, he issued an excellent pastoral instruction for his diocese. Albert and his immediate successors—Johann of Streitberg (1421–28) and Konrad VII of Rehlingen (1428–37), a Westphalian—had to take the field against the Hussites, who had made several devastating inroads into the territory of the diocese. Heinrich IV of Absberg (1465–92), an admirable bishop, took energetic measures against the Hussites and other fanatics, against the superstitions of the people, and the incontinency of the clergy; to the restoration of discipline and order in the monasteries, especially in several convents, he devoted a restless activity. In the same spirit worked Rupprecht II, Count Palatine of Sponheim (1492–1507), under whom the diocese had to suffer much in consequence of the war between the Wittelsbachs concerning the succession in Bavaria-Landshut.

The religious innovations of Luther were on the whole successfully opposed by Johann III of the Wittelsbach family, the administrator of the diocese (1507–38); in 1524 he took part in the assembly of the South-German bishops and princes at Ratisbon, which, under the presidency of the papal legate Campeggio, decreed the execution of the Edict of Worms and the maintenance of the old religion. Under his weak successor Pankraz von Sinzenhofen (1538–48), however, the new doctrines were allowed to spread, and this prelate was unable to prevent the town from accepting the Reformation and demolishing the cathedral. The negotiations at the Diet

of Ratisbon in 1541 resulted in the Ratisbon Interim, which went very far towards meeting the wishes of the Protestants, but yet did not find approval with the Protestant princes. The efforts of the zealous Georg Marschalk of Pappenheim (1548–63) and David Kolderer of Burgstall (1567–79) met with especially obstinate resistance from the city. Under Philipp (1579–98), son of Duke William V of Bavaria and afterwards cardinal, the Jesuits were assigned a college at Ratisbon, with which a *gymnasium* was combined in 1589. Wolfgang II von Hausen (1600–13) was a zealous patron of the Jesuits and promoter of Catholic reform, and joined the Catholic League in 1609. Albert von Törring (1613–59), when the Count Palatine Wolfgang Wilhelm became a Catholic in 1614, brought back under his spiritual jurisdiction a portion of the Protestant parishes, especially in the Upper Palatinate; even the town of Eger with its territory was recovered in 1627 for the Catholic faith.

The Thirty Years’ War caused great injury to the diocese; Duke Bernhard of Weimar, a partisan of the Swedes, captured the town of Ratisbon and a portion of the diocesan territory in 1633, looted the church treasury, exacted from the clergy large contributions, and held the bishop in confinement for fourteen months. Franz Wilhelm von Wartenberg (1649–61), who was also Bishop of Osnabrück, Minden, and Verden, sought to supply the growing need of priests by founding a clerical seminary in 1653. With Albert Siegmund (1668–85) began the series of bishops from the House of Wittelsbach, which for nearly a century occupied the episcopal see. Albert was simultaneously Bishop of Freising, as was Joseph Klemens (1685–1716), who, as Elector of Cologne (from 1688), espoused the cause of Louis XIV in the War of the Spanish Succession, and was for this reason, like his brother Elector Max Emmanuel, placed under the imperial ban. Cardinal Johann Theodor (1719–63) occupied, in addition to Ratisbon, the Dioceses of Freising and Liège, and other benefices. Excellent administrators were the last prince-bishops, Anton Ignaz von Fugger (1769–87), Max Prokop von Törring (1787–89), and Joseph Konrad von Schroffenberg (1790–1803). On the secularization of the German Church in 1803 a portion of the diocese was left undisturbed for a time; then Napoleon named, even during the lifetime of Schroffenberg, as Archbishop of Ratisbon and Prince-Primate of Germany, Karl Theodor von Dalberg, Elector of Mainz, and assigned him a portion of the earlier ecclesiastical territory. It was only in 1805 that Dalberg received the papal consent to the exercise of archiepiscopal power (1805–17). Although Dalberg, in his desire to save his precarious sovereignty, accepted Cardinal Fesch, Napoleon’s uncle, as coadjutor, he was compelled to surrender the secular territory of the Diocese of Ratisbon to Bavaria in 1810, whereupon its secularization was finally accomplished. With Dalberg’s death the short-lived Archdiocese of Ratisbon came to an end.

The Bavarian Concordat of 1817–18 declared Ratisbon a simple suffragan see in the newly-created ecclesiastical province of Munich-Freising, and assigned to it its present limits. The first bishop of the new diocese was the former coadjutor, Johann Nepomuk von Wolf (1821–29). He was succeeded by the celebrated Michael Sailer (1829–32). Georg Michael Wittmann, who was named successor to the latter, died before his preconization (1833). Franz Xaver von Schwäbl (1833–41), under whom Diepenbrock (later cardinal) worked at Ratisbon, restored the cathedral. Valentin Riedel (1842–57) founded the boys’ seminary at Metten and the priests’ hermitage, and prepared the way for the reform of church music. Ratisbon now possesses the world-renowned school for the special study of Church music, founded by

Haberl. Ignatius von Senestréy (1858-1906) completed, with the help of King Louis I, the towers of the cathedral, founded the boys' seminaries at Ratisbon and Straubing, reformed the liturgy in accordance with the Roman model, and greatly promoted the religious life of the diocese by frequent tours of visitation, the establishment of new pastoral offices, the holding of popular missions, and the building of churches and schools. At the Vatican Council he belonged to the Commission on Faith, and was one of the most resolute champions of the dogma of the infallibility of the pope. In the ecclesiastico-political wars in Bavaria, especially since the appearance of the Old Catholic movement and its encouragement by Minister Lutz, von Senestréy always fearlessly and unyieldingly contended for the rights of the Church. The pallium was conferred on him as a mark of distinction by the pope in 1906. He was succeeded in 1906 by Antonius von Henle, who had occupied the See of Passau from 1901 to 1906.

JOSEPH LINS.

Ratisbonne, MARIA ALPHONSE, a converted Jew, b. at Strasburg on 1 May, 1814; d. at Ain Karim near Jerusalem, on 6 May, 1884. He belonged to a wealthy and prominent Jewish family in Alsace. After studying law at Paris he became a member of his uncle's famous banking firm, and in 1841 was betrothed to the daughter of his oldest brother. As she was only sixteen years old, the marriage was postponed, and Ratisbonne entered upon a pleasure trip to the Orient. Though nominally a Jew, he was a radical infidel, a scoffer at religion, and, after the conversion of his brother Theodor, a rabid enemy of everything Catholic. On his intended tour to the Orient, he came to Rome, where on 20 January, 1842, he was miraculously converted to Catholicism in the Church of S. Andrea delle Fratte by an apparition of the Blessed Virgin. After his conversion he assisted his brother, Theodor, in founding the Sisterhood of Our Lady of Sion in 1843, was ordained priest in 1847, and entered the Society of Jesus. Desirous, however, to devote himself entirely to the conversion of the Jews, he left the society with the consent of Pius IX, transplanted the Sisters of Sion to Jerusalem in 1855, and built for them in 1856 the large Convent of Ecce Homo with a school and an orphanage for girls. In 1860 he erected the Convent of St. John on the mountain at Ain Karim, together with a church and another orphanage for girls. Here Alphonse laboured with a few companions (*Pères de Sion*) for the conversion of Jews and Mohammedans until his death. For boys he erected the orphanage of St. Peter, near the Gate of Jaffa outside of Jerusalem, with a school for mechanical arts in the city.

Jahrh.*, III, I (Schaffhausen, 1869), 194-237; *Narrazione storica della prodigiosa apparizione di Maria SSma Immacolata e istantanea conversione alla fede cattolica dell'ebreo Maria Alfonso Ratisbonne, avvenuta in Roma il 20 gennaio 1842, nella chiesa parrocchiale di S. Andrea delle Fratte, de' PP. Minimi di S. Francesco di Paolo* (Rome, Vatican Press, 1892).

MICHAEL OTT.

Ratisbonne, MARIA THEODOR, a distinguished preacher and writer, and director of the Archconfraternity of Christian Mothers, b. of Jewish parentage at Strasburg, 28 Dec., 1802; d. in Paris, 10 Jan., 1884. He was raised in luxury, was educated at the Royal College of his native city, and, at the age of manhood, was considered a leader among his people, who unanimously elected him to replace Samson Libermann when the latter was converted in 1824. The conversion of his three friends, Emile Dreyfus, Alfred Mayer, and Samson Libermann, caused him to study the Bible and the history of the Church. For

MARIA THEODOR RATISBONNE

two years of grace went on within him, and finally he was baptized in 1826. He entered the seminary, and received Holy orders in 1830. He worked in his native diocese until 1840, when he became subdirector of the Confraternity of Notre Dame des Victoires at Paris. It was whilst in this city, in 1842, that his brother Alphonse, a free-thinker animated with the greatest hatred against Christianity, was miraculously converted at Rome, and suggested to him to secure a home for the education of Jewish children. Providence seemed to design him for the work, and answered his prayer for light by sending him the two daughters of a Jewish lady whom he subsequently converted. During the same summer he went to Rome; Gregory XVI decorated him a Knight of St. Sylvester, complimented him for his "Life of St. Bernard", and granted his request to labour for the conversion of the Jews. Houses were opened under the patronage of "Our Lady of Sion" for the Christian education of Jewish boys and girls. Pius IX gave Ratisbonne many marks of his affection, and Leo XIII appointed him prothonotary Apostolic. At his death he received the last Sacraments from the Archbishop of Paris, and the final blessing from Leo XIII. His chief works are: "Essai sur l'Education Morale" (1828); "Histoire de Saint-Bernard" (1841); "Méditations de Saint-Bernard sur le Présent et Futur" (1853); "Le Manuel de la Mère Chrétienne" (1860); "Questions Juives" (1868); "Nouveau Manuel des Mères Chrétiennes" (1870); "Le Pape" (1870); "Miettes Evangéliques" (1872); "Réponse aux Questions d'un Israélite de Notre Temps" (1878).

MARTIN A. HEHIR.

Ratramnus (RATHRAMNUS), a Benedictine monk at the Abbey of Corbie, in the present Department of Somme; one of the most important ecclesiastical authors of the ninth century, d. after 868. Scarcely anything is known of his life. His best known work is a treatise on the Holy Eucharist, entitled "De corpore et sanguine Domini". It was written at the instance of the Emperor Charles the Bald, against a work of the same title by Paschasius Radbertus (q. v.). The basis of Ratramnus's work is an attempt to solve the two questions: 1. Do we in the Holy

Eucharist directly see the Body of Christ with our bodily eyes, or is the Body of Christ hidden from our sensory vision? 2. Is the Eucharistic Christ identical with the historic Christ? In the solution of the first question Ratramnus distinguishes correctly between the invisible substance, "invisibilis substantia", which, he says, is truly the body and blood of Christ, "vere corpus et sanguis Christi" (xlix), and the external appearances which after the consecration by the priest remain the same as they were before (ix-x). The second question he answers in the negative, stating that the Eucharistic Christ is not in everything identical with the historic Christ "who was born of Mary, suffered, died, was buried, ascended into heaven and sitteth at the right hand of the Father" (cap. lxxxix). The work had almost been forgotten during the Middle Ages. Attention was again called to it by Blessed John Fisher, Bishop of Rochester, who cited it in defence of the Catholic doctrine on the Eucharist in the preface to his work: "De veritate corporis et sanguinis Christi in Eucharistia adversus Joh. Œcolampadium" (Cologne, 1527). It was first printed with the wrong title: "Bertrami presbyteri ad Carolum Magnum Imperatorem" (Cologne, 1532). A wrong interpretation of the words "figura" and "veritas", and a few ambiguous passages have given rise to the opinion among a few Catholics and most Protestants that Ratramnus taught a merely symbolic presence of Christ in the Eucharist. Various German, French, and English translations made by the Sacramentarians only served to corroborate this opinion. For this reason it was placed on the Index of Prohibited Books in 1559, but was removed in 1900. His best work, from a literary as well as a dogmatic standpoint, is "Contra Græcorum opposita Romanam ecclesiam infamantium, libri quattuor". It was written in 868 at the request of the bishops of the province of Reims, as a refutation of Photius who, in a letter to the King of Bulgaria, had fiercely assailed the "Filioque", the papal primacy, and various customs of the Latin Church. His earliest work, "De eo quod Christus ex virgine natus est liber", defends the Catholic doctrine that the birth of Christ occurred in a natural manner. In his work: "De prædestinatione, libri duo", he upholds the double predestination for salvation and damnation but not for sin. A treatise in defence of the expression "trina Deitas", against Hincmar, has been lost, and two dissertations "De anima" are still unprinted. His works are in "P. L.", CXXI, 1-346 and 1153-6, his extant letters in "Mon. Germ. Epist.", VI, 149 sq.

MICHAEL OTT.

Ratzinger, GEORG, political economist and social reformer, b. at Rickering, near Deggendorf, in lower Bavaria, 3 April, 1844; d. at Munich, 3 December, 1899. Ratzinger was a pupil at the gymnasium at Passau during the years 1855-63, studied theology at Munich, 1863-67, and was ordained priest in 1867. In 1868 he received the degree of Doctor of Theology at Munich. During the following years he devoted himself partly to pastoral, and partly to journalistic work. In 1869 he was chaplain at Berchtesgaden; 1870-71, he was editor of the journal "Fränkisches Volksblatt" at Würzburg; 1872-74, chaplain at Landsbut, then editor, until 1876, of the "Volksfreund", at Munich. During the years 1875-77

he was a member of the Bavarian Diet; 1877-78 he was a member of the Imperial Reichstag; during this period he belonged to the Centre Party. With exception of a pastorate of three years at Günzelhafen, 1885-88, he lived for a number of years at Munich, where he devoted himself to journalism and research. From 1893 Ratzinger was once more a member of the Bavarian Diet, where he was now a moderate adherent of the "Bauernbund" (Peasant Union) party, his views of social politics having caused him in the mean time to sever his connexion with the Centre Party. In 1898 he was again elected a member of the Reichstag. As a literary man Ratzinger deserves much credit for his scholarly work in political economy and in historical subjects. His chief works, distinguished by erudition, richness of thought, and animated exposition, are: "Geschichte der Armenpflege" (prize essay, Freiburg, 1868, 2nd revised ed., 1884); "Die Volkswirtschaft in ihrer sittlichen Grundlagen. Ethischsoziale Studien über Cultur und Civilisation" (Freiburg, 1881; 2nd completely revised ed., 1895); this work maintains the ethical principles of Christianity as the only sure basis for political economy and opposes the materialistic system of what is called the "classical political economy" of Adam Smith. "Forschungen zur bayerischen Geschichte" (Kempten, 1898); this contains a large number of studies on early Bavarian history and on the history of civilization, based on a series of unconnected treatises which had first appeared in the "Historisch-politische Blätter". Of his smaller works the following should be mentioned: "Das Concil und die deutsche Wissenschaft" (anonymously issued at Mainz, 1872) appeared first in the "Katholik", 1872, I; "Die Erhaltung des Bauernstandes" (Freiburg, 1883).

FRÄNKEL in *Biographisches Jahrbuch*, IV (1900), 246 sq.; IDEM in *Allg. deutsche Biographie*, LIII (1907), 215-18.

FRIEDRICH LAUCHERT.

Rauscher, JOSEPH OTHMAR, Prince-Archbishop of Vienna, b. at Vienna, 6 Oct., 1797; d. there 24 Nov., 1875. He received his earlier education at the gymnasium in Vienna, devoting himself chiefly to the study of jurisprudence; he also gave much time to the study of poetry, and many examples of his verses have survived. Later his desire to enter Holy Orders was opposed by his parents, but he finally overcame their objections.

After his ordination he was appointed curate in Hütteldorf, and later professor of church history and canon law at Salzburg, where Friedrich Prince Schwarzenberg, director of the Oriental Academy at Vienna, was among his pupils. In January, 1849, Cardinal Schwarzenberg named his former teacher Prince-Bishop of Sekkau, "in recognition of his distinguished qualities, knowledge, and services". In this capacity Rauscher performed great services in a short time, introduced pastoral conferences, and restored to the Redemptorists their mission houses. He also fostered religious associations, and put an end to the intrigues of the Rongeaner, although important business detained him for the most part in Vienna. Scarcely was he consecrated than he hurried to the capital to attend the great episcopal assembly which inaugurated the ecclesiastical revival in Austria; between 29 April and 20 June, 1849, twenty-five bishops and four episcopal proxies held sixty sessions. The last in order of consecration, Rauscher took the most prominent part in the transactions. He laid before the assembly a *promemoria*, which served as the programme of the business, and drafted five of the seven memorials addressed to the Ministry of the Interior. He also drew up the decrees to serve for the bishops "as the common rule of their aim and activity". The beautiful pastoral of the bishops to the clergy was also composed by him. Before the bishops separated, they chose a committee

of five members for the settlement of the memorials and the arrangement of all current affairs. As the reporter of this committee, he acted at times as its sole agent.

Rauscher was the father of the Austrian Concordat. On 14 Sept., 1852, a cabinet order appeared, naming him imperial plenipotentiary for the conclusion of a concordat. The negotiations were long and troublesome; during them Rauscher was named Prince-Archbishop of Vienna, and made his solemn entry into the Cathedral of St. Stephen on 15 Aug., 1853. To promote the Concordat he found it necessary to visit Rome, where he was engaged in the most difficult negotiations for seven months. He was thus able to take part in the solemnities in connexion with the Definition of the Immaculate Conception. Finally, on 18 Aug., 1855, the Concordat was signed and on 5 Nov. it was published as a law "applicable throughout the empire". For the homogeneous introduction of the concordat sixty-six bishops assembled in Vienna in 1856. Rauscher was raised to the cardinalate in 1855. By 1 Jan., 1857, ecclesiastical courts, for which Rauscher composed the celebrated instructions ("Instructio pro iudiciis ecclesiasticis"), were established in all the episcopal sees. Provincial synods prescribed the special application of the Concordat to the individual dioceses. The decrees of the Viennese Council of 1858, skilfully directed by Rauscher and ratified by Rome, still serve as an important form of clerical life and ecclesiastical activity. The sciences, both religious and general, as well as the religious orders and associations and art, flourished during the concordat era. Rauscher's magnanimity is revealed by his foundation of the Austrian house for pilgrims at Jerusalem, thus giving the citizens of the Hapsburg Empire a home in the Holy Land.

Up to this period Rauscher's zeal had been constructive; after the unfortunate Austrian wars of 1859-66, he found himself compelled to adopt the defensive, since the blame for the defeats was most unjustifiably referred to the Concordat. The archbishops and prince-bishops are members of the House of Peers; thus, when the war on the Concordat opened in the Reichstag in 1861 and its revision was demanded, Rauscher with the other episcopal members of the Upper House deliberated concerning an address to the emperor. When the House of Delegates demanded the removal of the religious orders from the penitentiaries, hospitals, and other state institutions, he declared in the House of Peers: "Since 1859 no effort of artificial agitation has been spared to open a campaign against defenceless women, who ask of this earthly life only necessities, and serve their fellow-creatures in privations and discomforts. This unworthy agitation bears the stamp of hatred towards Christianity, but it has likewise in it something cowardly and ignoble, of which even one estranged from Christianity should be ashamed." In consequence of the events of 1866, the storm against the Concordat and the Church broke out violently, and the Press added to its power. When the drafts of the new laws concerning marriage, the schools, and the interconfessional relations, in respect to which points there were many gaps in the Concordat, came up for discussion in the House of Peers, Rauscher immediately arose and delivered his celebrated speech on the Concordat, urging harmony between the spiritual and secular powers. When the decrees had been sanctioned, and the new laws had been vigorously condemned by the pope, there arose great dissatisfaction and turmoil. To demonstrate the illogical nature of this agitation Rauscher demanded: "Is it not permissible for a pope to pronounce a law unjust? Every newspaper arrogates to itself the right of stigmatizing the injustice of all laws, which do not agree with its partisan views". A little later

the pastoral of Bishop Rudigier of Linz was seized, and the bishop himself subsequently condemned to fourteen days' imprisonment with costs; the pastoral was to be suppressed. However, Rauscher immediately obtained from the emperor the annulment of the sentence and of the consequences which it entailed with respect to civil rights and relations.

Still greatly excited, the Austrian bishops proceeded to the Vatican Council immediately after the raging fight about the Concordat. Rauscher regarded the assembly with the greatest hopes and issued two pastorals dealing with the council on 15 Nov., 1869. Pius IX appointed him to the important commission *pro recipiendis*, which had to investigate all motions submitted. At the first real session of the council (the General Congregation of 28 Dec.) he delivered the first address, and twice spoke against the opportuneness of a universal catechism; the needs and the degrees of culture of the individual peoples were too different. As to the question which finally most strongly stirred the minds of those in and outside the council, that of the infallibility of the pope teaching *ex cathedra*, Rauscher was the leader of the bishops who combated the expediency of the definition. His work, "Observationes quædam de infallibilitatis ecclesiæ subjecto", appeared at Naples, and was reprinted at Vienna; the author later explained that it "was especially intended to emphasize the fact that the proposed decision would afford parties hostile to the Church those subterfuges of which they were in need". In the general debate Rauscher, who was ill, had his speech read by Bishop Hefele; it lasted over an hour, and ends characteristically: "But always shall I adore the ways of the Lord". He repeatedly took part in the special debates (8, 9, and 15 June), and at the ballot in the General Congregation of 13 July he voted *non placet*. However, he did not sign the memorial of the fifty-five bishops of the minority to Pius IX on 17 July, believing he had done all that he should. On 17 July he took leave of the pope, and later, as Archbishop of Vienna, promulgated the doctrinal decrees of the Vatican Council. None of the violations of justice and abuses of power, which resulted in the complete suppression of the Papal States on 20 September, 1870, passed without Rauscher raising a protesting voice. In May, 1874, the laws concerning the external legal position of the Catholic Church, the contributions to the religious funds, and the legal recognition of religious societies were issued (see AUSTRO-HUNGARIAN MONARCHY). With these laws the religious legislation of Austria has found a temporary conclusion.

The term "providential personality", so often misused, may be with complete justice applied to Cardinal Rauscher; he saved the monarchy the sufferings of a *Kulturkampf*. He was a true patriot. Austria's greatness, power, and glory were the guiding stars of his political activity. Daily he prayed: "Lord, let me not die before I have fulfilled the task with which Thou hast entrusted me". This moment was now come. On the eve of the Feast of St. Catherine of Alexandria, patroness of philosophical studies, he had always received the Sacrament of Penance; on the eve of this feast in 1875 he also died. His body rests in Our Lady's Choir of the Stephanskirche before the steps of the altar. At the wall beneath the Rauscher window is his monument. The statue of the cardinal, representing him with his hands crossed over the breast and clothed in episcopal vestments, portrays his principal characteristic, charity. Besides the monument are the pictures of his patron saints, Joseph and Othmar, while all is crowned by a representation of the Risen Redeemer.

CÖLESTIN WOLFSGRUBER.

Ravalli, ANTONIO, missionary, b. in Italy, 1811; d. at St. Mary's, Montana, U. S. A., 2 Oct., 1884. He entered the Society of Jesus about 1833. With Fathers Vercruysse, Accolti, and Nobili, Brother Huybrechts, and six sisters of the Congregation of Notre Dame de Namur, he responded to Father de Smet's appeal for the American mission in 1843, arriving at Fort Vancouver 5 Aug., 1844, after a voyage of eight months. Having made a short stay at the Mission of St. Paul on the Willamet (Champoeg, Oregon), where he made a study of the English language, and gave attention to the sick (being skilled in medicine in addition to his many other accomplishments), he joined Father Adrian Hoecken in the spring of 1845 at the mission of St. Ignatius, among the Kalispel (Pend d'Oreille), on the upper Columbia, Washington. After some time he was transferred to the Flathead Mission of St. Mary's on Bitter Root River, western Montana, where he remained until the mission was temporarily abandoned on account of the hostile Blackfeet in 1850, when, in 1844, he assumed charge of the Sacred Heart Mission established by Father Nicholas Point among the Cœur d'Alenes (Skitswish) of Northern Idaho. Here he designed and supervised the building of a handsome church which, with its altar and beautiful statues, carved by himself, has been described by a traveller as "a credit to any civilized country". Governor Stevens, who saw it in 1855, says in his official report: "The church was designed by the superior of the mission, Father Ravalli, a man of skill as an architect and, undoubtedly, judging from his well-thumbed books, of various accomplishments". In the general outbreak led by the Yakima in 1856-67 his influence was largely instrumental in holding the northern tribes quiet.

In 1866 Father Congiato, superior of the Rocky Mountain missions, established the old Mission of St. Mary's on the Bitter Root, among the Flatheads, and among those appointed to the station was Father Ravalli, who had been with it at its abandonment sixteen years before. Here he remained until his death.

His finest eulogy comes from a Protestant historian: "Fifty years a Jesuit and forty years a missionary, one of the noblest men that ever laboured in the ranks of the Church in Montana, his fame stands very high in Montana, where a later generation knows more of him than even of Father de Smet" (Chittenden). (See also FLATHEAD INDIANS; KALISPEL INDIANS; MISSIONS, CATHOLIC INDIAN, OF THE UNITED STATES.)

JAMES MOONEY.

Ravenna, ARCHDIOCESE OF (RAVENNATENSIS).—The city is the capital of a province in Romagna, central Italy, on the left of the Rivers Montone and Ronco, the confluence of which is at Ravenna, not far from the mouths of the Po. The Corsini Canal, constructed by Clement XII in 1736, connects the city and the wet dock with Porto Corsini, on the Adriatic Sea, which is now five miles away. Ravenna is situated on a vast alluvial plain, partly marshy. A pine grove that begins at a distance of two miles from the city, and extends as far as Cervia, was already famous in antiquity, when it extended to the north as far as Aquileia. This grove was greatly damaged by the winter of 1879-80, and also by a fire in 1905. The vast plains are cultivated by the intensive system; and the silk industry also flourishes there.

In ancient times, and in the early Middle Ages,

Ravenna was on the coast, the sea forming at this place a lagoon that is shown on the maps of the sixteenth century; the city itself was traversed in all directions and surrounded by natural streams and artificial canals, the most important of which was the Augusta; so that Ravenna resembled Venice. Until the time of the first emperors, the houses were all built of wood, or on pile foundations. Its geographical position and the prehistoric objects that have been found at the city show Ravenna to be of ancient origin. It increased very much when the Umbrians and the Etruscans took refuge there at the invasion of the Gauls, against whom it allied itself with Rome, at a date that cannot be established with precision, retaining its own city regulations. After the Social War, it obtained Roman citizenship (88 B. C.); and having sided with Marius, Sulla deprived it of its autonomy, and annexed it to the province of Cisalpine Gaul. Before crossing the Rubicon, Cæsar stopped there, concealing his designs under the apparent concern that he entertained for the creation of a school of gladiators. Augustus recognized the military importance of the city, protected, as it was, on the land side by water, and he made it the second station of the imperial fleet, the first being Misenum, near Pozzuoli.

Around the station of the fleet (*classis*) there soon sprang up a city which took that name, and which consisted of the dockyards and of the houses of employees connected with that place. *Classis* was surrounded by walls of its own; and thereafter, the *Via Cæsarea*, which connected it with Ravenna, became flanked with houses on either side, giving rise to the suburb of Cæsarea. Tiberius built a common wall around Ravenna and *Classis*. The chief public buildings were outside the Porta Aurea, among them the amphitheatre, the temple of Apollo, a circus, baths, and a manufactory of arms. Scarcely any of the buildings of that age are preserved, and the aqueduct of Trajan is completely covered by alluvial deposits; the Porta Aurea was torn down in the sixteenth century; and all that remains of the buildings of *Classis* are the columns of a few temples, scattered about in different churches of the city, while some of them were transported to Venice; some sculptures are preserved in the museum (Augustus and his family), or serve to adorn a few churches (San Giovanni in Fonte, San Vitale); there is a mosaic pavement which is also of that period. Funereal monuments abound, especially of naval constructors; the most interesting one of them, in the collection of the Museum, is that of the Longidiena family. Thusnelda, widow of Arminius, and Marbod, King of the Marcomanni, were confined at Ravenna. In 404 this city became the imperial residence, Honorius preferring it to Milan, which was more exposed to the incursions of the barbarians and of Alaric, who was serving in the pay of the empire. At this time Ravenna was adorned with its most famous monuments, secular and sacred, the latter of which have been in great part preserved. Already about 380 Bishop Ursus had dedicated a splendid basilica to the Resurrection of Our Lord (called *Anastasis* in the Byzantine period); on its site the present cathedral stands, entirely remodelled in the eighteenth century, the only remains of the ancient basilica being a few sculptures and mosaics, and two sarcophagi, one of which is said to be that of St. Bartianus; there remain only a few fragments of the ambo of the bishop Angellus (sixteenth century).

No vestige remains of the palaces of Honorius, of *Ad Laurentum*, and of Galla Placidia (425-50). Of the churches that were erected under Honorius, there remains Santa Agata, a basilica of three naves, which in 1893 was restored to its ancient form; it possesses a notable ambo, and ancient columns. San Pietro in *Classis* was torn down in the sixteenth century, to make room for fortifications. Under Galla Placidia there was built the Church of San Giovanni Evangel-

ista, which in the transformations that it underwent in the fourteenth century and in 1747 lost all the mosaics with which it was adorned, preserving only its columns and its *atrium*; the Gothic portico dates from 1316. Of the Church of Santa Croce only one half remains. In the Church of San Giovanni Battista only the columns are ancient. Most important is the chapel of the archiepiscopal palace of San Pietro Crisologo, square in shape, and possessing mosaics, of which the beardless Christ in the centre is notable. The mausoleum of Galla Placidia, which is the Church dei Santi Nazario e Celso (440), contains the best mosaics of Ravenna. It is built in the shape of a Latin cross, and has a cupola that is entirely in mosaics, representing eight Apostles and symbolical figures of doves drinking from a vessel; the other four apostles are represented on the vaults of the transverse arm; over the door is a representation of Christ as the Good Shepherd, young, beardless, with flowing hair, and surrounded by sheep; opposite, there is a subject that is interpreted as representing St. Lawrence. There are three sarcophagi, but it is not known whose they were; the largest is said to have been that of Galla Placidia, and that her body was deposited there in a sitting position, clothed with the imperial mantle; in 1577, however, the contents of the sarcophagus were accidentally burned.

Of the same period is San Giovanni in Fonte, which was the baptistery of the Catholics, dedicated by Archbishop Neon (449-52). It is believed that this church was built over the *calcdarium* of a bath on the same site. It is of octagonal shape, with the interior walls and vault adorned with mosaics. In the centre of the cupola is the baptism of Christ, on a golden field, with a personification of the River Jordan; around are grouped the twelve Apostles on a blue field; and below are other figures, possibly of the prophets; there are also arabesques, etc. The marbles of the socle seem to have been taken from secular buildings. The art of this period has the merits of ancient art applied to Christian subjects, although its technic already begins to show decadence; for the rest it is still Roman, showing no traces of Oriental influence. The same is true of the artistic period inaugurated by Theodoric, King of the Goths. After the battle of Verona, Odoacer withdrew to Ravenna, where he withstood a siege of three years by Theodoric. The taking of Rimini, however, deprived Ravenna of supplies, and thereby compelled the latter city to capitulate. Archbishop Joannes served as the peace mediator (493). Theodoric employed Roman architects for the building of profane as well as sacred structures. It has been suggested that in his buildings a Germanic influence may be perceived; but this is without foundation, for even in the Gothic period Ravenna preserved its western Roman character. Nothing remains of the palace that Theodoric built near San Apollinare Nuovo; what is called Palazzo di Teodorico to-day was an annex of the former, probably a barrack, and received its present form in the eighth century. Excavations are being made there at the present time.

The palace itself was sacked by the Byzantines in 539, and thereafter it became the seat of the exarchs, and of the King of the Lombards. Charles the Great took away the columns of this palace to embellish with them his own palace at Aachen. The last tower that remained of the palace of Theodoric was destroyed in 1295. Theodoric also built the Basilica Herculis, baths, and several churches for the Arians, e. g. San Martino, which is now called San Apollinare Nuovo, because the relics of San Apollinaris were transferred to that church in the ninth century. This church was near the palace of Theodoric, and was the cathedral of the Arians. Its apse and atrium underwent modernization at various times, but the mosaics of the lateral walls, twenty-four columns, and an ambo

are preserved. The mosaics of the right side represent a scheme of twenty-six saints going to receive their crowns, towards a group representing Christ, beardless, enthroned amid four angels; which latter group is the best. This picture contains a schematic representation of the palace of Theodoric. After the Gothic government had passed away, this composition was somewhat transformed, as is shown by some hands that remain near a column. On the left are the virgins moving from the city of Classis towards the group of the Madonna with the Bambino on her lap, and surrounded by four angels; on the two sides are the lines of windows, between which are mosaics representing sixteen saints (Doctors of the Church?) that have much more individuality than the figures already mentioned. On the third story are represented twenty-six scenes of the life and passion of Christ, in which latter, however, the crucifixion is lacking; between each two scenes there is the image of a saint. In another part of the church there is a rough mosaic containing the portrait of the Emperor Justinian.

The Church of Santo Spirito (formerly San Teodoro) was the private church of the Arian bishops; near it is Santa Maria Cosmedin, the baptistery of the Arians, the mosaics of which correspond to those of San Giovanni in Fonte; this baptistery also is an octagonal structure with a cupola. The Church of Sant' Andrea, which was built by Theodoric, was destroyed by the Venetians in 1447. After the Byzantine conquest the Arian churches were consecrated by Archbishop Agnellus for Catholic worship. The mausoleum of Theodoric, a decagonal structure, covered with a great monolith thirty-six feet in diameter, is the monument that reveals Roman art in its purest form, at once austere and graceful. In the Middle Ages the sarcophagus that was used as a church (Santa Maria della Rotonda) was removed, and there appeared in its place a Benedictine monastery. To Theodoric's patronage of the arts was due also the Churches of San Vitale, built by Archbishop Ecclesius (526-34), and San Apollinare in Classe, built by Archbishop Ursicinus (535-39); San Vitale, which is a work of the architect Julianus Argentarius, is an octagonal structure of nearly 114 feet in diameter, with an apse for the altar and presbytery. In 1898 it was restored to its original shape, there being preserved however only the frescoes of the cupola, which are by Barozzi and others; between the eight columns that surround the central space there open eight niches of two stories, the upper one of which was a tribune for women (*matronæum*). The columns, which are placed by pairs between the single pilasters, above and below, are embellished with exquisitely beautiful capitals. The mosaics of the apse and the lateral walls are better than those of the epoch of Theodoric, although not equal to those of the period of the empire. In the apse is represented a juvenile Christ, seated upon the orb, and surrounded by two angels, St. Vitalis, and the Archbishop Ecclesius; below to the right is represented the Empress Theodora with her suite, and to the left Justinian and his suite, there being in the latter the Archbishop Maximianus, in whose time (546-56) the mosaics were executed.

Other representations are of Abraham extending hospitality to the three angels; the sacrifice of Isaac; the sacrifice of Abel; the Eucharistic Sacrifice (table with bread and wine), and the sacrifice of Melchisedec (these have a dogmatic value); there are also representations of Moses, of the prophets, of the Apostles, and of other saints. Among the ancient sarcophagi, a notable one is that of the Exarch Isaac (641), in the Sancta Sanctorum, which must be a work of the fifth century, with representations of Daniel, of the adoration of the Magi, and of the resurrection of Lazarus. San Vitale was the model of the palatine chapel of Charles the Great of Aachen. San Apollinare in

Classe is a work of the same Julianus. This church, which is a basilica of three naves, divided by two lines of marble columns, has preserved its ancient structure better. The marble incrustations of the walls were removed in 1449 by Sigismondo Malatesta. In the lateral naves there are the sarcophagi of eight archbishops, nearly all of them with metrical inscriptions. The mosaics of the apse have been restored; they represent, around a cross on a blue background, the Transfiguration, the preaching of St. Apollinaris, the sacrifice of Abel; Abraham, Melchisedec, the Emperors Constantine IV, Heraclius, and Tiberius granting privileges to the Archbishop Reparatus (671-77), and four are the portraits of bishops. Pope Leo III

ance of the pope, which happened again in 705 in the case of Pope John VI. When, by order of Leo the Isaurian the Exarch Paulus wished to destroy the sacred images about the year 727, Ravenna revolted, and in the fighting that followed the Exarch himself was killed. Agnello tells of a battle between the Ravennese and the Greeks at a time that is not well defined.

In 752 Aistulf, King of the Lombards, took Ravenna; then, however, Pope Stephen II (III) obtained the intervention of Pepin, and the exarchate was united to the dominions of the Holy See. Thereafter Ravenna and the exarchate were governed in the name of the pope by the archbishop, assisted by

THE GOOD SHEPHERD
V-Century Mosaic in the Mausoleum of Galla Placidia, Ravenna

restored the church, to which later there was annexed a Camaldolese monastery.

Ravenna is to-day substantially as it was at the beginning of the Byzantine period: subsequent ages have done nothing except to pass by, transforming, not always happily, the work of the fifth and sixth centuries. In 539 the city fell into the hands of Belisarius, who, pretending to accept the crown of Italy offered to him by Vitiges, was allowed to enter the town; but when the Goths attempted to retake it (548-550), it was held against them. At the close of the war, Ravenna became the seat of the Byzantine governor, and accordingly was better able than Rome to preserve its outward splendour. The Lombards attempted several times to take possession of the city; in 597 Faroald, Duke of Spoleto, succeeded in taking Classe, but was driven from it two years later by the German Droctulf; the same occurred to Ariulfo in 592, and in 716 to Faroald II, the latter of whom was compelled to restore Classe by Liutprand, who in turn took possession of it 726. Liutprand succeeded in taking Ravenna itself in 731, not, however, without the assistance of a party in the town that was averse to Byzantine domination. This aversion had already manifested itself in 692, when Constans II wished to take Pope Sergius to Constantinople; the militias of Ravenna and the Pentapolis hastened to the assist-

three tribunes who were elected by the people. Soon, however, the archbishops came to consider themselves feudatories of the empire; and in fact in the confirmation of their temporal power by Henry II and Barbarossa no mention is made of the sovereignty of the pope. The archbishops of Ravenna were the most faithful supporters of the rights and policy of the emperors in Italy, while the emperors on different occasions held their courts at Ravenna. In 1198, however, that city—where the communal institutions had been greatly developed—placed itself at the head of the league of the cities of Romagna and of the Marches against the imperial power; and consequently Innocent III was able easily to enforce the rights of the Holy See over Ravenna, which were ratified by Otto IV and Frederick II at periods when those princes needed the good will of the pope. In the war of 1218 the Guelph Pietro Traversari, having vanquished the faction of the Ubertini and Mainardi, declared himself Lord of Ravenna, and was succeeded by his son Paolo in 1226. Paolo fought against Frederick II, who in 1240 took the office of *podestà* from Paolo's son, also named Paolo. In 1248, however, the pope took Ravenna, and the Traversari returned to power; but in 1275 they were driven from the city by Guido Novello da Polenta, who was made perpetual captain.

His son Lamberto (1297-1316) abolished the demo-

cratic government, and having died without children was succeeded by his cousin Ostasio I and Guido Novello, of whom the latter was a lover of letters and of the arts; he received Dante with honours, and called to Ravenna Giotto, who painted the vault of San Giovanni Evangelista with frescos, while other artists who studied under him adorned with frescos Santa Maria in porta fuori (supposed portraits of Guido da Polenta, Dante, Chiara, and Francesco da Polenta), and Santa Chiara, founded by Chiara da Polenta in the thirteenth century. Dante died at Ravenna (1321) and was buried in the vestibule of the Church of San Francesco. His present mausoleum was erected in 1482 by Bernardo Bembo. Ostasio, who had assassinated his own brother, the Archbishop Rinaldo, soon thereafter drove from Ravenna Guido, who attempted in vain to return. Ostasio received from Louis the Brave and from Pope Benedict XII the title of vicar. Not less cruel than Ostasio was his son Bernardino (1345-59), against whom his own brothers conspired; they died, however, in the same prison of Cervia into which he had been treacherously thrown. A better ruler was Guido Lucio, who in his old age in 1389 was thrown into prison by his sons, where he ended his days. He was survived by his son Ostasio IV, who died in 1431. Ostasio V in 1438 was forced into an alliance with Duke Filippo Maria of Milan by that prince, on which account the Venetians invited him to Venice, where he soon learned that the annexation to Venice had been proclaimed at Ravenna. He died in a Franciscan convent, the victim of a mysterious assassination. The Venetians governed Ravenna by *provveditori* and *podestà*. In 1509 Julius II attempted to retake all of Romagna that was held by the Venetians, and sent the Duke of Urbino with an expedition. Ravenna was defended by the *podestà* Marcello and by the captain Zeno; but at the news of the defeat of Agnadello, the republic ordered the restoration of Ravenna to the Holy See.

Three years later, in 1512, there took place near this city the disastrous battle in which the French defeated the allied Pontifical and Spanish troops. In 1527, notwithstanding their alliance with Clement VII, the Venetians occupied Ravenna and the Romagna, which, however, they were compelled to restore in 1529. The popes governed Ravenna through a cardinal legate. Of this period are: the monument of the battle of 1512, erected in 1557; the tombs of Guidarello Guidarelli, and Tullio Lombardo, in the Museo Nazionale; those of Luffo Numai and Tommaso Flamberti, in the Church of San Francesco (1509), and, above all, the church and the monastery of Santa Maria in Portu (1553), built on the site, and in part with the materials, of the Church of San Lorenzo in Cæsarea (fifth century); it has a Byzantine Madonna of the tenth century. Its construction was undertaken when the Regular Canons of Portu were obliged to leave Santa Maria in portu fuori; the church has three naves, and an octagonal cupola; the stalls of the choir are adorned with beautiful carvings, and the *loggia* of the garden of the annexed monastery is of very pure style. The façade dates from 1784. The city was adorned with princely palaces, more especially the work of the architects Danisi, Grossi, Morigia, and Zumaglini, while Nicolò Rondinelli, at Santo Domingo, Cotignola, Luca Lunghi and his sons, Guido Reni, at the Duomo, and other painters adorned the churches. Meanwhile, the public works were not neglected. Besides the fortifications already constructed by the Venetians, which were enlarged, there was dug in 1654 the Canale Panfilio (named in honour of Innocent X), by the Cardinal legate Donghi, and, in the following century, the Canale Corsini, works that were necessary not only to facilitate maritime commerce but to preserve the city from inundation

in consequence of the raising of the beds of the rivers. In 1797 Ravenna became a part of the Cispadan Republic, and later of the Cisalpine Republic. The Austrians took it from the French, who in turn drove the former from the city in 1800-01. The town was incorporated into the Kingdom of Italy, after which it was attacked again by the Austrians, and finally was restored to the pope. Provisional governments were established in 1831, 1849, and 1859; and in 1860 the annexation of Ravenna to the Kingdom of Italy was declared.

The academy of fine arts has some paintings by well-known masters, mentioned above: San Romualdo, by Guercino; a collection of Byzantine and of Slav Madonnas, and sculptures by Canova and Thorwaldsen. The Museo Nazionale contains collections of Etruscan, Greek, Roman, and Byzantine coins and inscriptions, and also coins and inscriptions of the Middle Ages; fragments of ancient sculptures, and a bust of Innocent X by Bernini. It occupies the monastery of the Camaldolese of Classe, who moved into the city in 1515. The archiepiscopal palace also has a lapidary hall, ancient vestments, a Lenten calendar for the years 532 to 626, and a chiselled ivory throne of the sixth century, taken to Ravenna in 1001 by Ottone III, who received it from Pietro Orseolo, Doge of Venice.

According to local tradition, St. Peter himself founded the Church of Ravenna, and established as its first bishop St. Apollinaris, a native of Antioch, who according to the same tradition suffered martyrdom under Nero; the acts of his martyrdom, however, have scarcely any historical value; they were probably written under the bishop Mauro (642-61), and intended, together with the alleged Apostolic origin of the See of Ravenna, to abet the autocratic aspirations of that bishop. However, in 1756 there was discovered near Classe a Christian cemetery in which there were found inscriptions that date from the second century; and in 1904 in Classe itself there was unearthed another graveyard, the upper layers of which date from the fifth century. It may be concluded, therefore, that Christianity was taken to Ravenna by sea. It is certain that St. Apollinaris was the first bishop, and that he suffered martyrdom. According to the list of the bishops of Ravenna, handed down to our times by Agnellus (ninth century), who received it from the bishop Marianus (546-56), of whose accuracy there is no reason to doubt, Severus was the twelfth of the series; and as he is among those who signed at the Council of

ST. MICHAEL THE ARCHANGEL
VI-Century Mosaic in the Basilica of
S. Apollinare in Classe, Ravenna

Sardica (343), the epoch of St. Apollinaris may be established as belonging to the beginning of the third century, or possibly to the last decades of the second century, when the Church, under Commodus, enjoyed a measure of peace that was propitious to the development of hierarchical organization. Ravenna accordingly became a centre of Christianization for Emilia. The only martyr among its bishops was St. Apollinaris, whose martyrdom occurred, possibly, under Septimius Severus.

Other martyrs were St. Ursicinus, SS. Fusca and Maura, St. Vitalis (not the St. Vitalis of Rome), etc. Among the bishops, besides those already named, mention should be made of Joannes Angeloptes (430-33), so called because he had the gift of seeing his guardian angel; he obtained through Galla Placidia the title and the rights of metropolitan of the fourteen cities of Emilia and Flaminia. The archbishops, as in the past, continued to be confirmed and to be consecrated by the pope: St. Peter Chrysologus (433-49), formerly Deacon of Imola, was so confirmed and consecrated. For the rest, the presence of the imperial court, and later, of that of the exarch, aroused in the minds of the archbishops a great sense of their dignity and a certain spirit of independence in regard to Rome; while the popes on the other hand were disposed to cede no measure of their rights, as was shown in the case of Simplicius, who threatened Joannes III with the forfeiture of the right to consecrate his suffragans; in the case of Felix IV, in regard to the questions that arose between Bishop Ecclesius (521-34) and his clergy; and in the case of St. Gregory the Great, who was compelled to repress the excess of pomp of Archbishop Joannes V (575-595) and that of his clergy, and who, on account of those conditions, at the death of Joannes, caused the election of Mariniano (606), who had been a companion of the pope at the monastery of Sant' Andrea. The better to insure the subordination of the archbishops, the latter were forced to sign at the time of their consecration a declaration to that end (*indicula et cautiones*), in which were written the chief duties and rights of those prelates. In connexion with this declaration, there arose differences of interpretation between Pope Vitalianus and Archbishop Maurus (648-71), which led to the schism, Maurus having sought and obtained the privilege of autonomy from the Emperor Constans II, who was a Monothelite, and therefore ready to humiliate the pope; even on his deathbed, Maurus exhorted his clergy not to subject themselves to the yoke of Rome; and accordingly Reparatus (671-77) did not go to Rome for his consecration.

It is uncertain whether Reparatus or Theodorus (677-88), who also was consecrated by his suffragans, re-established the union with Rome. Theodorus adhered to the Roman Council of Agatho (680); for the rest, he was hated by his clergy for having suppressed many abuses among them. There followed St. Damianus (688-705); St. Felix (705-23), who at first also had aspirations to independence; but when Justinian II, having recovered the throne, sent a fleet to punish Ravenna for its complicity in his dethronement, as he believed, the archbishop was taken to Constantinople, blinded, and sent to Pontus, whence he was recalled by Philippicus Bardanes (712). Of the constancy of Ravenna against Iconoclasm, mention has already been made above. Sergius (748-69) also had differences with the popes. Georgius (835-46) went to France in search of a grant of autonomy, but was imprisoned by the troops of Charles and Louis II, at war at that time with Lothair (835), and with difficulty was able to return to his country. Matters again became acute under Archbishop Joannes X (850-78), who, moreover, had displeased the clergy and people of his own see and his suffragan bishops by his overbear-

ing acts, consecrating bishops against the pleasure of the people and the clergy, imposing heavy expenses upon his suffragans in the visits that he made every other year, preventing his suffragans from communicating directly with Rome, etc. Accordingly, he was cited to appear at Rome by Nicholas I; but Joannes having refused to obey the summons, the pope went in person to Ravenna, where he became convinced of the general aversion to the archbishop, who, being then deprived of the protection of the emperor, was compelled to appear before the council (861), which reprimanded him. Later, however, he again intrigued against Nicholas, with the Bishops of Trier and Cologne. He was the founder of the Benedictine monastery of Isola Palazziola.

Romanus (878-88) also was disaffected to the Holy See; Joannes XII (905) became Pope John X. Petrus VI (927-71) was obliged to protect the property of the Church in two synods; Gerbertus (998-99) became Pope Sylvester II; under Leo II (999-1001) the Ravennese grammarian Vilgardus was condemned for heresy; Arnoldus (1014-19) was a brother of St. Henry II, who gave to the archbishops temporal sovereignty over Ravenna, Bologna, Imola, Faenza, and Cervia, without mentioning the sovereignty of the pope; of Archbishop Gebhardus (1027-44), St. Peter Damian says that he maintained himself unsullied in the general corruption of that day; Hunfredus (1046-1051) had been chancellor of Henry III; under him there arose the question of precedence between the bishops of Milan and Ravenna at the imperial court, which gave room to an altercation between the suites of those prelates at the coronation of Henry III. Hunfredus, like his successor, Enrico (1052-71), who had been vice-chancellor of Henry III, was of the imperial party, and opposed to the pope; Enrico favoured the cause of the antipope Cadalous. Guibertus, who was chancellor of Henry IV, caused himself to be elected antipope, in opposition to Gregory VII (1080), by whom he had been excommunicated since 1076. At the beginning of the twelfth century the Blessed Petrus Onesti founded the Congregation of the Regular Canons of Santa Maria in Portu. Anselmus (1155-58), formerly Bishop of Havelberg, is famous for his legations to Constantinople, and for his polemical works against the Greeks. Guido da Biandrate (1158-69) favoured the schism of Barbarossa, who was his protector. In the time of Gherardo (1170-90), there arose the question between the monks of Classe and those of San Martino in regard to the body of St. Apollinaris, which, the monks of San Martino claimed, had been transferred to their church for its safety against the incursions of the Saracens.

Filippo Fontana (1251-70) preached the crusade against Ezzelino. After his death the see remained vacant for four years, until Gregory X appointed to it Bonifacio Fieschi (1274-94). St. Rinaldo Conco-reggi (1303-21) restored Christian life, and held six provincial synods. Rinaldo da Potenta was killed by his own brother, Ostasio (1322), who then usurped the Lordship of Ravenna. Fortuniero Vaselli (1342-1347) made a crusade against the Ordelaffi of Forlì and the Manfredi of Faenza, and concluded a peace between Venice and Genoa. Pileo de Prata (1370-87), a man of stern doctrines, was made a cardinal by Urban VI, and sent as legate to Germany and Hungary, which countries he held in obedience to the Holy See. Cosmo Migliorati (1387) became in 1400 Pope Innocent VII, and named as his successor at Ravenna his nephew, Giovanni Migliorati (1400-10), whom he made a cardinal. Roverella (1445-76), later a cardinal, was a man of great learning, who was sent on various occasions as legate to England and elsewhere. Pietro Accolti (1524-32) had been professor of canon law at Pisa, and secretary to Julius II. Benedetto Accolti (1532-49), a famous man of letters and historian, was imprisoned under Paul III for unknown

reasons. An awakening of Christian life, such as had taken place on former occasions in Italy, was effected at this time at Ravenna. The pious priest Gerolamo Maluselli established the congregation of secular priests of the Buon Gesù (1531); while there appeared a lay oratory, and the Blessed Gentile, widow, and Margherita de' Molli shone for their virtues. Cardinal Giulio della Rovere (1565-78) acquired great merit by the ecclesiastical reforms he effected; he held many provincial and diocesan synods, and built the seminary. His work was continued by Cardinal Cristoforo Boncampagni (1578-1603), Pietro Aldobrandini (1604-21), and Luigi Capponi (1621-1645), of whom the latter caused the paintings of the cathedral to be executed. Maffeo Farsetti (1727-41) restored the cathedral. In the revolutionary fury that broke out at Ravenna, Archbishop Antonio Codronchi displayed great firmness and prudence (1785-1826). Cardinal Enrico Orfei (1860-70) was for two years prevented by the new Government from taking possession of his see.

At the present time the suffragans of Ravenna are Bertinoro, Cesena, Forlì, Rimini, and Sarsina; Cervia was united to Ravenna in 1909. The ecclesiastical provinces of Bologna (1585), and Ferrara (1735), as well as Modena, until 1106 belonged to Ravenna. The archdiocese has 64 parishes, with 103,051 inhabitants, and 154 secular priests; 3 religious houses for men, with 11 priests, and 10 religious houses for women; 1 educational institution for boys, under the Salesians, and 6 for girls.

U. BENIGNI.

Ravesteyn, JOSSE, b. about 1506, at Tielt, a small town in Flanders, hence often called TILLETANUS (JODACUS). He studied philosophy at the Collège du Lys, in the University of Louvain, and in 1525 graduated fourth. He was appointed to teach philosophy in the same college, where he continued his course of theology, under the professors, Ruard Tapper and Jean Leonardi, surnamed Hasselius. From 1540 to 1553 he was president of the College of Housterle, and associated with the Abbé de Ste- Gertrude as guardian of the privileges of the university. In 1546 he became ordinary professor in the theological faculty and canon of the first rank in the collegiate chapter of St-Pierre. He was then only a licentiate in theology, but received the doctorate on 5 October following. On the recommendation of Charles Quint he was sent to the Council of Trent (1551) and took an active part in the preparatory work of Sessions XIII-XVI. Arrived at Trent in Sept., 1551, with his four colleagues from the University of Louvain, he presented in November a memorandum "super articulis de sacramentis poenitentiae et extremæ unctionis". Later he drew up another on the two articles concerning the Mass. Called by Ferdinand I to the Conference of Worms in 1557, he accompanied François Sonnius and Martin Rythovius and there met three other theologians from the Low Countries: Jean Delphinus, Barthélemy Latomus, and P. Canisius. About 1558 he was made

provost of Walcourt, in Namur. In 1561, on the resumption of the work of the general council, he was proposed as a delegate, but failing health forced him to decline the honour. In 1559 he succeeded Ruard Tappert as director of the nuns in the hospital at Louvain, an office he filled till his death, 1570. Through personal merit Ravesteyn was selected as rector of the university in 1545 and 1550. He was a pious and learned priest, zealous in teaching purity of doctrine. Through his efforts the teachings of the innovator Baius were censured by the Spanish Universities of Salamanca and Alcalá, by the Faculty of Paris in 1560, and by Pius V in his Bull "Ex omnibus afflictionibus", 1 Oct., 1567.

Ravesteyn's works are: "Epistola Ven. Patri Laurentio Villavincenio", against Baianism; "Demonstratio religionis christianæ ex verbo Dei"; "Confessionis, sive doctrinæ, quæ nuper edita est a ministris qui in ecclesiam Antverpiensem irrepererunt et Augustanæ confessioni se assentiri profitentur succincta confutatio"; "Apologia Catholica confutationis profanæ illius et pestilentis confessionis, quam Antverpiensem appellat pseudoministri quidam, contra inanes cavillationes Matthæi Flacci Illyrici"; "De concordia gratiæ et liberi arbitrii"; "Epistolæ tres Michaeli de Bay"; "Apologia seu defensio decretorum concilii Tridentini de sacramentis adversus censuras et examen Martini Kemnitii" in two parts. In this "Apology", which is his chief work, the author comments on, and brilliantly defends, the dogmatic decrees of Sessions IV-VI, the doctrine concerning the Canon of the Scriptures, original sin and justification, the sacraments in general, baptism, confirmation, the Eucharist as a sacrament and as a sacrifice. He died before writing a third part, in which he intended to treat of the other sacraments.

J. FORGET.

Ravignan, GUSTAVE XAVIER LACROIX DE, French Jesuit, pulpit orator, and author, b. at Bayonne (Basses-Pyrénées), 1 Dec., 1795; d. at Paris, 26 Feb., 1858. Sent quite young to Paris, he studied in private boarding-schools, and for some time attended lectures at the Lycée Bonaparte. He first thought of entering the diplomatic service but decided in 1813 for the law. On Napoleon's return from Elba, de Ravignan joined the Duc d'Angoulême's Royal Volunteers and made the unsuccessful Spanish campaign, distinguishing himself under fire at Hélette. He soon resigned his commission of lieutenant of cavalry and resumed his law studies. Called to the bar he was elected in 1817 a king's counsel in the Paris circuit and in 1821 deputy attorney-general. He was becoming famous when in May, 1822 he entered the Sulpician seminary at Issy. This made a sensation, heightened when on 2 November, he was received into the Jesuit novitiate at Montrouge. Here he laid the foundations of that lofty but practical spirituality, spirit of mortification and prayer, mastery over self, generosity, and zeal which ever marked him. After his noviceship, he studied theology and was ordained priest 25 July, 1828. Like Bourdaloue, de Ravignan prepared for the pulpit in a professor's chair. For two years at St. Acheul near Amiens, for three more at Brieg, Switzerland, he taught dogmatic theology. While at Brieg and at Estavayer on the Lake of Neufchâtel, he gave missions and retreats in the neighbouring country. His stirring Lenten course in the Cathedral of Amiens (1835), his success at Paris in St. Thomas d'Aquin (1836), pointed him to Mgr de Quélen as the logical successor of Lacordaire at Notre Dame.

On the Notre Dame conferences of Ravignan's oratorical fame mainly rests ["Conférences du R. P. de Ravignan de la Compagnie de Jésus" (Paris, 1860, 4 vols., 5th ed., Paris, 1897); "Conferences of Revd. Fr. de Ravignan" (Lent of 1846), tr. Fetherston (London, 1847), cf. also, "The Catholic Pulpit" (London, 1849)]. The subjects treated were the endless conflict of truth and error, God, man, the Divinity, Person, and Doctrine of Christ, the Church and its dogmas. Here the orator introduced a course of moral conferences, but returned to apologetics in a study of the relations between reason and faith. Reading these conferences now, we find little colour,

GUSTAVE-XAVIER-LACROIX DE
RAVIGNAN

imagination, or dramatic movement; we miss the compelling magnetism of the speaker. De Ravignan was "Virtue preaching Truth". His logic, the serene authority of his affirmation, his unction, his power in repose, his noble presence, his priestly zeal captivated, dominated his hearers. The men's retreats begun by him, and in which he excelled, completed the work. Superior of his brethren at Bordeaux (1837-42), at Paris (1848-51), then, as afterwards, he was preaching in almost every important city in France. He was heard also in Rome, in Belgium, and in London (1851) where he assisted Manning at his first Mass. Everywhere he was winning souls.

In 1843-45, public opinion led by Thiers, Cousin, Michelet, Libri, Quinet, Béranger, had set against the Jesuits. Some said they were working for the Bourbons, others, that they were too loyal to the House of Orléans. Montalembert, Dupanloup, Vatimesnil, Beugnot, Barthelémy defended them. De Ravignan, the foremost Jesuit in France, was accused of having left the order; at another time, of having made unworthy concessions to the Government. He easily cleared himself with his superior-general, Fr. Roothaan, and vindicated his order, its asceticism, its constitutions, its doctrines, its work, in a calm, logical, but serenely eloquent book, "De l'Existence et de l'Institut des Jésuites" (Paris, 1844; 9th ed., Paris, 1879); tr. Seager (London, 1844) and Atchison (London, 1844). The book created a sensation, Royer-Collard enthusiastically praising it. Twenty-five thousand copies were sold in one year, but the fight continued. Through its agent, Pellegrino Rossi, the Government of Louis-Philippe asked Gregory XVI to secularize the French Jesuits. The pope replied that to do so would be a violation of the concordat and the constitution, that no crime was imputed to the order, that the French episcopate spoke well of it. He refused, although the Government and its agent tried to create a contrary impression. De Ravignan advised a firm constitutional resistance, but Fr. Roothaan, to spare further embarrassment to the Holy See, without commanding, suggested that the French Jesuits might temporarily and partially disband. They did so, and for a few years, as a corporate body, ceased to exist in France. A painful controversy with Mgr Affre, the future martyr Archbishop of Paris, whose measures against the order in 1844 Gregory XVI was obliged to stop, was a sore trial to de Ravignan.

Throughout he remained loyal to the Society, respectful but firm with the archbishop. Another trial awaited him. In the campaign for the Falloux Law (1850) for the liberty of education, though recognizing the shortcomings of the measure and trying to eliminate them, he urged the Catholics to unite and to use their opportunities. He was accused of disrupting their ranks, of being a blind follower of de Falloux, Montalembert, and Dupanloup. He was again triumphantly vindicated.

Twice again de Ravignan came prominently before the public. In 1855 he preached the Lenten sermons at the Tuileries, before Napoleon III and Empress Eugénie. Sickness had undermined his strength, but he spoke with much of his old vigour, and with the same authority and unction. In 1847 Crétineau-Joly had published his "Clément XIV et les Jésuites". His strictures on Clement XIV were severe and unfair. In 1852 the learned Augustine Theiner had written his "Geschichte des Pontificats Clemens XIV". In it Clement XIII the defender of the Jesuits was attacked, Clement XIV, who suppressed them, wronged by injudicious flat-teries. At the request of Fr. Roothaan, de Ravignan wrote: "Clément XIII et Clément XIV" (Paris, 1854, 2 vols.). He endeavoured to put the facts in their true light. The literary merit of the work is not of the highest, but the author writes with impartiality and candour. The work of de Ravignan's last years if not prominent or striking was fertile in results. The confessional, direction of souls, retreats and conferences for noble ladies, familiar talks to the poor, employed his zeal. Many thought him careless of his reputation, but though anxious to do well, he preferred to do good. Honours sought him. Several times his name was mentioned for the Archbishopial See of Paris, but faithful to his vows, he refused the honour. He preferred to work as a simple religious in every good cause. He championed the proclamation of the Dogma of the Immaculate Conception, supported Pététot and Gratry in the reorganization of the French Oratory, and Muard in the formation of the Benedictine monastery of la Pierre-qui-Vire. After a two months' sickness, tenderly watched by his friend, superior, and future biographer, de Ponlevoy, he died a saintly death. Berryer had knelt in tears at his bedside; Mgr Dupanloup preached his funeral oration; thousands followed the remains of the "Apostle of Paris" to the grave.

Besides the volumes mentioned, de Ravignan did not publish anything of great importance. The following works have been gathered and edited since: "Entretiens Spirituels" etc. (Paris, 1859; 7th ed., Paris, 1881); "Suite des entretiens spirituels," etc. (Paris, 1863, 2nd ed., 1871), tr. Ram, "Conferences on the Spiritual Life" (London, 1873; 5th ed., New York, 1895); "La vie chrétienne d'une dame dans le monde" (Paris, 1861, 5th ed., 1895); "Fr. de Ravignan on Prayer" (Dublin, 189-); "Pensées et Maximes" (Paris, 1911); cf. also articles in "L'Ami de la Religion", CXVI, CXXXIX to CLI, passim.

JOHN C. REVILLE.

Rawes, HENRY AUGUSTUS, Oblate of St. Charles, hymn-writer and preacher, b. at Easington near Durham, England, 11 Dec., 1826; d. at Brighton, 24 April, 1885. Educated at the grammar school, Houghton-le-Spring, where his father was headmaster, and at Trinity College, Cambridge, where he proceeded B.A. in 1849 and M.A. 1852, Rawes entered the Anglican ministry, and after holding curacies at St. Botolph's, Aldgate, and St. Bartholomew's, Moor Lane, became warden of the House of Charity, Soho, 1854. In 1856 he was received into the Catholic Church at Edinburgh by Fr. Ignatius Grant, S.J., and on Whit-Monday, 1857, became one of the original members of the English Congregation of Oblates of St. Charles, founded at St. Mary of the Angels, Bayswater. Ordained priest in November, 1857, Fr. Rawes took charge of the poor district of the Potteries, Notting Hill, where he built the Church of St. Francis of Assisi. As Cardinal Wiseman bears witness, "this has been built entirely at the expense of Fr. Rawes, an Oblate, who has spent all his fortune upon it" (Letter to Cardinal Barnabó in 1860; cf. W. Ward, "Life and Times of Cardinal Wiseman", II, 354). After acting as prefect of studies in St. Charles's College, Bayswater, for some years, and doing good work by his sermons and devotional writings, Fr. Rawes was created D.D. by Pius IX at the instance of Cardinal Manning. At Whitsuntide, 1880, he became Superior of the Oblate Congregation, and being re-elected in 1882 and 1884, continued to hold this office till his death.

His sermons and devotional writings are strongly marked by a strain of mysticism which was already present in his early Anglican preaching. "Homeward: a Tale of Redemption" (3rd ed., 1873) is an allegory somewhat in the vein of Bunyan, though illuminated by the light of Catholic theology. "The Beloved Disciple" (1872) is inspired by the devotion of which the author gave practical proof a few years later by founding a confraternity in honour of the Evangelist. In like manner, his deep personal devotion to the Holy Ghost found expression not only in his writings but in the foundation of the Society of Servants of the Holy Ghost, which was subsequently made an archconfraternity by Leo XIII. Among other smaller devotional works are: "Sursum; or, Sparks Flying Upward" (1864); "Septem; or, Seven Ways of Hearing Mass" (7th ed., 1869), and some original devotions for the Way of the Cross, published in 1877 with drawings by H. N. J. Westlake. His hymns, too little known nowadays, are remarkable for poetic beauty and deep religious devotion. Some of them appeared separately, but his best work is preserved in "Foregleams of the Desired" (3rd ed., 1881). When received into the Church he had published "The Lost Sheep, and other Poems". Besides his original writings, Fr. Rawes translated the Encyclical of Leo XIII on Catholic Philosophy and the treatises of St. Thomas Aquinas on the Blessed Sacrament and on the Lord's Prayer. His volume of sermons, "God in His Works" (1872), shows that his poetic mysticism was compatible with a keen interest in modern scientific methods. And it may be remarked that in like manner his ultramontane conservatism in matters of theology and Biblical criticism did not hamper his warm sympathies with political Liberalism. Yet his learned discourses and high-flown poetic fancies were a curious counterpart to his quaint ways and the blunt, homely simplicity of his language. At the same time the tender spirit that speaks in some of his hymns and prayers gives us a true knowledge of his kindly nature.

W. H. KENT.

Rawlins, ALEXANDER, VENERABLE. See WALPOLE, HENRY, VENERABLE.

Raymbault, CHARLES, missionary, b. in France, 1602; entered the Society of Jesus at Rouen (1621); d. at Quebec, 1643. He was procurator to the Canadian mission when he was called to Quebec (1637). When the time came (1640) to give missionaries to the wandering tribes who frequently visited the Hurons, chiefly Nipissings and Algonquins, living east and north of Lake Huron and on the banks and islands of the Ottawa, Raymbault was sent with Father Pijart to follow them. This mission offered greater hardships than that of the Hurons, Neutrals and Indians of the Tobacco Nation. The generosity and devotedness of the Jesuits soon bore fruits. When the Sautaux Indians (1641) besought the "blackrobes" to visit them, Raymbault travelled, with the future martyr Jogues, as far as the Sault Ste. Marie on a voyage of exploration and with a view to a more permanent apostolate. The missionaries, besides their desire to conquer souls, were interested in the discovery of the famous passage to the Western Sea. Shortly after his return, Raymbault intended to join the Nipissings in their winter quarters but he fell exhausted with fatigue, and was brought to Quebec, where he soon died, the first Jesuit who died in Canada. He was buried beside Champlain. According to the Relation of 1643, he was a man of great stature, of ordinary talent and learning, of sound judgment, excellent heart, and experienced in temporal affairs.

LIONEL LINDSAY.

Raymond IV, OF SAINT-GILLES, Count of Toulouse and of Tripoli, b. about 1043; d. at Tripoli in 1105. He was the son of Raymond III, Pons, and in 1088 succeeded his brother, William IV, who had died without male issue. From 1066 he had been Count of Rouergue, of Nîmes, and of Narbonne, thus becoming one of the most powerful lords of southern France. In 1095 he received the pope, Urban II, on his own estates and took the Cross with enthusiasm, vowing never to return to his own dominions. After a pilgrimage to Chaise Dieu, he set out in October, 1096, entrusting the care of his dominions to his son Bertrand. His army was composed of Aquitanians and Provençals, the pope's legate, Adhémar of Monteil, Bishop of Le Puy, accompanying him. He traversed Lombardy and proceeded to Constantinople through the valleys of the Eastern Alps. After many a successful combat with the half-barbarous Slavs who inhabited this region, he arrived at Durazzo, where he found letters from the Emperor Alexius inviting him to Constantinople. Raymond accepted, leaving his army, which in his absence pillaged the country, and was attacked by the imperial troops. At Constantinople Raymond refused to swear allegiance to Alexius, as most of the crusading chiefs had done. He afterwards took an active part in the expedition against Jerusalem, and, notwithstanding his rivalry with Bohemond, exercised a very great influence on the course of events. He could not prevent Bohemond from taking Antioch in 1098, and out of spite against the Norman chief he became reconciled with the Emperor Alexius, to whom he restored the city of Laodicea (February, 1099). After his rupture with Bohemond, Raymond directed the great bulk of the crusaders against Jerusalem, and was actively engaged in the capture of the Holy City (8 July, 1099). He refused the title of king, and left Jerusalem to return to Constantinople in 1100. He was chosen chief of a new army of crusaders, which was destroyed by the Turks in Asia Minor. Returning to Syria in 1102, he was imprisoned at Tarsus by Tancred, and, on being released, seized Tripoli (1103), where he died two years later.

LOUIS BRÉHIER.

Raymond VI, COUNT OF TOULOUSE, b. 1156; d. 1222; succeeded his father, Raymond V, in 1195. He was a debauched and sceptical prince, who successively put away three wives, taking as his fourth Jeanne, sister of Richard Cœur de Lion. Loaded with all the benefits of the Church, he showed the greatest benevolence to the heretical Cathares or Albigenses, whom his father had persecuted, refused to molest them, even allowing them to preach before him, and perhaps allied himself with their sect. His court was dissolute, and he took no notice of the reproof of the legate of Innocent III, Pierre de Castelnau, who finally excommunicated him in 1207. But shortly after, an equerry of the count having treasonably killed de Castelnau, Raymond was immediately deposed by the pope. Raymond, frightened into submission, expelled the heretics from his dominions, and on 18 June, 1209, in the presence of the pontifical legate, did public penance before the Church of St-Gilles. When the crusaders, assembled in the north of France, invaded Languedoc, Raymond took part in the Crusade and assisted at the sieges of Beziers and Carcassonne in 1209. Returning to Toulouse, Raymond tried to elude his obligations and was excommunicated by the Council of Avignon. He then went to Rome to clear himself of the murder of de Castelnau, and was received by Innocent III, but on his return found his estates entirely overrun by Simon de Montfort. In 1212 he held only Toulouse and Montauban. His brother-in-law, Peter, King of Aragon, came to his rescue, but was killed at the battle of Murat in 1213. In 1215 Simon de Montfort besieged Toulouse and Narbonne. Instead of organizing resistance, Raymond had negotiated with the pontifical legates, who made him the most humiliating propositions. Deprived of his estates, he retired to England, later appearing at the Lateran Council (1215), where he sought to interest Innocent III in his favour. The pope, however, ceded the estates of Raymond to Simon de Montfort, reserving for his son only the Marquessates of Provence and Beaucaire. An exile in Aragon, Raymond VI reassembled his troops, and took Toulouse (7 November, 1217), later defending it successfully against Simon de Montfort, who was killed 25 June, 1218. Before his death Raymond VI had wrested from Amaury de Montfort nearly all the conquests of his father.

Raymond VII, COUNT OF TOULOUSE, son of Raymond VI, b. at Beaucaire, 1197; d. at Milhaud, 1249; had espoused a sister of the King of Aragon, and had assisted his father in the reconquest of his estates. In January, 1224, Amaury de Montfort, reduced to the sovereignty of Narbonne, concluded a treaty with him, but ceded his rights in the south to Louis VIII of France. In vain Raymond VII offered his obeisance to the assembly of Bourges in 1226; a new Crusade was decided upon. Louis VIII seized Avignon and occupied Languedoc without resistance, but on his return to the north he died 8 Nov., 1226, at Montpensier. Raymond VII, profiting by the feebleness of Blanche of Castile, took several places from Imbert de Beaujeu, seneschal of the King of France. This success was of short duration; in 1228 new bands of crusaders began to plunder the country of Toulouse, and soon Raymond lost nearly all his strongholds. He then asked peace from Blanche of Castile. After the conference of Meaux, Raymond returned to Paris, and on 12 April, 1229, in the Church of Notre Dame, did public penance and was released from his excommunication. He pledged

himself to demolish the walls of Toulouse, and to give his daughter Jeanne in marriage to Alphonse of Poitiers, brother of King Louis IX. Returning to Toulouse, Raymond VII kept his promises and accepted the establishment of the Inquisition. In 1234 he went to Rome, and received from the pope the restitution of the Marquessate of Provence. In spite of his zeal in suppressing heresy, he was several times accused of favouring the massacre of the inquisitors. He allied himself with the Emperor Frederick II against the pope, then with the King of England, Henry III, against Louis IX. The victory of the latter at Taillebourg caused him to renew his oath of fealty. In 1247, as he was starting for Palestine with St. Louis, he died, leaving his estates to his daughter Jeanne.

LOUIS BRÉHIER.

Raymond Lully (RAMON LULL), "Doctor Illuminatus", philosopher, poet, and theologian, b. at Palma in Majorca, between 1232 and 1236; d. at Tunis, 29 June, 1315. Probably a courtier at the court of King James of Aragon until thirty years of age, he then became a hermit and afterwards a tertiary of the Order of St. Francis. From that time he seemed to be inspired with extraordinary zeal for the conversion of the Mohammedan world. To this end he advocated the study of Oriental languages and the refutation of Arabian philosophy, especially that of Averroës. He founded a school for the members of his community in Majorca, where special attention was given to Arabic and Chaldean. Later he taught in Paris. About 1291 he went to Tunis, preached to the Saracens, disputed with them in philosophy, and after another brief sojourn in Paris, returned to the East as a missionary. After undergoing many hardships and privations he returned to Europe in 1311 for the purpose of laying before the Council of Vienna his plans for the conversion of the Moors. Again in 1315 he set out for Tunis, where he was stoned to death by the Saracens.

Raymond's literary activity was inspired by the same purpose as his missionary and educational efforts. In the numerous writings (about 300) which came from his facile pen, in Catalanian as well as in Latin, he strove to show the errors of Averroism and to expound Christian theology in such a manner that the Saracens themselves could not fail to see the truth. With the same purpose in view, he invented a mechanical contrivance, a logical machine, in which the subjects and predicates of theological propositions were arranged in circles, squares, triangles, and other geometrical figures, so that by moving a lever, turning a crank, or causing a wheel to revolve, the propositions would arrange themselves in the affirmative or negative and thus prove themselves to be true. This device he called the *Ars Generalis Ultima* or the *Ars Magna*, and to the description and explanation of it he devoted his most important works. Underlying this scheme was a theoretical philosophy, or rather a theosophy, for the essential element in Raymond's method was the identification of theology with philosophy. The scholastics of the thirteenth century maintained that, while the two sciences agree, so that what is true in philosophy cannot be false in theology, or vice versa, they are, nevertheless, two distinct sciences, differing especially in that theology makes use of revelation as a source, while philosophy relies on reason alone.

The Arabians had completely separated them by maintaining the twofold standard of truth, according to which what is false in philosophy may be true in

theology. Raymond, carried on by his zeal for the refutation of the Arabians, went to the opposite extreme. He held that there is no distinction between philosophy and theology, between reason and faith, so that even the highest mysteries may be proved by means of logical demonstration and the use of the *Ars Magna*. This of course removed all distinction between natural and supernatural truth. Unlike Abelard's, however, Raymond's rationalism was of the mystic type: he taught expressly that, for the understanding of the highest truths, reason must be aided by faith; that once faith has flooded the soul with its radiance, reason, enlightened and strengthened by faith, "is as capable of showing that there are three persons in one God as it is of proving that there cannot be three Gods". "Relying on the grace of God", he writes, "I intend to prove the articles of faith by convincing reasons" ("Opera", Strasburg ed., p. 966). On the other hand, he held that, although reason needs this Divine assistance, faith is just as much in need of reason; faith may deceive us unless reason guides it. He who relies on faith alone is like a blind man who, relying on the sense of touch, can sometimes find what he wants but often misses it; to be certain of finding his object, he needs sight as well as touch. So Raymond held that a man, in order to find out the truth about God, must bring reason to the task as well as faith.

These principles were taken up by the followers of Raymond, known as Lullists, who for a time had so great an influence, especially in Spain, that they succeeded in founding chairs at the Universities of Barcelona and Valencia for the propagation of the doctrines of the "Illuminated Doctor". The Church authorities, however, recognized the dangerous consequences which follow from the breaking down of the distinction between natural and supernatural truth. Consequently, in spite of his praiseworthy zeal and his crown of martyrdom, Raymond has not been canonized. His rationalistic mysticism was formally condemned by Gregory XI in 1376 and the condemnation was renewed by Paul IV. Raymond's works were published in ten folio volumes at Mainz, 1721-42. There are, besides, several editions of portions of his writings. His poems and popular treatises, written in Catalanian, had a very wide circulation in his own day, and their style has won him a high place in the history of medieval Spanish literature. The best known edition of the works in which he describes his logical machine is the Strasburg edition of 1651. The "Rivista Lulliana", a periodical devoted to the exposition of Raymond's philosophy, was started at Barcelona in 1901.

RIBEIRA, *Origines de la filosofia de Ramon Lullo* (Madrid, 1899); DENIFLE in *Arch. f. Litt. u. Kirchengesch.* (1888), 352; DE WULF, *History of Medieval Phil.*, tr. COFFEY (New York, 1909), 403 sqq.; TURNER, *History of Philosophy* (Boston, 1903), 394 sqq.

WILLIAM TURNER.

Raymond Martini, Dominican, theologian, Orientalist, b. at Subirats, Catalonia, c. 1220; d. after July, 1284. In 1250 he was selected by his superiors to study Oriental languages, in 1264 became a member of the commission appointed by Jaime I of Aragon to censure the writings possessed by the Jews, and subsequently preached to the Moors in Spain and Tunis. Returning to Barcelona (1269) he successfully taught the Oriental languages and wrote against the Jews and Moors. His chief work, "Pugio Fidei Christianæ" completed after 1278, printed in Paris, 1651, and Leipzig, 1687, is written in Latin and Hebrew. It appeals to the Hebrew Scriptures and ancient rabbinical writings to prove the truth of Christianity against the Jews. The work, which clearly indicates that Raymond Martini was extremely well-read in Hebrew literature, is much valued on account of its citations from the Talmud and other sources, and has also been highly esteemed

as a polemical source. It is not probable, however, that it was known and used by St. Thomas Aquinas. Martini's other works are the recently discovered "Explanatio symboli apostolorum ad institutionem fidelium edita", written about 1256, of which important fragments were edited by Denifle, and two polemical works also antedating the "Pugio Fidei", but both lost, "Summa contra Alcoranum" and "Capistrum Judæorum".

J. A. McHUGH.

Raymond Nonnatus, SAINT (in Spanish SAN RAMÓN), b. 1200 or 1204 at Portello in the Diocese of Urgel in Catalonia; d. at Cardona, 31 Aug., 1240. His feast is celebrated on 31 August. He is pictured in the habit of his order surrounded by ransomed slaves, with a padlock on his lips. He was taken from the womb of his mother after her death, hence his name. Of noble but poor family, he showed early traits of piety and great talent. His father ordered him to tend a farm, but later gave him permission to take the habit with the Mercedarians at Barcelona, at the hands of the founder, St. Peter Nolasco. Raymond made such progress in the religious life that he was soon considered worthy to succeed his master in the office of ransom. He was sent to Algiers and liberated many captives. When money failed he gave himself as hostage. He was zealous in teaching the Christian religion and made many converts, which embittered the Mohammedan authorities. Raymond was subjected to all kinds of indignities and cruelty, was made to run the gauntlet, and was at last sentenced to impalement. The hope of a greater sum of money as ransom caused the governor to commute the sentence into imprisonment. To prevent him from preaching Christ, his lips were pierced with a red-hot iron and closed with a padlock. After his arrival in Spain, in 1239, he was made a cardinal by Gregory IX. In the next year he was called to Rome by the pope, but came only as far as Cardona, about six miles from Barcelona, where he died. His body was brought to the chapel of St. Nicholas near his old farm. In 1657 his name was placed in the Roman martyrology by Alexander VII. He is invoked by women in labour and by persons falsely accused. The appendix to the Roman Ritual gives a formula for the blessing of water, in his honour, to be used by the sick, and another of candles.

FRANCIS MERSEMAN.

Raymond of Penafort, SAINT, b. at Villafranca de Benadis, near Barcelona, in 1175; d. at Barcelona, 6 Jan., 1275. He became professor of canon law in 1195, and taught for fifteen years. He left Spain for Bologna in 1210 to complete his studies in canon law. He occupied a chair of canon law in the university for three years and published a treatise on ecclesiastical legislation which still exists in the Vatican Library. Raymond was attracted to the Dominican Order by the preaching of Blessed Reginald, prior of the Dominicans of Bologna, and received the habit in the Dominican Convent of Barcelona, whither he had returned from Italy in 1222. At Barcelona he was co-founder with St. Peter Nolasco of the Order of Mercedarians. He also founded institutes at Barcelona and Tunis for the study of Oriental languages, to convert the Moors and Jews. At the request of his superiors Raymond published the "Summa Casuum", of which several

editions appeared in the sixteenth and seventeenth centuries. In 1229 Raymond was appointed theologian and penitentiary to the Cardinal Archbishop of Sabina, John of Abbeville, and was summoned to Rome in 1230 by Gregory IX, who appointed him chaplain and grand penitentiary. The reputation of the saint for juridical science decided the pope to employ Raymond of Penafort's talents in re-arranging and codifying the canons of the Church. He had to rewrite and condense decrees that had been multiplying for centuries, and which were contained in some twelve or fourteen collections already existing. We learn from a Bull of Gregory IX to the Universities of Paris and Bologna that many of the decrees in the collections were but repetitions of ones issued before, many contradicted what had been determined in previous decrees, and many on account of their great length led to endless confusion, while others had never been embodied in any collection and were of uncertain authority.

The pope announced the new publication in a Bull directed to the doctors and students of Paris and Bologna in 1231, and commanded that the work of St. Raymond alone should be considered authoritative, and should alone be used in the schools. When Raymond completed his work the pope appointed him Archbishop of Tarragona, but the saint declined the honour. Having edited the Decretals he returned to Spain. He was not allowed to remain long in seclusion, as he was elected General of the Order in 1238; but he resigned two years later. During his tenure of office he published a revised edition of the Dominican Constitutions, and it was at his request that St. Thomas wrote the "Summa contra Gentes". St. Raymond was canonized by Clement VIII in 1601. His "Summa de Pœnitentia et Matrimonio" is said to be the first work of its kind. His feast is 23 Jan.

MICHAEL M. O'KANE.

Raymond of Sabunde (SABONDE, SEBON, SEBEYDE, etc.), b. at Barcelona, Spain, towards the end of the fourteenth century; d. 1432. From 1430 to his death he taught theology, philosophy, and medicine at the University of Toulouse. Apparently, he wrote several works on theology and philosophy, only one of which remains, "Theologia Naturalis". It was first written in Spanish, translated into French by Montaigne (Paris, 1569) and into Latin at various times (e. g. Deventer, 1487; Strasburg, 1496; Paris, 1509; Venice, 1581, etc.). Montaigne bears witness to the extraordinary popularity which the work enjoyed in his day. It represents a phase of decadent Scholasticism, and is a defence of a point of view which is subversive of the fundamental principle of the Scholastic method. The Schoolmen of the thirteenth century, while holding that there can be no contradiction between theology and philosophy, maintain that the two sciences are distinct. Raymond breaks down the distinction by teaching a kind of theosophy, the doctrine, namely that, as man is a connecting link between the natural and the supernatural, it is possible by a study of human nature to arrive at a knowledge even of the most profound mysteries of Faith. The tendency of his thought is similar to that of the rationalistic theosophy of Raymond Lully (q. v.).

DE WULF, *History of Medieval Philosophy*, tr. COFFEY (New York, 1909), 455 sq.; STRÖCKL, *Gesch. der Phil. des Mittelalters*, II (Mainz, 1865), 105 sq.

WILLIAM TURNER.

Raynaldi (RINALDI), ODORICO, Oratorian, b. at Treviso in 1595; d. at Rome, 22 January, 1671. Of

patrician birth, he studied at Parma and Padua, joined the Oratorians in Rome, and, distinguished for his piety, beneficence, and scholarship, was twice elected superior general of his congregation. He was entrusted with the continuation of the annals of Baronius and, after the publication of the first volume, was offered the direction of the Vatican Library by Innocent X, which honour he declined. His continuation of Baronius extends from 1198 to 1565 and was published at Rome, 1646-77. He was the ablest continuator of the great historian. Although his work is marred here and there by inaccurate chronological data and lack of criticism, the numerous original documents which it reproduces render it very valuable. Raynaldi also published excerpts in Latin and Italian both from the work of Baronius and his own continuation of it.

MANSI in *Baronius-Theiner*, pp. iii-viii; *Annales Eccles.*, XX (Bar-le-Duc, 1870), 3-8.

N. A. WEBER.

Raynaud, THÉOPHILE, theologian and writer, b. at Sospel near Nice, 15 Nov., 1583; d. at Lyons, 31 Oct., 1663. He entered the Society of Jesus, 21 November, 1602, taught grammar and humanities at Avignon, philosophy and theology at Lyons and for a time at Rome. He was very zealous for souls, a theologian of broad erudition, and a writer of great fertility, having produced ninety-two separate works, covering almost the entire field of theology. His style, however, is often prolix and sometimes obscure, whilst in his controversial writings he indulges in satire and invective. His collected works, revised by himself shortly before his death, were published under the direction of his confrère, Fr. John Bertet, in nineteen volumes (Lyons, 1665). A twentieth volume, entitled "Th. Raynaudi Apopompæus" (i. e. the scapegoat), containing a number of writings which the author had purposely excluded from the collection, was published by an anonymous editor a few years later (Cracow, 1669); this volume was condemned by the Congregation of the Index. The main titles alone of the "Opera" are given, to show the nature and extent of his writings: I. "Theologia Patrum: Christus Deus Homo"; II. "De Attributis Christi"; III. "Moralis disciplina"; IV. "De virtutibus et vitiis"; V. "Theologia naturalis"; VI. "Opuscula eucharistica"; VII. "Marialia"; VIII-IX. "Hagiologium"; X. "Pontificia"; XI. "Critica sacra"; XII. "Miscella sacra"; XIII. "Miscella philologica"; XIV. "Moralia"; XV-XVI. "Heteroclitia spiritualia"; XVII. "Ascetica"; XVIII. "Polemica". XIX contains general indices.

EDWARD C. PHILLIPS.

Raynouard, FRANÇOIS-JUSTE-MARIE, a French poet, dramatist, and philologist, b. at Brignoles, Var, 8 September, 1761; d. at Passy, 27 October, 1836. He studied law at Aix and, on being admitted to the bar, practised there. When the Revolution broke out, he showed at first a great enthusiasm for liberty and was elected to the Legislative Assembly, where he sided with the Girondins. He soon abandoned the new ideas. During the Terror, he was arrested and imprisoned at the Abbaye. Being freed after the ninth Thermidor, he returned to his native city and obtained great success as an attorney-at-law. In his leisure hours, he indulged in writing poems, "Socrate au temple d'Aglaure" (1802), and tragedies, "Éléonore de Bavière" and "Les templiers", which were played in 1805 by special command of Napoleon. Their success caused him to be elected to the French Academy in 1807. From 1806 to 1814, he was a member of the Legislature. After Napoleon's downfall, he retired from politics and devoted his time to literature and a comparative

study of languages. He was one of the pioneers of Romance philology and made a lasting reputation by his researches on the troubadours, although his conclusions now seem hasty and often mere conjectures. He was admitted to the Academy of Inscriptions and Belles-Lettres in 1815. His chief works besides the dramas above mentioned are the tragedy "Les états de Blois" (1809), and a few others

FRANÇOIS RAYNOUARD

never produced on the stage: "Caton d'Utique", "Don Carlos", "Débora", "Charles I", "Jeanne d'Arc à Orléans"; various contributions to Romance philology: "Recherches sur l'antiquité de la langue romane" (Paris, 1816); "Eléments de la grammaire de la langue romane" (Paris, 1816); "La grammaire des troubadours" (1816); "Des troubadours et les cours d'amour" (1817); "Grammaire com-

parée des langues de l'Europe latine dans leurs rapports avec la langue des troubadours" (1821); "Choix des poésies originales des troubadours" (Paris, 1821); "Lexique de la langue des troubadours" (Paris, 1824); "Nouveau choix des poésies originales des troubadours" (Paris, 1836-44).

LOUIS N. DELAMARRE.

Reading Abbey, Surrey, England, was founded by Henry I in 1121, who built it, writes William of Malmesbury, "between the rivers Kennet and Thames, in a spot calculated for the reception of almost all who might have occasion to travel to the most populous cities of England, where he placed monks of the Cluniac Order, who are to this day a noble pattern of holiness and an example of unwearied and delightful hospitality". The foundation charter declares that the new monastery takes the place of three others, Reading, Chelsey, and Leominster; dedicates it to the Blessed Virgin and St. John the Evangelist; accords it every civil privilege conceded to royal monasteries, and instructs the abbot to employ the alms at his disposal for "the entertainment of the poor, pilgrims, and guests". The first abbot was Hugues de Boves, late Prior of St. Pancras, Lewes, afterwards Archbishop of Rouen. From the beginning it was an independent English abbey, which, whilst retaining the Cluniac observance, elected its own abbots, paid no impost to the mother-house, was exempt from Cluniac visitation, and never acknowledged the jurisdiction of the General Chapter or Abbot of Cluny. Hence, though it has been described as a Cluniac establishment in ancient documents, even in papal letters of so late a date as 1309, it was never an "alien" house, and Cluny can only claim the credit of having set it going with monks and monastic customs.

The abbey precincts covered about thirty acres and were surrounded on three sides by a great wall with four embattled gateways, one of which, the western or compter gate, served as the town prison. It was entered through an inner gatehouse (existing, restored by Sir G. Scott in 1861) wherein the abbot held his manorial court. The church, consecrated by St.

Thomas a Becket in 1164, was 450 feet long and 95 feet broad, with transepts (200 ft.), a Lady-chapel (75 by 50 ft.) built in 1314, and a square central tower with spire. The monastic buildings were on the same scale, and the chapter-house, an apsidal, vaulted hall (79 by 42 ft.), was frequently used as a national council chamber, where Parliament sat, and many synods and ecclesiastical councils were held. There was a leper-hospital, closed in 1413 for lack of inmates. The *hospitium* had a guest hall (120 ft.), a dormitory (200 ft.) and provision for twenty-six poor pensioners. Part of the building (the dormitory) still exists and for many years was in use as the Royal Grammar School of King Henry VII. The abbot was mitred (1288), a feudal baron, had a seat in Parliament, his own mint, the rectorship of the three Reading parishes and the rents of a number of churches and granges. His chief country-seat was Bere Court, Pangbourne. His officials and servants were some forty, at a time when their number had been cut down for the sake of economy. Three priories (cells) were under his jurisdiction, Leominster (Herefordshire) in England, Rindelgros, and May in Scotland (afterwards resigned into the hands of the Bishop of Aberdeen). At the dissolution the revenues were valued at £2116 3s. 9¼d. The last abbot was Blessed Hugh Cook, *alias* Faringdon. After serving as a royal palace during some reigns, the buildings were stripped of their carved and dressed stonework for the repairing and building of churches, bridges, and the like, and not much more than the core of some of the walls, huge masses of flint-concrete, is left to preserve the memory of the great abbey which Henry I designed as the monument of his piety and where his body and that of his son were buried. The chief spiritual treasures of the abbey were the hand of St. James the Apostle (now in the sacristy of St. Peter's, Marlow-on-Thames), presented by Henry I, and the skull of St. Philip, given by King John.

Real Presence, THE. See EUCHARIST.

Reason.—GENERAL MEANINGS.—Both in ordinary life and in philosophical discussions the term reason is of frequent occurrence in different significations. Etymologically the word comes to us, through the French, from the Latin *ratio*, which is originally the functional noun of the verb *reor*, "I think" (i. e. I propose a *res* to my mind). According to Donaldson, *res*=*h-ra-is*, a derivative from *hir*=*χῆρ* (hand); hence *res* is "that which is handled", and means an object of thought, in accordance with that practical tendency of the Roman mind which treated all realities as palpable. *Ratio*, in opposition to *res*, denotes the mode or act of thinking; by extension it comes to designate on the one hand the faculty of thinking and on the other the formal element of thought, such as plan, account, ground, etc. This wide use of the word *reason* to denote the cognitive faculty (especially when dealing with intrinsic evidence, as opposed to authority) is still the commonest. The word has been used in this sense in a definition of the Vatican Council (Denzinger, "Enchiridion", 11th ed., Freiburg, 1911, nn. 1785-6); but already in Aristotle we have a clear distinction between intellect (*νοῦς*), as the intuitive faculty, and reason (*λόγος*), as the discursive or inferential faculty. This distinction was maintained by the Schoolmen. Yet, since Kant, the word *reason* has been used to shelter a bewildering chaos of notions. Besides using reason (*Vernunft*) as distinguished from the faculties of conception (*Verstand*) and judgment (*Urteilkraft*), Kant employed the word in a

transcendental sense as the function of subsuming under the unity of the ideas the concepts and rules of the understanding. Subsequent German philosophers, as Schopenhauer complained, "tried, with shameless audacity, to smuggle in under this name an entirely spurious faculty of immediate, metaphysical so-called super-sensuous knowledge".

DISCURSIVE THINKING.—In its general sense, therefore, reason may be attributed to God, and an angel may be called rational. But in its narrower meaning, reason is man's *differentia*, at once his necessity and his privilege; that by which he is "a little less than the angels", and that by which he excels the brutes. Reasoning, as St. Thomas says, is a defect of intellect. True, in certain acts our mind functions as intellect; there are immediate truths (*ἀμετα*) and first principles (*ἀρχαί*) which we intuit or grasp with our intellect; and in such verities there can be no deception or error. On this point the Scholastic system may be said to be absolutely intellectualist or noocentric. The meanest intellect is, to use an expression of St. Augustine, *capax Dei*. Within a certain region our cognitive faculties are absolutely infallible. Yet the Scholastics also unanimously hold that man's specific mark is ratiocination or *discursus*. Some indeed, like St. Augustine (who was intent on his analogy between *logos* in man and in the Blessed Trinity), insist on the intuitional aspect of our mental operations, and pass over the actual process as a whole. Yet none denied that in this life our knowledge is a thing of shreds and patches, laboriously woven from the threads of sense. It is only *in patria*, for instance, that God's existence will be to us as self-evident as the principle of contradiction is now. The beatific vision will, in fact, be not only as evident, but also as immediate as our present intuition of personal consciousness. But then we shall be on a level with the angels, who are subsistent intelligences or pure intuitives. An angel, in Scholastic philosophy, is practically the equivalent of *νοῦς* (*intellectus*, *intelligentia*) when used by such writers as Aristotle, Porphyry, Plotinus, or Pseudo-Dionysius, to denote not a faculty, but a species of being.

Opposed to this ideal intellection, so characteristic of Scholastic angelology, is our actual human experience, which is a *γιννόμενον*, a coming to be. Man is rational in the sense that he is a being who arrives at conclusions from premises. Our intellectual life is a process, a voyage of discovery; our knowledge is not a static ready-made whole; it is rather an organism instinct with life and growth. Each new conclusion becomes the basis of further inference. Hence, too, the word *reason* is used to signify a premise or ground of knowledge, as distinguished from a cause or real ground. So important is this distinction that one may say herein lies the nucleus of all philosophy. The task of the philosopher is to distinguish the *a priori* of logic from the *a priori* of time; and that this task is a difficult one is testified by the existence of the many systems of psychologism and evolutionism. Reasoning, therefore, must be asserted to be a process *sui generis*. This is perhaps the best answer to give to the question, so much discussed by the old logicians, as to what kind of causative influence the premises exert on the conclusion. We can only say, they validate it, they are its warrant. For inference is not a mere succession in time; it is a nexus thought-of, not merely an association between thoughts. An irrational conclusion or a misleading association is as much a fact and a result as a correct conclusion; the existence of the latter is explained only by its logical parentage. Hence the futility of trying to account completely for the existence of a human thought—the conclusion of a train of reasoning—simply by the accompanying sense-data and psychological associations. The question of validity is prior to all problems of genesis; for rational knowledge can never be the product of irrational conditions.

Allowing then the indefinability of ratiocination, we may proceed to ask if inference is homogeneous; in other words, are there different forms of reasoning? This raises the difficult question as to whether deduction and induction are ultimately irreducible modes of reasoning. The issue is usually confused by a very narrow definition of the syllogism, which has to be fitted into the word-grooves prescribed by syntax. But if, developing Aristotle's thought, we regard a syllogism as the unit of reasoning, then we may define it as the inference of a relation between A and C from a relation of A to B compounded with a relation of B to C. As an illustration we might instance Mill's famous example of the village matron's inference. Mill calls it reasoning from particulars by analogy; but it can easily be seen to be a syllogism; this drug (A) cured my Lucy (B), who had the same sickness as this neighbour's child (C), and hence will cure this child (C). All reasoning seems to consist in such unit steps, and it seems misleading to talk of inference *vi materiæ*; material and formal are relative terms.

PSYCHOLOGY OF REASONING.—There is an important sense, however, in which the epithet "material" has been applied to reasoning, to denote illation in which the relational formality has not yet been dissected out. The same laws of thought rule the philosopher's reasoning and the peasant's, but the latter's conclusion will only be fairly certain when its matter comes within his usual cognizance. A man can reason well about familiar matter; but, unless he has explicitly examined the illative process, he will hesitate and err when dealing with new subject-matter. The mistakes of inventors like Newton and Leibniz are very instructive on this point. We are all, then, as Newman put it, more or less departmental; we reason with unequal facility on different subjects. Does it follow that in such cases of concrete informal reasoning there is a rational surplusage of assurance over evidence? This does not seem so clear, and cannot be answered without some analysis. Long before the dawn of modern psychology, Aristotle emphasized the fact that we never think without having an accompanying sense-process, whether it be a visual image, or an auditory symbol, or even the motor impression of a word. The Scholastics also admitted this, and indeed many urged the necessity of this *conversio ad phantasmata* as the explanation of our piecemeal ratiocinative mode of learning. But this is not equivalent to saying that all reasoning can be exactly formulated, crystallized, as it were, into words. Language, after all, is merely a conventional drapery of our thought, which is convenient for logical analysis and for communicating with others. But do we not in ordinary life often syllogize in sights and reason in sounds? Does not our mind in its inferences leap far ahead of the sluggish machinery of language? And which of us has ever succeeded in fully analyzing his most commonplace attitude or emotion? To account, then, for the major part of our existence, we must admit something analogous to the Aristotelean *φρόνησις*—whether we call it the illative sense, or the artistic reason, or implicit thought. The main thing to observe is that it is not a special faculty. It is our reason acting under disabilities of language rather than of thought; for, after all, evidence is for ourselves while demonstration has reference to the audience.

REASON AND FEELING.—These experiences have, however, been interpreted in an anti-intellectualist sense. The Pragmatist school regards reasoning as completely determined by its relevance to purpose or interest. And, again, many philosophers (Kant, the Modernists, and many Protestant theologians under the influence of Schleiermacher) have exaggerated the dualism between head and heart. In fact, a species of epistemological mysticism has been devised (cf. *Gefühlsglaube*, *raisons du cœur*, etc.). So far

as this bears on the problem of reason, we may briefly state the case. It is true that our reason works purposively—that is, reason is selective of our subject-matter, but it is not creative or transforming. Nature is an ordered cosmos of which we form a part, so that every object in it has a “practical” bearing on our lives, is connected with our rational, sensitive, or natural appetency. The known is never completely out of resonance with our volitions and emotions. To affirm anything, or to reason about a subject, is at once to take up a position before it. This is especially true of moral and religious matter, and indeed the emotional genesis of ethical convictions has often been urged as a proof of their irrationality. But we should not forget that the liability to be influenced by emotional causes is not confined to ethical or religious reasoning. To put the case generally, we may ask: What precisely is meant by regarding feeling (or will) as forming with reason a co-ordinate source of knowledge? (Cf. G. E. Moore, “*Principia Ethica*”, sec. 79–80.) It may be meant that to have a certain feeling towards a conclusion is the same as to have reasoned it; and this is true in the sense that the complex “feeling” may include ratiocination. But when I draw a conclusion, I do not mean that I prefer it or am affected by it. And the fact that the two things can be distinguished is fatal to the assumed co-ordination between emotion and reason. As St. Thomas urged against the pseudo-mystics and Augustinians of all ages, volition is possible only in so far as it includes cognition; and, we may add, emotion is a mode of experience, only inasmuch as it presupposes knowledge.

Again, it may be meant that, without certain experiences of feeling and willing, we should not be able to draw certain ethical conclusions. This may be admitted as a psychological fact, viz. that there are many exercises of reason which we shall not correctly perform without an ethical habituation (*ἔθισμῳ τινι*, as Aristotle says). In this connexion it is interesting to note that Cardinal Newman’s object in writing the “*Grammar of Assent*” was “to show that a right moral state of mind germinates or even generates good intellectual principles”. This is very far from countenancing the Kantian view of the practical reason. The School admits a practical reason or “*synteresis*” (*Gewissen*, psychological conscience), in the sense of a natural habit of moral principles. But St. Thomas strenuously denies that it is *specialis potentia ratione altior* (a special faculty higher than reason).

ANIMALS AND REASON.—Finally, a word may be added on the so-called reason of animals. Man is called *animal rationale*; this expression stands for what Aristotle might call ζῷον λογιστικόν. The word ζῷον (in German, *Lebewesen*), which Aristotle applied even to God, does not mean “animal”, but “living being”. Is there, then, any rational animal? Catholic philosophy attributes to animals a faculty (*vis aestimativa*) whose function, analogous to that of reason, might, for want of a better name, be called “estimation”. Such a faculty also exists in man, but in a higher form, and was called by the Scholastics *ratio particularis* or *vis cogitativa*. Unless animals had this organic faculty, it is hard to see how they could apprehend those pragmatic relations (*intentiones*), such as utility, danger, etc., which are not objects of external sense. To this extent we may allow that the psychic life of brute animals is one of “meanings” and “values”. In some way they apprehend aspects and relations. Otherwise such complex co-ordinations as those required for nest-architecture and food-quest would be inconceivable. The extreme views of Bethé, Uexküll, and others almost imply a return to Cartesian Mechanicism, and really refute themselves. The danger lies rather in the anthropomorphic exaggeration of the powers of the animal mind. Experience has shown how fatally easy it is to read human feelings

and reasonings into the “mind” of one’s favourite cat or pet lapdog. Continuous, patient observations, like those of Mrs. Mary Austin on sheep or of Professor Yerkes on the dancing-mouse, are worth any number of isolated anecdotes. It may be safely affirmed that there is not a single unambiguous record of animal ratiocination. Such experiments as those of Thorndike (on hungry cats shut up in a cage and forced to learn the way out to food) are easily explained by the gradual stereotyping of association between visual impression and motor response, to the exclusion of other random associations. That animals are incapable of rational valuation is confirmed by the recent observations of Forel, Plateau, and others, who have shown that bees (and probably all insects) have no memory of facts, but only of time and distance. Reason, therefore, is still the exclusive prerogative of man. (See DEDUCTION; INDUCTION; INSTINCT; INTELLECT; INTUITION; KNOWLEDGE.)

HISTORY.—For Aristotle see BONITZ, *Index Aristotelicus* (Berlin, 1870); KAPPEL, *Aristoteles-Lexikon* (Paderborn, 1894), s. vv. λόγος; νοῦς etc.; TRENDLENBURG, *Elementa logicae Aristoteleae* (7th ed., Berlin, 1874); MAIER, *Die Syllogistik des Aristoteles* (Tübingen, 1896–1900). For the Scholastic view, see SCHMID, *Erkenntnislehre* (Freiburg, 1890), I, iii; STÖCKL, *Gesch. der Philosophie des Mittelalters* (Mainz, 1864–66), tr. FINLAY (2 vols., Du’lin, 1903–); SCHÜTZ, *Thomas-Lexikon* (2nd ed., Paderborn, 1895), s. vv. *Intellectus*; *Ratio*; *Synesis*, *Synteresis*. For general history, see EISLER, *Wörterbuch der philosoph. Begriffe* (3rd ed., Berlin, 1910), s. vv. *Vernunft*; *Verstand*. The Kantian view is explained in CAIRD, *Critical Philosophy of Kant*, I (Glasgow, 1889), x; DELBOS, *La philosophie pratique de Kant* (Paris, 1905), especially the introduction. Cf. also COLBRIDGE, *Aids to Reflection* (*On the Difference in Kind of Reason and the Understanding*). The Scholastic expression *συντήρησις* comes from a false reading in a passage of St. Jerome (P. L., XXV, 22), and should be *συνείδησις*; the derivation *συν* and *τήρησις* (observation) has also been suggested; on its meaning see APPEL, *Die Lehre der Scholastiker von der Synteresis* (Rostock, 1891); JAHNEL in *Theolog. Quartalschr.* (1870); NITZSCH in *Zeitschr. für Kirchengesch.* (1897–8).

GENERAL WORKS.—Besides the ordinary manuals of logic: NEWMAN, *Grammar of Assent* (London, 1870), and HARPER’s criticisms in *The Month* (1870); MACLEAN, *Reason, Thought and Language* (London, 1906); BALDWIN, *Dict. of Philosophy and Psychology* (New York and London, 1901–2), s. vv. *Novus*; *Reason*; *Understanding*; KEARY, *The Pursuit of Reason* (Cambridge, 1910); GRATRY, *Logique* (Paris, 1855); ROUSSELOT, *L’intellectualisme de Saint-Thomas* (Paris, 1908); LACHELIER, *Études sur le syllogisme* (Paris, 1907); GARDAIR, *La connaissance* (Paris, 1895); OLLÉ-LAPRUNE, *La raison et le rationalisme* (Paris, 1906); IDEM, *Les sources de la paix intellectuelle* (5th ed., Paris, 1906); JUNGSMANN, *Das Gemüt* (2nd ed., Freiburg, 1885); GEYSER, *Grundlagen der Logik und Erkenntnistheorie* (Münster, 1909).

PSYCHOLOGY.—JAMES, *The Sentiment of Rationality in Mind* (July, 1879), reprinted in *The Will to Believe* (New York and London, 1897); DEWEY, *Studies in Logical Theory* (2nd ed., Chicago, 1909); BINET, *Psychology of Reasoning* (2nd ed., Chicago, 1907); PILLSBURY, *Psychology of Reasoning* (New York and London, 1910); TITCHENER, *Experimental Psychology of the Thought-Processes* (New York and London, 1909); RIBOT, *La logique des sentiments* (3rd ed., Paris, 1908); GEYSER, *Einführung in die Psychologie der Denkvorgänge* (Paderborn, 1909); MESSER, *Empfindung u. Denken* (Leipzig, 1908). The work of the Würzburg School will be found recorded in the *Archiv für die gesamte Psychologie*, IV (1905–); the only experimental investigation of the syllogistic process appears to be that of STÖRRING, *Experimentelle Untersuchungen über einfache Schlussprozesse*, *ibid.*, XI (1908), but it has thrown no new light on the subject.

ANIMALS AND REASON.—MIVART, *The Origin of Human Reason* (London, 1889); WASMANN, *Psychology of Ants and of Higher Animals* (St. Louis and London, 1905); IDEM, *Instinct and Intelligence in the Animal Kingdom* (St. Louis and London, 1903); MUCKERMANN, *The Humanizing of the Brute* (St. Louis, 1906); WASHBURN, *The Animal Mind* (New York, 1908); PFUNGST, *Das Pferd des Herrn von Osten (der kluge Hans)* (Leipzig, 1907); EDINGER and CLAPARÈDE, *Ueber Tierpsychologie* (Leipzig, 1909); BOHN, *La naissance de l’intelligence* (Paris, 1909); DOMET DE VORGES, *L’estimative in Revue néo-scholastic*, XI (1904).

ALFRED J. RAHILLY.

Recanati and Loreto, DIOCESE OF (RECINETENSIS), province of Ancona, Central Italy, so called from the inhabitants of ancient Recina, capital of Picenum, who, after the devastation of their country by Alaric, established Recanati. Claudius, who attended the Council of Rimini, is believed to have been Bishop of Recina. Recanati was subject to the Diocese of Umana until 1240, when Gregory IX deprived Osimo of its see and transferred it to Recanati. Ranieri, Bishop of Osimo, was the first Bishop of Recanati. In 1263, Recanati, having espoused the cause of

Manfred, was deprived of the see which was retransferred to Osimo. Restored in 1289, the See of Recanati was again transferred, in 1320, to Macerata. In 1357 Recanati, united with Macerata, was again made a diocese. Noteworthy bishops were: Marino del Tocco (1412), whose election was contested by the party of John XXIII and King Ladislaus; Giovanni Vitelleschi (1431), afterwards cardinal and commander of the armies of Eugenius IV. In the sixteenth century the sees of Macerata and Recanati were several times separated and reunited. In 1586 Sixtus V definitely separated Macerata from Recanati and created the Diocese of Loreto, to which in 1591 was added *æque principaliter* that of Recanati. The first bishop of the united sees was Rutilio Benzoni (1587), who was succeeded by the cardinals Agostino Gelamini (1613) and Giulio Roma (1621). Other bishops were: Cardinal Alessandro Crescenzi (1676), and Lorenzo Gherardi (1693), both famed for their benefactions; Stefano Bellini (1807) and Giuseppe Cardoni (1863-67). The ancient Abbey of S. Maria in Potenza is in this diocese. Recanati was the birthplace of Plessed Girolamo Gherarducci and Blessed Placido (fourteenth century), also of the *littérateurs* Monaldo and Giacomo Leopardi. The united dioceses have 8 parishes with a population of 26,000; 48 secular and 40 regular priests; 8 religious houses of men and 12 of women; 1 school for boys and 5 for girls.

CAPPELLETTI, *Le chiese d'Italia*, VII (Venice, 1857); VOGEL, *De ecclesiis Recanatensi et Lauretana* (Recanati, 1859).

U. BENIGNI.

Rechab and the Rechabites.—Rechab was the father of Jonadab who in IV Kings, x, 15-28, appears as a fervent supporter of Jehu's attack on the House of Achab in his endeavour to root out the idolatrous worship which that dynasty had encouraged. The characteristic principles which actuated his descendants, the Rechabites, we gather from Jeremiah, xxxv, where the Rechabites, being invited to drink wine, answered: "We will not drink wine: because Jonadab the son of Rechab, our father, commanded us, saying: You shall drink no wine, neither you, nor your children, for ever: Neither shall ye build houses, nor sow seed, nor plant vineyards, nor have any, but you shall dwell in tents all your days, that you may live many days upon the face of the earth, in which you are strangers" (Jer., xxxv, 6, 7). It was evidently the belief of Jonadab and the Rechabites that settled life with its forms of civilization led to apostasy from the Jewish religion. In I Par., ii, 55, the clan of the Rechabites is connected with the Cinites (Kenites).

VIGOUROUX, *Dict. de la Bible*, s. v.

JAMES F. DRISCOLL.

Recollection, as understood in respect to the spiritual life, means attention to the presence of God in the soul. It includes the withdrawal of the mind from external and earthly affairs in order to attend to God and Divine things. It is the same as interior solitude in which the soul is alone with God.

This recollection is twofold: one which may be acquired by our own efforts aided by the ordinary grace of God. Thus any devout soul can acquire the habit of thinking of God's presence and of fixing attention upon Him and his Divine perfections. This is called active recollection. The other, called passive, does not depend upon our own efforts, but is an extraordinary grace infused by God, by which He summons together the faculties of the soul and manifests His presence and His perfections; this kind of recollection is classed by mystical writers as the first degree of infused contemplation.

The first kind of recollection belongs to ascetical devotion and practice. It is necessary for all who wish to attain Christian perfection. Without it, it is

most difficult to make progress in virtue. Therefore, it is necessary to observe the means by which it may be acquired. These are: (1) silence and solitude, according to our state of life, keeping in mind, at the same time, that one may be recollected amidst the duties of an active life; (2) the avoidance of distracting and dissipating occupations not dictated by reason or required by necessity. Multiplicity of occupations is an obstacle to recollection. Father Faber says that the man who undertakes too much is a foolish man, if not a guilty one. (3) The frequent exercise of the presence of God. As recollection is itself an application of the mind to the Divine presence within us, it is evident that the shortest way to its acquisition is frequently to call to mind that our souls are the temples of God.

ARTHUR DEVINE.

Recollects. See FRIARS MINOR.

Rector (Lat. *regere*, to rule).—Priests who preside over missions or quasi-parishes are called rectors: in England and the United States they are removable and irremovable, or permanent. These latter are known also as missionary rectors (M. R.). The term *rector* is applied likewise to the heads of universities, seminaries, and colleges; to the local superiors of religious houses of men; to the pope, as rector of the world, in the conferring of the tiara. In some universities, e. g. Louvain, the actual president is known as *rector magnificus*. Rector general is the title given to the superior general of certain religious, e. g. Clerics Regular of the Mother of God. In ancient times bishops as rulers of cities and provinces, especially in the Papal States, were called rectors; also administrators of the patrimony of the Church (e. g. *rector Sicilia*). To a rector who has resigned is often given the title *rector emeritus*. One who supplies the place usually occupied by a rector is styled pro-rector (in parishes, administrator), while assistants to rectors in institutions are known as vice-rectors (in parishes, as curates, assistant, or associate, rectors etc.). *Rector* is used by Gregory the Great in the "Regula Pastoralis" as equivalent to *pastor*.

Conc. Balt. Plen., III: *Acta et Decreta* (Baltimore, 1886); TAUNTON, *The Law of the Church* (London, 1906), s. v. *Missionary Rectors*.

ANDREW B. MEEHAN.

Rector Potens, Verax Deus, the daily hymn for Sext in the Roman Breviary, finds its theme in the great heat and light of the noonday (*hora sexta*, or sixth hour of the day) sun, and prays the Almighty Ruler to take from the heart the heat of passion. Baudot ("The Roman Breviary", London, 1909, 34) thinks the hymn "probably" by St. Ambrose: "We know, moreover, that the hymns for Vespers, Terce, and None (probably also the hymn for Sext) are his." Perhaps, however, Baudot refers to other hymns ascribed to the saint by Bäumer ("Gesch. des Breviers", 1895, 135). Whatever probability attaches to the hymns for Terce and None affects equally that for Sext, none of the three being found in the oldest Benedictine cycle, while all three are found in the later Celtic cycle. (For discussion of authorship, see RERUM DEUS TENAX VIGOR.) It is interesting to note that the second stanza is in rhyme throughout:

Exstingue flammas litium,
Aufer calorem noxium,
Confer salutem corporum
Veramque pacem cordium.

Biraghi thinks the rhyme merely a matter of chance; Pimont thinks it deliberate, but finds no sufficient reason in this fact for denying it to St. Ambrose. Johnner ("A New School of Gregorian Chant", tr. New York, 1906, 55) selects the first line to illustrate

his contention that whilst in ordinary speech anyone would pronounce the line thus: Réctor poténs vérax Deús, a singer commits no fault in stressing as follows: Rector poténs verax Déus. "In German (or English), this kind of thing is impossible. But that does not give us a right to forbid the composer of Gregorian melodies to make use of this and similar licenses. We Germans (and English-speaking people) frequently pronounce Latin with such an exaggerated accent that the words fall too heavily on the ear. Other nations, the French, for example, pronounce the words more smoothly, with a lighter accent." (For the full argument, see pp. 55, 56.)

JULIAN, *Dict. of Hymnology*, s. v., for MSS., references, authors, first lines of trs., etc. To his list should be added the Catholic trs. of BAGSHAW, *Breviary Hymns and Missal Sequences* (London, 1900), 19; DONAHOE, *Early Christian Hymns* (New York, 1908), 47; RUSSELL, *Hymni Horarum in Irish Eccl. Record* (1905), 231; HENRY, *Hymns of the Little Hours in Eccl. Review* (Sept., 1890), 204-09, with Latin text and commentary; PIMONT, *Les hymnes du bréviaire romain*, I (Paris, 1874), 106-10, for text and comment. For harmonized plain-song, modern musical setting, Latin text and Eng. tr., see *Hymns Ancient and Modern* (historical edition, London, 1909), no. 10. For additional bibliography, see RERUM DEUS TENAX VIGOR.

H. T. HENRY.

Recusants, ENGLISH.—The first statute in which the term "Popish Recusants" is used is 35 Eliz. c. 2, "An Act for restraining Popish Recusants to some certain place of abode", which was passed in 1593. The statute defines a recusant as one "convicted for not repairing to some Church, Chapel or usual place of Common Prayer to hear Divine Service there, but forbearing the same contrary to the tenor of the laws and statutes heretofore made and provided in that behalf". The Recusancy Acts are: 1 Eliz. c. 2, 23 Eliz. c. 1, 29 Eliz. c. 6, 35 Eliz. c. 2, 3 Jac. I. c. 5, 7 Jac. I. c. 6, and 3 Car. I. c. 2. But several statutes declare that other offences shall be deemed acts of recusancy, and that those convicted of them shall be deemed "popish recusants convicted".

As time went on there were other recusants who were not Catholics, but who for one reason or another refrained from attending the Church of England services. This fact must be remembered in dealing with the Recusancy lists, though, of course, far the larger number of recusants were Catholics. The number of recusants was very great, as may be seen by one instance adduced by J. S. Hansom in his preface to the list of convicted recusants in the reign of Charles II (op. cit. inf.), where on one day (24 Feb., 1690) the names of 1755 recusants were presented in the single town of Thirsk. The recusancy laws were in force from the reign of Elizabeth to that of George III, though they were not always put into execution with equal vigour. Lists of recusants for various counties exist in the Pipe Rolls preserved in the Record Office, London. Others are to be found in the British Museum, Bodleian Library, and in various local archives.

The Statutes at Large (London, 1758); BUTLER, *Historical Account of the Laws against the Roman Catholics of England* (London, 1811); ANSTREY, *Guide to the Laws of England affecting Roman Catholics* (London, 1842); McMULLAN AND ELLIS, *The Reformation Settlement* (London, 1903); instances of lists of recusants published of late years will be found in PEACOCK, *Yorkshire Recusants* (London, 1872); *Recusants of Masham, Yorkshire in Catholic Record Society*, III, no. 5 (London, 1906); *List of Convicted Recusants in the reign of Charles II, ibid.*, V, no. 3 (London, 1909).

EDWIN BURTON.

Redeemer, FEAST OF THE MOST HOLY.—The feast is found only in the special calendar of some dioceses and religious orders, and is celebrated with proper Mass and Office either on the third Sunday of July or on 23 October. In Venice this feast has been observed for more than three centuries with great solemnity. Moroni in his "Dizionario" gives some interesting data concerning the origin of this feast.

In 1576 a plague broke out in Venice which in a few days carried off thousands of victims. To avert this scourge the Senate vowed to erect a splendid temple to the Redeemer of mankind, and to offer therein each year on the third Sunday of July public and solemn services of thanksgiving. Scarcely had the plague ceased when they began to fulfil their vow. The church was designed by the famous Andrea Palladio, and the corner-stone was laid by the Patriarch Trevisan on 3 May, 1577. The celebrated painters Paolo Veronese and Jacopo Tintoretto decorated the interior. The church was consecrated in 1592, and, at the urgent solicitations of Pope Gregory XIII, placed in charge of the Capuchin Fathers.

By concession of Pope Benedict XIV, dated 8 March, 1749, the Congregation of the Most Holy Redeemer solemnizes this feast as a double of the first class with an octave on the third Sunday of July. The same congregation also keeps the feast as a greater double on 23 October and 25 February, and has, besides, the privilege of reciting once a month the votive office of the Most Holy Redeemer. In Rome also Pope Pius VIII introduced the feast and by a Decree of 8 May, 1830, the Sacred Congregation of Rites assigned it to 23 October. The characteristics of the Mass and Office are joy and gratitude for the ineffable graces and benefits of the Redemption. This appears especially from the Introit "Gaudens gaudebo", from the antiphons of Lauds "Cantate Domino", from the Epistle of the Mass, taken from St. Paul to the Ephesians, chap. i, "Blessed be the God and Father of our Lord Jesus Christ, Who hath blessed us with spiritual blessings . . . in Christ". For this reason white is the colour of the vestments, and not red, as in the Mass of the Passion.

JOSEPH WUEST.

Redeemer, KNIGHTS OF THE, a secular community founded in 1608 by the Duke of Mentone, Vincent Gonzaga, on the occasion of the marriage of his eldest son Francis II Gonzaga with Marguerite of Savoy. It was founded in honour of the Precious Blood of Jesus Christ, a relic of which has been venerated since time immemorial in the cathedral of Mentone. The emblems of the order consisted of a red silk robe and a golden necklace with a medal on which were figured three drops of blood in a monstrance. The duke was invested with these insignia by his son, Cardinal Ferdinand Gonzaga, and with the approbation of Paul V proclaimed grand master of the order, a dignity inherited by his successors in the duchy. The duke in turn distributed the same insignia to fourteen knights chosen from the highest nobility of Mentone and the neighbouring states. The statutes of the order obliged the members to devote themselves to the defence of religion, the Holy See and their sovereign. This order lasted only a century. It disappeared when the last of its dukes, Ferdinand Charles, having died childless, the Emperor Joseph I in 1708 merged the duchy into his hereditary estates.

MIRAENS, *Origine des chevaliers et ordres militaires* (Antwerp, 1609).

CH. MOELLER.

Redemption, the restoration of man from the bondage of sin to the liberty of the children of God through the satisfactions and merits of Christ. The word *redemptio* is the Latin Vulgate rendering of the Hebrew *קָנָה* and Greek *λύτρον* which, in the Old Testament, means generally a ransom-price. In the New Testament, it is the classic term designating the "great price" (I Cor., vi, 20) which the Redeemer paid for our liberation. Redemption presupposes the original

elevation of man to a supernatural state and his downfall from it through sin; and inasmuch as sin calls down the wrath of God and produces man's servitude under evil and Satan, Redemption has reference to both God and man. On God's part, it is the acceptance of satisfactory amends whereby the Divine honour is repaired and the Divine wrath appeased. On man's part, it is both a deliverance from the slavery of sin and a restoration to the former Divine adoption, and this includes the whole process of supernatural life from the first reconciliation to the final salvation. That double result, namely God's satisfaction and man's restoration, is brought about by Christ's vicarious office working through satisfactory and meritorious actions performed in our behalf.

I. Need of Redemption.—When Christ came, there were throughout the world a deep consciousness of moral depravation and a vague longing for a restorer, pointing to a universally felt need of rehabilitation (see Le Camus, "Life of Christ", I, i). From that subjective sense of need we should not, however, hastily conclude to the objective necessity of Redemption. If, as is commonly held against the Traditionalist School, the low moral condition of mankind under paganism or even under the Jewish Law is, in itself, apart from revelation, no proof positive of the existence of original sin, still less does it necessitate Redemption. Working on the data of Revelation concerning both original sin and Redemption, some Greek Fathers, like St. Athanasius (*De incarnatione*, in P. G., XXV, 105), St. Cyril of Alexandria (*Contra Julianum*, in P. G., LXXV, 925), and St. John Damascene (*De fide orthodoxa*, in P. G., XCIV, 983), so emphasized the fitness of Redemption as a remedy for original sin as almost to make it appear the sole and necessary means of rehabilitation. Their sayings, though qualified by the oft-repeated statement that Redemption is a voluntary work of mercy, probably induced St. Anselm (*Cur Deus homo*, I) to pronounce it necessary in the hypothesis of original sin. That view is now commonly rejected, as God was by no means bound to rehabilitate fallen mankind. Even in the event of God decreeing, out of his own free volition, the rehabilitation of man, theologians point out other means besides Redemption, v. g. Divine condonation pure and simple on the sole condition of man's repentance, or, if some measure of satisfaction was required, the mediation of an exalted yet created interagent. In one hypothesis only is Redemption, as described above, deemed absolutely necessary and that is if God should demand an adequate compensation for the sin of mankind. The juridical axiom "honour est in honorante, injuria in injuriato" (honour is measured by the dignity of him who gives it, offence by the dignity of him who receives it) shows that mortal sin bears in a way an infinite malice and that nothing short of a person possessing infinite worth is capable of making full amends for it. True, it has been suggested that such a person might be an angel hypostatically united to God, but, whatever be the merits of this notion in the abstract, St. Paul practically disposes of it with the remark that "both he that sanctifieth, and they who are sanctified, are all of one" (Heb., ii, 11), thus pointing to the God-Man as the real Redeemer.

II. Mode of Redemption.—The real Redeemer is Jesus Christ, who, according to the Nicene creed, "for us men and for our salvation descended from Heaven; and was incarnate by the Holy Ghost of the Virgin Mary and became man. He was also crucified for us, suffered under Pontius Pilate and was buried". The energetic words of the Greek text [Denzinger-Bannwart, n. 86 (47)], *ἐνανθρωπήσαντα, παθόντα*, point to incarnation and sacrifice as the groundwork of Redemption. Incarnation, or the personal union of the human nature with the Second Person of the Blessed Trinity, is the necessary basis of Redemption because this, in order to be

efficacious, must include as attributions of the one Redeemer both the humiliation of man, without which there would be no satisfaction, and the dignity of God, without which the satisfaction would not be adequate. "For an adequate satisfaction", says St. Thomas, "it is necessary that the act of him who satisfies should possess an infinite value and proceed from one who is both God and Man" (III, Q. 1, a. 2, ad 2^{um}). Sacrifice, which always carries with it the idea of suffering and immolation (see Lagrange, "Religions sémitiques", 244), is the complement and full expression of Incarnation. Although one single theandric operation, owing to its infinite worth, would have sufficed for Redemption, yet it pleased the Father to demand and the Redeemer to offer His labours, passion, and death (John, x, 17-18). St. Thomas (III, Q. xlvii, a. 6, ad 6^{um}) remarks that Christ, wishing to liberate man not only by way of power but also by way of justice, sought both the high degree of power which flows from His Godhead and the maximum of suffering which, according to the human standard, would be considered sufficient satisfaction. It is in this double light of incarnation and sacrifice that we should always view the two concrete factors of Redemption, namely, the satisfaction and the merits of Christ.

A. Satisfaction of Christ.—Satisfaction, or the payment of a debt in full, means, in the moral order, an acceptable reparation of honour offered to the person offended and, of course, implies a penal and painful work. It is the unmistakable teaching of Revelation that Christ offered to His heavenly Father His labours, sufferings, and death as an atonement for our sins. The classical passage of Isaiah (lii-liii), the Messianic character of which is recognized by both Rabbinical interpreters and New Testament writers (see Condamin, "Le livre d'Isaïe", Paris, 1905), graphically describes the servant of Jahveh, that is, the Messiah, Himself innocent yet chastized by God, because He took our iniquities upon Himself, His self-oblation becoming our peace and the sacrifice of His life a payment for our transgressions. The Son of Man proposes Himself as a model of self-sacrificing love because He "is not come to be ministered unto, but to minister, and to give his life a redemption for many" (*λύτρον ἀντὶ πολλῶν*) (Matt., xx, 28; Mark, x, 45). A similar declaration is repeated on the eve of the Passion at the Last Supper: "Drink ye all of this. For this is my blood of the new testament, which shall be shed for many unto remission of sins" (Matt., xxvi, 27, 28). In view of this and of the very explicit assertion of St. Peter (I Pet., i, 11) and St. John (I John, ii, 2) the Modernists are not justified in contending that "the dogma of Christ's expiatory death is not evangelic but Pauline" (prop. xxxviii condemned by the Holy Office in the Decree "Lamentabili", 3 July, 1907). Twice (I Cor., xi, 23; xv, 3) St. Paul disclaims the authorship of the dogma. He is, however, of all the New Testament writers, the best expounder of it. The redeeming sacrifice of Jesus is the theme and burden of the whole Epistle to the Hebrews, and in the other Epistles, which the most exacting critics regard as surely Pauline, there is all but a set theory. The main passage is Rom., iii, 23 sq.: "For all have sinned, and do need the glory of God. Being justified freely by his grace, through the redemption, that is in Christ Jesus, Whom God hath proposed to be a propitiation, through faith in his blood, to the shewing of his justice, for the remission of former sins." Other texts, like Eph., ii, 16; Col., i, 20; and Gal., iii, 13, repeat and emphasize the same teaching.

The early Fathers, engrossed as they were by the problems of Christology, have added but little to the soteriology of the Gospel and St. Paul. It is not true, however, to say with Ritschl ("Die christliche Lehre von der Rechtfertigung und Versöhnung", Bonn, 1889), Harnack ("Précis de l'histoire des dogmes",

tr. Paris, 1893), Sabatier ("La doctrine de l'expiation et son évolution historique", Paris, 1903) that they viewed Redemption only as the deification of humanity through incarnation and knew nothing of Christ's vicarious satisfaction. "An impartial inquiry", says Rivière, "clearly shows two tendencies: one idealistic, which views salvation more as the supernatural restoration of mankind to an immortal and Divine life, the other realistic, which considers it rather as the expiation of our sins through the death of Christ. The two tendencies run side by side with an occasional contact, but at no time did the former completely absorb the latter, and in course of time, the realistic view became preponderant" (Le dogme de la rédemption, p. 209). St. Anselm's famous treatise "Cur Deus homo" may be taken as the first systematic presentation of the doctrine of Redemption, and, apart from the exaggeration noted above, contains the synthesis which became dominant in Catholic theology. Far from being adverse to the *satisfactio vicaria* popularized by St. Anselm, the early Reformers accepted it without question and even went so far as to suppose that Christ endured the pains of hell in our place.

If we except the erratic views of Abelard, Socinus (d. 1562) in his "de Deo servatore" was the first who attempted to replace the traditional dogma of Christ's vicarious satisfaction by a sort of purely ethical exemplarism. He was and is still followed by the Rationalist School which sees in the traditional theory, all but defined by the Church, a spirit of vindictiveness unworthy of God and a subversion of justice in substituting the innocent for the guilty. The charge of vindictiveness, a piece of gross anthropomorphism, comes from confounding the sin of revenge and the virtue of justice. The charge of injustice ignores the fact that Jesus, the juridical head of mankind (Eph., i, 22), voluntarily offered Himself (John, x, 15), that we might be saved by the grace of one Saviour even as we had been lost by the fault of the one Adam (Rom., v, 15). It would be a crude conception indeed to suppose that the guilt or culpability of men passed from the consciences of men to the conscience of Christ: the penalty alone was voluntarily assumed by the Redeemer and, in paying it, He washed away our sins and restored us to our former supernatural state and destination.

B. Merits of Christ.—Satisfaction is not the only object and value of Christ's theandric operations and sufferings; for these, beside placating God, also benefit man in several ways. They possess, in the first place, the power of impetration or intercession which is proper to prayer, according to John, xi, 42: "And I knew that thou hearest me always." However, as satisfaction is the main factor of Redemption with regard to God's honour, so man's restoration is due principally to the merits of Christ. That merit, or the quality which makes human acts worthy of a reward at the hands of another, attaches to the works of the Redeemer, is apparent from the easily ascertained presence in them of the usual conditions of merit, namely (1) the wayfarer state (John, i, 14); (2) moral liberty (John, x, 18); (3) conformity to the ethical standard (John, viii, 29); and (4) Divine promise (Is., liii, 10). Christ merited for Himself, not indeed grace nor essential glory which were both attached and due to the Hypostatic Union, but accidental honour (Heb., ii, 9) and the exaltation of His name (Phil., ii, 9-10). He also merited for us. Such Biblical phrases as to receive "of his fulness" (John, i, 16), to be blessed with His blessings (Eph., i, 3), to be made alive in Him (I Cor., xv, 22), to owe Him our eternal salvation (Heb., v, 9) clearly imply a communication from Him to us and that at least by way of merit. The Council of Florence [Decretum pro Jacobitis, Denzinger-Bannwart, n. 711 (602)] credits man's deliverance from the domination of Satan to the merit of the Mediator, and the Council of Trent (Sess. V,

cc. iii, vii, xvi and canons iii, x) repeatedly connects the merits of Christ and the development of our supernatural life in its various phases. Canon iii of Session V says anathema to whoever claims that original sin is cancelled otherwise than by the merits of one Mediator, Our Lord Jesus Christ, and canon x of Session VI defines that man cannot merit without the justice through which Christ merited our justification.

The objects of Christ's merits for us are the supernatural gifts lost by sin, that is, grace (John, i, 14, 16) and salvation (I Cor., xv, 22); the preternatural gifts enjoyed by our first parents in the state of innocence are not, at least in this world, restored by the merits of Redemption, as Christ wishes us to suffer with Him in order that we may be glorified with Him (Rom., viii, 17). St. Thomas, explaining how Christ's merits pass on to us, says: Christ merits for others as other men in the state of grace merit for themselves (III, Q. xlviii, a. 1). With us merits are essentially personal. Not so with Christ who, being the head of our race (Eph., iv, 15; v, 23), has, on that score, the unique prerogative of communicating to the subordinate personal members the Divine life whose source He is. "The same motion of the Holy Ghost", says Schwalm, "which impels us individually through the various stages of grace toward life eternal, impels Christ but as the leader of all; and so the same law of efficacious Divine motion governs the individuality of our merits and the universality of Christ's merits" (Le Christ, 422). It is true that the Redeemer associates others to Himself "For the perfecting of the saints, . . . for the edifying of the body of Christ" (Eph., iv, 12), but their subordinate merit is only a matter of fitness and creates no right, whereas Christ, on the sole ground of His dignity and mission, can claim for us a participation in His Divine privileges.

All admit, in Christ's meritorious actions, a moral influence moving God to confer on us the grace through which we merit. Is that influence merely moral or does it effectively concur in the production of grace? From such passages as Luke, vi, 19, "virtue went out from him", the Greek Fathers insist much on the *δύναμις ζωοποιός*, or *vis vivifica*, of the Sacred Humanity, and St. Thomas (III, Q. xlviii, a. 6) speaks of a sort of *efficientia* whereby the actions and passions of Christ, as vehicle of the Divine power, cause grace by way of instrumental force. Those two modes of action do not exclude each other: the same act or set of acts of Christ may be and probably is endowed with twofold efficiency, meritorious on account of Christ's personal dignity, dynamic on account of His investment with Divine power.

III. Adequacy of Redemption.—Redemption is styled by the "Catechism of the Council of Trent" (I, v, 15) "complete, integral in all points, perfect and truly admirable". Such is the teaching of St. Paul: "where sin abounded, grace did more abound" (Rom., v, 20), that is, evil as the effects of sin are, they are more than compensated by the fruits of Redemption. Commenting on that passage St. Chrysostom (Hom. X in Rom., in P. G., LX, 477) compares our liability to a drop of water and Christ's payment to the vast ocean. The true reason for the adequacy and even superabundance of Redemption is given by St. Cyril of Alexandria: "One died for all . . . but there was in that one more value than in all men together, more even than in the whole creation, for, beside being a perfect man, He remained the only son of God (Quod unus sit Christus, in P. G., LXXV, 1356). St. Anselm (Cur Deus homo, II, xviii) is probably the first writer who used the word "infinite" in connexion with the value of Redemption: "ut sufficere possit ad solvendum quod pro peccatis totius mundi debetur et plus in infinitum". This way of speaking was strongly opposed by John Duns Scotus and his school on the double plea

that the Humanity of Christ is finite and that the qualification of infinite would make all Christ's actions equal and place each of them on the same level with His sublime surrender in the Garden and on Calvary. However the word and the idea passed into current theology and were even officially adopted by Clement VI (Extravag. Com. Unigenitus, V, ix, 2), the reason given by the latter, "propter unionem ad Verbum", being the identical one adduced by the Fathers.

If it is true that, according to the axiom "actiones sunt suppositorum", the value of actions is measured by the dignity of the person who performs them and whose expression and coefficient they are, then the theandric operations must be styled and are infinite because they proceed from an infinite person. Scotus's theory wherein the infinite intrinsic worth of the theandric operations is replaced by the extrinsic acceptance of God, is not altogether proof against the charge of Nestorianism levelled at it by Catholics like Schwane and Rationalists like Harnack. His arguments proceed from a double confusion between the person and the nature, between the agent and the objective conditions of the act. The Sacred Humanity of Christ is, no doubt, the immediate principle of Christ's satisfactions and merits, but that principle (*principium quo*) being subordinate to the Person of the Word (*principium quod*), borrows from it the ultimate and fixed value, in the present case infinite, of the actions it performs. On the other hand, there is in Christ's actions, as in our own, a double aspect, the personal and the objective: in the first aspect only are they uniform and equal while, viewed objectively, they must needs vary with the nature, circumstances, and finality of the act.

From the adequacy and even superabundance of Redemption as viewed in Christ our Head, it might be inferred that there is neither need nor use of personal effort on our part towards the performance of satisfactory works or the acquisition of merits. But the inference would be fallacious. The law of co-operation, which obtains all through the providential order, governs this matter particularly. It is only through, and in the measure of, our co-operation that we appropriate to ourselves the satisfactions and merits of Christ. When Luther, after denying human liberty on which all good works rest, was driven to the makeshift of "fiducial faith" as the sole means of appropriating the fruits of Redemption, he not only fell short of, but also ran counter to, the plain teaching of the New Testament calling upon us to deny ourselves and carry our cross (Matt., xvi, 24), to walk in the footsteps of the Crucified (I Pet., ii, 21), to suffer with Christ in order to be glorified with Him (Rom., viii, 17), in a word to fill up those things that are wanting to the sufferings of Christ (Col., i, 24). Far from detracting from the perfection of Redemption, our daily efforts toward the imitation of Christ are the test of its efficacy and the fruits of its fecundity. "All our glory", says the Council of Trent, "is in Christ in whom we live, and merit, and satisfy, doing worthy fruits of penance which from Him derive their virtue, by Him are presented to the Father, and through Him find acceptance with God" (Sess. XIV, c. viii).

IV. *Universality of Redemption.*—Whether the effects of Redemption reached out to the angelic world or to the earthly paradise is a disputed point among theologians. When the question is limited to fallen man it has a clear answer in such passages as I John, ii, 2; I Tim., ii, 4, iv, 10; II Cor., v, 15; etc., all bearing out the Redeemer's intention to include in His saving work the universality of men without exception. Some apparently restrictive texts like Matt., xx, 28, xxvi, 28; Rom., v, 15; Heb., ix, 28, where the words "many" (*Multi*), "more" (*plures*), are used in reference to the extent of Redemption, should be interpreted in the sense of the Greek phrase *ὁ πολλῶν*, which means

the generality of men, or by way of comparison, not between a portion of mankind included in, and another left out of, Redemption, but between Adam and Christ. In the determination of the many problems that arose from time to time in this difficult matter, the Church was guided by the principle laid down in the Synod of Quierzy [Denzinger-Bannwart, n. 319 (282)] and the Council of Trent [Sess. VI, c. iii, Denzinger-Bannwart, n. 795 (677)] wherein a sharp line is drawn between the power of Redemption and its actual application in particular cases. The universal power has been maintained against the Predestinarians and Calvinists who limited Redemption to the predestinated (cf. the councils named above), and against the Jansenists who restricted it to the faithful or those who actually come to faith [prop. 4 and 5, condemned by Alexander VIII, in Denzinger-Bannwart, 1294–5 (1161–2)] and the latter's contention that it is a Semi-pelagian error to say that Christ died for all men has been declared heretical [Denzinger-Bannwart, n. 1096 (970)].

The opinion of Vasquez and a few theologians, who placed children dying without baptism outside the pale of Redemption, is commonly rejected in Catholic schools. In such cases no tangible effects of Redemption can be shown, but this is no reason for pronouncing them outside the redeeming virtue of Christ. They are not excluded by any Biblical text. Vasquez appeals to I Tim., ii, 3–6, to the effect that those children, not having any means or even possibility to come to the knowledge of the truth, do not seem to be included in the saving will of God. If applied to infants at all, the text would exclude likewise those who, as a matter of fact, receive baptism. It is not likely that Redemption would seek adults laden with personal sins and omit infants labouring under original sin only. Far better say with St. Augustine: "Numquid parvuli homines non sunt, ut non pertineat ad eos quod dictum est: vult omnes salvos fieri?" (Contra Julianum, IV, xlii).

With regard to the *de facto* application of Redemption in particular cases, it is subject to many conditions, the principal being human liberty and the general laws which govern the world both natural and supernatural. The Universalists' contention that all should finally be saved lest Redemption be a failure is not only unsupported by, but also opposed to, the New Dispensation which, far from suppressing the general laws of the natural order, places in the way of salvation many indispensable conditions or laws of a freely established supernatural order. Neither should we be moved by the reproaches of failure often flung at Redemption on the plea that, after nineteen centuries of Christianity, a comparatively small portion of mankind has heard the voice of the Good Shepherd (John, x, 16) and a still smaller fraction has entered the true fold. It was not within God's plan to illumine the world with the light of the Incarnate Word at once, since he waited thousands of years to send the Desired of the Nations. The laws of progress which obtain everywhere else govern also the Kingdom of God. We have no criterion whereby we can tell with certainty the success or failure of Redemption, and the mysterious influence of the Redeemer may reach farther than we think in the present as it certainly has a retroactive effect upon the past. There can be no other meaning to the very comprehensive terms of Revelation. The graces accorded by God to the countless generations preceding the Christian era, whether Jews or Pagans, were, by anticipation, the graces of Redemption. There is little sense in the trite dilemma that Redemption could benefit neither those who were already saved nor those who were forever lost, for the just of the Old Law owed their salvation to the anticipated merits of the coming Messiah and the damned lost their souls because they spurned the graces of illumination and

good will which God granted them in prevision of the saving works of the Redeemer.

V. *Titles and Offices of the Redeemer*.—Besides the names Jesus, Saviour, Redeemer, which directly express the work of Redemption, there are other titles commonly attributed to Christ because of certain functions or offices which are either implied in or connected with Redemption, the principal being Priest, Prophet, King and Judge.

A.—The sacerdotal office of the Redeemer is thus described by Manning (*The Eternal Priesthood, I*): "What is the Priesthood of the Incarnate Son? It is the office He assumed for the Redemption of the world by the oblation of Himself in the vestment of our manhood. He is Altar, Victim, and Priest by an eternal consecration of Himself. This is the priesthood forever after the order of Melchisedeck who was without beginning of days or end of life—a type of the eternal priesthood of the son of God." As sacrifice, if not by the nature of things, at least by the positive ordinance of God, is part of Redemption, the Redeemer must be a priest, for it is the function of the priest to offer sacrifice. In an endeavour to induce the newly-converted Jews to abandon the defective Aaronic priesthood and to cling to the Great High Priest who entered heaven, St. Paul, in his Epistle to the Hebrews, extols the dignity of Christ's sacerdotal office. His consecration as a priest took place, not from all eternity and through the procession of the Word from the Father, as some of the theologians seem to imply, but in the fulness of time and through the Incarnation, the mysterious unction which made Him priest being none else than the Hypostatic Union. His great sacrificial act was performed on Calvary by the oblation of Himself on the Cross, is continued on earth by the Sacrifice of the Mass and consummated in heaven through the sacrificial intention of the priest and the glorified wounds of the victim. The Christian priesthood, to which is committed the dispensation of the mysteries of God, is not a substitute for, but the prolongation of, the priesthood of Christ: He continues to be the offerer and the oblation; all that the consecrated and consecrating priests do, in their ministerial capacity, is to "show forth the death of the Lord" and apply the merits of His Sacrifice.

B.—The title of Prophet applied by Moses (*Deut.*, xviii, 15) to the coming Messiah and recognized as a valid claim by those who heard Jesus (*Luke*, vii, 16), means not only the foretelling of future events, but also in a general way the mission of teaching men in the name of God. Christ was a Prophet in both senses. His prophecies concerning Himself, His disciples, His Church, and the Jewish nation, are treated in manuals of apologetics (see McIlvaine, "Evidences of Christianity", lect. V-VI; Lescœur, "Jésus-Christ", 12^e confér.: *Le Prophète*). His teaching power (*Matt.*, vii, 29), a necessary attribute of His Divinity, was also an integrant part of Redemption. He who came "to seek and to save that which was lost" (*Luke*, xix, 10) should possess every quality, Divine and human, that goes to make the efficient teacher. What Isaiah (lv, 4) foretold, "Behold I have given him for a witness to the people, for a leader and a master to the Gentiles", finds its full realization in the history of Christ. A perfect knowledge of the things of God and of man's needs, Divine authority and human sympathy, precept and example combine to elicit from all generations the praise bestowed on Him by His hearers—"never did man speak like this man" (*John*, vii, 46).

C.—The kingly title frequently bestowed on the Messiah by the Old Testament writers (*Ps.* ii, 6; *Is.*, ix, 6, etc.) and openly claimed by Jesus in Pilate's Court (*John*, xviii, 37) belongs to Him not only in virtue of the Hypostatic Union but also by way of conquest and as a result of Redemption (*Luke*, i, 32). Whether or not the temporal dominion of the universe

belonged to His royal power, it is certain that He understood His Kingdom to be of a higher order than the kingdoms of the world (*John*, xviii, 36). The spiritual kingship of Christ is essentially characterized by its final object which is the supernatural welfare of men, its ways and means which are the Church and the sacraments, its members who are only such as, through grace, have acquired the title of adopted children of God. Supreme and universal, it is subordinate to no other and knows no limitations of either time or place. While the kingly functions of Christ are not always performed visibly as in earthly kingdoms, it would be wrong to think of His Kingdom as a merely ideal system of thought. Whether viewed in this world or in the next, the "Kingdom of God" is essentially hierarchic, its first and last stage, that is, its constitution in the Church and its consummation in the final judgment, being official and visible acts of the King.

D.—The Judicial office so emphatically asserted in the New Testament (*Matt.*, xxv, 31; xxvi, 64; *John*, v, 22 sq.; *Acts*, x, 42) and early symbols [*Denzinger-Bannwart*, nn. 1-41 (1-13)] belongs to Christ in virtue of His Divinity and Hypostatic Union and also as a reward of Redemption. Seated at the right hand of God, in token not only of rest after the labours of His mortal life or of glory after the humiliations of His Passion or of happiness after the ordeal of Golgotha, but also of true judicial power (St. Augustine, "De fide et symbolo", in P. L., XL, 188), He judges the living and the dead. His verdict inaugurated in each individual conscience will become final at the particular judgment and receive a solemn and definitive recognition at the assizes of the last judgment. (See ATONEMENT.)

J. F. SOLLIER.

Redemption in the Old Testament means either strictly deliverance by payment of a price or ransom, or simply deliverance by power, as from oppression, violence, captivity, etc. In the Hebrew Text, the idea of redemption is directly expressed by the verbs *gā'al* and *pādah*, and by their derivatives to which the word *kōphēr* (ransom) is intimately related. Of these two verbs, the former, *gā'al*, is used technically in the Mosaic Law, of the redemption by price of an inheritance, or of things vowed, or of tithes; the latter, *pādah*, of redeeming the first-born of children or of animals. Outside the Law, and in relation to the God of Israel, both verbs are used of simple salvation or deliverance by power. In the New Testament, redemption is specifically that of man from sin by Christ's death. The idea is distinctly expressed by the verb *λυτροῦμαι* (from *λύτρον*, "a ransom") and its derivatives; it is also directly conveyed by the term *ἀγοράζω* (to buy, to purchase) and by its compound *ἐξαγοράζω*. The following is simply a treatment of legal redemption.

I. **REDEMPTION OF PERSONS**.—The first-born male of every Jewish family was consecrated to Yahweh and had to be redeemed at the price of five sicles or about \$2.75 (*Ex.*, xiii, 2, 13; *Num.*, xviii, 16; etc.). Every other Israelite, whether male or female, could be consecrated to God by a personal vow, or by the vow of those to whom he or she belonged. Jephthe's actual immolation of his daughter in consequence of his vow concerning her (*Judges*, xi, 31-39), was contrary to the Law. Many Israelites carried out their dedication to God, under the form of the Nazarite vow. Most, however, availed themselves of the redemption allowed by the Law. The sum then to be

paid as ransom for males between 20 and 60 years of age was 50 sacred sicles; for females of a similar age, 30 sicles; for boys between 5 and 20 years old, 20 sicles, and for girls of a corresponding age, 10 sicles; for male children from one month to 5 years of age, 5 sicles, and for those of the female sex, 3; and finally, for old men over 60 years of age, 15 sicles, and for old women, 10. The poor who could not afford this amount had to pay the price fixed by the priest, according to their means (Lev., xxvii, 2-8). Persons lying under anathema could not be redeemed.

II. REDEMPTION OF ANIMALS.—According to the Mosaic Law, the first-born male of animals was sacred to the Lord, and, if a first-born of legally clean animals, and without blemish, had to be offered in sacrifice. As unclean animals should not be immolated to Yahweh, their first-born was either to be redeemed according to the valuation of the priest, with the addition of one-fifth of the value, or be sold and the price given to the priest (Lev., xxvii, 27). The first-born of an ass, however, had to be redeemed with a lamb, or, if not redeemed, put to death (Ex., xiii, 13). Outside of the first-born, any animal could be dedicated to God by vow. It could be ransomed only if it were legally unfit for sacrifice, in which case the price for its redemption was left to the valuation of the priest, to which was added one-fifth of the value (Lev., xxvii, 11-13).

III. REDEMPTION OF LAND, HOUSES, AND TITHES.—The landed property which, in whole or in part, an Israelite was forced by poverty to sell, could be redeemed by his next of kin (the *Gō'ēl*), or by the man himself when again able to do so. The redemption price was then fixed according to the number of years yet to elapse before the Jubilee Year, at which time the property would have freely reverted to its original owner or to his heir (Lev., xxv, 25-28). A piece of land dedicated to God could also be redeemed. Its value was reckoned according to the amount of seed required to sow it, and a reduction made in proportion to the number of years till the next Jubilee Year. The owner of the land might redeem it at this price, plus one-fifth; and if unredeemed, it went to the priestly domain at the year of Jubilee. But if the dedicant of the land had himself purchased it from a third person who had sold it because of his poverty, then at the Jubilee it reverted to the latter, and the dedicant had to recompense the sanctuary by paying its redemption price calculated as before (Lev., xxvii, 16-25). With regard to the redemption of sold houses, the Law distinguished between dwellings in walled cities and dwellings in unwalled places. For the former houses, the right of redemption lasted only a full year from the day of sale, at the end of which they fell forever to their respective purchaser. For the latter, there was no term fixed for their redemption, and if unredeemed before the Jubilee they then freely reverted to their original owners. The houses of the Levites, however, could be redeemed at any time, and reverted to them if unredeemed before the year of Jubilee (Lev., xxv, 29-34). Houses which had been simply vowed to God could be ransomed upon the payment of the value fixed by the priest, plus one-fifth of that value (Lev., xxvii, 14, 15). Tithes belonged to God as the real owner of the land, and hence could not be made the subject of vows. Tithes of agricultural produce might be commuted for their money value, plus one-fifth; but the tithes of cattle could not be redeemed (Lev., xxvii, 31-33).

FRANCIS E. GIGOT.

Redemption of Captives, ORDER FOR THE. See MERCEDARIANS.

Redemptions, PENITENTIAL, the substitution of exercises (especially alms-deeds), either easier or extending over a shorter period, for works of penance imposed according to the penitential canons. These redemptions allow an alleviation, or a shortening of the time of penance; they thus resemble an indulgence, and have a place in the history of indulgences. Among the Anglo-Saxons and the Irish, as manifested by their penitential books, the fundamental idea was reparation in proportion to the number and gravity of the sins, as it were a *weregild* paid to God and the Church. The confessor imposed a certain number of penitential acts, prayers, fasts, flagellations, alms-deeds etc., extending over a more or less considerable period; hence arose quite naturally the desire to condense the penance into a shorter time. The priest might fix them in each case, but the penitential books show that there actually was a sort of scale in current use. Three things were considered in determining the new works: the penances already imposed, the difficulty of the penitent's accomplishing them, and finally his material condition, especially in the case of alms-deeds. Thus one unable to fast could replace fasting by the Psalter (fifty psalms); an alms of twenty *solidi* (for the poor, ten *solidi* or even less) replaced fasts of seven weeks (a *carina*). A penance of a week, a quarantine, or a year might be accomplished in a short time by accumulating psalters, genuflections, *palmata* (blows on the breast with the palm of the hand), or by condensing two days of slight into one of severe fasting. These substitutions assumed numerous combinations, and the Irish canons (Wasserschleben, "Die Bussordnungen", Halle, 1851, 193) show nine methods of accomplishing a year's penance in a short time. It was even attempted to have the penance performed by others (cf. "Leges" or "Poenitentiale" of Eadger in Hardouin, "Concilia", VI, i, 659 sq.), but these substitutions, accessible only to the great, were a contradiction of penance and were severely condemned (cf. Conc. of Clovesho of 747, cans. xxvi-xxvii). The redemptions considered in the penitential books had only practical and not official value; however, they were officially adopted by several councils. Thus the Council of Tribur of 895 (can. lvi), in determining the penance for a homicide, authorizes the redemption (while travelling or at war) of the fast on Tuesday, Thursday, or Saturday by paying a *denier*, or by caring for three poor. Eventually these redemptions were offered indiscriminately to all, especially at the Council of Clermont of 1095 (can. ii), when the crusade was suggested as a ransom from all penance. This was the modern indulgence, save that in the case of an indulgence the penance to be redeemed has not been imposed on individuals, but to the proposed work is attached by ecclesiastical authority a reduction of penitential satisfaction. (See INDULGENCES.)

A. BOUDINHON.

Redemptoristines.—The cradle of the Redemptoristines is Scala, not far from Amalfi, Italy. Father Thomas Falcoia, of the Congregation Pii Operarii, formed a community of nuns there and gave them a rule. Later he became Bishop of Castellammare. He was director of St. Alphonsus when a new rule was said to have been revealed to Sister Maria Celeste Crosterosa. The bishop favoured the rule and asked Alphonsus to give the nuns the spiritual exercises and to organize the community as he judged best for the glory of God. The saint disposed them for the observance of the new rule by meditation on the life and virtues of Christ. The details of their daily life were to commemorate phases of His life.

Zeal was to be exercised by prayer, each day of the week being devoted to an object affecting the well-being of the Church. They were to pray in a special manner for the apostolic works of the Redemptorists. The habit is deep red, and the scapular and choir-mantle blue. The institute began on 23 May, 1731. A second monastery was founded by St. Alphonsus, when bishop, in his episcopal city, St. Agatha of the Goths. Nearly a hundred years after the foundation at Scala, the Ven. Joseph Passerat sent two ladies, Mlle. Eugénie Dijon and the Countess Welsersheim, to St. Agatha to learn the rule and spirit of the Redemptoristines. They received the habit at Rome from Cardinal Odescalchi. They founded houses at Vienna and Bruges. Convents of the institute now exist in Austria, Bavaria, Belgium, France, Holland, Ireland, England, the Tyrol, Spain, and Canada. The rule was approved by Benedict XIV in 1750. (See ALPHONSUS LIGUORI, SAINT; PASSERAT, VENERABLE JOSEPH.)

DUMORTIER, *Les premières rédemptoristines* (Bruges, 1884) contains a notice on the institute; HUGUES, *Vies de deux religieuses rédemptoristines* (Tournai, 1884); DUMORTIER, *Flours de l'institut des rédemptoristines* (Tournai, 1910); *Beat. et canoniz. S. D. Sororis Mariæ Celeste Crosterosa.*

J. MAGNIER.

Redemptorists (CONGREGATION OF THE MOST HOLY REDEEMER), a society of missionary priests founded by St. Alphonsus Maria Liguori, 9 Nov., 1732, at Scala, near Amalfi, Italy, for the purpose of labouring among the neglected country people in the neighbourhood of Naples.

The Redemptorists are essentially and by their specific vocation a missionary society. According to their rule they are "to strive to imitate the virtues and examples of Jesus Christ, Our Redeemer, consecrating themselves especially to the preaching of the word of God to the poor". They take the simple vows of poverty, chastity, and obedience, and by the vows of poverty they are bound to refuse all ecclesiastical dignities outside of the congregation. To these vows they add the vow and oath of perseverance to live in the congregation until death. Their labours consist principally in missions, retreats, and similar exercises. In order to render these labours most effective, all their sermons and instructions should be solid, simple, and persuasive. On all their missions they are obliged to preach a sermon on prayer and one on the intercession of the Blessed Virgin Mary. In order to secure the salutary effects of their missions, they should, after four or five months, return to the places where they have given missions, and preach another, shorter course of sermons. On missions proper the rule obliges them to hear all the confessions themselves. Wherever the Redemptorists have parishes they labour in the same spirit, both in the pulpit and in the confessional. One of the great means of preserving truly religious fervour among all classes of the faithful is the Archconfraternity of the Holy Family, which they establish in all their parishes. They are also most solicitous in providing well-equipped parochial schools, and they take special care of growing youth.

Within ten years of the order's foundation, permanent establishments were made at Nocera, Ciorani, Iliceto, and Caposele. In 1749 Benedict XIV canonically approved the work, under the title of the Congregation of the Most Holy Redeemer. Royalism, however, caused the greatest obstacle to the development of the new congregation. An effort to obtain the royal exequatur to the papal approbation proved disastrous, and brought about a temporary separation of the Neapolitan houses and those which had been founded in the Papal States. In 1793 a reunion was at last effected under the new superior general, Pietro Paulo Blasucci, who governed the congregation until 1817. In the next

six years several houses were opened in different parts of Southern Italy and Sicily, and the society flourished, though subjected to many grave trials. It was destined, however, to take on an international character. In 1785 a young Austrian, Clemens Maria Hofbauer, journeyed to Rome with a companion, Thaddeus Hübl. There they were deeply impressed by the fervour of the Fathers of the church of St. Julian, and applied for admission into the community. After profession and ordination, their chief desire was to transplant the congregation to northern countries. They received permission from the general to establish a house in Vienna or in any other Austrian city. But the Government was unfriendly, and Father Hofbauer offered his services to the Congregation of the Propaganda at Rome. He was sent to labour for a time in Courland, Russia. In 1786, with his former companion, Father Hübl, he arrived at Warsaw, where the papal nuncio Saluzzo gave them charge of St. Benno's church, whence they were known in Poland as "Bennonites". Their apostolic zeal and untiring efforts procured the salvation of many souls, and effected the conversion of many heretics and Jews, while their church presented the spectacle of an uninterrupted mission.

In 1793 Father Blasucci, the *rector major*, then residing at Nocera, appointed Father Hofbauer his vicar-general with all necessary authority. His first thoughts turned to Germany, though the time seemed inopportune, since Febronianism, Josephinism, Freemasonry, and infidelity held sway all over Europe. He succeeded, however, in establishing three foundations in Southern Germany, at Jestetten, Triberg, and Babenhausen, which he confided to the care of his favourite disciple, Father Passerat. These foundations were eventually suppressed, and the members banished. Father Passerat then betook himself to Switzerland, where in 1818 he organized a community at Valsainte in a dilapidated Carthusian monastery. In the meantime, owing to opposition, the house at Warsaw was suppressed. In 1808 the Fathers were expelled from St. Benno's and deported to the fortress of Küstrin, Prussia, where they were disbanded. Father Hofbauer, after directing his companions to work for God's glory whenever and wherever they could, proceeded alone to Vienna, where he became an assistant chaplain and confessor of nuns. His influence was soon felt on all sides, even in the Congress of Vienna (1815), where the destinies of the Church in Germany were then being shaped. He was styled by Pius VII the "Apostle of Vienna". In the meantime he kept up a constant correspondence with his former companions, did all in his power to find for them suitable fields of labour, and predicted that after his death a brighter future was in store for the congregation, a prophecy that was soon fulfilled. He died 15 March, 1820. In accordance with the request of the Emperor Francis I, the first house of the Redemptorists was canonically established in Vienna on Christmas Day, 1820. In May several prominent young men, former disciples of Father Hofbauer, had already received the religious habit.

Father Passerat succeeded Hofbauer as vicar-general; the onerous and trying duties of his office were rendered more difficult by the prevalent spirit of Josephinism. The years intervening between 1815 and 1821 found some of the Fathers labouring in Bulgaria, but, owing to the hostility of the schismatics, they were compelled to abandon this field. A number of flourishing foundations were established between 1820 and 1848. In 1826, at the request of the Austrian Government, a foundation was started at Lisbon, Portugal, for the benefit of German Catholics, but it did not last long. In 1820 the Redemptorists acquired the convent of Bischenberg, Alsace. The new community was sent from Val-

sainte. In 1828 the Fathers exchanged their poorly-furnished home at Valsainte for the commodious Convent of Fribourg, which proved to be a fruitful nursery for the congregation until the Revolution of 1848. Prior to 1848 six houses had been established in Austria: Frohnleiten in 1826; Mautern in 1827, the present house of studies; Innsbruck in 1828; Marburg and Eggenburg in 1833; and Leoben in 1834. During Passerat's administration the congregation was introduced into Belgium by Father de Held, and in the course of the next ten years four houses were established: Tournai in 1831, St-Trond in 1833, Liège in 1833, and Brussels in 1849. A foundation was also opened at Wittem, Holland, where, in 1836, an old Capuchin monastery became the house of studies. During the same period another important mission was begun in North America. In 1828 Mgr Résé, Vicar-General of Cincinnati, visited Europe to solicit pecuniary aid and to obtain evangelical labourers. While at Vienna he applied to Passerat, from whom he secured three priests and three lay brothers; they arrived in New York 20 June, 1832. Two other Fathers followed in 1835. For seven years they laboured heroically among the whites and the Indians of northern Michigan and northern Ohio. Though they took charge of many stations in both states, they did not secure a permanent footing in any of these places, with the exception of Detroit. In 1839 the Fathers were called to Pittsburg to assume charge of the German congregation, which was then without a priest, and torn with party strife. In a short time they made it a model congregation. Scattered throughout the surrounding country were many Catholic settlers, to whom they preached the Word of God and administered the sacraments. This species of mission inaugurated by them wherever they were established was the beginning of many a well-organized parish of to-day. From this time the care of German congregations, often in a deplorable condition on account of factions, became a prominent element of the apostolate of the Redemptorists in North America. Their first concern, however, was to establish, wherever feasible, parochial schools, which are in a flourishing condition to this day. When the success of the Fathers at Pittsburg became known, applications were made to them for other foundations. They were called to Baltimore in 1840; to New York in 1842; to Philadelphia in 1843; to Buffalo in 1845; to Detroit and New Orleans in 1847; and to Cumberland in 1849. In 1837 a German congregation had been organized at Rochester by Father Prost, but the Fathers did not take permanent charge until 1841.

Meanwhile the congregation gained a permanent footing in new countries of Europe. In 1841 King Louis I of Bavaria invited the Fathers to the celebrated shrine of Our Lady at Altötting. During this period four houses were founded in France: Landser in Alsace, in 1842; St-Nicolas-du-Port, in 1845; Teterchen in Lorraine and Contamine in Savoy, in 1847. The congregation suffered great losses through the revolution that swept over Europe in 1848. In 1847 the Fathers were expelled from Switzerland and in 1848 from Austria, to which, however, they returned. Important developments were now taking place within the congregation itself. Although the Transalpine portion of the congregation was subject to the *rector major* at Nocera in Italy, this superior left its government almost exclusively in the hands of a vicar-general resident at Vienna. As the congregation had spread far beyond its original boundaries, it was deemed necessary to create the office of provincial between the *rector major* and the local superiors. Father Passerat, weighed down by age and infirmities, resigned his office in 1848. After a series of deliberations conducted by the Holy See with the

superior general and the Fathers of the Transalpine provinces, Father Rudolph Smetana was appointed vicar-general in 1850. Pius IX was now persuaded that it would be advantageous to have the superior general resident in Rome. Fearing the opposition of the King of Naples, he did all in his power to convince him of the benefits arising from this step, but in vain; thereupon he decided that the Congregation of the Most Holy Redeemer, to the exclusion of the Neapolitan and the Sicilian houses, should be placed under a general superior, who was henceforth to reside at Rome. At the same time he made special regulations for the Redemptorists in the Kingdom of Naples. On the disappearance of the latter, the Neapolitan houses were united to the body of the congregation in 1869.

In pursuance of orders from the Holy See, Father Smetana convoked a general chapter. It was opened 26 April, 1855. The result of this chapter was the election of Father Nicholas Mauron, a native of Switzerland, as superior general. He was the first *rector major* to take up his abode at Rome. During Smetana's administration, and particularly during that of Mauron, the congregation made rapid progress. The number of provinces in 1852—not including Naples and Sicily—was four; in 1890 they had increased to twelve. The French-Swiss province, presided over by Father Desurmout for twenty-two years (1865–87), gained admission into Spain and South America. During the presidency of Garcia Moreno two houses were established in the Republic of Ecuador. A few years later the congregation gained a foothold in Peru, Chile, and Colombia. The original Belgian province, having grown very rapidly, was divided into the provinces of Belgium and Holland. The Lower German province found a new field of labour in the eastern part of South America. The province of Holland received charge of the mission at Surinam, South America, a settlement colonized partly by lepers.

The American province of the congregation, erected in 1850, has had a striking development. Its first provincial was the Rev. Bernard Hafkenscheid, a fellow-student of Leo XIII. One of his first cares was the establishment of a seminary and the selection of a suitable place for a novitiate. He chose Cumberland, Maryland, for the future house of studies. From this nursery of study and piety many able and zealous missionaries went forth. In 1853 the novitiate, which had been located since 1849 at Baltimore, was removed to Annapolis, Maryland. Here the heirs of Charles Carroll of Carrollton had donated their entire estate to the Redemptorist Fathers. This house remained the novitiate until 1907, with the exception of the years 1862–66, when it was at Cumberland, and the students at Annapolis. In 1858–59 the present church and convent were built at Annapolis. In 1868 the students were transferred to the new house of studies at Ilchester, Maryland, which remained the Alma Mater of the Redemptorists until 1907. In that year the faculty and the students, forty-eight in number, took up their abode at Esopus, on the Hudson, where a more spacious scholasticate had been erected. From the first house of St. Alphonsus in Baltimore sprang other communities: St. Michael's in 1859, St. James's in 1867, and the Sacred Heart in 1878. In 1882, owing to difficulties in the Bohemian parish, the Fathers, at the earnest request of Cardinal, then Archbishop, Gibbons, assumed charge of the Bohemians. In this diocese five other parishes, one in the city of Washington, were originally founded by the Redemptorists. In 1861 the congregation was called to Chicago, Illinois, to take charge of St. Michael's parish. It was not long before a large church and a commodious school and convent were built. The great fire of 1871 destroyed all these structures, but, thanks to

the faith and generosity of the people, they were rebuilt.

The many successful missions which the Redemptorists had given in the Diocese of St. Louis induced Archbishop Kenrick to ask for a foundation of the congregation in his episcopal city, and in 1866 a mission house was opened at St. Louis. In the same year (1866) another mission house was established in New York, near the little church of St. Alphonsus, which had been erected in 1845 for the convenience of the Germans in that section of the city; it had been served by Fathers of the Third Street community. Though now a mission church, St. Alphonsus's continued to be a parish church for the Germans. Subsequently, two more foundations were made in New York, one for Bohemian Catholics, and the other for the German Catholics in the northern part of the city. In 1871 an important mission house was opened at Roxbury, Boston. It was dedicated to Our Lady of Perpetual Help. Its first rector, the Rev. William H. Gross, was succeeded by the Rev. Leopold Petsch, when the former became Bishop of Savannah in 1873. In 1883, when a new parish was formed in that district, the Fathers of the mission church took charge of it. As early as 1874 the Redemptorists of the American province were called to St. Patrick's Church, Quebec, Canada, the only parish church in that city for English-speaking Catholics. Four years later the American Fathers became the custodians of the miraculous shrine of Ste-Anne de Beaupré, near Quebec; it was eventually transferred to the Fathers of the Belgian province. The same Fathers assumed charge of St. Anne's, Montreal, a large parish in a very poor district of the city. The Baltimore province in the meantime established two other foundations in Canada: St. Patrick's, Toronto, in 1881, and St. Peter's, St. John, N. B., in 1884. In 1876 the congregation was invited to take a second church in Philadelphia, that of St. Boniface. Besides these houses the province of Baltimore founded in 1881 a separate house for its juvenate, or junior house of studies, at Northeast, Pennsylvania. Another house, to be used as a primary juvenate, was purchased in 1886 at Saratoga, New York; this is at present a mission house. In 1893 a new house was opened at Brooklyn, New York.

In 1875 the original American province was divided, the eastern under the name of the province of Baltimore, and the western as the province of St. Louis. This latter province embraced the houses of St. Louis, New Orleans, Chicago, and Chatawa. This last-named place was selected for the novitiate and house of studies for the province of St. Louis, but was subsequently abandoned. Since 1875 several new foundations have been established. In 1878 Kansas City, Missouri, was selected for an educational institution. The old house of St. Mary's at Detroit was abandoned in 1872, but in 1880 another house was established in the suburbs of the same city; this is now a flourishing mission and parish church. Two years later the Redemptorists began a second foundation at Chicago. In 1887 a juvenate was erected at Kirkwood, near St. Louis, and in 1888 the Fathers settled at Grand Rapids, Michigan. In 1891 a foundation was made at Seattle, Washington, in 1897 a new house of studies was erected at De Soto, Missouri. In 1894 the Fathers went to Denver, Colorado, and took charge of St. Joseph's Church; in 1906 to Portland, Oregon; in 1908 to Davenport, Iowa, and to Fresno, California. In 1910 a new house was founded at Oconomowoc, Wisconsin, which will be the future house of studies of the province of St. Louis.

Despite the manifold labours and the limited number of Fathers, the preaching of missions, the special work of the sons of St. Alphonsus, was never neglected. In 1850, however, it received a powerful impetus

under the first provincial, Father Bernard. Shortly after his arrival in America he organized and trained what may be called the first band of regular missionaries, among whom were the eminent converts, Fathers Hecker, Hewit, and Walworth; these distinguished missionaries afterwards established the Congregation of the Paulists. Since then the work of the missions has increased rapidly from year to year; thus a double activity, parish work and mission work, has become a special feature of the congregation in North America. Some idea of the work of the Baltimore province during the ten years from 1890 to 1899 is conveyed by the following figures: missions and renewals, 1889; retreats, 1071; other exercises, 75; confessions, 2,418,758; converts, 1252. Parish work: baptisms, 54,608; communions, 6,827,000; first communions, 19,077; marriages, 8311; average number of school children, 13,000; converts, 1922.

The administration of Father Mauron was rendered memorable by several important events. In 1866 Pius IX caused the miraculous picture of Our Lady of Perpetual Help to be placed in the Redemptorist Church at Rome. The devotion to the Blessed Virgin under this attractive title has since then spread far and wide. In 1871 the pope, moved by the urgent and repeated petitions of bishops and heads of religious orders, bestowed the title of Doctor of the Universal Church upon St. Alphonsus, known the world over by his theological and devotional writings. Father Hofbauer, the Apostle of Vienna, was beatified in 1889, and Brother Gerard Majella, the *thaumaturgus* of the congregation, in 1893. The latter was canonized by Pius X, 11 Dec., 1904. The eventful administration of Father Mauron ended in 1893. In 1882 he was stricken with apoplexy, and, though he rallied from the shock, a slow decline set in, and he died 13 July, 1893. On 1 March, 1894, Very Rev. Mathias Raus was elected superior general. He was born 9 Aug., 1829, in the Duchy of Luxemburg; made his profession 1 Nov., 1853, and was ordained priest 8 Aug., 1858. After filling various important offices in the order, he was called to Rome by his predecessor to be one of the general consultors. Father Raus's administration is remarkable for the number of Redemptorist causes of beatification introduced, or about to be introduced, in Rome, thirteen in all. Among them are: Ven. John Nepomucene Neumann, superior of the American Province, who died as Bishop of Philadelphia, 5 Jan., 1860; Father Francis X. Seelos, of the American province, who died a victim of yellow fever at New Orleans, 4 Oct., 1867; and Father Peter Donders, the Apostle of the Lepers in Surinam, who died in the leper colony at Batavia, in Dutch Guiana, 14 Jan., 1887. To these may be added Father Alfred Pampelon, who died at Ste-Anne de Beaupré in Canada, 30 Sept., 1896. Father Raus's administration was closed by the happy issue of the cause of Blessed Clement M. Hofbauer's canonization, which took place on 20 May, 1909. In that year the venerable superior, having attained his eighty-second year, deemed it wise to resign his responsible office, and in the general chapter opened on 26 April, 1909, the Very Rev. Father Patrick Murray, superior of the Irish province, was elected superior general of the congregation. He was born 24 Nov., 1865, made his profession 23 Oct., 1889, and was ordained priest 10 Sept., 1890.

During the past twelve years the development of the congregation has been very marked. The Roman province was particularly honoured by Leo XIII, when he confided to the Fathers the magnificent new church of St. Joachim in Rome. The French province was divided into three provinces and two vice-provinces in 1900. Spain became a province, having eight houses, to which recently two more communities were added. The French province proper was

divided into two provinces, Lyons and Paris. To the former now belong the Southern Pacific vice-province, embracing Chile and Peru, and to the latter the Northern vice-province of Ecuador and Colombia. Since the suppression of the religious orders in France in 1904, some of the Redemptorist communities have undertaken new foundations in Belgium, and others in South America. In 1900 the Austrian province was also divided into two provinces, Vienna and Prague, with a Polish vice-province. The latter was made a province in 1909. Since the division the Viennese opened two houses in Denmark, one in Prussian Silesia, and a fourth at Linz. In 1899 the Belgian Fathers were requested by the Government to take charge of a number of missions in the Congo State; these missions have now increased to six, Matadi, Tumba, Kionzo, Kinkanda, Kimpesse, and Sonagongo. The Fathers are deeply indebted to the paternal Government of the Congo State for the progress they have made since their arrival in 1899. Several valuable missionaries have already fallen victims to the treacherous climate.

In Canada, which was made a vice-province in 1894, four more houses were opened. This vice-province, depending on the Belgian province, numbers six houses. In the West Indies, which were also made a vice-province in 1904, there are now six houses. The province of Baltimore opened in 1902 a foundation at Mayagüez in Porto Rico. Before the occupation of the island by the United States the Spanish Redemptorists had settled at San Juan, but at the close of the Cuban War returned to Spain. The American Fathers are now there as missionaries and pastors. A parish comprising some 30,000 souls is confided to their care. Despite all their labours for the benefit of the natives their progress is very slow. On 26 July, 1911, the Belgian houses of Canada were erected into a new province.

The Upper German or Bavarian province, which was under the ban of the *Kulturkampf*, has recovered some of its lost ground. Since its readmittance, it has added another very important foundation. But the historic convent of Altötting has passed into other hands. In 1894 this province opened in Brazil a mission of two houses forming a vice-province. The province of Holland has added to its mission in Surinam a mission in Brazil, forming another vice-province, having under its jurisdiction three houses.

A more detailed account of the English and Irish provinces claims our attention.

The English province, begun from Belgium in 1843, owes its great progress to the Rev. Robert A. Coffin, one of the band of converts associated with Newman, Manning, and Faber in the Oxford Movement. After his ordination to the priesthood he joined the Redemptorists, and gave missions throughout England and Ireland, until he was appointed first provincial of the English province in 1865. During his administration of seventeen years new houses were founded in various parts of the United Kingdom, the house at Perth being the first convent opened in Scotland since the Reformation. Leo XIII appointed the Rev. Robert A. Coffin Bishop of Southwark. His successor as provincial, the Rev. Hugh McDonald, died Bishop of Aberdeen, Scotland. The activity of the English Fathers is evidenced by their literary labours and their success on the missions, which resulted in more than 16,000 converts. At present the province has eight houses: Clapham, Bishop-Eton, Monkwearmouth, Bishop's Stortford, Kingswood, Edmonton, and the novitiate and house of studies at Perth, Scotland, with a total membership of one hundred and twenty-three. Besides the Rev. Robert A. Coffin, a number of noted converts have joined the congregation, among them Bridgett, Livius, and Douglas.

In 1898 the houses in Ireland and Australia, hitherto subject to the English province, were con-

stituted an Irish province, and Australia, a vice-province, as its dependency. The Rev. Andrew Boylan was appointed the first provincial, with his residence at Limerick. On 25 March, 1901, the foundation of the present new juvenate house at Limerick was laid. The province of Ireland comprises four houses: Limerick, Dundalk, Belfast, and Esker; the vice-province of Australia, three houses: Waratah in New South Wales, Ballarat in Victoria, and Perth in Western Australia. The total membership is one hundred and forty-seven. In 1906 the Rev. Andrew Boylan was commissioned to visit the Philippine Islands, and to establish there a colony of Irish Redemptorists. At present there are two Redemptorist Houses on these Islands and one in Wellington, New Zealand. The church at Limerick is celebrated for its Confraternity of the Holy Family for men and boys, founded by the Rev. Edward Bridgett, which the late Bishop of Limerick, Dr. Butler, called "the miracle wrought by the Mother of Perpetual Succour, a far greater miracle than the cure of a blind boy or the healing of a cripple". In 1903 it had the following membership: Monday, division of men, 2722; Tuesday, division of men, 2580, boys' division, 1226; total, 6528. Meetings are held every week, the average attendance being 3992, while the communions received in the confraternity during 1902 numbered: men, 39,860, boys, 8497; total 48,357.

The following figures will exemplify the growth of the congregation. The number of subjects in 1852 (not including those of Italy) were: priests, 343; professed students, 75; priests novice, 12; choir novices, 45; professed lay brothers, 175; lay novices, 67; total, 715; houses, 45. In 1910 (including Italy) priests, 2085; professed students, 537; choir novices, 142; professed lay brothers, 962; lay novices, 343; total, 4069; houses, 218; provinces, 19; vice-provinces, 10. The constant and rapid growth of the congregation must be attributed chiefly to the erection of the so-called juvenates. Finding it difficult in some countries and impossible in others to secure a solid future for the different provinces, the Fathers deemed it expedient to receive boys who showed a disposition for the religious and priestly life, and to prepare them while still young for the higher studies. Father Hofbauer adopted this plan, and obtained thereby a number of excellent young men for the order. In the same way Father Passerat was equally successful in drawing young men to the congregation. It was in this manner that Father Mauron, the late superior general, was attracted to the order. But it was only after 1867 or 1868 that a definite scheme of preparing boys for the novitiate was followed. The idea was taken up simultaneously in the French and American provinces. Father Desurmont was the first to organize this preparatory institution in France. For many years it was customary for the American Fathers to select from their parochial schools boys who, in their opinion, would eventually become fit subjects for the novitiate. After having tested their ability, they instructed them personally in the rudiments of Latin, or sent them to a Catholic college until they reached their sixteenth year. At this age they were admitted to the novitiate, after which they completed their humanities. For the benefit of boys who did not belong to Redemptorist parishes or who lived in other cities the provincial, Father Helmprecht (1865-77), secured a suitable place near his residence at Baltimore. One of the Fathers was appointed director. In 1869 a new method was followed. The young men were to finish their classical course before entering the novitiate. To accommodate the increasing number of pupils, provision was made at Baltimore, then at Ilchester, until finally, in 1881, a desirable college building was purchased at Northeast, Pennsylvania. Here a six years' classical course is pursued, while at the same time the moral and physical

fitness of the young men may be easily ascertained. Similar preparatory colleges, with some slight differences, have been introduced into almost every province. After a novitiate of one year, the young members pass to the higher course of studies. This embraces two years' philosophy, two years' dogmatic, and two years' moral theology, with natural philosophy, church history, Sacred Scripture, canon law, pastoral theology, and homiletics. After the completion of their studies the young priests make what is called the "second novitiate" of six months, during which time they are trained theoretically and practically in the special work of the missions.

Although the limited number of subjects and the manifold labours of the ministry do not permit the members of the congregation to make a specialty of it, still their literary work is not inconsiderable. Among Redemptorist authors the following may be mentioned: Italy: Januar. Sarnelli, Bl. Panzutti, Anton. Tannoia; France: Achilles Desurmont, Augustine Berthe, Leonard Gaudé; England: Thos. Livius, Thos. E. Bridgett, Cyril Ryder, Robert A. Coffin; Austria: Aug. Rösler, Karl Dilgskron, Gerard Diessel, Georg Freund, Franz Kayker; Bohemia: Emmanuel Kovar, Franc. Blatak, Franc. Sal. Blazek, Aloys. Polak, Theoph. Mateju, Wenc. Melichar; Germany: Michael Bengel, Michael Haringer, Andreas Hugues; Belgium: Victor Cardinal Deschamps, Henri Saintrain, Ernest Dubois, Francis X. Godts; Holland: J. Aertnys, Frans Ter Haar, Willem van Rossum, Joh. L. Jansen, Aloys. Walter; Spain and South America: Tomas Ramos, Ramon Serabia; North America: Antony Konings, Joseph Putzer, Michael Müller, Ferreol Girardey, Peter Geiermann.

JOSEPH WUEST.

Redford, SEBASTIAN, b. 27 April, 1701; d. 2 January, 1763. Educated at St. Omer, Watten, and Liège, he became a Jesuit and lived as chaplain with the Wrights of Kelvedon, then with the Herberts of Powis (1733-48). Redford was much trusted by the second Marquess of Powis (d. 1745), but the third was unfriendly. When he died (1748), a Protestant succeeded, the chaplaincy lapsed, and Redford had, as he says, "to rue the ruin" of his former flock. He was next stationed at Croxteth, the seat of Lord Molineux, where he published "An important Inquiry; or the Nature of Church Reformation fully considered" (1751). The book was a success, but the excise officers seized and destroyed 400 copies, the last half of the edition. A second and enlarged edition appeared in 1758. Redford's extant letters (preserved by the English Jesuits) show a strong and attractive personality, and throw some light on the period when most priests were chaplains in Catholic families.

J. H. POLLEN.

Redi, FRANCESCO, Italian poet, b. at Arezzo, 18 February, 1626; d. at Pisa 1 March, 1698. After taking his degree in medicine, he entered the service of the Colonna family at Rome as a tutor, and held the position five years. In 1654 he went to Florence, where he acted as physician to the Grand dukes Ferdinand II and Cosimo III. He was constantly

engaged in experiments intended to improve the practice of medicine and surgery, and yet found leisure for much literary work. He was an active member of several of the academies of the time, and, as an associate of the Crusca, aided in preparing its important Vocabolario. He taught in the Studio at Florence in 1666, as *lettore pubblico di lingua toscana* and was one of the first members of the Arcadia. His writings include a number of scientific documents, e. g. "Osservazioni intorno alle vipere", "Esperienze intorno alla generazione degli insetti", "Consulti medici", etc. Other writings are his "Lettere"; the dithyrambs, "Bacco in Toscana" and "Arianna Inferma", besides a number of lyrics, some of which are Petrarchian and others burlesque in their tone; and an unedited *Vocabolario aretino*. The "Bacco in Toscana" is the best example of the dithyramb in Italian, and, although deformed occasionally by obscure imagery and diction, it remains one of the best works of the seventeenth century.

Opere (Venice, 1712); *Opusculi di storia naturale* (Florence, 1858-63); *Bacco in Toscana*, with the author's notes (Florence, 1685); IMBERT, *Il Bacco in Toscana* (Città di Castello, 1890); IDEM, *Francesco Redi in Nuova Antologia* (October, 1895).

FRANCESCO REDI

Reding, AUGUSTINE, Prince-Abbot of Einsiedeln and theological writer, b. at Lichtensteig, Switzerland, 10 August, 1625; d. at Einsiedeln, 13 March, 1692. After completing the classics at the Benedictine College of Einsiedeln he there joined the Order of St. Benedict, 26 December, 1641, taught philosophy at the early age of twenty-four, was ordained priest and appointed master of novices in 1649, obtained the degrees of Doctor of Philosophy and Theology at the University of Freiburg im Breisgau in 1654, was professor of theology at the Benedictine University of Salzburg from 1654 to 1648, became dean (prior) at Einsiedeln in 1658, and was finally elected Prince-Abbot of Einsiedeln on 17 July, 1670. At Einsiedeln he built the still existing choir, the confession-church, and St. Magdalene's chapel (1674-84). In 1675 his monastery took charge of the college at Bellinzona, which was conducted by the monks of Einsiedeln until its suppression in 1852. He watched carefully over the monastic discipline and insisted on a thorough intellectual training of his monks. During his time the conventuals of Einsiedeln increased from 53 to 100, many of whom gained renown as professors at various institutions of learning. As a temporal ruler he was beloved by his people and revered as a father by the poor. His numerous theological writings give evidence of great learning, though his style is dry and at times obscure. His chief work is "Theologia scholastica universa" (13 vols., Einsiedeln, 1687), based on the "Summa" of St. Thomas. Other important works are: "Veritas inextincta concilii Tridentini" (5 vols., ib., 1677-84), a defence of the Council of Trent against Heidegger; "Vindex veritatis centuriæ primæ annalium ecclesiasticorum Baronii" (ib., 1680), a justification of the first century of the "Annales" of Baronius; "Œcumenicæ cathedræ apostolicæ autoritas" (ib., 1669), a defence of papal supremacy against the Gallican Liberties; and other works of less importance.

MOREL, *Augustin Reding, Fürst von Einsiedeln, als Gelehrter u. Schulmann* (Einsiedeln, 1861); HURTER, *Nomenclator*, IV (Innsbruck, 1910), 332-5.

MICHAEL OTT.

Red Sea (Heb. *Yām-Sāph*; Sept. *ἡ ἐρυθρὰ θάλασσα*; Greek writings of the Old and New Testaments *ἡ ἐρυθρὰ θάλασσα*; Vulg. *Mare rubrum*).—The name of Red (or Erythræan) Sea was used by classical historians and geographers to designate the waters of the Indian Ocean and the Persian Gulf. In modern geography, it is applied to the north-west arm of the Indian Ocean, some 1400 miles long and lying between Arabia on the east and Africa on the west. Understood in this latter sense, the Red Sea stretches from the Strait of Bab-el-Mandeb, in lat. 12° 40' N., to the modern head of the Gulf of Suez, lat. 30° N. Its greatest width is 205 miles, and its greatest depth about 1200 fathoms. At Ras Mohammed, in lat. 27° 45' N., the Red Sea is divided by the Peninsula of Sinai into two gulfs: that of Suez (anciently *Heroopoliticus sinus*) on the west, now about 130 miles in length with an average width of about 18, and that of Akabah (anciently *Ælaniticus sinus*) on the east, narrower and only about ninety miles long. The Red Sea receives no river of importance, and is noted for its heat. Formerly its commerce was great, and it has much increased since the opening of the Suez Canal in 1869.

The derivation of the Hebrew name *Yām-Sāph* is uncertain. The meaning of *Sāph* is probably "reeds", and the title *Yām-Sāph* (Sea of Reeds) appears to have been given originally to the upper end of the Gulf of Suez, which was probably shallow and marshy, and abounding in reeds. More uncertain still is the derivation of the Græco-Roman name, Erythræan (or Red) Sea. It has been variously explained by the red corals it contains; by the colour of the Edomite and Arabian Mountains, bordering its coasts; by the glow of the sky reflected in its waters; by the word *edom* (red), which the Greeks may have rendered literally; by the name of King Erythras, who reigned in the adjacent country.

The Scriptural references to the Red Sea are directly connected with its northern gulfs. Those which concern the Gulf of Akabah, on the north-west, are comparatively few and unimportant. In Ex., xxiii, 31, that gulf is simply given as the southern limit of the Holy Land; in III Kings, ix, 26; II Par., viii, 17, it is spoken of in connexion with Solomon's maritime commerce, and in III Kings, xxii, 48, in reference to Josaphat's unsuccessful attempt in the same direction; finally, in Jer., xlix, 21, it is mentioned in a prediction of the utter ruin of Edom. The Scriptural references to the Gulf of Suez, on the north-east, are on the contrary both numerous and important, for it is the miraculous passage of that arm of the Red Sea which is described in Ex., xiv, celebrated in Moses' Canticle (Ex., xv), and repeatedly referred to in other parts of Holy Writ, despite the recent theories framed to disprove the traditional identification of the Gulf of Suez with the Red Sea crossed by Israel, at the time of the Exodus. Brugsch and others have indeed argued that the water which was dried up to let Israel pass was the northern end of the Sirbonian Bog, on the shore of the Mediterranean Sea, between Egypt and the south-west extremity of Chanaan, but this theory is untenable because contrary not only to the statements of the Biblical narratives but also to the recent discoveries which have settled the position of Gessen, whence the Israelites set out for Palestine. Again, Beke and others have advanced the view that the eastern arm of the Red Sea, i. e. the Gulf of Akabah, and not the Gulf of Suez, is that which the Hebrews crossed. But this view also is inconsistent with the most natural interpretation of the Biblical data concerning the Exodus. The traditional iden-

tification of the Gulf of Suez with the Red Sea crossed by Israel should therefore not be given up.

It remains true, however, that the scholars who most readily admit this identification are still divided with regard to the actual place of crossing. Their disagreement is chiefly due to the difficulty of ascertaining the exact extent of this western arm of the Red Sea at the time of the Exodus. On the supposition that at that time the Gulf of Suez extended northward through the large Bitter Lake to the Timsah Lake, many writers maintain that the crossing was effected at a point between these two lakes then joined only by a shallow connexion. To establish this position, they put forth various arguments (historical, geographical, geological) which, when closely examined, are found not to substantiate it. In fact, every attempt at proving that the Gulf of Suez extended in Moses' time as far as the Timsah Lake, or even as far as the great Bitter Lake, seems to be irreconcilable with the fact that Egyptian inscriptions of the Twelfth Dynasty speak of this latter body of water as an undrinkable "lake", so that, several centuries before the Exodus, the great Bitter Lake itself was no part of the Arabian "Gulf". Apparently, then, those scholars are in the right who think that in the time of Moses the northern limit of the Gulf of Suez did not vary much, if at all, from what it is at the present day, and who maintain that Israel crossed "the sea" at some point in the vicinity of the present Suez. This point is, indeed, at a considerable distance from the place where Moses was bidden to change his eastern march and to "turn and encamp" (Ex., xiv, 2); but this very distance is required to give time to convey to Pharaoh the intelligence that the Israelites had fled, and to enable his army to overtake them at a spot whence, humanly speaking, they could not escape (Ex., xiv, 5 sqq.).

The passage of the Red Sea was ever, and indeed rightly, considered by the Hebrews as a most important event in their national history, and also as one of the most wonderful miracles of the Almighty in behalf of His Chosen People. Endeavours to explain away the miraculous character of the event have signally failed, for none of the documents, regarded by criticism as embodied in Holy Writ and as describing this historical fact, treats it as the mere result of natural forces. In I Cor., x, 2, the passage of the Red Sea is referred to as a fitting type of Christian baptism.

FRANCIS E. GIGOT.

Reductions of Paraguay.—The Jesuit Reductions of Paraguay, one of the most singular and beautiful creations of Catholic missionary activity, have contributed more than any other factor to fix the name of Paraguay in history. They have been the object alike of the most sincere admiration and the bitterest criticism. An exact account, based on the best sources, should be their best justification.

I. PRELIMINARY NOTIONS.—The founding and the plan of the Reductions cannot be understood and correctly judged except in the light of colonial and political conditions as they prevailed in the Spanish La Plata territory at the time of the arrival of the Jesuits. The country discovered in 1515 by Juan Diaz de Solis had gradually by slow stages been conquered in sanguinary, and in the beginning, disastrous battles with the warlike, liberty-loving tribes. Until 1590 the Spaniards had founded ten cities and

forty colonies (Guevara, "Hist. de la Conquista del Paraguay, Rio de La Plata y Tucuman", Buenos Aires, 1882; Gay, "Historia da Republica Jesuitica do Paraguay", Rio de Janeiro, 1863; Monner-Sans, "Pinceladas Históricas", Buenos Aires, 1892). The natives, subdued by force of arms or submitting voluntarily, were brought under the yoke of the Spanish *encomienda* system which in its more severe application made them *yanacunas*, or slaves, in its milder form *mitayas*, or serfs, to the *conquistadores* and the white colonists (Gay, op. cit., 45). The Spanish kings sought to better the lot of the natives by wise and humane decrees for their protection, but the difficulty of exercising control over them, and the unreliability, weakness, or selfishness of many of the officials permitted the abuse of this system to flourish (Monner-Sans, loc. cit., 43 sq.). This system resulted in frequent uprisings of the subjugated race, and an implacable hatred of the foreigners on the part of the numerous tribes still retaining their freedom, who withdrew further and further into the almost inaccessible steppes and forests in the interior, harassed the colonies, still in their youth, with inroads, and frequently laid them waste. It was not until the Reductions were founded that conditions were essentially improved in this respect also.

The kings of Spain having the conversion of the native peoples sincerely at heart, missionaries accompanied even the earliest expeditions to La Plata, and churches and parishes were founded in the new colony as soon as possible. Here, as elsewhere, the first pioneers of the Faith were sons of St. Francis (Marc. de Civezza, "Storia universale delle Missioni Franciscane", Prato, 1891, VIII, ii, 2). Besides them we find Dominicans, Mercedarians, and, to conjecture from the oldest lists of bishops (Gams, "Series Episcoporum Eccl. Catholice", Ratisbon, 1873), also Augustinians and Hieronymites. The immense territory was divided into three dioceses: Paraguay (see at Asuncion), established in 1547; Tucuman (see at Santiago del Estero, later at Córdoba), 1570; Buenos Aires (see at Buenos Aires), 1582. But as late as 1559 the clergy in the colony numbered in all only twenty secular and regular priests (Gay, op. cit., 48). When the first Bishop of Tucuman, Don Francisco de Victoria, O.P., took charge of his diocese in 1581, he found in the entire diocese only five secular and a few regular priests, not one of whom could speak the language of the Indians. In 1586 the first Jesuits came to Tucuman at his request, and in 1587, at the request of the Bishop of Asuncion, Don Alonso Guerra, O.S.F., also to Paraguay. In view of the fame acquired in Europe for the young order, still in its first ardour, by Francis Xavier in Eastern India, Anchieta in Brazil, and others, it was hoped the Society would prove a great aid, as well towards improving the religious conditions in general, as towards pacifying and converting the numerous wild tribes. The colleges, seminaries, residences, and houses for spiritual retreats founded after 1593 in rapid succession at Santiago del Estero, Asuncion, Córdoba (a university since 1621), Buenos Aires, Corrientes, Tarija, Salta, San Miguel de Tucuman, Santa Fé, La Rioja, and elsewhere served to attain the first purpose; while the second purpose was fulfilled by the ministry among the Indians in the *encomiendas*, and by traveling missionaries who went out among the tribes still at liberty and covered the vast territory in all directions, very much as St. Francis Solanus did at about the same period. These mission excursions reflected honour upon the heroism of the missionaries, but achieved no lasting results. Therefore the general of the order, Aquaviva, insisted on the concentration of effort and the founding of central points in the most advantageous localities, after the fashion of similar efforts in Brazil (Handelmann, "Gesch. v. Brasilien", Berlin, 1860, 78 sq.). The first superior of the province of

Paraguay, founded in 1606 (which numbered at its foundation seven Jesuits, but in 1613 no less than one hundred and thirteen), Father Diego de Torres Bollo, was commissioned to put these ideas into practice.

II. FOUNDATION OF THE REDUCTIONS.—They did not, as has been asserted, owe their origin to a previously-outlined idea of a state after the pattern of Campanella's "Sun State" ("Stimmen aus Maria-Laach", XXV, 1883, 439 sq.), which should form the realisation of the longing of the Jesuits for power; on the contrary, they grew in the most natural manner out of the efforts to obviate the three principal difficulties in the way of the conversion of the heathen resulting from the prevailing *encomienda* system, namely: the oppression of the natives by force, the consequent aversion to the religion of the oppressors, and the bad example of the colonists. The new watchword was: liberty for the Indians, emancipation from the *servitium personale*, and the gathering and isolating of the natives won over by the *conquista espiritual* in separate mission colonies or "reductions" managed independently by the missionaries. The plan provoked a storm of animosity against the Jesuits among the colonists, which led to repeated expulsions of the members of the order from their colonies. Even a part of the clergy, looking on the *encomienda* system as a righteous institution, and who themselves lived upon its fruits, opposed the Jesuits. [This opposition is quite apparent in Civezza's treatise, which, however, can lay but little claim to being historically exact (loc. cit., 135 sqq.)]. The Jesuits, however, had a powerful ally in Philip III of Spain, who very energetically espoused the cause of the oppressed Indians, and who not only sanctioned the plans of the Jesuits, but furthered them very effectively by a number of royal decrees and appropriations from the public treasury, and placed them on a firm legal basis. The *Cedula Real* (Royal Ordinance) of 18 Dec., 1606, given at Valladolid, commanded the governor, Hernandarias de Saavedra, that, "even if he could conquer the Indians on the Paraná by force of arms he must not do so, but must gain them over solely through the sermons and instructions of the religious who had been sent for that purpose."

The *Cedula Real* of 30 Jan., 1607 provided that the Indians who were converted and became Christians could not be made serfs, and should be exempt from taxation for a period of ten years. The so-called *Cedula magna* of 6 March, 1609, declared briefly that "the Indian should be as free as the Spaniard" (Monner-Sans, op. cit., 22 sq.). With these royal decrees (which were followed by a long list of others) as a basis, the Jesuits began, in explicit understanding with the highest ecclesiastical and civil authorities, who had been commanded by the Government to render efficient aid, to found Reductions, first of all, in the distant north-eastern Province of Guayra (approximately the present Brazilian Province of Paraná), where, in 1609, the Loreto Reduction was founded on the Rio Paranápanema, which was followed in 1611 by the Reduction S. Ignacio Miri, and between then and 1630 by eleven others, altogether numbering about 10,000 Christians. The Indians hastened in entire bands to these places of refuge, where they found protection and safety from the robbers who harassed them. All ecclesiastical and civil decrees notwithstanding, the traffic in slaves had experienced an astounding development among the mixed population of the captaincies of São Vicente and Santo Amaro (in the present Province of São Paulo, Brazil) composed of adventurers and freebooters from all nations. Well-organized troops of man-hunters, the so-called Mamelucos, had in a short time depopulated the plateau of São Paulo, and from 1618 onwards threatened also the Reductions, to which the startled Indians hastened from all sides.

One by one the Reductions fell into the hands of the marauders. In 1630 alone no less than 30,000 Indians are said to have been murdered in Guayra or carried off from there by force as slaves. In vain the missionaries had appealed to the Spanish and Portuguese authorities for protection. They could not or would not help (Handelmann, loc. cit., 516 sq.). As a last resort it was decided to take the remaining Christians and those still coming in to the Reductions founded on the Paraná and Uruguay rivers, and in 1631 the exodus was accomplished under the leadership of the heroic Father Simon Maceta. Dr. H. von Ihering calls this exodus "one of the greatest achievements of its kind recorded in history" ("Globus", LX, 1891, 179). Scarcely 12,000 reached their destination. ("Conquista Espiritual hecha por los Religiosos de la Compañía de Jesus en las Provincias del Paraguay, Paraná, Uruguay, y Tape escrita por el P. Antonio Ruiz de Montoya de la misma Comp.", new ed., Bilboa, 1892, 143 sq.). In similar manner also the nine Reductions which had been founded between 1614 and 1638 on the Rio Jacuhy and in the Sierra dos Tapes in the present Brazilian Province of Rio Grande do Sul, and which numbered in all some 30,000 souls, were soon after destroyed and partially transferred to other places. The neglect of the Spanish governors to come to the aid of the missions in their peril was bitterly avenged by the subsequent destruction of the Spanish colonies in Guayra by the Portuguese, and the loss of the entire province. Cast upon their own resources, the Jesuits organized, with the king's consent, an Indian militia, equipped with fire-arms, so that, as early as 1640, they could place a well-disciplined army in the field against the Paulistas, and could effectively suppress robbery and pillage. Henceforth the Reductions continued to form a strong bulwark against the inroads of the Portuguese.

The main part of this "Christian Indian State", as the Reductions have been called, was formed by the 30 [32] Guaraní Reductions, which came into being during the period from 1609-1760 in the territory of the present country of Paraguay, the Argentine Provinces of Misiones and Corrientes, and the Brazilian Province of Rio Grande do Sul. Many of these Reductions repeatedly changed their location in consequence of the frequent inroads of the Mamelucos and savage Indian tribes, retaining, however, their former names,—a circumstance which has given rise to no little confusion in older charts. The growth of the Guaraní Mission can be seen from the annual statistical records. In 1648 the Governor of Buenos Aires on a visit found a population of 30,548 souls in nineteen Reductions, and in 1677 the Fiscal of the Audiencia of Charcas, Don Diego Ibañez da Faria, found 58,118 in twenty-two Reductions. In 1702, 22 villages on the Paraná and Uruguay numbered 89,500 souls; in 1717, 31 villages numbered 121,168; in 1732, 141,242; 1733, 126,389; 1734, 116,250; 1735, 108,228; 1736, 102,721; 1737, 104,473; 1738, 90,287; 1739, 81,159; 1740, 73,910; 1741, 76,960; 1742, 78,929; 1743, 81,355; 1750, 95,089 (Monner-Sans, 134 sq.). The remarkable fluctuations in the number of the inhabitants were due to repeated attacks of epidemic diseases (see below).

Besides the Guaraní missions, the Chiquitos Mission was founded in 1692 to the north-west, in the present Bolivia; in 1765 this mission numbered 23,288 souls (4981 families) in ten Reductions (Fernandez, "Relacion de los Indos Chiquitos", Madrid, 1726; Lat. tr., Augsburg, 1733; Ger. tr., Vienna, 1729; Bach, "Die Jesuiten und die Mission Chiquitos . . . ed. Kriegk, Leipzig, 1843). The connecting link between the Guaraní and the Chiquitos missions was formed by the Mission of Taruma with three Reductions: San Joaquin (1747); San Estanislao (1747), and Belen (1760), to which 2597 souls (547 families) belonged in 1762, and 3777 souls (803 families) in 1766.

Far greater difficulties than in the Guaraní missions were encountered among the numerous many-tongued "mounted tribes" of the Gran Chaco, whose depredations continually kept the Spanish colonies on the alert (Huonder, "Die Völkergruppierung im Gran Chaco im 18. Jahrhundert", in "Globus", LXXXI, 387 sq.; D. Lorenzo Hervás, "Catalogo de las lenguas", Madrid, 1800). At the urgent request of the Spanish authorities the Jesuits attempted to found Reductions among these tribes also. Fifteen Reductions came into existence between 1735 and 1767, which about 1767 harboured Indians of eleven different tribes, among them about 5000 Christians (cf. the treatise by Dobrizhoffer, "Hist. de Abiponibus", Vienna, 1784; Ger. tr., Vienna, 1783; tr., London, 1822; Pauke (Pauke), "Missionen von Paraguay", new ed. by Kobler, Ratisbon, 1870; and Bringmann, Freiburg im Br., 1908). Scattered Reductions were founded in Tucuman, particularly among the Chiriguano and Mataguayos (1762: 1 Reduction, 268 Christians, 20 pagans), and in North Patagonia (Terra Magallonica) where the Reduction of Nuestra Señora del Pilar was established in 1745. Altogether the Jesuits founded approximately 100 Reductions, some of which were later destroyed; 46 were established between 1638 and 1766. Consequently, the accusation raised by Azara and others that their missionary activity had become stagnated is unfounded. Until 1767 new reductions were continually being formed, while a constant stream of converts gained by the missionaries on their extensive apostolic journeys kept pouring into the older Reductions (cf. Ulloa, "Voyage del'Amér. mérid.", Amsterdam, 1752, I, 541 sq.). Between 1610 and 1768, 702,086 Indians of the Guaraní tribes alone were baptized.

The founding and preservation of these Reductions were the fruit of a century and a half of toil and heroic sacrifice in the battle against the terrors of the wilderness and the indolence and fickleness of a primitive people, as well as against the reckless policy of exploitation followed by the Spaniards, to whom the Reductions were ever an eyesore. Down to 1764 twenty-nine Jesuits of Paraguay suffered death by martyrdom.

III. ORGANIZATION OF THE REDUCTIONS.—A. *Plan and Location of the Settlements*.—The Reductions were almost always laid out in healthy, high locations, the great central stations, as for instance Candelaria and Yapeyu, on the large waterways (Paraná and Uruguay) of the country. The general plan was similar to that of the Spanish *pueblos*. The form was square, all streets running in straight lines, the main streets frequently being paved. The latter gave upon the *plaza* the large square where the church was situated, generally shaded by trees, and ornamented with a large cross, a statue of the Virgin and frequently also with a pretty village well; at the head of the *plaza* stood the church, and adjoining it, on one side, the residence of the Fathers, called the "College"; on the other, the cemetery, enclosed by a wall with a pillared hall. The dwellings of the Indians, until the end of the seventeenth century, were frequently plain huts; later, solid, one-story houses, built of stone or adobe, and invariably covered with tiles because of the danger of fire, about fifteen by eighteen feet in size, and divided into various apartments by partitions of wicker-work; they formed comfortable quarters for families of from four to six members (cf. Cardiel, "Declaración de la Verdad", Buenos Aires, 1900, 121 sq., 282 sq.; Queirel, "Carta sobre las ruinas de S. Ignacio Miri", Buenos Aires, 1898), and, at all events, were incomparably better than the dwellings of the Indians of the *encomienda*. A portico, resting on stone or wooden pillars, and extending the entire width of the building, projected from the front of each house, so that one could walk through the entire town in rainy weather without getting wet.

The houses were arranged in separate groups (*vici, insulae*) of six to ten dwellings each, to diminish the danger of fire. The "college" was separated from the plaza by a wall and a small courtyard, and by another wall from the adjoining buildings, which contained the schools, workshops, store-houses etc. Behind lay the carefully-kept garden of the Fathers.

The churches, mostly three-aisled, built of massive blocks of stone, with a richly-decorated façade, a main door, and several wide entrances, convey an impression of grandeur even as ruins (Ave-Lallemand, "Reisen durch Süd-Brasilien", Leipzig, 1859; Gay, op. cit., 321 sq.; Hernandez, in "Razón y Fé", VI, 224; V, 235; VII, 236). In the massive belfries, which mostly stood apart from the churches, hung six or even more bells, which latterly were cast in the Reductions. The rich interior furnishings would have graced any cathedral. Besides the church, each village had one or more chapels for the dead, in which the corpses were exposed and whence they were taken away, also a church-yard chapel. The cemetery, laid out alongside the church and enclosed by a wall with a pillared hall, was, with its rows of orange trees and its wealth of flowers, truly "a sacred garden of the dead" (Southey, "History of Brazil", 3 vols., London, 1819, II, 414). To the left of the cemetery, isolated and surrounded by a wall, stood the *coti-quazu* (the big house), which served as an asylum for the widows, who lived there in common; as a reformatory for

women; as a home for cripples; and as a common spinning-room. Beyond the village, just at the village limits, stood the chapel of St. Isidore, the *ramada* or lodging-house for travelling Spaniards, and farther off the tile-kilns, mills, stamping-mills, tanneries, and other buildings devoted to industry. The villages mostly lay open; only the Reductions more exposed to the inroads of bands of savages, and the *estancias* or farms, and the cattle-corral were protected by moats, palisades, walls, or thorn hedges. To facilitate communication and traffic between the various villages, serviceable roads were laid out, often to great distances. Besides, the splendid network of rivers served as an excellent waterway, the mission operating no less than 2000 boats of various kinds on the Paraná alone and approximately as many on the Uruguay (Cunninghame Graham, "A Vanished Arcadia", London, 1901, 200) with its own wharves, as, e. g. at Yapeyu. The population varied widely in the different villages, ranging between 350 and 7000 souls.

B. *The Economic System of the Reductions.*—The plan of the Jesuits of forming, with rude tribes of nomads, a large commonwealth, separate from the Spanish colonies, and far in the interior of a country but little explored, placed before them the difficult problem of making the commonwealth economically independent and self-sustaining. If the Indians were obliged, day by day, to gather their means of sustenance in the forest and on the plain, they would never have been lifted out of their nomad life and would have remained half-heathens. The financial support

of the Crown consisted, for the first reductions, of a moderate appropriation out of the state treasury (*algún estipendio moderado*, Decr. Philip III, 20 Nov., 1611; see Monner-Sans, loc. cit., 49) and of bells and articles for use in the church, and later were reduced to a temporary tax exemption, and a small salary for the missionaries doing parish duty. In the eighteenth century this salary amounted to 300 pesos annually for the *cura* and his assistant (F. and A. Ulloa, "Voyage de l'Amérique mérid.", Amsterdam, 1752, I, 548). Consequently the natural resources of the fertile soil had to be exploited, and the Indians, lazy and careless by disposition, had to be trained to regular work.

(1) *Conditions of Property.*—The economic basis was a sort of communism, which, however, differed materially from the modern system which bears the same name, and was essentially theocratic. "The Jesuits", writes Gelpi y Ferro, "realized in their Christian commonwealth all that is good and nothing that is bad in the plans of modern Socialists and Communists" (Monner-Sans, loc. cit., 130; cf. "Stimmen aus Maria-Laach", loc. cit.). The land and all that stood upon it was the property of the community. The land was apportioned among the caciques, who allotted it to the families under them. Agricultural instruments and draught-cattle were loaned from the common supply. No one was permitted to sell his plot of land or his house, called *abamba*, i. e. "own

RUINS OF THE OLD CHURCH AT HUMAITÁ,
PARAGUAY

possession". The individual efforts of the Indians, owing to their indolence, soon proved to be inadequate, whereupon separate plots were set aside as common fields, called *Tupamba*, i. e. "God's property", which were cultivated by common labour, under the guidance of the Padres. The products of these fields were placed in the common store-house, and were used partly for the support of the poor, the sick, widows, orphans, Church Indians, etc., partly as seed for the next year, partly as reserve supply for unforeseen contingencies, and also as a medium of exchange for European goods and for taxes (see below). The yield of the private fields and of private effort became the absolute property of the Indians, and was credited to them individually in the common barter transactions, so that each received in exchange the goods he desired. Those *abamba* plots which gave a smaller yield because of faulty individual management were exchanged from time to time. The herds of live-stock were also common property. The *caballos del Santo*, which were used in processions on festal occasions, were especially reserved. Thus the Reduction Los Santos Apóstoles at one time owned 599 of these.

(2) *Products.*—The Indians themselves were content, for their needs, with the cultivation of maize, manioc, various indigenous tuberous plants and vegetables, and a little cotton. But the work conducted by the communities continued constantly to assume larger proportions, and surpassed by far the work of the Spanish colonies, both in regard to the variety of the products and to rational cultivation. Besides the common cereals (wheat and rice were grown

scarcely anywhere outside of the Reductions) and field produce, tobacco, indigo, sugar-cane, and above all, cotton were cultivated. Much care was devoted also to fruit culture, and that successfully. Even to-day one may find in the wilderness traces of former splendid orchards, particularly orange groves. Vine culture was attempted, but with only moderate success.

One of the most important products of the territory comprised by the Reductions was the so-called Paraguay tea (*herba*), which is still the largest article of export of the country. It consisted of dried leaves of the maté tree (*Ilex Paraguayensis*), crushed and slightly roasted, and drawn in boiling water; it was then, as it is now, the favourite beverage of the country, and almost entirely displaced the intoxicating drinks to which the Indians had been addicted to a deplorable extent. Because the *herba* forests (*herbales*) frequently lay hundreds of miles distant, and the Indians there employed must needs be deprived of regular pastoral care for too long a period, the Jesuits attempted to transplant the tree into the Reductions; their endeavours were successful here and there, but the jealous Spanish colonists used every means to frustrate their endeavours. The other abundant natural resources, choice sorts of wood, aromatic resins, honey bees, and the like were converted to useful purposes, and attempts were even made, on a small scale, to produce pig-iron. Cattle-raising attained a magnificent development, the entire country being rich in grass, and some *estancias* numbered as many as 30,000 sheep and more than 100,000 head of cattle, numbers which were not unusual in some of the Spanish *haciendas*. The herds were increased from time to time by the capture of wild cattle, and the breed improved by careful selection and breeding. Horses, mules, donkeys, and poultry were also raised on a large scale. In addition, hunting and fishing aided in providing support; these forms of sport were, however, restricted in the Guaraní Reduction for reasons of discipline. The individual Reductions devoted themselves more or less to one or the other branch of production, and supplied their wants by exchange with other Reductions. A written almanac of 1765, which the Salesian Fathers of Don Bosco discovered about 1890 at Asunción, contains on its parchment leaves, besides the calendar, an adviser for agriculturists, with particular reference to the climate of the country; the manuscript shows what knowledge and solicitude the apostolic missionaries devoted to agriculture ("Kath. Missionen", Freiburg, 1895, 259).

(3) Industries.—The vast needs of such an enormous establishment and the difficulties and expense of import necessitated the foundation of domestic industries. Thanks to the exceptional native gifts of the Guaraní, the abilities necessary for almost all the trades and crafts were soon developed in these people. Some were carpenters, joiners, wood-turners, builders; others blacksmiths, goldsmiths, armourers, bell-founders, masons, sculptors, stone-cutters, tile-makers, house-painters, painters and gilders, shoemakers, tailors, bookbinders, weavers, dyers, bakers, butchers, tanners, instrument-makers, organ-builders, copyists, calligraphers etc. Others again were employed in the powder-mills, tea-mills, corn-mills etc. Each man remained true to the craft once adopted, and provided for the transmission of his trade by teaching it to apprentices. The wonderful quality of the products of the workshops in the Reductions is shown by the beautiful cut-stone work of the churches. In some of the Reductions there were printing establishments, as for instance in Corpus, San Miguel, San Xavier, Loreto, Santa Maria la Mayor, where principally books of a liturgical and an ascetic nature were printed (Rodeles, "Imprentas de los antiguos Jesuitas en Europa, America y Filipinas",

in "Razón y Fé", XXV, 63-474, and XXVII, 349; Schuller, "Um Libro Americano unico o primeiro impresso nas Missões Guaraní S.J.", Para, 1910). It should be noted particularly that the remarkably high industrial development was not reached until after the end of the seventeenth century, when Jesuits from Germany and the Netherlands came to Paraguay in larger numbers (see Huonder, "Die deutschen Jesuiten-Missionare des 17. u. 18. Jahrh., Freiburg, 1899, 68). In 1726 a Spanish procurator of the missions admitted that "Artes plerasque [missionarii] erexerunt, sed eas omnes Germanis debent". Arts and the crafts were completely neglected in the Spanish colony at that time, the houses in Buenos Aires being built of clay and covered with rushes. A German lay brother of the Society of Jesus, Joh. Kraus, erected the first larger brick buildings (college and novitiate) in Buenos Aires and Córdoba; Brother Joseph Klausner of Munich introduced the first tin-foundry in the Province of Tucuman; while Indians from the Reductions, under the direction of the missionaries, built the fortifications and ramparts of Buenos Aires, Tobati, San Gabriel, Arecutagui, and other public works (Huonder, loc. cit.; Monner-Sans, 105 sq.).

(4) Distribution of Labour and Manner of Control.—The economic machinery of the Reductions could be kept in motion, and the Indians, naturally averse to work and thoughtless, brought up to systematic labour only by a well-regulated direction and control. Even the children were taught to work, and day by day some of them were occupied in the workshops and spinning-rooms under special overseers, while others were led out into the fields and plantations, to the joyous strains of music, following a statue of St. Isidore carried before them, and employed there for a few hours. The women were obliged, in addition to the performance of their household duties, to spin a certain amount weekly for the use of the community, to help during the sowing and harvesting of cotton etc. Men who followed no particular trade were obliged to work at least two days weekly at communal undertakings, in the fields, or at public buildings, etc. All had to work during harvest time. Relaxation and recreation were provided in the hours set aside for leisure, which were passed in arranging common games, military drills, horse races, and the like, by the many feast-days and the days set aside for hunting trips and other expeditions. Cards and dice, however, were strictly forbidden. The heads of each community were entrusted with the direction of their communities (see below). Besides, each branch of trade had its own superintendents and guild-masters, who constantly remained in touch with the missionaries, who watched over all and whose presence and authority formed the driving-wheel of the whole community. All officials were obliged to give exact account of their administration, and it is a matter of fact that the accounts and administration reports were in exemplary order, according to the testimony of the government inspectors. The superiors of the order also conducted an exact inspection every year. Labourers and such public employees as hospital attendants, sextons, and others were kept at public cost, and the private fields of draymen and ferrymen, shepherds and others, who were engaged in public service, were tilled by others for their benefit.

(5) Distribution of Rations.—Food and dress were the same for all, with some slight concessions in favour of the caciques and public officials. The produce of the private fields provided the secondary dishes for the daily table. Whatever was missing was provided out of the common store-house in equal measure. The principal article of diet of the Indians was meat, which they obtained from the common slaughter-houses at regular intervals. Ordinarily,

animals were slaughtered three times a week; in Yapeyu, with about 7000 inhabitants, about forty beeves were killed each day. In order to prevent the Indians, whose voracity was well known, from consuming their entire rations of meat in one day, they were induced to make *charqui* (meat dried in the sun and pulverized) of a portion of it. The sick were given special food prepared in the parsonage; the children received their morning and evening meal in common in the courtyard of the parsonage also. On high feast-days public banquets were held in common. The common store-houses also furnished additional provisions of a special nature for wedding feasts etc. Strong spirituous liquors were almost entirely replaced by maté in the Guaraní Reductions.

Twice a year each family received the necessary woven woollen and cotton goods, of which the women made clothing. In addition, each family could bring its private cotton crop to the parish mills. Only a coarse, plain cloth was woven. Goods of better quality, for the altar linens vestments, and garments of state had to be imported. The dress of the natives was plain but decent; the attire of the men consisted of short, loose breeches, a cotton shirt, and two woollen *ponchos*, one for every-day wear, the other for holidays; the women wore long, loose, shirt-like gowns, with many folds. Ordinarily all went barefoot. The official garments and uniforms for festive occasions, neat and made of fine, coloured materials, were kept in separate chests in the "college", as also the banners, theatrical costumes, insignia etc.

C. Commerce and Wealth of the Jesuits.—The accusation that the Jesuits acquired immense wealth in the Reductions is a fable, spread broadcast by their enemies and those jealous of their success, but long since disproved. "I dare to maintain", the Bishop of Buenos Aires, Dom Pedro Taxardo, wrote to Philip V of Spain in 1721, "that if the Jesuits were less virtuous, they would have fewer enemies. I have visited their missions frequently, and I can assure Your Majesty, that I have nowhere found greater order and more perfect unselfishness than among these religious, who take nothing that belongs to their converts, whether it be for their own attire or for their sustenance" (Charlevoix, loc. cit., II, 94). The fact is that the Fathers bore the expense of their own sustenance, as far as possible out of the salary appropriated by the king for them (about 250 pesos), although it was smaller than the salary of the other priests, both secular and religious (600 pesos). In compensation for the provisions taken by the Fathers from the common stores, such as fish, milk, eggs, vegetables, the procurator sent each missionary a supply of salt, soap, knives, shears, glass beads, fish-hooks, pins, medals, and the like for distribution among the Indians, who were very fond of these things (Cardiel, loc. cit., 264 sq.). Southey, himself a Protestant, published as the result of his investigation covering this question, that nothing can be more certain, than that the Jesuits have not amassed any treasures in Paraguay (Hist. of Brazil, III, 508; Duhr, "Jesuitenfabeln", Freiburg, 1904,

621 sq.; Monner-Sans, loc. cit., 90 sq.; Cardiel, loc. cit., "Lettres édifiantes et curieuses", Lyons, 1819, V, 371 sq.; Cunninghame Graham, op. cit., 193 etc.). The myth concerning their vast trade transactions must be classed with that of the gold mines in the Reductions, which never existed, notwithstanding the fact that hatred and envy have so persistently clung to this assertion, that the Government was forced more than once to institute investigations. Thus an investigation was conducted in 1640 by Don André de León Gacavita, and another, still more searching, in 1657 by Don J. Blasquez Valverde. In both cases the inquiries led to a clear demonstration of the untruth of the accusations, and to the severe punishment of the accusers (see Charlevoix, "Hist. du Parag.", Paris, 1757, III, 381; Cardiel, op. cit., 163; Lettres édifiantes, loc. cit.). The gold mines have never been found, even after the expulsion of the Jesuits. The estimates that have been made of the alleged vast income and trade profit are founded upon purely arbitrary or false suppositions. The vast herds of cattle, for example, were not representative of wealth, because of the great numbers of ownerless cattle in which the land abounded, the price of a healthy steer in consequence being half a peso in Dobrizhoffer's time, while later the price rose to one and two pesos in consequence of the reckless destruction of these animals by the Spaniards. The single carved high altar in the Church

PLAN OF THE REDUCTION CANDELARIA

of San Borja was valued at the price of 30,000 steers.

In addition, the expense of keeping up such a vast community should be borne in mind (cf. the cost of keeping up the Indian Reservations in the United States, which necessitated an expense of about \$10,000,000 in 1882, and from 1867–1882 no less than \$92,213,731); the high prices of the new products and iron goods that had to be imported (a Spanish hundredweight, about 102 lb., of iron from Buenos Aires cost 16 *aurei*, 1 ell of linen cloth 4 old rix-dollars, and even more, a fine lace alb about 120 rix-dollars); the tribute to the crown, which according to Bauke (ed. Kobler, p. 490), amounted to 24,000 pesos; the building and decorating of the numerous churches far in the interior; the equipment of Indian auxiliary troops in the service of the king (see below); all of which, taken together, alone required the expenditure of almost the entire income. As a matter of fact, the entire commerce was confined to the exchange, justified by canon law, of such products as cotton, tobacco, hides, various kinds of timber, horse-hair, honey, and in particular of the highly-prized mission *herba*, for goods which the Reductions themselves either could not produce or at least not in sufficient quantities, such as fine cloths, silks, linen for vestments and altar use, instruments, iron and glassware, books, paper, salt, wine, vinegar, dyes, and the like. The trade by barter netted an average annual income of 100,000 pesos, according to the report of the royal investigating commission (see Charlevoix, op. cit., 361), or 7 reals *per capita* of the population. One instance may illustrate how arbitrarily the calumniators of the Jesuits juggle with figures. De Pauw ("Recherches philos. sur les Américains", Berlin, 1768–

69, II, 411) asserts that the Jesuits sold 4,000,000 pounds of *herba* annually, while the amount officially certified is only about 6000 *arrobas* (150,000 lbs.); he also places the number of Indians employed in its cultivation and production at 300,000, or twice the total number of men, women, and children living at any one time in all the Reductions.

How purely imaginary the wealth of the Jesuits had been was proved by the inventories taken of their houses and colleges at the time of their expulsion in 1767. These buildings were seized suddenly, without previous warning, so that the Jesuits might not be able to conceal anything. But the only treasures found were the precious church articles. Only a trifling amount of money was found. The college that was most prominent, that of Córdoba, was barely self-supporting, according to the documents ("Era con escasa diferencia igual a los gastos"; see Cardiel, *op. cit.*, 131 sq.; Funes, "Ensayo de la Historia Civil de Paraguay, Buenos Aires y Tucuman", Buenos Aires, 1816, III, l. 5, c. ix). "The Jesuits", writes Cunninghame Graham (*op. cit.*, 204), "strange as it may appear, did not conduct the missions after the fashion of a business concern, but rather as the rulers of some Utopia—those foolish beings who think happiness is preferable to wealth."

D. *Form of Government*.—The local administration of the Reductions was arranged according to the provisions of the *lex indica*, after the Spanish pattern, and was composed of the *corregidor* or burgomaster (in the Guaraní language *poro quaitara*, i. e. one who gives commands); the *teniente*, or deputy; three *alcaldes*, i. e. bailiffs or inspectors, two for the work in the town and one (*alcalde de la hermandad*) for the work in the rural districts; four *regidores* or councilmen (Guaraní *icabildo iguata*, i. e. one belonging to the council); one *alguazil mayor*, a sort of prefect of police (Guaraní *ibirararuzu*, i. e. "the chief of those who carry the stick"); one *procurador* or steward, and one *escribano* or writer (Guaraní *quaitaapobara*, i. e. "one who draws or writes"). Besides these there were the *alferez real* or standard-bearer (Guaraní, *aobebe rerequara*, i. e. "he to whom the care of the banner is entrusted", and a number of subaltern officials and assistants. The annual election took place at the end of December. The list of new candidates was drawn up by the retiring officials and submitted to the *cura* for approval, who had the *jus indicum* of challenging the nominations. On the first of January the installation of the new officials and the investiture with the insignia of office took place in very solemn fashion at the entrance to the church. Besides their insignia the public officials had a place of honour in the church. Their final confirmation was obtained in each instance from the Spanish governor. On 1 January also the sextons, superintendents of works, the boys' directors, and others were elected. Each day after Mass the *corregidor* gave the *cura* a report of all current affairs and received from him the necessary directions, which he transmitted to those concerned. It should be noted that the old hereditary caciqueship, and also the hereditary Indian nobility retained their rights and were honoured in the Reductions, and, it appears, were especially considered in the allotment of higher offices and military charges. The plan of Philip V to make the five hundred caciques of the Guaraní Reductions Knights of Santiago was not carried out, owing to the fact that the caciques attached no value to such a distinction.

E. *Military Power*.—The organization for armed self-defence against the frequent inroads of hordes of savages and of the Portuguese neighbours was not only permitted by repeated royal decrees, but was carried out in accordance with the declared wishes of the king (see Monner-Sans, *op. cit.*, 99; Cardiel,

op. cit., 238; Charlevoix, *op. cit.*, VI, 366). In conformity with these decrees arsenals were erected in all the Reductions, in which weapons of the best quality, principally fire-arms, were stored, together with ammunition. The king repeatedly sent new supplies of arms, among them some 800 guns, about 1730. Later gunpowder was produced in the Reductions themselves. Each Reduction was divided into eight companies, with a *maestro de campo*, generally a *cacique*, a *sergente mayor*, eight *capitanes*, and other officers at their head. Regularly arranged military exercises and armed drills, together with sham battles, preserved and increased the military efficiency of the people. The governors repeatedly sent Spanish officers into the Reductions, to instruct the Indians in the use of fire-arms. The main strength of the Reductions, however, lay in their cavalry. This force had already proved itself very efficient in the defence against the Paulistas; from 1641 onwards it was called into service by the governors almost year after year to help in the wars with the savage tribes, with the Portuguese, the English who threatened Buenos Aires, and, last but not least, rebellious colonists and *encomienda* Indians, and rendered splendid service. Time and again kings and governors expressed their sincerest gratitude for these services, which were all the more valuable because they cost the Crown nothing. The Reduction Indians between 1637 and 1735 entered the field no less than fifty times for the cause of the king, repeatedly with a large force and under considerable sacrifice of time, money, and life (see among others Sans, *op. cit.*, 105; Lettres édif., *op. cit.*, 401 etc.).

F. *Church and Religious Life*.—The Reductions of Paraguay are justly called a model of a theocratic commonwealth. Religion ruled the entire public and private life. The entire community attended Holy Mass and the evening devotions daily. Prayer and religious songs accompanied and encompassed work and recreation alike. Religious instruction was given daily for the children, on several days each week for catechumens, and every Sunday for the entire parish. Through the medium of easily sung catechismal hymns the doctrines and the principal events of the life of Christ and those of the saints were impressed upon the minds of the people. A sort of religious handbook bearing the title "*Ara poru aguiey haba yacoo ymomoeinda*" (On the Proper Use of Time), written by P. Jos. de Insaualde (b. at Asunción; d. 1730), printed at Madrid in 1759–60, in two volumes, and which was very popular, gave directions concerning the performance of various acts at home and in church in a holy and meritorious manner.

Public religious life in the splendid churches found its expression in an exceedingly brilliant manner, particularly on feast-days. Church music was carefully cultivated, especially under the direction of Italian and German Fathers, and its production would have been, according to the testimony of Don Franc. Xarque (Gay, *op. cit.*, 214), a credit to any Spanish cathedral. In consequence, the church choirs of the Reductions were frequently invited to the Spanish cities. The reports of the celebration of the Feast of Corpus Christi, the patronal feasts, the Rogation and penitential processions, the devotion to the saints, particularly to the Blessed Virgin, the representations of the Crib and the Passion, mystery-plays, sacramental dances, etc. convey a charming picture of the religious life in the Reductions. Religious societies also, especially the Sodalties of the Blessed Virgin, attained to a remarkable growth (see "Sodalen-Correspondenz", II, 125). The reception of the sacraments, after the Reductions had become firmly grounded, and a solid body of older Christians had been obtained, was, according to the annual reports, and

in accordance with ecclesiastical practice of the times, very good. The members of the religious societies received Communion monthly, many of them weekly. The early marriages (boys were obliged to marry at 17, girls at 15), strict discipline, and surveillance fostered chastity among the natives, which aided the natural increase of the race, ordinarily not very fruitful (the average number of children in each family was four). Careful control and strict segregation of all objectionable elements did the rest. "Such innocence prevails among these people", Bishop Faxardo wrote, 20 May, 1720, from Buenos Aires to Philip V, "who are composed exclusively of Indians naturally inclined to all kinds of vices, that I believe no mortal sin is ever committed there, the vigilance of the shepherds foreseeing and preventing even the slightest fault" (Charlevoix, loc. cit., III, 94). A number of authentic testimonials of bishops and royal visiting inspectors speak with the greatest admiration of the religious zeal, the devotion, purity of morals, Christian brotherly love, and conscientiousness of the Indians, as well as the unshirking devotion and the edifying lives of the priests (see Charlevoix, loc. cit., *Pièces justificatives*; "Lettres édif.", loc. cit., 401; Cardiel, loc. cit., 118).

G. *Schools and Education.*—Each Reduction had, at least during the later period, an elementary school with Indian teachers educated by the Fathers; there at least the boys, above all the sons of the caciques and the more prominent Indians, from whose ranks the heads of the villages and other officials were mostly taken, could learn reading, writing, and arithmetic. In this respect also the Reductions were

book "Die Sprachkunde und die Missionen" (Freiburg, 1891), 79.

H. *Discipline and Penal Regulations.*—The Indians were like children; it was necessary to accustom them to Christian morals and love of work by mildness linked with severity. The daily routine, marked by the ringing of the bell, the strict segregation of the sexes in public community life demanded by the *jus indicum*, together with a prudent system of surveillance demanded by the commingling of older Christians, neophytes, and the new arrivals constantly coming in from the wilderness, helped to achieve this result. Another precaution was the

segregation, as far as possible, of the Indians from the Spaniards, and from the *encomienda* Indians, who were mostly of questionable moral character, a measure which Ulloa (loc. cit., 549), referring to the sad experience in Peru, considers entirely appropriate, and the observance of which the missionaries of the Gran Chaco even to-day deem necessary (see "Kathol. Missionen", 1909-10, 135 and 157). Regarding the penal discipline; even Azara, who is so averse to the Jesuits, admits "that they exercised their authority with a mildness and moderation [*suavidad y moderación*] which one must admire" ("Descripción é Hist. del Paraguay", 2 vols., Madrid, 1847, c. ciii, n. 16; Ulloa, loc. cit., I, 544). Minor offences, such as laziness, public disturbances etc., were punished by sentences of fasting or a few blows with a whip, transgressions of a more serious character by arrest and confinement in jail on small rations. Refractory women were confined for a time in the *cotiguazu*, or house for the women. To prevent abuse of authority on the part of the Indian officials, they were not permitted to inflict punishment of any kind without having previously reported the case in question to the Fathers. Capital punishment was never inflicted. Crimes deserving capital punishment, which occurred but very rarely, were

punished by expulsion from the Reduction and surrender of the perpetrator to the Spanish authorities. The fact that these tribes, so enamoured of liberty, did not undertake a single uprising against the missionaries, while on the other hand revolts among the *encomienda* Indians were very frequent, and the additional circumstance that two or three Fathers were sufficient to keep a population of 1000 to 2000

PORTAL
Reduction S. Borja

in advance of the Spanish colony. Even Bucareli, who later carried out the decree of expulsion in such relentless fashion, acknowledged the work of the Reduction schools (Brabo, loc. cit., 222; cf. Cardiel, loc. cit., 284; Peramas, loc. cit., 37). Boys who were especially gifted also received instruction in Latin sufficient to enable them to perform sexton's duties and to read at table in the "college". The schools for singing and music were conducted very successfully, so that each Reduction had a capable church choir and orchestra.

The accusation that the Jesuits studiously prevented the Indians from learning Spanish, in order to preserve their secrets the more securely and to prevent intercourse with the colonists, is untrue, as Bucareli attests, and is, besides, altogether absurd, since the Guaraní language, then as now, was the common language of the Spaniards also. The women knew no Spanish (see Stein-Wappæus, "Handb. de Allg. Geogr. und Statist.", 7th ed., Leipzig, 1858, I, 3, 1160; also Regger and Longchamps, "Essai hist. sur la révol. du Parag.", Pau, 1827, 266). The fathers surely sought to introduce the Spanish language in their own interest, although it was very difficult for the Indians to learn and very unpopular with them; still they followed the *jus indicum* (Tit. I, c. vi, leg. 18) which did not oblige the natives to learn Spanish. What the Jesuits have done for the science of languages in Paraguay has been collated and briefly dealt with by J. Dahlmann, S.J., in his

souls in order and discipline, surely speaks very strongly in favour of the system and proves the untruth of the accusation of Jesuit despotism.

J. *The Care of the Sick* was well organized in all the Reductions (Peramas, loc. cit., 110; Cardiel, 248). In each village there were four to eight nurses, well-instructed in the use of medicines, and devoted absolutely to their profession; they were called *curuzuya*, or cross-bearers, from the shape of their staffs which terminated in a cross at the top. They made a round of the village each day, and were obliged to give the Fathers an exact report of the condition of the sick, so that as a consequence scarcely an Indian died without the last sacraments. The remedies principally used were the indigenous medicinal herbs. In addition, each "college" had a pharmacy. Some Fathers and Brothers who possessed a knowledge of medicine compiled special medicinal handbooks for use in the Reductions. Several German Fathers and a few lay-brothers, the latter having been apothecaries before entering the order, deserved particularly well of the Reductions in this respect; pre-eminent in this regard was the Tyrolese Father Sigismund Aperger (Huonder, "Die deutschen Jesuiten-missionäre", p. 80). Usually a healthy race, the Guaraní showed absolutely no power of resistance to certain contagious diseases, such as measles and smallpox. Repeated severe epidemics of these diseases, such as occurred in 1618, 1619, 1635, 1636, 1692, 1718, 1733, 1739, and 1764, decimated the population of the Reductions in a frightful manner. Thus in the one year 1735 measles brought death to 18,773 persons, and in 1737 smallpox claimed more than 30,000 victims. In 1733 12,933 children died of smallpox. Were it not for these epidemics, the population of the Guaraní missions would have been twice or three times as large (Peramas, loc. cit.). These epidemics demanded heroic efforts on the part of the Fathers.

K. *Relations between the Reductions and the Spanish Government*.—Nothing can be more absurd than the myth of the "independent Jesuit State of Paraguay", mendaciously constructed by Ibañez and other writers. The entire foundation and development of the Reductions took place with the consent of the Spanish kings and on the strength of the royal decrees and privileges, which were summarized, confirmed and enlarged in the famous decree of Philip V of 28 Dec., 1743 (Charlevoix, loc. cit., VI, 331). As late as 1774 the Hieronymite P. Cevallos could truly maintain that all that the Jesuits had done in Paraguay "era todo probado por reales cédulas ó procedia de ordenes expresas" (Cunninghame Graham, loc. cit., 192). The territory covered by the Reductions was under the direct jurisdiction of the crown, in such a manner, however, that part of the sovereign rights were exercised by the governor in the name of the king (from 1736 onwards all the Reductions were under the authority of the Governor of Buenos Aires). All royal commands and decrees were announced and executed in the Reductions also, unless the latter were expressly excepted. The governors confirmed the new officials in the Reductions after the annual elections, as also the newly appointed *curas* belonging to the Society of Jesus; they made regular official visits to the Reductions, and sent reports to the king regarding their visitations. The Reductions were ready for war at the call of the governors, and the latter could always depend absolutely upon their loyalty, a fact which they acknowledged frequently and in glowing terms in their reports to the king (Charlevoix, loc. cit., and "Pièces justificatives"). Further, the Reductions paid the taxes imposed and tithes laid upon them, faithfully and punctually, and moulded their conduct in accordance with all the laws of the Spanish crown, inasmuch as they were not suspended or modified in their application to that territory by special royal privileges (Decr. Phil. V.,

art. 5, in Charlevoix, loc. cit.). Controversies with the governors arising in consequence of unjust encroachment were always adjusted through the royal audiencia in Charcas, by royal inspectors or by investigating committees, especially named and appointed by the king himself.

Loyalty to the king and enthusiasm for his cause and person were instilled deeply by the fathers in the hearts of the Reduction Indians, Philip V himself declaring in his famous decree of 28 Dec., 1743 (Charlevoix, loc. cit., 379) that in his entire colonial possessions in America he had no more faithful subjects. On all patronal feasts the royal standard was borne to the church with great ceremony, and the *alferez real*, who carried it, received with regal honours at the church door. Thereupon the banner was planted on the *plaza*, with a picture of the king, and the entire militia with their officers renewed their oath of homage before it in a solemn manner amid shouts of: "*Mburu bicha guazu: toi cobengatu ñande Rey marangatu: toi cobengatu ñande Rey N.*" (Long live our King, the great Cacique! Long live our good King; long live our King N.). The Reduction Indians took pride in calling themselves "Soldiers of the King" (Cardiel, loc. cit., 239). How they risked and sacrificed life and property on many occasions, under the leadership of the Fathers, for the cause of the crown, has been told already. The loyalty of these Indians to the king is characterized by their conduct during the time of the Antequera disorders, and the so-called *Comuneros* revolt, that troublesome period (1721–1735) which comprised the first attempt, on a large scale, of the colony to secede from Spain. The usurper Antequera as well as the *Comuneros* vented their rage first and above all on the Jesuits and the Reduction Indians, who proved themselves the strongest bulwark of the Spanish rule (Lozano, "Historia de las Revol. de la Prov. del Paraguay", 1721–35, 2 vols., Buenos Aires, 1905). Their destruction was consequently soon followed by the revolution and secession from Spain.

L. *Exclusion of the Spaniards from the Territory of the Reductions*.—The isolation of the Indians and the exclusion of the Spaniards from the territory of the Reductions, prompted by reasons of principle and strictly enforced, have given the opponents of the Jesuits ample material for sinister insinuations. These measures, however, were sanctioned by royal decrees and were necessary for the attainment of the purpose of the mission. "Nothing can justify this procedure better," writes Ulloa (loc. cit., I, 550), "than the sad example of the decline of the *doctrinas* in Peru." It is surely a significant fact that even Governor Bucareli after the expulsion of the Jesuits strongly urged the continuance of this system of isolation in the interest of the Indians in his instructions to his successor, written in 1768 (Brabo, loc. cit., 320). Moreover, officials of the crown always had free access to the Reductions, and where no danger was to be feared, friendly relations were maintained with the neighbouring Spanish colonists, and the latter were frequently invited to festivities, asked to act as sponsors in baptism etc. Further, the villages nearest to Asunción: Santa Maria, San Ignacio Guazu, Santa Rosa, Santiago, San Cosme, and Itapua were at the king's request opened on certain days of each month to Spanish merchants for the purpose of selling their goods. A number of trustworthy Spaniards in the service of the missions lived in the Reductions, and each Reduction had a separate lodging-house for travelling strangers (Cardiel, 213; Peramas, 93).

M. *Relations of the Reductions to Ecclesiastical Authorities*.—A portion of the Guaraní Reductions was under the jurisdiction of the Bishop of Asunción (erected 1547), another under the authority of the Bishop of Buenos Aires (1582), while the Reductions of the Chiquitos belonged to the Diocese of Santa

Cruz de la Sierra (1605), and the colleges and missions of Tucuman to the See of Córdoba (1570). The jurisdiction of the bishops was limited only by the exemptions of the Society of Jesus, which it held in common with the other orders and which were clearly determined by papal bulls. For the rest, the bishops exercised their episcopal authority and functions freely in the territory of the Reductions, confirmed

ECCLESIASTICAL CHAIR FROM
S. TRINIDAD

the *curas* proposed by the superiors of the order, drew their tithes, performed their pastoral and confirmation visits regularly (Cardiel, loc. cit., 213) and sent reports to the king and to Rome (cf. the brilliant testimony cited by Charlevoix, loc. cit., IV, 329; Hernandez, "El Extrañamiento", 188; Lozano, "Hist. de las

Revoluciones", I, 80, 102, 227 and passim). The visits to the distant Reductions being attended by great difficulties, the bishops conferred extensive rights and powers upon the superiors of the missions (Cardiel, loc. cit., 258); the relations between the Jesuits and the bishops, although the latter mostly belonged to other orders, were very good throughout.

One single exception is found in the case of the Bishop of Asuncion, D. Bernardino de Cardenas, O.S.F. (1642-49), whose actions brought confusion upon the entire country, and whose antipathy to the Jesuits threatened to ruin the Reductions. In 1649 he was removed to Santa Cruz de la Sierra, and later became sincerely reconciled to the Jesuits. The Cardenas affair was eagerly taken advantage of by the anti-Jesuit party, particularly under Pombal. The "Coleccion general de documentos ineditos tocantes á la persecucion que los regulares de la Compañia suscitaron y siguieron tenazmente . . . desde 1644 hasta 1660 contra el Illmo—y Rmo—Sr. Fr. D. Bernardino de Cardenas", Madrid, 1708, 2 vols., which was written about that time, is misleading throughout and unhistorical. There can be no doubt on which side right and wrong were, the representation of Marcellino da Civezza (loc. cit.) to the contrary notwithstanding. (See Charlevoix, loc. cit., II, 438; III, 19, and the "Pièces justif."; Southey, loc. cit., II, 381; Cunninghame Graham, loc. cit., 102.) From 1654 onwards the name Reductions was officially altered to *Doctrinas* and the mission stations treated as parishes, a procedure which, in missionary lands, was by no means contrary to the rules of the order, as the apostate Ibañez maintains. Each parish had a *cura* (pastor) and a *vicario*, in larger towns several. The entire territory of the Reductions was under the authority of a superior, who resided at Candelaria and had, in order to lighten his burden, a vice-superior in the Paraná and one in the Uruguay territory. The *Doctrinas* together formed a *collegium*, according to the rule of the order; the *superior missionis* acted as rector and as representative of the mission in relation to the ecclesiastical and secular authorities. He was surrounded by a council of eight consultors, chosen from among the oldest and most experienced fathers. Every three or four years the territory of the Reductions was visited once or twice by the Provincial of Paraguay. The discipline of the order was strictly enforced, and the good religious spirit of the members is confirmed by the official testimony of the bishops, governors, and royal inspectors (Cardiel, loc. cit., 247; Ulloa, loc. cit., I, 447). A document written in Guaraní, which was found during the forcible occupation of San Lorenzo (May, 1756).

and in which the Indian Neenguiru describes the life and activity of the fathers, is touchingly beautiful (Archiv. Simancas. Est. legajo 7, 450 fol. 21 and 22).

N. *How the System has been Judged.*—The singular nature of the Reductions has roused the interest and admiration of numerous thinkers, philosophers, historians, economists, and explorers to an exceptional degree. Men of the most divergent callings and denominations, such as Buffon, Montesquieu, Châteaubriand, A. von Haller, Joh. von Müller, Macaulay, Dallas, Robertson, Wappæus, Southey, Cunninghame Graham, Bluntschli, Joh. Rein, Pöpping, von Martius, Ungewitter, and many others have expressed their warmest appreciation. These opinions, in conjunction with the brilliant testimonials of the Spanish kings, of governors, inspectors, bishops and others should be sufficiently weighty to characterize as lies and slanderous accusations the spiteful attacks of professed enemies of the Church and the Jesuits (see bibliography below). It is to be regretted that prejudice against the Jesuit Order still spreads these lies of history. The Reduction system undoubtedly had its weak points and imperfections; they may be advanced against the system, but this should be done in a manner consistent with objective historical research. It is certainly inconsistent to bestow immoderate praise upon the system of the Incas, and at the same time to find fault with the Reduction system, which adopted and Christianized all the good features of that system (Monner-Sans, loc. cit., 51). An objection frequently advanced against the Reductions, even by well-meaning writers, was that the Reduction system did not educate the Indians up to autonomy but allowed them to remain in a state of tutelage. This policy, they maintain, explains the decline of the Reductions after the expulsion of the Jesuits. In answer it may be briefly stated that:—

(a) The work of the Jesuits was destroyed before it had reached its highest development.

(b) As a matter of fact, the Jesuits used every effort to educate the Indians up to autonomy (for proof see Cardiel, loc. cit., 286). Their efforts were frustrated by the deep-rooted indolence of the race. Proof of this is found in the fact that the Indians who left the Reductions and emigrated to the Spanish colonies failed to rise to independent positions, even among the most favourable conditions (ibid., p. 286, n. 110).

(c) The Reduction system must not be measured by European standards but according to the conditions prevailing at the time in Spanish colonies. "That it was not only suitable, but perhaps the best that under all the circumstances could have been devised for Indian tribes two hundred years ago, and then just emerged from semi-nomadism, is, I think, clear, when one re-

PORTAL OF THE CHURCH OF THE REDUCTION OF SAN BORJA

members in what a state of misery and despair the Indians of the *encomiendas* and the *mitas* passed their lives" (Cunninghame Graham, loc. cit., 211).

(d) The system employed was, in fact, the only means adopted to save the Indians. "Whatever one may say of the Jesuit Missions," Dr. K. Haebler writes (*"Jahrbuch d. Geschichtswissenschaft"*; 1895, III, 49), "they absolutely merit the praise that theirs were the only settlements in which the Indians did not die out, but rather increased in number." Of the 80,000 Indians living in the Province of Santiago del Estero in the seventeenth century, only 80 remained about 1750; of 40,000 in the Córdoba territory only 40 (see Cardiel, loc. cit., 449).

(e) To what extent the self-reliance of the Reduc-

taneously furthered the interests of Portugal and his hatred of the Society of Jesus. The treaty, secretly entered upon in Madrid on 15 Jan., 1750, contained among its provisions the agreement that Spain retain the long-contested colony San Sacramento at the mouth of the Uruguay, and transfer to Portugal, in exchange, the seven Reductions lying on the left bank of the Uruguay, i. e. about two-thirds of the present Brazilian province of Rio Grande do Sul and one of the most valuable sections of the territory of La Plata. The treaty further provided (art. 16) that the missionaries and their thirty thousand Indians leave their home, founded during a hundred and fifty years of patient toil, with bag and baggage and without delay, and settle on the opposite bank of the Uruguay. This

BUILDING DETAILS OF THE CHURCHES OF THE REDUCTIONS. SIDE PORTAL OF THE CHURCH OF S. BORJA; WOODEN COLUMN OF THE GALLERY OF S. BORJA; HOLY WATER STOUP OF S. LORENZO

tion Indians and their appreciation of the unencumbered right of property was actually developed under Jesuit training was proved by their conduct during the war of the seven Reductions (see below), which, as is well known, was occasioned by the refusal of the Indians to surrender their land to the Portuguese, and by the fact that, for the first time in this matter, they rebelled even against the will of the Fathers. The dissolution of the Reductions after the departure of the Jesuits was not the result of their system, but of that which succeeded it.

IV. DECLINE OF THE REDUCTIONS.—The tragic decline of the Reductions is but an episode in the war against the Jesuit Order, which was begun about the middle of the eighteenth century, of which the trio of free-thinking ministers of France, Portugal, and Spain viz. Choiseul, Pombal, and Aranda, were the principal leaders, and which ended with the dissolution of the order in 1773. The principal factors can be enumerated only briefly here.

A. *The Treaty of 1750.*—The difficulties existing between Spain and Portugal because of the boundaries of their American possessions supplied the all-powerful Minister of State, Pombal, the mortal enemy of the Jesuits, with the longed-for opportunity of perfecting a clever diplomatic *coup*, and which simul-

change of location was, even from the viewpoint of colonial policy and political economy (see opinions regarding it by Bonnet de Mably and Manuel de la Sola, in Stein-Wappæus, loc. cit., I, 3, 1012, and Monner-Sans, loc. cit., 147) an incomprehensible miscarriage of justice towards the missionaries and the Indians alike, whose wishes had not been consulted in any manner; it was "one of the most tyrannical commands that was ever issued in the recklessness of unfeeling power" (Southey, loc. cit., III, 449). Southey correctly adds that the weak Ferdinand VI had no idea of the importance of the treaty.

B. *The War of the Seven Reductions.*—The treaty caused surprise and indignation in the Spanish colony of La Plata. The Viceroy of Peru, the royal Audiencia of Charcas, and the secular and ecclesiastical authorities unanimously sent protests of the most emphatic nature to the Spanish Cabinet. They were as unsuccessful as the earnest petitions of the Jesuits, who declared that it was impossible to approach the Indians with the cruel demand to give up their home and their possessions, solemnly granted them by so many royal decrees, and to surrender them without any cause or provocation to their enemies and oppressors, the Portuguese. It was all of no avail. Ignazio Visconti, the General of the Society, over-compliant

to the wishes of the king, issued a strict command to the members of the order to yield to the inevitable and to prevail upon the exiled Indians to submit, a task which they performed, at first indeed without success. In begging earnestly for a respite and in making every effort to have the cruel measure revoked they merely performed their duty; to present their conduct as insubordination, as has been done, is unjust. Their position was infinitely aggravated by the imprudent and domineering behaviour of the Spanish and Portuguese plenipotentiaries, and especially by the impassioned attitude of the commissary of the order, P. Luis Altamirano, S.J., who was appointed by the general and the king, and who treated as rebels his own brethren, who advised him to proceed with care and moderation. In spite of all the appeals of the Fathers, the Indians, goaded beyond bearing, rose in arms, but having no leader and lacking unity, were defeated in battle in Feb., 1756. Those who did not submit fled into the forests, where some of them carried on an unsuccessful guerilla warfare. The greater part of the Indians, following the advice of the Fathers, emigrated and settled in the Reductions on the Rivers Paraná and Uruguay (right bank). In 1762 there were still 2497 families, numbering 11,084 souls, scattered there in 17 Reductions; 3052 families, numbering 14,018 souls, had returned to their old home in 1761. For in that year Spain had cancelled the unfortunate treaty of 1750, acknowledging thereby the mistake that had been made. This War of the Seven Reductions was made to serve as one of the principal points of accusation advanced by the enemies of the Jesuits. A flood of defamatory pamphlets, falsified documents, and ridiculous fables, as, for instance, the tale of a king, Nicholas I of Paraguay, went out from an unscrupulous press which Pombal controlled, and was spread broadcast over Europe by the anti-Jesuit faction. Although their absolutely unhistoric character has long been clearly proven, these publications continue even now to vitiate the historical presentation of this period.

The rest is known. On 2 April, 1767, Charles III of Spain, weak and duped, signed the edict which decreed the exile of the Jesuits from the Spanish possessions in America (cf. P. Hernandez, "El extrañamiento de los Jesuites del Rio de La Plata y de les Mis. del Parag.", Madrid, 1908; J. Nonell, "El V. P. José Pignatelli y la Comp. de Jesus en su extincion y restabl.", 3 vols., Manresa, 1893-94; Carayon, "Docum. inédit Charles III et les Jesuites de ces états d'Amérique en 1767", doc. P, Paris, 1867-68). It was the death-warrant of the Reductions of Paraguay. The expulsion was carried out by force by the Governor of La Plata, Marquess of Bucareli, in the most brutal manner ("Die Tagebuchblätter des P. Jos. Peramas" in "Kathol. Missionen", 1899-1900, 8 sq.). "The Jesuits in Paraguay, at least, by their conduct in their last public act, most amply vindicated their loyalty to the Spanish crown. . . . Nothing would have been easier, depleted as the viceroyalty was at the time of troops, than to have defied the forces which Bucareli had at his disposal and to have set up a Jesuit State, which would have taxed the utmost resources of the Spanish crown to overcome" . . . [but] "they made no fight, nor offered any resistance, allowing themselves to be taken as the sheep is seized by the butcher" (Cunninghame Graham, loc. cit., 267). The Jesuit Province of Paraguay numbered at that time 564 members, 12 colleges, 1 university, 1 novitiate, 3 houses for conducting retreats, 2 residences, 57 Reductions, and 113,716 Christian Indians. The leaving-taking from the Indians was heart-rending. In vain they pleaded in the most fervent manner to be allowed to keep their Fathers or to be assured that they would return (Hernandez, loc. cit., 364 sq.). They never returned.

V. THE REDUCTIONS AFTER THE EXPULSION OF THE JESUITS.—The first fruits of the expulsion was the keenest disappointment. Except the splendid decorations of the churches, of which entire wagon-loads were carried away, none of the hoped-for treasures were found. The spiritual administration of the Reductions was transferred to the Franciscans and others, the public administration to Spanish civil officials. Attempts were made to retain most of the institutions introduced by the Jesuits, which had previously been so severely censured—a fact which sheds a characteristic light upon them—but the rapid decline of the Reductions (in 1772 the Guaraní Reduction numbered 80,881 souls; in 1796 only 45,000; soon after there were only a few remnants left) showed that their vitality had been destroyed (see testimony of the Franciscan Provincial Fray José Blas de Aguirra, of the Governor D. Lazaro de Ribera and others, in Monner-Sans, loc. cit., 192 sq.). The beautiful churches fell to pieces; the magnificent economic institutions stood forsaken. Terrific uprisings, the revolution, and its accompanying battles, and finally the despotic rule of the first republican presidents, Francia and Lopez, destroyed in less than fifty years what the spirit of Christian sacrifice had laboriously built up during a period of one hundred and fifty years. To-day only beautiful ruins mark the place where once this great Christian commonwealth stood. But "the memory of the missionaries still continues to live in blessing among the Indians, who talk of the rule of the Padres as of their Golden Age" (Stein-Wappæus, loc. cit., 1013; Cunninghame Graham, loc. cit., 211). "The fact is", says the famous German traveller and ethnographer, Dr. Karl von der Steinen, "that the expulsion of the Jesuits was a severe blow for the native inhabitants of La Plata and the Amazon territories, from which it has never recovered" ("Halbmonatsch. der deutschen Rundschau", no. 1, 1892, 45).

Nudsdorfers* (Frankfort and Leipzig, 1768); *Efemerides de la Guerra de los Guaranís* . . . *Diario escrito por el P. Tadeo Hennis* (Madrid, 1770), ed. IBAÑEZ, and mutilated in an arbitrary manner; see also *Biblioth. de la C. de J.*, ed. BLIARD, pt. I, vol. X (new ed., Paris, 1910), col. 979; 1570 sq., 1740 sq., antagonistic to the Jesuits; IBAÑEZ DE ECHAVARRI, *El Reyno Jesuitico del Paraguay* (Madrid, 1770), Ger. tr. in LE BRET, *Magazin zum Gebrauch der Staaten und Kircheng.* (Frankfort and Leipzig, 1772), and separately, *Jesuitisches Reich in P.* (Cologne, 1774).

Ibañez is untrustworthy, having been dismissed twice from the Society of Jesus. "It is neither more nor less than a crude and criminal elaboration of what had been asserted by the anonymously twenty-eight years before" (Monner-Sans, loc. cit., 78). The documents which Ibañez cites, and which are taken from the archives of the secularized Jesuit houses, would be valuable if they had not lost their historical value through arbitrary falsifications and omissions. *Relação abbreviada de la Republica que os Religiosos Jesuitas das Provinc. de Portugal e Hespanha estabeleceram nos dominios ultramar. das duas Monarchias* (Lisbon, 1760), a lying pamphlet of the type spread by Pombal, tr. into various languages and repeatedly re-edited, even as late as 1892 at Wiener-Neustadt; refuted in a brilliant manner by CARDIEL, *Declaracion de le Verdad* (Buenos Aires, 1900); *Diário da expedição de Gomes Freire de Andrade as Missões do Uruguay in Rev. Trimensal do Inst. Hist. Geogr. e Ethnogr. do Brasil*, XVI (1871), 137-321; *Sammlung der neuesten Schriften, welche die Jesuiten in Portugal betreffen* (4 vols., Frankfort and Leipzig, 1760 sq., refuted in *Osservazioni Interessanti s. Relative agli Affari de' Gesuiti* (1760); German in *Betrachtungen über die Handel der Jesuiten* (Oberammergau, 1761, etc.).

Redwood, FRANCIS. See WELLINGTON, ARCH-DIOCESE OF.

Referendarii.—The papal office of the referendarii (from *refero*, to inform) existed at the Byzantine Court. They were officials who reported to the emperor on the memorials of petitioners, and conveyed to the judges the orders of the emperor in connexion with such memorials. During the Merovingian period of the Frankish Empire, the official later known as chancellor (*cancellarius*) is called "referendarius". In the Papal Curia the office of "referendarii Apostolici" originated in the Middle Ages; their duty was to receive all petitions directed to the Holy See, to report on them to the pope, and to tender him advice. The treatment and decision varied according to the nature of the question. If a favour was concerned, it might be either granted or refused; if some dispute, the pope decided whether it should be referred to a judge. The *referendarii* were entrusted with all arrangements for these papal decisions, which they had to prepare for the pope's signature (*signatura*). From these *referendarii* developed the court of the *Signatura* (Collegium referendarium Signaturæ votantium), concerning which there are various papal constitutions. Innocent VIII (1484-92) introduced a distinction between the *referendarii* on questions of favours and of justice, whence developed the "*Signatura gratiæ*" and the "*Signatura iustitiæ*", each competent to give final decision within its sphere. In the court of the "*Signatura iustitiæ*" developed a distinction between the prelates entitled to vote (*prælati volantes*) and those whose duties were confined to reporting on individual cases (*prælati referendarii*). The whole body gradually lost all practical importance, especially after the loss of the papal States, and was entirely abolished at the reorganization of the Curia by Pius X.

J. P. KIRSCH.

Reformation, THE, the usual term for the religious movement which made its appearance in Western Europe in the sixteenth century, and which, while ostensibly aiming at an internal renewal of the Church, really led to a great revolt against it, and an abandonment of the principal Christian beliefs. We shall review the general characteristics of this movement from the following standpoints: I. Causes of the Reformation; II. Original Ideas and Purposes of the Reformers; III. Methods of Spreading the Reformation; IV. Spread of the Reformation in the Various Countries; V. Different Forms of the Reformation; VI. Results and Consequences of the Reformation.

I. CAUSES OF THE REFORMATION.—The causes

of the great religious revolt of the sixteenth century must be sought as far back as the fourteenth. The doctrine of the Church, it is true, had remained pure; saintly lives were yet frequent in all parts of Europe, and the numerous beneficent medieval institutions of the Church continued their course uninterrupted. Whatever unhappy conditions existed were largely due to civil and profane influences or to the exercise of authority by ecclesiastics in civil spheres; they did not obtain everywhere with equal intensity, nor did they always occur simultaneously in the same country. Ecclesiastical and religious life exhibited in many places vigour and variety: works of education and charity abounded; religious art in all its forms had a living force; domestic missionaries were many and influential; pious and edifying literature was common and appreciated. Gradually, however, and largely owing to the variously hostile spirit of the civil powers, fostered and heightened by several elements of the new order, there grew up in many parts of Europe political and social conditions which hampered the free reformatory activities of the Church, and favoured the bold and unscrupulous, who seized a unique opportunity to let loose all the forces of heresy and schism so long held in check by the harmonious action of the ecclesiastical and civil authorities.

A. Since the Barbarian invasions the Church had effected a complete transformation and revival of the races of Western Europe, and a glorious development of religious and intellectual life. The papacy had become the powerful centre of the family of Christian nations, and as such had for centuries, in union with the episcopate and the clergy, displayed a most beneficent activity. With the ecclesiastical organization fully developed, it came to pass that the activities of the governing ecclesiastical bodies were no longer confined to the ecclesiastical domain, but affected almost every sphere of popular life. Gradually a regrettable worldliness manifested itself in many high ecclesiastics. Their chief object, viz. to guide man to his eternal goal, claimed too seldom their attention, and worldly activities became in too many cases the chief interest. Political power, material possessions, privileged position in public life, the defence of ancient historical rights, earthly interests of various kinds were only too often the chief aim of many of the higher clergy. Pastoral solicitude, the specifically religious and ecclesiastical aim, fell largely into the background, notwithstanding various spirited and successful attempts to rectify the existing evils.

B. Closely connected with the above were various abuses in the lives of the clergy and the people. In the Papal Curia political interests and a worldly life were often prominent. Many bishops and abbots (especially in countries where they were also territorial princes) bore themselves as secular rulers rather than as servants of the Church. Many members of cathedral chapters and other beneficed ecclesiastics were chiefly concerned with their income and how to increase it, especially by uniting several prebends (even episcopal sees) in the hands of one person, who thus enjoyed a larger income and greater power. Luxury prevailed widely among the higher clergy, while the lower clergy were often oppressed. The scientific and ascetic training of the clergy also left much to be desired, the moral standard of many being very low, and the practice of celibacy not everywhere observed. Not less serious was the condition of many monasteries of men, and even of women (which were frequently homes for the unmarried daughters of the nobility). The former prestige of the clergy had thus suffered greatly, and its members were in many places regarded with scorn. As to the Christian people itself, in numerous districts ignorance, superstition, religious indif-

ference, and immorality were rife. Nevertheless, vigorous efforts to revive religious life were made in most lands, and side by side with this moral decay appear numerous examples of sincere and upright Christian life. Such efforts, however, were too often confined to limited circles. From the fourteenth century the demand for "reform of head and members" (*reformatio in capite et in membris*) had been voiced with ever-increasing energy by serious and discerning men, but the same cry was taken up also by many who had no real desire for a religious renewal, wishing merely to reform others but not themselves, and seeking solely their own interests. This call for reformation of head and members, discussed in many writings and in conversation with insistence on existing and often exaggerated abuses, tended necessarily to lower the clergy still more in the eyes of the people, especially as the councils of the fifteenth century, though largely occupied with attempts at reformation, did not succeed in accomplishing it extensively or permanently.

C. The authority of the Holy See had also been seriously impaired, partly through the fault of some of its occupants and partly through that of the secular princes. The pope's removal to Avignon in the fourteenth century was a grievous error, since the universal character of the papacy was thus obscured in the minds of the Christian people. Certain phases of the quarrel with Louis the Bavarian and with the Franciscan Spirituals clearly indicate a decline of the papal power. The severest blow was dealt by the disastrous papal schism (1378-1418) which familiarized Western Christians with the idea that war might be made, with all spiritual and material weapons, against one whom many other Christians regarded as the only lawful pope. After the restoration of unity, the attempted reforms of the Papal Curia were not thorough. Humanism and the ideals of the Renaissance were zealously cultivated in Rome, and unfortunately the heathen tendencies of this movement, so opposed to the Christian moral law, affected too profoundly the life of many higher ecclesiastics, so that worldly ideas, luxury, and immorality rapidly gained ground at the centre of ecclesiastical life. When ecclesiastical authority grew weak at the fountain-head, it necessarily decayed elsewhere. There were also serious administrative abuses in the Papal Curia. The ever-increasing centralization of ecclesiastical administration had brought it about that far too many ecclesiastical benefices in all parts of Christendom were conferred at Rome, while in the granting of them the personal interests of the petitioner, rather than the spiritual needs of the faithful, were too often considered. The various kinds of reservation had also become a grievous abuse. Dissatisfaction was felt widely among the clergy at the many taxes imposed by the Curia on the incumbents of ecclesiastical benefices. From the fourteenth century these taxes called forth loud complaints. In proportion as the papal authority lost the respect of many, resentment grew against both the Curia and the Papacy. The reform councils of the fifteenth century, instead of improving this situation, weakened still more the highest ecclesiastical authority by reason of their anti-papal tendencies and measures.

D. In princes and governments there had meanwhile developed a national consciousness, purely temporal and to a great extent hostile to the Church; the civil powers interfered more frequently in ecclesiastical matters, and the direct influence exercised by laymen on the domestic administration of the Church rapidly increased. In the course of the fourteenth and fifteenth centuries arose the modern concept of the State. During the preceding period many matters of a secular or mixed nature had been regulated or managed by the Church, in keeping with

the historical development of European society. With the growing self-consciousness of the State, the secular governments sought to control all matters that fell within their competence, which course, although in large measure justifiable, was new and offensive, and thus led to frequent collisions between Church and State. The State, moreover, owing to the close historical connexion between the ecclesiastical and secular orders, encroached on the ecclesiastical domain. During the course of the Western Schism (1378-1418) opposing popes sought the support of the civil powers, and thus gave the latter abundant occasion to interfere in purely ecclesiastical affairs. Again, to strengthen their authority in the face of anti-papal tendencies, the popes of the fifteenth century made at various times certain concessions to the civil authorities, so that the latter came to regard ecclesiastical affairs as within their domain. For the future the Church was to be, not superordinate, but subordinate to the civil power, and was increasingly menaced with complete subjection. According as national self-consciousness developed in the various countries of Europe, the sense of the unity and interdependence of the Christian family of nations grew weaker. Jealousy between nations increased, selfishness gained ground, the rift between politics and Christian morality and religion grew wider, and discontent and perilous revolutionary tendencies spread rapidly among the people. Love of wealth was meanwhile given a great incentive by the discovery of the New World, the rapid development of commerce, and the new prosperity of the cities. In public life a many-sided and intense activity revealed itself, foreshadowing a new era and inclining the popular mind to changes in the hitherto undivided province of religion.

E. The Renaissance and Humanism partly introduced and greatly fostered these conditions. Love of luxury was soon associated with the revival of the art and literature of Græco-Roman paganism. The Christian religious ideal was to a great extent lost sight of; higher intellectual culture, previously confined in great measure to the clergy, but now common among the laity, assumed a secular character, and in only too many cases fostered actively and practically a pagan spirit, pagan morality and views. A crude materialism obtained among the higher classes of society and in the educated world, characterized by a gross love of pleasure, a desire for gain, and a voluptuousness of life diametrically opposed to Christian morality. Only a faint interest in the supernatural life survived. The new art of printing made it possible to disseminate widely the works of pagan authors and of their humanistic imitators. Immoral poems and romances, biting satires on ecclesiastical persons and institutions, revolutionary works and songs, were circulated in all directions and wrought immense harm. As Humanism grew, it waged violent war against the Scholasticism of the time. The traditional theological method had greatly degenerated owing to the finical, hair-splitting manner of treating theological questions, and a solid and thorough treatment of theology had unhappily disappeared from many schools and writings. The Humanists cultivated new methods, and based theology on the Bible and the study of the Fathers, an essentially good movement which might have renewed the study of theology, if properly developed. But the violence of the Humanists, their exaggerated attacks on Scholasticism (q. v.), and the frequent obscurity of their teaching aroused strong opposition from the representative Scholastics. The new movement, however, had won the sympathy of the lay world and of the section of the clergy devoted to Humanism. The danger was only too imminent that the reform would not be confined to theological methods, but would reach the content of ecclesiastical

dogma, and would find widespread support in humanistic circles.

The soil was thus ready for the growth of revolutionary movements in the religious sphere. Many grave warnings were indeed uttered, indicating the approaching danger and urging a fundamental reform of the actual evil conditions. Much had been effected in this direction by the reform movement in various religious orders and by the apostolic efforts of zealous individuals. But a general renewal of ecclesiastical life and a uniform improvement of evil conditions, beginning with Rome itself, the centre of the Church, were not promptly undertaken, and soon it needed only an external impulse to precipitate a revolution, which was to cut off from the unity of the Church great territories of Central and almost all Northern Europe.

II. ORIGINAL IDEAS AND PURPOSES OF THE REFORMERS.—The first impulse to secession was supplied by the opposition of Luther in Germany and of Zwingli in German Switzerland to the promulgation by Leo X of an indulgence for contributions towards the building of the new St. Peter's at Rome. For a long time it had been customary for the popes to grant indulgences for buildings of public utility (e. g. bridges). In such cases the true doctrine of indulgences as a remission of the punishment due to sin (not of the guilt of sin) had been always upheld, and the necessary conditions (especially the obligation of a contrite confession to obtain absolution from sin) always inculcated. But the almsgiving for a good object, prescribed only as a good work supplementary to the chief conditions for the gaining of the indulgence, was often prominently emphasized. The indulgence commissaries sought to collect as much money as possible in connexion with the indulgence. Indeed, frequently since the Western Schism the spiritual needs of the people did not receive as much consideration as a motive for promulgating an indulgence, as the need of the good object by promoting which the indulgence was to be gained, and the consequent need of obtaining alms for this purpose. The war against the Turks and other crises, the erection of churches and monasteries, and numerous other causes led to the granting of indulgences in the fifteenth century. The consequent abuses were heightened by the fact that secular rulers frequently forbade the promulgation of indulgences within their territories, consenting only on condition that a portion of the receipts should be given to them. In practice, therefore, and in the public mind the promulgation of indulgences took on an economic aspect, and, as they were frequent, many came to regard them as an oppressive tax. Vainly did earnest men raise their voices against this abuse, which aroused no little bitterness against the ecclesiastical order and particularly the Papal Curia. The promulgation of indulgences for the new St. Peter's furnished Luther with an opportunity to attack openly indulgences in general, and this attack was the immediate occasion of the Reformation in Germany. A little later the same motive led Zwingli to put forth his erroneous teachings, thereby inaugurating the Reformation in German Switzerland (see LUTHER, MARTIN; ZWINGLI, HULDRICH). Both declared that they were attacking only the abuses of indulgences; however, they soon taught doctrine in many ways contrary to the teaching of the Church.

The great applause which Luther received on his first appearance, both in humanistic circles and among some theologians and some of the earnest-minded laity, was due to dissatisfaction with the existing abuses. His own erroneous views and the influence of a portion of his followers very soon drove Luther into rebellion against ecclesiastical authority as such, and eventually led him into open apostasy and schism.

His chief original supporters were won among the Humanists, the immoral clergy, and the lower grades of the landed nobility imbued with revolutionary tendencies. It was soon evident that he meant to subvert all the fundamental institutions of the Church. Beginning by proclaiming the false doctrine of "justification by faith alone", he later rejected all supernatural remedies (especially the sacraments and the Mass), denied the meritoriousness of good works (thus condemning monastic vows and Christian asceticism in general), and finally rejected the institution of a genuine hierarchical priesthood (especially the papacy) in the Church. His doctrine of the Bible as the sole rule of faith, with rejection of all ecclesiastical authority, established subjectivism in matters of faith. By this revolutionary assault Luther forfeited the support of many serious persons indisposed to break with the Church, but on the other hand won over all the anti-ecclesiastical elements, including numerous monks and nuns who left the monasteries to break their vows, and many priests who espoused his cause with the intention of marrying. The support of his sovereign, Frederick of Saxony, was of great importance. Very soon secular princes and municipal magistrates made the Reformation a pretext for arbitrary interference in purely ecclesiastical and religious affairs, for appropriating ecclesiastical property and disposing of it at pleasure, and for deciding what faith their subjects should accept. Some followers of Luther went to even greater extremes. The Anabaptists and the "Iconoclasts" revealed the extreme possibilities of the principles advocated by Luther, while in the Peasants' War the most oppressed elements of German society put into practice the doctrine of the reformer. Ecclesiastical affairs were now reorganized by the Lutheran princes on the basis of the new teachings; henceforth the secular power is ever more clearly the supreme judge in purely religious matters, and completely disregards any independent ecclesiastical authority.

A second centre of the Reformation movement was established by Zwingli at Zurich. Though he differed in many particulars from Luther, and was much more radical than the latter in his transformation of the ceremonial of the Mass, the aims of his followers were identical with those of the Lutherans. Political considerations played a great rôle in the development of Zwinglianism, and the magistracy of Zurich, after a majority of its members had declared for Zwingli, became a zealous promoter of the Reformation. Arbitrary decrees were issued by the magistrates concerning ecclesiastical organization; the councillors who remained true to the Catholic Faith were expelled from the council, and Catholic services were forbidden in the city. The city and the canton of Zurich were reformed by the civil authorities according to the ideas of Zwingli. Other parts of German Switzerland experienced a similar fate. French Switzerland developed later its own peculiar Reformation; this was organized at Geneva by Calvin (q. v.). Calvinism is distinguished from Lutheranism and Zwinglianism by a more rigid and consistent form of doctrine and by the strictness of its moral precepts, which regulate the whole domestic and public life of the citizen. The ecclesiastical organization of Calvin was declared a fundamental law of the Republic of Geneva, and the authorities gave their entire support to the reformer in the establishment of his new court of morals. Calvin's word was the highest authority, and he tolerated no contradiction of his views or regulations. Calvinism was introduced into Geneva and the surrounding country by violence. Catholic priests were banished, and the people oppressed and compelled to attend Calvinistic sermons.

In England the origin of the Reformation was en-

tirely different. Here the sensual and tyrannical Henry VIII, with the support of Thomas Cranmer, whom the king had made Archbishop of Canterbury, severed his country from ecclesiastical unity because the pope, as the true guardian of the Divine law, refused to recognize the invalid marriage of the king with Anne Boleyn during the lifetime of his lawful wife. Renouncing obedience to the pope, the despotic monarch constituted himself supreme judge even in ecclesiastical affairs; the opposition of such good men as Thomas More and John Fisher was overcome in blood. The king wished, however, to retain unchanged both the doctrines of the Church and the ecclesiastical hierarchy, and caused a series of doctrines and institutions rejected by Luther and his followers to be strictly prescribed by Act of Parliament (Six Articles) under pain of death. In England also the civil power constituted itself supreme judge in matters of faith, and laid the foundation for further arbitrary religious innovations. Under the following sovereign, Edward VI (1547-53), the Protestant party gained the upper hand, and thenceforth began to promote the Reformation in England according to the principles of Luther, Zwingli, and Calvin. Here also force was employed to spread the new doctrines. This last effort of the Reformation movement was practically confined to England (see **ANGLICANISM**).

III. METHOD OF SPREADING THE REFORMATION.

—In the choice of means for extending the Reformation its founders and supporters were not fastidious, availing themselves of any factor which could further their movement.

A. Denunciation of real and supposed abuses in religious and ecclesiastical life was, especially at the beginning, one of the chief methods employed by the reformers to promote their designs. By this means they won over many who were dissatisfied with existing conditions, and were ready to support any movement that promised a change. But it was especially the widespread hatred of Rome and of the members of the hierarchy, fostered by the incessantly repeated and only too often justifiable complaints about abuses, that most efficiently favoured the reformers, who very soon violently attacked the papal authority, recognizing in it the supreme guardian of the Catholic Faith. Hence the multitude of lampoons, often most vulgar, against the pope, the bishops, and in general against all representatives of ecclesiastical authority. These pamphlets were circulated everywhere among the people, and thereby respect for authority was still more violently shaken. Painters prepared shameless and degrading caricatures of the pope, the clergy, and the monks, to illustrate the text of hostile pamphlets. Waged with every possible weapon (even the most reprehensible), this warfare against the representatives of the Church, as the supposed originators of all ecclesiastical abuses, prepared the way for the reception of the Reformation. A distinction was no longer drawn between temporary and corrigible abuses and fundamental supernatural Christian truths; together with the abuses, important ecclesiastical institutions, resting on Divine foundation, were simultaneously abolished.

B. Advantage was also taken of the divisions existing in many places between the ecclesiastical and civil authorities. The development of the State, in its modern form, among the Christian peoples of the West gave rise to many disputes between the clergy and laity, between bishops and the cities, between monasteries and the territorial lords. When the Reformers withdrew from the clergy all authority, especially all influence in civil affairs, they enabled the princes and municipal authorities to end these long-pending strifes to their own advantage by arbitrarily arrogating to themselves all disputed rights, banishing the hierarchy whose rights they usurped,

and then establishing by their own authority a completely new ecclesiastical organization. The Reformed clergy thus possessed from the beginning only such rights as the civil authorities were pleased to assign them. Consequently the Reformed national Churches were completely subject to the civil authorities, and the Reformers, who had entrusted to the civil power the actual execution of their principles, had now no means of ridding themselves of this servitude.

C. In the course of centuries an immense number of foundations had been made for religious, charitable, and educational objects, and had been provided with rich material resources. Churches, monasteries, hospitals, and schools had often great incomes and extensive possessions, which aroused the envy of secular rulers. The Reformation enabled the latter to secularize this vast ecclesiastical wealth, since the leaders of the Reformation constantly inveighed against the centralization of such riches in the hands of the clergy. The princes and municipal authorities were thus invited to seize ecclesiastical property, and employ it for their own purposes. Ecclesiastical principalities, which were entrusted to the incumbents only as ecclesiastical persons for administration and usufruct, were, in defiance of actual law, by exclusion of the incumbents, transformed into secular principalities. In this way the Reformers succeeded in depriving the Church of the temporal wealth provided for its many needs, and in diverting the same to their own advantage.

D. Human passions, to which the Reformers appealed in the most various ways, were another means of spreading the Reformation. The very ideas which these innovators defended—Christian freedom, license of thought, the right and capacity of each individual to found his own faith on the Bible, and other similar principles—were very seductive for many. The abolition of religious institutions which acted as a curb on sinful human nature (confession, penance, fasting, abstinence, vows) attracted the lascivious and frivolous. The warfare against the religious orders, against virginity and celibacy, against the practices of a higher Christian life, won for the Reformation a great number of those who, without a serious vocation, had embraced the religious life from purely human and worldly motives, and who wished to be rid of obligations towards God which had grown burdensome, and to be free to gratify their sensual cravings. This they could do the more easily, as the confiscation of the property of the churches and monasteries rendered it possible to provide for the material advancement of ex-monks and ex-nuns, and of priests who apostatized. In the innumerable writings and pamphlets intended for the people the Reformers made it their frequent endeavour to excite the basest human instincts. Against the pope, the Roman Curia, and the bishops, priests, monks, and nuns who had remained true to their Catholic convictions, the most incredible lampoons and libels were disseminated. In language of the utmost coarseness Catholic doctrines and institutions were distorted and ridiculed. Among the lower, mostly uneducated, and abandoned elements of the population, the baser passions and instincts were stimulated and pressed into the service of the Reformation.

E. At first many bishops displayed great apathy towards the Reformers, attaching to the new movement no importance; its chiefs were thus given a longer time to spread their doctrines. Even later, many worldly-inclined bishops, though remaining true to the Church, were very lax in combating heresy and in employing the proper means to prevent its further advance. The same might be said of the parochial clergy, who were to a great extent ignorant and indifferent, and looked on idly at the defection

of the people. The Reformers, on the other hand, displayed the greatest zeal for their cause. Leaving no means unused by word and pen, by constant intercourse with similarly minded persons, by popular eloquence, which the leaders of the Reformation were especially skilled in employing, by sermons and popular writings appealing to the weaknesses of the popular character, by inciting the fanaticism of the masses, in short by clever and zealous utilization of every opportunity and opening that presented itself, they proved their ardour for the spread of their doctrines. Meanwhile they proceeded with great astuteness, purported to adhere strictly to the essential truths of the Catholic Faith, retained at first many of the external ceremonies of Catholic worship, and declared their intention of abolishing only things resting on human invention, seeking thus to deceive the people concerning the real objects of their activity. They found indeed many pious and zealous opponents in the ranks of the regular and secular clergy, but the great need, especially at the beginning, was a universally organized and systematically conducted resistance to this false reformation.

F. Many new institutions introduced by the Reformers flattered the multitude—e. g. the reception of the chalice by the whole people, the use of the vernacular at Divine service, the popular religious hymns used during services, the reading of the Bible, the denial of the essential difference between clergy and laity. In this category may be included doctrines which had an attraction for many—e. g. justification by faith alone without reference to good works, the denial of freedom of will, which furnished an excuse for moral lapses, personal certainty of salvation in faith (i. e. subjective confidence in the merits of Christ), the universal priesthood, which seemed to give all a direct share in sacerdotal functions and ecclesiastical administration.

G. Finally, one of the chief means employed in promoting the spread of the Reformation was the use of violence by the princes and the municipal authorities. Priests who remained Catholic were expelled and replaced by adherents of the new doctrine, and the people were compelled to attend the new services. The faithful adherents of the Church were variously persecuted, and the civil authorities saw to it that the faith of the descendants of those who had strongly opposed the Reformation was gradually sapped. In many places the people were severed from the Church by brutal violence; elsewhere to deceive the people the ruse was employed of retaining the Catholic rite outwardly for a long time, and prescribing for the reformed clergy the ecclesiastical vestments of the Catholic worship. The history of the Reformation shows incontestably that the civil power was the chief factor in spreading it in all lands, and that in the last analysis it was not religious, but dynastic, political, and social interests which proved decisive. Add to this that the princes and municipal magistrates who had joined the Reformers tyrannized grossly over the consciences of their subjects and burghers. All must accept the religion prescribed by the civil ruler. The principle "*Cuius regio, illius et religio*" (Religion goes with the land) is an outgrowth of the Reformation, and was by it and its adherents, wherever they possessed the necessary power, put into practice.

IV. SPREAD OF THE REFORMATION IN THE VARIOUS COUNTRIES.—A. *Germany and German Switzerland*.—The Reformation was inaugurated in Germany when Luther affixed his celebrated theses to the doors of the church at Wittenberg, 31 October, 1517. From the consequences of papal excommunication and the imperial ban Luther was protected by Elector Frederick of Saxony, his territorial sovereign. While outwardly adopting a neutral at-

titude, the latter encouraged the formation of Lutheran communities within his domains, after Luther had returned to Wittenberg and resumed there the leadership of the reform movement, in opposition to the Anabaptists. It was Luther who introduced the arbitrary regulations for Divine worship and religious functions; in accordance with these, Lutheran communities were established, whereby an organized heretical body was opposed to the Catholic Church. Among the other German princes who early associated themselves with Luther and seconded his efforts were: John of Saxony (the brother of Frederick); Grand-Master Albert of Prussia, who converted the lands of his order into a secular duchy, becoming its hereditary lord on accepting Lutheranism; Dukes Henry and Albert of Mecklenburg; Count Albert of Mansfield; Count Edzard of East Friesland; Landgrave Philip of Hesse, who declared definitively for the Reformation after 1524. Meanwhile in several German imperial cities the reform movement was initiated by followers of Luther—especially in Ulm, Augsburg, Nuremberg, Nördlingen, Strasburg, Constance, Mainz, Erfurt, Zwickau, Magdeburg, Frankfurt-on-the-Main, and Bremen. The Lutheran princes formed the Alliance of Torgau on 4 May, 1526, for their common defence. By their appearance at the Diet of Speyer in 1526 they secured the adoption of the resolution that, with respect to the Edict of Worms against Luther and his erroneous doctrine, each might adopt such attitude as he could answer for before God and emperor. Liberty to introduce the Reformation into their territories was thus granted to the territorial rulers. The Catholic estates became discouraged, while the Lutheran princes grew ever more extravagant in their demands. Even the entirely moderate decrees of the Diet of Speyer (1529) drew a protest from the Lutheran and Reformed estates.

The negotiations at the Diet of Augsburg (1530), at which the estates rejecting the Catholic faith elaborated their creed (Augsburg Confession), showed that the restoration of religious unity was not to be effected. The Reformation extended wider and wider, both Lutheranism and Zwinglianism being introduced into other German territories. Besides the above-mentioned principalities and cities, it had made its way by 1530 into the principalities of Bayreuth, Ansbach, Anhalt, and Brunswick-Lüneburg, and in the next few years into Pomerania, Jülich-Cleve, and Würtemberg. In Silesia and the Duchy of Liegnitz the Reformation also made great strides. In 1531 the Smalkaldic League, an offensive and defensive alliance, was concluded between the Protestant princes and cities. Especially after its renewal (1535) this league was joined by other cities and princes who had espoused the Reformation, e. g. Count Palatine Rupert of Zweibrücken, Count William of Nassau, the cities of Augsburg, Kempten, Hamburg, and others. Further negotiations and discussions between the religious parties were instituted with a view to ending the schism, but without success. Among the methods adopted by the Protestants in spreading the Reformation force was ever more freely employed. The Diocese of Naumburg-Seitz becoming vacant, Elector John Frederick of Saxony installed by force in the see the Lutheran preacher Nicholas Amsdorf (instead of the cathedral provost, Julius von Pflug, chosen by the chapter), and himself undertook the secular government. Duke Henry of Brunswick-Wolfenbüttel was exiled in 1542, and the Reformation introduced into his domains by force. In Cologne itself the Reformation was very nearly established by force. Some ecclesiastical princes proved delinquent, taking no measures against the innovations that spread daily

In widening circles. Into Pfalz-Neuburg and the towns of Halberstadt, Halle, etc., the Reformation found entrance. The collapse of the Smalkaldic League (1547) somewhat stemmed the progress of the Reformation: Julius von Pflug was installed in his Diocese of Naumburg, Duke Henry of Brunswick-Wolfenbüttel recovered his lands, and Hermann von Wied had to resign the Diocese of Cologne, where the Catholic Faith was thus maintained.

The formula of union established by the Diet of Augsburg in 1547-48 (Augsburg Interim) did not succeed in its object, although introduced into many Protestant territories. Meanwhile the treachery of Prince Moritz of Saxony, who made a secret treaty with Henry II of France, Germany's enemy, and formed a confederation with the Protestant princes William of Hesse, John Albert of Mecklenburg, and Albert of Brandenburg, to make war on the emperor and empire, broke the power of the emperor. At the suggestion of Charles, King Ferdinand convened the Diet of Augsburg in 1555, at which, after long negotiations, the compact known as the Religious Peace of Augsburg was concluded. This compact contained the following provisions in its twenty-two paragraphs: (1) between the Catholic imperial estates and those of the Augsburg Confession (the Zwinglians were not considered in the treaty) peace and harmony was to be observed; (2) no estate of the empire was to compel another estate or its subjects to change religion, nor was it to make war on such on account of religion; (3) should an ecclesiastical dignitary espouse the Augsburg Confession, he was to lose his ecclesiastical dignity with all offices and emoluments connected with it, without prejudice, however, to his honour or private possession. Against this ecclesiastical proviso the Lutheran estates protested: (4) the holders of the Augsburg Confession were to be left in possession of all ecclesiastical property which they had held since the beginning of the Reformation; after 1555 neither party might seize anything from the other; (5) until the conclusion of peace between the contending religious bodies (to be effected at the approaching Diet of Ratisbon) the ecclesiastical jurisdiction of the Catholic hierarchy was suspended in the territories of the Augsburg Confession; (6) should any conflict arise between the parties concerning lands or rights, an attempt must first be made to settle such disputes by arbitration; (7) no imperial estate might protect the subjects of another estate from the authorities; (8) every citizen of the Empire had the right of choosing either of the two recognized religions and of practising it in another territory without loss of rights, honour, or property (without prejudice, however, to the rights of the territorial lord over his peasantry); (9) this peace was to include the free knights and the free cities of the empire, and the imperial courts had to be guided exactly by its provisions; (10) oaths might be administered either in the name of God or of His Holy Gospel. By this peace the religious schism in the German Empire was definitively established; henceforth the Catholic and Protestant estates are opposing camps. Almost all Germany, from the Netherlands frontier in the west to the Polish frontier in the east, the territory of the Teutonic Order in Prussia, Central Germany with the exception of the greater part of the western portion, and (in South Germany) Würtemberg, Ansbach, Pfalz-Zweibrücken, and other small domains, with numerous free cities, had espoused the Lutheran Reformation. Moreover, in the south and south-east, which remained prevailingly Catholic, it found more or less numerous supporters. Calvinism also spread fairly widely.

But the Peace of Augsburg failed to secure the harmony hoped for. In defiance of its express

provisions, a series of ecclesiastical principalities (2 archbishoprics, 12 bishoprics, and numerous abbeys) were reformed and secularized before the beginning of the seventeenth century. The Catholic League was formed for the protection of Catholic interests, and to offset the Protestant Union. The Thirty Years War soon followed, a struggle most ominous for Germany, since it surrendered the country to its enemies from the west and north, and destroyed the power, wealth, and influence of the German Empire. The Peace of Westphalia, concluded in 1648 with France at Münster and with Sweden at Osnabrück, confirmed definitely the status of religious schism in Germany, placed both the Calvinists and the Reformed on the same footing as the Lutherans, and granted the estates immediately subject to the emperor the right of introducing the Reformation. Henceforth territorial sovereigns could compel their subjects to adopt a given religion, subject to the recognition of the independence of those who in 1624 enjoyed the right to hold their own religious services. State Absolutism in religious matters had now attained its highest development in Germany.

In German Switzerland a similar course was pursued. After Zurich had accepted and forcibly introduced the Reformation, Basle followed its example. In Basle John Oecolampadius and Wolfgang Capito associated themselves with Zwingli, spread his teaching, and won a victory for the new faith. The Catholic members of the Great Council were expelled. Similar results followed in Appenzell Outer Rhodes, Schaffhausen, and Glarus. After long hesitation, the Reformation was accepted also at Berne, where an apostate Carthusian, Franz Kolb, with Johann and Berthold Haller, preached Zwinglianism; all the monasteries were suppressed, and great violence was exercised to force Zwinglianism upon the people of the territory. St. Gall, where Joachim Vadianus preached, and a great portion of Graubünden also adopted the innovations. Throughout the empire Zwinglianism was a strong rival of Lutheranism, and a violent conflict between the two confessions began, despite constant negotiations for union. Attempts were not wanting in Switzerland to terminate the unhappy religious division. In May, 1526, a great religious disputation was held at Baden, the Catholics being represented by Eck, Johann Faber, and Murner, and the Reformed by Oecolampadius and Berthold Haller. The result was favourable to the Catholics; most of the representatives of the estates present declared against the Reformation, and writings of Luther and Zwingli were prohibited. This aroused the opposition of the Reformed estates. In 1527 Zurich formed an alliance with Constance; Basle, Bern, and other Reformed estates joined the confederacy in 1528. In self-defence the Catholic estates formed an alliance in 1529 for the protection of the true Faith within their territories. In the resulting war the Catholic estates gained a victory at Kappel, and Zwingli was slain on the battle-field. Zurich and Berne were granted peace on condition that no place should disturb another on account of religion, and that Catholic services might be freely held in the common territories. The Catholic Faith was restored in certain districts of Glarus and Appenzell; the Abbey of St. Gall was restored to the abbot, though the town remained Reformed. In Zurich, Berne, Basle, and Schaffhausen, however, the Catholics were unable to secure their rights. The Swiss Reformers soon composed formal statements of their beliefs; especially noteworthy were the First Helvetic Confession (*Confessio Helvetica I*), composed by Bullinger, Myconius, Grynæus, and others (1536), and the Second Confession composed by Bullinger in 1564 (*Confessio Helvetica II*);

the latter was adopted in most Reformed territories of the Zwinglian type.

B. The Northern Kingdoms: Denmark, Norway and Sweden.—The Lutheran Reformation found an early entrance into Denmark, Norway (then united to Denmark), and Sweden. Its introduction was primarily due to royal influence. King Christian II of Denmark (1513–23) welcomed the Reformation as a means of weakening the nobility and especially the clergy (who possessed extensive property) and thereby extending the power of the throne. His first attempt to spread the teaching of Master Martin Luther in 1520 met with little success: the barons and prelates soon deposed him for tyranny, and in his place elected his uncle Duke Frederick of Schleswig and Holstein. The latter, who was a secret follower of Lutheranism, deceived the bishops and nobility, and swore at his coronation in 1523 to maintain the Catholic Religion. Seated on the throne, however, he favoured the Reformers, especially the preacher Hans Tausen. At the Diet of Odensee in 1527 he granted freedom of religion to the Reformers, permitted the clergy to marry, and reserved to the king the confirmation of all episcopal appointments. Lutheranism was spread by violent means, and the faithful adherents of the Catholic religion were oppressed. His son Christian III, who had already "reformed" Holstein, threw into prison the Danish bishops who protested against his succession, and courted the support of the barons. With the exception of Bishop Rønnow of Roskilde, who died in prison (1544), all the bishops agreed to resign and to refrain from opposing the new doctrine, whereupon they were set at liberty and their property was restored to them. All the priests who opposed the Reformation were expelled, the monasteries suppressed, and the Reformation introduced everywhere by force. In 1537 Luther's companion Johann Bugenhagen (Pomeranus) was summoned from Wittenberg to Denmark to establish the Reformation in accordance with the ideas of Luther. At the Diet of Copenhagen in 1546 the last rights of the Catholics were withdrawn; right of inheritance and eligibility for any office were denied them, and Catholic priests were forbidden to reside in the country under penalty of death.

In Norway Archbishop Olaus of Trondhjem apostatized to Lutheranism, but was compelled to leave the country, as a supporter of the deposed king, Christian II. With the aid of the Danish nobility Christian III introduced the Reformation into Norway by force. Iceland resisted longer royal absolutism and the religious innovations. The unflinching Bishop of Holum, Jon Arason, was beheaded, and the Reformation spread rapidly after 1551. Some externals of the Catholic period were retained—the title of bishop and to some extent the liturgical vestments and forms of worship.

Into Sweden also the Reformation was introduced for political reasons by the secular ruler. Gustavus Vasa, who had been given to Christian II of Denmark in 1520 as a hostage and had escaped to Lübeck, there became acquainted with the Lutheran teaching and recognized the services it could render him. Returning to Sweden, he became at first imperial chancellor, and, after being elected king on the deposition of Christian II in Denmark, attempted to convert Sweden into a hereditary monarchy, but had to yield to the opposition of the clergy and nobility. The Reformation helped him to attain his desire, although its introduction was difficult on account of the great fidelity of the people to the Catholic Faith. He appointed to high positions two Swedes, the brothers Olaf and Lorenz Peterson, who had studied at Wittenberg and had accepted Luther's teaching; one was appointed court chaplain at Stockholm and the other professor at Upsala. Both laboured in secret for the spread of Lutheranism, and won many

adherents, including the archdeacon Lorenz Anderson, whom the king thereupon named his chancellor. In his dealings with Pope Adrian VI and his legates the king simulated the greatest fidelity to the Church, while he was giving ever-increased support to religious innovations. The Dominicans, who offered a strong opposition to his designs, were banished from the kingdom, and the bishops who resisted were subjected to all kinds of oppression. After a religious disputation at the University of Upsala the king assigned the victory to Olaf Peterson, and proceeded to Lutheranize the university, to confiscate ecclesiastical property, and to employ every means to compel the clergy to accept the new doctrine. A popular rebellion gave him an opportunity of accusing the Catholic bishops of high treason, and in 1527 the Archbishop of Upsala and the Bishop of Westraes were executed. Many ecclesiastics acceded to the wishes of the king; others resisted and had to endure violent persecution, an heroic resistance being offered by the nuns of Wadstena. After the Diet of Westraes in 1527 great concessions were made to the king through fear of fresh subjection to the Danes, especially the right of confiscating church property, of ecclesiastical appointments and removals, etc. Some of the nobles were won over to the king's side, when it was made optional to take back all goods donated to the Church by one's ancestors since 1453. Clerical celibacy was abolished, and the vernacular introduced into Divine service. The king constituted himself supreme authority in religious matters, and severed the country from Catholic unity. The Synod of Örebro (1529) completed the Reformation, although most of the external rites, the images in the churches, the liturgical vestments, and the titles of archbishop and bishop were retained. Later (1544) Gustavus Vasa made the title to the throne hereditary in his family. The numerous risings directed against him and his innovations were put down with bloody violence. At a later period arose other great religious contests, likewise of a political character.

Calvinism also spread to some extent, and Eric XIV (1560–68) endeavoured to promote it. He was, however, dethroned by the nobility for his tyranny, and his brother John III (1568–92) named king. The latter restored the Catholic Faith and tried to restore the land to the unity of the Church. But on the death of his first wife, the zealous Catholic Princess Katherina, his ardour declined in the face of numerous difficulties, and his second wife favoured Lutheranism. On John's death his son Sigismund, already King of Poland and thoroughly Catholic in sentiment, became King of Sweden. However, his uncle Duke Charles, the chancellor of the kingdom, gave energetic support to the Reformation, and the Augsburg Confession was introduced at the National Synod of Upsala in 1593. Against the chancellor and the Swedish nobility Sigismund found himself powerless; finally (1600) he was deposed as an apostate from the "true doctrine", and Charles was appointed king. Gustavus Adolphus (1611–32), Charles's son, utilized the Reformation to increase the power of Sweden by his campaigns. The Reformation was then successfully enforced throughout Sweden.

C. France and French Switzerland.—In certain humanistic circles in France there originated at an early date a movement favourable to the Reformation. The centre of this movement was Meaux, where Bishop Guillaume Briconnet favoured the humanistic and mystic ideas, and where Professor Lefèvre d'Étaples, W. Farel, and J. de Clerc, Humanists with Lutheran tendencies, taught. However, the Court, the university, and the Parlement opposed the religious innovations, and the Lutheran community at Meaux was dissolved. More important centres of the Reformation were found in the South, where the Waldensians had prepared the soil. Here public

riots occurred during which images of Christ and the saints were destroyed. The parlements in most cases took energetic measures against the innovators, although in certain quarters the latter found protectors—especially Margaret of Valois, sister of King Francis I and wife of Henry d'Albret, King of Navarre. The leaders of the Reformation in Germany sought to win over King Francis I, for political reasons an ally of the Protestant German princes; the king, however, remained true to the Church, and suppressed the reform movements throughout his land. In the south-eastern districts, especially in Provence and Dauphiné, the supporters of the new doctrines increased through the efforts of Reformers from Switzerland and Strasburg, until finally the desecration and plundering of churches compelled the king to take energetic steps against them. After Calvinism had established itself in Geneva, its influence grew rapidly in French reform circles. Calvin appeared at Paris as defender of the new religious movement in 1533, dedicated to the French king in 1536 his "*Institutiones Christianæ Religionis*", and went to Geneva in the same year. Expelled from Geneva, he returned in 1541, and began there the final establishment of his religious organization. Geneva, with its academy inaugurated by Calvin, was a leading centre of the Reformation and affected principally France. Pierre le Clerc established the first Calvinistic community at Paris; other communities were established at Lyons, Orléans, Angers, and Rouen, repressive measures proving of little avail. Bishop Jacques Spifamius of Nevers lapsed into Calvinism, and in 1559 Paris witnessed the assembly of a general synod of French Reformers, which adopted a Calvinistic creed and introduced the Swiss presbyteral constitution for the Reformed communities. Owing to the support of the Waldensians, to the dissemination of reform literature from Geneva, Basle, and Strasburg, and to the steady influx of preachers from these cities, the adherents of the Reformation increased in France. On the death of King Henry II (1559) the Calvinist Huguenots wished to take advantage of the weakness of the Government to increase their power. The queen-dowager, Catherine de' Medici, was an ambitious intriguer, and pursued a time-serving policy. Political aspirations soon became entangled with the religious movement, which thereby assumed wider proportions and a greater importance. From opposition to the ruling line and to the powerful and zealously Catholic dukes of Guise, the princes of the Bourbon line became the protectors of the Calvinists; these were Antoine de Vendôme, King of Navarre, and his brothers, especially Louis de Condé. They were joined by the Constable de Montmorency, Admiral Coligny and his brother d'Andelot, and Cardinal Odet de Châtillon, Bishop of Beauvais.

In spite of anti-heretical laws, Calvinism was making steady progress in the South of France, when on 17 January, 1562, the queen-dowager, regent for the young Charles IX, issued an edict of toleration, allowing the Huguenots the free practice of their religion outside the towns and without weapons, but forbidding all interference with and acts of violence against Catholic institutions, and ordering the restitution of all churches and all ecclesiastical property taken from the Catholics. Rendered thereby only more audacious, the Calvinists committed, especially in the South, revolting acts of violence against the Catholics, putting to death Catholic priests even in the suburbs of Paris. The occurrence at Vassy in Champagne on 1 March, 1562, where the retinue of the Duke of Guise came into conflict with the Huguenots, inaugurated the first religious and civil war in France. Although this ended with the defeat of the Huguenots, it occasioned great losses to the Catholics of France. Relics of saints were burnt and scattered, magnificent churches reduced to ashes, and numerous

priests murdered. The edict of Amboise granted new favours to the Calvinistic nobles, although the earlier edict of toleration was withdrawn. Five other civil wars followed, during which occurred the massacre of St. Bartholomew's Day (24 August, 1572). It was not until the line of Valois had become extinct with Henry III (1589), and Henry of Navarre (who embraced Catholicism in 1593) of the Bourbon line had ascended the throne, that the religious wars were brought to an end by the Edict of Nantes (13 April, 1598); this granted the Calvinists not only full religious freedom and admission to all public offices, but even a privileged position in the State. Ever-increasing difficulties of a political nature arose, and Cardinal Richelieu aimed at ending the influential position of the Huguenots. The capture of their chief fortress, La Rochelle (28 October, 1628), finally broke the power of the French Calvinists as a political entity. Later, many of their number returned to Catholicism, although there still remained numerous adherents of Calvinism in France.

D. Italy and Spain.—While in both these lands there appeared isolated supporters of the Reformation, no strong or extensive organization arose. Here and there in Italy influential individuals (e. g. Vittoria Colonna and her circle) favoured the reform movement, but they desired such to occur within, not as a rebellion against the Church. A few Italians embraced Lutheranism or Calvinism, e. g. John Valdez, secretary of the Viceroy of Naples. In the cities of Turin, Pavia, Venice, Ferrara (where Duchess Renata favoured the Reformation), and Florence might be found adherents of the German and Swiss Reformers, although not so extreme as their prototypes. The more prominent had to leave the country—thus Pietro Paolo Vergerio, who fled to Switzerland and thence to Wittenberg; Bernardino Ochino, who fled to Geneva and was later professor at Oxford; Petrus Martyr Vermigli, who fled to Zurich, and was subsequently active at Oxford, Strasburg, and again at Zurich. By the vigorous inauguration of true ecclesiastical reform in the spirit of the Council of Trent, through the activity of numerous saintly men (such as Sts. Charles Borromeo and Philip Neri), through the vigilance of the bishops and the diligence of the Inquisition, the Reformation was excluded from Italy. In some circles rationalistic and anti-trinitarian tendencies showed themselves, and Italy was the birthplace of the two heresiarchs, Lælius Socinus and his nephew Faustus Socinus, the founders of Socinianism (q. v.).

The course of events was the same in Spain as in Italy. Despite some attempts to disseminate anti-ecclesiastical writings in the country, the Reformation won no success, thanks to the zeal displayed by the ecclesiastical and public authorities in counteracting its efforts. The few Spaniards who accepted the new doctrines were unable to develop any reforming activity at home, and lived abroad—e. g. Francisco Enzinas (Dryander), who made a translation of the Bible for Spaniards, Juan Diaz, Gonsalvo Montano, Miguel Serve de (Servetus), who was condemned by Calvin at Geneva for his doctrine against the Trinity and burnt at the stake.

E. Hungary and Transylvania.—The Reformation was spread in Hungary by Hungarians who had studied at Wittenberg and had there embraced Lutheranism. In 1525 stringent laws were passed against the adherents of the heretical doctrines, but their numbers continued to increase, especially among the nobility, who wished to confiscate the ecclesiastical property, and in the free cities of the kingdom. Turkish victories and conquest and the war between Ferdinand of Austria and John Zapolya favoured the reformers. In addition to the Lutherans there were soon followers of Zwingli and Calvin in the country. Five Lutheran towns in Upper Hun-

gary accepted the Augsburg Confession. Calvinism, however, gradually won the upper hand, although the domestic disputes between the reforming sects by no means ceased.

In Transylvania merchants from Hermannstadt, who had become acquainted with Luther's heresy at Leipzig, spread the Reformation after 1521. Notwithstanding the persecution of the Reformers, a Lutheran school was started at Hermannstadt, and the nobility endeavoured to use the Reformation as a means of confiscating the property of the clergy. In 1529 the regular orders and the most vigorous champions of the Church were driven from the town. At Kronstadt the Lutheran preacher Johann Honter gained the ascendancy in 1534, the Mass being abolished and Divine service organized after the Lutheran model. At a synod held in 1544 the Saxon nation in Transylvania decided in favour of the Augsburg Confession, while the rural Magyars accepted Calvinism. At the Diet of Klausenburg in 1556 general religious freedom was granted, and the ecclesiastical property confiscated for the defence of the country and the erection of Lutheran schools. Among the supporters of the Reformation far-reaching divisions prevailed. Besides the Lutherans, there were Unitarians (Socinians) and Anabaptists, and each of these sects waged war against the others. A Catholic minority survived among the Greek Walachians.

F. Poland, Livonia, and Courland.—Poland learned of the Reformation first through some young students from Wittenberg and through the Bohemian and Moravian Brethren. Archbishop Laski of Gnesen and King Sigismund I (1501–48) energetically opposed the spread of heretical doctrines. However, the supporters of the Reformation succeeded in winning recruits at the University of Cracow, at Posen, and at Dantzic. From Dantzic the Reformation spread to Thorn and Elbing, and certain nobles favoured the new doctrines. Under the rule of the weak Sigismund II (1548–72) there were in Poland, besides the Lutherans and the Bohemian Brethren, Zwinglians, Calvinists, and Socinians. Prince Radziwill and John Laski favoured Calvinism, and the Bible was translated into Polish in accordance with the views of this party in 1563. Despite the efforts of the papal nuncio, Aloisius Lippomano (1556–58) free practice of religion was secretly granted in the above-mentioned three cities, and the nobility were allowed to hold private religious services in their houses. The different Reformed sects fought among one another, the formula of faith introduced at the General Synod of Sandomir in 1570 by the Reformed, the Lutherans, and the Bohemian Brethren producing no unity. In 1573 the heretical parties secured the religious peace of Warsaw, which granted equal rights to Catholics and "Dissidents", and established permanent peace between the two sections. By the zealous inauguration of true ecclesiastical reform, the diligent activity of the papal legates and able bishops, and the labours of the Jesuits, further progress of the Reformation was prevented.

In Livonia and Courland, the territories of the Teutonic Order, the course of the Reformation was the same as in the other territory of the order, Prussia. Commander Gotthard Kettler of Courland embraced the Augsburg Confession, and converted the land into a secular hereditary duchy, tributary to Poland. In Livonia Commander Walter of Plettenberg strove to foster Lutheranism, which had been accepted at Riga, Dorpat, and Reval since 1523, hoping thus to make himself independent of the Archbishop of Riga. When Margrave William of Brandenburg became Archbishop of Riga in 1539, Lutherism rapidly obtained exclusive sway in Livonia.

G. Netherlands.—During the reign of Charles V the seventeen provinces of the Netherlands remained fairly immune from the infection of the new doctrine.

Several followers of Luther had indeed appeared there, and endeavoured to disseminate the Lutheran writings and doctrines. Charles V, however, issued strict edicts against the Lutherans and against the printing and spreading of the writings of the Reformer. The excesses of the Anabaptists evoked the forcible suppression of their movement, and until 1555 the Reformation found little root in the country. In this year Charles V granted the Netherlands to his son Philip II, who resided in the country until 1559. During this period Calvinism made rapid strides, especially in the northern provinces. Many of the great nobles and the much impoverished lower nobility used the Reformation to incite the liberty-loving people against the king's administration, the Spanish officials and troops, and the strictness of the government. Disaffection continued to increase, owing chiefly to the severe ordinances of the Duke of Alva and the bloody persecution conducted by him. William of Orange-Nassau, governor of the Province of Holland, aimed for political reasons at securing the victory for Calvinism, and succeeded in several of the northern districts. He then placed himself at the head of the rebellion against the Spanish rule. In the ensuing war the northern provinces (*Niederlande*) asserted their independence, whereupon Calvinism gained in them the ascendancy. In 1581 every public exercise of the Catholic Faith was forbidden. The "Belgian Confession" of 1562 had already a Calvinistic foundation; by the synods of Dordrecht in 1574 and 1618 Calvinism received a fixed form. The Catholics of the country (about two-fifths of the population) were subjected to violent suppression. Among the Calvinists of Holland violent conflicts arose concerning the doctrine of predestination.

H. England and Scotland.—The Reformation received its final form in England during the reign of Queen Elizabeth (1558–1603). On the basis of the liturgy established in the "Book of Common Prayer" under Edward VI (1547–53) and the confession of Forty-two Articles composed by Archbishop Cranmer and Bishop Ridley in 1552, and after Queen Mary (1553–58) had failed to restore her country to union with Rome and the Catholic Faith, the ascendancy of Anglicanism was established in England by Elizabeth. The Forty-two Articles were revised, and, as the Thirty-nine Articles of the Anglican Church, became in 1562 the norm of its religious creed. The ecclesiastical supremacy of the queen was recognized, an oath to this effect (Oath of Supremacy) being required under penalty of removal from office and loss of property. Several prelates and the universities offered resistance, which was overcome by force. The majority of the lower clergy took the oath, which was demanded with ever-increasing severity from all members of the House of Commons, all ecclesiastics, barristers, and teachers. In externals much of the old Catholic form of worship was retained. After the failure of the movement in favour of Mary Stuart of Scotland, who had fled to England in 1568, the oppression of the English Catholics was continued with increasing violence. Besides the Anglican Established Church there were in England the Calvinistic Nonconformists, who opposed a presbyterian popular organization to the episcopal hierarchy; like the Catholics, they were much oppressed by the rulers of England.

In Scotland the social and political situation gave a great impetus to the Reformation, aided by the ignorance and rudeness of the clergy (to a great extent the result of the constant feuds). The nobility used the Reformation as a weapon in their war against the royal house, which was supported by the higher clergy. Already under James V (1524–42) supporters of the Lutheran doctrines (e. g. Patrick Hamilton, Henry Forest, and Alexander

Seton, the king's confessor, came forward as Reformers. The first two were executed, while the last fled to the Continent. However, the heretical doctrines continued to find fresh adherents. On the death of James V his daughter and heiress was only eight days old. The office of regent fell to James Hamilton, who, though previously of Protestant sentiments, returned to the Catholic Church and supported Archbishop David Beaton in his energetic measures against the innovators. After the execution of the Reformer George Wishart, the Protestants formed a conspiracy against the archbishop, attacked him in his castle in 1545, and put him to death. The rebels (among them John Knox), joined by 140 nobles, then fortified themselves in the castle. Knox went to Geneva in 1546, there embraced Calvinism, and from 1555 was the leader of the Reformation in Scotland, where it won the ascendancy in the form of Calvinism. The political confusion prevailing in Scotland from the death of James V facilitated the introduction of the Reformation.

V. **DIFFERENT FORMS OF THE REFORMATION.**—The fundamental forms of the Reformation were Lutheranism, Zwinglianism, Calvinism, and Anglicanism. Within each of these branches, however, conflicts arose in consequence of the diverse views of individual representatives. By negotiations, compromises, and formulae of union it was sought, usually without lasting success, to establish unity. The whole Reformation, resting on human authority, presented from the beginning, in the face of Catholic unity of faith, an aspect of dreary dissension. Besides these chief branches appeared numerous other forms, which deviated from them in essential points, and gradually gave rise to the countless divisions of Protestantism. The chief of these forms may be here shortly reviewed (for further treatment see the separate articles).

A. *The Anabaptists*, who appeared in Germany and German Switzerland shortly after the appearance of Luther and Zwingli, wished to trace back their conception of the Church to Apostolic times. They denied the validity of the baptism of children, saw in the Blessed Eucharist merely a memorial ceremony, and wished to restore the Kingdom of God according to their own heretical and mystical views. Though attacked by the other Reformers, they won supporters in many lands. From them also issued the Mennonites, founded by Menno Simonis (d. 1561).

B. *The Schwenkfeldians* were founded by Kaspar of Schwenkfeld, aulic councillor of Duke Frederick of Liegnitz and canon. At first he associated himself with Luther, but from 1525 he opposed the latter in his Christology, as well as in his conception of the Eucharist and his doctrine of justification. Attacked by the German reformers, his followers were able to form but a few communities. The Schwenkfeldians still maintain themselves in North America.

C. *Sebastian Franck* (b. 1499; d. 1542), a pure spiritualist, rejected every external form of ecclesiastical organization, and favoured a spiritual, invisible Church. He thus abstained from founding a separate community, and sought only to disseminate his ideas.

D. *The Socinians and other Anti-Trinitarians.*—Some individual members of the early Reformers attacked the fundamental Christian doctrine of the Blessed Trinity, especially the Spaniard Miguel Servetus (Servetus), whose writing, "De Trinitatis erroribus", printed in 1531, was burned by Calvin in Geneva in 1553. The chief founders of Anti-Trinitarianism were Lælius Socinus, teacher of jurisprudence at Siena, and his nephew, Faustus Socinus. Compelled to fly from their home, they maintained

themselves in various parts, and founded special Socinian communities. Faustus disseminated his doctrine especially in Poland and Transylvania.

E. *Valentine Weigel* (b. 1533; d. 1588) and *Jacob Böhme* (d. 1624), a shoemaker from Görlitz, represented a mystical Pantheism, teaching that the external revelation of God in the Bible could be recognized only through an internal light. Both found numerous disciples. Böhme's followers later received the name of *Rosenkreuzer*, because it was widely supposed that they stood under the direction of a hidden guide named Rosenkreuz.

F. *The Pietists* in Germany had as their leader Philip Jacob Spener (b. 1635; d. 1705). Pietism was primarily a reaction against the barren Lutheran orthodoxy, and regarded religion mainly a thing of the heart.

G. *The Inspiration Communities* originated in Germany during the seventeenth and eighteenth centuries with various apocalyptic visionaries. They regarded the kingdom of the Holy Ghost as arrived, and believed in the universal gift of prophecy and in the millenium. Among the founders of such visionary societies were Johann Wilhelm Petersen (d. 1727), superintendent at Lüneberg, and Johann Konrad Duppel (b. 1734), a physician at Leiden.

H. *The Herrnhuter* were founded by Count Nicholas of Zinzendorf (b. 1700; d. 1760). On the Hutberg, as it was called, he established the community of Herrnhut, consisting of Moravian Brethren and Protestants, with a special constitution. Stress was laid on the doctrine of the Redemption, and strict moral discipline was inculcated. This community of Brethren spread in many lands.

I. *The Quakers* were founded by John George Fox of Drayton in Leicestershire (b. 1624; d. 1691). He favoured a visionary spiritualism, and found in the soul of each man a portion of the Divine intelligence. All are allowed to preach, according as the spirit incites them. The moral precepts of this sect were very strict.

J. *The Methodists* were founded by John Wesley. In 1729 Wesley instituted, with his brother Charles and his friends Morgan and Kirkham, an association at Oxford for the cultivation of the religious and ascetic life, and from this society Methodism developed.

K. *The Baptists* originated in England in 1608. They maintained that baptism was necessary only for adults, upheld Calvinism in its essentials, and observed the Sabbath on Saturday instead of Sunday.

L. *The Swedenborgians* are named after their founder Emmanuel Swedenborg (d. 1772), son of a Swedish Protestant bishop. Believing in his power to communicate with the spirit-world and that he had Divine revelations, he proceeded on the basis of the latter to found a community with a special liturgy, the "New Jerusalem". He won numerous followers, and his community spread in many lands.

M. *The Irvingites* are called after their founder, Edward Irving, a native of Scotland and from 1822 preacher in a Presbyterian chapel in London.

N. *The Mormons* were founded by Joseph Smith, who made his appearance with supposed revelations in 1822.

Besides these best-known secondary branches of the Reformation movement, there are many different denominations; for from the Reformation the evolution of new forms has always proceeded, and must always proceed, inasmuch as subjective arbitrariness was made a principle by the heretical teaching of the sixteenth century.

VI. **RESULTS AND CONSEQUENCES OF THE REFORMATION.**—The Reformation destroyed the unity of faith and ecclesiastical organization of the Christian peoples of Europe, cut many millions off from the true Catholic Church, and robbed them of

the greatest portion of the salutary means for the cultivation and maintenance of the supernatural life. Incalculable harm was thereby wrought from the religious standpoint. The false fundamental doctrine of justification by faith alone, taught by the Reformers, produced a lamentable shallowness in religious life. Zeal for good works disappeared, the asceticism which the Church had practised from her foundation was despised, charitable and ecclesiastical objects were no longer properly cultivated, supernatural interests fell into the background, and naturalistic aspirations, aiming at the purely mundane, became widespread. The denial of the Divinely instituted authority of the Church, both as regards doctrine and ecclesiastical government, opened wide the door to every eccentricity, gave rise to the endless division into sects and the never-ending disputes characteristic of Protestantism, and could not but lead to the complete unbelief which necessarily arises from the Protestant principles. Of real freedom of belief among the Reformers of the sixteenth century there was not a trace; on the contrary, the greatest tyranny in matters of conscience was displayed by the representatives of the Reformation. The most baneful Cæsaropapism was meanwhile fostered, since the Reformation recognized the secular authorities as supreme also in religious matters. Thus arose from the very beginning the various Protestant "national Churches", which are entirely discordant with the Christian universalism of the Catholic Church, and depend, alike for their faith and their organization, on the will of the secular ruler. In this way the Reformation was a chief factor in the evolution of royal absolutism. In every land, into which it found ingress, the Reformation was the cause of indescribable suffering among the people; it occasioned civil wars which lasted decades, with all their horrors and devastations; the people were oppressed and enslaved; countless treasures of art and priceless manuscripts were destroyed; between members of the same land and race the seed of discord was sown. Germany in particular, the original home of the Reformation, was reduced to a state of piteous distress by the Thirty Years' War, and the German Empire was thereby dislodged from the leading position which it had for centuries occupied in Europe. Only gradually, and owing to forces which did not essentially spring from the Reformation, but were conditioned by other historical factors, did the social wounds heal, but the religious corrosion still continues despite the earnest religious sentiments which have at all times characterized many individual followers of the Reformation.

J. P. KIRSCH.

Reformed Churches, the name given to Protestant bodies which adopted the tenets of Zwingli and, later, the doctrinal principles of Calvin. This distinctive title originated in 1561 at the colloquy of Poissy. Initiated in Switzerland, the movement from which the Churches sprang gained ground at an early date in France, some German states, the Netherlands, England, Scotland, Hungary, and Poland. Later, emigration and colonization secured a still wider diffusion of the Calvinistic system. Some of the denominations which adopted it go to-day under

a special name, e. g. Presbyterianism: they receive separate treatment in this work. Others became national churches and are mentioned under the name of the country in which they exist. (See ZWINGLIANISM; CALVINISM; REFORMATION; ARMINIANISM; HOLLAND; NETHERLANDS; HUGUENOTS; SCOTLAND, etc.). The following bodies are here considered:

I. THE REFORMED (DUTCH) CHURCH IN AMERICA. —(1) *Name, Doctrinal Standards, and Organization.* —The denomination known as "The Reformed Protestant Dutch Church in North America" until 1867, when the present name was adopted, asserts with Protestants generally the sole sufficiency of the Scriptures as a rule of faith. Its recognized theological standards are the Apostles', Nicene, and Athanasian Creeds, the Belgic Confession, the Heidelberg Catechism, and the Canons of the Synod of Dort. It believes in the spiritual reception of Jesus Christ by the believer in the Lord's Supper, and also accepts the distinctively Calvinistic doctrine of a limited election to salvation. The liturgy is characterized by great simplicity; its forms are optional, except in the administration of the sacraments. In polity, the Church is Presbyterian; the constitution recognizes four kinds of officers: ministers of the word, professors of theology, elders, and deacons. The elders exercise spiritual functions and the deacons are in charge of temporal interests. At the head of individual congregations is the Consistory, which is composed of minister, elders, and deacons. The authority over a district is vested in the *Classis* which is itself under the jurisdiction of the Particular Synod. The General Synod exercises supreme control in the Church. The elders and deacons are elected to office for two years, after which they may be re-elected. Former elders and deacons may be called together for consultation in what is known as the "Great Consistory". The other Reformed Churches especially treated in this article are similarly constituted and organized.

(2) *History.* —The Dutch Reformed Church was organized among settlers from Holland in New York City in 1628 by Rev. Jonas Michaelius. Fifty communicants were present at the first celebration of the Lord's Supper. When, in 1664, the colony passed from Dutch into English hands, 11 Reformed churches, with an approximate membership of 10,000 souls, existed in the country; they were all situated in New York and neighbouring states. By the terms of surrender the Dutch were granted "the liberty of their consciences in divine worship and in church discipline". During the first decade of English occupation this provision was faithfully observed. Later, however, the governors sought to impose English ecclesiastical customs upon their Dutch subjects, in consequence of which much bitterness was engendered, and a prolonged struggle ensued. In spite of this unfavourable circumstance and the cessation of Dutch immigration, the number of churches, at the beginning of the eighteenth century, had increased to thirty-four. They were under the jurisdiction of the *Classis* of Amsterdam. In 1738 a petition for the authorization of a *cætus*, or ecclesiastical assembly, was sent to that body. But it was only after nine years that a favourable reply was received. This was the first step towards independence, which was completely realized in 1755 by the authorized formation of a *classis*. This action of some members of the *cætus* led to protracted strife, which was to be healed by the plan of union submitted by the Rev. J. H. Livingston in 1771 and accepted by the American Dutch churches and the *Classis* of Amsterdam. After the troublous times of the Revolution, the internal organization was further perfected in 1792 by the adoption of a constitution, which provided for a General Synod. In 1794, this synod met for the first time; it held triennial sessions until 1812, and

then became an annual and representative body. A period of increased prosperity opened for the denomination in 1846, when numerous Hollanders settled in the Middle West and connected themselves with the church. In 1910 the Dutch Reformed Church numbered 728 ministers, 684 churches, and 116,815 communicants (statistics of Dr. Carroll in the "Christian Advocate", New York, 26 Jan., 1911; this statistical authority is cited throughout for the United States). Through the emigration just referred to, the Christian Reformed Church was also transplanted to America. This denomination was organized in Holland (1835) as a protest against the rationalistic tendencies of the State Church. To it were joined in the United States in 1890 the diminishing members of the True Reformed Church, a body organized in 1822 by several clergymen. It numbers to-day 138 ministers, 189 churches, 29,006 communicants.

(3) *Educational Institutions and Missionary Activity*.—Some of the educational institutions controlled by the Church were established at a very early date. Rutgers College was founded in 1770 under the name of Queen's College at New Brunswick, New Jersey, where a theological seminary was also established in 1784. At Holland, Michigan, Hope College was founded in 1866, and the Western Theological Seminary in 1867. A board of education organized by private persons in 1828 was taken over by the General Synod in 1831; it extends financial assistance to needy students for the ministry. A "Disabled Ministers' Fund" grants similar aid to clergymen, and a "Widows' Fund" to their wives. A Board of Publication has been in operation since 1855. The proselytizing activity of the Church is not confined to America; a Board of Foreign Missions established in 1832 was supplemented in 1875 by a Woman's Auxiliary Board. The Church maintains stations at Amoy, China, in the districts of Arcot and Madura, India, in Japan, and Arabia.

II. THE REFORMED (GERMAN) CHURCH IN THE UNITED STATES.—This church was founded by immigrants from the Palatinate and other German districts of the Reformed faith. Its history begins with the German immigration of the last quarter of the seventeenth century. Among its early ministers were Philip Boehm and George M. Weiss, whose fame is eclipsed, however, by that of the real organizer of the Church, Michael Schlatter. The latter visited most of the German Reformed settlements, instituted pastors, established schools, and, in 1747, formed the first coetus. On a subsequent journey through Europe he obtained financial aid for the destitute churches by pledging the submission of the coetus to the Classis of Amsterdam. Six young ministers accompanied him to America in 1752; the supply of clergymen, however, was insufficient for many years and resulted in some defections. In 1793 the synod replaced the coetus and assumed supreme authority in the church, which now comprised approximately 180 congregations and 15,000 communicants. The process of organization was completed in 1819 by the division of the synod into districts or classes. About 1835 the "Mercersburg controversy", concerning certain theological questions, agitated the Church; in 1863 the tercentenary of the adoption of the Heidelberg Catechism was celebrated. From this time dates the foundation of orphans' homes in the denomination. Foreign mission work was inaugurated in 1879 by the sending of missionaries to Japan. The first theological seminary was organized in 1825 at Carlisle, Pennsylvania; it was removed in 1836 to Mercersburg, and in 1871 to Lancaster, Pennsylvania. The Church also controls Heidelberg University and Western Theological Seminary (both at Tiffin, Ohio), Ursinus College (Collegeville, Pa.), Catawba College (North Carolina), and several other educational institutions of advanced

grade. Its present membership is 297,116 communicants with 1226 ministers and 1730 churches. The Hungarian Reformed Church, which numbers at present 5253 communicants, was organized in 1904 in New York City for the convenience of Hungarian-speaking immigrants.

III. THE REFORMED CHURCHES IN THE UNION OF SOUTH AFRICA.—Dutch settlers transplanted the Reformed faith to South Africa as early as 1652. Churches of some importance at present exist in the country and are organized as the Reformed Churches of Cape Colony, of the Orange Free State, of the Transvaal, and of Natal. The progress in political union favourably influenced church affairs: in 1906 these separate bodies placed themselves under a federal council, and in 1909 under a general synod. Their collective membership amounts to about 220,000 communicants. The movement towards union had been preceded by secessions caused by liberal and conservative theological tendencies. As a representative of conservatism the "Reformed Church in South Africa" was organized in 1859 by the Rev. D. Postma. It has to-day an aggregate membership of about 16,000 communicants distributed through Cape Colony, the Orange Free State, and Transvaal. An offshoot of the liberal spirit is the separatist "Reformed Church of the Transvaal", which was organized by the Rev. Van der Hoff and has at present about 10,000 communicants.

N. A. WEBER.

Reform of a Religious Order, in the true sense of the word, is a return or bringing back of the order from a mitigated or relaxed observance to the rigour of its primitive rule. It must be premised that mitigations of the primitive rule may be made quite lawfully (a) by the authority of the Holy See; (b) by decree of the superiors of the order itself, so far as they have power to modify its rule and observance; (c) by prescription or custom lawfully established, so long as such relaxations do not affect the vows of the religious. On the other hand, the obligations arising directly from the vows made by the religious cannot be modified by custom or prescription, and the abolition of abuses in such matters is not "reform" in the proper sense of the word. In cases where the mitigation or modification of the rule has been brought about by legitimate authority reform may be instituted either by the Holy See or by the general chapter (or other legislative body) of the order itself. All those who shall make their profession after the reform has been decreed are bound to submit to it. Those previously professed are held not to be bound to the reformed observance if the previous mitigations were introduced legitimately. If, however, the mitigations reformed have been caused by neglect on the part of the superiors of the order, or have been introduced with their connivance, then those professed before the reform are bound to observe it. In practice, the Holy See is wont to use great discretion in this matter and prefers to invite or recommend the older religious to adopt the stricter rule. The principle underlying this is that no religious can be held bound beyond the limits to which he may be presumed to have intended to bind himself when he made his vows.

G. ROGER HUDLESTON.

Refuge, CITIES OF, towns which according to the Jewish law enjoyed the right of asylum and to which anyone who had unintentionally slain another might flee and be protected from the "avenger of blood". The barbarous custom of blood-revenge still exists among the Arab tribes. In virtue of it the kinsman of anyone put to death considers it a duty to avenge him by killing the intentional or even unintentional slayer. The Biblical cities of refuge were six in number, viz., to the west, Cedes in Galilee, Sichem in Mount Ephraim, and Hebron in the south; to the east, beyond the Jordan, Bosor, which is in the plain of the tribe of Ruben, Ramoth in Galaad of the tribe of Gad, and Gaulon in Basan of the tribe of Manasses (Josue xx, 7-8). It appears from Deut., xix, 2, 7, and from other considerations that three cities were originally intended—those to the west—which were probably established in the time of Josias, when the boundaries and population of the Jewish state were comparatively small. When in post-Exilic times the Jews covered a wider area, the other three were doubtless added, as we find the number stated as six in Numbers (xxxv, 6) and Josue (xx, 7-8).

The right of asylum was recognized in the Old Testament, but under conditions that are carefully laid down in the Jewish law. One who had treacherously and intentionally sullied his hands with blood was allowed to find no refuge at the altar of God. Indeed he might be taken away from it to death (Ex., xxi, 14). He might even be struck down at the altar, as in the case of Joab (III Kings, ii, 30, 31, 34). Protection was granted to those who had unintentionally taken the life of another (Deut., xix, 2-7). In order to justify his claim to immunity the fugitive had to prove to the authorities of the sanctuary or town that his deed was unpremeditated. After submitting his evidence he was allowed to remain within the prescribed precincts. He could not return to his old home, nor could he appease the avenger by money. Thus some expiation for his imprudence was exacted, and he became virtually a prisoner within the boundaries of the city to which he had fled. He could leave it only at the risk of his life at the hands of the avenger of blood. We are not informed by what means he was supported in the city of refuge, but probably he was obliged to work for his subsistence. Whether his family could join him in his exile is also a matter of mere conjecture. It is generally maintained that originally every altar or sanctuary in the land could extend its protection to anyone who had unintentionally taken the life of another. But with the suppression of the provincial high places and altars by Josiah (B. C. 621) the right of asylum naturally fell with them, and provision was made for a continuance of the ancient usage on a modified basis by the selection of certain cities of refuge.

JAMES F. DRISCOLL.

Refuge, SISTERS OF OUR LADY OF CHARITY OF THE.—The Institute of Our Lady of Charity was founded (1641) by the Venerable Père Eudes, at Caen, Normandy, under the title of Our Lady of Refuge. Moved by pity for abandoned women living a life of sin, Père Eudes at first attempted to unite the penitent among them and place them under the care of good and zealous women, but he soon became convinced that the only way of dealing with them was to found a congregation of holy women, who would bind themselves by vow to work for the reformation of these unfortunate ones. Three Visitation nuns came to his aid temporarily, and, in 1644, a house was opened at Caen under the title of Our Lady of Charity. Other ladies joined them, and, in 1651, the Bishop of Bayeux gave the institute his approbation. In 1664 a Bull of approbation was obtained from Alexander VII. That same year a house was opened at Rennes,

and the institute began to spread. When the French Revolution broke out there were seven communities of the order in France. From this parent-tree of Our Lady of Charity sprang the Order of the Good Shepherd (q. v.).

The Sisters of Our Lady of Charity do not limit their work to reclaiming the fallen; they also receive girls who are in danger of being lost or who are being brought up immorally. These form what is called the class of preservation. Government reformatories are attached to some of the monasteries. All the houses of this order are independent of each other, and each has its own novitiate, but the mother-house is still at Caen. The nuns wear a white habit and a large silver cross on the breast. To the three ordinary religious vows they add a fourth, viz., to devote themselves to the reformation of the fallen. The novitiate lasts two years. These sisters came to England in 1863 and now have houses at Bartestree, Waterlooville, Monmouth, Southampton, Northfield (near Birmingham), and Mold; in Ireland they have two houses at Dublin; in France they have seventeen: one at Caen, St-Brieux, Rennes, La Rochelle, Paris, Versailles, Nantes, Lyons, Valence, Toulouse, Le Mans, Blois, Montauban, Besançon, Valognes, and two at Marseilles; in the United States they have two houses at both Buffalo and Pittsburg, and one at Green Bay (Wisconsin), Wheeling (W. Virginia), Hot Springs (Arkansas), San Antonio and Dallas (Texas); in Canada they have houses at Ottawa, Toronto, and Vancouver; in Mexico, two; in Italy, one at Loretto; in Spain, one at Bilboa, and in Austria, one at Salzburg.

FRANCESCA M. STEELE.

Régale, DROIT DE (*jus regalæ, jus regale, jus deportus*; Germ. *Regalienrecht*), originally denoted those rights that belonged exclusively to the king, either as essential to his sovereignty (*jura majora, jura essentialia*), such as royal authority; or accidental (*jura minora, jura accidentalia*), such as the right of the chase, of fishing, mining, etc. By abuse, many sovereigns in the Middle Ages and in later times claimed the right to seize the revenues of vacant sees or imperial abbeys, and gradually *jus regalæ* came to be applied almost exclusively to this assumed right. It is a matter of dispute on what ground the temporal rulers claimed these revenues. Some hold that it is an inherent right of sovereignty; others, that it is a necessary consequence of the right of investiture; others make it part of the feudal system; still others derive it from the advowson, or right which patrons or protectors had over their benefices. Ultimately, it had its origin in the assumption that bishoprics and imperial abbeys, with all their temporalities and privileges, were royal estates given as fiefs to the bishops or abbots, and subject to the feudal laws of the times. At first the right was exercised only during the actual vacancy of a see or abbey, but later it was extended over the whole year following the death of the bishop or abbot. Often the temporal rulers also claimed the right to collate all the benefices that became vacant during the vacancy of a diocese, with the exception of those to which the care of souls was attached.

It is difficult to determine when and where the *jus regale* was first exercised. In the Western Frankish Empire it made its first appearance probably towards the end of the Carolingian dynasty, that is, in the course of the tenth century. The first historical mention we find of it is in connexion with King William II (Rufus) of England, who, after the death of Lanfranc in 1089, kept the archiepiscopal See of Canterbury vacant for more than three years, during which period the king seized all the archiepiscopal revenues. During the reign of Henry II (1154-89) it had become an established practice for

the King of England to take possession of the revenues of all vacant dioceses. That the pope did not recognize the right is manifest from the fact that Alexander III condemned article 12 of the Council of Clarendon (1164), which provided that the king was to receive, as of seigniorial right (*sicut dominicos*), all the income (*omnes redditus et exitus*) of a vacant archbishopric, bishopric, abbacy, or priory in his dominion (Mansi, XXI, 1195). In 1176 Henry II promised the papal legate never to exercise the right of regalia beyond one year. With the exception of a few short periods, the right continued to be exercised by the English kings until the Reformation. Even at present the English Crown exercises it over the temporalities of vacant (Anglican) dioceses.

In Germany Henry V (1106–25), Conrad III (1138–52), and Frederic I (1155–89) are known as the first to have claimed it. Frederic I exercised it in its utmost rigour and styles it “an ancient right of kings and emperors” (Lacomblet, “*Urkundenbuch für die Geschichte des Niederrheins*”, I, 288). King Philip of Suabia reluctantly renounced it, together with the *jus spolii*, to Innocent III in 1203 (Mon. Germ.: Const., II, 9). Otho IV did the same in 1209 (*ibid.*, 37). King Frederic II renounced it to Innocent III, first at Eger, on 12 July, 1213 (*ibid.*, 58, 60), then in the Privilege of Würzburg, in May, 1216 (*ibid.*, 68), and again to Honorius III, at Hagenau, in September, 1219 (*ibid.*, 78). In 1238 he began to exercise it anew (*ibid.*, 285), but only during the actual vacancy of dioceses, not for a whole year, as he had done previously. After the death of Frederic II the claims of the German Emperors to this right gradually ceased. At present the revenues of vacant dioceses in Prussia go to the succeeding bishop; in Bavaria, to the cathedral church; in Austria, to the “Religionsfond”.

In France we find the first mention of it during the reign of Louis VII, when, in 1143, St. Bernard of Clairvaux complains, in a letter to the Bishop of Palestrina, that in the Church of Paris the king had extended the *droit de régale* over a whole year (ep. 224, P. L., CLXXXII, 392). Pope Boniface VIII, in his famous Bull, “*Ausculta fili*”, of 5 December, 1301, urged Philip the Fair to renounce it, but without avail. In France the right did not belong exclusively to the king: it was also exercised by the Dukes of Normandy, Bretagne, and Burgundy, and by the Counts of Champagne and Anjou. Entirely exempt from it were the ecclesiastical provinces of Bordeaux, Auch, Narbonne, Arles, Aix, Embrun, and Vienne. The Second Council of Lyons (1274) forbade anyone, under pain of excommunication, to extend the *jus regalæ* over any diocese which was at that time exempt from it (Mansi, XXIV, 90), and in 1499 Louis XII gave strict orders to his officials not to exercise it over exempt dioceses. Towards the end of the sixteenth century the restriction of the Council of Lyons began to be disregarded, and on 24 April, 1608, the Parliament decided that the king had the *droit de régale* over all the dioceses of France; but Henry IV did not carry this parliamentary decision into effect. On 10 February, 1673, Louis XIV issued a declaration, extending the *droit de régale* over all France. The Parliament was pleased, and most bishops yielded without serious protest, only Pavillon, of Alet, and Caulet, of Pamiers, both Jansenists, resisting. These at first sought redress through their metropolitans, but when the latter took the king's side they appealed, in 1677, to Innocent XI. In three successive Briefs the pope urged the king not to extend the right to dioceses that had previously been exempt. The General Assembly of the French clergy held at Paris in 1681–2 sided with the king, and, despite the protests of Innocent XI, Alexander VIII, and Innocent XII, the right was maintained until the Revolution. Napoleon I attempted to restore it in

a decree dated 6 November, 1813, but his downfall in the following year frustrated his plan. In 1880 the Third Republic again asserted the right, overstepping even the limits of its former application.

MICHAEL OTT.

Regalia.—According to the usage current in the British Isles the term *regalia* is almost always employed to denote the insignia of royalty or “crown jewels”. The objects more immediately included under the collective term as commonly used are the following: the crown, the sceptre with the cross, the sceptre with the dove, the orb, the sword, the ring, the spurs, also the vestments in which the sovereign is arrayed after the unction, to wit the *colobium sindonis*, the dalmatic, the armill, and the royal robe, or pall, as well as a few other miscellaneous objects connected with the coronation ceremony, such as the *ampulla* for the oil, with the spoon, “St. Edward's staff”, etc. All of these descend from pre-Reformation days, and many of them are directly religious in origin. Indeed there was a tendency not only in England, but also in Germany, France, and elsewhere, to connect these insignia with some saintly and sometimes legendary possessor of a former age, and to regard them strictly as relics. In point of fact all the English regalia were broken up and sold after the execution of Charles I, and the oldest of those now in existence had to be constructed anew at the Restoration in 1661; but it had always been the custom of old to regard them or most of them as connected with St. Edward the Confessor, to whose shrine in Westminster Abbey, where the coronation takes place, they were regarded as belonging. Even now the royal crown which the archbishop places on the king's head is still spoken of in a marginal note to the coronation service as “St. Edward's Crown”, while we find in a chronicle of the fourteenth century, the “*Annales Paulini*”, a vehement protest made in connexion with the coronation of King Edward II that the unworthy favourite Piers Gaveston should have been suffered to carry the “Crown of St. Edward” with his “polluted hands” (*inquinatis manibus*).

Most of the regalia enumerated above call for no special comment, but with regard to some few, the significance of which has been misrepresented by Anglican writers with a more or less controversial purpose, a few words are necessary. To begin with, it has been pretended that the vestures in which the king is arrayed are the vestments of a bishop, and indicate an intention to endow the monarch with an ecclesiastical character. This contention forms part of a theory propounded by a prominent Anglican liturgist, Dr. Wickham Legg, that the king according to the medieval view was *mixta persona* (i. e., both layman and ecclesiastic) and therefore *spiritualis jurisdictionis capax* (a fit subject for spiritual jurisdiction). The underlying and indeed the avowed purpose was to show that although it cannot be denied that the king is the official head of the Church of England, still there is nothing unbecoming in such a relation because the king is a minister of the Church and consecrated to this special office by the Church herself. But the various arguments by which this contention is supported, and notably that based upon the supposed ecclesiastical character of the coronation vestments, are wholly fallacious. The *colobium sindonis* (alleged to be the equivalent of the alb) and the dalmatic, or *supertunica*, are simply the or-

dinary dress of the later Roman Empire, and they did not acquire their liturgical character until after they had become the customary apparel of emperors on state occasions. This form of underclothing can be plainly traced in the consular diptychs upon which the consuls are represented as presiding at the games. In these same diptychs the most prominent feature in the official vesture is an elaborately embroidered scarf which hangs down perpendicularly in front, passes round the body, and falls over the left arm. This scarf is called the *lorum*. It is almost certainly the ancestor of the archiepiscopal pallium, but it remained for long centuries, as numberless Byzantine paintings and sculptures show, the most conspicuous element in the imperial state costume. There is serious reason to believe, though the details cannot be gone into here, that the *lorum* is represented by the "armill", though this is now a sort of stole which two or three centuries back was tied at the elbows. The address originally made at the delivery of the armill declared it to be a symbol of the "Divine enfolding" (*divinæ circumdationis*), which agrees much better with a wrap like the *lorum* than with a stole or bracelet. Again "the Robe Royal or Pall of cloth of gold", which is embroidered with eagles, cannot with any reason be described as an ecclesiastical cope. It certainly represents the royal mantle which was originally a four-square garment fastened with a clasp over the right shoulder, such as is seen to recur several times in the carvings of the ivory book-cover of Queen Melisende now in the British Museum; such also as was found vesting the body of Edward I when his tomb was opened in 1774.

Not less misleading is the interpretation recently attached to one of the three swords carried before the king and known as the "sword of the spirituality" or "the sword of the Church". This does not in any way represent, as contended, a claim to exercise jurisdiction over the Church, but it only symbolizes the solemn promise of the king to protect the Church. There were three such promises originally made by the king: the first to defend and secure peace for the Church; the second to punish wrong-doers; and the third to show justice and mercy in all his judgments. Now the three swords, now and anciently borne before the king at his coronation, were known as the sword of the clergy, the sword of the laity, and the third (*curtana*), which has no point, the sword of mercy. There is every reason to believe that these three swords typify the matter of the king's three ancient promises. As for the sword with which the king himself is girded in the coronation ceremony, this was originally in imperial coronations at Rome laid upon the tomb of Blessed Peter and, like the archbishop's pallium, presented as *de corpore beati Petri sumptum* and consequently as a kind of relic of the Prince of the Apostles, in whose name and to defend whose authority the power of the sword is given to rulers by the Church. A theory that the orb is only a variant of the sceptre with a cross is now generally rejected, and with reason.

The questions here discussed are misleadingly treated in most manuals dealing with the coronation, e. g., LEGG, *The Coronation Records* (London, 1902); DAVENPORT, *The English Regalia* (London, 1897); JONES, *Crown and Coronations* (London, 1902). The reader may be referred for a fuller discussion to THURSTON, *The Coronation Ceremonial* (London, 1911); or IDEM, *Is the Crowned King an Ecclesiastical Person?* in *Nineteenth Century and After* (March, 1902). For the archaeological data regarding the regalia, the above works of DAVENPORT and LEGG are of value. For the German regalia see especially BOCK, *Die Kleinodien des heil. Röm. Reiches* (Vienna, 1864); and FRENDSORFF, *Zur Geschichte der deutschen Reichsinsignien in the Nachrichten der Göttingen Academy* (1897).

HERBERT THURSTON.

Regeneration (Lat. *regeneratio*, Gr. ἀναγέννησις and παλιγγενεσία) is a Biblico-dogmatic term closely connected with the ideas of justification, Divine son-

ship, and the deification of the soul through grace. Confining ourselves first to the Biblical use of the term, we find regeneration from God used in indissoluble connexion with baptism, which St. Paul expressly calls "the laver of regeneration" (Titus, iii, 5). In His discourse with Nicodemus (John, iii, 5), the Saviour declares: "Unless a man be born again of water and the Holy Ghost, he cannot enter into the kingdom of God." In this passage Christianity from its earliest days has found the proof that baptism may not be repeated, since a repeated regeneration from God is no less a contradiction than repeated physical birth from a mother. The idea of "birth from God" enjoys a special favour in the Joannine theology. Outside the Fourth Gospel (i, 12 sq.; iii, 5), the Apostle uses the term in a variety of ways, treating "birth of God" as synonymous now with the "doing of justice" (I John, ii, 29), now with "faith in Jesus Christ" (I John, v, 1, 4 sq.), and elsewhere deducing from it a certain "sinlessness" of the just (I John, iii, 9; v, 18), which, however, does not necessarily exclude from the state of justification the possibility of sinning (cf. Bellarmine, "De justificatione", III, xv). It is true that in all these passages there is no reference to baptism nor is there any reference to a real "regeneration"; nevertheless, "generation from God", like baptismal "regeneration", must be referred to justification as its cause. Both terms effectually refute the Protestant notion that there is in justification not a true annihilation, but merely a covering up of the sins which still continue (covering-up theory), or that the holiness won is simply the imputation of the external holiness of God or Christ (imputation theory).

The very idea of spiritual palingenesis requires that the justified man receive through the Divine generation a quasi-Divine nature as his "second nature", which cannot be conceived as a state of sin, but only as a state of interior holiness and justice. Thus alone can we explain the statements that the just man is assured "participation in the divine nature" (cf. II Peter, i, 4: *divinæ consortes naturæ*), becomes "a new creature" (Gal., v, 6; vi, 15), effects which depend on justifying faith working by charity, not on "faith alone" (*sola fides*). When the Bible elsewhere refers regeneration to the Resurrection of Jesus Christ (I Peter, i, 3) or to "the word of God who liveth and remaineth for ever" (I Peter, i, 23), it indicates two important external factors of justification, which have nothing to do with its formal cause. The latter text shows that the preaching of the Word of God is for the sinner the introductory step towards justification, which is impossible without faith, whereas the former text mentions the meritorious cause of justification, inasmuch as, from the Biblical standpoint, the Resurrection was the final act in the work of redemption (cf. Luke, xxiv, 46 sq.; Rom., iv, 25; vi, 4; II Cor., v, 16). To the above-mentioned ideas of regeneration, generation out of God, participation in the Divine nature, and re-creation, a fifth, that of Divine sonship, must be added; this represents the formal effect of justification and is crowned by the personal indwelling of the Holy Ghost in the justified soul (cf. Rom., v, 5; viii, 11; I Cor., iii, 16 sq.; vi, 19, etc.). Since, however, this Divine sonship is expressly described as a mere adoptive sonship (*filialio adoptiva*, *υιοθετία*; cf. Rom., viii, 15 sqq.; Gal., iv, 5), it is evident that "regeneration from God" implies no substantial emerging of the soul from the nature of God as in the case of the eternal generation of the Son of God (Christ), but must be regarded as an analogical and accidental generation from God.

As regards the use of the term in Catholic theology, no connected history of regeneration can be written, as neither Christian antiquity nor medieval Scholasticism worked consistently and regularly to develop this pregnant and fruitful idea. At every period, how-

ever, the Sacrament of Baptism was regarded as the specific sacrament of regeneration, a concept that was not extended to the Sacrament of Penance. Irenæus repeatedly interprets the Pauline term "re-creation" as the universal regeneration of mankind through the incarnation of the Son of God in the womb of the Blessed Virgin. The idea of regeneration in the sense of individual justification is most conspicuous in the writings of St. Augustine. With an unrivalled keenness, he evolved the essential distinction between the birth of the Son of God from the substance of the Father and the generation of the soul from God through grace, and brought together into an organic association regeneration, with its kindred ideas, and justification (cf. e. g. "Enarr. in Ps. xlix", n. 2 in "P. L.", XXXVI, 565). Like the Church, St. Augustine associates justification with faith working through charity, and refers its essence to the interior renewal and sanctification of the soul. Thus, St. Augustine is not only the precursor, but also the model of the Scholastics, who worked mainly on the ideas inherited from the great doctor, and contributed essentially to the speculative understanding of the mysterious process of justification. Adhering strictly to the Bible and tradition, the Council of Trent (Sess. VI, capp. iii-iv, in Denzinger-Bannwart, "Enchiridion", 10th ed., 1908, nn. 795-6) regarded regeneration as fundamentally nothing else than another name for the justification acquired through the Sacrament of Baptism. A characteristic view was that of the German Mystics (Eckhart, Tauler, Suso), who prefer to speak of a "birth of God in the soul", meaning thereby the self-annihilation of the soul submerging itself in the Divinity, and the resulting mystical union with God through love.

In Protestant theology, since the time of the Reformation, we meet great differences of opinion, which are of course to be referred to the various conceptions of the nature of justification. In entire accordance with his doctrine of justification by faith alone, Luther identified regeneration with the Divine "bestowal of faith" (*donatio fidei*), and placed the baptized infant on the same footing as the adult, although he could give no precise explanation as to the way in which the child at its regeneration in baptism could exercise justifying faith (cf. H. Cremer, "Taufe, Wiedergeburt und Kindertaufe", 2nd ed., 1901). Against the shallow and destructive efforts of Rationalism, which made its appearance among the Socinians about the end of the sixteenth century and later received a mighty impulse from English Deism, the German "Enlightenment", and French Encyclopedism, a salutary reaction was introduced by the Pietists during the seventeenth and eighteenth centuries. Leaving far behind the old Protestant view, the Pietists (Spener, A. H. Francke, Zinzendorf) referred regeneration to the personal experience of justification in union with a sincere conversion to a new life, consisting especially in charitable activity. German Pietism, systematically cultivated by the so-called *Hernhuter*, exercised a beneficial effect on English Methodism, which went about securing and strengthening regeneration in "methodical fashion", and which undoubtedly performed good service in the revival of Christian piety. Especially those sudden conversions—such as are even to-day striven for and highly prized in Methodist circles, the American revivals and camp meetings, the Salvation Army, and the German *Gemeinschaftsbewegung*, with all its excrescences and eccentricities—are preferentially given the title of regeneration (cf. E. Wacker, "Wiedergeburt und Bekehrung", 1893). Since Schleiermacher the variety and confusion of the views concerning the character of regeneration in learned literature have increased rather than diminished; it is indeed almost a case of everyone to his own liking. The greatest favour in Liberal and modern Positive theology is enjoyed by the

theory of Albert Ritschl, according to which the two distinct moments of justification and reconciliation hold the same relation to each other as forgiveness and regeneration. As soon as resistance to God is done away with in justification, and lack of trust in God—or, in other words, sin—is overcome in the forgiveness of sin, reconciliation with God and regeneration enter into their rights, thus inaugurating a new life of Christian activity which reveals itself in the fulfilment of all the obligations of one's station.

Turning finally to the non-Christian use of the term, we find "regeneration" in common use in many pagan religions. In Persian Mithraism, which spread widely in the West as a religion of the soldiers and officials under the Roman Empire, persons initiated into the mysteries were designated "regenerated" (*renatus*). While here the word retains its ethico-religious sense, there was a complete change of meaning in religions which taught metempsychosis or the transmigration of souls (Pythagoreans, Druids, Indians), in these the reincarnation of departed souls was termed "regeneration". This usage has not yet entirely disappeared, as it is current among the Theosophists (cf. E. R. Hull, "Theosophy and Christianity", Bombay, 1909; and in connexion therewith "Stimmen aus Maria-Laach", 1910, 387 sqq., 479 sqq.). This view should not be confounded with the use dating from Christ Himself, who (Matt., xix, 18) speaks of the resurrection of the dead on the last day as a regeneration (*regeneratio*).

Glorie in ihren inneren Zusammenhang* (Würzburg, 1878); TERRIEN, *La grâce et la gloire ou la filiation adoptive des enfants de Dieu étudiée dans sa réalité, ses principes, son perfectionnement et son couronnement* (2 vols., Paris, 1887); SCHEEBEN, *Dogmatik*, II (Freiburg, 1878); HEINRICH-GUTBERLET, *Dogmatische Theol.*, VIII (Mainz, 1897); PRAT, *La théologie de St. Paul* (Beauchesne, 1907); IDEM, *Dogmatik*, II (Paderborn, 1909). The best Protestant work is GENNICH, *Die Lehre von der Wiedergeburt in dogmengeschichtl. Beleuchtung* (1907).

J. POHLE.

Regensburg. See RATISBON, DIOCESE OF.

Regesta, PAPAL, are the copies, generally entered in special registry volumes, of the papal letters and official documents that are kept in the papal archives; the name, further, is also used to indicate the modern publications containing such documents in chronological order with careful summaries of their essential contents. The beginnings of the papal Regesta probably antedate Constantine. There is, it is true, no direct proof of the making and preservation of copies of the official documents of the Roman Church in this period. The growth of the correspondence of the papal see, however, is evident even by the end of the second century, from the controversy over the celebration of Easter, and is also shown about the middle of the third century by the disorders of the Decian persecution, by the dispute concerning heretical baptism, and by other occasions. Moreover, it was of importance for the officials of the Roman Church to have the opportunity to inspect its earlier correspondence and to be able to use it for similar cases. For these reasons there is hardly any doubt that from a very early date a copy was made of papal documents before their dispatch, and that the collection of these documents was preserved at the seat of the central administration of the Roman Church. This theory can all the more readily be accepted, as the highest officials of the Roman state administration, the imperial chancery, the Senate, the consuls, the provincial governments, had all official documents entered in such volumes and preserved in the archives. The books in which these documents were entered were called *commentarii*, *regesta*, the latter word from *regerere*, to inscribe. The existence of such papal Regesta can be positively proved for the fourth century and the succeeding era. In his polemic with

Rufinus ("Apolog. adv. Rufinum", III, xx) St. Jerome refers to the archive (*chartarium*) of the Roman Church, where the letter of Pope Anastasius I (399–401) on the controversy over the doctrines of Origen was preserved. There are also notices concerning the registration of papal letters in the documents of several popes of the fifth century. Thus Pope Zosimus in his letter of 22 Sept., 417, to the bishops of Africa refers to the fact that all the earlier negotiations with Cœlestius had been examined at Rome (Coustant, "Epist. Rom. Pontif.", 955). Consequently copies of the documents in question must have existed. From this time onwards it remained the fixed custom of the papal chancery to copy the official papers issued by it in registers.

From the centuries previous to the pontificate of Innocent III (1199–1216) there remain only fragments of the registry volumes of the papal chancery and these in large part merely in later copies. Nearly all the volumes of the papal Regesta up to the end of the twelfth century have disappeared. The frequent local warfare in Rome and the conflagrations from which the city suffered explain sufficiently the loss of the oldest records. The most important fragments of this period that have been preserved are the following: nearly 850 letters, in three groups, of the Regesta of Pope Gregory I (590–604). An investigation proved that the original Regesta consisted of fourteen papyrus volumes, corresponding to the number of years of the pontificate, which were arranged according to indictions; that each of these volumes was divided into twelve parts, before each of which the name of the corresponding month was written. In this way information is attained as to the plan of the earliest volumes of the papal Regesta. A manuscript of the Vatican archives contains letters of John VIII (872–82), which begin with September, 876, and extend to the end of the pontificate. This is not an original register, but a copy of the eleventh century. Separate letters, fifty-five in number, belonging to the first four years of the pontificate of this pope, exist in a collection contained in a manuscript of the twelfth century in the British Museum, London (MSS. Add. 8874). The manuscript contains letters of Gelasius I (492–96), Pelagius I (556–61), Leo IV (847–55), John VIII (872–82), Stephen V (885–91), Alexander II (1061–73), and Urban II (1088–99). The study of the manuscript by Ewald ["*Neues Archiv*", V (1880), 275 sqq., 503 sqq.] led to important conclusions concerning the volumes of the Regesta. Another manuscript at Cambridge contains some seventy letters from the Regesta of Adrian IV (1154–59), Alexander III (1159–81), and Lucius III (1181–85) [see Löwenfeld in "*Neues Archiv*", X (1885), 586 sqq.]. Again, large parts of the Regesta of Gregory VII (1073–85), namely 381 letters, are contained in a manuscript in the Vatican Archives. This collection also is only an extract of the original Regesta. In it the letters are no longer arranged according to indictions, but according to the year of the pontificate. A fragment of the Regesta of the antipope Anacletus II (1130–38), containing thirty-eight letters of various contents, has been preserved in a manuscript of Monte Cassino (Ewald in "*Neues Archiv*", III, 164 sqq.). Besides these collections of letters which have preserved fragments of the earliest papal Regesta, rich material is also to be found in the canonical collections of the Middle Ages. In part these collections go back directly or indirectly to the volumes of the Regesta of the papal archives, from which the authors of these collections, as Anselm of Lucca, and above all Deusdedit, gathered the greater part of their material. From Innocent III onwards the manuscript volumes of the papal Regesta still exist in the Vatican Archives.

The Regesta of the thirteenth century are beautifully written parchment volumes. Yet the most of these in their present form have been made from older

volumes. How these older volumes, the real original Regesta, were planned cannot be positively decided. From the fourteenth century onwards registry volumes of paper were used for the entering of the copies. However, when the popes returned from Avignon to Rome, these paper Regesta were left at Avignon and copies of them were made in parchment registry volumes that were brought to Rome. At a later era the original Regesta were also brought to the Vatican Archives, so that there are two series in existence for the Avignon epoch of the fourteenth century. From the end of the fourteenth century onwards the volumes of the Regesta were generally made of paper. Numerous investigations have been made by various scholars as to the arrangement of the volumes of the Regesta, the rules or customs observed in the entering of the separate pieces, as to the question whether the draft or the finished letter was copied, and as to many other matters in diplomatics, without reaching very certain results. In the thirteenth century the letters were divided into "*Litteræ communes*" and "*Litteræ de curia*" or "*Curiales*", the latter dealing mostly with affairs of general importance. At a later date other headings (*litteræ secretæ*, *litteræ de beneficiis*) were also introduced. Besides the regular Regesta of the papal letters made in the papal chancery, there were similar Regesta of the papal letters executed since the fourteenth century in the Apostolic Camera. From about the middle of the fourteenth century the registers of petitions were also preserved, in which were entered not the papal documents, but the memorials to the pope, in reply to which the papal documents were issued.

As collections of the official documents of the papal chancery, the Regesta are a very important historical authority. For convenience in historical investigation various scholars have published in chronological order all known papal documents of large periods, with brief summaries of the contents of the letters. The three great collections of this kind are: Jaffé, "*Regesta Pontificum Romanorum ab condita ecclesia ad annum p. Chr. n. 1198*"; 2nd ed. by S. Löwenfeld, F. Kaltenbrunner, P. Ewald (2 vols., Leipzig, 1888). P. F. Kehr has undertaken a new edition of the Regesta for this period in topographical and at the same time chronological order: "*Regesta Pontif. Roman.: Italia Pontificia*" (Berlin, 1906—); "*Germania Pontificia*" (Berlin, 1910); with the co-operation of other scholars he is still carrying on his great undertaking. Jaffé's work was supplemented by Potthast, "*Regesta Pontificum Romanorum inde ab an. p. Chr. n. 1198 ad an. 1304*" (2 vols., Berlin, 1874–75). Letters of several popes taken from the volumes of the Regesta have been published by: Löwenfeld, "*Epistolæ Pontificum Romanorum ineditæ*" (Leipzig, 1885), taken from the manuscript at Cambridge; Rodenberg, "*Epistolæ sæc. XIII e Regestis Rom. Pont. selectæ*" (Berlin, 1883—), in "*Mon. Germ. Hist.*" The Regesta of the letters of Gregory I were edited again by Ewald and Hartmann, "*Gregorii I. Registrum epistolarum*" in "*Mon. Germ. Hist.*" (Berlin, 1891—). The letters of Gregory VII were edited by Jaffé, "*Monumenta Gregoriana*" in "*Bibliotheca rerum Germanicarum*" (2 vols., Berlin, 1868). As early as 1591 the records of John VIII were published from the manuscript in the Vatican. Of the popes of the thirteenth century, Pressuti edited (Rome, 1888–96) the Regesta of Honorius III (1216–27) from the volumes of the Regesta in the Vatican Archives; the Regesta of the succeeding popes to Boniface VIII (d. 1303) were edited by the members of the Ecole Française of Rome, the publication of the Regesta of all these popes being yet incomplete; after a group of Benedictines had issued the Regesta of Clement V (1305–14), the members of the Ecole Française began again with John XXII (1316–34), with the intention of publishing the Regesta of the

Avignon popes to Gregory XI (1370-78). In this latter series, besides the documents of general interest, they kept in view particularly those documents that bore on the history of France. For the later eras only the first numbers were published of the *Regesta* of Leo X (1513-21), edited by Cardinal Hergenröther (see under the different popes). In addition a number of works have been issued or are in course of publication that contain *Regesta* from the Vatican *Regesta* of the fourteenth century, bearing on special questions or on the history of various countries and dioceses, e. g., Werunsky, "Excerpta ex registris Clementis VI et Innocentii VI" (Innsbruck, 1885); Ruezler, "Vatikansiche Akten zur deutschen Geschichte in der Zeit Ludwigs des Bayern" (Munich, 1890).

Bulletin*, III (Washington, 1897), 179.

J. P. KIRSCH.

Reggio di Calabria, ARCHDIOCESE OF (RHEGIENSIS), in Calabria, southern Italy. The city is situated on the slope of the Aspromonte, at the extreme end of the peninsula, communicating with Messina by a line of ferries. Grain, olives, wine, fruit, fishing, the silk trade, and the manufacture of furniture have rendered Reggio an important trading port. The earthquakes of 1783 and 28 Dec., 1908, completely destroyed all the buildings, ancient and modern, and a town of wooden and corrugated iron huts now rises amid the ruins. The city was founded by the Calchidians in the eighth century B. C.: in 723 it received from Messina fugitives who rose to supreme power. Inscriptions and coins show that it was a flourishing republic, and was governed by the laws given by Charondas to Catania (640). About the close of the sixth century B. C., Alcidas became tyrant of the city, and his son Anaxilas planned to obtain control of all Græcia Magna, but was unsuccessful. He was more fortunate in his attack on Zancle in Sicily, which he named Messana (Messina). His sons were expelled (461) from the city, which again became a republic. Dionysius of Syracuse captured it in 389 after a siege of eleven months. On his fall, it became subject to Agathocles and later joined Pyrrhus against the Romans. When Pyrrhus abandoned Italy, a mercenary Campanian fleet captured the town, and established a military republic (270). This was overthrown and severely punished by the Romans, who incorporated it, with all Bruttium, under their rule as a federated city. It still preserved its Grecian character in the days of Augustus. Julius Cæsar sent a colony thither and embellished the city, calling it *Rhegium Julii*. In the Gothic War it was attacked by the fleet of Belisarius, and despite the aid of Totila (549) was destroyed. It remained thenceforward in the hands of the Byzantines, though Authari claimed it as the furthest boundary of the Lombard Kingdom. In 918 it was captured by the Saracens, who were defeated and massacred by the Pisans (1005). It was again captured in 1080 by Robert Guiscard, and united to his Kingdom of the Two Sicilies. In 1313 it was taken by Frederick II of Sicily, who was soon forced to abandon it. It was frequently sacked by the Turks and corsairs

in the fifteenth and sixteenth centuries and especially in 1554 and 1595 by the Calabrian renegade Sina Pasha Cicala. In Aug., 1860, the treason of General Vial enabled Garibaldi to occupy the city without resistance, thus beginning the downfall of the Kingdom of Naples.

Through a misinterpretation of Acts, xxviii, 13, St. Paul was said to have preached the Gospel there, and to have consecrated his companion St. Stephen bishop; it is probable, however, that it was evangelized at an early period. The first bishop known is Mark, legate of Pope Sylvester at the Council of Nicæa (325). Other bishops: St. Sisinnius (536), mentioned in the Acts of St. Placidus; John, legate of Pope Agathus at the Sixth Council (680); St. Cyrillus (749); Leontius, follower of Photius (869); St. Eusebius (d. 916). When all Southern Italy was united to the Patriarchate of Constantinople, Reggio became a metropolitan see with thirteen suffragans, and followed the Greek Rite, which was changed to the Gallican after the Norman Conquest; Archbishop Ricciulli adopted the Roman Rite in 1580. The Greek Rite, however, remained in force in the church of Santissima Maria della Cattolica, built by King Roger, and governed by a protopope with a numerous Greek clergy. Questions of jurisdiction caused frequent controversies with the archbishop. About 1600 Archbishop Annibale degli Afflitti suppressed the Greek Rite in that church, and the entire diocese now follows the Roman Rite. Other bishops: Rangerio (1192); Fra Gentile (1279), Franciscan; Pietro Filomarino (1404); Antonio Ricci (1453), restorer of the cathedral; Gerolamo Centelles (1529), reformer of ecclesiastical discipline; Gaspare Ricciulli (1560), a distinguished theologian at the Council of Trent, rebuilt the cathedral which had been destroyed by the Turks, and established the seminary; Mariano Ricciardi (1855-71), exiled after the annexation of the Kingdom of Naples; Cardinal Gennaro Portanova (1888). The sees suffragan to Reggio are: Bova, Cassiano (in the Ionian islands), Catanzaro, Cotrone, Gerace, Nicastro, Nicotera and Tropea, Opido, Squillace. The archdiocese contains 80 parishes, 200,000 inhabitants, 200 secular priests, 4 religious houses with 20 priests; 5 convents of nuns; 2 boys' and 5 girls' educational institutions.

U. BENIGNI.

Reggio dell' Emilia, DIOCESE OF (REGINENSIS), suffragan of Modena in central Italy. The city is situated just where the ancient Via Æmilia is crossed by the small River Crostolo, which flows into the River Po, through a very fertile territory. The principal industries are silk, straws, and osiers. The cathedral is Romanesque, of the twelfth century, restored in the fifteenth and sixteenth centuries, and has some remains of thirteenth century frescoes. In the museum is the scientific collection of Abbate Spallanzani, an illustrious philosopher, prehistoric antiques, and an art collection. The library has about 1000 manuscripts. There are also the state archives. Near Reggio is the famous Castle of Canossa.

Regium belonged to the Boii and was reduced into a colony by the consul Æmilius Lepidus (187 or 178) and was by him named *Regium Lepidi*. In the Treaty of Quiercy Reggio was included among the towns which Pepin had in mind to give to the Holy See, but it never came into possession of the latter, except later, and for a short time. In 962 it was given with Modena to Count Azzo of Canossa. After the death

of Countess Matilda (1165) the popes claimed the town as a part of her inheritance, while the emperors claimed the same as a fief of the Empire. Pending these disputes the town was governed in a communal way; at first they had consuls and in 1156 they had a bailiff, named mostly by the emperor. Reggio took part in the wars between the Lombard cities, especially against Mantua and Milan. It was mostly on the side of the Ghibellines, although in 1167 it entered the Lombard League and in 1193 the league against Henry VI. After the misfortune of Frederick II, the powerful Pico, Fogliani, Carpineti, and Coreggio were disputing the mastery of the city, which fell into the hands of Obizzo d'Este, Lord of Ferrara, but revolted against his son Azzo VIII (1306), became again a commune, accepted the vicars of Henry VII and Louis the Bavarian; was subject to the pope under Cardinal Bertrand du Poyet (1322); and later (1331), John of Bohemia, who recognized the suzerainty of the pope over Reggio as well as over Parma and Modena, was made lord of the city, but sold it to the Fogliani, from whom it passed to the Gonzaga of Mantua (1335), who sold it to Galeazzo Visconti of Milan. In 1409 it returned again to the House of Este of the line of Modena, until 1859. The popes, however, always claimed to be its suzerains. After the Ferrara War, Reggio spontaneously submitted to Julius II (1512-15). By the Peace of Barcelona (1529) Charles V bound himself to give back Reggio to the popes, but he did not do so. In 1848 Reggio proclaimed its annexation to Piedmont, completed in 1859. Christianity entered Reggio probably from Ravenna; a local legend makes the first bishop St. Protasius, a disciple of St. Apollinaris, in the Apostolic age. Admitting his existence, also five or six historical bishops, predecessors of Faventius in 451, it would seem that the episcopal see dates from the first half of the fourth century. St. Prosper was the successor of Faventius; he died between 461 and 467. Among other bishops were: Thomas (c. 701), Nodoberto, ambassador of Louis the Pious at Constantinople (817); Azzo II, murdered during the Hungarian invasion in 900; Thenzo (978), who rebuilt the Basilica of St. Prosper and other churches; Nicolò Maltraversi (1211), much praised by the chronicler Salimbene and often ambassador to Frederick II; Enrico de Casalocci (1302); Battista Pallavicini (1445), the sacred poet; Marcello Cervini (1540), later Pope Marcellus II; Cardinal Alessandro d'Este (1621); Angelo M. Ficarelli (1821), who repaired the damages of the revolution.

The diocese has 246 parishes, 531 secular priests, 175,600 inhabitants; 4 houses of monks with 29 priests; 11 houses of nuns, 5 educational institutions for boys and 13 for girls, and a Catholic weekly.

UNIVERSITY OF REGGIO.—Reggio was recognized as a *studium generale* as early as 1210; and a doctoral diploma of 1276 has been preserved, showing that there were a regular College of Doctors, regular examinations, and a *Universitas scholarium* (Tacoli, "Memorie storiche di Reggio", pt. III, Carpi, 1769, 215-16). But at the beginning of the fourteenth century there was no longer a single doctor in the city; and the *studium generale* had evidently lapsed before this.

U. BENIGNI.

Regina, DIOCESE OF (REGINENSIS), a newly created (4 March, 1910) ecclesiastical division, comprising the southern part of the Canadian province of Saskatchewan, as far north as the 30th township, or about 51° 30' lat. The Catholic population amounts to 58,771, of whom 19,563 are of French descent, 16,318 Germans, about 13,000 Galicians following the Ruthenian Rite, 4759 English-speaking, 2312 Poles, and 1819 Hungarians. The rest are of various nation-

alities, and comprise about 1000 Catholic Indians. Fifty-nine priests (43 French, 15 German and 1 Scotch) attend to their spiritual needs. The regular clergy is represented by the Oblates of Mary Immaculate, the pioneers in the country, the Missionaries of La Sallette and those of Issoudun, France, the Redemptorists, and the Sons of Mary Immaculate. Nuns of five different orders either teach in the schools or serve the sick in the hospital founded last year at Regina. Besides its primary or parochial schools, there are five academies and three Indian boarding schools, the most important of which is that founded (1884) in the Qu'Appelle valley by the Rev. Jos. Hugonard, O.M.I., who still directs it. Six trades are taught, in addition to the curriculum of the schools.

The same Qu'Appelle valley was the cradle of the new diocese, Fort Qu'Appelle being its only settlement until Father J. N. Ritchot established (1865) a mission at what is now Lebreton. Then followed a few other missionary stations for the Indians, around which the development of the country consequent on a Government system of intense immigration has clustered the numerous centres of white population now extant, chief among which are Regina, the capital of the province, Moosejaw, Swift Current, and Yorkton, the headquarters of a large Galician colony.

Mgr. Olivier E. Matthieu, ex-rector of Laval University, Quebec, was appointed (14 July, 1911) first bishop.

See archives of the Archdiocese of St. Boniface.

A. G. MORICE.

Regina Coeli (QUEEN OF HEAVEN), the opening words of the Eastertide anthem of the Blessed Virgin, the recitation of which is prescribed in the Roman Breviary from Compline of Holy Saturday until None of the Saturday after Pentecost inclusively. In *choro*, the anthem is to be sung standing. In illustration of the view that the anthem forms a "syntonic strophe", that is, one depending on the accent of the word and not the quantity of the syllable, Albin prints it ("La poésie du bréviaire", Lyons, s. d., p. 102) as follows:

Regina coeli laetare,
Alleluia,
Quia quem meruisti portare
Alleluia,
Resurrexit
Sicut dixit,
Alleluia.
Ora pro nobis Deum.
Alleluia.

In the first two verses ("Regina" and "Quia") the accent falls on the second, fourth, and seventh syllables (the word *quia* being counted as a single syllable); in the second two verses ("Resurrexit", "Sicut dixit"), on the first and the third syllables. The Alleluia serves as a refrain. Of unknown authorship, the anthem has been traced back to the twelfth century. It was in Franciscan use, after Compline, in the first half of the following century. Together with the other Marian anthems, it was incorporated in the Minorite-Roman Curia Office, which, by the activity of the Franciscans, was soon popularized everywhere, and which, by the order of Nicholas III (1277-80), replaced all the older Office-books in all the churches of Rome. Batiffol ("History of the Roman Breviary", tr., London, 1898, pp. 158-228) admits that "we owe a just debt of gratitude to those who gave us the antiphons of the Blessed Virgin" (p. 225), which he considers "four exquisite compositions, though in a style enfeebled by sentimentality" (p. 218). The anthems are indeed exquisite, although (as may appropriately be noted in this connexion) they run through the gamut of medieval literary style, from the classical hexameters of the "Alma Redemptoris Mater" through the richly-rhymed accentual rhythm and regular strophes of the "Ave Regina

Cœlorum", the irregular syntonic strophe of the "Regina Cœli", down to the sonorous prose rhythms (with rhyming closes) of the *Salve Regina*. "In the 16th century, the antiphons of our Lady were employed to replace the little office at all the hours" (Baudot, "The Roman Breviary", London, 1909, p. 71). The "Regina Cœli" takes the place of the "Angelus" during the Paschal Time.

The authorship of the "Regina Cœli" being unknown, legend says that St. Gregory the Great (d. 604) heard the first three lines chanted by angels on a certain Easter morning in Rome while he walked barefoot in a great religious procession and that the saint thereupon added the fourth line: "Ora pro nobis Deum. Alleluia." For details of the interesting legend, cf. Guéranger, "Liturgical Year", Paschal Time, Part I, p. 111 (tr. Dublin, 1871). (See also *SALVE REGINA* for a similar attribution of authorship.) The authorship has also been ascribed to Gregory V, but without good reason. The beautiful plainsong melodies (a simple and an ornate form) are variously given in the Ratisbon antiphonary and in the Solesmes "Liber Usualis" of 1908, the ornate form in the latter work, with rhythmical signs added, being very attractive. The official or "typical" melody will be found (p. 126) in the Vatican Antiphonary (1911). Only one form of melody is given. The different syllabic lengths of the lines make the anthem difficult to translate with fidelity into English verse. A literal prose rendering is given in the "Baltimore Manual of Prayers". Seven versions are noted in Julian's "Dictionary of Hymnology", but not that of C. H. Esling ("Catholic Record", May, 1873, p. 12) nor that of Archbishop Bagshawe ("Breviary Hymns and Missal Sequences", London, 1900, p. 220). The anthem has often been treated musically by both polyphonic and modern composers.

H. T. HENRY.

Reginald, ANTONIN, baptized ANTOINE RAVAILLE, theologian; b. at Albi in Languedoc, 1605; d. at Toulouse, 12 April, 1676. He became a Dominican at Avignon in 1624. After a course of studies he was appointed professor of philosophy in the schools of his order (1632). During the years 1639-49 and 1671-76 he taught theology in the University of Toulouse. He took a prominent part in the discussions "De Auxiliis Gratia" under Innocent X (Rome, 1652-53). From 1653-57 he was provincial of Occitania. Reginald was a zealous defender of the Thomistic doctrine of grace and wrote many works on that subject. His chief work, which was published after his death (Antwerp, 1706), is "De mente Concilii Tridentini circa gratiam seipsa efficacem". The more important of his other works are: "Opusculum de vero sensu composito et diviso" (Paris, 1638); "Quæstio . . . Quæ fuerit mens Concilii Trid. circa gratiam efficacem et scientiam mediam" (Toulouse, 1644); "Dissertatio de Catechismi romani auctoritate" (Toulouse, 1648); the unfinished work "Doctrinæ D. Thomæ tria principia cum suis consequentiis" (Toulouse, 1670) and many unpublished lectures on the "Summa Theologica".

QUÉTIF-ECHARD, *Script. Ord. Præd.*, II, 661-3.

J. A. McHUGH.

Reginald of Piperno, Dominican, theologian, companion of St. Thomas Aquinas, b. at Piperno about 1230; d. about 1290. He entered the Dominican Order at Naples. St. Thomas chose him as his *socius* and confessor at Rome about 1260. From that time Reginald was the constant and intimate companion of the saint, and his testimony is continually cited in the process of Thomas' canonization. To this disciple Thomas dedicated several of his works. In 1272 Reginald was cured of a fever by the prayers of the saint. The same year he began to teach with

Thomas at Naples. He attended at the death-bed of the holy doctor, received his general confession, and pronounced the funeral oration (1274). He returned to Naples, and probably succeeded to the chair of his master. Reginald collected all the works of St. Thomas. Four of the "Opuscula" are reports he made of lectures delivered by the Saint, either taken down during the lecture or afterwards written out from memory. These are: "Postilla super Joannem" (corrected by St. Thomas), "Postilla super Epistolas S. Pauli", "Postilla super Tres Nocturnos Psalterii", "Lectura super Primum de Anima". Reginald is also considered by some as the compiler of the Supplement to the *Summa Theologica*. The funeral discourse published at Bologna in 1529 under the name of Reginald is the work of the Italian humanist Flaminio.

J. A. McHUGH.

Regino of Prüm, date of birth unknown; d. at Trier in 915. According to the statements of a later era Regino was the son of noble parents and was born at the stronghold of Altrip on the Rhine near Speyer. Nothing is known concerning his life until he was elected Abbot of Prüm in 892. From his election as abbot and from his writings, it is evident that he had entered the Benedictine Order, probably at Prüm itself, and that he had been a diligent student. The rich and celebrated Abbey of Prüm suffered greatly during the ninth century from the marauding incursions of the Normans. It had been twice seized and ravaged, in 882 and 892. After its second devastation the Abbot Farabert resigned his office and Regino was elected his successor. His labours for the restoration of the devastated abbey were hampered by the struggle between contending parties in Lorraine. In 899 Regino was driven from his office by Richarius, later Bishop of Liège, the brother of Count Gerhard and Count Matfried of Hennegau. Richarius was made abbot; Regino resigned the position and retired to Trier, where he was honourably received by Archbishop Ratbod. He supported the archbishop in the latter's efforts to carry out ecclesiastical reforms in that troubled era, rebuilt the Abbey of St. Martin that had been laid waste by the Normans, accompanied the archbishop on visitations, and used his leisure for writing. At Ratbod's suggestion he wrote his work on ecclesiastical discipline for use in ecclesiastical visitations (see CANONS, COLLECTIONS OF ANCIENT, III, 286); he also wrote a treatise "De harmonica institutione" [ed. Coussemaker, "Scriptores de musica mediæ ævi", II (Paris, 1867), 1-73], for the improvement of liturgical singing; further, his great historical work, the chronicle (see ANNALS, I, 533). Regino was buried in the monastery of St. Maximin near Trier.

Regiomontanus. See MÜLLER, JOHANN.

Regionarii, the name given in later antiquity and the early Middle Ages to those clerics and officials of the Church in Rome who were attached neither to the papal palace or *patriarchium*, nor to the titular churches of Rome, but to whom one of the city regions, or wards, was assigned as their official district. For internal administration the city of Rome was divided by the Emperor Augustus into fourteen regions. From the fourth century developed (evidently in connexion with the seven Roman deacons) an ecclesiastical division into seven regions, which gradually replaced the earlier civil divisions. Many branches of the ecclesiastical administration were arranged in accordance

with the seven regions—especially the care of the poor, provision for the maintenance of the churches, and whatever else pertained primarily to the office of the deacons, one of whom was appointed over each of the seven regions (*diaconus regionarius*). As the deacons were assisted by seven subdeacons, we also find the term *subdiaconus regionarius*. The notaries and *defensores* employed in the administration of the regions were also known as *notarii regionarii* and *defensores regionarii*. There is also occasional mention of *acolyti regionarii*. Little is known about the functions exercised by these regionarii, as in general concerning the ecclesiastical administration in ancient Rome, in as far as it affected the regions.

Régis, JEAN-BAPTISTE, b. at Istres, Provence, 11 June, 1663, or 29 Jan., 1664; d. at Peking, 24 Nov., 1738. He was received into the Society of Jesus, 14 Sept., 1683, or 13 Sept., 1679, and in 1698 went on the Chinese mission, where he served science and religion for forty years, and took the chief share in the making of the general map of the Chinese Empire. The early Jesuit missionaries had already endeavoured to make known to Europe the true geography of China, of which at the end of the sixteenth century even the best cartographers were utterly ignorant. Their achievements up to the middle of the seventeenth century are summed up in the "*Novus Atlas Sinesis*" published by Father Martin Martini (Amsterdam, 1655). He was greatly assisted in this work by Chinese books of geography, where he found a mass of descriptive information, the distances between important places and even maps, which, however, were very crude, the distances having been measured with little exactitude. These imperfect data he supplemented and completed by astronomical observations made in the chief towns by himself and his associates; hence the positions of his Atlas are remarkably accurate. The favour enjoyed by the missionaries with Emperor K'ang-hi (1662–1722) made it possible for them to improve on this. Fr. Ferdinand Verbiest collected the earliest definite ideas of Tatar during two journeys made to that country with the emperor (1682–3). The arrival in China (1687) of French Jesuits sent by Louis XIV gave new impetus to scholarly labours in the mission, especially to geography. Provided with perfected instruments and trained in the methods of the astronomers of the Observatory of Paris the new missionaries were enabled to determine more correctly positions already calculated. The "*Mémoires*" and the "*Histoire de l'Académie des Sciences*" record their observations. Fr. Jean-François Gerbillon made eight journeys through Tatar and Mongolia (1688–98), acquiring more geographical information concerning them. In 1701 the great work of the general map of the empire, begun by the topographical drawing of the city of Peking and its environs, including the ancient summer residence of the emperors and 1700 towns or villages, was assigned to Fr. Antoine Thomas, a Belgian of Namur, and Joachim Bouvet, Jean Baptiste Régis, Dominique Parrenin, all three French. K'ang-hi, who wished to take measures against the periodical overflow of the rivers of Chi-li, was satisfied. Fr. D. Parrenin then induced him to consent to a map of the Great Wall of China. Frs. Bouvet, Régis, and Pierre Jartoux measured their route to the eastern extremity of the famous rampart by means of regularly divided cords, keeping track of directions with the assistance of a compass, and frequently observing the meridians of the sun in order to calculate latitudes. In four days they reached the Gulf of Chi-li (8 June, 1708) and began operations on the Great Wall. On 16 October they had estimated its extent to be 21° long.,

or almost half the widest breadth of the United States from east to west, and had determined the positions of the fortified towns "by which it was flanked", according to Fr. Régis. At the end of two months Bouvet, being ill, retired to Peking. Régis and Jartoux reached the western end of the Great Wall at Kia-yu-Koan and completed their work by the mensuration of an interior lateral wall which brought them to Si-ning, on the frontier of Tibet, near the great Lake Kukunor. They returned to Peking, 10 Jan., 1709. Their map pleased the emperor and he requested the continuation of the work for the provinces outside the Great Wall and for China proper.

Régis, Jartoux, and Fr. Ernbart Fridelli, from the Austrian Tyrol, set out for the northeast. In two expeditions (8 May–17 Dec., 1709; 22 July–14 Dec., 1710) they made the map of Liao-tung and Manchuria, and during the interval drew the Province of Chi-li in which Peking is situated. In 1711 Fr. Francis Cardoso, Portuguese, and the Augustinian, Fr. Guillaume Bonjour, the only non-Jesuit, joined the geographers. Régis and Cardoso drew the map of Shan-tung; Tartoux, Fridelli, and Bonjour traversed Mongolia as far as Lake Baikal in the north and the entrance of eastern Turkestan to the west. The year 1712 brought a new reinforcement: Frs. Vincent de Tartre and Cardoso made the maps of Shan-si and Shen-si (1712–14), Kiang-si and Kwang-tung, and Kwang-si; Frs. Anne-Marie de Mailla, Roman Hinderer, an Alsatian, and Régis laboured (1712–15) on the maps of Hu-nan, Kiang-nan, Che-kiang, Fu-kien, and the Island of Formosa. Meanwhile Fridelli and Bonjour were at Sze-chwan and Yun-nan, where Fr. Bonjour died, 23 December, 1714, and was replaced by Régis, 24 March, 1715. He assisted Fridelli with the maps of Yun-nan, Kwei-chow, and Hu-kwang. After ten years' labour the new map of China was completed, 1 Jan., 1717. The fundamental method employed was the exact measurement of distances from which was obtained the longitude and latitude of places; this, supplemented and controlled by the observation of the meridians of the sun and the polar stars, directly gave the latitude. The missionaries were sometimes assisted by the observation of eclipses of the moon and the satellites of Jupiter, of which more perfect process they desired to make use to obtain longitudes, but conditions did not permit.

In reply to a criticism of Fréret, the learned secretary of the Académie des Inscriptions et Belles-Lettres, Père Gaubil wrote (5 November, 1736): "When thinking of a map of China and Tatar you had in mind such men as MM. Cassini, Maraldi, Chazelles, and others who worked at the meridian assisted by all the necessary instruments and having plenty of time at their disposal. Our Fathers made use of the avocation of map-makers to do missionary work, to procure assistance and protection for the missionaries of the provinces, and to establish new missions. The Chinese and Tatar mandarins who accompanied them hindered them exceedingly; they had orders not to let the Fathers go where they would, . . . and would never allow them sufficient time for the observation of meridians, the measurement of roads, the variation of the needle (magnetic needle), the rhomb, and the estimation of positions from these elements. The work being finished the completed map had to be sent in haste to the emperor. . . . Compared with what was done elsewhere for general maps of countries smaller than China and Tatar this work can but do honour to the Tatar prince who commanded such a worthy undertaking and assuredly it did not discredit our Fathers." This appreciation has been fully justified by the votes of the best judges, among them Ferdinand de Richthofer, the famous geologist and explorer of China, who writes: "If we consider the time at which it was made, the map of the Jesuits, as a whole, may be called a masterpiece" (China, I, 686).

Fr. Jartoux, who with Frs. Régis and Fridelli had the largest share in it, sent a copy to France, where it was published by Fr. Du Halde with the assistance of the celebrated geographer d'Anville in the "*Description de la Chine*" (1735). Fr. Régis composed a short commentary on it under the name of "*Nouvelle géographie de la Chine et de la Tartarie orientale*", which is preserved in the Bibliothèque Nationale, Paris, fr. MS. 17, 242; Fr. Du Halde availed himself of the writing to a great extent but would have done better to publish it entire. Fr. Régis also turned his attention to the ancient Chinese books (*king*). Father Gaubil praises his "sane criticism" on the subject, and the English sinologist James Legge writes: "Régis is known as the interpreter of the Yih-king. His work was edited at Stuttgart, in 1834, by Julius Mohl. One part of the first volume is occupied with *Prolegomena* which contain the most valuable introduction to the Chinese higher classics that has yet been published" ("Notions of the Chinese concerning God and the spirits", 1852, 69). Father Gaubil describes his great virtues as humility and modesty, and says: "he was universally esteemed and loved by the missionaries of various bodies, Christians, and the people of the court who associated with him".

JOSEPH BRUCKER.

Régis, PIERRE SYLVAIN, b. at La Salvétat de Blanquefort, near Agen, in 1632; d. in Paris, in 1707. After his classical studies, he came to Paris, followed the lectures of Rohault at the Sorbonne and became a warm admirer and partisan of the philosophy of Descartes. He then, with great success, taught the principles of Cartesianism at Toulouse (1665), Aigues-Mortes, Montpellier (1671), and Paris (1680). The prohibition issued about that time against the teaching of Cartesianism (cf. Cousin, "Fragments philosophiques", 5th ed., Paris, 1866, III) put an end to his lectures. He was elected a member of the Academy of Sciences in 1699. His chief work is his "Cours entier de philosophie ou Système général selon les principes de Descartes" (3 vols., Paris, 1690), where he presented in a systematic way the principles of the Cartesian philosophy. Strongly opposed to Malebranche's idealism, against which he wrote several articles in the "Journal des Savants" (1693 and 1694), Régis modified the system of Descartes on various points in the direction of empiricism. He denied that the human soul has innate and eternal ideas, maintained that all our ideas are modifications of the soul united to the body and that we can know our body and extension as immediately as our soul and thought. His book having been criticized by Huet and Duhamel, he then wrote his "Réponse au livre qui a pour titre *Censura philosophiæ Cartesianæ*" (Paris, 1691), and "Réponse aux réflexions critiques de M. Duhamel sur le système cartésien de M. Régis" (Paris, 1692). Among his other works we may also mention his "Usage de la raison et de la foi, ou l'accord de la raison et de la foi", with a "Réfutation de l'opinion de Spinoza, touchant l'existence et la nature de Dieu".

GEORGE M. SAUVAGE.

Registers, PAROCHIAL.—One having the cure of souls is commanded by Divine precept to know his subjects (Conc. Trid., sess. XXIII, c. i, "De Ref."). The better to fulfil this obligation, and because, moreover, of the historical importance and probatory force of public records, a pastor must have five distinct parish registers: one each of baptisms, confirmations, marriages, and deaths; and a fifth containing a census or general account of the state of souls in the parish. Definite forms for entries in these books are prescribed by the Ritual. Every public document should bear the place, date, and nature of the act inscribed, the name of the one officiating, the names of the parties concerned and the witnesses present, and the signature of the proper official. The Church prescribes that in her parochial registers all persons be designated not only by name, but likewise by parentage and parish; that the office, e. g. rector, curate, of the one officiating be mentioned; that the record be complete, i. e. giving every necessary detail to remove all doubt and uncertainty, regarding the validity of the act in question, or the observance of prescribed formalities.

A baptismal registry, consequently, will also record the fact of legitimacy, date of birth, and name or names imposed. If the sacrament is conferred privately, conditionally, or the ceremonies are merely supplied, such should appear in the record. The entry will show when, where, and by whom a founding was discovered, and the age, presumably, of the child. The baptism of one born out of wedlock is recorded with the name of either known (not reputed) parent. In no public register however is any derogatory or defamatory note allowed. To safeguard reputation, records at times, particularly of certain marriages, are preserved in a secret register. A new feature ("Ne temere", can. ix, § 2) in baptismal records is a marginal note of the subsequent marriage of the baptized person. Future legislation may make this obligatory also, when one receives Holy Orders or enters religion.

In the registration of confirmation, as well as of baptism, sponsors are to be carefully noted, owing to the spiritual relationship which arises. A matrimonial record should state whether the banns (q. v.) were published; what dispensation, if any, was obtained and applied; that the priest officiating was duly delegated, if such be the case; that the consent of the parties was asked and given ("Ne temere", can. iv, § 3). If later a recorded marriage is declared null by the Church, or, having been found to be invalid, has been rendered valid in the external forum, a marginal note, duly attested, will contain this information. Death records state what sacraments the deceased received in preparation for death, by whom they were administered, and place of burial. Lastly an official registration of all parishioners is kept, giving name, family, age, residence, whether they have made their First Communion, been confirmed, made their Easter duty, etc.

All entries in parochial registers are to be made in Latin and by the pastor, even though he may not have officiated. Practice however tolerates in the vernacular records of deaths (Conc. Balt. Plen., II, n. 223) and of the general state of the parish. To the pastor belongs the custody of these books; every possible care must be taken to preserve them from destruction, injury, or falsification. These records are public instruments, and as such constitute perfect proof of the fact, which they record. Such proof would naturally be sought in the parish: parochial registers consequently should record baptisms, marriages, etc. of parishioners, though the event chronicled take place elsewhere.

Conc. Trid., sess. XXIV, c. i, "De ref. Matr.": Rituale Romanum, tit. 10 cc. ii sq.; GASPARRI, Tractatus Canonicus de matr., III, 1276 sq.

ANDREW B. MEEHAN.

Regium Placet. See EXEQUATUR.

Regnault, HENRI VICTOR, chemist and physicist, b. at Aachen, 21 July, 1810; d. in Paris, 19 Jan., 1878. Being left an orphan at the age of eight he was soon obliged to work in order to provide for himself and his sister. Up to the age of eighteen he worked as a clerk in a drapery establishment in Paris, but made use of all his spare time in studying, until he was received at the École Polytechnique in 1830. In 1832 he entered the School of Mines, was graduated, and in 1835 he was attached to the chemical laboratory of the school, becoming professor and adjunct director in 1838, and remaining until his call to the chair of physics at the Collège de France. Up till then he had been working in the comparatively new field of organic chemistry, chiefly in producing new compounds by the method of substituting chlorine for hydrogen equivalents in hydro-carbons. The results were published in eighteen memoirs in the "Annales de Chimie et de Physique" and earned for him the election as member of the Chemical Section of the Academy of Sciences. In 1843 he was commissioned by the Government to investigate the properties of steam and to obtain numerical data that should be of value to the steam engineer. The results were published in 1847, as vol. XXI of the "Mémoires" of the Academy of Sciences. They obtained for him the Rumford Medal of the Royal Society of London, and the exceptional appointment as Chief Engineer of Mines. In 1852 he became Director of the porcelain manufactory at Sèvres, where he continued his experiments until his laboratory, instruments and papers were destroyed during the Franco-German War, in 1871. This, together with the loss of his talented son, a well-known painter, broke his spirit, and a stroke of apoplexy in 1873 was followed by years of long, slow agony. Daubrée says of him, that "only his religious faith could console him, and this consolation was not wanting".

His invaluable work was done as a skilful, thorough, patient experimenter in determining the specific heat of solids, liquids, gases, and the vapour-tensions of water and other volatile liquids, as well as their latent heat at different temperatures. He corrected Mariotte's law of gases concerning the variation of the density with the pressure, determined the coefficients of expansion of air and other gases, devised new methods of investigation and invented accurate instruments. Two laws governing the specific heat of gases are named after him. This mass of numerical data are recognized as standards by the engineer as well as by the physical chemist.

He was a foreign member of the Royal Society of London, received its highest honour, the Copley Medal, in 1869, and in 1863 was made Commander of the Legion of Honour.

"Cours élémentaire de Chimie" was published in 1849 at Paris, and received several later editions. "Premiers éléments de Chimie", Paris, 1850, 6th ed., 1874, is a shorter work. "Relations des expériences", etc., 1847-70, were collected in 3 vols., Paris, 1870.

WILLIAM FOX.

Regulæ Juris (rules of law), general rules or principles serving chiefly for the interpretation of laws. In a specific sense, however, *regulæ juris* are certain fundamental laws in the form of axioms found in the "Corpus Juris", eleven inserted by Gregory IX at

the end of the fifth Book of Decretals, eighty-eight by Boniface VIII in the last title of Liber Sextus Decretalium. These rules are an exposition of several laws on the same subject, conclusions or deductions, rather than principles, of law drawn from constitutions and decisions, and consequently reserved to the last title of the two books mentioned, in imitation of Justinian in the "Digest" (L, 1, tit. 17). While these rules are of great importance it must be remembered that few general statements are without exception. Some of these axioms are applicable in all matters, others are confined to judicial trials, benefices, etc. As examples the following are taken from Liber Sextus: No one can be held to the impossible (6); Time does not heal what was invalid from the beginning (18); What is not allowed the defendant, is denied to the plaintiff (32); What one is not permitted to do in his own name, he may not do through another (47).

ANDREW B. MEEHAN.

Regular Canons. See CANONS AND CANONESSES REGULAR.

Regular Clerks Minor. See FRANCIS CARACIOLO, SAINT.

Regulars (Lat. *regula*, rule).—The observance of the Rule of St. Benedict procured for the monks at an early period the name of "regulars". The Council of Verneuil (755) so refers to them in its third canon, and in its eleventh canon speaks of the "ordo regularis" as opposed to the "ordo canonicus", formed by the canons who lived under the bishop according to the canonical regulations. There was question also of a "regula canonicorum", or "regula canonica", especially after the extension of the rule which St. Chrodegang, Bishop of Metz, had drawn up from the sacred canons (766) [cf. capitularies (n. 69 circa 810, n. 138 of 818, 819, ed. Alf. Boretii)]. And when the canons were divided into two classes in the eleventh century, it was natural to call those who added religious poverty to their common life regulars, and those who gave up the common life seculars. Before this we find mention of "sæculares canonici" in the Chronicle of St. Bertin (821) (Martène, *Anecd.*, III, 505). In fact as the monks were said to leave the world (St. Augustine, *Serm.* 49 de div.), sometimes those persons who were neither clerics nor monks were called seculars, as at times were clerics not bound by the rule. Sometimes also the name "regulars" was applied to the canons regular to distinguish them from monks. Thus the collection of Gratian (about 1139), C. xix, q. 2, c. 2 and q. 3, c. 1, speaks of canons regular, who make canonical profession, and live in a regular canonicate, in opposition to monks who wear the monastic habit, and live in a monastery. But the Decretals of Gregory IX, promulgated 5 Sept., 1234, use the word "regularis" in a more general sense, in book III, ch. xxxi, which is entitled "De regularibus et transeuntibus ad religionem". However in ch. xxxv "De statu monachorum et canonicorum regularium" the distinction returns, disappearing in the corresponding book and chapter of the Decretals of Boniface VIII (3 March, 1298), t. XVI, in 6, which is entitled merely "De statu regularium" and reappearing in the collection of Clementines (25 Oct., 1317) but with the conjunction *vel*, which indicates the resemblance between them. (Although another edition has *et*, the title of ch. x, c. 3 Clem. in the official edition reads "De statu monachorum, vel canonicorum regularium".)

From that time, while the word "religious" is more generally used, the word "regular" is reserved for members of religious orders with solemn vows. It means strictly those religious who have made solemn

profession. Those who have taken simple vows in the Society of Jesus are also regulars in the proper sense according to the Constitution "Ascendente" of Gregory XIII. Writers are not all agreed on the question whether the religious of other orders can properly be called regulars before solemn profession. The novices of religious orders are regulars only in the wider meaning of the word.

A. VERMEERSCH.

Reichenau, called *AUGIA DIVES* in medieval Latin MSS. and possessing a once celebrated Benedictine monastery, is an island upon the Gnadensee (Untersee) of the Lake of Constance, about one mile in breadth and about three and three-quarter miles long. It belongs to Baden, and has 1600 Catholic inhabitants, principally vintagers and fishermen, distributed among three villages, Oberzell, Mittelzell, and Unterzell (or Niederzell). Since 1838 the island has been connected with the mainland by a dam, one and a quarter miles in length, and with the railroad station of Reichenau (via Constance). There is a calling station for steamers on the southern shore. The word "Zell" (cell) in the names of the three villages of Reichenau indicates the existence of a monastery on the island, which was the "reiche Aue" (the fertile islet) of medieval culture. Under the protection and at the suggestion of Charles Mantel, the Anglo-Saxon (?), Saint Pirmin founded, with the co-operation of Count Berthold and the Alemannian Duke Santfrid I (Nebi), the famous Benedictine monastery of Reichenau, which in earlier times, until the tenth century, bore the name of Sintleosesau (Sintlas Ow). Reichenau had attained its full glory when the Abbey of St. Gall was still comparatively unimportant. In spite of St. Pirmin's banishment from his monastery through the political machinations of the Alemannian prince, Reichenau soon recovered its importance. His immediate successor, Abbot Heddo (727-34), later Bishop of Strasburg, shared the fate of the founder. The growth of Reichenau was greatly fostered by its position on the highway to Italy, which was frequented by Greek and Italian, and even Irish and Icelandic pilgrims and wayfarers. These became guests at the monastery and enriched it with gifts of precious relics, some of which are still preserved in the church treasury. Among other relics was one of special value, a cross with the blood of Christ, which was said to have been brought by an Arabian named Hassan to Charlemagne, and to have been confided to the custody of Reichenau in 925. The monastery also gloried in the possession of relics of St. Mark, brought to Reichenau from Venice in 830. On his homeward journey from St. Maurice with the relics of St. Maurice and other saints, Bishop Ulrich of Augsburg stayed at Reichenau, and, at the petition of Abbot Alewich (934-58), gave a large portion of the relics of Saint Maurice to the monastery [cf. Schmid, "St. Ulrich, Bischof von Augsburg (890-973)", Augsburg, 1901, p. 28]. Bishop Egeno of Verona resided in Reichenau, and built (799) the parish church of St. Peter at Niederzell, a small Roman basilica with two towers, whither he retired to lead the life of a hermit, dying in 802. His monument still exists. The property of the monastery was composed principally of donations made by Charlemagne, Louis the Pious, Charles the Fat (who is interred at Reichenau in the monastery church of Mittelzell), and many other German kings and emperors, especially of the House of Otto. The consequence of these royal favours was the rapid growth of the monastery in importance, being granted successively immunity from secular authority, *jurisdictio fori* the status of a principality of the empire, and complete exemption from episcopal jurisdiction.

Reichenau displayed its greatest lustre in the first centuries after its foundation (especially between the

ninth and the middle of the thirteenth centuries), during which it discharged its great work of civilization. The men most prominent for scholarship and ability during this period laboured at Reichenau—e. g. Walfrid Strabo (839-49); Hatto (891-913), from 891 Archbishop of Mainz; Berno (1008-48), appointed by Emperor Henry II successor of the uncultured Abbot Immo, who had been thrust upon the monastery by the same emperor; St. Meinrad (Meynrad), Count of Zollern (d. 861), the hermit and founder of Maria-Einsiedeln, who came from the monastery of Reichenau; moreover, Hermann Contractus (d. 1054), the acute scholar and historiographer, author of the *Salve Regina*. The last was a relative of St. Ulrich. These and other scholars laboured at Reichenau and formed the famous Reichenau library and school of painters (Codex Egberti). The Reichenau school of painting is seen at its best even today in the single extant work of the tenth century—the eight pictures on the upper part of the walls of the little Roman basilican parish church (St. Georgskirche) at Oberzell—and in the paintings on the walls of the church of St. Peter at Niederzell, which belong to the first half of the eleventh century, and were discovered by Künstle and Begerle in 1901 (consult Künstle, "Die Künste des Klosters Reichenau im IX. und X. Jahrhundert," Freiburg, 1906). As a consequence of its prosperity, laxity and decay came upon the monastery, and caused its incorporation with the Diocese of Constance in 1541. The bishops of Constance thus became commendatory abbots, and the personnel of the monastery was reduced to twelve monks (inclusive of the prior) and a small number of novices. In 1757 the few remaining monks were forcibly removed to other monasteries, and the novitiate abolished. Members of neighbouring monasteries performed the religious services at Reichenau until the monastery was secularized in 1802.

ULRICH SCHMID.

Reichensberger, AUGUST, politician and author, b. at Coblenz, 22 March, 1808; d. at Cologne, 16 July, 1895. He studied jurisprudence at Bonn, Heidelberg, and Berlin (1827-30), entered the Prussian civil service as auscultator (1830), travelled through France (1833) and Italy (1839-40) became counsel in the land court at Cologne (1841) and Trier (1844), visited England (1846), became chamber-president in the land court (1848) and counsel of appeal (1849) at Cologne until his retirement from civil service in 1875. Except for the interval 1863-70, he was actively engaged as a parliamentarian from 1848 to 1885, in the Frankfort Parliament, Prussian National Assembly, and Erfurt Volkshaus. From 1851 to 1863 he was a member of the Prussian Second Chamber, being one of the founders and influential leader of the Catholic party. Elected delegate to the Second Chamber for three districts, he chose Coblenz as his constituency (1870-3); he represented Cologne (1879-85) and was a member of the Reichstag (1871-84). Co-founder of the Centre, tireless in his attention to parliamentary duties, and exercising a beneficent influence over his party, though Windthorst was the actual leader, Reichensberger was highly esteemed as an orator even by his political opponents. Though a sceptic in his youth, he returned to the Faith, deeply impressed by the imprisonment of Archbishop Clemens August (1837). He took an active share in the Catholic movement, was one of the founders of the Borromæus Society (1848), keenly interested in the budding Catholic press, presided at the Catholic Congress of Cologne

(1858), and championed religious freedom at numerous other gatherings.

He was an outspoken friend of art and praised Gothic in his writings. He was "not a real historian or archaeologist, nor a philosopher in the domain of art, but chiefly a practical apostle for the revival of a pure, German art incorporating Christian ideas" (Pastor). Until the end of his life he promoted the completion of the Cologne Cathedral, by word and pen, and founded (1841) at Coblenz the first Dom-bauverein (cathedral building society). The fresh, cheerful, amiable, and kindly personality of this versatile man exercised a powerful influence. Opposed to extreme theories, he maintained a temperate attitude in both secular and ecclesiastical politics. A list of his numerous literary productions covers twenty-five printed pages (Pastor, II, 449), and contains mainly occasional writings which appeared in newspapers and magazines. Most of his separately published works were concerned with art, history, and criticism: "Christliche germanische Baukunst" (1845); "Fingerzeige auf dem Gebiete der kirchlichen Kunst" (1854); "Vermischte Schriften über kirchliche Kunst" (1856); "Eine kurze Rede und eine lange Vorrede über kunst" (1863); works on Merian, G. G. Ungewitter, Pugin, etc. Of importance also were his political writings, "Die Wahlen zum Hause der Abgeordneten" (1858) the often reprinted "Büchlein Phrasen und Schlagwörter" (1862), etc., and his "Essay über Shakespere" (1871). His juridical studies are most poorly represented.

PASTOR, A. Reichensberger, sein Leben u. sein Wirken auf dem Gebiete der Politik, der Kunst u. der Wissenschaft. Mit Benützung seines ungedruckten Nachlasses (2 vols., Freiburg, 1899); KRAUS in Münchener Allgem. Zeitung (1900); GÖRRES in the Staatslexicon.

HERMANN CARDAUNS.

Reichensberger, PETER, jurist and parliamentarian, b. at Coblenz, 28 May, 1810; d. at Berlin, 31 December, 1892. He studied at Bonn and Heidelberg, and was successively counsellor at Coblenz (1843), of the court of appeal at Cologne (1850), and of the supreme court of Berlin (1859) until its dissolution (1879). From 1848 he was active as a parliamentarian in the Prussian Diet, the Erfurt Volkshaus, the Prussian second chamber (1849), the constituent North-German Reichstag (1857), the Customs' Parliament (1868), and the German Reichstag, representing in the last-mentioned the same district from 1871 to his death. From the first we find him labouring in close connexion with his elder brother August, and, like the latter, he defended the Rhenish system of laws against the minister von Kamptz ("Oeffentlichkeit, Mündlichkeit und Schwurgerichte", 1834). Like his brother he collaborated with the author in de Failly's much-discussed book (De la Prusse, 1842), and they jointly drew up a petition for electoral reform (1847). In the same year was published one of his best works: "Die Agrarfrage aus dem Gesichtspunkt der Nationalökonomie, der Politik und des Rechts". In 1858, when a collection of their parliamentary speeches appeared, the brothers published their political programme in the pamphlet "Die Wahlen zum preussischen Abgeordnetenhaus", and two years later "Deutschlands nächste Aufgaben für die Zukunft". Shoulder to shoulder the two Dioscuri toiled in the defence of constitutional monarchy against Radicalism and of religious autonomy against bureaucratic enslavement. Less versatile than his brother, Peter surpassed him in juristic keenness and intellectual depth. In special writings he combatted the income tax (1850), the abolition of the usury laws (1860), and the corn tax (1887). At the request of the ministry of justice he drafted a mortgage law (1851). Five years later he wrote on free agricultural laws, in 1872 on the relation between Church and State, in 1876 on the *Kulturkampf* and peace between

Church and State. In 1882 appeared his experiences of an old parliamentarian in the revolutionary year 1848. Though co-founder and leader of the Centre, he followed in many individual questions his own views, e. g. in the extension of the socialist law and in the question of the septennate.

GÖRRES in *Staatslexikon der Görresgesellschaft* (3rd ed., 1911).

HERMANN CARDAUNS.

Reifenstein, a former Cistercian abbey in Eichsfeld, founded on 1 August, 1162, by Count Ernst of Tonna. It was first called Albolderde and belonged to the electorate of Mainz. The monks, who came from the monastery of Volkerode near Mühlhausen, displayed a brisk economic activity, and in the thirteenth century acquired about fifty estates in the neighbourhood. Little is known of the domestic life of the abbey, even the sequence of the abbots being uncertain. A monk, Heinrich Pfeifer, left Reifenstein in 1521, became a Lutheran, preached rebellion in his native town Mühlhausen, shared the leadership with Thomas Münzer in the Thuringian Peasants' War, and in May, 1525, reduced Reifenstein to ashes. After the battle of Frankenhausen Pfeifer was seized near Eisenach and executed; he died impenitent. In 1524 only six monks were left in Reifenstein, which underwent a complete decline; in 1539 one remained, and the monastery was soon deserted. In 1575 there was a single monk, and in 1579, five or six, but they led so lawless a life that Reifenstein, according to a contemporary report, resembled a robbers' cave. The church was restored in 1582. The exemplary Abbot Philipp Busse (1589-1639) re-established discipline and order. During the Thirty Years' War the monastery was pillaged seven times and almost reduced to ashes, Abbot Philipp was carried off as a prisoner, and six or seven monks were murdered. The other monks sought shelter in caves, and begged bread from the peasants. The revival of the monastery was mainly due to the learned Abbot Wilhelm Streit (1690-1721). In 1738 it had twenty-four members, and survived the distress of the Seven Years' War. In 1802 the abbey fell to Prussia, was abolished on 2 March, 1803, and became a royal domain. The last abbot was Antonius Löffler (d. 1823). At present, agriculture and a school of domestic science for young women are carried on at Reifenstein. The imposing church, built in 1743, is used as a shed.

KLEMENS LÖFFLER.

Reiffenstuel, JOHANN GEORG, in religion ANACLETUS, theologian and canonist; b. at Kaltenbrunn (Tegernsee) 2 July, 1641; d. at Freising, 5 Oct., 1703. He entered the Franciscan (Reformed) Order in the Province of Bavaria, 3 Nov., 1658, and taught philosophy at Freising (1665), Landshut (1667-68), and Munich. He taught theology at Munich from 1671 till 1680, when he became guardian of the convent of Weilheim (1680-83). Meanwhile he had been chosen (1677) definitior of his province. In 1683 he began to teach canon law at Freising to the members of his order and the seminarians of that town. Ill-health obliged him to discontinue this teaching. In 1692 the Bishop of Freising appointed him director of the episcopal educational establishments of the town, besides which he filled offices in his order. He also devoted himself to the organization and cataloguing of the episcopal and capitular library of Freising. It would be hard to praise unduly his learning, virtue, and regularity in his religious life; he enjoyed the confidence of everyone. He

first published his "Theologia moralis" (Munich, 1692), which went through thirty editions, notably those of his fellow religious Massæus Kresslinger (Modena, 1740; Munich, 1742), and Dalmatius Kickh (Augsburg, 1762), who appended "additions", and a treatise on the "Propositiones damnatæ a summis pontificibus". An Antwerp edition (1743) includes the additions of Jacques Esteva on the Bull of the Crusades. The edition issued by Flavianus Ricci a Cimbria (Augsburg, 1777) modifies his doctrines: instead of the Probabilist which he was, he makes Reiffenstuel a Probabiliorist, in conformity with the official doctrine of his order. His "Jus canonicum universum" (Munich, 1700) accords Reiffenstuel first rank among canonists; he is equalled by none, and is highly esteemed even in modern times. Subsequent editions contain a "Tractatus de regulis juris", first published at Ingolstadt in 1733. The best editions are those of Venice (1730-1735), Rome (1831-32), Paris (1864). A three-volume *editio compendiaris* was published at Paris (1853). He is also the author of a "Vita S. Francisci Solani", and a work "De cæremoniis et ritibus ecclesiasticis".

Blätter*, II, 897-900 (Munich, 1873), LXXII, 590-93; HURTER, *Nomenclator*; SCHULTE, *Gesch. der Quellen und Lit. des canonischen Rechts* (Stuttgart, 1880), III, 154-55.

A. VAN HOVE.

Reims, ARCHDIOCESE OF (RHEMENSIS), comprises the district of Reims in the Department of Marne (Châlons-sur-Marne) and the whole Department of Ardennes. It was suppressed by the Concordat of 1802, which put the district of Reims in the Diocese of Meaux, and the Department of Ardennes in that of Metz, while two episcopal councils were established at Reims and Charleville to assist the Bishops of Meaux and Metz in their administration. The archdiocese was re-established in theory by the Concordat of 1817, and in fact in 1821; it was given Amiens and Soissons as suffragans in 1821, and Châlons-sur-Marne and Beauvais in 1822. The *Remi* (as the Gauls of this region were called), whose capital was *Durocortorum*, the present Reims, were early reduced to submission by Cæsar. In the third century Reims was the capital of Belgium Secundum: the Roman governors resided there, and there Valentinian sojourned in 367. As a centre of culture, it was then considered comparable to Athens, and a beautiful Gallo-Roman gate (the *Porte Mars*) is still to be seen there. When Christianity was introduced is not known; it may have developed locally, from the earliest centuries, by the coalition of different groups of Christians; but the true ecclesiastical organization and the succession of bishops began only with the mission of Sts. Sixtus and Sinicius, who established their see in the upper part of the city during the second half of the third century. Late traditions have represented St. Sixtus as a disciple of St. Peter, but Archbishop Hincmar, in the ninth century, considered him as a disciple of Pope St. Sixtus II.

Tradition gives to the Church of Reims a certain number of martyrs during the persecution of Diocletian; among others, Timotheus, Apollinaris, the priest Maurus, and the virgin Macra, whose relics were gathered by the Roman Eusebius. The chapel erected over their tomb afterwards became a collegiate church under the invocation of St. Timotheus. Imbetausius, who assisted at the Council of Arles (314), was the fourth Bishop of Reims; he transferred his cathedral to the centre of the city. It was much exposed to the barbarian invasions. Victoriously defended, about 366, by the consul Jovinus, a Christian, it had for bishops St. Maternian (c. 349-70) and St. Donatian (379-89), the patron of Bruges and of West Flanders. It saw the Vandals behead the

archbishop, St. Nicasius, on the threshold of his church, in 406 or 407, and at the same time kill his sister St. Eutropia, his deacon St. Florens, his lector St. Jucundus, and, a short time after, his disciple St. Oriculus, and Sts. Oricula and Basilica, the sisters of St. Oriculus.

St. Remigius (Remi), b. about 440, of a distinguished Gallo-Roman family, and whom St. Sidonius Apollinaris appreciated very highly as a rhetorician, became Bishop of Reims at the age of twenty-two. His history is known through a short biography, falsely attributed to Fortunatus, and a longer one, of a legendary character, written by Hincmar in 878. St. Remigius directed the Christianization of the neighbouring regions, sending Antimond into the country about Terouanne and Boulogne, St. Vaast into

NORTH PORTAL OF THE CATHEDRAL, REIMS

the Arras district, and creating the Bishopric of Laon; he brought about the marriage of Clovis with St. Clotilda, and baptized Clovis on 24 December, 496. His success had immense political and religious results; the Gallo-Roman populations would not have submitted to Clovis the Frank, had he remained a pagan, and his conversion made him the protector of the Catholics of Burgundy and Aquitaine, whose princes were Arians. The "Testament" of St. Remigius is apocryphal, as is the letter by which Pope Hormisdas was supposed to have appointed him Apostolic legate for the whole of Gaul. But it is true that St. Remigius laid the foundations of the political authority and religious power of the See of Reims, and that from his time the name of Reims was well esteemed and respected at Rome. He died 10 January, 535.

Among the bishops of Reims who followed him were: St. Nivard (649-72), who caused the monastery of Hauvillers to be rebuilt and established St. Bercarius there; St. Rieul (672-98), who built the monastery of Orbais; St. Rigobert (698-743), who baptized Charles Martel, was afterwards brutally driven from the see and replaced by a certain Milo, the king's favourite, and took refuge first in Aquitaine and then at Gernicourt, in the Diocese of Soissons, where he died; Tilpin (or Turpin, 753-800), a friend

of Charlemagne, whose name was afterwards, not later than the end of the eleventh century, forged to a chronicle of Charlemagne and Roland, very popular in the Middle Ages.

The political importance of the See of Reims, situated geographically between France and Germany, was manifested in the ninth century during the episcopates of Ebbo (816-35), whose disagreements with Louis the Debonnaire are matters of history; of Hinemar (845-82), the most illustrious of the archbishops of Reims; of Fulk (883-900), chancellor of Charles the Simple, who maintained the rights of the Carolingians against Eudes, Count of Paris, ancestor of the House of Capet; of Hervé (900-22), who laboured for the conversion of the Normans and, eventually rallying to the Capetians, crowned Robert king in 922. In 925 Count Herbert of Vermandois had his son Hugh, a boy of less than five years of age, consecrated Archbishop of Reims, but in 932 King Raoul caused Artaud (932-61) to be consecrated, and Hugh, who insisted upon his archiepiscopal rights, was excommunicated by a council in 948 and by Pope Agapetus in 949. The decisive part taken by Archbishop Adalbero (969-88) in the elevation of the Capets to the throne, the political part played by Archbishop Arnould (988-91 and 995-1021), as a partisan of the Carolingians, and the brief occupancy of the see by Gerbert (991-95), afterwards Sylvester II, are treated in the articles HUGH CAPET and SYLVESTER II, POPE. Manasses de Gournay (1069-80) was deposed for simony at the behest of Gregory VII in the Council of Lyons. Henry of France, second son of King Louis VI (1162-75), did much to secure the recognition in France of Pope Alexander III against the antipope Octavian, and resisted the attempts of the burghers to form themselves into a commune. William of the White Hands (1176-1202), uncle to Philip Augustus and cousin of Henry II of England, was made a cardinal in 1179, and was legate in France and Germany under Innocent III. It was he who granted to the burghers of Reims in 1182 the Wilhelmine Charter, a concession to the communal movement. Cardinal Gui de Paray (1204-06), formerly Abbot of Cîteaux, suppressed Manichæism in his diocese. Albéric de Humbert (1206-18) took part in the Albigensian War and, in 1211, laid the first stone of the present cathedral. In 1250, Johel de Mathefelon (1244-50), conferred the office of Grand Archdeacon of Reims on Cardinal Ottoboni, nephew of Innocent IV, who became pope under the name of Adrian V. Pierre Babette (1274-98) petitioned Gregory X in 1276 for the canonization of St. Louis, and obtained it from Boniface VIII in 1297. The Dominican Humbert, Dauphin of Viennois, occupied the See of Reims from 1352 to 1355. Guy de Roye (1390-1409), who was killed in Italy on his way to the Council of Pisa, was the author of the "*Dortrinale Sapientie*". Simon de Cramaud (1409-13), created cardinal in 1413, had an important share in putting an end to the Great Schism. Renaud de Chartres (1414-44), made cardinal in 1439, chancellor to Charles VII, showed himself very unfavourable to the mission of Joan of Arc; when the heroine was captured (23 May, 1430) he wrote a letter to the inhabitants of Reims in a spirit hostile to her, and he took no steps to rescue Joan from his suffragan, Bishop Cauchon of Beauvais. Renaud was one of the plenipotentiaries who signed the treaty of Arras between Charles VII and the Duke of Burgundy. Jacques Juvenel des Ursins (1444-9) was commissioned by Charles VII, in 1447, to notify Amadeus of Savoy that he must abdicate the papal throne, and to treat with Nicholas V for the restoration of peace to the Church. Jean Juvenel des Ursins (1449-73) was ordered by Callistus III to revise the process of Blessed Joan of Arc; he also wrote a history of the reign of Charles VI. Guillaume

Brignonnet was created cardinal in 1493 and occupied the See of Reims from 1497 to 1507. His successor, Charles Dominique de Carrette (1507-8) was Cardinal of Final after 1505. Robert de Lenoncourt (1508-32) enriched the cathedral with sumptuous tapestries representing the life and death of the Blessed Virgin, and the church of St. Remigius with tapestries on the life of its titular saint.

In 1553 the House of Lorraine began to acquire a hold upon the See of Reims, where it was first represented by John V of Lorraine (1533-8), next by Cardinal Charles of Lorraine (1538-74), and then by Cardinal Louis de Guise (1574-88). In 1585 Reims had taken sides with the League, and the Duke of Mayenne and the Maréchal de Saint Paul ruled as masters in the city until 1594. The "*Journalier*" of Jean Pussot, the carpenter, is even now a capital source of information on the League spirit which animated the people of Reims, showing at the same time how they gradually rallied to Henry IV. Philippe du Bec, one of the prelates who had laboured most earnestly for Henry IV's conversion, was by him nominated Archbishop of Reims in January, 1595. The see was next occupied by another Guise, Louis of Lorraine, made a cardinal in 1615. At his death the see was given to William Gifford, an Englishman by origin. This personage, who had been successively canon-theologian of the cathedral of Milan under St. Charles Borromeo, dean of St. Peter's at Lille, rector of the University of Reims, a monk in the monastery of St-Benoît en Voivre, at Metz, and founder of two Benedictine houses at St. Malo and Paris, spent his whole life helping the expatriated English Catholics in France and the apostles who were going thence, with all caution, to strengthen persecuted Catholicism in England. He wrote a treatise on predestination and a work against the Calvinists entitled "*Calvino-Furcismus*". His successor, in 1629, Henry of Lorraine, the adventurous Guise who afterwards attempted an expedition against Naples, never received Holy orders, and in 1641 Richelieu compelled him to give up the emoluments of the archbishopric. In the course of the seventeenth century two religious women who belonged to the House of Guise had also been abbesses at St-Pierre-les-Dames at Reims, and Mary Stuart, at the age of six, had spent some time and received a part of her education there.

Among the later archbishops of Reims may be mentioned: Antonio Barberini (1657-71), cardinal in 1627; Charles-Maurice Le Tellier (1671-1710), who, unhappily, caused to be demolished the superb archiepiscopal palace raised by men of preceding ages, distinguished himself by his hatred of the Jesuits and his antipathy to Roman doctrines, and bequeathed his magnificent library to the Abbey of Ste-Geneviève at Paris; François de Mailly (1710-31), cardinal in 1698; Charles-Antoine de La Roche Aymon (1762-77), cardinal in 1771; Alexandre-Angélique de Talleyrand-Périgord (1777-1801), who was a deputy in the States-General of 1789, combated the project of the civil constitution of the clergy in several of his writings, emigrated under the Revolution, refused to resign after the Concordat, remained near Louis XVIII after 1803, returned with him to France in 1814, accepted his dismissal from the Archbishopric of Reims in 1816, and in 1817 was made a cardinal and Archbishop of Paris; Jean-Baptiste-Marie-Antoine de Latil (1824-39), chaplain to the future Charles X from 1804, cardinal in 1826, joined Charles X in England, and spent the last nine years of his life away from his diocese; the theologian Thomas Gousset (1840-66), cardinal in 1851; the writer and preacher Landriot (1867-74), famous during the Franco-German War through his protest against the military execution of Abbé Miroy, one of his parish priests, by the Germans in the middle

of an armistice; Benoît-Marie Langenieux (1874-1905), one of the most illustrious prelates of the end of the nineteenth century, who took the initiative in leading pilgrimages of Christian workmen to the Holy See, and thus played a part in the great social movement which culminated in the encyclical "*Rerum novarum*". He presided in 1893, as papal legate, at the Eucharistic Congress in Jerusalem, when all the Eastern Churches, whether united with Rome or separated, bore testimony to their faith in the Eucharist. He was the first cardinal to visit the Holy Land since the Crusades. In 1896 he organized the festival to celebrate the fourteenth centenary of the baptism of Clovis.

In the Merovingian period, Reims apparently enjoyed ecclesiastical supremacy over the eleven cities of Soissons, Châlons, Vermand, Arras, Cambrai, Tournai, Senlis, Beauvais, Amiens, Terouanne, and Boulogne; and when St. Remigius detached a part of his own diocese to form that of Laon, it made one more suffragan for Reims. The erection of the Bishopric of Cambrai into an archiepiscopal see by a Bull dated 12 May, 1559, took from the metropolitan jurisdiction of Reims the Dioceses of Cambrai, Arras, and Tournai. At the same time the See of Terouanne was suppressed, and out of its territory three new dioceses were made: one of them, Boulogne, dependent on Reims; the other two, St. Omer and Ypres, dependent on Cambrai and Mechlin. The archbishops of Reims, *legati nati* of the Holy See, had, as primates, jurisdiction over the other metropolitans of Gaul. From the time of Louis IV D'Outre-Mer they had been counts. They were entitled to coin money, had their town guard, and levied armies. As soon as a new archbishop was elected he made a visitation of his suffragans; in each city, on the arrival of the metropolitan, business was suspended, the people and the clergy, magistrates, even princes, went to meet him, prisons were thrown open, and exiles were recalled from banishment. The inhabitants of Saint-Quentin and Saint-Valéry were under his judicial jurisdiction, and had to bring their pleas to the archiepiscopal court of Reims. In 999 a Bull of Sylvester II recognized the right of the archbishops of Reims to crown the kings, and, at the coronation of Philip I, Archbishop Gervais took advantage of the presence of the papal legates to proclaim once more this right, which right Alexander III, by a Brief of 1179, prohibited any other archbishop from arrogating to himself. Louis VII, at his coronation, raised the Countship of Reims to the rank of a duchy and peerage of the kingdom.

On the tomb of St. Remigius, as built by Archbishop Robert de Lenoncourt, there are niched figures representing the twelve peers who carry the symbols of the coronation: on the right, the six spiritual peers—the Archbishop of Reims, who anointed the king; the Bishop-Duke of Laon, who held the sacred *ampulla*; the Bishop-Duke of Langres, with the sceptre; the Bishop-Count of Beauvais, with the emblazoned surcoat; the Bishop-Count of Châlons, with the royal ring; the Bishop-Count of Noyon, with the baldric—and on the left the six temporal peers—the Duke of Burgundy, holding the crown; the Dukes of Guyenne and Normandy, and the Counts of Champagne, Flanders, and Toulouse. The ceremonies of the coronation at Reims presented two characteristic features: the use of the sacred *ampulla* and the touching for scrofula (king's evil). According to the legend—of which, however, St. Avitus, a witness of the baptism of Clovis, was ignorant in the fifth century, and the first trace of which appears in Hincmar—the holy *ampulla* was brought by a dove to St. Remigius when he was in the act of crowning Clovis. This *ampulla* was a small crystal vial, two-thirds full of balm; its superb ornamentation was added later. It was kept at Saint-

Remi, in a reliquary which also contained a golden needle and a silver paten. When needed for a coronation, the Abbot of Saint-Remi brought it to the cathedral. The golden needle was used to mix the balm, taken from the *ampulla*, with chrism on the silver paten. The holy *ampulla* left Reims only once, when Louis XI, being sick at Plessis-les-Tours in 1483, hoped that an unction from it would cure him. The authenticity of the sacred *ampulla* began to be questioned when Henry IV could not be crowned at Reims because the Guises occupied Champagne; on this occasion an *ampulla* was used which was preserved at the abbey of Marmoutiers, and which had cured St. Martin. Jean-Jacques Chifflet, first physician to Philip IV of Spain, in 1651 wrote a book expressly to disprove the authenticity of the Reims

CATHEDRAL, REIMS, NAVE AND CHOIR

ampulla. In 1793 the vial was broken in the public square of Reims; but a few days before this was done, a Constitutional parish priest had taken out some of the balm and put it in a place of safety; it was from this portion that Charles X was anointed. The legendary privilege of healing scrofula on the day of the coronation was supposed to have been given by St. Remigius to the kings of France and confirmed to them by St. Marcoul, Abbot of Nanteuil (d. 552), whose remains rested after the ninth century at Corbeny, in the Diocese of Laon—hence the pilgrimages made by several kings, after their consecration, to Corbeny. Louis XIII was the last king to make this pilgrimage (in 1610); Louis XVI had the relics of St. Marcoul brought to the Abbey of Saint-Remi, so as to avoid going out of Reims. Louis XVIII did not touch for the scrofula, but Charles X did, the day after his consecration, at the hospital of Saint-Marcoul, changing the formula, "*Le roi te touche, Dieu te guérit*" (The king touches thee, God heals thee), to "*Le roi te touche, Dieu te guérisse*" (The king touches thee, may God heal thee).

Several of the popes visited Reims. In the early days of the Carolingian dynasty it was the scene of two famous interviews: between Stephen III and Pepin the Short, and between Leo III and Charle-

magne. In 816 Louis the Debonnaire was crowned by Stephen V in the cathedral of Reims, and the pope conferred the title of Augusta on Queen Ermengarde. Pope Leo IX came to Reims in September, 1049, during the episcopate of Guy de Chatillon; he consecrated the church of St. Remigius, and decreed that thenceforward the feast of that saint should be kept on the first day of October, throughout the whole kingdom. During the episcopate of Raoul de Verd, Pope Callistus II presided at a council held at Reims from 20 to 30 October, 1119. St. Norbert came thither barefoot and in penitential garb, and Callistus confirmed the authority granted to him by Pope Gelasius, to preach the Gospel in all places. The council drew up a decree for the Truce of God, and excommunicated Bourdin, the antipope, and the Emperor Henry. Pope Innocent II, on 19 October, 1131, in the episcopate of Renaud de Martigné, opened at Reims a council at which St. Bernard appeared, and the antipope Anacletus was excommunicated. While this council was sitting, the pope crowned (25 October) Louis the Younger, afterward Louis VII, in the presence of his father Louis VI. Lastly, at the request of Bernard, Bishop of Hildesheim, he canonized St. Godehard. Pope Eugene III, on 22 March, 1148, opened at Reims a council at which St. Bernard forced Gilbert de La Porrée to retract his errors on the essence of God, and Samson de Mauvoisin, Archbishop of Reims, caused Eon de l'Etoile to be condemned.

From the ninth century to the eleventh, the buildings of a monastery for women founded by St. Gombert were used by poor children who desired to learn, who lived on alms, prayed in the chapel of St. Patrick, and attended the chapter schools. This was the origin of the "Collège des Bons Enfants", the functions of which were regulated by Juhel's Charter, in 1245, and which prepared a certain number of boys for the priesthood. Between 1544 and 1546, Paul Grand Raoul, the *scholasticus* of Reims, had the college rebuilt, and it was in this building, by that time still further enlarged, that Cardinal Charles of Lorraine installed the university, for which he had obtained from Paul III a Bull of erection (5 January, 1548) and the foundation of which was sanctioned by Henry II in March, 1548. It was to comprise the four faculties of arts, theology, law, and medicine. The faculty of theology was completed through the liberality of Antoine Fournier (b. at Reims, 1532), who administered the Diocese of Metz for another Charles of Lorraine. This university was the stronghold of the League in Champagne, and in 1588 it adhered to the solemn declaration by which the Sorbonne declared the French people to be absolved from their oath of allegiance to Henry III after the assassination of the Duke of Guise. But when Henry IV had had himself crowned at Chartres, and the most fiery Leaguers of Reims were contemplating going into exile, the faculty of theology gave the signal for submission. In 1606, when, through the favour of Archdeacon François Brulart, the Jesuits set up a college at Reims, they asked to be incorporated in the university, and in 1609 they obtained their request. Repeated conflicts, however, arose between the Jesuits and the university, first in 1617, then in 1660 and 1664, again in 1722 on the question of Jansenism, and again in 1752. In 1682 the theological faculty of Reims adhered to the Four Articles, and in 1688, when Innocent excommunicated Lavardin, Louis XIV's ambassador, it voted by acclamation in favour of an appeal to a council. Until 1723 it refused to submit to the Bull "Unigenitus", and one of its doctors, Jean Lacourt, was even sent to the Bastille at this time for six months. (On the foundations at the University of Reims made in the sixteenth century with a view to the Catholic apostolate in England, see ALLEN, WILLIAM.)

The chapter of Reims possessed rights over 150

villages of the diocese. History records ■ having been members of that chapter 5 popes, 23 archbishops, 53 cardinals, and a considerable number of bishops; pursuant to what was known as the "Jouanine privilege". Obtained under Jean de Craon, its members were exempt from all jurisdiction except the pope's. Among them may be mentioned: St. Bruno, founder of the Carthusians (1030-1101), who was at one time *scholasticus* of Reims; Otton of Châtillon, who became pope in 1088 under the name of Urban II; Guillaume Coquillart, who died about 1490, in his younger days, as a law student, the author of celebrated jocose poems; Maueroix (1619-95), the friend of Boileau and La Fontaine. A very curious festival which the chapter used to hold in the Middle Ages was the procession of the herrings. At the beginning of Lent, they went in Indian file from the cathedral to St-Remi, each dragging a herring after him by a thread—a symbol of the Lenten abstinence—and each trying to put his foot on the herring dragged by the next canon ahead of him.

The celebrated cathedral of Reims is dedicated to the Blessed Virgin. The edifice raised by Hincmar having been destroyed by a fire in 1211, Bishop Albéric de Humbert undertook to build the present cathedral in its place. It was completed in one hundred years—from 1211 to 1311—and hence the admirable unity of design and execution which characterize it as an example of Gothic architecture. Jean d'Orbais seems to have been the first architect, originating the plan and building the apse; the great doorway, crowned with the famous gallery containing forty-two statues of kings of France, is chiefly the work of Robert de Coucy, in the beginning of the fourteenth century. In the treasury of the cathedral is preserved the chalice of St. Remigius (see illustration to CHALICE), from which the kings of France used to communicate under the species of wine at the end of the coronation ceremonies, and which, according to tradition, was cut from the gold of the celebrated vase of Soissons broken by one of Clovis's soldiers. On 1 Feb., 1886, the Cathedral of Reims was affiliated to the illustrious Lateran Basilica, thereby participating in the privilege of all the indulgences and spiritual favours attached to the cathedral of Rome. In 1891 the canons of St. Peter at Rome presented to the chapter at Reims a portion of the relics of St. Petronilla; the translation of these sacred bones to Reims took place on Whitsunday, 1892.

The Benedictine monastery of St-Remi was long independent of the archbishops. The present church of St-Remi was begun in 1005 by Airard, abbot of the monastery, and some of the capitals date from that period. The work was resumed on a simpler plan by Abbot Thierry in 1039, when the south transept was built; the apse dates from 1170, in the time of Abbot de Celles. Carloman, Louis IV D'Outre-Mer, Lothair, and Hincmar wished to be buried in this church. Its treasure, made up of the offerings of kings and princes who visited the tomb of St. Remigius, would be of considerable value if it had not been brought into requisition on several occasions of public necessity—now to ransom a royal prisoner, now to supply money for the purposes of war. Then, acting at the king's behest, the archbishop issued an order that the gold and silver reliquaries (*chasses*) should be sent to the mint; the abbey received specie to the amount of one-fourth the value of the metal coined, and the balance in promissory notes which were rarely redeemed. The church of St-Remi has been a "minor basilica" since 28 June, 1870.

The church of Ste-Clotilde, the foundation stone of which was laid on 26 June, 1898, on the centenary of the baptism of Clovis, was opened in March, 1901, and raised to the rank of a basilica by Leo XIII on 5 March, 1902. At present it possesses 70 *chasses* and nearly 1000 relics. The centenary celebration drew together an attendance of 77 prelates and 69 pilgrim-

ages, and was the occasion of seven congresses. Leo XIII sent Mgr Ciocci, pontifical master of ceremonies, to preside at the solemn recognition of the relics of St. Remigius and their transfer to a new *chasse*. The same pope granted to France the privilege of a national jubilee, and wrote a Latin "Ode to France", which was the inspiration of Theodore Dubois's oratorio "The Baptism of Clovis". The hospital of Saint-Marcoul was founded in 1645 by Marguerite Rousselet for cases of contagious scrofula—i. e. tuberculosis. It was the first institution to practise isolation of tuberculosis patients.

The coronation of Charles VII at Reims (17 July, 1429), brought about by Joan of Arc, is an historical event of especial importance. Joan's father was present at the ceremony, and had his lodgings at Reims in the "Hôtel de l'Âne Rayé"; the archives of the city still preserve the accounts of expenses incurred for his entertainment. Joan wrote from Reims (17 July) a letter to Philip the Good, Duke of Burgundy, inviting him to make peace; in August, 1429, and March, 1430, she wrote from Bray-sur-Seine and from Sully three letters to her "very dear and good friends and loyal Frenchmen, dwelling in the city of Reims", exhorting them not to lose heart under the renewed menaces of the Duke of Burgundy and the English.

The Abbey of Hautvilliers, in the Diocese of Reims, was the original home of the heretic Gottschalk. Besides the saints already mentioned, the following are especially honoured in the diocese: St. Gertrude, virgin and martyr (d. 362); St. Paul of Reims, solitary at Glanum (now Saint-Remy) in Provence, then Bishop of Trois Châteaux (second half of the fourth century); St. Victor of Mouzon and his sister Suzanne, martyrs in 420; St. Emilius, father of St. Remigius; St. Céline, his mother; St. Principius, his brother; St. Balsamus, his nurse; St. Celsinus, his foster brother; Sts. Lupus, Bishop of Soissons, and Genebald, Bishop of Laon, his nephews; St. Latro, his grandnephew (all sixth-century); the saints of the little Irish colony which St. Remigius established in the valley of the Marne; St. Gibrin, his brothers Sts. Hélan, Trésain, Germanus, Vêran, Abran, and Pétran, and his sisters Sts. Francle, Prompta, and Posenna (sixth century); St. Thierry, St. Remigius's deacon, and Abbot of Mont d'Hor near Reims (d. c. 533); St. Rogatian, Count of Réthel, converted by St. Remigius, and his son St. Arnould, who was perhaps Bishop of Tours, and was assassinated at Reims; St. Leonard, a disciple of St. Remigius, who refused a bishopric offered to him by Clovis and died a solitary in the Diocese of Limoges (sixth century); St. Bertaud (472–545), a Scotchman (Scotus) by origin, solitary at Chaumont-Porcien, his friend St. Aumond, Bishop of Têrouane, and his disciples Sts. Olive and Libérète (sixth century); St. Attolus, disciple of St. Remigius, founder of twelve hospitals, his son St. Elan, and his daughter St. Euphrasia (sixth century); St. Theodulph (d. 590), Abbot of Mont d'Hor, who left among the neighbouring populations such a reputation as a ploughman that his plough was preserved as a relic; St. Basle the hermit, a great pro-

jector of animals, and his disciple St. Sindulph (sixth century); St. Walfroy, monk at Ivois (sixth century); St. Baudry and his sister St. Bode, children of Sigebert, King of Austrasia, founders of the monastery of Saint-Pierre-les-Dames at Reims, and their niece St. Dode, abbess of the monastery (seventh century); St. Gombert, missionary in Scotland and martyr, and his wife St. Bertha, foundress of the Abbey of Avenay, who was assassinated (seventh century); St. Mérolain, Irish priest, killed near Reims (eighth or ninth century); the shepherd St. Juvinus, solitary (d. 961); St. Flotilda, ecstatic (tenth century); Blessed Odo, Canon of Reims, b. 1042, at Châtillon sur Marne, prior of Binson (a priory the chapel of which still exists and was restored by Cardinal Langénieux), afterwards pope under the name of Urban II, whose cultus, existing from time immemorial, was recognized by the Sacred Congregation of Rites, 12 July, 1881, at

the petition of Cardinal Langénieux; St. Maurilis of Reims, Archbishop of Rouen (1055–67); St. Gervinus, Canon of Reims, Abbot of S. Riquier (d. 1073); Ven. Richard (d. 1046), Canon of Reims, Abbot of Saint Vanne at Verdun, ambassador from the Emperor Henry to King Robert, and to whom, in concert with St. Odilo, Abbot of Cluny, is due the adoption in Neustria of the "Peace of God"; St. Albert, Bishop of Liège, assassinated at Reims in 1192 by partisans of the Em-

HOTEL DE VILLE, REIMS

peror Henry VI; St. Gerard, Canon of Reims, Bishop of Cambria (d. 1048); Blessed Roger, an Englishman by origin, first abbot of the Cistercian Abbey of Elan (d. 1175); Blessed Roland, Cistercian monk of Chéhéry (d. 1160); Blessed Humbert (d. 1148), Guerric (d. 1157), and Minoculus (d. 1186), abbots of the Cistercian abbey of Igny, the last-named of whom was sent by Pope Lucian as ambassador to the Emperor of Germany and died Abbot of Clairvaux; St. John Baptist de La Salle (1651–1719), b. at Reims, Canon of Reims, founder of the Institute of Christian Brothers; Ven. Jacques Lion (1671–1738), a native of Fumay, Hieronymite monk.

Among the distinguished persons connected with this diocese may also be mentioned: Dom Marlot (1596–1667), the Benedictine, b. at Reims, and the author of a history of the city which is still authoritative; Pétau (1583–1652), the first to be honoured with a professorship of rhetoric in the Jesuit college at Reims; Colbert (1619–83), the famous minister, b. at Reims; Mabillon (1632–1707), b. at St. Pierre-mont; Ruinart (1657–1709), author of the "Acta Martyrum", b. at Reims; the Abbé Pluche (1688–1761), b. at Reims, professor in the college of Reims, author of the "Spectacle de la Nature" and the "Histoire du Ciel"; Tronson Ducoudray (1750–98), who defended Marie Antoinette; Linguet (1736–94), the controversialist who publicly defended the Jesuits after their expulsion from France; Anquetil, director of the Seminary of Reims, and author of a history of the city (1756).

Besides the tomb of St. Remigius, the principal pilgrimages of the diocese are: Our Lady of Hope,

or of Mercy, at Mézières, dating back to 930; Our Lady Help of Christians (Notre Dame de Bon Secours), at Neuvizy, dating from 1752; the Virgin at the Oak, a pilgrimage organized by Archbishop Langénieux, in 1880, to a little image which had been venerated by pious souls since the fourteenth century; the pilgrimage to the relics of St. Helena, the empress, at Hautvilliers. Before the Law of Congregations of 1901 was put into effect, there were in the Diocese of Reims Capuchins, Jesuits, Sulpicians, and various orders of teaching brothers; there are still Trappists, White Fathers of Our Lady of Africa, and Lazarists. Many orders of women have had their origin in the diocese: the Canonesses of the Hôtel Dieu, dating from the sixth century; the Sisters of the Holy Infant Jesus, founded in 1670 by Canon Roland for the gratuitous instruction of poor girls, with the mother-house at Reims, a foundation which suggested to St. John Baptist de La Salle, a friend of Canon Roland, the idea of accomplishing a similar work for boys; the Sisters of the Divine Providence, a nursing and teaching institute, founded in 1850, with mother-house at Reims; the Sisters of St-Marcoul, who care for patients afflicted with cancer, paralysis, and scrofula, in the hospital of St-Marcoul at Reims. At the close of the nineteenth century the religious congregations in the diocese had the direction of 3 *crèches*, 52 nurseries, 14 orphanages, 2 workshops, 2 professional schools, 14 hospitals or hospices, 11 houses of religious women devoted to the care of the sick in their own homes, 2 houses of retreat. At the end of 1909 the Diocese of Reims contained 520,650 Catholics, 47 parishes, 545 succursal parishes, and 67 curacies (of which, under the Concordat, the salaries of 9 had been paid by the State).

GEORGES GOYAU.

Reims, SYNODS OF.—The first synod said to have been held at Reims by Archbishop Sonnatius between 624 and 630 is probably identical with that held at Clichy (Clippiacum) in 626 or 627. In 813 Archbishop Wulfar presided at a synod of reform (Werminghoff in "Mon. Germ. Hist.: Concilia ævi Carol. I", I, Hanover, 1904, 253 sq.). On 17 June, 991, Abp. Siguin of Sens presided in the basilica of St. Basle, near Reims, over the synod which deposed Abp. Arnulf of Reims (Schlockwerder, "Das Konzil zu St. Basle", Magdeburg, 1906). In 1049, Leo IX presided at a reformatory synod (Drehmann, "Papst Leo IX u. die Simonie", Leipzig, 1908). In 1115 a synod was held at which the cardinal legate Cuno of Præneste excommunicated King Henry. In 1119 Calistus II convened a synod for the purpose of concluding peace with Henry V. There were present 15 archbishops, over 200 bishops, and as many abbots. In 1148 Eugene III was present at a synod against Gilbert de la Porée (q. v.) and the fanatic Eon de l'Estoile. In 1164 Alexander III presided at a synod which urged the crusade against Emperor Frederick I. In 1407 Abp. Guido III convened a synod to abolish the abuses that had crept into the Church of Reims during the Western Schism. In 1528 Abp. Robert III held a synod against Luther. In 1564 Cardinal Charles of Lorraine convened a reformatory synod to enforce the Tridentine decrees. In 1583 Cardinal

Francis of Guise held a synod at which 27 reformatory decrees were enacted. After a lapse of almost three centuries Cardinal Gousset of Reims convoked a synod at Soissons in 1849; another, at Amiens in 1853; a third, at Reims in 1857. The acts of the last three synods are printed in "Collectio Lacensis", IV, 91-246.

For the acts of the preceding and many other synods of minor importance, see GOUSSET, *Actes de la province ecclésiastique de Reims* (Reims, 1841); HEFELE, *Conciliengesch.*

MICHAEL OTT.

Reinmar of Hagenau, a German minnesinger of the twelfth century, surnamed in the MSS. *der Alte* (the old) to distinguish him from later poets of that name. He is undoubtedly identical with the Reinmar referred to by Gottfried von Strasburg in his "Tristan" as the nightingale of Hagenau, the leader of the choir of nightingales, whose voice had just been hushed by death and who was to be succeeded by Walther von der Vogelweide. From this it may be inferred that the poet or his family came from Hagenau in Alsace (though there is also a place of that name in Austria), and that he died shortly before 1210, when Gottfried's "Tristan" was written. Otherwise we know nothing of Reinmar's life except what may be gathered from his verses. He certainly was in Vienna in 1195 at the Austrian court; he also participated in a crusade, presumably that undertaken by Duke Leopold in 1190. It seems that he lived for a long time at the Austrian court, where he enjoyed a high reputation and was much admired, even by the greatest of all minnesingers, Walther von der Vogelweide, who acknowledges himself as Reinmar's pupil, though this must not be taken in a literal sense. Reinmar's lyrics show the Romance influence that had been predominant since Veldeke and Hausen. They are perfect in form and thoroughly "courtly" in sentiment. Passion and natural feeling are repressed, *mäze*, correctness and propriety, reign supreme. General reflections are common, concrete images and situations few. When, however, Reinmar breaks through the bounds of convention and allows his heart to speak, as in the lament for the death of the duke, which is put into the mouth of the duchess herself, he shows lyric gifts of a high order. But this does not often happen, and most of Reinmar's poems show more elegance of form than beauty of sentiment. In a society, however, where form was valued more than contents, such poetry was bound to meet with favour. Reinmar's poems are edited in Lachmann and Haupt, "Minnesangs Frühling", XX (4th edition, Leipzig, 1888).

H. und Heinrich von Rugge in *Quellen und Forschungen zur Sprach- und Culturgesch. der germanischen Völker* (Strasburg, 1874), 4; PAUL AND BRAUNES, *Beiträge zur Geschichte der deutschen Sprache- und Literatur*, 2487 sq.; BURDACH, R. *der Alte und Walther von der Vogelweide* (Leipzig, 1880).

ARTHUR F. J. REMY.

Reisach, CARL VON, b. at Roth, Bavaria, 7 July, 1800; d. in the Redemptorist monastery of Contamine, France, 22 December, 1869. On the completion of his secular studies in Neuburg on the Danube, he studied philosophy at Munich (1816), and jurisprudence at Heidelberg, Göttingen, and Landshut, securing at the last (1821) the Degree of *Doctor Juris Utriusque*. Devoting himself a little later to the study of theology, he received minor orders at Innsbruck in 1824, was ordained in 1828 after philosophical and theological studies in the German College at Rome, and in the following year graduated Doctor of Theology. Pius VII soon appointed him rector of studies at the College of the Propaganda, an office which brought him into close relations with the succeeding pope, Gregory XVI. Urged by this pontiff to devote special attention to

CATHEDRAL OF NOTRE-DAME, REIMS

BEGUN BY BISHOP ALBERIC DE HUMBERT IN 1211, COMPLETED IN 1311

the affairs of the Catholic Church in Germany, he attacked the current anti-ecclesiastical views and tendencies, especially with regard to mixed marriages, in his work "Was haben wir von den Reformatoren und Stimmführern des katholischen Deutschland unserer Tage zu halten?", which appeared at Mainz in 1835 under the pseudonym Athanasius Sincerus Philalethes. In 1836 he became Bishop of Eichstätt (Bavaria), and, by the foundation of the boys' seminary (1838) and the erection of the lyceum (1843), rendered the greatest services to the ecclesiastical life of the diocese. As delegate of the pope and the Kings of Prussia and Bavaria, he mediated in the Prussian ecclesiastical dispute, and the rapid settlement of the "Cologne muddle" (Kölner Wirren) was due primarily to him. In recognition of his services, he was named in 1841 Coadjutor, and in 1847 Archbishop of Munich-Freising. His zeal on behalf of the Church having rendered him displeasing to the Government, he was, at the request of King Maximilian II of Bavaria, summoned to Rome by Pius IX as cardinal-priest, with the title of St. Anastasia. He conducted the concordat negotiations with Württemberg and Baden, took a prominent part in the preparations for the council, became in 1867 President of the Congregation of Ecclesiastico-political Affairs, in 1869 first legate of the council, was consultant of the Congregation for the Index, for the publication of the ecclesiastical canons of the Eastern Churches, for Extraordinary Ecclesiastical Affairs, for the Examination of Bishops, member of the Congregation of the Propaganda and of Sacred Rites, Minister of Education for the Papal States, and in 1868 Cardinal-Bishop of Ostia.

PATRICIUS SCHLAGER.

Reisch, GREGOR, b. at Balingen in Württemberg, about 1467; d. at Freiburg, Baden, 9 May, 1525. In 1487 he became a student at the University of Freiburg, Baden, and received the degree of *magister* in 1489. He then entered the Carthusian Order. During the years 1500-1502 he was prior at Klein-Basel; from 1503 to shortly before his death he was prior at Freiburg. He was also visitor for the Rhenish province of his order. As visitor he made every exertion to combat Lutheranism. He was a friend of the most celebrated Humanists of the era, e. g., Erasmus, Wimpfeling, Beatus Rhenanus, Udalricus Zasius, and the celebrated preacher, Geiler of Kaisersberg. John Eck was his pupil. Reisch had a great reputation for adaptability and was regarded as an "oracle". He was one of the most conspicuous, if not the most conspicuous, of the intellectual men at the commencement of the new era who sought to prepare encyclopedic works of knowledge. His chief work is the "*Margarita philosophica*", which first appeared at Freiburg in 1503 (not as early as 1496). It is an encyclopedia of knowledge intended as a text-book for youthful students, and contains in twelve books Latin grammar, dialectics, rhetoric, arithmetic, music, geometry, astronomy, physics, natural history, physiology, psychology, and ethics. The usefulness of the work was increased by numerous woodcuts and a full index. The form is catechetical: the scholar questions and the teacher answers. The book was very popular on account of its comparative brevity and popular form, and was for a long time a customary textbook of the higher schools. Alexander von Humboldt said of it that it had "for a half-century, aided in a remarkable manner the spread of knowledge". In 1510 Reisch also published the statutes and privileges of the Carthusian Order, and assisted Erasmus of Rotterdam in his edition of Jerome.

KLEMENS LÖFFLER.

Relationship (CARNAL AND SPIRITUAL).—The theologians understand by relationship in general a certain connexion of persons established either by nature or by the civil or canon law. Hence they distinguish three kinds, natural, legal, and spiritual. With legal relationship we are not here concerned. Natural or carnal relationship originates in carnal intercourse of man and woman, whether marital or not. It is twofold: consanguinity and affinity. Spiritual relationship has been introduced by ecclesiastical law. It is associated with the administration of the Sacraments of Baptism and Confirmation. It runs in each case between the minister and the recipient of the sacrament and also between the sponsors on the one hand and the recipient and his parents on the other. According to the existing discipline it operates as a diriment impediment of marriage between the persons named. (See AFFINITY; CONSANGUINITY; MARRIAGE.)

JOSEPH F. DELANY.

Relatives, DUTIES OF.—The general precept of charity obliging us to love our neighbour as ourselves is of course applicable to our relatives. The tie of kinship, particularly in the nearer degrees, confers upon the command a special emphasis. Thus, there is established an order of preference in favour of relatives in the observance of the law. St. Thomas teaches that the strength of the affection we have for another is contingent upon the intimacy of the bonds that unite us. No set of relations antedates that of the family, nor is there any more lasting. Ordinarily, therefore, we are to love those of our own kindred more than mere friends, and that notwithstanding whatever excellences these latter may happen to possess. This is true not only of natural affection, but also of the supernatural act of charity. Theologians have endeavoured to determine what is the respective rank enjoyed by relatives as claimants for our attachment. They seem to be pretty well agreed that husband or wife hold the first place; then follow children, next parents, brothers, and sisters. It is obvious however that the succession here indicated, valid as it may be in the abstract, is often for good reasons subject to change. In any case its inversion would not be a grievous sin. There is no doubt but that we are bound to succour relatives in distress. All that is usually laid down in general about the duty of almsgiving, both corporal and spiritual, holds good with added force when our kinsfolk are to be the recipients. Other things being equal, they are to be aided if need be to the exclusion of any one else. A disposition to set no store by this obligation would seem to deserve the condemnation of St. Paul in the First Epistle of Timothy (v, 8): "If any man have not care of his own, and especially those of his own house, he hath denied the faith and is worse than an infidel."

JOSEPH F. DELANY.

Relativism.—Any doctrine which denies, universally or in regard to some restricted sphere of being, the existence of absolute values, may be termed Relativism. Thus one form of Relativism asserts that we are conscious only of difference or change (Hobbes, Bain, Höffding, Wundt. Cf. Maher, "Psychology", 6th ed., p. 91). Another asserts that truth is relative, either (a) because judgments are held (i) to have no meaning in isolation and (ii) to be

subject to indefinite modification before they can become embodied in the one coherent system of ideal truth (Joachim and Hegelians generally), or else (b) because truth is conceived as a peculiar property of ideas whereby they enable us to deal with our environment more or less successfully (Pragmatists). A third affirms moral worth to be essentially relative and to emerge only when motives are in conflict (Martineau). (See ETHICS, PRAGMATISM, TRUTH.) The term Relativism, however, is more commonly applied to theories which treat of the nature of knowledge and reality, and it is in this sense that we shall discuss it here.

THE RELATIVITY OF KNOWLEDGE.—Whatever may be the real and primary significance of Protagoras's famous dictum, "Man is the measure of all things" (*ἄνθρωπος μέτρον πάντων καὶ τῶν ὄντων καὶ τῶν μὴ ὄντων*, Plato, "Theæt.", 152 A; in "Mind", XIX, 473, Mr. Gillespie maintains that the dictum has an ethical significance), it has ordinarily been understood in an epistemological sense, as a statement of the relativity of all human knowledge, of the impossibility of penetrating beyond the appearances of things. And this interpretation is in conformity with the general tendency of the age in which Protagoras lived. Heraclitus's doctrine of a perpetual and universal flux, Parmenides's view that plurality and change are but the semblance of reality, futile attempts to explain the nature of sense-perception and to account for illusion and false judgment, together with a dawning consciousness (evident in Democritus) of a subjective factor in the perceptual process—all this tended to make philosophers distrust the deliverances of their senses and rely solely upon reason or intelligence. Reflection, however, soon made it clear that rational theories were no more consistent than the data of perceptual experience, and the inevitable result of this was that the Relativism of Protagoras and his followers eventually passed into the Scepticism of the Middle Academy (see SCEPTICISM).

Modern Relativism, on the other hand, though it too tends to pass into Scepticism, was in its origin a reaction against Scepticism. To dispel the doubt which Hume had cast on the validity of universal judgments of a synthetic character, Kant proposed that we should regard them as arising not from any apprehension of the nature of real things, but from the constitution of our own minds. He maintained that the mental factor in experience, hitherto neglected, is really of paramount importance: to it are due space, time, the categories, and every form of synthesis. It is the formal element arising from the structure of the mind itself that constitutes knowledge and makes it what it is. Hume erred in supposing that knowledge is an attempt to copy reality. It is nothing of the kind. The world as we know it, the world of experience, is essentially relative to the human mind, whence it derives all that it has of unity, order, and form. The obvious objection to a Relativism of this kind is the outstanding thing-in-itself, which is not, and can never become, an object of knowledge. We are thus shut up with a world of appearances, the nature of which is constituted by our minds. What reality is in itself we can never know. Yet this is, as Kant admitted, precisely what we wish to know. The fascination of Kant's philosophy lay in the fact that it gave full value to the activity, as opposed to the passivity or receptivity of mind; but the unknowable *Ding-an-sich* was an abomination, fatal alike to its consistency and to its power to solve the problem of human cognition. It must be got rid of at all costs; and the simplest plan was to abolish it altogether, thus leaving us with a reality knowable because knowledge and reality are one, and in the making of it mind, human or absolute, plays an overwhelmingly important part.

THE RELATIVITY OF REALITY, which thus took the

place of the relativity of knowledge, has been variously conceived. Sometimes, as with Fichte and Hegel, Nature is opposed to Mind or Spirit as a twofold aspect of one and the same ground—of Intelligence, of Will, or even of unconscious Mind. Sometimes, as with Green and Bradley, Reality is conceived as one organic whole that somehow manifests itself in finite centres of experience, which strive to reproduce in themselves Reality as it is, but fail so utterly that what they assert, even when contradictory, must be held somehow to be true—true like other truths in that they attempt to express Reality, but are subject to indefinite reinterpretation before they can become identical with the real to which they refer. Still more modern Absolutists (e. g., Mackenzie and Taylor), appreciating to some extent the inadequacy of this view, have restored some sort of independence to the physical order, which, says Taylor (*Elem. of Metaph.*, 198), "does not depend for its existence upon the fact of my actually perceiving it," but "does depend upon my perception for all the qualities and relations which I find in it". In other words, the "what" of the real world is relative to our perceiving organs (*ibid.*); or, as a recent writer (Murray in "Mind", new series, XIX, 232) puts it, Reality, anterior to being known, is mere *ὑλη* (raw material), while what we call the "thing" or the object of knowledge is this *ὑλη* as transformed by an appropriate mental process, and thus endowed with the attributes of spatiality and the like. Knowing is, therefore, "superinducing form upon the matter of knowledge" (J. Grote, "Explor. Phil.", I, 13). Riehl, though usually classed as a Realist, holds a similar view. He distinguishes the being of an object (*das Sein der Objekte*) from its being as an object (*Objektsein*). The former is the real being of the object and is independent of consciousness; the latter is its being or nature as conceived by us, and is something wholly relative to our faculties (cf. Rickert, "*Der Gegenstand der Erkenntnis*", 2nd ed., pp. 17 sq., where the inconsistency of this view is clearly indicated).

The relativity of Reality as thus conceived really involves a return to the position of Kant, except that for the thing-in-itself with its unknowable character and properties is substituted a kind of *materia prima*, without qualities, attributes, or determinations, and therefore as unknowable as the thing-in-itself, but unknowable now because there is nothing to be known. On this point modern Idealism is at one with Pragmatism or Humanism, which also insist that reality must be regarded epistemologically as *ὑλη*, wholly propertyless and wholly indeterminate. The difference between the two views lies in this, that for the Idealist, form is imposed upon matter by the very act by which we know it, while for the Pragmatist, it is imposed only after a long process of postulation and experiment.

CRITICISM.—M. Fonsegrive in his "*Essais sur la connaissance*" has discussed the question of Relativism at considerable length, and is of opinion that we must in some sense grant that knowledge is relative to our faculties. But, while in principle he grants this *universally*, as a matter of fact in his own theory it is only our knowledge of corporeal objects that is regarded as strictly relative. We can know other minds as they really are, because we ourselves are thinking beings, and the external manifestation of our mentality and theirs is similar in character. But "we do not know the essence of things, but the essence of our relations with things; of the laws of nature in themselves we know much less than we do of our dealings with nature" (pp. 85, 86). "Whatever we know, is known in terms of the self" (p. 125; cf. pp. 184 sq.). The principal argument upon which this Relativism rests, is fundamentally the same as that used by Berkeley in his famous "Dia-

logue between Hylas and Philonus". As stated by Fonsegrive, it is as follows: "the concept of an object which should be at the same time in-itself and an object of knowledge is clearly contradictory. . . . For 'object of knowledge' means 'known', . . . but it is quite evident that the known, *qua* known, is not in-itself, since it is *qua* known" (p. 186). Hence what we know is never the object as it is in itself, but only as it is in our knowledge of it. Of course, if the notions "being in itself" and "being as known" are mutually exclusive, the above argument is valid; but as conceived by the Realist or the anti-Relativist, this is not so. Being in-itself merely means *being as it exists*, whether it be known or not. It implies therefore that the nature and existence of being is prior to our knowledge of it (a fact which, by the way, Fonsegrive stoutly maintains); but it does not imply that being as it exists cannot be known. Fonsegrive's argument proves nothing against the view that the real nature of objects is knowable; for, though in the abstract the thing *qua* existent is not the thing *qua* known, in the concrete there is no reason why its really existing nature cannot become known, or, in other words, why it cannot be known as it is.

The argument by which absolutists seek to prove the relativity of Reality is precisely similar to the above. We cannot think of real things, says Taylor ("Elem. of Metaph.", 23, 69, 70; cf. Bradley, "Appearance and Reality", 144-45), except as objects of experience; hence it is in connexion with mind that their reality lies. Surely this argument is fallacious. All that it proves is that things must either be *or else become* objects of experience in order to be thought of by mind, not that they must be of their very essence objects of experience. Unless reality is intelligible and can enter into experience, it cannot become the object of thought; but in no other sense does the possibility of knowing it suppose its "connexion with mind". True, to conceive anything is "*eo ipso* to bring it into consciousness", but from this it follows merely that to be conceivable things must be capable of *becoming* objects of consciousness. Psychological considerations force us to admit that Reality, when it enters experience, becomes, or better is reproduced as psychical fact; but we cannot conclude from this that Reality itself, the reality which is the object of experience and to which our experience refers as to something other than itself, is of necessity psychical fact. Experience or perception is doubtless a condition without which we could not think of things at all, still less think of them as existing, but it is not a condition without which things could not exist. Nor again, when we think, do we ordinarily think of things as objects of experience; we think of them simply as "things", real or imaginary, and the properties which we predicate of them we think of as belonging to them, not as "superinduced by our minds".

Our natural way of thinking may, however, conceivably be wrong. Granted that what "appears" is reality, appearances may none the less be fallacious. It is possible that they are due wholly or in part to our minds, and so do not reveal to us the nature of reality, but rather its relation to our perceiving selves, our faculties and our organs. Most of the arguments advanced in support of this view are based on psychology, and though the psychology is good enough, the arguments are hardly conclusive. It is urged, for instance, that abstraction and generalization are subjective processes which enter into every act of knowledge, and essentially modify its content. Yet abstraction is not falsification, unless we assume that what we are considering in the abstract exists as such in the concrete—that is, exists not in connexion with and in mutual dependence upon other things, but in isolation and independence just as we conceive it. Nor is generalization fallacious, unless we assume,

without proof, that the particulars to which our concept potentially applies actually exist. In a word, neither these nor any other of the subjective processes and forms of thought destroy the validity of knowledge, provided what is purely formal and subjective be distinguished, as it should be, from what pertains to objective content and refers to the real order of causes and purposes.

A further argument is derived from the alleged relativity of sensation, whence in the Scholastic theory all knowledge is derived. The quality of sensation, it is said, is determined largely by the character of our nervous system, and in particular by the end-organs of the different senses. It is at least equally probable, however, that the quality of sensation is determined by the stimulus; and in any case the objection is beside the point, for we do not in judgment refer our sensation *as such* to the object, but rather as qualities, the nature of which we do not know, though we do know that they differ from one another in varying degrees. Even granted then that sensation is relative to our specialized organs of sense, it by no means follows that the knowledge which comes through sensation in any way involves subjective determination. Secondly, sense-data do not give us merely qualitative differences, but also spatial forms and magnitudes, distance, motion, velocity, direction; and upon these data are based not only mathematics but also physical science, in so far as the latter is concerned with quantitative, in distinction from qualitative, variations. Thirdly, sense-data, even if they be in part subjective, suppose as their condition an objective cause. Hence, a theory which explains sense-data satisfactorily assigns to them conditions which are no less real than the effects to which in part at least they give rise. Lastly, if knowledge really is relative in the sense above explained, though it may satisfy our practical, it can never satisfy our speculative strivings. The aim of speculative research is to know Reality as it is. But knowledge, if it be of appearances only, is without real meaning and significance, and as conceived in an Idealism of the *a priori* type, also it would seem without purpose.

EXPERIENCE AS A SYSTEM OF RELATIONS.—It is commonly taught by neo-Kantians that relation is the Category of categories (cf. Renouvier, "Le personnalisme", pref. vi). Qualities are but relations in disguise (Caird, "The Phil. of Kant", 329; Green, Prolegom.", 20). Matter and motion "consist of" relations (Prolegom., 9). In fact Reality, as we know it, is nothing but a system of relations, for "the nature of mind is such that no knowledge can be acquired or expressed, and consequently no real existence conceived, except by means of relation and as a system of relations" (Renouvier, "Les dilemmes de la metaph.", 11). This form of Relativism may be called *objective* to distinguish it from the Relativism which we have been discussing above, and with which, as a matter of fact, it is generally combined. Primarily it is a theory of the nature of knowledge, but with Green and others (e. g., Abel Rey, "La théorie de la physique", VI, 2), who identify knowledge and reality, it is also a metaphysic. Such a view supposes a theory of the nature of relation very different from that of the Scholastics. For the latter relation is essentially a *πρός τι σχέσις*, an *ordo ad*, which implies (1) a subject to which it belongs, (2) a special something in that subject on account of which it is predicated, and (3) a term, other than itself, to which it refers. A relation, in other words, as the moderns would put it, presupposes its "terms". It is not a mysterious and invisible link which somehow joins up two aspects of a thing and makes them one. A relation may be mutual; but if so, there are really *two* relations (e. g., paternity and sonship) belonging to different subjects, or, if to the same subject, arising from different *fundamenta*. True, in science ■ in

other matters, we may know a relation without being able to discover the nature of the entities it relates. We may know, for instance, that pressure and temperature vary proportionately in a given mass of gas of which the volume is kept constant, without knowing precisely and for certain the ultimate nature of either pressure or temperature. Nevertheless we do know something about them. We know that they exist, that they each have a certain nature, and that it is on account of this nature that the relation between them arises. We cannot know a relation, therefore, without knowing something of the things which it relates, for a relation presupposes its "terms". Hence the universe cannot consist of relations only, but must be composed of things in relation.

(London, 1894); IDEM, *Grundzüge d. physiologischen Psychologie* (5th ed., Leipzig, 1903).

LESLIE J. WALKER.

Relics.—The word *relics* comes from the Latin *reliquiæ* (the counterpart of the Greek *λελειπανά*), which already before the propagation of Christianity was used in its modern sense, viz., of some object, notably part of the body or clothes, remaining as a memorial of a departed saint. The veneration of relics, in fact, is to some extent a primitive instinct, and it is associated with many other religious systems besides that of Christianity. At Athens the supposed remains of Ædipus and Theseus enjoyed an honour which it is very difficult to distinguish from a religious cult (see for all this Pfister, "Reliquienkult in Altertum", I, 1909), while Plutarch gives an account of the translation of the bodies of Demetrius (Demetr., lii) and Phocion (Phoc., xxxvii) which in many details anticipates the Christian practice of the Middle Ages. The bones or ashes of Æsculapius at Epidaurus, of Perdiccas I at Macedon, and even—if we may trust the statement of the Chronicon Paschale (Dindorf, p. 67)—of the Persian Zoroaster (Zarathustra), were treated with the deepest veneration. As for the Far East, the famous story of the distribution of the relics of Buddha, an incident which is believed to have taken place immediately after his death, seems to have found remarkable confirmation in certain modern archaeological discoveries. (See "Journ. of R. Asiatic Society", 1909, pp. 1056 sqq.). In any case the extreme development of relic-worship amongst the Buddhists of every sect is a fact beyond dispute.

I. DOCTRINE REGARDING RELICS.—The teaching of the Catholic Church with regard to the veneration of relics is summed up in a decree of the Council of Trent (Sess. XXV), which enjoins on bishops and other pastors to instruct their flocks that "the holy bodies of holy martyrs and of others now living with Christ—which bodies were the living members of Christ and 'the temple of the Holy Ghost' (I Cor., vi, 19) and which are by Him to be raised to eternal life and to be glorified are to be venerated by the faithful, for through these [bodies] many benefits are bestowed by God on men, so that they who affirm that

veneration and honour are not due to the relics of the saints, or that these and other sacred monuments are uselessly honoured by the faithful, and that the places dedicated to the memories of the saints are in vain visited with the view of obtaining their aid, are wholly to be condemned, as the Church has already long since condemned, and also now condemns them." Further, the council insists that "in the invocation of saints the veneration of relics and the sacred use of images, every superstition shall be removed and all filthy lucre abolished." Again, "the visitation of relics must not be by any perverted into revellings and drunkenness." To secure a proper check upon abuses of this kind, "no new miracles are to be acknowledged or new relics recognized unless the bishop of the diocese has taken cognizance and approved thereof." Moreover, the bishop, in all these matters, is directed to obtain accurate information, to take council with theologians and pious men, and in cases of doubt or exceptional difficulty to submit the matter to the sentence of the metropolitan and other bishops of the province, "yet so that nothing new, or that previously has not been usual in the Church, shall be resolved on, without having first consulted the Holy See."

The justification of Catholic practice, which is indirectly suggested here by the reference to the bodies of the saints as formerly temples of the Holy Ghost and as destined hereafter to be eternally glorified, is further developed in the authoritative "Roman Catechism" drawn up at the instance of the same council. Recalling the marvels witnessed at the tombs of the martyrs, where "the blind and cripples are restored to health, the dead recalled to life, and demons expelled from the bodies of men", the Catechism points out that these are facts which "St. Ambrose and St. Augustine, most unexceptionable witnesses, declare in their writings that they have not merely heard and read about, as many did, but have seen with their own eyes", (Ambrose, Epist. xxii, nn. 2 and 17; Augustine, Serm. cclxxxvi, c. v.; "De Civ. Dei", xxii, 8, "Confess.", ix, 7). And from thence, turning to Scriptural analogies, the compilers further argue: "If the clothes, the kerchiefs (Acts, xix, 12), if the shadow of the saints (Acts, v, 15), before they departed from this life, banished diseases and restored strength, who will have the hardihood to deny that God wonderfully works the same by the sacred ashes, the bones, and other relics of the saints? This is the lesson we have to learn from that dead body which, having been accidentally let down into the sepulchre of Eliseus, "when it had touched the bones of the Prophet, instantly came to life" (4 Kings, xiii, 21, and cf. Eccus., xlvi, 14). We may add that this miracle as well as the veneration shown to the bones of Moses (See Ex., xiii, 19 and Jos., xxiv, 32) only gain additional force from their apparent contradiction to the ceremonial laws against defilement, of which we read in Num., xix, 11–22. The influence of this Jewish shrinking from contact with the dead so far lingered on that it was found necessary in the "Apostolical Constitutions" (vi, 30) to issue a strong warning against it and to argue in favour of the Christian cult of relics.

According to the more common opinion of theologians, relics are to be honoured—St. Thomas, in Summa, III, Q. xxxviii, a. 6, does not seem to consider even the word *adorare* inappropriate—*cultu dulciæ relativæ*, that is to say with a veneration which is not that of *latria* (divine worship) and which though directed primarily to the material objects of the cult—i. e., the bones, ashes, garments, etc.—does not rest in them, but looks beyond to the saints they commemorate as to its formal term. Hauck, Kattenbusch, and other non-Catholic writers have striven to show that the utterances of the Council of Trent

are in contradiction to what they admit to be the "very cautious" language of the medieval Scholastics, and notably St. Thomas. The latter urges that those who have an affection to any person hold in honour all that was intimately connected with him. Hence, while we love and venerate the saints who were so dear to God, we also venerate all that belonged to them, and particularly their bodies, which were once the temples of the Holy Spirit, and which are some day to be conformed to the glorious body of Jesus Christ. "Whence also", adds St. Thomas, "God fittingly does honour to such relics by performing miracles in their presence [*in earum præsentiali*]." It will be seen that this closely accords with the terms used by the Council of Trent and that the difference consists only in this, that the Council says *per quæ*—"through which many benefits are bestowed on mankind"—while St. Thomas speaks of miracles worked "in their presence". But it is quite unnecessary to attach to the words *per quæ* the idea of physical causality. We have no reason to suppose that the council meant more than that the relics of the saints were the occasion of God's working miracles. When we read in the Acts of the Apostles, xix, 11, 12, "And God wrought by the hand of Paul more than common miracles. So that even there were brought from his body to the sick, handkerchiefs and aprons, and the diseases departed from them, and the wicked spirits went out from them", there can be no inexactitude in saying that these also were the things by which (*per quæ*) God wrought the cure.

There is nothing, therefore, in Catholic teaching to justify the statement that the Church encourages belief in a magical virtue, or physical curative efficacy residing in the relic itself. It may be admitted that St. Cyril of Jerusalem (A. D. 347), and a few other patristic and medieval writers, apparently speak of some power inherent in the relic. For example, St. Cyril, after referring to the miracle wrought by the body of Eliseus, declares that the restoration to life of the corpse with which it was in contact took place "to show that even though the soul is not present a virtue resides in the body of the saints, because of the righteous soul which has for so many years tenanted it and used it as its minister". And he adds, "Let us not be foolishly incredulous as though the thing had not happened, for if handkerchiefs and aprons which are from without, touching the body of the diseased, have raised up the sick, how much more should the body itself of the Prophet raise the dead?" (Cat., xviii, 16.) But this seems rather to belong to the personal view or manner of speech of St. Cyril. He regards the chrism after its consecration "as no longer simple ointment but the gift of Christ, and by the presence of His Godhead it causes in us the Holy Ghost" (Cat., xxi, 3); and, what is more striking, he also declares that the meats consecrated to idols, "though in their own nature plain and simple, become profane by the invocation of the evil spirit" (Cat., xix, 7)—all of which must leave us very doubtful as to his real belief in any physical virtue inherent in relics. Be this as it may, it is certain that the Church, with regard to the veneration of relics, has defined nothing more than what was stated above. Neither has the Church ever pronounced that any particular relic, not even that commonly venerated as the wood of the Cross, is authentic; but she approves of honour being paid to those relics which with reasonable probability are believed to be genuine, and which are invested with due ecclesiastical sanctions.

II. EARLY HISTORY.—Few points of faith can be more satisfactorily traced back to the earliest ages of Christianity than the veneration of relics. The classical instance is to be found in the letter written by the inhabitants of Smyrna, about 156, describing

the death of St. Polycarp. After he had been burnt at the stake, we are told that his faithful disciples wished to carry off his remains, but the Jews urged the Roman officer to refuse his consent for fear that the Christians "would only abandon the Crucified One and begin to worship this man". Eventually, however, as the Smyrnæans say, "we took up his bones, which are more valuable than precious stones and finer than refined gold, and laid them in a suitable place, where the Lord will permit us to gather ourselves together, as we are able, in gladness and joy, and to celebrate the birthday of his martyrdom." This is the keynote which is echoed in a multitude of similar passages found a little later in the patristic writers of both East and West. Harnack's tone in referring to this development is that of an unwilling witness overwhelmed by evidence which it is useless to resist. "Most offensive", he writes, "was the worship of relics. It flourished to its greatest extent as early as the fourth century and no Church doctor of repute restricted it. All of them rather, even the Cappadocians, countenanced it. The numerous miracles which were wrought by bones and relics seemed to confirm their worship. The Church, therefore, would not give up the practice, although a violent attack was made upon it by a few cultured heathens and besides by the Manichæans" (Harnack, "Hist. of Dog.", tr., IV, 313).

From the Catholic standpoint there was no extravagance or abuse in this cult as it was recommended, and indeed taken for granted, by writers like St. Augustine, St. Ambrose, St. Jerome, St. Gregory of Nyssa, St. Chrysostom, St. Gregory Nazianzen, and by all the other great doctors without exception. To give detailed references besides those already cited from the Roman Catechism would be superfluous. Suffice it to point out that the inferior and relative nature of the honour due to relics was always kept in view. Thus St. Jerome says ("Ad Riparium", i, P. L., XXII, 907): "We do not worship, we do not adore [*non colimus, non adoramus*], for fear that we should bow down to the creature rather than to the Creator, but we venerate [*honoramus*] the relics of the martyrs in order the better to adore Him whose martyrs they are." And St. Cyril of Alexandria writes ("Adv. Julian.", vi, P. G., LXXVI, 812): "We by no means consider the holy martyrs to be gods, nor are we wont to bow down before them adoringly, but only relatively and reverentially [*οὐ λατρευτικῶς ἀλλὰ σχετικῶς καὶ τιμητικῶς*]." Perhaps no single writing supplies a more striking illustration of the importance attached to the veneration of relics in the Christian practice of the fourth century than the panegyric of the martyr St. Theodore by St. Gregory of Nyssa (P. G., XLVI, 735-48). Contrasting the horror produced by an ordinary corpse with the veneration paid to the body of a saint, the preacher expatiates upon the adornment lavished upon the building which had been erected over the martyr's resting place, and he describes how the worshipper is led to approach the tomb "believing that to touch it is itself a sanctification and a blessing, and if it be permitted to carry off any of the dust which has settled upon the martyr's resting place, the dust is accounted as a great gift and the mould as a precious treasure. And as for touching the relics themselves, if that should ever be our happiness, only those who have experienced it and who have had their wish gratified can know how much this is desirable and how worthy a recompense it is of aspiring prayer" (col. 740).

This passage, like many others that might be quoted, dwells rather upon the sanctity of the martyr's resting place and upon that of his mortal remains collected as a whole and honourably entombed. Neither is it quite easy to determine the period at which the practice of venerating minute fragments of

bone or cloth, small parcels of dust, etc., first became common. We can only say that it was widespread early in the fourth century, and that dated inscriptions upon blocks of stone, which were probably altar slabs, afford evidence upon the point which is quite conclusive. One such, found of late years in Northern Africa and now preserved in the Christian Museum of the Louvre, bears a list of the relics probably once cemented into a shallow circular cavity excavated in its surface. Omitting one or two words not adequately explained, the inscription runs: "A holy memorial [*memoria sancta*] of the wood of the Cross, of the land of Promise where Christ was born, the Apostles Peter and Paul, the names of the martyrs Datian, Donatian, Cyprian, Nemesianus, Citinus, and Victoria. In the year of the Province 320 [i. e. A. D. 359] Benenatus and Pequaria set this up" ("Corp. Inscr. Lat.", VIII, n. 20600. Cf. Audolent in "Mélanges d'archéol. et d'hist.", X, 397-588).

We learn from St. Cyril of Jerusalem (before 350) that the wood of the Cross, discovered c. 318, was already distributed throughout the world; and St. Gregory of Nyssa, in his sermons on the forty martyrs, after describing how their bodies were burned by command of the persecutors, explains that "their ashes and all that the fire had spared have been so distributed throughout the world that almost every province has had its share of the blessing. I also myself have a portion of this holy gift and I have laid the bodies of my parents beside the relics of these warriors, that in the hour of the resurrection they may be awakened together with these highly privileged comrades" (P. G., XLVI, 764). We have here also a hint of the explanation of the widespread practice of seeking burial near the tombs of the martyrs. It seems to have been felt that when the souls of the blessed martyrs on the day of general resurrection were once more united to their bodies, they would be accompanied in their passage to heaven by those who lay around them and that these last might on their account find more ready acceptance with God.

We may note also that, while this and other passages suggest that no great repugnance was felt in the East to the division and dismemberment of the bodies of the saints, in the West, on the other hand, particularly at Rome, the greatest respect was shown to the holy dead. The mere unwrapping or touching of the body of a martyr was considered to be a terribly perilous enterprise, which could only be set about by the holiest of ecclesiastics, and that after prayer and fasting. This belief lasted until the late Middle Ages and is illustrated, for example, in the life of St. Hugh of Lincoln, who excited the surprise of his episcopal contemporaries by his audacity in examining and translating relics which his colleagues dared not disturb. In the Theodosian Code the translation, division, or dismemberment of the remains of martyrs was expressly forbidden ("Nemo martyrem distrahat", Cod. Theod., IX, xvii, 7); and somewhat later Gregory the Great seems in very emphatic terms to attest the continuance of the same tradition. He professed himself sceptical regarding the alleged "customs of the Greeks" of readily transferring the bodies of martyrs from place to place, declaring that throughout the West any interference with these honoured remains was looked upon as a sacrilegious act and that numerous prodigies had struck terror into the hearts of even well-meaning men who had attempted anything of the sort. Hence, though it was the Empress Constantina herself who had asked him for the head or some portion of the body of St. Paul, he treated the request as an impossible one, explaining that, to obtain the supply of relics needful in the consecration of churches, it was customary to lower into the Confession of the Apostles [as far as the second "cataract"—so we learn from a letter to Pope Hermisdas in 519 (Thiel,

"Epist. gen.", I, 873)] a box containing portions of silk or cloth, known as *brandea*, and these *brandea*, after lying for a time in contact with the remains of the holy Apostles, were henceforth treated as relics. Gregory further offers to send Constantina some filings from St. Peter's chains, a form of present of which we find frequent mention in his correspondence (St. Gregory, "Epist.", Mon. Germ. Hist., I, 264-66).

It is certain that long before this time an extended conception of the nature of a relic, such as this important letter reveals, had gradually grown up. Already when Eusebius wrote (c. 325) such objects as the chair of St. James or the oil multiplied by Bishop Narcissus (Hist. Eccl., VII, xxxix, and VI, ix) were clearly venerated as relics, and St. Augustine, in his "De Civit. Dei" (xxii, 8), gives numerous instances of miracles wrought by soil from the Holy Land, flowers which had touched a reliquary or had been laid upon a particular altar, oil from the lamps of the church of a martyr, or by other things not less remotely connected with the saints themselves. Further, it is noteworthy that the Roman prejudice against translating and dividing seems only to have applied to the actual bodies of the martyrs reposing in their tombs. It is St. Gregory himself who enriches a little cross, destined to hang round the neck as an *encolpion*, with filings both from St. Peter's chains and from the gridiron of St. Laurence ("Epist.", Mon. Germ. Hist., I, 192). Before the year 350, St. Cyril of Jerusalem three times over informs us that the fragments of the wood of the Cross found by St. Helen had been distributed piecemeal and had filled the whole world (Cat., iv, 10; x, 19; xiii, 4). This implies that Western pilgrims felt no more impropriety in receiving than the Eastern bishops in giving.

During the Merovingian and Carolingian period the cultus of relics increased rather than diminished. Gregory of Tours abounds in stories of the marvels wrought by them, as well as of the practices used in their honour, some of which have been thought to be analogous to those of the pagan "incubations" (De Glor. Conf., xx); neither does he omit to mention the frauds occasionally perpetrated by scoundrels through motives of greed. Very significant, as Hauck (Kirchengesch. Deutschl., I, 185) has noticed, is the prologue to the text of the Salic Laws, probably written by a contemporary of Gregory of Tours in the sixth century. "That nation", it says, "which has undoubtedly in battle shaken off the hard yoke of the Romans, now that it has been illuminated through Baptism, has adorned the bodies of the holy martyrs with gold and precious stones, those same bodies which the Romans burnt with fire, and pierced with the sword, or threw to wild beasts to be torn to pieces." In England we find from the first a strong tradition in the same sense derived from St. Gregory himself. Bede records (Hist. Eccl., I, xxix) how the pope "forwarded to Augustine all the things needful for the worship and service of the church, namely, sacred vessels, altar linen, church ornaments, priestly and clerical vestments, relics of the holy Apostles and martyrs and also many books". The Penitential ascribed to St. Theodore, Archbishop of Canterbury, which certainly was known in England at an early date, declares that "the relics of the saints are to be venerated", and it adds, seemingly in connexion with the same idea, that "if possible a candle is to burn there every night" (Haddan and Stubbs, "Councils", III, 191). When we remember the candles which King Alfred constantly kept burning before his relics, the authenticity of this clause in Theodore's Penitential seems the more probable. Again the relics of English saints, for example those of St. Cuthbert and St. Oswald, soon became famous, while in the case of the latter we hear of them all over the continent. Mr. Plummer

RELIQUARIES IN THE CHURCH OF ST. URSULA, COLOGNE

RELIQUARY IN THE FORM OF A DIPTYCH, FRENCH OR ITALIAN, XIV CENTURY

SILVER ■■■POUSSÉ AND GILT. OPENS LIKE A BOOK AND IS COVERED ON THE OUTSIDE WITH RED VELVET EMBROIDERED IN GOLD. THE CENTRAL PLATES OF EACH PANEL OPEN ON OTHERS. THE BODY OF THE CRUCIFIED, IN THE CENTRAL PLATE ON THE LEFT, COVERS A RELIC OF THE TRUE CROSS; UNDER THE RISEN CHRIST ON THE RIGHT ARE RELICS OF THE HOLY INNOCENTS AND ST. SEBASTIAN, AND OTHER RELICS

(Bede, II, 159-61) has made a short list of them and shows that they must have been transported into the remotest part of Germany. After the Second Council of Nicæa, in 787, had insisted with special urgency that relics were to be used in the consecration of churches, and that the omission was to be supplied if any church had been consecrated without them, the English Council of Celchyth (probably Chelsea) commanded that relics were to be used, and in default of them the Blessed Eucharist. But the developments of the veneration of relics in the Middle Ages were far too vast to be pursued further. Not a few of the most famous of the early medieval inscriptions are connected with the same matter. It must suffice to mention the famous Clematius inscription at Cologne, recording the translation of the remains of the so-called Eleven Thousand Virgins (see Kraus, "Inscrip. d. Rheinlande", no. 294, and, for a discussion of the legend, the admirable essay on the subject by Cardinal Wiseman).

III. ABUSES.—Naturally it was impossible for popular enthusiasm to be roused to so high a pitch in a matter which easily lent itself to error, fraud, and greed of gain, without at least the occasional occurrence of many grave abuses. As early as the end of the fourth century, St. Augustine, denouncing certain impostors wandering about in the habit of monks, describes them as making profit by the sale of spurious relics ("De op. monach.", xxviii, and cf. Isidore, "De. div. off.", ii, 16). In the Theodosian Code the sale of relics is forbidden ("Nemo martyrem mercetur", VII, ix, 17), but numerous stories, of which it would be easy to collect a long series, beginning with the writings of St. Gregory the Great and St. Gregory of Tours, prove to us that many unprincipled persons found a means of enriching themselves by a sort of trade in these objects of devotion, the majority of which no doubt were fraudulent. At the beginning of the ninth century, as M. Jean Guiraud had shown (*Mélanges G. B. de Rossi*, 73-95), the exportation of the bodies of martyrs from Rome had assumed the dimensions of a regular commerce, and a certain deacon, Deusdona, acquired an unenviable notoriety in these transactions (see *Mon. Germ. Hist.: Script.*, XV, *passim*). What was perhaps in the long run hardly less disastrous than fraud or avarice was the keen rivalry between religious centres, and the eager credulity fostered by the desire to be known as the possessors of some unusually startling relic. We learn from Cassian, in the fifth century, that there were monks who seized upon certain martyrs' bodies by force of arms, defying the authority of the bishops, and this was a story which we find many times repeated in the Western chronicles of a later date.

In such an atmosphere of lawlessness doubtful relics came to abound. There was always a disposition to regard any human remains accidentally discovered near a church or in the catacombs as the body of a martyr. Hence, though men like St. Athanasius and St. Martin of Tours set a good example of caution in such cases, it is to be feared that in the majority of instances only a very narrow interval of time intervened between the suggestion that a particular object might be, or ought to be, an important relic, and the conviction that tradition attested it actually to be such. There is no reason in most cases for supposing the existence of deliberate fraud. The persuasion that a benevolent Providence was likely to send the most precious *pignora sanctorum* to deserving clients, the practice already noticed of attributing the same sanctity to objects which had touched the shrine as attached to the contents of the shrine itself, the custom of making facsimiles and imitations, a custom which persists to our own day in the replicas of the Vatican statute of St. Peter or of the Grotto of Lourdes—all these are

causes adequate to account for the multitude of unquestionably spurious relics with which the treasuries of great medieval churches were crowded. In the case of the Nails with which Jesus Christ was crucified, we can point to definite instances in which that which was at first venerated as having touched the original came later to be honoured as the original itself. Join to this the large license given to the occasional unscrupulous rogue in an age not only utterly uncritical but often curiously morbid in its realism, and it becomes easy to understand the multiplicity and extravagance of the entries in the relic inventories of Rome and other countries.

On the other hand it must not be supposed that nothing was done by ecclesiastical authority to secure the faithful against deception. Such tests were applied as the historical and antiquarian science of that day was capable of devising. Very often, however, this test took the form of an appeal to some miraculous sanction, as in the well-known story repeated by St. Ambrose, according to which, when doubt arose which of the three crosses discovered by St. Helena was that of Christ, the healing of a sick man by one of them dispelled all further hesitation. Similarly Egbert, Bishop of Trier, in 979, doubting as to the authenticity of what purported to be the body of St. Celsus, "lest any suspicion of the sanctity of the holy relics should arise, during Mass, after the offertory had been sung, threw a joint of the finger of St. Celsus wrapped in a cloth into a thurible full of burning coals, which remained unhurt and untouched by the fire the whole time of the Canon" (Mabillon, "Acta SS. Ord. Ben.", III, 658). The decrees of synods upon this subject are generally practical and sensible, as when, for example, Bishop Quivil of Exeter, in 1287, after recalling the prohibition of the General Council of Lyons against venerating recently-found relics unless they were first of all approved by the Roman Pontiff, adds: "We command the above prohibition to be carefully observed by all, and decree that no person shall expose relics for sale, and that neither stones, nor fountains, trees, wood, or garments shall in any way be venerated on account of dreams or on fictitious grounds." So, again, the whole procedure before Clement VII (the Antipope) in 1359, recently brought to light by Canon Chevalier, in connexion with the alleged Holy Shroud of Lirey, proves that some check at least was exercised upon the excesses of the unscrupulous or the mercenary.

Nevertheless it remains true that many of the more ancient relics duly exhibited for veneration in the great sanctuaries of Christendom or even at Rome itself must now be pronounced to be either certainly spurious or open to grave suspicion. To take one example of the latter class, the boards of the Crib (*Præseppe*)—a name which for much more than a thousand years has been associated, as now, with the basilica of Santa Maria Maggiore—can only be considered to be of doubtful authenticity. In his monograph "Le memorie Liberiane dell' Infanzia di N. S. Gesù Cristo" (Rome, 1894), Mgr. Cozza Luzi frankly avows that all positive evidence for the authenticity of the relics of the Crib etc., is wanting before the eleventh century. Strangely enough, an inscription in Greek uncials of the eighth century is found on one of the boards, the inscription having nothing to do with the Crib but being apparently concerned with some commercial transaction. It is hard to explain its presence on the supposition that the relic is authentic. Similar difficulties might be urged against the supposed "column of the flagellation" venerated at Rome in the Church of Santa Prassede (see "Dublin Review", Jan., 1905, 115) and against many other famous relics.

Still, it would be presumptuous in such cases to blame the action of ecclesiastical authority in permitting the continuance of a cult which extends back

into remote antiquity. On the one hand no one is constrained to pay homage to the relic, and supposing it to be in fact spurious, no dishonour is done to God by the continuance of an error which has been handed down in perfect good faith for many centuries. On the other hand the practical difficulty of pronouncing a final verdict upon the authenticity of these and similar relics must be patent to all. Each investigation would be an affair of much time and expense, while new discoveries might at any moment reverse the conclusions arrived at. Further, devotions of ancient date deeply rooted in the heart of the peasantry cannot be swept away without some measure of scandal and popular disturbance. To create this sensation seems unwise unless the proof of spuriousness is so overwhelming as to amount to certainty. Hence there is justification for the practice of the Holy See in allowing the cult of certain doubtful ancient relics to continue. Meanwhile, much has been done by quietly allowing many items in some of the most famous collections of relics to drop out of sight or by gradually omitting much of the solemnity which formerly surrounded the exposition of these doubtful treasures. Many of the inventories of the great collections of Rome, or of Aachen, Cologne, Naples, Salzburg, Antwerp, Constantinople, of the Sainte Chapelle at Paris etc., have been published. For illustration's sake reference may be made to the Count de Riant's work "*Exuvie Constantinopolitane*" or to the many documents printed by Mgr Barbier de Montault regarding Rome, particularly in vol. VII of his "*Euvres complètes*". In most of these ancient inventories, the extravagance and utter improbability of many of the entries can not escape the most uncritical. Moreover, though some sort of verification seems often to be traceable even in Merovingian times, still the so-called authentications which have been printed of this early date (seventh century) are of a most primitive kind. They consist in fact of mere labels, strips of parchment with just the name of the relic to which each strip was attached, barbarously written in Latin. For example "*Hic sunt reliquias sancti Victuri episcopi, Festivitate Kalendis Septembris*", "*Hic sunt patrocinia sancti Petri et Pauli Roma civio*", etc. (See Delisle, "*Mélanges de l'école française de Rome*," IV, 1-8.)

It would probably be true to say that in no part of the world was the veneration of relics carried to greater lengths, with no doubt proportionate danger of abuse, than among Celtic peoples. The honour paid to the handbells of such saints as St. Patrick, St. Senan, and St. Mura, the strange adventures of sacred remains carried about with them in their wanderings by the Armorican people under stress of invasion by Teutons and Northmen, the prominence given to the taking of oaths upon relics in the various Welsh codes founded upon the laws of Howell the Good, the expedients used for gaining possession of these treasures, and the numerous accounts of translations and miracles, all help to illustrate the importance of this aspect of the ecclesiastical life of the Celtic races.

IV. TRANSLATIONS.—At the same time the solemnity attached to translations was by no means a peculiarity of the Celts. The story of the translation of St. Cuthbert's remains is almost as marvelous as any in Celtic hagiography. The forms observed of all-night vigils, and the carrying of the precious remains in "feretories" of gold or silver, overshadowed with silken canopies and surrounded with lights and incense, extended to every part of Christendom during the Middle Ages. Indeed this kind of solemn translation (*elevatio corporis*) was treated as the outward recognition of heroic sanctity, the equivalent of canonization, in the period before the Holy See reserved to itself the passing of a final

judgment upon the merits of deceased servants of God, and on the other hand in the earlier forms of canonization Bulls it was customary to add a clause directing that the remains of those whose sanctity was thus proclaimed by the head of the Church should be "elevated", or translated, to some shrine above ground where fitting honour could be paid them.

This was not always carried at once. Thus St. Hugh of Lincoln, who died in 1200, was canonized in 1220, but it was not until 1280 that his remains were translated to the beautiful "Angel Choir" which had been constructed expressly to receive them. This translation is noteworthy not only because King Edward I himself helped to carry the bier, but because it provides a typical example of the separation of the head and body of the saint which was a peculiar feature of so many English translations. The earliest example of this separation was probably that of St. Edwin, king and martyr; but we have also the cases of St. Oswald, St. Chad, St. Richard of Chichester (translated in 1276), and St. William of York (translated 1284). It is probable that the ceremonial observed in these solemn translations closely imitated that used in the enshrining of the relics in the *sepulchrum* of the altar at the consecration of a church, while this in turn, as Mgr Duchesne has shown, is nothing but the development of the primitive burial service, the martyr or saint being laid to rest in the church dedicated to his honour. But the carrying of relics is not peculiar to the procession which takes place at the dedication of a church. Their presence is recognized as a fitting adjunct to the solemnities of almost every kind of procession, except perhaps those of the Blessed Sacrament, and in medieval times no exception was made even for these latter.

IV. FEAST OF RELICS.—It has long been customary, especially in churches which possessed large collections of relics, to keep one general feast in commemoration of all the saints whose memorials are there preserved. An Office and Mass for this purpose will be found in the Roman Missal and Breviary, and though they occur only in the supplement *Pro aliquibus locis* and are not obligatory upon the Church at large, still this celebration is now kept almost universally. The office is generally assigned to the fourth Sunday in October. In England before the Reformation, as we may learn from a rubric in the Sarum Breviary, the *Festum Reliquiarum* was celebrated on the Sunday after the feast of the Translation of St. Thomas of Canterbury (7 July), and it was to be kept as a greater double "wherever relics are preserved or where the bodies of dead persons are buried, for although Holy Church and her ministers observe no solemnities in their honour, the glory they enjoy with God is known to Him alone".

STRALEK in *Real-Encyclopädie d. christl. Altertümer* (Freiburg, 1886); BARBIER DE MONTAULT, *Euvres*, VIII (Paris, 1893), 126-309; BEISSEL, *Verehrung der Heiligen und ihrer Reliquien in Deutschland* (2 vols., Freiburg, 1890-1892); SIEBERT, *Beiträge zur vorreformatorischen Heiligen- und Reliquienverehrung* (Freiburg, 1907); MIONI, *Il culto delle reliquie* (Turin, 1908); Riant and Mély, *Exuvie Constantinopolitane* (Geneva, 1876); GUIRAUD, *Commerce des reliques in Mélanges de Rossi* (Rome, 1892); BENEDICT XIV, *De servorum Dei beatificatione et canonizatione*, IV, Pt. 2; PEISER, *Der Reliquienkult im Altertum* (Leipzig, 1909); SCUDAMORE in *Dict. HERBERT THURSTON.

Religion.—I. DERIVATION, ANALYSIS, AND DEFINITION.—The derivation of the word "religion" has been a matter of dispute from ancient times. Not even to-day is it a closed question. Cicero, in his "*De natura deorum*", II, xxviii, derives religion from *relegere* (to treat carefully): "Those who carefully took in hand all things pertaining to the gods were called *religiosi*, from *relegere*." Max Müller favoured

this view. But as religion is an elementary notion, long antedating the time of complicated ritual presupposed in this explanation, we must seek elsewhere for its etymology. A far more likely derivation, one that suits the idea of religion in its simple beginnings, is that given by Lactantius, in his "Divine Institutes", IV, xxviii. He derives religion from *religare* (to bind): "We are tied to God and bound to Him [*religati*] by the bond of piety, and it is from this, and not, as Cicero holds, from careful consideration [*relegendo*], that religion has received its name." The objection that *religio* could not be derived from *religare*, a verb of the first conjugation, is not of great weight, when we call to mind that *opinio* comes from *opinari*, and *rebellio* from *rebellare*. St. Augustine, in his "City of God", X, iii, derives *religio* from *religere* in the sense of recovering: "having lost God through neglect [*negligentes*], we recover Him [*religentes*] and are drawn to Him." This explanation, implying the notion of the Redemption, is not suited to the primary idea of religion. St. Augustine himself was not satisfied with it, for in his "Retractions", I, xiii, he abandoned it in favour of the derivation given by Lactantius. He employs the latter meaning in his treatise "On the True Religion", where he says: "Religion binds us [*religat*] to the one Almighty God." St. Thomas, in his "Summa", II-II, Q. lxxxi, a. 1, gives all three derivations without pronouncing in favour of any. The correct one seems to be that offered by Lactantius. Religion in its simplest form implies the notion of being bound to God; the same notion is uppermost in the word *religion* in its most specific sense, as applied to the life of poverty, chastity, and obedience, to which individuals voluntarily bind themselves by vows more or less solemn. Hence those who are thus bound are known as religious.

Religion, broadly speaking, means the voluntary subjection of oneself to God. It exists in its highest perfection in heaven, where the angels and saints love, praise, and adore God, and live in absolute conformity to His holy will. It does not exist at all in hell, where the subordination of rational creatures to their Creator is one not of free will, but of physical necessity. On earth it is practically coextensive with the human race, though, where it has not been elevated to the supernatural plane through Divine revelation, it labours under serious defects. It is with religion as affecting the life of man on earth that this article deals. The analysis of the idea of religion shows that it is very complex, and rests on several fundamental conceptions. It implies first of all the recognition of a Divine personality in and behind the forces of nature, the Lord and Ruler of the world, God. In the highest religions, this supernatural Being is conceived as a spirit, one and indivisible, everywhere present in nature, but distinct from it. In the lower religions, the various phenomena of nature are associated with a number of distinct personalities, though it is rare that among these numerous nature-deities one is not honoured as supreme. Ethical qualities, corresponding to the prevailing ethical standards, are attributed by the different peoples to their respective deities.

In every form of religion is implied the conviction that the mysterious, supernatural Being (or beings) has control over the lives and destinies of men. Especially in lower grades of culture, where the nature and utilization of physical laws is but feebly understood, man feels in many ways his helplessness in the presence of the forces of nature: it is the Divine Being that controls them; He it is that can direct them for man's weal or woe. There thus arises in the natural order a sense of dependence on the Deity, a deeply felt need of Divine help. This lies at the basis of religion. Still it is not the recognition of dependence on God that constitutes the very essence of religion, indispensable as it is. The damned recognize their

dependence on God, but, being without hope of Divine help, are turned from, rather than towards, Him. Coupled with the sense of need is the persuasion on the part of man that he can bring himself into friendly, beneficent communion with the Deity or deities on whom he feels he depends. He is a creature of hope. Feeling his helplessness and need of Divine assistance, pressed down, perhaps, by sickness, loss, and defeat, recognizing that in friendly communion with the Deity he can find aid, peace, and happiness, he is led voluntarily to perform certain acts of homage meant to bring about this desired result. What man aims at in religion is communion with the Deity, in which he hopes to attain his happiness and perfection. This perfection is but crudely conceived in lower religions. Conformity to the recognized moral standard, which is generally low, is not wholly neglected, but it is less an object of solicitude than material welfare. The sum of happiness looked for is prosperity in the present life and a continuation of the same bodily comforts in the life to come. In the higher religions, the perfection sought in religion becomes more intimately associated with moral goodness. In Christianity, the highest of religions, communion with God implies spiritual perfection of the highest possible kind, the participation in the supernatural life of grace as the children of God. This spiritual perfection, bringing with it perfect happiness, is realized in part at least in the present life of pain and disappointment, but is to be found fully attained in the life to come. The desire of happiness and perfection is not the only motive that prompts man to do homage to God. In the higher religions there is also the sense of duty arising from the recognition of God's sovereignty, and consequently of His strict right to the subjection and worship of man. To this must also be added the love of God for His own sake, inasmuch as He is the infinitely perfect Being, in whom truth, beauty, and goodness are realized in their highest possible degree. While the prevailing motive in all lower religions is one of self-interest, the desire of happiness, it generally implies to some extent an affectionate as well as reverent attitude towards the deities that are the object of worship.

From what has been said it is plain that the concept of deity required for religion is that of a free personality. The error of mistaking many nature-deities for the one true God vitiates, but does not destroy, religion. But religion ceases to exist where, as in Pantheism, the deity is pronounced to be devoid of all consciousness. A deity without personality is no more capable of awakening the sense of religion in the heart of man than is the all-pervading ether or the universal force of gravitation. Religion is essentially a personal relation, the relation of the subject and creature, man, to his Lord and Creator, God. Religion may thus be defined as the voluntary subjection of oneself to God, that is to the free, supernatural Being (or beings) on whom man is conscious of being dependent, of whose powerful help he feels the need, and in whom he recognizes the source of his perfection and happiness. It is a voluntary turning to God. In the last analysis it is an act of the will. In other words it is a virtue, since it is an act of the will inclining man to observe the right order, springing from his dependence on God. Hence St. Thomas (II-II, Q. lxxxi, a. 1) defines religion as "*virtus per quam homines Deo debitum cultum et reverentiam exhibent*" (the virtue which prompts man to render to God the worship and reverence that is His by right). The end of religion is filial communion with God, in which we honour and revere Him as our supreme Lord, love Him as our Father, and find in that reverent service of filial love our true perfection and happiness. Bliss-giving communion with the sovereign Deity is, as has been pointed out, the end of all religions. Primitive Buddhism (q. v.), with its aim to secure unconscious repose (Nirvana)

through personal effort independently of Divine aid, seems to be an exception. But even in primitive Buddhism communion with the gods of India was retained as an element of lay belief and aspiration, and it was only by substituting the ideal of Divine communion for that of Nirvana that Buddhism became a popular religion.

Thus, in its strictest sense, religion on its subjective side is the disposition to acknowledge our dependence on God, and on the objective side it is the voluntary acknowledgement of that dependence through acts of homage. It calls into play not simply the will, but the intellect, the imagination, and the emotions. Without the conception of personal deity, religion would not exist. The recognition of the unseen world stirs the imagination. The emotions, too, are called into exercise. The need of Divine help gives rise to the longing for communion with God. The recognized possibility of attaining this end engenders hope. The consciousness of acquired friendship with a protector so good and powerful excites joy. The obtaining of benefits in answer to prayer prompts to thankfulness. The immensity of God's power and wisdom calls up feelings of awe. The consciousness of having offended and estranged Him, and of thus deserving punishment, leads to fear and sorrow and the desire of reconciliation. Crowning all is the emotion of love springing from the contemplation of God's wonderful goodness and excellence. Hence we see how wide of the mark are the attempts to limit religion to the exercise of a particular faculty, or to identify it with ritual or with ethical conduct. Religion is not adequately described as "the knowledge acquired by the finite spirit of its essence as absolute spirit" (Hegel), nor as "the perception of the infinite" (Max Müller), nor as "a determination of man's feeling of absolute dependence" (Schleiermacher), nor as "the recognition of all our duties as divine commands" (Kant), nor as "morality touched by emotion" (Mathew Arnold), nor as "the earnest direction of the emotions and desires towards an ideal object recognized as of the highest excellence and as rightly paramount over selfish objects of desire" (J. S. Mill). These definitions, in so far as they are true, are only partial characterizations of religion.

Religion answers to a deeply felt need in the heart of man. Above the needs of the individual are the needs of the family, and higher still are the needs of the clan and people. On the welfare of the people depends that of the individual. Hence we find that religion in its outward worship is to a large extent a social function. The chief rites are public rites, performed in the name, and for the benefit, of the whole community. It is by social action that religious worship is maintained and preserved. Only in the society of one's fellow-men does one develop one's mental and moral faculties, and acquire religion. Religion is distinguished into natural and supernatural. By natural religion is meant the subjection of oneself to God, based on such knowledge of God and of man's moral and religious duties as the human mind can acquire by its own unaided powers. It does not, however, exclude theophanies and Divine revelations made with the view to confirm religion in the natural order. Supernatural religion implies a supernatural end, gratuitously bestowed on man, namely a lively union with God through sanctifying grace, begun and imperfectly attained here, but completed in heaven, where the beatific vision of God will be its eternal reward. It also implies a special Divine revelation, through which man comes to know this end as well as the Divinely appointed means for its attainment. Subjection of oneself to God, based on this knowledge of faith and kept fruitful by grace, is supernatural religion.

II. SUBJECTIVE RELIGION.—Religion on its sub-

jective side is essentially, but not exclusively, an affair of the will, the will to acknowledge by acts of homage man's dependence on God. We have already seen that the imagination and the emotions are important factors in subjective religion. The emotions, elicited by the recognition of dependence on God and by the deeply felt need of Divine help, give greater efficacy to the deliberate exercise of the virtue of religion. It is worthy of note that the emotions awakened by the religious consciousness are such as make for a healthy optimism. The predominant tones of religion are those of hope, joy, confidence, love, patience, humility, the purpose of amendment, and aspiration towards high ideals. All these are the natural accompaniments of the persuasion that through religion man is living in friendly communion with God. The view that fear is in most instances the spring of religious action is untenable.

In subjective religion several virtues must be included, most of them being of an emotional character. The proper exercise of the virtue of religion involves three co-operant virtues having God as their direct object, and hence known as the "theological virtues". First there is faith. Strictly speaking, faith as a virtue is the reverent disposition to submit the human mind to the Divine, to accept on Divine authority what has been revealed by God. In the wide sense, as applying to all religions, it is the pious acceptance of the fundamental notions of Deity and of man's relation to Deity contained in the religious traditions of the community. In practically all religions there is an exercise of authoritative teaching in regard to the intellectual basis of religion, the things to be believed. These things individuals do not acquire independently, through direct intuition or discursive reasoning. They come to know them from the teaching of parents and elders, and from the observance of sacred rites and customs. They take these teachings on authority, made venerable by immemorial usage, so that to reject them would be reprobated as an act of impiety. Thus, while man has the capacity to arrive at a knowledge of the fundamentals of religion by the independent exercise of his reason, he regularly comes to know them through the authoritative teaching of his elders. Faith of this kind is practically an indispensable basis of religion. In the supernatural order, faith is absolutely indispensable. If man has been raised to a special supernatural end, it is only by revelation that he can come to know that end and the Divinely appointed means for its attainment. Such a revelation necessarily implies faith. For the exercise of the virtue of religion hope is absolutely indispensable. Hope is the expectation of securing and maintaining bliss-bringing communion with the Deity. In the natural order it rests on the conception of Deity as a morally good personality, inviting confidence. It is also sustained by the recognized instances of Divine providence. In the Christian religion hope is raised to the supernatural plane, being based on the promises of God made known through the revelation of Christ. The absence of hope paralyzes the virtue of religion. For this reason the damned are no longer capable of religion. Thirdly, the love of God for His own sake is a concomitant of the virtue of religion, being needed for its perfection. In some lower forms of religion, it is largely, if not wholly, absent. The Deity is honoured chiefly for the sake of personal advantage. Still, in perhaps the majority of religions, at least the beginnings of a filial affection for the Deity are felt. Such affection seems to be implied in generous offerings and in expressions of thankfulness so common in religious rites. Closely associated with the virtues of hope and love, and hence intimately connected with religion as exercised by man in his frailty, is the virtue of repentance.

With all his zeal for religion, man is constantly lapsing into offences against the Deity. These offences, whether ritual or moral, deliberate or involuntary, present themselves as obstacles more or less fatal to the bliss-bringing communion with the Deity which is the end of religion. The fear of forfeiting the good will and help of the Deity, and of incurring His punishment, gives rise to regret, which in higher religions is made more meritorious by the sorrow felt for having offended so good a God. Hence the offender is prompted to acknowledge his fault and to seek reconciliation, so as to restore to its integrity the ruptured union of friendship with God.

III. OBJECTIVE RELIGION.—Objective religion comprises the acts of homage that are the effects of subjective religion, and also the various phenomena which are viewed as the manifestations of good will by the Deity. We may distinguish in objective religion a speculative and a practical part.

A. *Speculative*.—The speculative part embraces the intellectual basis of religion, those concepts of God and man, and of man's relation to God, which are the object of faith, whether natural or supernatural. Of vital importance to right religion are correct views concerning the existence of a personal God, Divine providence and retribution, the immortality of the soul, free will, and moral responsibility. Hence the need is recognized of firmly establishing the grounds of theistic belief, and of refuting the errors that weaken or destroy the virtue of religion. Polytheism vitiates religion, in so far as it confounds the one true God with a number of fictitious beings, and distributes among these the reverent service that belongs to God alone. Religion is absolutely quenched in Atheism, which tries to substitute for the personal Deity blind physical forces. Equally destructive is Pantheism, which views all things as emanations of an impersonal, unconscious world-ground. Agnosticism, in declaring that we have not sufficient grounds for asserting the existence of God, also makes religion impossible. Scarcely less fatal is Deism, which, putting God far from the visible world, denies Divine providence and the efficacy of prayer. Wherever religion has flourished, we find a deeply rooted belief in Divine providence. Free will—with its necessary implication, moral responsibility—is taken for granted in the creeds of most religions. It is only in grades of higher culture, where philosophic speculation has given occasion to the denial of free will, that this important truth is emphasized. Belief in the immortality of the soul is to be found in practically all religions, though the nature of the soul and the character of the future life are in most religions crudely conceived. Divine retribution is also an element of religious belief throughout the world. One of the common errors fostered in recent works on anthropology and the history of religions is that only in the higher religions is moral conduct found to rest on religious sanction. While the standard of right and wrong in lower religions is often grossly defective, allowing the existence of impure and cruel rites, it is nevertheless true that what is reprobated as morally evil is very generally viewed as an offence against the Deity, entailing punishment in some form unless expiated. Many religions, even those of savage and barbarous tribes, distinguish between the fate of the good and that of the bad after death. The bad go to a place of suffering, or they perish utterly, or they are re-born in vile animal forms. Practically all give evidence of belief in retribution in the present life, as may be seen from the universal use of ordeals, oaths, and the widespread recourse to penitential rites in times of great distress.

These fundamental elements of belief have their legitimate place in the Christian religion, in which they are found corrected, supplemented, and completed

by a larger knowledge of God and of His purposes in regard to man. God, having destined man for filial communion with Himself in the life of grace, has through the Incarnation and Redemption of Christ brought within the reach of man the truths and practices needed for the attainment of this end. Thus, in Christianity the things to be believed and the things to be done in order to obtain salvation have the guarantee of Divine authority. Right belief is thus essential to religion, if man is to do justice to his moral and religious duties and thereby secure his perfection. The popular cry of to-day for religion without dogma comes from the failure to recognize the supreme importance of right belief. The dogmatic teachings of Christianity, supplementing and perfecting the intellectual basis of natural religion, are not to be looked on as a mere series of intellectual puzzles. They have a practical purpose. They serve to enlighten man on the whole range of his religious and ethical duties, on the proper fulfilment of which depends his supernatural perfection. Closely allied with the data of revelation are the attempts to determine their mutual relations, to explain them as far as possible in terms of sound science and philosophy, and to draw from them their legitimate deductions. Out of this field of religious study has arisen the science of theology. Corresponding with this in function, but the very opposite of it in worth, is the mythology of pagan religions. Mythology is the product partly of the tendency of the human mind to realize and partly of man's attempts to account for the origins of such factors in life as fire, disease, death, and to explain the succession of natural phenomena in an age of ignorance when a fanciful personification of nature's forces occupied the place of scientific knowledge. Hence arose the mythical stories of the gods both great and small, many of which in later generations gave scandal because of their absurdity and immorality. Mythology, being born of ignorance and unbridled fancy, has no legitimate place in sound religious belief.

B. *Practical*.—The practical part comprises (1) the acts of homage whereby man acknowledges God's dominion and seeks His help and friendship, and (2) the extraordinary religious experiences viewed by the worshippers as manifestations of Divine good will.

(1) The acts of homage may be distinguished into three classes: (a) the direct acts of worship; (b) the regulation of conduct outside the sphere of moral obligation; (c) the regulation of conduct within the recognized sphere of moral obligation.

(a) Acts of Worship.—The acts of worship proper consist of those which directly express adoration, thanksgiving, petition, and propitiation. In these are included acts of faith, hope, love, humility, and repentance. They take the external form of prayer and sacrifice. Prayer, as an outward act, is the verbal communication of man's thoughts and needs to God. In the lower religions petitions for earthly favours are the chief objects of prayer. Expressions of thanks, too, are not unknown. Besides these there are in the higher religions prayers of adoration, of petition for moral improvement, also penitential prayers. Sacrifice is equally common with prayer. Scholars are not all agreed as to the primary idea underlying the use of sacrifice. The most likely view is that sacrifice is primarily a token of respect in the form of a gift. It is often called a gift or offering, even in Holy Scripture (cf. Gen., iv, 3-5; Matt., v, 23). Among the nations of antiquity, as well as most peoples of to-day, no inferior would think of approaching his superior without bringing a gift. It is a token of respect and good will. It is not a bribe, as some have objected, though it may degenerate into such. In like manner, man from the earliest times, in doing homage to the Deity, came into His presence with a gift. Besides being a visible proof of man's respect,

the gift also signified that all things were God's. The giving over of the object to the Deity implied that it no longer belonged to the worshipper, but was made the sacred property of the Deity (*sacrificium*). Being thus removed from ordinary use, it was passed over to the Deity by a total or partial destruction. Liquid offerings were poured out on the ground. Food offerings were generally burned. Others were cast into rivers or the sea. Very frequently, in the food offerings, only part was destroyed by fire, the rest being eaten by the worshippers. In this way was symbolized the friendly union of the Deity and the worshippers. In some cases the underlying idea was that man was the privileged guest at the Divine banquet, partaking of the sacred food consecrated to the Deity. It thus had a quasi-sacramental significance. In the ancient Hebrew religion there were food offerings, including bloody sacrifices of animal victims. These were types of the great atoning sacrifice of Christ. In the Catholic religion, the sacrifice of Christ on the Cross is perpetuated by the unbloody sacrifice of the Mass, in which the eternal Lamb of God is offered under the appearance of bread and wine and is devoutly consumed by priest and faithful. The use of sacrifice has led to the office of priest. In the beginning, sacrifice, like prayer, was of the simplest kind and was offered by the individual for his personal needs, by the head of the family or clan for its members collectively, and by the chief or king for the whole people.

With the growth of ceremonial prayers and rites, the office of sacrifice gave rise to the class of priests whose duty it was to make the offerings in strict conformity with the complicated ritual. The institution of the office of priest is thus later than that of sacrifice. Sacrifices were first made under the open sky on raised hearths of earth or stone, which became altars. For the protection of permanent altars temples came to be built. The most solemn sacrifices were those offered in behalf of the people for the obtaining of public benefits. To accommodate the large concourse of worshippers, the temples were often built on a grand scale, surpassing in magnificence the palaces of the kings. From the earliest times religion was thus the great inspiring influence in the development of architecture and the decorative arts. The arts of sculpture and painting owe much to the religious use of images and pictures, which from time immemorial have been associated with worship. In acquiring notions of invisible, intangible beings, man has generally made large use of the imagination, which, while it often misrepresents, serves to concretize and make real the things he recognizes but only vaguely grasps. This has led to the fashioning of forms in wood and stone to represent the mysterious beings to whom man looks for aid. These forms are apt to be repulsive where the art of sculpture is rudimentary. In the higher nations of antiquity, the making of sacred images in wood, stone, and metal was carried to a high degree of perfection. Their use degenerated into idolatry where Polytheism prevailed. The Christian religion has allowed the use of statues and paintings to represent the Incarnate Son of God, the saints, and angels, and these images are a legitimate aid to devotion, since the honour that is given them is but relative, being directed through them to the beings they represent. It is like the relative honour given to the flag of the nation. The times and places of external worship deserve passing notice. In most religions we find certain days of the year set apart for the more solemn acts of sacrificial worship: some of these are suggested by recurring phenomena of nature (the new and full moon, spring-time with its awakening vegetation, autumn with its ripened harvests, the two solstices); others commemorate historic events of great importance for the religious life of the people. Hence the widespread observance of religious festivals, when public sacrifices are offered with elaborate ritual and

are accompanied with feasting and rest from ordinary business. In like manner certain places, made venerable by immemorial worship or by association with reputed visions, oracles, and miraculous cures, come to be singled out as the spots most suitable for public worship. Shrines and temples are built, to which a peculiar sanctity attaches, and annual pilgrimages are made to them from distant places.

The emotional element in external worship is a feature that cannot be overlooked. The solemn prayers and sacrifices to the Deity in behalf of the community are embellished with ritual acts expressive of the emotions brought into play in religious worship. The desire and hope of Divine help, joy at its possession, gratitude for favours received, distress at the temporary estrangement of the offended Deity—all these emotions quicken the acts of worship and find expression in chants, instrumental music, dances, processions, and stately ceremonial. These expressions of feeling are also powerful means of arousing feeling, and thus give an intense earnestness to religion. This emotional element enters into the external worship of every religion, but its extent and character vary considerably, being determined by the particular standard of propriety prevailing in a given grade of culture. Uncultured peoples, as a rule, are more emotional and more impulsive in expressing their emotions than are peoples of a high grade of culture. Hence the worship in lower religions is generally characterized by noisy, extravagant action and spectacular display. This is especially shown in their sacred dances, which are for the most part violent, and from our point of view fantastic, but which are executed in a spirit of great earnestness. The early Hebrew religion, like most of the religions of antiquity, had its sacred dances. They are a popular feature of Islamism to-day. They have been wisely set aside in Christian worship, though in a very few places, as at Echternach in Luxemburg, and in the Seville cathedral, religious dancing gives a local colour to the celebration of certain festivals. Instrumental and vocal music is a most fitting framework for liturgical prayers and solemn sacrifices. The beginnings of music were necessarily rude. Under the influence of religion, the rhythmic chants grew into inspiring hymns and psalms, giving rise to the sacred poetic literature of many nations. In the Christian religion sacred poetry, melody, and polyphonic music have been carried to the height of perfection. Closely allied with the religious dance, yet, when duly circumscribed, not objectionable to refined taste, is the pageantry of religious ceremonial—the employment of numerous officiating ministers dressed in striking costumes to perform a solemn, complicated function, or the religious procession, in which the ministers, bearing sacred objects, are accompanied by a long line of worshippers, marching to the sound of soul-stirring hymns and instrumental music. All this makes a profound impression on the spectators. The Catholic Church has shown her wisdom by taking into her liturgy such of these elements as are the legitimate and dignified expression of religious feeling.

(b) Regulation of Conduct outside the Sphere of Moral Obligation.—This element is common to all religions. It is exemplified in the purifications, fasts, privation of certain kinds of food, abstinence at times from conjugal intercourse, cessation on certain days from ordinary occupations, mutilations, and self-inflicted pains. Most of these serve as preparations, immediate or remote, for the solemn acts of worship for which ceremonial purity is generally required. Hence many of them are embodied in rites closely associated with Divine worship. Most of these practices rest on a sense of fitness strengthened by immemorial custom. To neglect or disregard them is thought to entail calamities. Thus they have a quasi-religious sanction. In the Hebrew religion practices of this kind rested for the most part on express Divine

commands. This was even true of circumcision, which, while being a mutilation of a minor sort (the only form of mutilation tolerated in the Old Law), was given a highly moral signification, and made to serve as the token of God's covenant with Abraham and his descendants. The Sabbath rest, transferred in Christianity to Sunday, is likewise based on an express Divine command. To this class of external acts of homage belong also the various forms of asceticism that prevail in many religions. Such are the restrictive works of piety involving inconvenience, pain, and abstinence from legitimate enjoyments, voluntarily undertaken with the view to merit a larger share of Divine favour and to secure more than ordinary sanctity and perfection. In the lower religions the ascetic tendency has often degenerated into repulsive forms of mortification based on purely selfish ends. In Christianity the various forms of self-denial, particularly the counsels of perfection (poverty, chastity, and obedience) cultivated in the spirit of Divine love, have led to the flourishing of the ascetic life within the limits of true religious propriety.

(c) Regulation of Conduct within the Recognized Sphere of Moral Obligation.—The class of acts which fall within its sphere implies that the sovereign Deity is the guardian of the moral law. Moral duties, to the extent that they are recognized, are viewed as Divine commands. Their fulfilment merits Divine approval and reward; their violation entails Divine punishment. Unfortunately the moral standard of peoples in lower grades of culture has been as a rule grossly defective. Many things shocking to our moral sense have been done by them without the consciousness of wrong-doing. Being generally given to incontinence, polygamy, deeds of violence, and even to cannibalism, they have naturally attributed the same sentiments and practices to their gods. The religious sanction thus conceived lends strength to both the good and the evil side of their imperfect standard of conduct. While it helps them to avoid certain gross forms of wrong-doing, patent even to minds of low intelligence, it encourages the continued practice of vicious indulgences that otherwise might be more easily outgrown. This is particularly the case where these excesses have been woven into the myths of the gods and the legends of deified heroes, or have been incorporated into the religious rites and become, as it were, inviolable. This explains how, for example, among peoples so highly civilized as the Babylonians, Greeks, and Romans, certain lascivious rites could hold their own in the sacred liturgy, and also how, in the worship of the Aztec god of war, human sacrifices with cannibal feasts could prevail to so shocking a degree. In this respect the religious systems of lower grades of culture have tended to retard reform and progress towards higher standards of conduct. It has been the glory of the religion of Christ that, starting with the highest ethical principles, it has pointed out to men the true path to moral and spiritual perfection, and given the most powerful aids to the successful pursuit of this lofty ideal.

(2) Manifestations of Divine Good Will.—Religion is something more than the attempt of man to secure communion with God. It is also an experience sometimes real and sometimes fancied, of the supernatural. Corresponding to the deeply felt need of Divine help is the conviction that in numerous instances this help has been given in answer to prayer. Sensible tokens of Divine good will are piously thought to reward the earnest efforts of man to secure bliss-bringing communion with the Deity. Prominent among these are alleged instances of Divine communications to man, revelation.

(a) Revelation.—Revelation (or God speaking to man) is the complement of prayer (man speaking to God). It is instinctively felt to be needed for the

perfection of religion, which is a personal relation of love and friendship. There is scarcely a religion which has not its accepted instances of Divine visions and communications. To the Theist this offers a strong presumptive argument in favour of Divine revelation, for God would hardly leave this legitimate craving of the human heart unsatisfied. It has, indeed, been fully met in the religion of Christ, in which man has been Divinely enlightened in regard to his religious duties, and has been given the supernatural power to fulfil them and thereby secure his perfection. In lower religions, where temporal welfare is chiefly kept in view, on the eve of every important undertaking Divine assurance of success is eagerly sought through ritual forms of divination and through the use of prophecy. The office of prophet, the recognized spokesman of the Deity, is generally but not always distinct from that of priest. It had its legitimate place in the Old Law, in which the Divinely chosen Prophets not only told of things to come, but also brought to their contemporaries God's messages of warning and of moral and spiritual awakening. In Christ the office of prophet was perfected and completed for all time. In lower religions the office of prophet is almost invariably characterized by extraordinary mental excitement, taken by the worshippers as the sign of the inspiring presence of the Deity. In this state of religious frenzy, brought on as a rule by narcotics, dances, and noisy music, the prophet utters oracles. Sometimes the prophecy is made after emerging from a trance, in which the prophet is thought to be favoured with Divine visions and communications. In their ignorance, the worshippers mistake these pathological states for the signs of indwelling Deity. Their counterparts may be seen to-day in the wild scenes of excitement so common in the religious revivals of certain sects, where the believers, under the influence of noisy, soul-stirring exhortations, become seized with religious frenzy, dance, shout, fall into cataleptic fits, and think they see visions and hear Divine assurances of being saved. Quite different from these violent mental disturbances are the peaceful, but no less extraordinary ecstasies of many saints, in which wonderful visions and Divine colloquies are experienced, while the body lies motionless and insensible. The supernatural character of these experiences is not a matter of faith, but is vouched for by the careful investigation and judgment of the ecclesiastical authorities and pronounced worthy of pious acceptance.

(b) Extraordinary Healing.—There are few religions in which recourse is not had to supernatural aid for miraculous cures. The testimony of reliable witnesses and the numerous ex-votos that have come down to us from antiquity leave no doubt as to the reality of many of these cures. It was natural that they should be viewed as miraculous in an age when the remarkable power of suggestion to effect cures was not understood. Modern science recognizes that strong mental impressions can powerfully influence the nervous system and through this the bodily organs, leading in some instances to sudden illness or death, in others to remarkable cures. Such is the so-called mind-cure, or cure by suggestion. It explains naturally many extraordinary cures recorded in the annals of different religions. Still it has its recognized limits. It cannot restore of a sudden a half-decayed organ, or heal instantly a gaping wound caused by a cancer. Yet cures like these and others equally defying natural explanation have taken place at Lourdes and elsewhere, and are authenticated by the highest medical testimony.

(c) Sudden Conversions.—In the Christian religion there are numerous instances of sudden conversions from a life of vice to one of virtue, from a state of spiritual depression to one of enthusiastic

zeal. The latter kind are not infrequent in Calvinistic forms of Protestantism, where the fear of being outside the elect, heightened by lapses into sin, leads to spiritual depression and misery with a corresponding yearning for a Divine assurance of salvation. Such conversions, coming unexpectedly and transforming the individual into a new man, happy in the consciousness of Divine love and active in works of piety, have been popularly viewed as miraculous in every instance. That many of these conversions may be of a purely natural order seems to be shown by modern psychology, which offers the plausible theory of the sudden uprush into consciousness of subliminal activities set unconsciously in operation by intense, persistent longings for a change to a better, more spiritual life. But it must be recognized that this theory has its limitations. The grace of God may be working in many conversions that allow of a natural explanation. Moreover, there are conversions that defy any such natural explanation as the working of subliminal consciousness. It cannot, for instance, explain the conversion of St. Paul, who, from a rabid hater of Christianity, was suddenly turned into one of its most ardent champions, a result that was the very antithesis of his previous conscientious belief and aspirations. That his vision of Christ was real and objective is proved by the wonderful accession of knowledge that it brought to his mind, fitting him to stand forth unchallenged as one of Christ's Apostles. There is no natural explanation for a conversion such as this.

C. *Sacred Books.*—There remains a word to be said, by way of supplement, of the sacred literature characteristic of most higher religions. Both the speculative and the practical side of religion contribute to its formation. Many elements, accumulated through a long series of generations, go to compose the sacred books of the great religions of antiquity—the traditional myths and legends; the stories of the providential dealing of the Deity with His people; the sacred chants, hymns and prayers; the great epic poems; the laws governing social and domestic activity; the texts of the sacred rites and the prescriptions regulating their exact performance; speculations on the nature of the Deity, the soul, retribution, and the future life. In some of the ancient religions this enormous mass of sacred lore was transmitted orally from generation to generation till finally it was put in writing. In every religion possessing sacred books, there is a tendency to give them a much greater antiquity than they actually enjoy, and to view them as the infallible expression of Divine wisdom. This latter claim vanishes quickly when they are compared with the inspired books of the Bible, which in spiritual and literary worth stand immeasurably above them.

IV. THE ORIGIN OF RELIGION.—The beginnings of religion go back to remote prehistoric time. In the absence of positive, historic data, the question of the origin of religion admits only of a speculative answer. It is Catholic teaching that primitive religion was a Divinely revealed Monotheism. This was an anticipation and a perfection of the notion of religion, which man from the beginning was naturally capable of acquiring. Religion, like morality, has apart from revelation a natural basis or origin. It is the outcome of the use of reason, though, without the corrective influence of revelation, it is very apt to be misconceived and distorted.

A. *Modern Application of the Principle of Causality.*—Religion, in its last analysis, rests on a theistic interpretation of nature. The Christian philosopher arrives at this by a process of discursive reasoning, making use of arguments drawn from external nature and from his inner consciousness (see article God). This, however, is a highly philosophic process of reasoning, the result of the accumulated con-

tributions of many generations of thinkers. It presupposes a mind trained to abstract reasoning, and hence is by no means easy for the average individual. It can hardly have been the method followed by savage man, whose mind was not trained to philosophy and science. The process by which he arrived naturally at a theistic interpretation of the world seems to have been a simple, spontaneous application of the principle of causality.

B. *Primitive Application of the Principle of Causality.*—There is every reason to think that primitive man's view of nature was, to a large extent, similar to that held by peoples generally who have not risen to a scientific knowledge of the laws of nature. They recognize in all the striking phenomena of earth, air, and sky the immediate agency of intelligent volition. Untutored man does not understand the secondary, mechanical causes of natural events. The causes best known to him are living, personal causes, himself and his fellow-men. Familiarity with lifeless objects, as stocks and stones, weapons and utensils, shows that even these things exhibit only such movement and force as he and his fellows choose to impart to them. Living agency is behind their movements. The natural result is that, whenever he sees a phenomenon showing movement and energy outside his limited experience of mechanical causation, he is led spontaneously to attribute it to some mysterious form of living agency. The thunder suggests the thunderer. The sun and moon are taken to be either living things or the instruments of an invisible living agency. Personality is also associated with them, particularly where the phenomena are suggestive of intelligent purpose. To recognize in and behind the phenomena of nature the agency of mind and will was thus easy for primitive man. But it was not an equally simple matter to discern in the great diversity of these phenomena the action of but one supreme personality. The possibility of such an inference cannot be denied. But its likelihood is not great when we consider how hard it would have been for primitive man in his inexperience to co-ordinate the varied effects of nature and derive them from one and the same source of power. The more likely tendency would have been to recognize in the diverse phenomena the agency of distinct personalities, as was indeed done by the peoples of antiquity, and as is done to-day by uncultured peoples everywhere. Peoples, whose ignorance of the physical laws of nature has not been compensated by revealed teaching, have invariably personalized the forces of nature, and, feeling that their welfare depended on the beneficent exercise of these powers, have come to divinize them. From this danger of falling into a polytheistic interpretation of nature, primitive man was saved by Divine Revelation. Such, it would seem, was the simple philosophy forming the natural basis of religion in primitive times. It was theoretically capable of leading to a Monotheism like that of the ancient Hebrews, who viewed clouds, rain, lightning, and tempest as the signs of God's immediate activity. But, apart from revelation, it was very liable to degenerate into polytheistic nature-worship. Its defect was primarily scientific, ignorance of the secondary causes of natural events; but it rested on a sound principle, namely, that the phenomena of nature are in some way the outcome of intelligent volition. This principle commends itself to the Christian philosopher and scientist.

C. *Intuition Theory.*—Other theories have been suggested to account for the origin of religion. We shall briefly review the more common ones. According to the intuition theory, man has instinctively an intuition of God and of his dependence on Him. To this theory there are several serious objections. We ought to be conscious of this intuition if we possessed

it. Again, as a result of such intuition, man should be found everywhere with a monotheistic religion. The widespread existence of Polytheism and the religious apathy of many individuals are inconsistent with such an intuition of God.

D. Max Müller's Perception Theory.—This is but a slight modification of the intuition theory. Müller thought the perception of the infinite was the source of religion, being acquired by "a mental faculty which, independent of, nay in spite of, sense and reason, enables man to apprehend the infinite under different names and under varying disguises" ("Origin and Growth of Religion", London, 1880, p. 23). But apprehension of the infinite or even of the indefinite is suited rather to philosophic than to simple minds, and is not to be found in the generality of religions. It is the apprehension of sovereign personality that gives rise to religion, not the mere apprehension of the infinite. How man arrives at the notion of such personality, this theory does not explain.

E. Fear Theory.—A common theory with the Greek and Roman philosophers, favoured by a few writers of modern times, is that religion had its origin in fear, particularly fear of lightning, tempests, and other dangerous features of nature. But fear is a feeling, and no mere feeling can account for the idea of personality, which may or may not be associated with a dangerous or terrifying object. Fear like hope, may be one of the motives prompting man to the worship of the Deity, but such worship presupposes the recognition of Deity, and fear cannot account for this recognition. We have already seen that fear is not the predominating tone even in lower religions, as is shown by the universal use of rites expressing joy, hope, and gratitude.

F. Animist Theory.—A favourite theory of modern times is the animist theory. It has been set forth with great erudition by E. B. Tylor. According to this theory, in consequence of a strong tendency to personify, primitive peoples come to view everything as alive, even stocks and stones. They also have a crude notion of the soul, derived from dreams and visions experienced in sleep and swoons. Applying this soul-idea to inanimate things, which they take to be alive, they have come to associate mighty spirits with the great phenomena of nature and have given them worship. The defects of this theory are such as to discredit it in the eyes of most scholars. In the first place, it is not true that uncultured peoples confound the living with the non-living to the extent that they take the very stones to be alive. It would, indeed, be strange if uncultured man were not at least the equal of the beast in ability to distinguish between familiar objects that are lifeless and those that show life and movement. Again, while men of lower grades of culture have a crude notion of souls, they do not need that concept to arrive at the idea of personal agency in nature. All they need is the notion of personal cause, which they get from the consciousness of themselves as sources of power and purposive action. There is every reason to think that this idea is prior to the soul concept. (See ANIMISM.)

G. Ghost Theory.—This theory, whose prominent English champion was Herbert Spencer, identifies the primitive notion of religion with the service and propitiation of departed relatives, and attributes the worship of the great deities of nature to the mistaken applications of ancestor-worship. The first religious offerings are said to have been offerings of food, weapons, and utensils made to the souls of the dead, whose occupations, needs, and tastes in the next life were thought to be similar to those of earthly existence. In return for this much-needed service, the dead gave the living aid and protection. A series of blunders led to the recognition and worship of the great nature-deities. Migrating peoples from beyond the sea or the mountain became known as children

of the sea or of the mountain. Later generations, mistaking the meaning of the term, were led to view the sea or the mountain as their living ancestor and to give it worship. Again, departed heroes named Sun, Thunder, Rain-Cloud, came after a lapse of time to be confounded with the real sun and other natural phenomena, thus giving rise to the conception of nature-deities and to nature-worship. The defects of this theory are manifest. Mistakes like these might be made by some stupid individual of the tribe, but not by all the members of the tribe, still less by tribes over all the earth. A series of trivial and fortuitous blunders cannot account for so world-wide a fact as the recognition of nature-deities. If the ghost-theory were true, we should find the religions of savages consisting exclusively of ancestor-worship. This is not the case. In all lower religions, where we find food-offerings to the dead, we also find recognized, and carefully distinguished from dead heroes, nature-deities. Among the pygmies of the Northern Congo, accounted one of the lowest of races, there is a reverent recognition of a supreme Deity, but no trace of ancestor-worship. There is thus no good ground for asserting ancestor-worship to have been the earliest form of religion, nor do we need it to account for religion, strictly speaking, in any of its forms. It is a parallel growth that has sprung up and become entwined with religion proper. The latter is of independent origin.

H. Fetish Theory.—This derives religion from the use and veneration of fetishes. A fetish is an object (generally small enough to be easily carried) in which a spirit is thought to reside, acting as a protective genius for the owner who wears it, and who venerates it because of its indwelling spirit. Generally, it is the medicine-man or wizard who makes the fetish, and charges it with the spirit. It is used till its inefficiency becomes apparent, when it is cast aside as worthless, in the belief that the indwelling spirit has departed from it. Now the use of such objects cannot be the primary form of religion. In the first place, there is no existing form of religion known in which Fetishism is the sole constituent element. Among the negroes of West Africa, where it first attracted attention, the fetish spirits are at best but inferior beings, generally distinct from the supreme heaven-god and from the powerful nature-deities associated with the sea and thunder. Again, the notion of persuading spirits to lodge themselves in stocks and stones and become the property of the wearers, is the very antithesis of religion, which implies the sense of dependence on the Deity. Far from the latter notion being derived from the former, there is every reason to see in Fetishism a perverted notion of religion. (See FETISHISM.)

I. Totem Theory.—This puts the origin of religion in Totemism, a semi-religious, semi-social institution prevailing chiefly among savage tribes. In certain tribes, every one of the component clans has a tutelary deity intimately associated with a particular species of animal or plant, which species is venerated by the clan as sacred and inviolable. It is called the ancestor of the clan. The individuals of the species are often viewed as particularly sacred because of the indwelling deity. Hence the totem animal or plant is ordinarily not used for food by the clan that bears its name. The union of clans into tribes under the leadership of one superior clan is said to have led to the absorption of the weaker totem deities into that of the ruling clan, with the result that powerful tribal deities arose. It was but a step further to the recognition of a supreme deity. Totemism labours under many of the difficulties of Fetishism. Nowhere do we find religion of pure Totemism. Among the North American Indians, where Totemism has flourished with the greatest vigour, the totems are absolutely overshadowed by the great deities of the sky, air, and water. The

distinction between them and the totem spirits is absolute. Nowhere do the great deities bear the names of animals or plants as a mark of totem origin. In the majority of the religions of the world, there is no trace of Totemism, vestiges of which ought to be widespread if it had been the source of all other forms of religion. The totem, like the fetish, presupposes the very thing that needs to be accounted for, belief in the existence of unseen personal agents.

V. THE UNIVERSALITY OF RELIGION.—A. *Historical Survey*.—From what has already been said, it is plain that religion, though often imperfectly conceived, is in normal conditions of human existence the inevitable outcome of the use of reason. It is but natural, then, that religion, at least in some crude form, should be a characteristic feature in the life of all peoples. This truth was widely questioned during the last few centuries, when the extension of travel to unexplored lands gave rise to reports asserting the absence of religion among many native tribes of Asia, Africa, America, and the islands of the Pacific Ocean. One by one these reports have been nullified by the contrary statements of travellers and missionaries better qualified as witnesses, so that to-day there remain but very few peoples of whom it cannot be said with certainty that they possess some form, however degraded, of religion. These rare exceptions do but prove the rule, for they are insignificant tribes which, in the struggle for existence, have been driven by their enemies to inhospitable regions where the conditions of life are so wretched as to cause them to degenerate almost to a state of brutalization. A degradation of this sort can prove fatal to the sentiment of religion. A notable instance is the Indian tribe in Southern California among whom Father Baegert, a Jesuit missionary, laboured for many years. In the account which he gave of his experiences, a translation of which was published in the "Smithsonian Report" of 1864, he testified to their stupidity and utter lack of religion. Yet their descent from Indian stocks that had well-defined religious notions is practically certain. Father Baegert observed a few vestiges of an ancestral belief in a future life—for example the custom of putting sandals on the feet of the dead, the significance of which the Indians could not explain. Mental degradation like this may thus involve the loss of religion. But such degradation is extremely rare. On the other hand, wherever tribes exist in normal conditions, they are found to possess some sort of religion. The erroneous reports of earlier travellers asserting a lack of religion where religion actually exists, have been due either to superficial observation or to a misunderstanding as to what should be called religion. Some have accepted as religion only an exalted notion of the Deity coupled with well-organized rites of public worship. The absence of these has often been set down as an absence of religion. Again, unfavourable verdicts have not infrequently been based on a stay of but one or two days with tribes speaking an unknown tongue, as for example was the case with Verrazano and Amerigo Vespucci. But, even where observers have stayed for months among rude peoples, they have sometimes found it extremely difficult to obtain information in regard to religious beliefs and practices; a suspicion that the white man was seeking to obtain some advantage over them has more than once led savages to resort to deceit to conceal their religion. It is the calm, impartial judgment of anthropologists to-day that there is no people of note that is absolutely devoid of religion.

B. *Outlook*.—But the further question may be asked: If religion has been universal in the past, have we any assurance that it will persist in time to come? Has not the advance of modern science been marked by a progressive substitution of mechanical for personal agency in nature, with the inevitable result, as a writer has expressed it, that God will one

day be bowed out of His universe as no longer needed? To this we may reply: The advance of modern scientific culture is fatal to all polytheistic forms of religion, in which the recognized secondary causes are, through ignorance, mistaken for personal causes. The well-established scientific truth of the unity of nature's forces is in harmony only with the monotheistic interpretation of nature. Christian Monotheism, far from being inconsistent with true science, is necessary to supplement and complete the limited interpretation of nature afforded by science. The latter, being based on observation and experiment, has for its legitimate sphere of study only secondary causes of nature. It can tell nothing of origins, nothing of the great First Cause, from which the orderly universe has proceeded. In substituting physical laws for what was formerly thought to be the direct action of Divine agency, it has not accounted for the intelligent, purposive direction of nature. It has simply pushed the question somewhat further back, but left it with its religious answer as importunate as ever. It is true that in modern civilized nations there has asserted itself a notable tendency to religious scepticism and indifference. It is a symptom of unrest, of an unhealthy, excessive reaction from the simple view of nature that prevailed in both science and religion in former times. In the material order, ignorance of the natural causes of lightning, tempests, comets, earthquakes, droughts, and pests, has led less cultured peoples to see direct supernatural agency in their production. For them nature in its seemingly capricious moods has had the aspect rather of master than of servant. Their sense of dependence has thus been keen and constant; their need of Divine help urgent to a high degree. On the other hand, the widespread recognition among cultured peoples of the reign of law leads man to seek natural remedies in times of distress, and only where these fail to turn to God for aid. Modern civilization, in removing many scourges of ancient times that were viewed as supernatural, in greatly lessening the range of the miraculous, in binding nature in a thousand ways to beneficent service, has tended to create in the heart of man a feeling of self-sufficiency that tends to enfeeble the virtue of religion. That this tendency, however, is an abnormal, passing distemper rather than a permanent, characteristic feature of modern civilizations, may be seen from the unshaken Christian faith of many of the greatest exponents of scientific culture (e. g. Clerk-Maxwell, Sir John Herschell, Lord Kelvin in England; Faye, Lapparent, Pasteur in France). It is still more strikingly shown by the conversion from scepticism to Christian faith of distinguished scholars such as Littré, Romanes, Brunetière, Bourget, Coppée, and von Ruville. It was recognized by these and other profound thinkers that the deeply seated craving in the human heart for bliss-giving communion with God can never be stilled by science or by any other proposed substitute for religion.

VI. THE CIVILIZING INFLUENCE OF RELIGION.—Religion in its highest forms has exercised a profound influence on the development of human culture. In the recognized sphere of morality, it has offered powerful motives to right conduct; it has been the chief inspiration of music, poetry, architecture, sculpture, and painting; it has been the dominant influence in the formation of a permanent literature. In all the early civilizations, the chief representatives and transmitters of the highest known culture have been the officials in charge of religious rites. Religion has been a mighty force in the life of nations, cultivating in the hearts of men a striving for better things, a healthy tone of cheerfulness, hope, joy, resignation under calamities, perseverance in the face of difficulties, a readiness for generous service, in short a spirit of highminded

optimism, without which no nation can rise to greatness. Most noteworthy has been the influence of Christianity in transforming and elevating society. Its lofty ethical teachings, the peerless example of its Divine Founder, the fundamental principle that we are all children of the same heavenly Father and hence bound to treat our fellow-men not only with justice but with mercy and charity, the spirit of generous, self-sacrificing service, springing from personal devotion to the Divine Saviour and prompting to the practice of heroic virtues—all this, having for its end the spiritual perfection of the individual and the union of all men through a common bond of faith and worship in a Divinely constituted Church, has exercised a mighty influence in softening and refining the rude peoples of early Europe, in breaking down the barriers of race prejudice, and in forming a common society of many nations, in which the ideal recognized, though not yet fully attained, is a universal reign of peace, justice, chastity, charity, reverence for authority, sympathy for the afflicted, a general diffusion of useful knowledge, and in short a common participation in everything that makes for true culture. Nowhere have the works of charity flourished in such variety and vigour as in Christian lands. The Christian religion has ever been the great conservative force, favouring established order and law, and opposed to hasty innovations calculated to cause a profound disturbance in existing religious or political institutions. The value of such a force in human affairs is incalculable, even though it may occasionally retard for a while the general recognition of some principle of permanent value in science, economics, or politics.

While, in modern civilization, state institutions are sharing with Christian hospitals, asylums, and schools the work of charitable ministration which in former times depended exclusively on the Church; while the sciences and arts no longer need the fostering influence of religion, it is nevertheless true that, in the social and moral order, the need of right religion is as urgent as ever. It has not ceased to be the mighty social power working for the highest good of the nation. Religion alone can keep alive in a people devotion to high ideals, respect for established authority, preference for peaceful measures to secure political and industrial reforms, and a cheerful spirit of perseverance despite powerful opposition. Religion means generous optimism; irreligion means sordid pessimism. It is religion, too, that presents the highest and most efficacious motives for the upbuilding of character in the individual, for the conscientious fulfilment of his moral duties. Christianity does not disdain the purely secular grounds of morality, such as the love of virtue and hatred of vice, self-respect, regard for public opinion, fear of legal sanctions; but it reinforces and completes these by the powerful motives that are the fruit of the teaching of Christ, the greatest ethical teacher the world has ever seen—love of God, personal devotion to Jesus, the sense of God's presence, and the thought of Divine retribution. These motives, supernaturalized by grace, exercise a powerful influence in developing an interior conformity to the rule of right conduct, which distinguishes genuine moral worth from the mere outward show of respectability. Right religion both indicates and makes possible of fulfilment man's duties to himself, his family, his neighbour, and the State. In the measure that he conforms to the teaching of religion will he be found to be a zealous promoter and observer of civic virtue. In short, wherever we find the practical observance of right religion, there we find social order to a high degree. The nation that designedly and systematically repudiates religion is depriving itself of the most powerful factor operative in the upbuilding and maintaining of true public welfare.

It is on the steep incline to social and political ruin.

VII. THE MODERN SCIENTIFIC STUDY OF RELIGION.—Modern scholarship has given much attention to the study of religion. Out of this many-sided study have grown the modern branches known as the history of religion, comparative religion, and the psychology of religion, all of which are supplemented and completed by the older discipline, the philosophy of religion.

A. *History of Religion*.—This has for its scope the accurate and systematic exposition of the positive data that go to make up the different external religions of the world—the rites, customs, restrictions, concepts of deity, sacred books, etc. Its point of view is purely historic. It studies each religion apart from the question of its spiritual worth and possible supernatural origin, simply as an external expression of religious belief. A sympathetic interest attaches to this study, for there are few religions, however crude, that do not represent the sincere effort of man to bring himself into communion with God. The work accomplished in this field has been immense. Religious data have been accumulated from hundreds of different sources, and the sacred books of the great Oriental religions have been carefully translated, so that to-day there is within easy reach of the scholar a very reliable survey of the chief religions of the world.

B. *Comparative Religion*.—Closely allied to the history of religions, out of which it has grown, is comparative religion. The scope of this discipline is the comparative study of the many elements common to different religions with the view to ascertain their underlying thought and purpose, and thus to discover if possible the causes of their genesis and persistence. In some instances, where resemblances of a striking kind are found in two or more religions, it seeks to determine whether these resemblances imply dependence. It also admits a more extensive comparison of religion with religion in order to estimate their relative value. But like the history of religions, the data of which it uses, it does not concern itself as a science with the question whether any given religion be true. Comparative religion has helped to a better understanding of many phases of external religion. It has shown how certain widespread rites and customs have been the natural product of human thought in lower grades of culture. It has enabled us to recognize in higher religions elements that are survivals of earlier stages of thought. But its principles of comparison have to be used with great care, for they can easily be made to do service for contradictory and visionary theories. The writings of authors such as Frazer and Reinach offer many examples of unwarranted conclusions supported by far-fetched comparisons.

C. *Psychology of Religion*.—This discipline studies the different psychical states implied in, and associated with, the religious consciousness. It concerns itself with the extraordinary and abnormal, as well as with the normal exercise of the intellectual, volitional, emotional, and imaginative activities set in motion by religion. It does not attempt to vindicate the supernatural character of these psychical experiences or to show their conformity to objective truth. Viewing them simply as mental states, it seeks to find out how far they may be explained by natural causes. In the short period of its existence it has given much consideration to the phenomena of sudden conversions, religious frenzy, the sense of God's presence experienced by pious Christians, and the extraordinary experiences of mystics, Catholic and non-Catholic. In seeking the natural explanation of some of these experiences it has been successful; but, as has already been pointed out, it has its limitations.

D. *Philosophy of Religion*.—The philosophy of reli-

gion is the crown and completion of the several disciplines already mentioned. It carries the inquiring mind beyond the sphere of natural causation to the recognition of the great personal First Cause and Source of all things, and shows that only in the recognition of God is a satisfactory interpretation of the universe attainable. It is the science which examines the value of religion, and investigates with careful scrutiny the grounds of theistic belief. In its method of procedure and choice of arguments, it shows considerable variation, due in large measure to the different theories of knowledge that obtain in the world of philosophers. Since Kant's criticism of the Scholastic arguments for the existence of God, there has been a strong tendency in many schools to neglect the cosmological and teleological arguments, and to see the evidence of Divine wisdom and goodness rather in the human mind than in external nature. A reaction is now setting in. Some of the leading exponents of biological science now recognize that evolution, as an adequate explanation of the variety of organic life, is necessarily teleological, and do not hesitate to declare that the universe is the manifestation of a creative, controlling mind.

Besides the Latin works of ST. THOMAS, SUAREZ, LUGO, MAZZELLA, etc., the following authors may be consulted: VAN DEN GHEYN, *La Religion, son origine et sa définition* (Paris, 1891); HETTINGER, *Natural Religion* (New York, 1893); JASTROW, *The Study of Religion* (New York, 1902); BOWNE, *The Essence of Religion* (Boston, 1910); LILLY, *The Great Enigma* (New York, 1892); LANG, *The Making of Religion* (New York, 1898); IDEM, *Myth, Ritual and Religion* (London, 1899); MILL, *Three Essays on Religion* (London, 1874); KELLOGG, *The Genesis and Growth of Religion* (New York, 1892); MARTINEAU, *A Study of Religion* (2 vols., London, 1888); BRINTON, *The Religious Sentiment* (New York, 1876); DE BROGLIE, *Problèmes et conclusions de l'histoire des religions* (Paris, 1886); VERNES, *Hist. des religions, son esprit, sa méthode, et ses divisions* (Paris, 1887); JORDAN, *Comparative Religion: its Genesis and Growth* (New York, 1905); FOUCART, *La méthode comparative dans l'histoire des religions* (Paris, 1909); JAMES, *The Varieties of Religious Experience* (London, 1903); PRATT, *The Psychology of Religious Belief* (New York, 1907); AMES, *The Psychology of Religious Experience* (Boston, 1910); WUNDT, *Völkerpsychologie* (Leipzig, 1904-07); CAIRD, *Introduction to the Philosophy of Religion* (Glasgow, 1901); CALDECOTT, *The Philosophy of Religion in England and America* (New York, 1901); LADD, *The Philosophy of Religion* (New York, 1905); PFLEIDERER, *The Philosophy and Development of Religion* (2 vols., Edinburgh, 1894); EUCKEN, *Christianity and the New Idealism* (New York, 1909). See also bibliographies to PRIESTHOOD and SACRIFICE.

CHARLES F. AIKEN.

Religion, VIRTUE OF.—Of the three proposed derivations of the word "religion", that suggested by Lactantius and endorsed by St. Augustine seems perhaps to accord better with the idea than the others. He says it comes from *religare*, to bind. Thus it would mean the bond uniting man to God. The notion of it commonly accepted among theologians is that which is found in St. Thomas's "Summa Theologica", II-II, Q. lxxxii. According to him it is a virtue whose purpose is to render God the worship due to Him as the source of all being and the principle of all government of things. There can be no doubt that it is a distinct virtue, not merely a phase of another. It is differentiated from others by its object, which is to offer to Almighty God the homage demanded by His entirely singular excellence. In a loose construction it may be considered a general virtue in so far as it prescribes the acts of other virtues or requires them for the performance of its own functions. It is not a theological virtue, because its immediate object is not God, but rather the reverence to be paid to Him. Its practice is indeed often associated with the virtues of faith and charity. Still the concordant judgment of theologians puts it among the moral virtues, as a part of the cardinal virtue justice, since by it we give God what is due to Him. St. Thomas teaches that it ranks first among moral virtues. A religious attitude towards God is essentially the product of our recognition, not only of His sovereign majesty, but also of our absolute dependence on Him. Thus, as Father Rickaby says, He is not merely "the Great Stranger",

our behaviour towards whom must be invested with awe and admiration; He is besides our Creator and Master and, in virtue of our supernatural filiation in the present order of things, our Father. Hence we are bound to cherish habitually towards Him sentiments of adoration, praise, thanksgiving, loyalty, and love. Such a demeanour of soul is inexorably required by the very law of our being. We must not, however, rest satisfied because perchance our interior bearing is fairly in conformity with this standard. We are not simply spirits. Our composite nature needs to express itself by outward acts in which the body as well as the soul shall have a part—this not only to spur on our inner feelings, but also because God owns us body and soul, and it is right that both should show their fealty to Him. This is the justification of external religion. Of course God does not need our worship, whether interior or exterior, and it is puerile to impugn it on that score. We cannot by our homage add anything to His glory, unless it be the extrinsic increment of the theologians of which account need not be taken here. It is not because it is strictly speaking of use to Him that we render it, but because He is infinitely worthy of it, and because it is of tremendous value to ourselves. The chief acts of this virtue are adoration, prayer, sacrifice, oblation, vows; the sins against it are neglect of prayer, blasphemy, tempting God, sacrilege, perjury, simony, idolatry, and superstition.

Religious Life.—I. GENERAL VIEW AND EVANGELICAL IDEA OF THE RELIGIOUS LIFE.—A. GENERAL VIEW.—We all have within us that vague and general idea of the religious life which enables us to recognize it when it is described as a life directed to personal perfection, or a life seeking union with God. Under this twofold aspect it is met with in all ages and places: every soul possesses an inclination to good, and an inclination towards God. There are everywhere souls that willingly follow these inclinations, and consequently religious souls. Sometimes they attach more importance to the tendency to self-perfection, sometimes to the tendency towards God; in other words, to the ascetic tendency or the mystical tendency; but since God is the end of man, the two tendencies are so similar as to be practically one. If the Creator has put into our souls the principle of religious life, we must expect not only to find it, more and less intense, in every religion, but also to see it reveal itself in similar ways. We should not be surprised if outside the true Church there should be persons devoted to contemplation, solitude, and sacrifice; but we are not obliged to conclude that our Christian practices are necessarily derived from theirs, since the instincts of human nature sufficiently account for the resemblance. Such an explanation would not explain the origin of these practices: if we are indebted for the monasticism of Pachomius to the worshippers of Serapis, where did they find their inspiration? Nor would the explanation account for the results: whence comes it that monachism has covered not only the East, and Asia, but also Africa, Europe, and the whole of the West?

In our days the historical derivation of certain usages is a thing of small importance; we may admit without hesitation any connexion which is proved, but not one which is merely assumed. The Israelites may have borrowed from Egypt the practice of circumcision, which was the sign of their covenant with

Jehovah; and so certain ascetic practices, even if they had a pagan origin, were nevertheless, as employed by our monks and religious, Catholic and Christian in meaning and inspiration. Moreover, not every doctrine or practice of a false religion is necessarily erroneous or reprehensible; there may be great nobility of character among Buddhist monks or Mussulman dervishes, as there may be faults sully the religious or religious habits worn in the true Church.

We need not here present a comparative analysis of the Christian religious life and the religious life of non-Christians, nor even compare our religious with the servants of God in the Old Testament (see ANCHORITES; ASCETICISM; BUDDHISM; ESSENES; MONASTICISM). But how are we to recognize the religious life of the true and Divine religion? Not by bodily mortifications, which may be surpassed in severity by those of the fakirs; not by mystical ecstasies and raptures, which were experienced by those initiated into the Greek and Oriental mysteries, and are still met with among Buddhist monks and dervishes; not even by the faultless lines of all the plans of Catholic religious life, for God, who desires progress even in His Church, has permitted rough beginnings, experiments, and individual mistakes; but even the persons making these mistakes possess in the true religion the principles which ensure correction and gradual improvement. Besides, in its entirety, the religious life of the true religion must appear to us to be in conformity with the moral and social laws of our present existence, as well as with our destiny; its intentions must appear sincerely directed towards personal sanctification, towards God, and the Divine order. The tree must everywhere be known by its fruits. Now, Catholic religious life infinitely surpasses all other ascetic systems by the truth and beauty of the doctrine laid down in so many rules and treatises, and by the eminent sanctity of its followers such as Saints Anthony, Pachomius, Basil, Augustine, Colombanus, Gregory, and others, and finally, especially in the West, by the marvellous fruitfulness of its work for the benefit of mankind. After these preliminary observations, we may confidently look for the true religious life in the Gospel.

B. EVANGELICAL IDEA.—We cannot regard as essential everything that we find in the full development of religious life, without ignoring historical facts or refusing them the attention they deserve; and we must correct the definitions of Scholastic writers, and lessen some of their requirements, if we wish to put ourselves in harmony with history, and not be compelled to assign to religious a later origin, which would separate them by too long a period from the first preaching of the Gospel which they profess to practise in the most perfect manner. The Scriptures tell us that perfection consists in the love of God and our neighbour, or to speak more accurately, in a charity which extends from God to our neighbour, finding its motive in God, and the opportunity for its exercise in our neighbour. We say "it has its motive in God", and for that reason Christ tells us that the second commandment is like to the first (Matt., xxii, 39); "and the opportunity for its exercise in our neighbour", as St. John says: "If any man say, I love God, and hateth his brother, he is a liar. For he that loveth not his brother, whom he seeth, how can he love God, whom he seeth not?" (I John, iv, 20). The New Testament warns us of the obstacles to this charity arising from an attachment to and desire of created things, and from the cares caused by their possession, and, therefore, besides this precept of charity, our observance of which is the measure of our perfection, the New Testament gives us a general counsel to be disengaged from everything contrary to charity. This counsel contains certain definite directions, among the most important

of which are the renunciation of riches, of carnal pleasure, and of all ambition and self-seeking, in order to acquire a spirit of voluntary submission and generous devotion to the service of God and our neighbour.

All Christians are bound to obey these precepts, and to follow the spirit of these counsels; and a fervour like that of the first Christians will enable them to free themselves from attachment to earthly things in order to set their affections on God and the things of heaven; while the remembrance of the shortness of this life facilitates the sacrifice of wealth and natural pleasures. The first converts of Jerusalem acted on this principle, and sold their possessions and goods, laying the proceeds at the feet of the apostles. But experience, by which Christ wished His faithful to be taught, soon corrected their errors on the subject of the future of the world, and showed the practical impossibility of a complete renunciation by all members of the Church. Christian society can no more continue without resources and without children than the soul can exist without the body; it has need of men engaged in lucrative professions, as well as of Christian marriages and Christian families. In short, according to the designs of God who bestows a diversity of gifts, there must also be a diversity of operations (I Cor., xii, 4, 6). Every kind of career should be represented in the Church, and one of these should include those who make profession of the practice of the Evangelical counsels. Such persons are not necessarily more perfect than others, but they adopt the best means of attaining perfection; their final object and supreme destiny are the same as those of others, but they are charged with the duty of reminding others of that destiny and of the means of fulfilling it; and they pay for this favoured position by the sacrifices which it entails, and the benefit which others derive from their teaching and example. This life, which, in view of the great precept, follows the Evangelical counsels, is called the religious life; and those who embrace it are called religious.

At first sight, it would seem that this life ought to unite in itself all the counsels scattered through the Gospels: that would indeed be the religion of counsels; and certainly, the more fully it inspires the desire and furnishes the means of following the Evangelical counsels, the more fully is it a religious life; but a perfect realization of those counsels is impossible to man; the opportunity of practising them all does not present itself in every man's life, and one would quickly be worn out if he attempted to keep them all continually in view. We soon learn to distinguish those that are more essential and characteristic, and more calculated to ensure that freedom from whatever hinders the love of God and of our neighbour, which should be the distinguishing mark of the perfect life. From this point of view, two counsels are put prominently forward in the New Testament as necessary for perfection, namely the counsel of poverty: "If thou wilt be perfect, go sell what thou hast, and give to the poor" (Matt., xix, 21), and the counsel of perfect chastity practised for the sake of the kingdom of heaven (cf. Matt., xix, 12, and I Cor., vii, 37-40, and the commentary of Cornely on the latter).

These two counsels teach us what we have to avoid; but it remains for a man to fill his life with acts of perfection, to follow Christ in His life of charity towards God and men, or, since this would be perfection itself, to devote his life to an occupation which will make it tend towards union with God or the service of his neighbour. Religious life then is made perfect by a definite profession either of retirement and contemplation or of pious activity. The profession, negative as well as positive, is placed under the control and direction of ecclesiastical authority, which is entrusted with the duty of leading men in the ways of salvation

and holiness. Submission to this authority, which may interfere more or less as times and circumstances require, is therefore a necessary part of religious life. In this is manifested obedience as a counsel which governs and even supplements the two others, or rather ■ a conditional precept, to be observed by all who desire to profess the perfect life. The religious life which is pointed out to us by the Evangelical counsels is ■ life of charity and of union with God, and the great means it employs to this end is freedom and detachment from everything that could in any manner prevent or impair that union. From another point of view it is ■ devotion, a special consecration to Christ and God, to whom every Christian acknowledges that he belongs. St. Paul tells us: "You are not your own" (I Cor., vi, 19); and again "All [things] are yours, and you are Christ's, and Christ is God's" (I Cor., iii, 22, 23).

II. HISTORICAL SURVEY.—(1) *Earliest Examples of Religious Life*.—(a) *Persons*.—The Christian virgins were the first to profess a life distinguished from the ordinary life by its tendency to perfection; continence, and sometimes the renunciation of riches, attached them specially to Christ. (See NUNS.) The Fathers of the first century mention them, and those of the second century praise their mode of living. Shortly after the virgins, appeared those whom Clement of Alexandria (*Pædagog.*, I, 7, in P. G., VIII, 320) called ἀσκηταί and whom the Latin Church called "confessores". They also made profession of chastity, and sometimes of poverty, as in the case of Origen and St. Cyprian. In the Liturgy, they took rank before the virgins, and after the ostiarii or door-keepers. Eusebius (*Hist. eccl.*, III, xxxvii, in P. G., XX, 291-4) mentions among the "ascetics" the greatest pontiffs of the first ages, St. Clement of Rome, St. Ignatius of Antioch, St. Polycarp, and others.

We find in the third century the first distinct traces of the kind of life in which the religious profession becomes by degrees perfected and brought under rule, that of the monks. The note which characterizes them at first is their seclusion from the world, and their love of retirement. Till then virgins and ascetics had edified the world by keeping themselves pure in the midst of corruption, and recollected in the midst of dissipation; the monks endeavoured to edify it by avoiding and contemning all that the world esteems most highly and declares indispensable. Thus the life of the solitary and the monk is a life of austerity as well of retirement. The world which sent travellers (cf. the "*Lausiac History*" of Palladius) to contemplate them was astonished at the heroism of their penance. The religious life took the form of a war against nature. The persecution of Decius (about 250) gave the desert its first great hermit, Paul of Thebes; other Christians too sought refuge there from their tormentors. Anthony, on the contrary, at the age of 20 years, was won by that appeal which saddened and discouraged the rich young man of the Gospel, "If thou wilt be perfect, go sell what thou hast, and give to the poor" (Matt., xix, 21). He had disciples, and instituted the monastic villages, in which seekers after perfection, living retired from the world, found comfort and encouragement in the example of brethren following the same profession. St. Pachomius, ■ contemporary of St. Anthony, brought all his monks together under one roof, thus founding the cenobitic life.

Paul, Anthony, and Pachomius gave lustre to the deserts of Egypt. We need not dwell here upon the parallel development of Syrian monasticism, in which the names of Hilarion, Simeon Stylites, and Alexander the founder of the *acaemeti*, were famous, or on that of Asia Minor, or give an account of the dawn of monastic life in Europe and Africa. Our task is only to depict the main features of religious life and its successive transformations. From this point of view,

special mention is due to the great lawgiver of the Greek monks, St. Basil. Comparing the solitary and the cenobitic life, he points out one great advantage in the latter, namely the opportunity which it offers for practising charity to one's neighbour; and while deprecating excessive mortifications, into which vanity and even pride may enter, he exhorts the superior to moderate the exterior life reasonably. St. Basil also permitted his monks to undertake the education of children; although he was glad to find some of these children embracing the monastic life, he wished them to do so of their own accord, and with full knowledge, and he did not permit the liberty of a son or daughter to be restrained by an offering made by the parents. St. Augustine in the common life which he led with the clergy of Hippo, gives us, like St. Eusebius at Vercelli, a first outline of canonical life. He instituted monasteries of nuns, and wrote for them in 427 a letter which, enriched with extracts from the writings of St. Fulgentius, became the rule known by the name of St. Augustine. St. Columbanus, an Irish monk (d. 615), under whose name a very rigid rule was propagated in Ireland, was the apostle and civilizer of several countries of Europe, notably of Germany.

(b) *Characteristics*.—After this rapid glance at the origin of the religious life we may now consider its principal characteristics. (i) *End*.—The life of the monks, more systematized than that of the virgins and ascetics, was, as such, entirely directed to their personal sanctification: contemplation and victory over the flesh were bound above all to lead to this result. The monks did not aspire to Holy orders, or rather they desired not to receive them. St. John Chrysostom exhorted them to be animated by Christian charity which willingly consents to bear heavy burdens, and without which fasting and mortification are of no profit at all. (ii) *Obedience*.—As good Christians, they owed obedience to their bishop in religious matters, and their profession, if they rightly understood its spirit, made prompt and complete submission easy. But religious obedience, as we understand it now, began only with the cenobitic life, and at the time of which we speak there was nothing to oblige the cenobite to remain in the monastery. The cenobitic life was also combined with the solitary life in such a way that, after a sufficient formation by the common discipline, the monk gave proof of his fervour by retiring into solitude in order to fight hand-to-hand against the enemy of his salvation, and to find in independence a compensation for the greater severity of his life. (iii) *Poverty*.—Poverty then consisted for the hermits in the renunciation of worldly goods, and in the most sparing use of food, clothing, and all necessities. The cenobites were forbidden to enjoy any separate property, and had to receive from their superior or the procurator everything they needed for their use; they were not, however, incapable of possessing property.

(iv) *Chastity; Vows*.—Having once entered the religious life, the virgin, the ascetic, and the monk felt a certain obligation to persevere. Marriage or return to the world would be such inconstancy as to merit the reproach of Christ, "No man putting his hand to the plough, and looking back, is fit for the kingdom of God" (Luke, ix, 62). Still we have no evidence to prove that there was a strict obligation, and there were no vows properly so called: even for virgins, the passages from Tertullian and St. Cyprian, on which some persons rely, are capable of another interpretation. Certainly a woman who was bound to Jesus Christ by a profession of virginity, and fell into sin, was liable to very severe canonical penalties; but St. Cyprian who regarded such a person as an adulterous bride of Christ, permitted the marriage of such as were not able to observe continency (see Koch, "*Virgines Christi*" in "*Texte und Unter-*

suchungen", 1907). The oldest decretal we possess, that of St. Siricius to the Bishop Himerius (385), brands with infamy the carnal intercourse of monks and virgins, but the question of a regular marriage is not considered (C. XXVII, q. 1, c. 11, or P. L., XIII, 137). Schenute, it is true, introduced a form of vow, or rather of oath, of which the Coptic text has been discovered; but the very reflections which he made before introducing it appear to show that it had no other effect than to secure the execution even in secret of the obligations already contracted by entrance into the monastery: these vows therefore may be compared to the vows made at baptism. No term is specified for their duration, but Leclercq (in Cabrol, "Dict. d'arch. chrét.", s. v. Cénobitisme) presumes that the obligation continued during the term of residence in the monastery. The text is as follows, taken from the German translation of Leipolt:—"Covenant. I promise (or I swear) before God in His holy temple, in which the word that I have spoken is my witness, that I will not defile my body in any way, I will not steal, I will not bear false witness, I will not lie, I will not do wrong in secret. If I break my oath, I am willing not to enter into the kingdom of heaven, although I were in sight of it. [On this passage, cfr. Peeters, in "Analecta Bollandiana", 1905, 146.] God, before whom I have made this covenant, will then destroy my body and soul in hell, for I should have broken the oath of allegiance that I have taken." And later on occurs this passage: "As for contradiction, disobedience, murmuring, contention, obstinacy, or any such things, these faults are quite manifest to the whole community" (Leipolt, "Schenuti von Atripe" in "Texte und Untersuchungen", 1903, p. 109).

(v) Canon Law.—The canons of the Council of Gangra (330) first introduced the law relating to regulars by the recommendations which they address to virgins, continent persons, and those who retire from worldly affairs, to practise more faithfully the general duties of piety towards parents, children, husband or wife, and to avoid vanity or pride. Other particular councils, that of Alexandria (362), of Saragossa (380), the Fifth Synod of Africa (401), and a council held under St. Patrick in Ireland (about 480), decided other matters connected with the religious life. The General Council of Chalcedon (451) makes the erection of monasteries dependent on the consent of the bishop. The Councils of Arles (about 452) and Angers (455) sanction the obligation of perseverance. The same Council of Arles and the Synods of Carthage held in 525 and 534 forbade any interference with the abbot in the exercise of his authority over his monks, reserving to bishops the ordination of clerics in the monastery, and the consecration of the oratory.

(2) *Regular Organization of Religious Life.*—(a) Monks and Monasteries.—We have now arrived at the sixth century. It will be necessary to go back a little in order to notice the immense influence of St. Basil (331–79) over the religious life of the East and the West. The principles which he lays down and justifies in his answers to the doubts of the religious of Asia Minor, that is in what are called the shorter and longer rules, inform and guide the religious of the present day. St. Benedict was inspired by these as well as by the writings of St. Augustine and Cassian in writing his rule, which from the eighth to the twelfth century regulated, it may be said, the whole religious life of the West. In order to put an end to the capricious changes from one house to another, the patriarch of Western monks introduced the vow of stability, which bound the monk to remain in the house in which he made his profession. The reforms of the monasteries in the tenth and eleventh centuries gave rise to aggregations of monasteries, which prepared the way for the religious orders of the thirteenth

century. We may mention the Congregation of Cluny founded by St. Odo (abbot from 927 to 942) which, in the twelfth century grouped more than 200 monasteries under the authority of the abbot of the principal monastery, and of the Congregation of Cîteaux, of the eleventh century, to which the Trappists belong, and of which St. Bernard was the principal light. Less for the sake of reform than of perfection, and of adapting to a special end the combination of the cenobitic and eremitic life, St. Romuald (d. 1027) founded the Camaldolese Order, and St. John Gualbert (d. 1073) the Congregation of Vallombrosa. From the eleventh century also (1084) date the Carthusians, who have needed no reform to maintain them in their pristine fervour. St. Basil and St. Benedict were expressly concerned only with personal perfection, to which their disciples were to be led by leaving the world and renouncing all earthly wealth and natural affections. Their life was a life of obedience and prayer, interrupted only by work. Their prayer principally consisted in singing the Divine Office. But when it was necessary, the monks did not refuse to undertake the cure of souls; and their monasteries have given to the Church popes, bishops, and missionary priests. We need only recall the expedition organized by St. Gregory the Great for the conversion of England. Study was neither ordered nor forbidden: St. Benedict, when he accepted in his monasteries children offered by their parents, undertook the task of education, which naturally led to the foundation of schools and studies. Cassiodorus (477–570) employed his monks in the arts and sciences and in the transcription of manuscripts.

(b) The Canons Regular.—Many bishops endeavoured to imitate St. Augustine and St. Eusebius, and to live a common life with the clergy of their Church. Rules taken from the sacred canons were even drawn up for their use, of which the most celebrated is that of St. Chrodegang, Bishop of Metz (766). In the tenth century, this institution declined; the canons, as the clergy attached to a church and living a common life were called, began to live separately; some of them, however, resisted this relaxation of discipline, and even added poverty to their common life. This is the origin of the canons regular. Benedict XII by his Constitution "Ad decorem" (15 May, 1339) prescribed a general reform of the canons regular. Among the canons regular of the present day, we may mention the Canons Regular of the Lateran or St. Saviour, who seem to date back to Alexander II (1063), the Premonstratensian Canons founded by St. Norbert (1120), and the Canons Regular of the Holy Cross founded at Clair-lieu, near Huy, in Belgium, in 1211. The canons regular *ex professo* united Holy orders with religious life, and being attached to a church, devoted themselves to promoting the dignity of Divine worship. With monks, Holy orders are accidental and secondary, and are superadded to the religious life; with canons as with the clerks regular, Holy orders are the principal thing, and the religious life is superadded to the Holy orders.

(c) The Mendicant Orders.—The heretics of the end of the twelfth and beginning of the thirteenth century reproached churchmen with their love of riches, and the laxity of their lives; St. Dominic and St. Francis offered on the contrary the edifying spectacle of fervent religious, who forbade their followers the possession of wealth or revenues, even in common. The mendicant orders are marked by two characteristics: poverty, practised in common; and the mixed life, that is the union of contemplation with the work of the sacred ministry. Moreover, the mendicant orders present the appearance of a religious army, the soldiers of which are moved about by their superiors, without being attached to any particular convent, and recognize a hierarchy of local, provincial, and general superiors. The order, or at least the province, takes

the place of the monastery. Other important points may be noticed: the mendicant orders are founded only by favour of an express approbation of the sovereign pontiff, who approves their rules or constitutions. They adopt the form of vows which relates explicitly to poverty, chastity, and obedience, which was occasioned by the famous dispute in the Franciscan Order. The Franciscans were founded by St. Francis in 1209; they are now divided into three orders recognized as really belonging to the common stock: (1) the Friars Minor, formerly called Observantines, and more recently Franciscans of the Leonine Union, who may (when there is no possibility of mistake) be called simply Friars Minor; (2) the Friars Minor Conventuals; and (3) the Friars Minor Capuchins. The Dominicans, or Friars Preachers, go back to 1215. Since 1245, the Carmelites, transplanted from Asia into Europe, have formed a third mendicant order. Alexander IV added a fourth by his Constitution "Licet" (2 May, 1256) which united under the name of St. Augustine several congregations of hermits: these are the Hermits of St. Augustine. The Servites were added in 1256 as a fifth mendicant order; and there are others. (See FRIAR.)

(d) Before we pass to a later period, it is necessary to mention certain institutes of a quite special character. The military orders date from the twelfth century, and while observing all the essential obligations of religious life, they had for their object the defence of the cause of Christ by force of arms; among these were the Knights of Malta, formerly called the Equestrian Order of St. John of Jerusalem (1118), the Order of Teutonic Knights (1190), the Order of Knights Templars (1118), suppressed by Clement V at the Council of Vienne (1312), at the urgent request of the King of France, Philippe-le-Bel.

(e) The misfortunes of Christendom were the cause of the foundation of orders vowed to the most excellent works of mercy, namely, the Redemption of Captives; the Trinitarians (Order of the Most Holy Trinity), and Mercedarians (Order of Our Lady of the Redemption of Captives). Both these date from the thirteenth century, the first being founded by St. John of Malta and St. Felix of Valois, the second by St. Peter Nolasco and St. Raymond of Pennafort. They follow the Rule of St. Augustine and are mendicant orders.

(f) The hospitaller orders are specially devoted to the relief of bodily infirmities; most of them are of comparatively recent origin. The most celebrated of all, the Order of Brothers of St. John of God, dates from 1572; the Cellite Brothers were approved by Pius II in 1459; the Brothers Hospitallers of St. Anthony were approved by Honorius III in 1218.

(g) The Clerks Regular.—The mendicant orders were one of the glories of the later Middle Ages. Fresh needs led in the sixteenth century to a new form of religious life, that of the clerks regular. These are priests first of all, even in respect of their mode of life, and their dress: they have no peculiarity of costume; they undertake all duties suitable to priests, and attend to all the spiritual necessities of their neighbour, especially the education of the young, which the mendicant orders had never attempted. Being clerks and not canons, they escaped at the same time the inconvenience of having a title of honour and of being bound to any particular church; many of them take a vow not only not to seek for ecclesiastical dignities, but even not to accept them. The first were the Theatines, founded in 1524 by St. Cajetan and Cardinal Peter Caraffa, later Paul IV; then came the Barnabites, or Regular Clerics of St. Paul, founded in 1533 by St. Anton Maria Zaccaria; the Clerks Regular of Somascha, founded by St. Jerome Emiliani, and approved in 1540, the same year which saw the beginning of the Society of Jesus. We may mention also the Clerks Regular Ministering to the Sick,

called Camilians after their founder, St. Camillus de Lellis (1591). Several institutions of clerks regular, notably the Society of Jesus, make profession also of poverty in common and are thus at the same time clerks regular and mendicant orders.

(h) The Institutes with Simple Vows.—Till the sixteenth century, the orders of the West were distinguished by their object, their hierarchical organization, their patrimonial system, and the number of their vows; but the nature of the vows remained the same. The vows, at least the essential vows of religion, were perpetual, and made solemn by profession. Even when the tertiaries of St. Dominic and of St. Francis began to form communities, they distinguished themselves from the first and second orders by the rule they adopted but not by the nature of their vows, which remained solemn. The tertiary nun communities of St. Dominic received (1281-91) a rule from the Dominican general, Munio of Zamora; and communities, both of men and of women, were founded in the thirteenth century with the tertiary Rule of St. Francis. In this way, many works of charity were prevented. But in the sixteenth century Leo X by his Constitution "Inter cetera", 20 Jan., 1521, appointed a rule for communities of tertiaries with simple vows, according to which those only who promised *clausura* were obliged to observe it. St. Pius V rejected this class of congregation by his two Constitutions, "Circa pastoralis" (29 May, 1566), and "Lubricum vitæ genus" (17 November, 1568). They continued, however, to exist, and even increased in number, first tolerated, and afterwards approved by the bishops; and subsequently recognized by the Holy See, which, in view of the difficulties of the circumstances, has for more than a hundred years ceased to permit solemn vows in new congregations. These are the religious congregations of men and women to whom Leo XIII gave their canonical charter by his Constitution "Condita a Christo" (8 December, 1900). We may mention here an innovation introduced by St. Ignatius, who in the Society of Jesus imposed simple vows for a period preceding the solemn vows, and associated with the fathers professed by solemn vows, priests and lay brothers bound by simple vows only.

(i) The Eastern Orders.—The Eastern Church, even that part of it which has remained in communion with Rome, has never known the life and many-sided vitality of the orders of the West: we find in it Monks of St. Anthony, and others of St. Pachomius; almost all the monasteries are Basilian. As the priests of the Greek Rite are not compelled to leave the wives whom they have legally married, and as celibacy is nevertheless obligatory for the bishops, the latter are regularly chosen from among the monks. From another point of view, the unchanging East shows us in the monks of the present day, the institutions of the first ages of cenobitic life.

III. EXPOSITION OF THE RELIGIOUS LIFE. (1) *Classical Description of Religious Life; Essential and Non-essential Points.*—In our rapid survey of the different religious orders, we have seen something of the evolution of the religious life. The Gospel clearly shows us virginity and continence ■ means, and charity as the end; persecutions necessitated retirement and a first form of life entirely directed towards personal sanctification; community life produced obedience; the inconveniences caused by frequent change of residence suggested the vow of stability; the excessive multiplication and diversity of religious institutes called for the intervention of the sovereign pontiff and his express approbation of rules; the needs of soul and body grafted the practice of corporal and spiritual works of mercy upon personal sanctification, and joined the reception of Holy orders to religious profession; while the exigencies and difficulties of modern times caused the making of

simple vows antecedent to, or in substitution for, solemn vows.

In all these stages, the profession of the Evangelical counsels has been most carefully regulated by the Church. In the existing structure, some parts are fixed and regarded as essential, others are accidental and subject to change; we may then ask what is essential to fully developed religious life. The religious state, to be perfect, requires (1) the three evangelical counsels: voluntary poverty, perfect chastity regarded as means to perfection; and in pursuit of that perfection, obedience to lawful authority; (2) the external profession of these counsels, for the religious state means a condition or career publicly embraced; (3) the perpetual profession of these counsels, for the religious state means something fixed and permanent, and in order to ensure this stability in practices which are not made obligatory by any law, the religious promises himself to God by a perpetual vow. The religious state then is defined, as the mode of life, irrevocable in its nature, of men who profess to aim at the perfection of Christian charity in the bosom of the Church by the three perpetual vows of poverty, chastity, and obedience.

The religious state may exist in the proper sense without solemn vows, as Gregory XIII showed in his Constitutions "*Quanto fructuosius*" (2 July, 1583) and "*Ascendente Domino*" (25 May, 1584), declaring that the scholastics of the Society of Jesus were really religious; without community life, for the hermits were religious in the strictest sense of the word; without oral or written profession, since until the time of Pius IX, even tacit or implied profession was considered sufficient; without express and formal approbation by ecclesiastical authority, as this has only been insisted upon since the Fourth Lateran Council (1215), confirmed by the Second Council of Lyons (1274). Before this time, it was enough not to have been repudiated by ecclesiastical authority. However, in actual practice, the express intervention of ecclesiastical authority is required; this authority may be that of the Apostolic See or of the bishop. Many institutes exist and flourish with the approbation of the bishop alone; but, since the *Motu Proprio* "*Dei providentis*" (16 July, 1906), the bishop before establishing an institute must obtain the written approbation of the Holy See.

Again, the Church, while not condemning the solitary life, no longer accepts it as religious. Formerly, a religious did not necessarily form a part of an approved institute; there were persons simply called professed, as well as professed in such an institute or such a monastery. At the present day, a religious always begins by entering some approved religious family; only in exceptional cases of expulsion or final secularization, does it happen that a religious ceases to have any connexion with some particular institute, and in such cases the bishop becomes his only superior. The Church insists on the use of a habit, by which the religious are distinguished from secular persons. A distinctive habit is always required for nuns; the clerical habit is sufficient for men. Those approved institutes whose members may be taken for seculars out of doors, lack that public profession which characterizes the religious state, in the sight of the Church, according to the Decree of the Sacred Congregation of Bishops and Regulars, 11 August, 1889.

The question has long been discussed whether the religious state involves a donation of oneself, or whether the vows, as such, are sufficient. By such donation the religious not only binds himself to be poor, chaste etc., but he no longer belongs to himself; he is the property of God, as much as and even more than a slave was formerly the property of his master. To show that this alienation of oneself is not necessary, it is sufficient to observe that if every religious ceased to belong to himself either for the purpose of

marriage, or for the possession of property, any contrary acts would be null and void from the beginning; now this nullity has not always existed, and does not exist for all religious at the present day. In reality then the religious state consists strictly in the perpetual engagement, the source of which is found at present in the three vows.

The formal intervention of the Church has the effect of introducing the religious life into the public worship of Catholicism. As long as the promise or the vow remains a purely personal matter, the religious can offer himself to God only in his own name; his homage and his holocaust are private. The Church, in ratifying and sanctioning his engagement, deposes the religious to profess in the name of the Christian community his complete devotion to God. He is consecrated especially by solemn profession, like a temple or a liturgical prayer, to give honour to God.

In practice, when offering himself to God, the religious also contracts obligations to the order whose child he becomes. Does the religious state in itself contemplate any such obligation of submission to an organized society, or to a director or confessor? There is nothing more natural, it is true, than that a person, who does not profess himself perfect but a simple aspirant after perfection, should choose for himself a master and guide; but even this does not seem to be essential. The ancient hermits were free from all such subordination; even the pope may be a member of a religious order: the only essential obedience seems to be that which every man owes to the hierarchical Church, and to those whom she clothes with her authority.

(2) *Various Forms of Religious Life.*—The essential unity of the religious life is consistent with a great variety which is one of the glories of the Church, and permits a larger number of men to find a religious profession adapted to their needs and dispositions, and multiplies the services which religious render to Christian society and mankind in general. Besides the common end of religious life, which makes it a school of perfection, the different orders have special objects of their own, which divide them into contemplative, active, and mixed orders. The contemplative orders devote themselves to union with God in a life of solitude and retirement; the active orders expend their energy in doing good to men. If their activity is spiritual in its objects and requires contemplation for its attainment, they are mixed orders; such as those which are devoted to preaching and higher education. The orders keep the name of active order if they devote themselves to corporal works of mercy, such as the care of sick persons and orphans. The dominant note of their mode of life gives us, as we have seen, clerical, monastic, mendicant, military, and hospitaller orders. The vows divide them into orders with simple vows and solemn vows: even the number of vows differs in different institutes. There remain still two other points of difference which require to be considered, namely the juridical condition, which distinguishes religious orders from congregations, and the rule.

(3) *Religious Life and the Sacred Ministry.*—If the monastic life has sometimes appeared incompatible with those sacred functions which drew the monk out of his silence and retreat (see Decree of Gratian, c. XVI, q. 1, c. 1, 2, 4, 6, 8, 10, 11), the simple division into contemplative and mixed orders shows the mistake of those persons who have represented the religious life as inconsistent with the sacred ministry, as if piety were opposed to charity, or apostolic zeal did not presuppose and foster the love of God. This error, which had already been refuted by St. Thomas in his "*Contra impugnantes religionem*", ch. iv, directed against William of St. Amour, was renewed in the Jansenist pseudo-Coun-

cil of Pistoia and condemned by the Constitution "Auctorem Fidei" of 1794, prop. 80. In the course of the last century, Verhoeven, a professor of Louvain, in a pamphlet entitled "De regularium et secularium iuribus et officiis", maintained that, according to the spirit of the Church, religious ought not to take any but a secondary and supplementary part in the sacred ministry, and only when the secular clergy were not sufficiently numerous for the work. His opinion was refuted by an anonymous work, entitled "Examen historicum et canonicum libri R. D. Mariani Verhoeven", written by Fathers De Buck and Tinnebroeck, S.J., as opposed to experience, since religious perfection aids apostolic work; to tradition, as so many great missionary enterprises have been conducted by religious; to canon law, which approves of orders established for the purpose of the sacred ministry, and consider religious as fitted for the most important functions.

Religious as well as seculars may be called to the episcopal office, to the cardinalial dignity, and even to the papal throne. With the exception of the mendicant orders, they may be appointed as vicars general: of the minor benefices, some are secular which should be given to secular priests, some are regular, to which regulars should be appointed; Premonstratensian Canons, however, may be placed in charge of secular parishes. In cases of doubt, benefices are presumed to be secular, but the rule of exclusion from secular parishes affects only regulars under solemn vows. Missionary enterprise for the propagation of the Faith is usually entrusted to religious, and they may occupy university chairs, and be employed in the sacred ministry as well as seculars (cf. Vermeersch, "De religiosis institutis et personis", I, n. 495).

It is now established that bishops and cardinals chosen from a religious order do not cease to be religious, and are just as much bound by all the rules and observances compatible with their dignity and functions as a religious who is a parish priest. A religious who is a parish priest may be deprived of his office either by the bishop or by the superior of his order.

IV. PARTICULAR ASPECTS.—A. RELIGIOUS ORDERS AND CONGREGATIONS.—According to its more or less complete realization, the more or less full approbation which is given to it, and the juridical condition which results for those who practise it, the religious life gives rise to religious orders or congregations.

(1) *Religious Orders*.—(a) Sense of the expressions.—The expression "ordo monasticus" at first denoted a class of monks, as "ordo virginum" denoted a class of virgins, and "ordo sacerdotalis", the class of priests. The first founders, St. Basil and St. Benedict, thought not so much of establishing an order as of drawing up a plan of individual life, common to the use of monks who desired to be directed in their aspirations after perfection. Each monastery was independent, and was not even bound to a definite rule; the community was left free to change the observance, and a certain option could be allowed to the monks to choose which of several rules they would follow. The reforms of Cluny and Cîteaux prepared the way for the religious order in the present sense, by making all the monks subject to the authority of one supreme abbot. A century later, St. Francis and St. Dominic united their disciples in one vast association with an interior hierarchical organization of its own, and recognizable even outwardly by the identity of rule, dress, and life. From that time forward, each religious order has been a corporation of religious approved by the Church. And since we distinguish institutes bound by solemn vows and approved by the sovereign pontiff from institutes with simple vows, the expression "religious

order" has been naturally applied exclusively to institutes with solemn vows. The religious order then is, properly speaking, an institute fully approved by the Holy See, and having solemn vows of religious life. This full approbation for the whole Church calls into action the magisterial office of the pope, for in giving it the pope not only declares that there is nothing in the mode of life which is hurtful to morals or propriety, but assures the faithful that it is calculated to lead souls to Evangelical perfection (cf. Suarez, "De religione", VII, II, xvii, n. 17).

(b) Two great classes of orders.—From the point of view of their organization, the religious orders owe their division into two great classes to their very origin. The oldest, derived from monasteries formerly quite independent, leave to each religious house a certain authority under a perpetual abbot. The monks or canons also belong to a particular monastery, and special rules are made for changes, temporary or permanent, among the subjects. Such are the Black Benedictines and Cistercians, and canons regular. Many for a long time have only arch-abbots, visitors of the monasteries forming a congregation (see below), and presiding over the chapter of that congregation, Leo XIII gave the Benedictines their abbot-primate, who holds office for twelve years. These same orders have no provincial superiors; the visitors more or less take their place; but the powers of the abbot-general and the visitor, while they differ in different orders, are limited to certain cases, so that the local abbot remains the real ordinary superior, almost in the same way as the bishop suffragan of an archbishop has all the authority necessary for the administration of his diocese. In the newer orders on the contrary, the superiors (except in the Society of Jesus) are not appointed for life, but for a term of six or twelve years; the religious are not attached to a monastery, but to a province; and the houses are so little independent of each other that some refuse to recognize in the local superior the quality of a prelate invested with ordinary jurisdiction, though most religious writers give him this position.

(c) The Seat of Authority in the Order.—General Chapter and Superior.—In all religious orders we find the chapter, whether it be the chapter of the monastery to limit the monarchical authority of the abbot and fill a vacancy, or the general chapter, to appoint for the fixed term a new superior-general, to receive the accounts of the preceding administration, and, within permitted limits, to modify the constitutions which have not the force of pontifical laws, and to pass new decrees for the whole order. The election of the superior-general is by secret ballot (Council of Trent, sess. XXV, c. vi) and generally requires the confirmation of the pope. The same chapter also elects the general councils, consisting of definitors-general, or assistants, and generally also the procurator-general. In most orders, the procurator-general, who is the representative of the order in all dealings with the Holy See, is a real superior, and sometimes even a sort of vice-general, who takes the place of a general deceased, absent, or incapacitated: among the Discalced Carmelites and the Hermits of St. Augustine and in the Society of Jesus, he possesses no jurisdiction.

Provincial and local Superiors.—Under the superior-general, the orders not anterior to the thirteenth century have provincial superiors, who administer the affairs of the province with the assistance of a council. Sometimes they are appointed by the provincial chapter, and the local superior by the local chapter; sometimes the superior-general in council makes all important appointments. The provincial chapter or provincial congregation has then no jurisdiction, and can only send deputies to the general or the chapter general, in order to make known their wishes. In all

places where the canonical Office is recited in choir, there is a conventual or local chapter, which does not exist in the orders and congregations of more recent foundation. Among the Capuchins, the provincial is appointed by the provincial chapter, and in his council appoints the local superiors. The local superior, like the abbot, is assisted by a second, who takes his place in case of absence or incapacity: he is called prior in the abbeys, or sub-prior where the superior is called prior; otherwise he is termed minister. The local superior is called guardian among the Franciscans; elsewhere he is rector, superior, prior, or provost. The provincial and general of the Franciscans are called minister-provincial and minister-general. To replace the ordinary superiors temporarily the constitutions of orders provide vicars, vice-provincials, and vice-rectors.

The superiors have always a power of private or domestic order, called dominative, which permits them to command their subjects, and to administer property according to the rules of the institute; and the first superior of the convent, by appealing to the vow or distinctly making known his intention, can command under pain of mortal sin. Moreover, if they be priests, the principal superiors of religious orders possess the double jurisdiction of the *forum internum* and the *forum externum*, which makes them the ordinary prelates of their subordinates. Such are certainly the generals and provincials, and, according to an at least probable opinion, the first local superiors also. They have jurisdiction to appoint confessors, approved by the ordinary, to reserve cases to themselves (though Clement VIII limited this power), to inflict spiritual censures or punishments, and to absolve or dispense from them: their power of dispensation with regard to their subordinates is the same as bishops generally have over their diocesans. Various privileges are conferred upon them in addition, and their powers are often extended by temporary indults, which pass, as a matter of right, from the generals of orders to those who replace or succeed them. The legislative power ordinarily exists only in the chapter general: the judiciary power of the prelates does not extend to causes and offences which are cognizable by the Holy Office. The prelates are at the same time fathers bound to watch over the spiritual welfare of their children, heads of the community, who are empowered to make general provision for the good order of the common life, and magistrates invested with a part of that public authority which Christ gave to His Apostles, when He said "As the Father hath sent me, I also send you." This authority is derived from the Holy See; and, as it is ordinary, it may be delegated.

In theory it extends to the spiritual direction of inferiors; but for a long time the Holy See has shown a desire to separate the direction of the conscience from the direction of outward conduct, or at least to take away all appearance of coercion from the former; thus the prelate may hear the confessions only of those who formally express a desire to be absolved by him, and for the regulation of Communions, the religious is bound to take the advice only of his confessor. In every house several confessors should be appointed, who can easily in any particular case obtain jurisdiction over reserved sins, if they have not ordinarily the necessary faculties; the prelate, however, may, according to the rule, be occupied with the direction of consciences outside the confessional; this is forbidden only in the case of lay superiors, safeguarding always the liberty of inferiors to open their minds to their superiors (even when laymen).

The temporal administration is subject to the general laws, which forbid the alienation of immovable property, and of movable property of great value, and which also discountenance wastefulness and rash contracts or borrowings (see the Constitution "Ambitiosæ"; Extrav. comm. un., De rebus ecclesiasticis

non alienandis, III, 4, and the Instruction "Inter ea" of 30 July, 1909). The prelate must administer like a prudent head of a family, and take care that the funds are safely and productively invested. As was stated in the article NUNS, the prelate's power of jurisdiction often extends to monasteries of the second order.

(d) Authorities outside the Order. (i) Sovereign Pontiff.—Outside its own body, the order has the sovereign pontiff as superior possessing the plenitude of authority; he has the power to suppress a religious order, as he can call it into existence. Thus at the Second Council of Lyons (1274), Gregory X suppressed the orders which came into existence after the Fourth Council of the Lateran (1215), and Clement XIV in 1773 decreed the suppression of the Society of Jesus. Sometimes an order which has been extinguished rises again from its ashes. The order of Piarists, or Scuolopi, founded by St. Joseph Calasanz, which was abolished by Innocent X in 1664, was re-established by Clement IX; and Pius VII in 1814 restored universally the Society of Jesus, which had remained in existence in White Russia (see Heimbucher, "Die Orden und Kongregationen", §§101, 102, and the authors cited in Vermeersch, "De religiosis institutis et personis", I, n. 99). The pope, a fortiori, may modify the constitutions, appoint superiors, and, in short, exercise all powers that exist in a religious order.

(ii) Roman Congregations.—The pope exercises his ordinary control through the Sacred Congregation of Religious, which, since the Constitution "Sapienti", of 19 June, 1908, is the only congregation occupied with the affairs of religious orders. Formerly, the religious of the missions were under the direction of the Propaganda, which has now no authority over them, except as missionaries; the others were under the Congregation of Bishops and Regulars, which was abolished by the Constitution "Sapienti". There was also the Congregation of Discipline and Reform of Regulars, which was principally occupied with the maintenance and restoration of interior discipline in orders of men, and the Congregation of the State of Regulars, established by Innocent X in 1652, which was replaced under Innocent XII by the Congregation of Discipline, and re-established by Pius IX in 1847, to advise on the measures to be taken in the circumstances of the time for monasteries of men. After having issued some very important decrees on the subject of letters testimonial and simple profession, it ceased to work; and Pius X suppressed both these congregations by his Motu proprio of 26 May, 1906. The authoritative interpretation of the disciplinary decrees of the Council of Trent gave the Congregation of the Council a power over regulars, which it used largely before the nineteenth century; but at present its authority is limited to the secular clergy. The Congregations of the Holy Office and the Index exercise over religious, as well as over the rest of the faithful, their power of judging persons charged with offences coming under the Holy Office, and of censuring books and other publications.

(iii) Cardinal Protector.—Most orders have a cardinal protector. The institution goes back to the time of St. Francis, who recognizes in him a governor, a protector, and a corrector; he is appointed by the sovereign pontiff. Since the time of Innocent XII (Constitution, "Christi fidelium", 17 February, 1694) he has ceased to have ordinary jurisdiction; he is therefore nothing more than a benevolent protector, who from time to time receives delegated powers.

(iv) Bishop and Privilege of Exemption.—Religious orders are exempt from episcopal jurisdiction, and in spite of exceptions to this privilege, created by the Council of Trent and later, the exemption remains the rule and the exception must be proved. The exemption is above all personal, and also local: religious are

not under the orders of the bishop, and their monasteries and churches, unless these be parochial, cannot be visited by him. The Holy See, however, in practice does not permit the rule of local exemption to be extended to secular persons during their stay in a convent: only *familiares*, that is, those who as oblates or even as servants, live in the convent as if they were part of the religious family, benefit by it. The question whether pupils who are boarders in the convent may be called *familiares* is open to dispute. According to the Council of Trent, the bishop has over religious a jurisdiction sometimes ordinary, sometimes delegated in the name of the Holy See, sometimes bishops may act also, as special delegates of the Holy See; the expression is somewhat obscure, but the object appears to have been to give the bishop an incontestable right to interfere in certain cases (see Vermeersch, "De relig. inst. et pers.", I, n. 968). As the exemption of regulars is not active, that is, as it does not give independent power over a fixed territory, regulars are subject to the bishop in all that concerns the administration of the sacraments to seculars, and the direction of such persons, due respect being paid to certain privileges attached to churches and colleges. Especially for the absolution of seculars, they must be approved by the bishop of the place in which confessions are heard. Besides this, the bishop may interfere to permit the erection of a convent, to approve the renunciation of property made before solemn profession, to test the vocation of nuns, to approve or condemn the publications of regulars, to control, if not to refuse, collecting from house to house, to summon regulars to processions, and settle questions of precedence, to consecrate the churches of regulars, to pontificate in them, to fix the stipends of Masses, and prescribe the Collects. His name must be mentioned in the Canon of the Mass; he decides all causes which concern the Faith; he may also in certain cases exercise over regulars his coercive power.

But (at least in regard to certain orders specially exempted) it would be incorrect to say that whenever the bishop may interfere, he may also inflict censures. It is admitted also that, at least with the permission of his superior, the religious may ask the bishop to exercise some of his dispensing power, in his favour, and it is understood that the Lenten indulgences and general dispensations from abstinence apply to such regulars as are not bound by a special vow to fast or abstain. According to the principle laid down, regulars may gain the indulgences granted by the bishop. Except mitred abbots, who confer the tonsure and minor orders on their inferiors, regular superiors must apply to the bishop for the ordination of their subjects: for this purpose they give dimissorial letters, by which they present their subjects to the bishop with the necessary certificates, to receive Holy orders from him. Except in the case of some particular privilege, the dimissorial letters should be sent to the bishop of the place in which the convent is situated, and regulars can only apply to another bishop in case the former does not hold his usual ordinations, or if he consents to waive his right.

(e) Communication of Privileges.—Exemption is the principal privilege of religious orders; the others are chiefly powers of absolution, and spiritual favours. Among all the mendicant orders, and practically among all religious orders properly so called, there exists a communication of privileges. This communication makes all favours, granted to one order only, common to all, if they are not extraordinary in their nature, or granted for some very special reason, or only for a certain term of years, or finally if no express provision forbids the communication. Thus the privilege, granted to the Society of Jesus, of having domestic oratories or chapels on the authorization of the religious provincial alone applies to all religious orders. Religious orders profit even by privi-

leges granted to congregations. But at the present time the application of the principle of communication must be made with prudence, especially in the case of indulgences.

(f) Admission, Vows and Dispensation, Secularization and Migration.—For the reception of subjects and the taking of vows, see *NOVICE*; *POSTULANT*. All the vows of religious orders are ordinarily perpetual, though there are exceptions; moreover, a simple profession must precede the solemn profession, otherwise the latter is null and void. The dispensation from vows, even from simple vows, is reserved to the Holy See. But the superior-general, by the dismissal of religious with simple vows, who have not received major orders, may ordinarily remove the obligation of those vows. Those who are professed with solemn vows, even lay brothers, are very rarely dispensed from them; it is easier for them to obtain an indult authorizing them to live in the world, bound by their vows. The indult of secularization may be temporary or perpetual; the latter alone finally separates the regular from his order: he then owes obedience to the bishop. The regular who has made solemn vows, or who by privilege has received some major order before making these vows, can be expelled only if, after a thrice-repeated warning, he still proves incorrigible in some grave and public fault. When expelled, he incurs a suspension from which the Holy See alone can free him. Even one who has been set free, if he is in Holy orders, is not at liberty to leave the house until he has found a bishop willing to accept him in his diocese, and some means of honest livelihood: strictly speaking, the acceptance should be final, but in practice this is not insisted upon. If he leaves the house without doing what is required, he is suspended until he has fulfilled both conditions.

The regular may also, in theory, migrate from one order to another more severe; from this point of view, the Carthusian Order is the most perfect. In practice, failing the consent of the superior-general of both the orders in question, these migrations take place only with the authorization of the Holy See. The professed regular who migrates into another order makes his novitiate afresh therein, but retains his first profession until he has made solemn profession in his new order. Until that time, if he does not persevere in the second order, he must take his former place in the order he has quitted; and even then if, in addition to the essential vows of religion, his first profession has laid any special obligations upon him, for instance that of not accepting any ecclesiastical dignities, these obligations are not removed by his new profession. (For the obligations of religious vows, see *VOW*; *OBEEDIENCE*, *RELIGIOUS*; *POVERTY*; and for the enclosure, see *CLOISTER*.)

(g) Habit and Choir.—If an order has a special habit, the members are strictly bound to wear it, and if any of them puts it off without good cause, he incurs an excommunication not reserved (Const. "Ut periculosa", 2 Ne clerici vel monachi, in 6º iii, 24). This excommunication appears to exist in spite of the Constitution "Apostolicæ", because it concerns the interior discipline of orders, but it applies only to those who are professed under solemn vows. The obligation to retain the habit extends also to bishops of the order, if they are not canons or clerks regular.

Most orders are bound to recite the Office in choir, and say the conventual Mass. The obligation of choir, at least the grave obligation, binds the community and the superior, whose duty it is to see that the Office is recited in common. But the religious professed under solemn vows, who do not assist in choir, are bound from the day of their profession to recite the Office in private, even if they are not in Holy orders. This obligation does not apply to

lay brothers, or to persons professed under simple vows.

(h) Orders of women: Second Orders.—In connexion with certain orders of men, there are also orders of women, instituted for similar objects, and in this respect sharing in the same evolution. We say "in this respect", for the rigours of the enclosure imposed upon nuns under solemn vows (see CLOISTER) necessarily prevented any organization formed after the model of the mendicant orders or clerks regular. Orders of women have sometimes an existence, and even an origin, independent of any order of men. This is the case especially with the more recent orders, such as the Sisters of the Visitation and the Ursulines. Very often they are connected by their origin and their rule with an order of men. The first monastic rules, which did not contemplate the reception of Holy orders, were as suitable for women as for men: thus there were Basilian and Benedictine nuns, simply following the Rules of St. Basil and St. Benedict. Neither the rule of the mendicant orders nor that of the clerks regular was suitable to women. St. Francis first, and then other founders, wrote a second rule for the use of nuns, who thus constituted a second order, placed normally under the jurisdiction of the superior-general of the first order (see NUNS).

(i) Third Orders.—The grant of a third rule to secular persons gives rise to the third orders. At times it happens that these tertiaries are established in community under this rule; they are then religious, ordinarily members of a congregation with simple vows. But, as we said above, there were communities of this character with solemn vows, and there is a regular Third Order of St. Francis, which goes back to the fifteenth century and which received modified constitutions from Leo XIII (20 July, 1888).

The associations of secular tertiaries are also called orders; they owe this to the fact that they profess the Christian life under an approved rule: but these are secular orders; and religious, even those under simple vows, cannot validly belong to them. By his entrance into a religious order, a novice ceases to be a secular, and seeks after Evangelical perfection, which is not the contradictory of Christian justice, but is a realization of it in an eminent degree. It has also been held that a person who has been a member of a third order before becoming a religious at once resumes his place in it, if he legitimately returns to the world. No one can belong to several third orders at the same time. Not all religious orders have third orders attached to them; but those which recognize an order of nuns as their second order generally have tertiaries also. Thus there are no Benedictine or Jesuit tertiaries: the Benedictines have no second order, and the Jesuit rule expressly forbids the Society to have an institute of nuns under its authority. In later times the Oblates of St. Benedict have been assimilated to tertiaries. Third orders are distinguished from confraternities, in as much as the former follow a general rule of life, while the members of confraternities are associated for some special purpose of piety or charity: thus they often include both religious and lay persons, and the same person may be a member of several confraternities. (As to the Third Order of St. Francis, and the name of Order, see the Constitution "Auspiciato" of 17 Sept., 1882, and "Misericors Dei filius" of 23 June, 1883.)

The word *religio* is more strictly reserved for institutes with solemn vows. As the religion of precepts and the religion of counsels were considered distinct grades of the Christian religion, the rules of life laid down according to the counsels were called *religiones*. The Second Council of Arles, 452, can. 25, spoke of the profession of the monastic life as *professio religionis*.

(2) Religious Congregations.—(a) Meaning of the

Word "Congregation".—There has been much change in the meaning of this word. It formerly denoted the whole body of religious living in a monastery: in this sense we find it in Cassian (Collations, 2nd preface) and in the Rule of St. Benedict (chap. xvii). The edifying spectacle presented by the monastery of Cluny under St. Odo (d. 942) induced many monasteries in France to beg the holy abbot to accept their supreme direction, and he undertook to visit them from time to time. Under his first two successors, numerous monasteries of France and Italy observed the usages of Cluny, while others were reformed by monks of Cluny. At the death of St. Odo, sixty-five monasteries were under the rules of Cluny and thus formed a congregation, the members of which were no longer the individual monks, but the monasteries. In a similar manner, the union of monasteries with Cîteaux produced the Congregation of Cîteaux: but here the celebrated *carta caritatis*, drawn up in a general chapter of abbots and monks held at Cîteaux in 1119, placed the supreme direction of Cistercian monasteries under the Abbot of Cîteaux, and realized a much greater unity which prepared the way for the religious orders of a later period (see "Carta caritatis" in P. L., CLXVI, 1377). The monasteries of Premonstratensian Canons were early grouped in circles (*circarias*), at the head of which was a "circator" whose office resembled that of the provincial of more recent orders. The Abbot of Prémontré, Dominus Præmonstratensis, was a real abbot-general.

Innocent III, by his Constitution "In singulis", which was promulgated at the Fourth Council of the Lateran, and forms ch. vii, t. 35, bk. 3 of the Decretals, ordered that a chapter of abbots and independent priors of every kingdom or province should be held every third year, to ensure the fervour of the observance, and to organize the visitation of the abbeys in order to prevent or correct abuses. The Council of Trent (Sess. XXV, c. viii) made congregations of monasteries general, ordering monasteries to unite themselves into congregations, and to appoint visitors having the same powers as visitors of other orders, under pain of losing their exemption, and being placed under the jurisdiction of the local bishop. There have, however, been also important reforms inaugurated by one monastery, and adopted by many others, without leading to the formation of a congregation. Such was that of William, Abbot of Hirschau (d. 1091), who wrote the Constitutions of Hirschau, the wise provisions of which, in some measure borrowed from Cluny, were adopted by about 150 monasteries having no other bond of union than a spiritual community of prayers and merits.

In 1566, St. Philip Neri founded in Rome an association of priests who were not bound by any vow; being unable for that reason to call it an order, he called it the Congregation of the Oratory. Cardinal de Bérulle in 1611 founded a similar institute, the French Congregation of the Oratory. St. Vincent de Paul, the founder of the Lazarists, or Priests of the Mission, while introducing into his institute simple vows of poverty, chastity, obedience, and stability, insisted that it should be called secular. These vows are not followed by any act of acceptance by the Holy See or the institute. His association was called a congregation, as we see from the Bull of Alexander VII, "Ex commissa" (22 Sept., 1655). Thus it became usual to designate as congregations those institutes which resembled religious orders, but had not all their essential characteristics. This is the ordinary meaning generally accepted, though somewhat vague, of the word "congregation". Before long, the genus congregation was divided into several distinct species.

(b) Religious Congregations properly and improperly so called.—First in order of dignity come the religious congregations properly so called. They

have all the essentials of religious life, the three perpetual vows, and the approbation of ecclesiastical authority. They are even approved by the Holy See. They lack only one accidental characteristic of an order, namely the solemnity of the vows. Such are the Congregations of the Most Holy Redeemer, of the Passion of the Sacred Hearts of Jesus and Mary (or Picpus Fathers), which have even the privilege of exemption. Institutes with perpetual vows approved by episcopal authority closely resemble the congregations properly so called. Religious congregations in the wider sense of the word are institutes which have no perpetual vows, or lack one of the essential vows, or which even have no vows properly so called. Thus the Daughters of St. Vincent de Paul make only annual vows, and as each year is completed they are free to return to the world. The Missionary Sisters of Our Lady of Africa, or White Sisters, form a religious congregation properly so called, but the White Fathers, on the contrary, are not bound by any vows, but take only an oath of obedience. We have spoken above of the Lazarists and Oratorians. The religious congregations improperly so called are sometimes designated pious congregations or pious societies.

(c) Division of the Institutes.—Institutes are divided, according to the quality of their members, into ecclesiastical congregations, consisting principally of priests and clerics, and lay congregations, most of whose members are not in Holy orders. Thus the Order of St. John of God, though mainly composed of laymen, includes a certain number of priests devoted to the spiritual service of its hospitals and asylums; while the Congregation of Parochial Clerics of St. Viator is composed of priests and teaching brothers placed on the same footing as religious. Several religious congregations are called tertiaries of St. Francis, St. Dominic, or some other religious order; some of these date from the fifteenth and sixteenth centuries; others are more recent, such as the Third Order of St. Dominic founded by Lacordaire, which is devoted to teaching. But they must be regularly affiliated by the superior of the first order. This affiliation does not imply any dependence or subordination to the first order, but it requires as general conditions the observance of the essential points of the rule of the third order, and a certain similarity of habit: in the matter of the habit, however, many dispensations have been granted—see the Decrees of the Sacred Congregation of Indulgences of 28 Aug., 1903, and 22 March, 1905, the Decree of the Congregation of Bishops and Regulars of 18 March, 1904, the Rescript of 30 Jan., 1905, and the Indult of 18 Nov., 1905, of the same Congregation (cf. *Periodica de religiosis et missionariis*, I, 15, p. 40; 54, p. 147; 59, p. 152; II, 102, p. 57).

As to the law by which they are governed, religious congregations are divided into congregations dependent on the Holy See, and those under episcopal authority. The latter are strictly diocesan or inter-diocesan, according as they are confined to a single diocese, or are scattered over several. Leo XIII, by his Constitution "Condite" of 8 Dec., 1900, gave to the congregations their official character; and a set of regulations of the Congregation of Bishops and Regulars, of 20 June, 1901, known by the name of *Normæ*, traces the general lines on which the Holy See wishes the new institutes to be constructed and the old ones reorganized.

(d) Religious Congregations dependent on the Holy See.—(i) Approbation.—Before a congregation can be placed under pontifical government, it must have received a Decree, in which commendation is bestowed on the congregation itself, and not merely on the intention of the founder and the object of the institution; then follows a Decree confirming the existence of the congregation, and approving its con-

stitutions, first by a trial of some years, and then finally. Before the Constitution "Sapienti" (29 June, 1908), by which Pius X reorganized the Roman Curia, two congregations were occupied with the approbation of new institutes, the Congregation of Bishops and Regulars, and the Congregation of Propaganda; the latter approved those institutes which were founded in missions and in countries subject to its jurisdiction, and those intended exclusively for foreign missions. Since the Constitution "Sapienti", the new Congregation of Religious alone has the power of approbation, and the religious of the whole world are under its jurisdiction: If they are missionaries, they owe obedience also to the Propaganda in all matters connected with their missionary character.

Except the approbation of tertiary communities (of both the sexes) with simple vows by the Constitution "Inter cetera" of Leo X (20 Jan., 1521) to which we have already alluded, the formal approbation of a religious institute with simple vows by the Holy See does not date back very far: the Brief of Clement XI "Inscrutabili" (13 July, 1703), approving the Constitution of the English Virgins (Institute of Mary), is perhaps the first instance in the case of women, while Benedict XIV in 1741 approved the Congregation of Passionists. But on 26 March, 1687, Innocent XI, by his Constitution "Ecclesiæ Catholicæ", erected the hospitaller confraternity of the Bethlehemites into a congregation, and Clement VIII, on 13 Oct., 1593, approved with simple vows the Clerks Regular of the Mother of God. These two congregations were transformed into religious orders, the one by a Constitution of Clement XI (3 April, 1710), and the other by a Constitution of Gregory XV in 1621: but later, in consequence of a decree of the Spanish Cortes, the Bethlehemites were gradually extinguished. Institutes improperly called religious have been approved since the seventeenth century: we have already mentioned the Oratorians, approved in 1612, and the Priests of the Mission, approved in 1632: to these may be added the Sulpicians, approved in 1642, the Eudists in 1643, and the Secular Priests of the Venerable Holzhauser in 1680. For a long time the Holy See, while approving the constitutions of nuns, refused to recognize the institutes themselves. The approbation formerly contained certain qualifying words, "*citra approbationem conservatorii*" ("without approbation of the institute"), which have now disappeared. Ordinarily the Holy See proceeds by steps; it requires first that the institute shall have existed for some time under the approbation of the ordinary, then it approves the constitutions for some years, and last of all grants a final approbation. Religious congregations also receive a cardinal protector, whose office is more important in the case of an institute of nuns.

(ii) Authority of the Ordinary.—Although established under pontifical government, religious congregations are not free from the jurisdiction of the diocesan ordinary. Congregations of men owe him the common obedience of all the faithful, and of clerics, if their members are tonsured or in Holy orders. Use, rather than positive law, permits the superiors, being priests, to consider themselves as quasi-parish priests of their religious subordinates. For confessions even of their own subjects, they must be delegated by the bishop; and all approved confessors of the diocese may absolve these religious, who are subject also for reserved cases to diocesan law. The temporal administration is withdrawn from the authority of the ordinary: this is the case also with institutes of nuns. Certain institutes are entirely exempt from episcopal jurisdiction; such are the Passionists, the Missionary Fathers of the Sacred Hearts, or Picpus Fathers, and the Redemptorists. Without being strictly prelates, the superiors of an

exempt institute, being priests, receive from the Holy See the power of jurisdiction in addition to the governing power belonging to all superiors, male or female. (For a comparison of these religious with regulars properly so called see the dissertation of Fr. Salsmans, S.J. in Vermeersch, "Periodica de relig. et miss.," V, p. 33). It is to be remarked that the exemption of the convent does not always imply the exemption of the church. Sometimes the authority of a superior-general of a congregation of men extends to a congregation of sisters of a similar institute; but in practice the Holy See no longer approves of any but independent congregations. Whether exempt or not, congregations may never be established in a diocese, and may not open a new house, without the permission of the bishop.

(iii) Organization of the Institute.—Congregations approved by the Holy See have the organization of religious orders: and the less rigorous enclosure of institutes with simple vows even permits the sisters to be organized in the same manner as orders of men. We find then at the head of the institute a superior-general assisted by a council, which, in the more important matters, must approve the measures proposed; then ordinarily provincial superiors with their councils, and local superiors. The superior-general, his councillors, and the procurator-general are always appointed by the general chapter. In fact, in congregations as in religious orders, the general chapter is the supreme power. It can, however, neither change the constitutions nor make laws properly so called; its orders remain in force until the chapter following. The general chapter meets for the election of the superior-general; if this takes place only every twelve years, there may be a meeting of the chapter after six years for the transaction of business. With this exception, the chapter is not summoned without the consent of the Holy See. Besides the general and his councillors, the secretary-general, procurator-general, provincials, and two delegates appointed by the provincial chapter take part in this chapter. If the congregation is not divided into provinces, the superiors of important houses and one delegate from each house take the place of the provincials and delegates of the provincial chapter. The latter consists of the provincial, his councillors, and the superiors of important houses, accompanied by a delegate from each house. The provincial chapter has ordinarily no other appointment to make than that of delegates to the chapter general. This chapter receives the accounts of the general administration, elects by secret ballot the general and his assistants or councillors, and deliberates over all important affairs of the congregation. Sometimes the sovereign pontiff, who may appoint directly to all offices, reserves to himself the right to confirm the nomination of the superior-general. The latter is generally elected for six or twelve years: in the Society of the Sacred Heart, the election is for life. Ordinarily he makes provision in his council for all charges which are not within the discretion of the chapter general. Every three years he is bound to submit to the Holy See an account in the form prescribed by the Decree of 16 June, 1906.

Whether a priest or not, the superior, as head of the house, has authority over all who live in it, and derives from the vow of obedience his power to command according to the approved constitutions. He is recommended, especially if he is not a superior-general or provincial, to make moderate use of his faculty to command in virtue of holy obedience. Sometimes even he can do this only in writing. Although he controls the temporal administration, the Holy See requires that a separate person shall have charge of the accounts, even in the houses, and that a third shall deal with expenditures. The Holy See insists also that all valuables shall be kept in a chest with a

triple lock, so that it can be opened only by means of three separate keys, which are to be kept by the superior, the procurator, and one of the councillors. In respect of their temporal administration, the congregations are independent of the bishop, but they are bound to observe the rules prescribed by the Holy See, especially the precautions taken for the preservation of dowries and other funds (see the Decree "Inter ea" of 30 July, 1909, Vermeersch, "Periodica", 331, V, p. 11). Even without belonging to an exempt congregation, the superior, if a priest, obtains without difficulty the faculty of giving his subjects dimissorial letters for ordinations; and if such faculty is granted him, then, in respect of the certificates to be delivered, the competent bishop etc., the rules are the same for congregations as for religious orders.

We have treated of the admission of subjects, the novitiate, and simple profession under the titles: NOVICE; POSTULANT; and PROFESSION, RELIGIOUS. Ordinarily, and always in the more recent orders, temporary vows for some years preceded perpetual vows: these vows, even temporary, are reserved to the Holy See. While the superior has the power to dismiss religious who have not made perpetual vows, he has not always the power to release them from their obligations, and in that case it is necessary to have recourse to the Holy See. Religious who have received any of the major orders in the institute, and those who have made perpetual vows, cannot be dismissed without the formalities prescribed for the dismissal of persons professed with solemn vows. Dismissal involves a suspension which is reserved to the Holy See; and the voluntary departure of a religious who, as a religious, has been admitted to Holy orders, even of one whose temporary vows have expired, is not regular unless he has found a bishop and means of subsistence. The sanction is the same as for one professed with simple vows in a religious order. Secularization is seldom granted to members of a religious congregation, but recourse is had to dispensation from vows. Migration from one congregation to another cannot take place without the consent of the Holy See, and it is usual to ask for that consent before entering a religious order, though there is no law forbidding such entrance.

(d) Religious Congregations under Episcopal Authority.—(i) Approbation.—After the Constitutions of St. Pius V, which were opposed to simple vows, the Holy See could only tolerate congregations without solemn vows. Such congregations naturally desired to be under the control of some ecclesiastical authority, which could only be that of the bishop: by degrees a custom grew up which gave bishops an incontestable right to approve religious congregations, and this right received express recognition from the Constitution "Conditæ" of Leo XIII (8 Dec., 1900), the first part of which is wholly devoted to the diocesan congregations: its first articles contain a solemn warning against the rash creation of new ones, and any excessive increase in their number. More recently the Motu proprio "Dei providentis" (16 July, 1906) declared the necessity of pontifical authorization before any episcopal approbation. When it is desired to form a new congregation, the ordinary forwards to the Sacred Congregation of Religious the name of the founder, the object of the foundation, the name and title chosen for the new institute, a description of the habit to be worn by the novices and professed members, the work to be undertaken, the resources, and the names of similar institutes existing in the diocese. When once the consent of Rome has been obtained, the bishop may authorize the institute, respecting all things decreed by the Holy See; and in revising the constitutions, he will take care that they are always in conformity with the Normæ of 1901. It is to be remarked that in the Decree of 1906, the expression "religious institute"

has a very wide meaning, and by the terms of that Decree, this procedure is to be followed for all associations, whose members have a distinctive name and habit, and devote themselves to their own personal perfection, or to works of piety or charity: vows are not required. But, on the other hand, the institute thus formed remains episcopal; the ordinaries exercise over it all the rights mentioned in the Constitution "Conditæ" (ch. i), except the right to modify anything that the Holy See has specially laid down.

(ii) Authority of the bishop.—This Constitution formulates the principle of full and exclusive submission to the bishop; from which we conclude that the rights of the bishop are limited only by the principle of natural justice and equity, which demands respect for acquired rights; by the nature of the institute, which must give its religious the means of making progress towards perfection according to the precepts of the Gospel; and by the plain exceptions of pontifical law. We say "the plain exceptions", because Decrees of the Holy See, which do not clearly refer to diocesan institutes, only give directions to bishops without restraining their power; moreover, in the immense variety of cases, prescriptions which are useful to institutes under pontifical government would be very troublesome to those whose life is diocesan; and the latter in the immediate control of the bishop often find the same security that the Holy See seeks to give by a new regulation to congregations dependent upon itself.

We have now to distinguish between diocesan and interdiocesan institutes.—(a) Diocesan Institutes.—Congregations which exist in but one diocese are dependent only on a single bishop: he approves the institute, authorizes the erection of new houses, may forbid the extension of the institute into another diocese, and may for sufficient reasons close a house, or suppress the institute itself: but he must take care, during the liquidation, not to violate the canonical laws concerning the disposal and alienation of ecclesiastical property. He may receive subjects himself, visit the houses to inquire into the religious discipline and temporal administration, and reserve to himself the approval of the most important acts. The Constitution "Conditæ" requires the superior in a convent of women (and we may say the same of male superiors) to be appointed by election; the bishop may not only preside at the election, but also confirm or annul it; and when any grave cause prevents the holding of a regular election, he may, while awaiting a favourable opportunity for assembling the electors, even make provision for the internal government of the institute. He is bound, however, except in case of express provision in the constitutions, to leave the hands of the superior free to administer the institute and even to transfer the members (Reply of the Congregation of Bishops and Regulars, 9 April, 1895). (b) Interdiocesan Institutes.—If the institute has houses in several dioceses, each bishop has authority over the houses in his own diocese; the consent of all is necessary to touch the institute itself. Ordinarily the difficulties which may be created by this situation may be removed by asking for pontifical approbation for the institute. Often also the bishop of the diocese of origin, in order to prevent difficulties and disputes, refuses to allow the extension into other dioceses, unless it is agreed that he shall have full authority over the religious life of the institute.

(c) Superior, Vows, Ordination.—In institutes under episcopal authority the ordinary jurisdiction is vested in the bishop, never in the superior: the latter has the ruling power which is given him by the vows, and the internal authority which he possesses as head of the house. The vows, except the vow of perpetual chastity, if it has been absolutely taken, are

not reserved to the Holy See. The dismissal of subjects does not require the formalities prescribed by the Decree "Auctis admodum" (4 Nov., 1892) which has been mentioned in connexion with orders and congregations properly so called; and the religious in Holy orders do not incur the suspension inflicted by that Decree on those who are expelled, or on those who depart voluntarily without having found a bishop or means of subsistence. In fact, the members of these institutes have always their bishop, who has taken the responsibility of ordaining them. Exception, however, must be made if the institute has obtained an indult permitting the superior to deliver to his subjects letters of ordination which bind only the institute: in such a case a subject who left the institute having received major orders in this manner, would be suspended until he had found a bishop and means of subsistence.

(f) Religious State of the Members.—The question has been raised whether members of an episcopal institute are really in the religious state, provided, be it understood, that they are bound by the three perpetual vows of poverty, chastity, and obedience. Our answer is in the affirmative, because the bishop, being the ordinary authority instituted by Christ himself, truly gives canonical institution to the association.

B. RELIGIOUS RULE.—To complete our description of the religious life, we have now to deal with the rule or constitutions by which religious are governed. (1) *Historical Survey*.—In the earliest times, the younger monks were accustomed to seek and follow the advice of some older monk in order to realize the ideal of monastic life; and very soon those who were renowned for their wisdom and holiness saw their instructions observed by a large body of disciples. Others drew up a rule of life for the use of candidates for the life of perfection. The necessity for such a rule chiefly affected the cenobites, for whom it was necessary also to organize common life and a hierarchical constitution.

The first rules were plans of perfect life, with details differing according to persons, times, and places, but framed upon the Gospel as their common fundamental rule. The first monks found their first rule in the Acts of the Apostles, iv, 32–5, where we are told how the owners of property voluntarily gave it up for the benefit of the whole community: this passage was called the rule established under the Apostles (St. Possidius, "Life of St. Augustine", c. v., in P. L., XXXII, 37). When intended for anchorites, the rules contained only individual counsels; those intended for cenobites dealt also with the entrance into the monastery, the probations, the hierarchy, obedience, and common life. Sometimes they were codifications of received usages, observed and subsequently collected by the disciples of some famous monks, sometimes they were the authentic work of the saint whose name they bore; not to mention the mixed character of certain rules composed with the help of authentic writings, but first published without any intention of making them a rule properly so called. St. Pachomius gradually compiled, according to the varying needs of the times, a body of rules, the authentic text of which is not now in existence; certain MSS. give us more information on the subject of the rules of his disciple, Schenut. We possess the Rule of St. Benedict; the Rules of St. Basil and St. Augustine are of the mixed class. The answers of St. Basil to the questions of the monks form the first; the second consists in great measure of extracts from a letter addressed by St. Augustine in 423 to the nuns of Hippo (Ep. 211 in P. L., XXXIII, 960–5). Of the first class are the rules which are circulated under the names of Saints Anthony, Isaias, Serapion, Macarius, Paphnutius, and others. We need not wonder that legend has attributed to some of the rules a superhuman origin: the Rule of St. Pachomius,

for instance, soon after its appearance, was said to have been dictated or even written on tablets by an angel; hence it acquired the name of the "Angel's Rule". These rules had no binding force, except sometimes for the inhabitants of a monastery during the term of their residence. In many monasteries various rules were observed: the monastic life did not derive its unity from the rules.

As orders began to approach more nearly to the modern form, and new ones were established having their own special objects in addition to religious profession, each institute had its own rule, which was in fact a plan of life after the spirit of the Gospel, imposed on the religious to help them work in common for the special objects of their institute. Such a rule is identified with the institute itself, and the obligation to persevere in the latter includes the obligation to observe the former. The rule takes this form among the canons regular, and more definitely in the mendicant orders. The Roman Council of 1139 recognized three rules, those of St. Benedict, St. Basil, and St. Augustine; and the Fourth Council of the Lateran (1215) refused to recognize any religious institutes which did not observe a rule approved by the Holy See. Innocent III and Honorius III afterwards approved the Rule of St. Francis. Thus a new note was added to the rule, the approbation of the Holy See; and the rule became a canonical law, governing the religious, although in the beginning it was only a private compilation. A new step has recently been taken: until 1901, the Holy See was content to examine the laws of new institutes without troubling much over details; but as in the progress of legislation certain clauses were repeated, and new ones introduced in their place, it was decided in 1901 to enact a more uniform type of rule for new institutes: thus the Normæ of 28 June, 1901, were drawn up, to be a common mould for the formation of all new institutes with but few exceptions. Henceforth the rules will be mainly the work of the Holy See, and all congregations will be, as regards their chief lines, organized in the same manner. The substance of the rule has also been greatly changed. In the beginning it was simply a short code of asceticism with such directions as were necessary for the organization of common life; and in the orders properly so called, there were added to this code the regulations required by the special object of each institute: at present asceticism and the rule of life are kept distinct, and the only things to be treated of in the rule are the points of common observance.

(2) *Rules and Constitutions.*—In canonical language we distinguish between rules and constitutions: history easily explains this terminology. As already stated, the Fourth Council of the Lateran (1215), c. Ne nimia. De religiosis domibus, etc. (iii, 36) confirmed by the Second Council of Lyons (1479) c. Religionum un., *ibid.* in 6 (iii, 12) had forbidden new foundations of orders. The prohibition was understood in this sense that no order should be constituted under a new rule; and the sovereign pontiffs themselves insisted on the adoption of an old rule for the institutes they approved. Therefore, following the example already set in the eleventh century by St. Romuald, who adapted the Rule of St. Benedict to the eremitical life, the founders chose a rule already received in the Church, adding such prescriptions as were required by the special object of their institutes. These prescriptions were called "constitutions". The term "rule" is, therefore, at present used only to denote one of the ancient rules, and more particularly the four great rules, each of which serves as a fundamental law to many institutes, namely (1) the Rule of St. Basil, or rather the collection of his rules divided into two classes, those expounded in detail, and those more concise; (2) the Rule of St. Benedict; (3) the Rule of St. Augustine formed with the help

of his letter 211 to nuns, his sermons 355 and 356, concerning the morals of clerics (P. L., XXXIII, 358 sqq., and XXXIX, 1568) and some additions of Fulgentius; and lastly (4) the Rule of St. Francis of Assisi, confirmed on 29 Nov., 1223, by the Constitution "Solet" of Honorius III.

The more recent laws, not only those which contain decisions on special points, but also those which apply only to particular orders or congregations, are properly called constitutions; the rule is always recommended by its antiquity: where there exist both a rule and constitutions, the rule, without having any greater force, nevertheless contains the more general and consequently more stable elements, which are also common to many religious orders or congregations. From this point of view, institutes are classified as follows: the more ancient orders, if not reformed, have only the rule of their founder; most orders have both rules and constitutions, and venerate the author of the rule as a sort of patriarch; while some orders and many congregations with simple vows have constitutions which with them take the place of a rule. The Rule of St. Basil governs most monks of the Greek Rite; the Rule of St. Benedict is the principal rule of the Western Monks; and was called simply "the Rule". It governed also some military orders, such as those of Alcántara, and the Templars. The Rule of St. Augustine is common to the canons regular, the Hermits of St. Augustine, and many institutes whose special object required a somewhat less strict form of government: thus the Friars Preachers, the Servites, and the Religious of St. John of God have this rule besides their own special constitutions. Many congregations of hospitalers of both sexes are governed in the same manner. The Rule of St. Francis is observed by the three branches of his first order; the second order and many congregations of tertiaries also follow a rule of the same saint. The Carmelites, the Minims, the Society of Jesus, the Passionists, and the Redemptorists all have their own constitutions only.

(3) *Binding Force of the Rule.*—At the present day the rules and constitutions are ecclesiastical laws, and therefore obligatory, at least in their preceptive parts: but the obligation varies. In the Rule of St. Francis, for instance, some articles bind under mortal sin, others under venial sin; that of the Carmelites binds under venial sin only: and Suarez considers (*De religione*, VIII, I, iii, n. 8) that without some special indication expressed or implied in cases of doubt we must presume a venial obligation. Apparently the Rule of St. Benedict and certainly the Constitutions of the Friars Preachers and the Society of Jesus do not bind directly, except to the acceptance of the penance imposed for their infringement; nor is this spontaneous fulfilment of the penance always binding in conscience. Even then, the rule is a law, not a pure counsel: if a religious should profess himself independent of it, he would commit a grave offence against obedience; if he disobeys, he deserves reproof and punishment, and it rests with the superior to impose under sin the observance of each point of the rule. Moreover, in the motive which leads to a violation of the rule, or in the effect of such violation, there is generally an irregularity which makes the act a venial sin.

(4) *Collections of Rules.*—In very early times, there were collections of rules; we may mention that which in the language of the period, St. Benedict of Aniane (d. 821) called the "*Concordia regularum*", which was republished with additions by the librarian Holstenius (d. 1661) at Rome in 1661 and in Paris in 1663. Brockie brought out a more perfect edition (Augsburg, 1759), which is reproduced in P. L., CIII, 393-700. Thomas of Jesus, a Carmelite, published (Antwerp, 1817) commentaries on most of the rules.

SUPPLEMENT.—*Perfection of the Different Religious Institutes.*—If we wish to compare the different religious institutes from the point of view of their relative perfection, the excellence of the object gives the first rank to the mixed institutions, and to the contemplative institutes priority over the active. Perfection depends upon the harmonious combination of the means employed towards the end, the quality of the works to which the institute is devoted, and even the number of its means of action. The strictness of the observance, by putting further away the occasions of sin, is another reason of superiority, and above all, the strictness of obedience, which is now considered as the principal obligation of religious life. However, by canon law, respect is paid rather to the outward austerity of the life, and the Carthusians are considered the most perfect from that point of view. Institutes consisting of clerics and those with solemn vows have for this reason a certain superiority over lay institutes and those with simple vows.

Reliquaries.—It would follow of necessity from the data given in the article RELICS that reliquaries—by which we understand in the wider sense any box, casket, or shrine destined for the reception of relics—must have existed in some shape or form almost from the beginning of Christianity. With regard, however, to their construction, material etc. in the early centuries, nothing can be said positively. Even the names by which they were known (*capsa*, *capsella*, *theca*, *pyxys*, *arca* etc.) are quite general in character, and it seems certain that the same names also designated receptacles for the Blessed Eucharist, the holy oils, and other pious objects. Thus it becomes difficult to decide in the case of certain circular ivory pyxes, of which one in the Berlin Museum is the best known and the earliest in date, whether they were or were not used as reliquaries. Most of them show nothing but scenes or figures from the Gospel in the carvings with which they are abundantly decorated, but as there is one which depicts the martyrdom and exaltation of the popular Egyptian martyr St. Menas, it seems likely that this at least was a reliquary, intended possibly to contain the oil from his shrine. This oil was more commonly preserved in clay flasks, of which many still survive in various European collections. Passing over the phials attached to the *loculi* in the catacombs and supposed to contain blood, upon which disputed problem sufficient has been said in the article AMPULLÆ, the earliest known reliquaries are probably certain silver boxes, two of which (one circular, the other oval in shape) were discovered at Grado in 1871 (see De Rossi in "Bull. di arch. crist.", 1872, p. 155). Both of these, along with various Christian emblems, bear inscriptions giving the names of saints, while

RELIQUARY
French, XIII Century

other details confirm the view that they must have been intended for relics. A very similar box, but without inscription, was afterwards found in Numidia, and is now in the Vatican Museum. It was assigned with confidence by De Rossi to the fifth century (Bullettino, 1887, p. 119). Still another specimen, beyond all question intended for relics, has come to light in the treasury of the Sancta Sanctorum at the Lateran (Grisar, "Die römische Kapelle", 108-10). These were no doubt the kind of *capsellæ argenteæ* which Justinian in 519 wished to send to Rome in hopes of obtaining from Pope Hormisdas relics of St. Lawrence and other Roman saints (P. L., LXIII, 474). Of somewhat later date are the pewter flasks and a little golden cross, or encolpion, still preserved in the treasury of Monza, and identified with much probability as presents sent by Gregory the Great to Queen Theodolinda. The pewter flasks contained oil, very probably only that of the lamps which burned before certain relics or in certain churches of the Holy Land. The encolpion, which is a remarkable little piece of jewellery, 3 inches in height by 2½ in breadth, has figures and inscriptions in *niello* and is believed to contain a fragment of the True Cross. St. Gregory in his letter describes it as a "phylacterium" or "crucem cum ligno sanctæ crucis Domini". Other small encolpia in the form of crosses, belonging approximately to the same period, are also preserved.

RELIQUARY
German, XV Century

Of larger reliquaries, or shrines, our oldest surviving specimens probably date back to the seventh or eighth century. Among the remarkable objects preserved in the treasury of St. Maurice in the Valais is a gabled shrine about 7¼ inches long, 2½ broad, and 5¼ high. It is studded with stones, and has a large cameo in the centre, while on a plate of gold at the back particulars are given regarding its construction in honour of St. Maurice. This form of gabled shrine, which is often suggestive of a child's "Noah's Ark", remained the favourite type for reliquaries of importance during all the early Middle Ages. Perhaps the most magnificent specimen preserved is that known as the Shrine of the Three Kings in the treasury of Cologne Cathedral. After the storming of Milan (1162) the supposed relics of the Magi were carried off and brought to Cologne, where a magnificent silver casket, nearly 6 feet long, and 4½ feet high, was constructed for them. This superb piece of silversmith's work resembles in outward form a church with a nave and two aisles. Of much earlier date but hardly less magnificent, owing to the profuse employment of enamel and gems, is the Marienschrein at Aachen connected by tradition with the name of Charlemagne. The Ursula Shrine at St. John's Hospital in Bruges also retains the same general form, but here the ornament is supplied by the beautiful paintings of Hans Memling. Quite different in type are the reliquary crosses mentioned by Gregory the Great, the use of which may be traced back to the fifth century, though they belong to all periods and have never completely gone out of fashion. The most venerable existing specimen is undoubtedly the enamelled cross preserved in the Sancta Sanctorum of the Lateran and recently de-

scribed.

scribed by Father Grisar and by Lauer. A large relic of the True Cross is probably still embedded in the hollow of the case, covered with a thick coating of balsam—a perfumed unguent which, as the “*Liber Pontificalis*” informs us, was applied to such reliquaries as a mark of veneration. This identical cross is prob-

RELIQUARY OF ST. URSULA

Decorated by Memling, Hospital of St. John, Bruges

ably that found by Pope Sergius (687–701) in a corner of the sacristy of St. Peter's, and it may possibly date from the fifth century.

Other medieval reliquaries, of which specimens still survive, took the form of legs, arms, and particularly heads or busts. Perhaps the earliest known is a bust from the treasury of St. Maurice in the Valais; amongst the later examples are such famous reliquaries as those of the heads of the Apostles, St. Peter and St. Paul, at the Lateran, and that of St. Januarius in Naples (cf. plate in *THE CATHOLIC ENCYCLOPEDIA*, VIII, 296). Under this class we may also mention the relic statues which seem to have been rather exceptionally common in England. It is conceivable that some of the prejudice of the English Reformers against “wonder-working” statues was due to the practice of making doors into the hollow of such figures and preserving relics within them. Sir Thomas More (“*Works*”, London, 1557, p. 192) describes a case in which such a hiding-place for relics was unexpectedly discovered in the Abbey of Barking. Lastly it will be sufficient to point out that relics have at all times been kept in simple caskets or boxes, varying indefinitely in size, material, and ornamentation. In more modern times these are invariably secured by a seal, and the contents indicated in a formal episcopal act of authentication, without which it is not lawful to expose the relics for public veneration. The silver box containing the head of St. Agnes, recently brought to light in the treasury of the Sancta Sanctorum, still preserved the seal of some cardinal deacon affixed to it apparently at the end of the thirteenth century. From a graphical point of view the illustrations of reliquaries in the early German “*Heilighthums-Bücher*”, published in connexion with various famous shrines, e. g. Einsiedeln, Wittenberg, Halle etc. are particularly interesting.

Probably the most useful work is GRISAR, *Die römische Kapelle Sancta Sanctorum u. ihr Schatz* (Freiburg, 1908), an account of the recent discoveries made in the treasury of the Sancta Sanctorum at the Lateran; cf. LAUER, *Le trésor du Sancta Sanctorum* (Paris, 1906). A more formal discussion will be found in works on Christian art: REUSSENS, *Elements d'archéol. chrét.* (Louvain, 1885), I, 476; II, 339; OTTE, *Handbuch der Kunst-Archäologie*, I (Leipzig, 1886), 183–211; BERGNER, *Handbuch der kirchl. Kunstaltertümer* (Leipzig, 1905). See also *Dict. Christ. Antiq.*, s. v. Reliquary; DE ROSSI, *La capsella reliquiaria africana in Omaggio a Leone XIII* (Rome, 1888); MOLINIER, *Hist. générale des arts appliqués à l'industrie*, especially IV, pt. i (Paris, 1901); FRÖHNER, *Collections du château de Goluchow: L'orfèvrerie* (Paris,

1897). For any profounder study the separate monographs and articles, of which almost every remarkable reliquary of antiquity has at some time formed the subject, should be consulted

HERBERT THURSTON.

Remesiana, titular see in Dacia Mediterranea, suffragan of Sardica. Remesiana is mentioned by the “*Itinerarium Antonini*” (135), the “*Itinerarium Hierosolymitanum*” (566), the “*Tabula Peutingeriana*”, the “*Geographus Ravennatensis*”, IV, vii. Justinian rebuilt and fortified it at the same time as he established numerous fortresses in that vicinity (Procopius, “*De aedif.*”, IV, i, iv). In the sixth century this city of ancient Moesia was counted among those of Dacia Mediterranea (Hierocles, “*Synecdemus*”, deliv. 7). To-day it is known as Bela Palanka, has 1100 inhabitants, and is a railway station between Nich and Pirot in Servia. Remesiana was a suffragan of Sardica (to-day Sofia, capital of Bulgaria), the civil and religious capital of Dacia Mediterranea which was under the Patriarchate of Rome. Two bishops are known: St. Nicetas (q. v.) and Diogenianus, present at the Robber Synod of Ephesus (449). The see must have disappeared in the sixth century.

S. PÉTRIDÈS.

Remigius, St., Apostle of the Franks, Archbishop of Reims, b. at Cerny or Laon, 437; d. at Reims, 13 January, 553. His feast is celebrated 1 October. His father was Emile, Count of Laon. He studied literature at Reims and soon became so noted for learning and sanctity that he was elected Archbishop of Reims in his twenty-second year. Thenceforward his chief aim was the propagation of Christianity in the realm of the Franks. The story of the return of the sacred vessels, which had been stolen from the Church of Soissons testifies to the friendly relations existing between him and Clovis, King of

Miniature in the MS. History of the Emperors preserved in the Library of the Arsenal, Paris

the Franks, whom he converted to Christianity with the assistance of St. Waast (Vedastus, Vaast) and St. Clotilda, wife of Clovis. Even before he embraced Christianity Clovis had showered benefits upon both the Bishop and Cathedral of Reims, and after the battle of Tolbiac, he requested Remigius to baptize him at Reims (24 December, 496) in presence of

several bishops of the Franks and Alemanni and great numbers of the Frankish army. Clovis granted Remigius stretches of territory, in which the latter established and endowed many churches. He erected, with the papal consent, bishoprics at Tournai; Cambrai; Terouanne, where he ordained the first bishop in 499; Arras, where he placed St. Waast; Laon, which he gave to his nephew Gunband. The authors of "Gallia Christiana" record numerous and munificent donations made to St. Remigius by members of the Frankish nobility, which he presented to the cathedral at Reims. In 517 he held a synod, at which after a heated discussion he converted a bishop of Arian views. In 523 he wrote congratulating Pope Hormisdas upon his election. St. Medardus, Bishop of Noyon, was consecrated by him in 530. Although St. Remigius's influence over people and prelates was extraordinary, yet upon one occasion, the history of which has come down to us, his course of action was attacked. His condonement of the offences of one Claudius, a priest, brought upon him the rebukes of his episcopal brethren, who deemed Claudius deserving of degradation. The reply of St. Remigius, which is still extant, is able and convincing (cf. Labbe, "Concilia", IV). His relics were kept in the cathedral of Reims, whence Hincmar had them translated to Epernay during the period of the invasion by the Northmen, thence, in 1099, at the instance of Leo IX, to the Abbey of Saint-Remy. His sermons, so much admired by Sidonius Apollinaris (lib. IX, cap. lxx), are not extant. Of his other works we have four letters, the one containing his defence in the matter of Claudius, two written to Clovis, and a fourth to the Bishop of Tongres. According to several biographers, the Testament of St. Remigius is apocryphal; Mabillon and Ducange, however, argue for its authenticity. The attribution of other works to St. Remigius, particularly a commentary upon St. Paul's Epistles, is entirely without foundation.

JOSEPH DEDIEU.

Remigius of Auxerre, a Benedictine monk, b. about the middle of the ninth century; d. 908. Remigius, or Remi, was a disciple of the Irish teacher Dunchad of Reims, author of a treatise on astronomy, and of Eric, or Heirich, who was himself a disciple of Eriugena. He taught at the monastery of St-Germain, Auxerre, in Paris, and at Reims. He is the author of a number of glossaries and marginal commentaries on the Bible, on the grammar of Priscian, the "Opuscula Sacra" of Boethius, and the "De Nuptiis etc.", of Martianus Capella. He also wrote a theological treatise, "Ennarationes in Psalmos". As a teacher, Remigius interested himself in the problem of universals, and seems to have attempted a compromise between the extreme Realism of Eriugena and the Anti-Realism of his teacher, Eric. He also investigated the problem of the origin of the universe and gave a Christian interpretation to the passages in which Martianus speaks of the invisible world of ideas. His glosses are of very great interest to the student of medieval Latin philology.

WILLIAM TURNER.

Remiremont, Vosges, France, monastery and nunnery of the Rule of St. Benedict, founded by Sts. Romaricus and Amatus in 620, on hills above the site where the town now stands, whence the name *Romarici Mons*, Remiremont. The monastery be-

came a priory of the Canons Regular of St. Augustine who, in 1623, gave it to the Benedictines of the Congregation of St. Vannes. It had, in 1768, 10 monks and a revenue of 5500 livres. During three centuries, the nunnery was a neighbour of the monastery, but, in 910, as the Huns were wasting the country, the nuns, with the help of the Emperor Louis III, constructed a fortified convent in the valley. About this convent the town of Remiremont rose, and the relics of Sts. Romaricus and Amatus were transported from the monastery to the convent. Leo IX enriched it with other numerous relics. In 1057 the convent was destroyed by fire and the nuns were dispersed; though rebuilt later it no longer strictly observed the Rule of St. Benedict. In 1284, the Emperor Rudolph married there the Princess Elizabeth and, in 1290, gave to the abbess the title of a princess of the empire. In the beginning of the sixteenth century discipline was lax and the nuns, without the pope's consent, declared themselves canonesses. They did not take the vows and admitted only novices who could give proof of noble descent. Catharine III of Lorraine tried to reform the convent, but failed. Anna of Lorraine rebuilt the convent in 1752. It was suppressed, as was the monastery, during the French Revolution.

Remonstrants. See ARMINIANISM

Remuzat, ANNE-MADELEINE, VENERABLE, b. at Marseilles, 29 Nov., 1696; d. 15 Feb., 1730. At nine years of age she asked her parents to be allowed to enter the convent of the Visitation; the request was granted. From 1708 she began to experience severe sufferings which, during her whole life, she bore patiently for the salvation of souls. In 1709 her parents withdrew her, but in 1711 she re-entered the convent and on 23 Jan., 1713, made her profession. At this time she applied herself to prayer, and the "Spiritual Retreat" written then is a proof of her progress in the contemplative life. She experienced on 17 Oct., 1713, a "particular and extraordinary" revelation of Jesus "concerning the glory of his Sacred Heart". As the repute of her sanctity became known, Anne-Madeleine was consulted by many, and was thus the means of spreading devotion to the Sacred Heart. Her influence actuated Mgr de Belsunce to establish at Marseilles the Association of Perpetual Adoration of the Sacred Heart, of which she wrote the statutes. As Jansenism and a spirit of moral laxity had then invaded the town Anne-Madeleine suffered keenly, and in reparation inflicted on her body continual mortifications; when her superiors interdicted these austerities, she begged Our Lord to mortify her himself; and from that day she went into a painful decline, while her soul was abandoned to temptations. In 1720, during the plague at Marseilles, Our Lord enjoined her to institute a feast in honour of the Sacred Heart, which Mgr de Belsunce established on 22 Oct., 1720. From 1722 the veneration of the Sacred Heart spread throughout Provence, Lyons, Rouen, Constantinople, Cairo, Spain, Louisiana, Persia, Syria, and the Indies by her endeavours. In 1888 her cause was submitted to the Sacred Congregation, whose favourable vote was given on 18 Dec., 1890. Leo XIII signed on 24 Dec., 1891, the introduction of the cause of the Venerable servant of God.

JOSEPH DEDIEU.

Remy, ABBEY OF SAINT, founded at Reims before 590. Its early history is very obscure; at first a little chapel dedicated to St. Christopher, it obtained great renown when it acquired the relics of St. Remy in 553, and gifts poured in upon it from pious donors. By the ninth century the abbey possessed about 700 domains and was perhaps the richest in France. It seems probable that secular priests were the first guards of the relics, but were succeeded by the Benedictines. From 780 to 945 the archbishops of Reims were its abbots. It was there that Charlemagne received Leo III. In 1005 the Abbot Aviard undertook to rebuild the Church of St-Remy, and for twenty years the work went on uninterruptedly but then collapsed. The Abbot Theodoric erected a magnificent basilica which in 1049 Leo IX dedicated and granted many special privileges. The schools and the library were, during the Middle Ages, of such great repute that Alexander III wrote a commendatory letter to the Abbot Peter. The archbishops of Reims and several princes, Carloman, Charlemagne's brother, Henri d'Orléans (d. about 1653), and several kings, Louis IV and Lothaire, were buried in the monastery.

Among the illustrious men of the abbey may be mentioned: Henri de Lorraine (1622-1641), who affiliated, in 1642, the abbey to the Congregation of St. Maur; J. Nicolas Colbert (1665), later Archbishop of Rouen; Charles Maurice le Tellier (1680-1710); and Joseph de Rothechouart, appointed abbot by the king in 1745.

JOSEPH DEDIEU.

Renaissance, THE, may be considered in a general or a particular sense, as (1) the achievements of what is termed the modern spirit in opposition to the spirit which prevailed during the Middle Ages; or (2) the revival of classic, especially of Greek, learning and the recovery of ancient art in the departments of sculpture, painting, and architecture, lost for a thousand years in Western Christendom. Impossible though it be to separate these elements from the whole movement into which they enter, we may distinguish them from it for our present purpose, viz., to sum up the influences, whether good or evil, which are traceable to the antique, pre-Christian, or pagan world of letters and plastic remains, as it came to be known and studied from the end of the fourteenth century onwards, in relation to the Catholic Church. For ecclesiastical history goes through periods analogous to the changes brought about by secular revolutions. Roughly speaking, the age of the Fathers corresponds to the Imperial Roman period, closing in A. D. 476; the Middle Ages occupy those tumultuous years when barbarians turned Christians were learning slowly to be civilized, from 476 to 1400; while the modern relations of Church and State begin with the definite emergence of nationalities in the West, at an era most critical, signalized by the destruction of the Greek Empire, the invention of printing from movable type, the discovery of America, and all this leading on to the Protestant Reformation. History, like life, is a continuous web; its various stages pass into one another by the finest degrees. But after the Great Schism was healed by the Council of Constance in 1417, the Church, turning her back once for all on a worn-out feudalism, and no longer engaged in strife with Teuton emperors, found herself in the presence of new difficulties, and the character of the times was manifestly altered.

We are dwelling now in this modern epoch. The Middle Ages have become an interlude, clearly

bounded on both extremities by a more civilized or humane idea of life, which men are endeavouring to realize in politics, education, manners, literature, and religion. This blending of widely dissevered ages and peoples by virtue of a complex type into a consistent, though greatly enlarged historical system, has been due to the Renaissance, taken as a whole. A glance at the map will remind us of the striking fact that Christianity is bound up in space no less than in time with the Greek and Roman World. It has never yet flourished extensively outside these borders, except in so far as it subdued to ancient culture the tribes to which it offered the Gospel. There is a mysterious and providential link, recognized in the New Testament by St. Paul, St. John, and St. Peter, between Rome as the head of secular dominion and the visible Kingdom of Christ. Roman law protected as well as persecuted the disciples; Greek philosophy lent its terms to Catholic dogma. The School of Alexandria, taught by Clement and Origen, did not scruple to quote Athenian literature in illustration of revealed truths. St. Gregory of Nazianzus wrote Greek poems in a style which was moulded on the classic tragedians. There was always in the West a Puritan spirit, of which from Tertullian and Novatian down to the Spanish Priscillian we may note examples; but the saints who established our tradition—Cyprian, Augustine, Jerome—held more tolerant views; and though St. Jerome felt compunctious visitings for the days and nights he had given to Plautus or Cicero, his own diction is severely classic. His Latin Vulgate, also, while it obeys the construction of the Hebrew, is written in cultivated, not in rustic, language. St. Gregory the Great despised grammar as a subordinate accomplishment, but was himself a good scholar.

The loss of Greek authors and the decline of Church Latin into barbarism were misfortunes in a universal ruin; neither of these events was the consequence of a deliberate break with antiquity. Latin and Greek had become sacred languages; the Western and Eastern liturgies carried them with Holy Scripture wherever they went. Catholic Rome was Latin by tradition and by choice. No German dialect ever attained to the privileges of the sanctuary which St. Cyril won for the Old Slavic from Pope Nicholas I. Under these circumstances, a revival of learning, so soon as the West was capable of it, might have been foreseen. And it was equally to be anticipated that the Vatican would not reject a movement of reconciliation, akin to that whereby so many of the ancient usages had been long ago adapted to Christian ends. Speaking of the second century, Walter Pater observes: "What has been on the whole the method of the Church, as a 'power of sweetness and patience', in dealing with matters like pagan art, pagan literature, was even then manifest." There had been, at that day, an "earlier and unimpeachable Renaissance". The Catholic principle, in accordance with its name, assimilates, purifies, consecrates, all that is not sin, provided that it will submit to the law of holiness. And the central classic authors, on whose study liberal education has been set up from the age of Aristotle among Greeks, from the Augustan era in Rome, were happily amenable to this cleansing baptism. As a literature, the chief schoolbooks were singularly free from moral deformities; their teaching fell short of the New Testament; but it was often heroic, and its perils admitted of correction. Newman happily describes Græco-Roman civilization as "the soil in which Christianity grew up". And Pater concludes that "it was by the bishops of Rome . . . that the path of what we must call humanism was thus defined", as the ideal, namely, of a perfect training in wisdom and beauty. Quite in unison with such a temper of mind, Pope Leo X in 1515 wrote to Beroaldo, the editor of Tacitus: "Nothing more excellent or useful has been given to men by the Creator, if we

except the true knowledge and worship of Himself, than these studies."

When, therefore, Nicholas V (1447-55) founded the Vatican Library, his act was inspired by the tradition of the Holy See, deservedly known as the nursing-mother of schools and universities, in which the seven "liberal arts" had always been taught. Paris, the greatest of them, had received formal recognition in 1211 from Innocent III. Between the years 1400 and 1506 we may reckon some twenty-eight charters granted by the popes to as many universities, from St. Andrews to Alcalá, and from Caen and Poitiers to Wittenberg and Frankfurt-on-the-Oder. But Humanism was propagated chiefly from Italian centres and by Italian or Greek professors. We must bear in mind a fact which is often lost sight of, that the Scholastic philosophy had never taken deeproot in the Peninsula, and that its masters chiefly flourished north of the Alps. Alexander of Hales, Scotus, Middleton, Occam, were Britons; Albert the Great was a German; St. Thomas Aquinas, his disciple, taught at Paris. On the other hand, that renaissance of Roman Law which enabled Frederick Barbarossa and his successors to withstand the papacy, began with Irnerius at Bologna. Again, it was Petrarch (1303-1374) who inaugurated the far-reaching movement which claimed for literature, i. e., for poetry, rhetoric, history, and all their branches, the rank hitherto maintained by logic and philosophy; Dante, who crystallizes the "Summa" of St. Thomas in miraculous verse, remains medieval; Petrarch is modern precisely by this difference, although we must not fancy him opposed to Church or Bible. Now when Greek manuscripts were eagerly sought after, and when Cicero dictated the canons of Latin style, the syllogism with its arena of disputation could not but give place to the orator's chair and the secretary's desk. Not science but life was the end of study. We remark no considerable achievement in metaphysics until the culminating period, both of Humanism and the Reformation, had passed away.

In 1455 the library of Pope Nicholas contained 824 Latin and 352 Greek manuscripts. In 1484, at the death of Sixtus IV, the Greek MSS. had increased to one thousand. From the catalogues we infer that much interest was taken in collecting the great Fathers, the canon law, and medieval theology. Nicholas owned the famous Vatican Codex (B) of Holy Scripture; Sixtus had in his possession fifty-eight bibles or parts of bibles. Cardinal Bessarion gave his magnificent stock of books to St. Mark's, Venice; and the Medicean Library, collected at Florence, where it still reposes (the Laurentian), was for a while transferred to Rome by Clement VII. At Basle the Dominican cardinal, John of Ragusa, left important Greek MSS. of parts of the New Testament, which were used by Reuchlin and Erasmus with advantage. These illustrations may suffice to indicate the movement, becoming universal throughout Catholic Europe, towards recovery from all sides of the treasures of the past. Another and most important step was to print that which had been so recovered. Printing was a German invention. The local ordinaries and religious houses favoured it greatly. Cloisters became the home of the Press; among them we may quote Marienthal (1468), St. Ulrich, at Augsburg (1472), the Benedictines at Bamberg (1474). Typography was introduced at Brussels in 1474 by the Brothers of the Common Life. They called themselves "preachers not in word but in type". And the early printed books in Germany were of a popular devotional, educational, and Biblical character.

To the Renaissance in its opening stage the honour belongs of scattering broadcast the printed Latin Vulgate as well as translations of it in most European languages, of course with approval from the Church. Ninety-eight complete editions of the Vulgate were

sent out before 1500; a dozen editions preceded the appearance in type of any Latin classic. The first book produced by Gutenberg was that exceedingly beautiful "42-line" Bible according to St. Jerome's version afterwards known as the Mazarine Bible and still extant in several copies. The first dated Bible came out at Mainz in 1462; the first Venetian, in 1475, was followed by twenty-one editions. The Hebrew text was printed at Soncino and Naples between 1477 and 1486; the Rabbinic Bible was dedicated at Venice to Leo X in 1517. Cardinal Ximenes renewed the labours of Origen by his Polyglot of Alcalá, 1514-22, which included the Greek New Testament. But Erasmus anticipated its publication by an indifferent text in 1516. Aldus printed the Septuagint in 1518. As regards translations on the Catholic side, they went on before and after Luther, from the Spanish of Boniface Ferrer in 1405 to the English of Douai in 1609. All these were printed; but space will not allow more than a reference to the details here, or to the changes in policy brought about, in consequence of heretical translations and the abuse of Scripture-reading, under Paul IV and the Council of Trent. During the period commonly assigned to the Renaissance at its height (1453-1527), freedom was the rule. Nicholas V had it in mind to make Rome the intellectual centre of the world. His successors entered largely into the same idea. Pius II (Piccolomini) was a man of letters, not unlike the great Erasmus. Paul II, though severe upon neopagans, such as Pomponazzo, did not condemn the Classical movement. Alexander VI was a statesman, not a scholar and not an Italian. The fierce and splendid Julius II, himself without culture, gave commissions to Raphael and Michelangelo, but openly despised the pedants about his court. From Leo X his age receives its title—he was "the incarnation of the Renaissance in its most brilliant form".

An extraordinary enthusiasm for antiquity had set in, combined with boundless freedom of opinion, with a laxity of morals which has ever since given scandal to believers and unbelievers alike, and with a festal magnificence recalling the days and nights of Nero's "golden house". The half-century which ends in the sack of Rome by Lutheran soldiers, however dazzling from a scenic point of view, cannot be dwelt on with satisfaction by any Catholic, even when we have discounted the enormous falsehoods long current in historians who accepted satires and party statements at their own value. Churchmen in high places were constantly unmindful of truth, justice, purity, self-denial; many had lost all sense of Christian ideals; not a few were deeply stained by pagan vices. The temper of ecclesiastics like Bembo and Bibbiena, shown forth in the comedies of this latter cardinal as they were acted before the Roman Court and imitated far and wide, is to us not less incomprehensible than disedifying. The earlier years of Æneas Sylvius, the whole career of Rodrigo Borgia, the life of Farnese, afterwards Paul III, until he was compelled to reform himself as well as the Curia, these all exhibit the union of subtlety, vigour, and other worldly qualities, with a disregard for the most elementary virtues, which leaves us in dumb and sorrowful amazement. Julius II fought and intrigued like a mere secular prince; Leo X, although certainly not an unbeliever, was frivolous in the extreme; Clement VII drew on himself the contempt as well as the hatred of all who had dealings with him, by his crooked ways and cowardly subterfuges which led to the taking and pillage of Rome.

Now, it is not unfair to trace in these popes, as in their advisers, a certain common type, the pattern of which was Cesare Borgia, sometime cardinal, but always in mind and action a *condottiere*, while its philosopher was Machiavelli. We may express it in the words of Villari as a "prodigious intellectual activity accom-

panied by moral decay". The passion for ancient literature, quickened and illustrated when the buried classic marbles were brought to light, simply intoxicated that generation. Not only did they fall away from monastic severities, they lost all decent and manly self-control. The survivors of a less corrupt age, as Michelangelo in his sonnets, remind us that native Italian genius had done great things before this new spirit took possession of it. But there is no denying that in its triumphant days the Renaissance looked up to beauty, and looked away from duty, as the standard and the law of life. It had neither eyes nor sense for the beauty of holiness. When it is called "pagan" we mean this corrupting anarchic influence, represented more gracefully by genuine poets and men of letters like Politian, more grossly by such licentious singers as Lorenzo de' Medici, by Poggio, Bandello, Aretino, and a thousand others who declared that the morals of Petronius Arbiter were good enough for them. When Savonarola in 1475 fled to the Dominican cloister at Ferrara, and there composed his lament on "the ruin of the Church", he cried out: "The temple is fallen, and the house of chastity." But the earthquake had not yet come. Worse things were to happen than he had seen. And a catastrophe was inevitable, of which he would be the prophet in St. Mark's, Florence, sent to a partly credulous and a still more exasperated world.

Savonarola (1453-98), Erasmus (1466-1536), and Sir Thomas More (1478-1535) may be taken as figures in what has been sometimes called the Christian Renaissance. They represent beyond question the mind of the Church concerning those ancient authors, not sacrificing faith to scholarship, or Holy Writ to Homer and Horace, while they allow to culture its province and its privileges. Such was to be the lasting concordat between divinity and the humanities, but not until paganism had robbed Italy of its independence, after the popes had set their house in order, and the Society of Jesus had been entrusted with the education of youth. On the strength of his protest against the unseemly and degrading literature which abounded in his time, Savonarola was condemned as a Puritan; his "burning of the vanities" in 1497 has been cited in proof; and he employed scathing language (see the Letter to Verino, 1497) that may be strained to this conclusion. But among his penitents were artists, poets, and learned men: Pico della Mirandola, Fra Bartolommeo, Botticelli, Michelangelo. The friar himself bought for St. Mark's at a heavy charge the famous Medicean Library; and every candid reader will perceive in his denunciation of current books and paintings an honest Christian's outcry against cancerous vices which were sapping the life of Italy. When we come to Erasmus, no fanatic assuredly, we discover that he too made a difference between clean and unclean. Erasmus laughed to scorn the Ciceronian pedantries of Bembo and Sadoleto; he quotes with disgust the paganizing terms in which some Roman preachers travestied the persons and scenes of the Gospels. He had a zeal for the inspired Word, and his Greek and Latin New Testament was the chief literary event of the year that saw its publication. He edited St. Jerome with minute care (1516); he did something for the chief Latin Fathers, and not a little for the Greek. In his preface to St. Hilary this true scholar commends all learning, old or new, but he would have its proper value given to each department from the Scriptures even to the Schoolmen. His "Praise of Folly" and other satirical writings were an attack, not upon mediæval genius, but upon the self-confident ignorance which declaimed against good literature without knowing what it meant. So rare and indefatigable an appraiser of literary works in every form could not be insensitive to the merits of St. Augustine, however much he delighted in Virgil. The scholarship of Erasmus, given

to the world in a lively Latin, was universal and often profound. It was also honestly Christian; to make Holy Scripture known and understood was the supreme purpose he kept in view. And thus the "prince of humanists" could remain Catholic, while looking for a moral restoration, during the whirlwind of Luther's revolt. In him the Renaissance had cast away its paganism.

His friend, Sir Thomas More, a liberal scholar, a saint, and a martyr, proved by the enchanting courtesy of his daily converse and by the simple, almost ironical heroism which he displayed on the scaffold, how antique learning and Catholic virtue might combine in the loftiest of ideals. More's "Utopia" won a place by itself, which it still keeps, far above the imitative and passing literature of those Latin versifiers, those vain rhetoricians, who at best were scholiasts, but too commonly wasted their small talents in feebly reproducing the classic themes and metres. The English chancellor took a firm grip of social and religious problems, not so much regarding theory as intent on reform according to Catholic principles. He wrote Latin with greater force than elegance; his works in the vernacular have salt and savour, wit and idiom, to commend their orthodoxy. In the same category of Christian humanists we may associate with More a goodly number of Englishmen, from the Benedictines, Hadley and Selling, who were students at Padua in 1464, to Grocyn, Linacre, Colet, Fox, and the martyred Cardinal Fisher.

In Germany the first stages of revived learning had been free from Italian dissoluteness and heathen doctrines. Cardinal Nicholas of Cusa reformed the Church, while promoting philosophy by his own speculations and collecting manuscripts. Rudolf Agricola (1443-85) united the study of the ancients with devotion to Holy Scripture; von Langen, consummate Latinist, remodelled the schools of Westphalia; he was cathedral provost at Deventer. The illustrious Wimpheling, born in 1450, taught education in principle and practice on orthodox lines. He was Reuchlin's master, a genuine scholar, zealous against the newly-imported unchristian ways of the so-called "poets"; and when Luther rose up, Wimpheling opposed him as he had opposed the encroachments of Roman Law. With Reuchlin we are plunged into debate and controversy; but he, too, was sincerely religious, and in 1516 he triumphed at Rome over his adversaries, gaining thereby a victory for Hebrew erudition, which in other ways the popes had taken into favour. Many Humanists, by and by, made common cause with the Reformation; Melancthon, Zwingli, Calvin, were eminently learned. But the Renaissance never was absorbed into any theological movement; reforming zeal scattered libraries, emptied universities, and too often threw back education, until its first fury was spent. The spirit of which Puritanism is a complete expression had no affinity with Classic literature; at its touch the world of art, of dramatic poetry, of painting, sacred or secular, of Humanism in life and outside of schoolbooks, fell into dust. Heine (Ueber Deutschland) saw that the Reformation was, in effect, a Teutonic answer to the Renaissance; and we now perceive that, while the dogmas of Luther and Calvin have lost their hold upon men's hearts, the revival of letters is broadening out into a transformation of democracy by means of culture: *hic labor, hoc opus*; the question how to reconcile a perfectly-equipped human life with an ascetic religion and the demands of freedom for all, is one which none of the Reformers contemplated, much less did they succeed in resolving it.

Among Frenchmen, to whom we owe the word *renaissance*, that problem was not mooted at first. The Italian, Aleandro, coming to Paris in 1508,

gave lectures in Greek, Latin, and Hebrew. He was made rector of the university. Aleandro became a strenuous opponent of Luther; and the Sorbonne is charged by Mark Pattison with persecuting the great printer, Robert Estienne (1503-59), though he always obtained licence to sell his bibles and testaments. The Sorbonne objected, however, to any publication of Scripture without approved Catholic notes; and this in a day which might be justly termed one of rebuke and blasphemy. France had its own type of Humanist in that extraordinary man, Rabelais (1490?-1553), a physician, priest, and obscene jester whose book is the glory and the shame of his native tongue. Rabelais, treating the Christian religion as a creed outworn, falls back upon a kind of liberal Platonism; he would leave men to their instincts and the joy of life. Much the same philosophy, though in graver tones, is insinuated by Montaigne (1533-92) in essays tinged with scepticism and disenchantment. These two writers, who lie beyond the spring-tide of the revival, open in France the anti-Christian war which has lasted, with growing violence, down to our time. But the seventeenth century witnessed an adaptation of the classical forms to literature and preaching by Catholics of genius, by Pascal, Bossuet, Racine, and Fénelon, which yielded a highly original blending of religion with eloquent prose and refined verse. In general, nevertheless, we shall probably allow Taine's contention that the influence of the Classics (Latin rather than Greek always) on French education has not been favourable to Christianity.

At Rome an "incredible liberty" of discussion prevailed under the spell of the Renaissance. Lord Acton quotes well-known instances. Poggio, the mocking adversary of the clergy, was for half a century in the service of the popes—Filelfo, a pagan unabashed and foul, was handsomely rewarded by Nicholas V for his abominable satires. Pius II had the faults of a smart society journalist, and took neither himself nor his age seriously. Platina, with whom Paul II quarrelled on political grounds, wrote a vindictive slanderous book, "The Lives of the Roman Pontiffs", which, however, was in some degree justified by the project of reformation in "head and members" constantly put forth and never fulfilled until Christendom had been rent in twain. Yet Sixtus IV made Platina librarian of the Vatican. It is equally significant that "The Prince", by Machiavelli, was published with papal licence, though afterwards severely prohibited. This toleration of evil bore one good consequence: it allowed historical criticism to begin fair. There was need of a revision which is not yet complete, ranging over all that had been handed down from the Middle Ages under the style and title of the Fathers, the Councils, the Roman and other official archives. In all these departments forgery and interpolation as well as ignorance had wrought mischief on a great scale.

In 1440 Lorenzo Valla counselled Eugenius IV not to rely upon the Donation of Constantine, which he proved to be spurious. Valla's tract was printed by Ulrich von Hutten; it became popular among Germans, and influenced Luther. But it opened to this enemy of the temporal power a place in the household of Nicholas V. For another commencement of criticism we are indebted to the same unpleasant but sharp-sighted man of letters. It was Valla who first denied the authenticity of those writings which for centuries had been going about as the treatises composed by Dionysius the Areopagite. Three centuries later the Benedictines of St. Maur and the Bollandists were still engaged in sifting out the true from the false in patristic literature, in hagiology, in the story of the foundation of local churches. Mabillon, Ruinart, Papebroch, and their successors have cleared the ground for research into the Chris-

tian origins; they have enabled divines to consider a theory of development, the materials of which were hopelessly confused when Valla tilted against the Donation itself, accepted and deplored as a fact by Dante. How great that confusion was, the Benedictine editions of the Fathers, which largely put an end to it, abundantly show: the "authentic and necessary evidences of historical religion" could not be given their full value until this work was done. It called for a disposition at once literary and critical, which the old method of training did not create and scarcely would tolerate. But this chapter falls outside the limits of our subject.

It is remarkable that the healthy Christian use of ancient literature was destined to be taught by a Spanish reforming saint, himself not learned and certainly no *dilettante*. This was Ignatius Loyola, whose antecedents did not promise him the inheritance which Bembo and the other Ciceronian pedants had turned to such ill account. St. Ignatius, who began his order in Paris, who walked the same streets with Erasmus, Calvin, and Rabelais, did the most astonishing feat recorded in modern history. He reformed the Church by means of the papacy when sunk to its lowest ebb; and he took the heathen Classics from neo-pagans to make them instruments of Catholic education. Spain had been but little affected by the Renaissance. In temper crusading and still medieval, its poetry, drama, theology, were distinguished by qualities peculiarly its own. The Italian manner had not yet found imitators at its court when Ignatius wrote chivalrous sonnets to an unknown lady. His intensely practical turn of mind led him to employ every talent in the Divine service; and he saw that learning, if it could be cleansed from its present stains, would not only adorn but defend the Holy Place. He had looked into the lighter productions of Erasmus; they gave him a shock; but he recognized the power, if not the charm, which Humanism wielded over young imaginations. His militant company took up again, without distinctly perceiving it, the task that Erasmus intended and Petrarch had set before Italians two hundred years previously.

In May, 1527, Rome was laid waste, its churches profaned, its libraries pillaged, by a rabble of miscreants. "But", said Cardinal Cajetan, "it was a just judgment on the Romans." The pagan Renaissance fell, stricken to death; it was high time for the Counter-Reformation (q. v.) to begin. The Council of Trent and the Society of Jesus took in hand to distinguish between what was permissible and what was forbidden in dealing with literature. The Roman Index was established by Paul IV. A rigorous censorship watched over the Italian printing press. By 1600 German importation of books across the Alps had ceased. If we would reckon the greatness of the change now wrought, we may compare the "Orlando Furioso" of Ariosto, dedicated in 1516 to Cardinal Ippolito d'Este, with Tasso's "Gerusalemme", especially as revised by the poet himself, and at the dictation of the Roman censor, Antoniano. It was a change so marked that Scaliger termed the Italians generally hypocrites; but we know from the calendar of saints at this time and other sources how much had been done to check the wild licence of thought and speech in the Peninsula. Giordano Bruno, renegade and pantheist, was burnt in 1600; Campanella spent long years in prison. The different measures meted out to Copernicus by Clement VII and to Galileo by Paul V need no comment. The papacy aimed henceforth at becoming an "ideal government under spiritual and converted men". Urban VIII was the last who could be deemed a Renaissance pontiff (1623-44).

St. Ignatius, alive to the causes which had provoked many nations into revolt from the clergy, made learn-

ing, piety, and obedience governing principles in his plan of reform. The old system of arts and teaching was already growing obsolete, previous to 1450. Humanism had begun to take the place of Scholasticism. Vittorino da Feltre (1378-1446), a devout layman, set up his classes at Mantua in 1435 on the basis of good Latin, including poetry, oratory, Roman history, and Stoic discipline. He gave an all-round training, social, physical, religious. At Venice and Ferrara his friend Guarino (1370-1460) was another eminent schoolmaster, mighty in Greek. We have seen how Erasmus by example and by criticism advanced the cause of literature, which was henceforth acknowledged as the proper subject of a liberal education. A gentleman—the *cortegiano* whom Castiglione described—ought to be proficient in the language of antiquity; such was the idea of the public school everywhere; and such it remains in England to this day. The Jesuit Order, springing up after 1530, not founded on the tradition of Benedict or Dominic, adopted this view, and their "Ratio Studiorum" (1599) was, in consequence, a literary classical scheme. The first of their colleges arose at Coimbra (1542); in Paris they had the Hôtel de Clermont; in Germany they began at Ingolstadt. The German College at Rome, due to St. Francis Borgia, like the Roman College of the Society itself, the English and other houses governed by them, attested their zeal for learning and their success in controversy. The Fathers were always cultivated men; they taught "a good silver Latin"; and they wrote with ease, though scarcely with such idiomatic vivacity as we admire in Erasmus and Joseph Scaliger. Soon they possessed a hundred houses and colleges; "For nearly three centuries", says a recent critic, "they were accounted the best schoolmasters in Europe." Bacon's judgment can never be passed over: "As for the pedagogical part, the shortest rule would be, consult the schools of the Jesuits; for nothing better has been put in practice" (De Augment., VI, 4). They established free day-schools, devised new schoolbooks, expurgated objectionable authors, preached sound doctrines in a clear Latin style, and bestowed even upon the technicalities of medieval logic a certain grace. Some, like Mariana, wrote with native power in the classic forms. But their most telling man in the field of theology is Petavius, who belongs to France and the seventeenth century. His large volumes on the Fathers may be compared in point of language with Calvin's "Institutes" and the "Augustinus" of Jansen. They discard the method familiar to Scotus and St. Thomas; they furnish to some extent criticism as well as history. And they suggest the development of dogma with an approach to its philosophy, which neither Bossuet nor Bull could quite comprehend.

All these things form part of "that matured and completed Renaissance" whereby the evil was purged out which had made it perilous in the same degree to faith and to morals. Nicholas V and other popes did well in not refusing to add culture, even the finest of the Greek, to religion. Their fault lay in the weakness which could not resist pagan luxury and a frivolous dilettantism. Now serious work was undertaken for the good of the Church. Gregory XIII reformed the calendar; the text of the canon law was corrected; under Sixtus V and Clement VIII the Latin Vulgate after years of revision attained its actual shape; and the Vatican Septuagint came forth in 1587. Baronius, urged by St. Philip Neri, brought out eleven folio volumes of "the greatest church history ever written". The Roman Breviary, enlarged and edited anew, was republished by authority of St. Pius V and Urban VIII.

But the Renaissance had indulged its "pride of state, of knowledge, and of system" with disastrous consequences to our Christian inheritance. It trampled on the Middle Ages and failed to understand

that in them which was truly original. The Latin of Cicero which Urban VIII cultivated, the metres of Horace, did grievous wrong to the prose and verse of our church offices, so far as they were altered. The showy architecture now designed, though sometimes magnificent, was not inspired by religion; before long it sank to the rococo and the grotesque; and it filled the churches with pagan monuments to disedifying celebrities. In painting we descend from the heaven of Fra Angelico to the "corregiosity" of Corregio, nay, lower still, for Venus too often masquerades as the Madonna. Christian art became a thing of the past when the Gothic cathedral was looked upon as barbarous even by such champions of the Faith as Bossuet and Fénelon. Never did a poet inspired by Renaissance models—not even Vida nor Sannazzaro—rise to the sublimity of the "Dies Iræ"; never did that style produce a work equal to the "Imitation". Dante triumphs as the supreme Catholic singer; St. Thomas Aquinas cannot be dethroned from his sovereignty as the Angelic Doctor, still, as regards faith and philosophy, he is the true "master of those that know". But Dante and St. Thomas lived before the Renaissance. It was not large or liberal enough to absorb the Middle Ages. Hence its failure at the beginning as a philosophic movement, its lack of the deepest human motives, its superficiality and its pedantries; hence, afterwards, its fall into the commonplace, and the extinction of art in vulgarity, of literature in empty rhetoric. Hence, finally, the need of a French Revolution to teach it that life was something more serious than a "Carneval de Venise", and of Romanticism to discover, among the ruined choirs and in the neglected shrines which men had scornfully passed by, tokens of that mighty medieval genius, Catholic, Latin, Teuton, and French, misunderstanding of which was the folly, and the spoiling of its achievements the crime, that we must charge upon the Renaissance in the day of its power. "It remained for a later age", says one who glorified it, "to conceive the true method of effecting a scientific reconciliation of Christian sentiment with the imagery, the legends, the theories about the world, of pagan poetry and philosophy" (Pater, "Renaissance", 49). Not less did it become the task of Goethe, Scott, Chateaubriand, Ruskin, of Friedrich Schlegel and the best German critics, to show that European culture, divorced from the Middle Ages, would have been a pale reflection of dead antiquity.

WILLIAM BARRY.

Renaudot, EUSEBIUS, an apologetical writer and Orientalist, b. at Paris, 22 July, 1648; d. there, 1 Sept., 1720. He was educated by the Jesuits, and joined

the Oratorians in 1666, but owing partly to ill-health, forthwith left them and never received more than minor orders. His extraordinary native talent and love of study enabled him to become an able liturgical writer, one of the greatest Orientalists of his time, and a trustworthy political adviser. One of the prominent men of the reign of Louis XIV, he enjoyed the friendship of numerous literary and political celebrities, among others Bossuet, whom he supported in the controversies with Richard Simon, Fénelon and the Jesuits. Towards the last he assumed the unfriendly attitude of the Gallican and Jansenist. Numerous high distinctions were conferred upon him, among them membership in the French Academy (1689), the Academy of Inscriptions (1691), and the *Accademia della Crusca* of Florence. Most of his writings were prepared not merely for the extension of scientific knowledge, but also in defence of the Catholic Church. Among them are contributions to "Perpétuité de la foi", a work published by Nicole and Antoine Arnauld against the Calvinists, the fourth and fifth volumes of which are entirely due to Renaudot's pen (Paris, 1711, 1713). He published, moreover, "Défense de la perpétuité de la foi" (Paris, 1708); "Gennadii Patriarchæ Constantinopolitani Homiliae de Eucharistia" (Paris, 1709); "Historia Patriarcharum Alexandrinorum" (Paris, 1713); "Liturgiarum orientalium collectio" (Paris, 1715-16); "Anciennes relations des Indes et de la Chine" (Paris, 1718). His opinion of

alleviation of poverty. He was named physician in ordinary to the king (1612) and in 1617 obtained the privilege of founding an intelligence office where poor people might make known their needs, free of charge, and inquire as to places where work could be had, and where charitable people could learn the names of the deserving poor. In 1618, he received the title of commissioner-general to the poor of the kingdom. In

GUIDO RENI
Self-portrait, Uffizi Gallery, Florence

1628, after the surrender of La Rochelle, he became a Catholic and from this time, thanks to the help of Richelieu, his charitable activity was most fruitful. Renaudot added to his intelligence office a pawn-shop and an auction-house. On 30 May, 1631, he established a weekly, the "Gazette de France", in which he defended the politics of Richelieu. About 1632, he created in his intelligence office weekly conferences which constituted a kind of free school of medical sciences. Finally, dating from 1640, he inaugurated free consultations for the sick, in which he was assisted by fifteen physicians, and free visiting physicians. He published "La présence des absents" (1642), the first treatise in France on diagnosis, and which aimed at permitting sick persons at a distance from all medical aid to describe their symptoms to the physician. In 1640, the medical faculty of Paris wished to forbid him to practise; it relied upon Parliament, which was hostile to Richelieu, and a pamphlet of Guy Patin violently attacked Renaudot. Louis XIII by a decree of 14 July, 1641, decided in favour of Renaudot, but after the deaths of Richelieu and

Renaudot, Théophraste, b. at Loudun, 1586; d. at Paris, 25 October, 1653. Doctor of the medical faculty at Montpellier in 1606, he travelled in Italy in order to study the workings of the pawn-shop (*mons pietatis*) in that country. On his return to France, Leclerc du Tremblay, known as Père Joseph, summoned him to court to explain his theories on the

Louis XIII, his enemies renewed their attacks, pretending that he had accused Louis XIII of favouring Lutheranism and that he had calumniated Anne of Austria. The provost of Paris at the end of 1643, and Parliament in 1644, prohibited him from the practice of medicine, and the medical faculty, 4 June, 1644, officially inaugurated another system of free consultations. Renaudot was, nevertheless, a pioneer in relief work for the poor, journalism, and medicine. The medical theories which he had held against the medical faculties of his times in favour of the use of antimony, laudanum, and quinine, have prevailed

since his death. During the last years of his life he devoted his time wholly to the "Gazette".

GEORGES GOYAU.

Reni, GUIDO, Italian painter, b. at Calvenzano near Bologna, 4 Nov., 1575; d. at Bologna, 18 Aug. 1642. At one time a memoir of Guido would have exalted him to the very highest position, especially if it had been written in England, for his works were very much in demand among art connoisseurs. His pictures fetched vast sums, and were held in the highest esteem by the collectors who knew nothing of and cared less for the works of the earlier Italian painters such as Gentile da Fabriano and Fra Angelico. Now for the time the works of this great craftsman are under a cloud, and his extraordinary powers of composition and conception, and his skill of draughtsmanship, are in danger of being overlooked by reason of an entire change of fashion. In his early days he was a colourist of great purity, a composer with dramatic force, regarded as one of the greatest masters of his time, and surrounded by pupils; but later on, his very success proved his undoing, and the pictures of his maturity and old age, though marked by facility and skill, evidence a certain monotonous melodrama and a thinness of impasto which has not tended to their permanency.

He was educated first by Calvaert, later on with the Carracci, and for a while with Ferrantini. He worked with Annibale Carracci in Rome, assisted in the decoration of the Farnese Palace, the Quirinal Palace, several of the churches of Rome, and a chapel for the Borghese family, but his greatest painting in that city is undoubtedly the ceiling decoration of the Palazzo Rospigliosi—Phœbus and the Hours preceded by Aurora. He painted also in Bologna, and commenced what probably would have been his masterpiece in Naples. His works can be studied in Dresden, St. Petersburg, Genoa, Vienna, and especially in England, as many of the famous houses of that country, such as Stafford House, Bridgewater House, Lowther Castle, Blair Castle, Kingston Lacy, Burghley House, Alton Towers, Charlton Park, Cobham Park, Narford Hall, and Windsor Castle, contain important works by him, while in Italy we find his paintings in Lucca, Milan, Modena, Padua, Pisa, Perugia, Ravenna, Siena, Turin, Venice, and elsewhere. He was a man of great energy, but unfortunately of considerable self-conceit, and of prodigious activity. He was a skilful engraver and etcher; he worked in silver point and in pastel, painted ceilings and walls in fresco, and numberless panel pictures. In his own time he was perhaps the most popular artist in Italy, and in the eighteenth century occupied a similar position in England. Presently his work will be more appreciated for its own sake than it has been, his faults will be more clearly noticed, and his excellencies have a greater value. Our principal source of information respecting him is a MS. by Oretti in the library in Bologna, from which all authors have taken material, but it has never itself been printed. There are at present two books in hand on this painter, but neither of them are sufficiently complete to be worth quoting.

GEORGE CHARLES WILLIAMSON.

Rennes, ARCHDIOCESE OF (RHEDONENSIS), includes the Department of Ille et Vilaine. The Concordat of 1802 re-established the Diocese of Rennes which since then has included (1) the ancient Diocese of Rennes with the exception of three parishes given to Nantes; (2) the greater part of the ancient Diocese of Dol; (3) the greater part of the ancient Diocese of St. Malo; (4) ten parishes that had formed part of the ancient Diocese of Vannes and Nantes. On 3 January, 1859, the See of Rennes, which the

French Revolution had desired to make a metropolitan, became an archiepiscopal see, with the Dioceses of Quimper, Vannes, and St. Brieuc as suffragans. Cardinal Place obtained from Leo XIII permission for the Archbishop of Rennes to add the titles of Dol and St. Malo to that of Rennes. Rennes was the capital of Brittany. Under the Roman Empire Brittany had formed part of the province of Tertia Lugdunensis (Third Lyonnaise), but from 383 to 509 it was an independent kingdom; afterwards, under the Merovingians, it ranked as a countship. The Kingdom of Brittany, founded by Nomenoe about 845, was shortlived, and after 874 Brittany was parcelled out among a number of counts, the most important of whom was the Count of Rennes. In 992 Geoffrey I, Count of Rennes, took the title of Duke of Brittany. The solemn and final union of Brittany with France was the result of the marriage of Francis I to Claudia of France, daughter of Anne of Brittany and Louis XII. Tradition names as first apostles of the future Diocese of Rennes, missionaries of the Latin race, but of an uncertain date: SS. Maximinus, Clarus, Justus. On the other hand, when in the fifth and sixth centuries bands of Christian Britons emigrated from Great Britain to Armorica and formed on its northern coast the small Kingdom of Domnonée, the Gospel was preached for the first time in the future Dioceses of Dol and Aleth. Among these missionaries were St. Armel, who, according to the legend, founded in the sixth century the town of Ploermel in the Diocese of Vannes and then retired into the forests of Chateaugiron and Janzé and attacked Druidism on the very site of the Dolmen of the Fairy Rocks (La Roche aux Fées); St. Méen (Mevennus) who retired to the solitudes around Pontrecoët and founded the monastery of Gael (550), known afterwards as St. Méen's; St. Lunarius and St. Suliaeus who dwelt in the woods along the banks of the Rance, and Sts. Samson and Malo.

I. DIOCESE OF RENNES.—The earliest historical mention of the See of Rennes dates from 453. One of the four prelates, Sarmatio, Chariato, Rumoridus, and Viventius who in that year took part in the Council of Angers, was Bishop of Rennes. One Athenius, Bishop of Rennes, took part in the Council of Tours in 461. Mgr Duchesne is of opinion that the St. Amandus reckoned among the bishops of Rennes at the end of the fifth century is the same as St. Amand of Rodez. Among other bishops are the famous St. Melanius (Melaine) who in 511 assisted at the Council of Orléans and had a widespread reputation for sanctity. He gave his name to a well-known abbey, which in the twelfth century possessed no less than seventy parish churches. Famous among the annals of Rennes are: St. Desiderius (Didier) whose episcopate is questioned by Mgr Duchesne (c. 682); St. Moderamnus (Moran) who died about 730 in the monastery of Berceto near Lucca; Marbodius, the hymnographer (1096–1123); the Dominican Yves Mayeuc (1507–41); Arnaud d'Ossat (1596–1600), cardinal in 1599, and prominent in the conversion of Henry IV; Godefroy Brossais Saint Marc (1848–78), cardinal in 1875; Charles Place (1878–93), cardinal in 1886; Guillaume Labouré (1893–1906), cardinal in 1897. Le Coz (1760–1815) during the Revolution was constitutional Archbishop of Rennes. Under the Concordat he became Archbishop of Besançon. In the Middle Ages the Bishop of Rennes had the privilege of crowning the dukes of Brittany in his cathedral. On the occasion of his first entry into Rennes it was customary for him to be borne on the shoulders of four Breton barons.

II. DIOCESE OF ST. MALO.—The monk Malo (d. about 600) at the end of the sixth century came from Wales at the head of a band of emigrants and founded two monasteries on the coast near the

Roman post of Aleth. Two legendary biographies of him which date from the ninth century make him the first Bishop of Aleth. The biography of King Saint Judicael, written in the eleventh century, mentions as a contemporary of the king, a Saint Maelmon, Bishop of Aleth. Local breviaries of the fifteenth century, mention three bishops prior to Maelmon: Enogat, Gurval, and Coalfinit. In Mgr Duchesne's opinion one thing only is certain that the Diocese of Aleth existed in Charlemagne's time. The town of Aleth was destroyed by the Normans, and soon after 1141, the seat of the diocese was removed to the Isle of St. Aaron (so-called after a hermit who lived there early in the sixth century), on which stood the town afterwards known as St. Malo. This change was endorsed by Eugene III in spite of the protests of the monks of Marmoutiers who had a foundation on the island. Among the bishops of St. Malo are: Blessed John de la Grille (1144-63) under whom the see was transferred; William de Montfort (1423-32), cardinal in 1426; William Briconnet (1493-1513); Harlay de Sancy (1632-46).

III. DIOCESE OF DOL.—The Life of St. Samson, which cannot be of earlier date than the seventh century, mentions the foundation of the monastery of Dol by St. Samson. He was doubtless already a bishop when he came from Great Britain to Armorica, and it is he perhaps who assisted at the Council of Paris between 561 and 567. But in the biography there is nothing to prove that he founded the See of Dol or that he was its first bishop. In the twelfth century, to support its claim against the Metropolitan of Tours, the Church of Dol produced the names of a long list of archbishops: St. Samson, St. Magloire, St. Budoc, St. Gènevée, St. Restoald, St. Armel, St. Jumaël, St. Turian. Mgr Duchesne discounts and doubts this list. He is of the opinion that the abbey of Dol may have had at its head from time to time abbots with episcopal jurisdiction, but that Dol was not the seat of a diocese. Under Charlemagne and Louis the Pious, the Vicariate of Dol and the monastery of St. Méen were still included in the Diocese of Aleth; so that the first Bishop of Dol was Festianus (Festgen) mentioned for the first time between 851 and 857, and installed by King Nomenoë. Among the bishops of Dol are: Baudri (1107-30), author of a poem on the conquest of England by William the Conqueror; Alain, Cardinal de Coëtivy (1456-74), as legate of Callistus III, brought Charles VII to assist the Greeks against the Turks who were besieging Constantinople; Urban René de Hercé (1767-95), emigrated to England during the Revolution, but accompanied to Brittany the royalist troops who attempted to land at Quiberon. He was arrested with his brother, and shot at Vannes, 3 July, 1795. There was a struggle from the ninth to the eleventh century to free the Church of Brittany from the Metropolitan of Tours. It is important to consider the point closely.

From a comparison made by Mgr Duchesne between the Life of St. Conwoion, the "*Indiculus de episcoporum Britonum depositione*", and an almost completely restored letter of Leo IV, it would appear that shortly before 850, Nomenoë wishing to be anointed king, and finding opposition among the prelates of Brittany, sought to get rid of them by charging them with simony. Their only fault was perhaps that they demanded eulogia from their priests when the latter came to synods. After listening to a deputation of Breton bishops and to St. Conwoion, founder of the Abbey of St-Sauveur at Redon, who had been sent to Rome by Nomenoë, Leo IV declared that the charge of simony must be adjudicated by a competent tribunal of twelve bishops, and must be attested by seventy-two witnesses, thereby disputing Nomenoë's claim to a right to depose bishops. But Nomenoë did depose, and in a brutal manner, the four bishops of

Vannes: Aleth, Quimper, and St. Pol de Léon, and made seven dioceses out of their four; one of the new dioceses had its seat in the abbey of Dol and became straightway an archdiocese. The remaining two were in the monasteries of St. Brieuc and Pabu-Tutual (Tréguier). At the end of 850 or beginning of 851 the bishops of the four provinces of Tours, Sens, Reims, and Rouen, wrote a letter of reprimand to Nomenoë and threatened him with excommunication. He paid no heed to them and died 7 March, 851. Salomon, Nomenoë's second successor, requested Benedict IV in vain to regularize the situation of the Breton hierarchy. In the name of the Council of Savonnières (859) the seven metropolitans of the three kingdoms of Charles the Bald, of Lothaire II, and of Charles of Provence, wrote to the

THE CATHEDRAL, RENNES

Bishop of Rennes and to the bishops occupying the new Sees of Dol, St. Brieuc, and Tréguier, reproaching them with lack of obedience to the Metropolitan of Tours. This letter was not sent to the Bishops of Vannes, Quimper, Aleth, and St. Pol de Léon who wrongly occupied the sees of the legitimate bishops illegally deposed by Nomenoë. It achieved nothing. In 862 Salomon dealt directly with Nicholas I, and at first tried to mislead the pope by means of false allegations and forgeries; then he restored Felix of Quimper and Liberalis of Léon to their sees, but still kept Susannus of Vannes and Salocon of Aleth in exile. Nicholas I died in 867. Adrian II (867-72) and John VIII (872-82) continued to uphold the rights of the Metropolitan of Tours. Then came the deaths of Salomon and of Susannus, and a conciliatory mood developed. There was no formal act on the part of the Holy See recognizing Dol as a new metropolitan church; it never had control over Rennes or Nantes, and it was mainly over the new Sees of St. Brieuc and Tréguier that it exercised ascendancy. Finally in May, 1199, Innocent III restored the old order of things, and subordinated anew all Brittany to Tours but did not interfere with the diocesan boundaries set up by the daring Nomenoë, and they remained in force until the Revolution. The Bishop of Dol retained until 1789 the

insignia of an archbishop, but without an archbishop's privileges.

The pilgrimage of the Seven Saints of Brittany was a widespread devotion during the Middle Ages, and probably antedates the year 1000. Four times a year, at Easter, Pentecost, Michaelmas, and Christmas, crowds of pilgrims on foot paid within thirty days a round of visits to the seven sanctuaries, Dol, St. Brieuc, Tréguier, Léon, Quimper, Vannes, St. Malo. A paved road, that kept up an earlier line of Roman roads, was followed by these endless pilgrimages, whence arose the present custom of dedicating chapels to the Seven Saints. The ancient Abbeys of St. Melanien, St. Méen, Redon, and Paimpont, the abbeys of Canons Regular of Rillé (founded about 1143), of Montfort (founded about 1152) were very useful in restoring the parochial services after the disorders of the early Middle Ages. Two thirds of the churches in the territory date from the eleventh or twelfth century, and were built by the monks and Canons Regular. The war of succession of Brittany (1341-64) between Jean de Montfort and Charles de Blois has an interest for the ecclesiastical historian owing to the fact that Charles de Blois has the title of Blessed. Dom Plaine has shown that the origin of the pilgrimage of Bonne Nouvelle at Rennes had nothing to do, as was often supposed, with a victory of Jean de Montfort over Blessed Charles de Blois. Some of the saints connected with the Archdiocese of Rennes are: St. Mevennus or Méen, St. Armel, St. Sulinus (Suliac), son of Broguenard, Prince of Wales, Abbot of the monastery of St. Suliac (died in 606); St. Judicael (584-658), twice King of the Bretons, twice monk in the monastery founded by St. Méen, and founder of the abbey of Paimpont; St. Geldouin, canon of Dol (d. 1076 or 1077), who refused to become a bishop in spite of the appeals of Gregory VII; Venerable Robert d'Arbrissel, founder of the order of Fontevrault (d. 1117), a native of Arbrissel near Rennes; Blessed Ralph de la Futaye, founder about 1096 of the Abbey of St. Sulpice at Rennes, known originally as Our Lady of the Blackbirds; St. Yves (1253-1303), who held an official position in the Diocese of Rennes; Venerable John de St. Samson, blind from birth, a Carmelite of Rennes and the great Breton contemplative, died in 1636, leaving many writings of a mystical character; Ven. Pierre Quintin (d. 1629), a Dominican of Vitre, and one of the collaborators of Ven. Michel de Nobletz in his apostolate. Caradeuc de la Chalotais (1701-85), born at Rennes, procurator of Brittany, was one of the first magistrates to lead the way for the abolition of the Jesuits in France by his *comptes-rendus* of the constitutions of the Jesuits, read to the Parliament in Dec., 1761, and in May, 1762. Grimm said that the Jesuits might consider Le Chalotais as their destroyer in France.

Other natives of Rennes are the Benedictine Lobineau (1606-1727), famous for his "Histoire de la Bretagne" (1707), and the Jesuit philologist Tournemine (1661-1739). Jacques Cartier (1494-1552), the discoverer of Canada; the naval commander Duguay-Trouin (1673-1736), who took Rio de Janeiro in 1711; La Bourdonnais (1699-1753), another sailor who fought against the English in India; the writers Chateaubriand (1768-1848) and Lamennais (1782-1854) were natives of St. Malo. Duguesclin (d. 1380), famous during the Hundred Years' War, was born at Château de la Motte de Bron; the Château des Rochers where Madame de Sévigné lived (1626-96) is near Vitre.

The chief shrines of the archdiocese are: Notre-Dame des Miracles et Vertus, in St-Sauveur's at Rennes, a place of pilgrimage since the siege of Rennes by the English under the Duke of Lancaster in 1357; Notre-Dame de Bonne Nouvelle, at Rennes, a Dominican's shrine, a place of pilgrimage as early as

1466; Notre-Dame des Marais, at Fougères, dating from the tenth century, but particularly famous during the seventeenth century; Notre-Dame de Paimpont; Notre-Dame de la Peinière at Saint Didier, a pilgrimage from very early times. Before the application of the Associations Law in 1901 there were in the archdiocese: Eudists, Recollets, Lazarists, Carmelites, and several orders of teaching Brothers. Among congregations of women originating in the diocese are the Daughters of the Immaculate Heart of Mary, founded in 1640 by Mlle Morel du Verger for the care of incurables, with mother-house at Rennes; The Adoratrices of the Divine Justice, a teaching and nursing order with mother-house at Fougères; the Sisters of the Immaculate Conception, a teaching and nursing order founded in 1831 at St. Méen by Père Corvoisier; the Sisters of the Sacred Hearts of Jesus and Mary, known as Sisters of the Oaks, or of the Junior Schools, founded in 1850 by Amélie Fristel, a nursing and teaching order with mother-house at Paramé and branches at Halifax and Ste Marie in Canada; Little Sisters of the Poor, founded in 1842 at Rennes by Jeanne Jugan, Fanchon Aubert, Marie Jamet, Virginie Tredaniel under the guidance of Abbé Lepailleur, and installed through the efforts of Abbé Ernest Lelièvre in all parts of the world. Their mother-house at St. Pern in the Diocese of Rennes controlled in 1905 106 houses in France, 51 in Spain, 29 in England, 30 in America, 16 in Italy, 13 in Belgium, 4 in Africa, 3 in Oceania, 1 in Portugal, 1 in Turkey; 33,123 aged and infirm persons were cared for by 4475 sisters. At the close of the nineteenth century the religious congregations in the diocese had charge of 1 crèche, 31 nurseries, 1 home for infirm children, 1 deaf and dumb school, 5 orphanages for boys, 14 for girls, 34 hospitals or infirmaries, 18 district nursing homes, 2 retreat houses, 3 homes for incurables, 1 lunatic asylum. In 1909 the Archdiocese of Rennes numbered 621,384 souls in 60 parishes with 324 auxiliary parishes and 379 curacies.

GEORGES GOYAU.

Renty, GASTON JEAN BAPTISTE DE, b. 1611 at the castle of Beni, Diocese of Bayeux in Normandy; d. 24 April, 1649. The only son of Charles, Baron de Renty, and Elisabeth de Pastoureau, Gaston studied at the Collège de Navarre in Paris, with the Jesuits at Caen, and finished at the age of seventeen at the College of the Nobles in Paris. He wrote several treatises on mathematics in which he excelled. The reading of the Imitation of Christ aroused the desire to become a Carthusian, but obeying the wish of his parents, he married. In 1638 he abandoned public life and devoted himself to the service of the needy and suffering. Struck by the ignorance, in religious matters, of the travellers who found a night's rest at the Hospital of St. Gervaise in Paris, he gave them catechetical instructions and induced others to do likewise. In the course of his charitable works he made the acquaintance of Henry Michael Buch (b. 1590 in the Duchy of Luxembourg; d. 9 June, 1666 at Paris; surnamed *der gute Heinrich*) and induced him to found a congregation of shoemakers and tailors,

Frères Cordonniers. They worked honestly at their trade, divided their earnings with the poor and performed special acts of devotion prescribed by the pastor of St. Paul's. The statutes were approved by

FRANCIS MERSHMAN.

Renunciation (Lat. *renuntiare*), a canonical term signifying the resignation of an ecclesiastical office or benefice. It may be defined as the abdication of a clerical dignity made freely and spontaneously, for just reasons, into the hands of the legitimate superior who accepts it. Generally speaking, any ecclesiastic may renounce his dignity, whether his office be perpetual or temporal. To be valid, the resignation must be free, that is, not extorted by fear, or threats, or fraud. It must be made into the hands of the superior who had conferred it, that is of the pope for bishops and holders of major benefices; of the ordinary for parish priests and all incumbents of minor benefices. As to the pope himself, he may abdicate his dignity, but, as he has no earthly superior, his resignation must simply be declared canonically (see **ABDICATION**). Before a renunciation is canonically valid, it must be accepted by the legitimate superior, for otherwise it would work great detriment to the Church. Moreover, no one is at liberty to resign his office unless he is certain of revenues for his competent support. A resignation may be absolute or conditional. The latter term is used for renunciations that are made in favour of a third person, or with reservation of a pension, or when incumbents exchange benefices. The causes for which resignations are lawful are given in verse in the "*Corpus juris canonici*" (cap. x, "*de renunt.*", 1, 9);

Debilis, ignarus, male conscius, irregularis, Quem mala plebs odit, dans scandala, cedere possit. Therefore, one may justly resign on account of ill-health, want of proper knowledge, consciousness of guilt, clerical irregularity, ill-will of the people, or scandalous behavior.

WILLIAM H. W. FANNING.

Reordinations.—I. State of the Question.—The Oratorian Jean Morin, in the seventeenth century, and Cardinal Hergenröther, in the nineteenth, designated as "reordinations" the history of all ordinations which were considered null for any other reason than defect of the prescribed form or intention and which

were repeated. This means that if there were in fact reordinations corresponding to this definition they were unjustifiable because theology determines as the sole causes of nullity of the Sacrament of Holy orders defect of the prescribed form or intention. But in the course of the history of the Church other causes of nullity have been admitted in certain circumstances. It has been admitted that all or any sacraments administered or received *extra ecclesiam* (outside the Church) were null and had to be repeated. By the words *extra ecclesiam* is understood the situation of the minister or the Christian separated from the Church by heresy, or schism, or excommunication. At certain periods these separatists were considered so dangerous and were kept at such a distance that there was a tendency to deny them wholly or in part the power of conferring the sacraments. The maxim, "Out of the Church, no sacraments", was applied with more or less severity.

II. The Facts.—That this history is complex and difficult is shown by the action of the Council of Trent. The council declared as a truth of faith the doctrine affirming the validity of baptism administered outside the Church according to the prescribed form and intention; but the validity of confirmation and Holy orders conferred under the same conditions was not defined as a matter of faith, owing to the waverings and partial disagreements on these points of tradition revealed by the history of theology. The council was unwilling to give a definition that would place the doctrine of numerous writers in opposition to a teaching of faith. A good judge in these matters, Father Perrone, has written: "*Ordinationes ab illegitimo ministro peractas illicitas esse, nemo unquam theologorum dubitavit: utrum vero præterea irritæ, inanes ac nullæ habendæ sint, impatissima olim quæstio fuit, adeo ut Magister Sententiarum scribat: 'Hanc quæstionem perplexam ac pæne insolubilem faciunt doctorum verba, quæ plurimum dissensire videntur'*" (I, iv, dist. 25); *deinde profert quatuor sententias, quin ulli adhæreat. Monumenta ecclesiastica prope innumera pro utraque sententia, sive affirmante irritas esse eiusmodi ordinationes sive negante, stare videntur, cum res nondum eliquata esset. Nunc iam a pluribus sæculis sola viget S. Thomæ doctrina, cui suffragium accessit universæ ecclesiæ, ordinationes ab hæreticis, schismaticis ac simoniacis factas validas omnino esse habendas*"—That ordinations performed by an unlawful minister are illicit, no theologian ever doubted; but whether they are, moreover, to be regarded as null and void was of old a most intricate question—so much so that the Master of the Sentences writes: "This problem is rendered complex and almost insoluble by the statements of the doctors which show considerable discrepancy" (I, iv, dist. 25). He then presents four opinions, none of which he adopts. For each view—that which affirms and that which denies the nullity of such ordinations—there seemed to be innumerable evidences from church history, as long as the question was not cleared up. But for several centuries past, the teaching of St. Thomas alone has prevailed and is accepted by the whole Church, to the effect that ordinations performed by heretical, schismatical, or simoniacal ministers are to be considered as valid [*"Tractatus de ordine"*, cap. iv, n. 136, in Migne, "*Theologiæ cursus completus*", XXV (Paris, 1841), 55].

In the second half of the fifth century the Church of Constantinople repeated the confirmation and ordination conferred by the Arians, Macedonians, Novatians, Quartodecimans, and Apollinarists (Beveridge, "*Synodicon*", II, Oxford, 1672, *Annotationes*, 100). The Roman Synod of 769 permitted and even prescribed the repetition of orders conferred by the anti-pope Constantine ("*Liber Pont.*", ed. Duchesne, I, 408 sqq.). In the ninth century, during the

struggle with the chorepiscopi, the ordinations conferred by these prelates were often declared null. In 881-82 Pope John VIII prescribed the reordination of Bishop Joseph of Vercelli, who had been ordained by the Archbishop of Milan, then under the ban of excommunication. On several occasions the ordinations conferred by Pope Formosus were declared null and were repeated. After the eleventh century the discussions concerning simony gave new sharpness to the controversy about reordinations. Cardinal Humbert affirmed the nullity of simoniacal ordinations as did also the Synod of Girona (Spain) in 1078. In the strife between the emperors of Germany and the popes of the eleventh and twelfth centuries the power of ordination of schismatic bishops was discussed and denied in various ways (cf. Saltet, "Les réordinations", 205-412). In the thirteenth century the conditions for the validity of Holy orders were determined in such a way that since then all uncertainty has been excluded.

III. INTERPRETATIONS AND CONCLUSIONS.—The chief instances just cited and the attempts that have been made to justify them, constitute, from the theological standpoint, doctrinal deformations. It is not then surprising that these difficulties have sometimes, and even quite recently, been used as objections against the Church and the pope, especially by Anglicans, who are always sensitive on the question of ordinations. It is true that during these controversies the doctrinal authority of the popes was more than once involved. But to what extent? It is obvious that the decisions of the popes on these points did not possess the character required by the Council of the Vatican for definitions involving the sovereign authority of the pope in doctrinal matters. In the history of reordinations the authority of the popes is much less concerned than in the doctrine regarding the relations of the civil and ecclesiastical powers, in which, nevertheless, as theologians maintain, papal infallibility is not involved (cf. J. Fessler, "La vraie et la fausse infaillibilité des papes", Paris, 1873). The question as to the conditions for the validity of certain sacraments was one of those that caused serious divisions in the early Church. The popes cannot be held responsible for these lengthy controversies. In ancient times it was the whole Church that sought the solution of these great difficulties. At a time when ecclesiastical organization was only just beginning, the initiative, and the responsibilities as well, were heavy burdens for the great Churches and their heads. It was not only the tradition of Rome which at first was somewhat hesitant on certain aspects of this question, but that of the Church in general, and in this matter the tradition of Rome was incomparably more firm than that of all the other Churches. To accuse the Church in Rome in this matter is to accuse the Universal Church; and on this as on so many other questions the Anglican Church has an interest in common with the Roman Church. Old Catholics and Anglicans often bring charges against the Roman See, which, if they had the value that is claimed for them, would tell not only against the popes but also against the early Church and the Fathers. Against this manner of representing the state of theological tradition concerning the conditions for the validity of Holy orders, only they can raise objection who interpret in a strict sense the saying of Vincent of Lérins; "Quod ubique, quod semper, quod ab omnibus". But to defend this thesis is to undertake to show in tradition the absolute identity and the unchangeableness of the most essential Christian doctrines, a task which will readily appear impossible. History shows us in the life of the Church and in doctrine a movement between determined limits and the popes as regulators of this movement. To implicate the popes in the long history of these con-

troversies it must be proved that they failed in this task, which cannot be done.

LOUIS SALTET.

Reparation is a theological concept closely connected with those of atonement and satisfaction, and thus belonging to some of the deepest mysteries of the Christian Faith. It is the teaching of that Faith that man is a creature who has fallen from an original state of justice in which he was created, and that through the Incarnation, Passion, and Death of the Son of God he has been redeemed and restored again in a certain degree to the original condition. Although God might have condoned men's offences gratuitously if He had chosen to do so, yet in His Providence He did not do this; He judged it better to demand satisfaction for the injuries which man had done Him. It is better for man's education that wrong doing on his part should entail the necessity of making satisfaction. This satisfaction was made adequately to God by the Sufferings, Passion, and Death of Jesus Christ, made Man for us. By voluntary submission to His Passion and Death on the Cross, Jesus Christ atoned for our disobedience and sin. He thus made reparation to the offended majesty of God for the outrages which the Creator so constantly suffers at the hands of His creatures. We are restored to grace through the merits of Christ's Death, and that grace enables us to add our prayers, labours, and trials to those of Our Lord "and fill up those things that are wanting of the sufferings of Christ" (Col., i, 24). We can thus make some sort of reparation to the justice of God for our own offences against Him, and by virtue of the Communion of Saints, the oneness and solidarity of the mystical Body of Christ, we can also make satisfaction and reparation for the sins of others.

This theological doctrine, firmly rooted in the Christian Faith, is the foundation of the numerous confraternities and pious associations which have been founded, especially in modern times, to make reparation to God for the sins of men. Thus the Archconfraternity of Reparation for blasphemy and the neglect of Sunday was founded 28 June, 1847, in the Church of St. Martin de La Noue at St. Dizier in France by Mgr Parisis, Bishop of Langres. With a similar object, the Archconfraternity of the Holy Face was established at Tours, about 1851, through the piety of M. Dupont, the "holy man of Tours". In 1883 an association was formed in Rome to offer reparation to God on behalf of all nations. The idea of reparation is an essential element in the devotion of the Sacred Heart (see HEART OF JESUS, DEVOTION TO THE).

The Mass, the representation of the sacrifice of Calvary, is specially suited to make reparation for sin. One of the ends for which it is offered is the propitiation of God's wrath. A pious widow of Paris conceived the idea of promoting this object in 1862. By the authority of Pope Leo XIII the erection of the Archconfraternity of the Mass of Reparation was sanctioned in 1886.

T. SLATER.

Repington, (REFYNGDON) PHILIP, Cardinal-priest of the title of SS. Nereus and Achilleus, Bishop of Lincoln (1404-1419); died early in 1424. The place and date of his birth are uncertain, but he was educated at Broadgates Hall, Oxford, and became an Augustinian canon of St. Mary de Pré, Leicester. In his early life he was infected with Wyclifism, and was suspended at the Council of Blackfriars, 12 June, 1382, being excommunicated at Canterbury on 1 July. Recanting his heretical views, he was restored to the communion of the Church during the autumn of the same year. In 1394 he became abbot of his monastery, and was Chancellor of the University of Oxford for the years 1397, 1400, 1401 and 1402. On the accession of Henry IV he became confessor and chaplain to the king, with whom he lived in great intimacy, and on 19 Nov., 1404, he was appointed Bishop of Lincoln by papal provision, being consecrated on 29 March following. Pope Gregory XII created him a cardinal in Sept., 1408, but as the Council of Pisa on 5 June, 1409, deposed Gregory and annulled all his acts since May, 1408, Repington's cardinalate was invalidated until the Council of Constance, when he was reinstated. In 1419 Cardinal Repington resigned his bishopric, probably for court reasons, and this resignation was accepted by the pope on 21 November. The date of his death is unknown, but it occurred before 1 August, 1424, when his will was proved. His "Sermons on the Gospels" are extant in several MSS. in Oxford, Cambridge, and British Museum.

EDWIN BURTON.

Repose, ALTAR OF (sometimes called less properly sepulchre or tomb, more frequently repository), the altar where the Sacred Host, consecrated in the Mass on Holy Thursday, is reserved until the Mass of the Presanctified (see GOOD FRIDAY) on the following day. It is prescribed that the altar of repose be in the church and other than the one where Mass is celebrated. In the Mass on Holy Thursday two hosts are consecrated; after the consumption of the first, the second Host is placed in a chalice, which is covered with a pall and inverted paten; over the whole is placed a white veil, tied with a ribbon. This remains on the corporal in the centre of the altar till the end of Mass, when it is carried in solemn procession to the altar of repose, there to remain in the tabernacle or in an urn placed in a prominent position above the altar. Individual churches vie with one another in rendering these altars of repose with their respective chapels ornate in the extreme, with rich hangings, beautiful flowers, and numerous lights. Catholic piety has made Holy Thursday a day of exceptional devotion to the Blessed Sacrament, and the repository is the centre of the love and aspirations of the faithful. Mention of the altar of repose and the procession thereto is not found before the close of the fifteenth century. The reservation of the Consecrated Species in the Mass of Holy Thursday, spoken of in earlier liturgical works, was for the distribution of Holy Communion, not for the service on the following day.

Reprobation. See PREDESTINATION.

Reputation (PROPERTY IN). It is certain that a man is indefeasibly the owner of what he has been able to produce by his own labour out of his own material, employing his own resources. In much the same way his reputation, which is the outcome of his merito-

rious activity, is his property. To despoil him of this without adequate cause is to be guilty of formal injustice more or less grievous according to the harm done. It is a personal injury, a violation of commutative justice burdening the perpetrator with the obligation of restitution. Indeed St. Thomas, in attempting to measure the comparative malice of the sin of detraction, decides that whilst it is less than homicide or adultery it is greater than theft. This, because amongst all our external possessions a good name holds the primacy. Nor does it do to say that by wrongdoing, of whatever sort, a man forfeits such esteem as he may have hitherto won from his fellows. This statement is not true, not, at any rate, without qualification. If a man's sin is such as to affront the social organization itself, or is committed publicly, then his fair fame is destroyed and can no longer be reckoned among his assets. In this instance discussion of the evil deed implies no defamation. No damage can be wrought to what does not exist. We assume, of course, that reputation is the opinion held by many about a person's life and behaviour. If, however, a man has been guilty of some secret offence having nothing specially to do with society the case is far different. Then, barring the supposition in which it is necessary for the public welfare, our own, or another's defence, or even the culprit's good, we are not allowed to make known what is to his discredit. This teaching, as d'Annibale says, is quite certain; the reason for it is not so easy to assign. Perhaps it may be this: Character is a public thing. Such a one therefore is in peaceful possession of the esteem of the community. Granted that this is founded upon error or ignorance as to the actual conditions, still the isolated knowledge of one or other as to the real state of affairs confers no right to take from him the general favourable appreciation which he, as a matter of fact, enjoys. One who has injured another's reputation is bound to rehabilitate his victim as far as possible. If the statement was calumnious it must be retracted. If it was true, then some expedient or other must ordinarily be found to undo the harm. If as a result of the backbiting or slander there has followed, for example, the loss of money or position, this must be made good. It is probable that for the besmirching of reputation, as such, one is not obliged to make pecuniary compensation. This is so unless a judge of competent jurisdiction has so mulcted the traducer. In that case the tale-bearer or slanderer is bound in conscience to obey the judicial direction.

JOSEPH F. DELANY.

Requiem, MASSES OF, will be treated here under the following heads: I. Origin; II. Formulary; III. Colour of the Ornaments; IV. Conditions for celebrating; V. Rite; VI. Solemn Funeral Mass; VII. Mass in Commemoration of All the Dead; VIII. Mass *Post Acceptum Mortis Nuncium*; IX. Solemn Mass on the Third, Seventh, and Thirtieth Days, and on Anniversaries; X. High Mass; XI. Low Mass.

I. ORIGIN.—Requiem Masses are Masses that are offered for the dead. They derive their name from the first word of the Introit, which may be traced to the Fourth Book of Esdras, one of the Apocrypha, at the passage "Expectate pastorem vestrum, requiem æternitatis dabit vobis . . . Parati estote ad præmia regni, quia lux perpetua lucebit vobis per æternitatem temporis" (IV Esd., ii, 34, 35). It is also connected with a passage in Isaiah, "Et requiem tibi dabit Dominus semper, et implebit splendoribus animam tuam" (Is. lviii, 11). The Antiphon is from Psalm lxiv. The date of the adoption of this Introit is not well known, but it is found in the so-called Antiphonary of St. Gregory Comes of Albino (see the

edition Rome, 1691, p. 226). In that work, however, there are two other Introits for the Mass of the Dead, one of which is "Ego sum resurrectio et vita; . . . non morietur in æternum"; and the other, "Rogamus te, Domine Deus noster, ut suscipias animam hujus defuncti, pro quo sanguinem tuum fudisti: recordare Domine quia pulvis sumus et homo sicut fœnum flos agri." The religious idea that the soul is immortal made even the Jews hold that the just, after death, went to sleep with their fathers (cf. Gen., xlvii, 30; III Kings, ii, 10; II Mach., xii, 45), and Christians believed, with St. Paul, that they slept in Christ (I Cor., xv, 18). From the first centuries, therefore, prayers were offered that the dead might have eternal rest. Gregory of Tours (Glor. Mart., I, lxxv), speaking of a Christian woman who each day caused the Divine Sacrifice to be offered for her deceased husband, says: "Non diffusa de Domini misericordia, quod haberet defunctus requiem." And St. Ambrose (Ob. Valentiniani imp., n. 56) writes: "Date manibus sancta mysteria, pio requiem ejus poscamus officio." So originated the Introit of the Mass for the Dead.

II. FORMULARY.—The formulary of a mass consists of the liturgical texts that constitute the variable parts of the mass, namely the Introit, Prayer, Epistle, Gradual, and Tract, and sometimes also the Sequence, Gospel, Offertory, Secret, Communion, and Post-Communion. Now the Missal has four of these formularies: (1) *In commemoratione Omnium Defunctorum*; (2) *In die obitus*; (3) *In anniversario*; (4) *In missis quotidianis*; but the only variations among them are in the Prayer, the Epistle, and the Gospel. In the Paris Missal of Ventimille, reviewed by Quelen (ed. Le Clere, 1841), there are five formularies and many other Epistles and Gospels, all of which deserve to be considered, because they are all taken from the Scriptures and are very appropriate. Guyet, also (Heortol., IV, xxiii, 31), takes from other local uses several formulæ for the Introit, etc. for the dead. There is nothing to be said in regard to the Gradual or to the Communion of the Roman formulary. (In regard to the sequence "Dies iræ", see DIES IRÆ.) A few remarks may be made, however, in regard to the Offertory, concerning which many writers have published contrary views (cf. Merati in "Not. Gavanti", I, xii, 2). The words "Libera animas . . . de pœnis inferni et de profundo lacu" may easily be understood to refer to purgatory, or, like those that follow . . . "libera eas de ore leonis, ne absorbeat eas tartarus, ne cadant in obscurum", as also the last ones . . . "fac eas Domine, transire de morte ad vitam", they may bear the interpretation that is most in accord with history and with theology, i. e. the one given by Merati and by Benedict XIV (De sacrif. mis., II, ix, 4), cited by Granelas (Antiq. sacrament. eccl., p. 536). This Offertory is among the prayers that were formerly recited for the sick who were about to die, and was later adopted in the Mass, in the same manner as the Church is wont to pray, in Advent: "Rorate cœli desuper. Emitte agnum, Domine, dominatorem terræ. . . . O Adonai, veni ad liberandum nos", etc. . . . As, therefore, the Church refers these prayers to the time when the Prophets were longing for the promised Messiah, so, also, she refers the Offertory of the Mass for the Dead to the time when the soul has not yet left the body. The same pope cites also an explanation by Sarnelli (Epist., III, 62), which is accepted by Thiers (De superst., X, 15), and according to which these words would refer to the lake and to the dark place of purgatory; but the words "Fac transire de morte ad vitam" are opposed to this interpretation. The rubric after the fourth formulary of the Missal (*In missis quotidianis*) leaves the celebrant free to select the Epistle and the Gospel that he may prefer, and consequently there remain to be recited according to prescription only the Prayers, which must be selected

according to the indications of the Missal, in appropriate relation to the person for whom the Divine Sacrifice is offered.

The ceremonies of the Mass of Requiem are the same as those of the so-called "Mass of the Living", with the exception of a few omissions and variations indicated in title XIII of the Rubrics. The psalm "Judica me" is omitted at the beginning; this omission certainly bears a relation to the masses of Passion Time, in which that psalm is likewise omitted. It should be noted, however, that the omission on Passion Sunday is due to the fact that the psalm is said in the Introit, and could not be recited twice. As this psalm xlii was omitted in all the ferial masses of Passion Time, that omission was regarded as a sign of mourning, and accordingly became a characteristic of the Mass of Requiem, although the psalm itself is not at variance with the nature of this Mass. The two doxologies and the Alleluia, which are regarded as expressions of joy and festivity, are naturally omitted, to express mourning, although the Alleluia was formerly used in Masses of Requiem, as may be seen in the Antiphonary of St. Gregory mentioned above. (Cf. Cabrol, "Diction.", s. v., col. 1235.) With regard to the omission of the blessing of the water which is poured into the chalice, rubricists, taking it one from the other, say with Gavanti (Rubr. Mis., II, vii, 4, g.) "Non benedicetur aqua . . . quæ populum significat, . . . vel aqua hoc loco significat populum Purgatorii, qui jam est in gratia." But, admitting that the water which is mixed with wine represents the people, as Benedict XIV shows upon the authority of St. Cyprian (Sacr. Mis., II, x, 13), this mystic explanation does not show why the water should not be blessed. It seems more probable that the explanation for this practice should be sought in the principle, admitted in the Latin Rites, that, as an evidence of mourning, all signs of reverence and salutations are omitted, among them the blessing of objects and of persons, just as on Good Friday the blessing of the water, all obeisances and salutations, and the blessing of the people are omitted.

III. COLOUR OF THE VESTMENTS.—Requiem Mass should always be celebrated with black vestments and ornaments, black, in the Latin Rite, representing the deepest mourning; for, as the Church robes its ministers in black on Good Friday, to show its greatest grief, caused by the death of the Divine Redeemer, while it uses the mixed colour of violet during Passion Tide, so also, in celebrating the obsequies of the dead, it uses the colour of greatest grief. The one exception to the above rule was made by the Congregation of Rites (decr. 3177 and 3844), which prescribed that when the Blessed Sacrament is exposed on All Souls day, in the devotion of the Forty Hours, the colour of the vestments must be violet. In many places it was held that bishops and cardinals might use violet vestments for the Mass of Requiem; and this opinion was put into practice. It may have originated in the fact that a Mass celebrated by the bishop is considered more solemn than others; on the other hand, it may be that, as the violet vestments were not used prior to the thirteenth century, because Innocent III makes no mention of them (Mist. Miss., I, lxxv; P. L., 217), while black was used on penitential days, some bishops may have undertaken to substitute violet for black in the Requiem Mass also. This practice has received no authoritative sanction; and as the bishop, when officiating on a given day, must use vestments of the colour prescribed by the Rubrics for that day, there is no reason why he should make an exception for the Requiem Mass. And in fact, the cardinal who celebrates a solemn Mass for the dead in the pontifical chapel in the presence of the supreme pontiff, on occasions of the greatest solemnity, always uses black vestments.

IV. CONDITIONS FOR THE CELEBRATION OF REQUIEM MASSES.—The Mass of Requiem is by its very nature *extra ordinem officii*, according to the Rubric (Rubr. Miss.); that is, it has no relation to the Office of the day. From this point of view, the Mass of Requiem may be rightly considered a votive Mass. Now, according to the laws of the Church (Rubr. Miss. ante Mis. Vot.), votive Masses may not be celebrated "except for some reasonable cause" (*nisi rationabili de causa*), since "the Mass should, as far as possible, accord with the Office" (*quoad fieri potest Missa cum Officio conveniat*); and therefore neither may Requiem Masses be celebrated without reasonable motive; and this reasonable motive does not exist when the Mass is not to be offered for one, or several, dead, in particular, or for all the dead in general. For that reason, the custom that has grown up in our days, even in some of the Roman churches, of providing only black vestments in the sacristies on days of Semi-double, Non-festive, or Non-privileged, Rite, is not to be approved. It may be said, however, in justification of this practice, that at present alms for Masses are given, for the greater part, in behalf of the dead; yet it is true that many stipends are paid with the intention of obtaining special graces in behalf of the living, particularly at the sanctuaries to which the faithful resort to venerate the saints or the Blessed Virgin. The priest, however, who knows that he should offer the Mass in behalf of living persons, and not for the departed, has no reasonable cause to celebrate the Mass of Requiem, and therefore may not licitly celebrate it. This seems to be a rule without exception. That Masses which are said according to the Office of the day may be applied to the dead, is easily understood, since the formulary of the Mass is separable from the application of the Sacrifice itself. So, also, there is no doubt about the application of the merits of the Sacrifice to the living, even though the formulary be that of Requiem (cf. Buceroni, "Enchir. Mor.", 3rd ed., p. 282); but it is not licit, since the liturgical rules clearly and justly allow the reading of the Mass of Requiem only for the reason of its application to one or more of the dead.

There are other conditions for the celebration of the Requiem Mass; one is that the rite of the day should allow of the celebration; another that the celebrant be not obliged, by reason of his official position, to celebrate a Mass of the living. More will be said in regard to this impediment of the rite or of the solemnity of the day, when we come to speak of the various masses of Requiem. As to the impediment that arises from the celebrant's official charge, we may say at once that it can be either the obligation of saying the conventual Mass or that of saying the parochial Mass on a feast day. It is known that the conventual Mass, which should be celebrated by chapters, in cathedrals and in collegiate churches, is never to be omitted, since it is the chief and noblest part of the whole office (Benedict XIV, Constit., 19 Aug., 1744, n. 11); for which reason, if there should be but one priest at a collegiate church, it would be his duty to say the conventual Mass, even if the solemn obsequies of one deceased were to be celebrated, as the Ritual expressly provides (VII, i, 5). The same is to be said of the parochial Mass, which the parish priest is to celebrate *pro populo* on each feast day; for which reason, if there should be but one parish priest at a parish church on a feast day, and he should not be privileged to say more than one Mass, he may not celebrate the Mass of Requiem, even if it be a question of the obsequies of one deceased, *præsente cadavere*. The reason for this prohibition is the rigorous obligation that binds each parish priest to offer the Mass on feast days for his people, an obliga-

tion which, according to the Council of Trent (Sess. XXIII, I, de ref.), arises from the Divine precept, for him who has the care of souls "to offer sacrifices for the people" (*offerre sacrificia pro populo*). Benedict XIV (op. cit., n. 2) declares: "Eos, quibus animarum cura demandata est, non modum sacrificium Missæ celebrare, sed illius etiam fructum medium pro populo sibi commissio applicare debere", so that this is a common doctrine among canonists that has been confirmed at different times by the Congregation of the Council. Now if, in order to celebrate the Mass of Requiem, the Mass must be offered for the dead, and if there is only one Mass in a parochial church on a feast day which must be offered *pro populo*, it is manifest that this Mass may never be one of Requiem, but, on the contrary, as the Congregation of Rites has frequently declared, it must always be according to the Office of the feast. Also the Congregation of the Council (16 June, 1770, in Fesulana), being asked "An parochi in Dominicis aliisque festis diebus præsente cadavere, possint celebrare missam pro defuncto, et in aliam diem transferre missam pro populo applicandam", answered: *Negative*.

The Monday Privilege.—In the United States there is a faculty ("Fac. Ord.", Form I, 20) ordinarily communicated to priests through the bishops, which grants permission to celebrate a Requiem Mass on Mondays *non impeditis officio novem lectionum*. The phrase *officio novem lectionum* gave rise to a doubt as to whether semi-doubles only were referred to, or if doubles also were understood. The Congregation of Rites answered (4 Sept., 1875, n. 3370, ad. 1) that this Mass was allowed on all Mondays during the year, except (a) on the vigils of Christmas and the Epiphany; (b) in Holy Week; (c) during the octaves of Christmas, the Epiphany, Easter, Pentecost, and Corpus Christi; (d) holy days of obligation; (e) greater doubles and doubles of the first and second class. If the enumerated cases hinder this Mass on Monday, the privilege is transferred to Tuesday, under the same conditions, but it lapses after that day.

V. RITE.—The Office and the Mass for the Dead, in their construction, as in their varied rite, are modelled on the offices and the masses of the liturgical feasts; and, as these are divided by Double Rite, and Semi-Double Rite, with their various classes, so, also, are the Masses of Requiem divided. As is well known, it is characteristic of the Double Rite to double the antiphon in the Office (Rubr. Brev., I, 4) and to have only one prayer in the Mass (Rubr. Mis., I, 1); while in the Semi-Double Office, the antiphons are not doubled, and the Mass has several prayers. Now the same law governs the Office and the Mass for the Dead; the Mass of Requiem will be of the Double Rite (a single prayer), whenever the office to which it may be related is recited with Double Rite (doubling the antiphons); it will be of the Semi-Double Rite (with several prayers), when it corresponds to an office that is recited with the Semi-Double Rite. The Decree of the Congregation of Rites of 30 June, 1896, and the reformed Rubric of the Missal (V, 3) are interpreted in that sense. Upon the basis of these principles, it is easy to establish the division of the masses of Requiem according to the various rites. As the Rubrics of the Breviary (*ante Matut in. Def.*) and of the Ritual (VI, iv) prescribe the duplication of the antiphons, in the offices for the dead (a) on All Souls Day, (b) on the day of the obsequies, and (c) on the 3rd, 7th, 30th, and anniversary days, the masses corresponding to those offices will be of the Double Rite. It should be observed, however, that the days just named all have the Double Rite, but not all with the same privileges; wherefore, the masses also on those days will be of the Double Rite, more or less

solemn, that is of a more or less exalted class. The other offices, and the other masses of Requiem, according to what has been said above, will be of the Semi-Double Rite. As, on the other hand, masses of Requiem are more or less privileged, according as they are *missæ cantatæ* or high Masses or are low Masses, and as some of them among the high and some among the low (see MASS, LITURGY OF THE: V. *The Present Roman Mass*) are more privileged than others of their respective kinds, we will divide them into solemn and low, and then subdivide them according to their privileges.

VI. EXEQUIAL HIGH MASSES.—An exequial Mass is one that is celebrated on the occasion of the obsequies (*exequiæ*) of a person, before the burial. It is clearly expressed in the Ritual (VII, i, 4); “*Quod antiquissimi est instituti illud, quantum fieri potest, retineatur, ut Missa presente corpore defuncti, pro eo celebretur, antequam sepulturæ tradatur*” (As much as possible, let the ancient ordinance be retained, of celebrating the Mass with the body of the deceased present, before it is given burial). In fact, it was the invariable custom, from the earliest ages of the Church, to celebrate the Synaxis for the dead before the burial (cf. Tertullian, “*De Monog.*”, X, and St. Augustine, “*Confess.*”, IX, 12). And it is worthy of notice that, from those ancient times, it was licit to celebrate the exequial Mass on Sundays, as Paulinus testifies (*Vita S. Ambrosii*, XLVII): “*Lucescente die Dominico, cum corpus ipsius [S. Ambrosii] peractis Sacramentis divinis, de Ecclesia levaretur portandum ad basilicam ambrosianam . . .*” (At dawn of the Lord’s Day, when, after the Divine Mysteries had been celebrated, his [St. Ambrose’s] body was taken from the church to be carried to the Ambrosian Basilica). In this connexion, Martène cites from the “*Consuetudines Cluniacenses*” (“*Ant. Monarch. rit.*”, Venice, 1783, V, x, 16; p. 257): “*Omni tempore sepeliendus est frater post majorem Missam. Si in ipsa Resurrectionis Dominicæ vel ipsius diei crepusculo obierit, quo scilicet oporteat eum ipso die sepelire, matutinalis Missa pro eo cantabitur*” (At any time a brother must be buried after the high Mass. If he has died on the Day of the Resurrection itself or in the early hours of that day, and it is necessary to bury him that same day, the morning Mass shall be sung for him). And those edifying Benedictine “*consuetudines*” give the reason: “*Nam tanta est auctoritas præsentia ipsius defuncti, ut etiam in tanta solemnitate hujusmodi Missa non potest negligentia intermitteri*” (For the presence of the corpse constitutes such a serious reason that, even on a festival as great as this is, a Mass of this kind must not be neglected).

While holding to the principle that ceremonies of mourning should not interfere with the joyousness of liturgical feasts (for which reason the solemn commemoration of all the faithful departed is transferred to the following day whenever the 2nd of November falls on a Sunday), the Church, as a good mother, desirous of hastening the relief of a deceased child, wishes the exequial Mass to be celebrated, even on a feast day, although she places some conditions, as the Ritual shows (VII, i, 5): “*Si quis die festo sit sepeliendus, Missa propria pro defuncto præsentem corpore, celebrare poterit, dum tamen Conventualis Missa et officia divina non impediuntur, magnaque diei celebritas non obstat*” (If anyone is to be buried on a feast day, the Mass proper for the deceased may be celebrated in the presence of the corpse, so long as the conventual Mass and Office are not interfered with, and the great solemnity of the day does not oppose it). Four conditions, then, are here established: (a) that the corpse of the deceased be present; (b) that the conventual Mass be not prevented; (c) that the Divine Offices be not pre-

vented, and (d) that the great solemnity of the day do not oppose it.

(a) The presence of the corpse in the church is required, according to ancient custom, as the Ritual shows. Formerly, the actual physical presence was prescribed, but, little by little, the Church has modified this law, and according to the new liturgical legislation, that is since the decree of the Congregation of Rites of 13 February, 1892 (n. 3767 ad 26), the Rubric of the Missal (V, 2) has been altered. Since, in modern times, whether through the prohibition of civil laws, or because of death by contagious diseases, corpses may not always be taken to the church, the ecclesiastical law has been so broadened that the body of the deceased is considered present *fictione juris*, as long as it is not buried, and even if it has been buried for not more than two days. These are the words of the Decree in question: “*Cadaver absens ob civile vetitum, vel morbum contagiosum, non solum insepultum, sed et humatum, dummodo non ultra biduum ab obitu, censeri potest ac si foret physice præsens, ita ut Missa exequialis cantari licite valeat, quoties præsentem cadavere permittitur.*”

(b) The second condition is that the exequial Mass do not prevent the celebration of the conventual, or of the parochial, Mass; but to this we have already referred above, under IV. (c) The exequial Mass should not interfere with the Divine Office on feasts, i. e. with the sacred functions which a parish priest should perform in behalf of his people. These days are (i) Ash Wednesday; (ii) the vigil of Pentecost, if the parish priest is to bless the font, and (iii) the days of the Major and of the Minor Litanies; so that, if there be on these days only one Mass in the parish church, it may not be of Requiem, but must be the one which the Rubrics prescribe for the day (S. C. R., decr. 3776 and 4005).

(d) The fourth condition of the Ritual for the celebration of the exequial Mass on a feast day is that the great solemnity of the day does not oppose it. Now the great solemnity of the day, in this connexion, is declared by the Church through the more solemn rite with which some feasts throughout the year are celebrated, namely, primary days of the Rite of the First Class (S. C. R., decr. 3755), which are (i) Christmas and the Epiphany; (ii) Holy Thursday, Good Friday, and Holy Saturday; (iii) Easter Sunday, the feasts of the Ascension, Pentecost, and Corpus Christi; (iv) the Immaculate Conception, Annunciation, and Assumption of the Blessed Virgin Mary; (v) the feasts of St. John the Baptist, of St. Joseph, of the Holy Apostles Peter and Paul, and of All Saints; (vi) the local feasts of the principal patron of the place, of the dedication, and of the titular of the church. It should be observed that, although the two days following Easter and Pentecost are of the First Class, the Church, to hasten the relief of the deceased, does not except them, and the solemn exequial Mass may be celebrated on these feasts, as on all other feasts of the First Class that are not named in the decree cited above. It may be said, therefore, that this Mass *in die Depositionis* is of the Double Rite of the First Class, since it is allowed on feasts of that rite.

VII. MASS OF ALL SOULS’ DAY.—The Commemoration of All Souls has been a very solemn day in the Church ever since the time of its establishment; and as its observance was propagated throughout the Christian world, it came to be celebrated with more and more devotion by the people, on 2 November. Nevertheless, when it occurs on a Sunday, or on a feast of the Double Rite of the First Class, as has been said, it is celebrated on the following day. In this case, there being no question of hastening the relief of one who has passed away, the Church does not wish that the festivity of the Lord’s Day or the solemnity of any other feast of the First Class should be

diminished by the mourning inherent in the Commemoration of the Dead. There is the further intention to facilitate the offering of all Masses, even low Masses, on All Souls' Day for the repose of the departed. For the same reason the Church prescribes (S. C. R., decr. 3864) that, if in any locality a feast of the Second Class should occur on All Souls' Day, it shall be transferred to the following day, in order that the Commemoration of All the Dead may be celebrated. The rite of this commemoration, therefore, is inferior to that of the Funeral Mass, since the commemoration may not be celebrated either on a feast day or on a double of the First Class; wherefore, it may be called a Double of the Second Class.

VIII. MASS *POST ACCEPTUM MORTIS NUNCIUM*.—The solemn Mass of Requiem which may be offered, as soon as news of the death is received, for a person who has died in a distant place, comes in third place. It is the same Mass that is said *in die depositionis*, but has not the same privileges, since it may not be celebrated (a) on any holy day, (b) on feasts of the First and Second Class, or (c) on those ferials and octaves upon which Doubles of the First and of the Second Class are forbidden. These are (a) Ash Wednesday and the ferials of Holy Week; (b) the vigils of Christmas and of Pentecost; (c) the days during the octaves of the Epiphany, Easter, and Pentecost; (d) the octave day of Corpus Christi. All of this has recently been established by the Church (S. C. R., decr. 28 Apr., 1902) to facilitate the suffrages for the dead; but as the exequial Mass has already been offered for the deceased at the place of his death, the Mass *post acceptum* has not received all the privileges of the former. It should be remembered, however, that this Mass may be offered on a feast of the Greater or Lesser Double Rite, when offered immediately *post acceptum nuncium*; otherwise, the Mass loses all privileges, and a day of the Semi-Double Rite must be awaited (S. C. R., decr. 2461, ad 6). For this reason it may be said that the exequial Mass *post acceptum nuncium* is of the Greater Double Rite, since Doubles of the Second Class take precedence over it.

IX. MASSES OF THE THIRD, SEVENTH, THIRTEENTH, AND ANNIVERSARY DAYS.—The Requiem Mass of each of these days is privileged, because, according to ancient tradition accepted in canon law (Cap. *Quia alii*, 13, q. 2; *Nullus Presbyter*, dist. 44), the dead were always commemorated in a special manner on those days. With regard to the third day, as commemorative of the three days which Christ passed in the sepulchre, and as presaging the Resurrection, there is special prescription in the Apostolic Constitutions (VIII, xlii): "With respect to the dead, let the third day be celebrated in psalms, lessons, and prayers, because of Him who on the third day rose again." It appears also, in this connexion, that in ancient times there was a triduum in behalf of the deceased, according to what Evodius writes in a letter (Ep. S. Augustini, clviii): "Exequias præbimus satis honorabiles et dignas tantæ animæ; nam per triduum hymnis Deum collaudavimus super sepulchrum ejus, et redemptionis Sacramenta tertia die obtulimus" (We performed the due obsequies, worthy of so great a soul, joining in hymns to the praise of God for three days at his sepulchre, and on the third day we offered the Mysteries of Redemption). With regard to the seventh day, we have the testimony of St. Ambrose (*De fide resurr.*), which bears witness to the ancient practice, and gives the reason for it: "Nunc quoniam die septimo ad sepulchrum redimus, qui dies symbolum fraternæ quietis est" (Now, since on the seventh day, which is symbolical of fraternal repose, we return to the sepulchre . . .). St. Ambrose, again, speaks of the thirtieth day, and also of the fortieth day (De

ob. Theodosii, i): "Quia alii tertium diem et trigesimum; alii septimum et quadragesimum observare consueverunt, quid doceat lectio considerare" (As some have been wont to keep the third and the thirtieth days; others the seventh and the fortieth; let us consider what the lesson teaches). The annual commemoration of a departed brother was more universal and more solemn; it resembled the feasts of the martyrs and, according to Tertullian, dates from Apostolic times (cf. Magani, "L'antica Liturgia Romana", Milan, 1899, III, 389).

The third, seventh, and thirtieth days may be counted from the day of the death or from the day of the burial (S. C. R., decr. 2482 and 3112); the day itself of the death or of the burial should not be counted, because the language of the decree (*ab obitu, a depositione*) excludes those days, either one of them being not the first day, but the day from which the computation should begin. If, therefore, the burial take place on the eleventh day of the month, the first day after it, of course, will be the twelfth day of the month; the second, the thirteenth; the third, the fourteenth. So also for the seventh and the thirtieth days. There is no rule that requires the selection of the same date, either of death or burial, in computing the day for these commemorations; wherefore, one may celebrate the third day, counting from the day of the burial, and celebrate the thirtieth day, counting from the day of the death. On the other hand, anniversaries are usually celebrated on the day of the month upon which the death occurred; nevertheless, the Congregation of Rites, which had prescribed this day (Decree of 21 July, 1855), now allows the anniversary to be counted from the day of the burial (Decree of 5 March, 1870), which concession is useful in case the anniversary of the death should fall on a day on which this Mass could not be celebrated; in this case the anniversary of the burial may be celebrated, without excluding, in subsequent years, a return to the celebration of the anniversary of the death, according to the ancient tradition. According to the present liturgical laws, the high Mass of Requiem may be celebrated on the third, seventh, thirtieth, and anniversary days, even if those days occur on a greater or on a lesser double. Its celebration is prohibited, however, on (a) any holy day of obligation, including Sundays; (b) all doubles of the first or second class; (c) Ash Wednesday and during Holy Week; (d) the vigils of Christmas and of Pentecost; (e) during the privileged octaves of Christmas, Epiphany, Easter, Pentecost, and Corpus Christi; (f) the days on which the Blessed Sacrament is exposed; (g) Rogation Days, when but one Mass is celebrated in the church (cf. Decrees 3049, 3302, and 3753). When, on the other hand, the third, seventh, thirtieth, and anniversary days are impeded, they may be anticipated by one day or postponed to a day that is not among those enumerated above, even if it be a greater or a lesser double. In case the day before, or the day after, is a day on which these Masses cannot be celebrated, it will be necessary to await a day of the Semi-Double Rite upon which a Requiem Mass may be celebrated, and to use the formulæ of the daily Masses (cf. Decr. 3753, ad 2).

There is another kind of anniversary that is established by the new liturgical law, called *late sumptum*. It is the anniversary that is celebrated each year by chapters, religious communities, or confraternities, on a day that is not the anniversary of the death or of the burial of the deceased. The solemn Mass of the *late sumptum* anniversary may be celebrated on a day of the Lesser Double Rite, but not of the Greater Double. The solemn Mass that is celebrated on the days of the octave of All Souls' Day enjoys the same privilege (cf. Decr. 3753, ad 5). As has been said above (V.), the Requiem Mass is of the Double Rite (that is, it has a single Prayer) whenever it corresponds

to the Office for the Dead in which the antiphons are doubled; and therefore, whenever, at the request of the faithful, a solemn Office is celebrated for one or more deceased persons, especially if there is a concourse of the people, the corresponding Mass must be celebrated with the Double Rite, as the Rubric of the Missal expressly prescribes (V, 3): "*Unica tantum oratio dicenda est in missis omnibus . . . quandoque pro defunctis missa solemniter celebratur*" (In any Mass solemnly celebrated for the dead, only one prayer is to be said). This Mass, however, may be celebrated only on days of the Semi-Double or the Simple Rite, exclusive of those days named above on which it is forbidden to celebrate the anniversary Requiem Mass. This Mass, like that of the anniversary *late sumptum*, is of the Lesser Double Rite; while the Mass of the third, seventh, and thirtieth days, as also that of the anniversary *stricte sumptum*, is of the Greater Double Rite, since it may be celebrated on the doubles that are not of the first or of the second class.

X. MISSÆ CANTATÆ.—These (sung, but not high, Masses) are the Masses that are called *quotidianæ* in the Missal. They are of the Semi-Double Rite, because they have three prayers, and correspond to the office that is recited without duplication of the antiphons. It is forbidden to celebrate these Masses on any of the days mentioned above, upon which the anniversary Masses may not be celebrated, or on the days upon which there is a feast of the Double Rite, even the Lesser, and therefore they are allowed only on semi-double, non-privileged days. To this class of Requiem *missæ cantatæ* belongs the one which the Rubrics of the Missal (V, 1) provide shall be celebrated in the cathedrals and collegiate churches *de præcepto* (S. C. R., decr. 2928): "*Prima die cujusque mensis (extra Adventum, Quadragesimam et Tempus Paschale) non impedita officio duplici vel semi-duplici*". This Mass is truly conventual, should be celebrated after Prime, as the Rubrics of the Missal prescribe (XV, 3), and should be a sung Mass (decrees 1609 and 2424). The first of the month is understood to mean the first day of the month that is free of any double or semi-double, even transferred, Office (decree 2380); and if there be no such free day in the whole month, the obligation ceases; which frequently happens, especially now, when the votive Offices have been admitted. In this Mass of Requiem, as in all other sung Masses hitherto mentioned, the Sequence should never be admitted, as the reformed Rubric of the Missal and the general decree of 30 June, 1896 (No. 3920), provide. The three Prayers of the fourth formulary should be used (decree 2928), for they are adapted to the end which the Church has in view in prescribing the monthly celebration of this Mass, which is "*generaliter pro defunctis sacerdotibus, benefactoribus et aliis*", as the above-cited rubric shows.

XI. Low MASSES.—According to the ancient canon law, a low Requiem Mass could be celebrated only on days of semi-double, non-festive and non-privileged rite; so that, even *præsente cadavere*, if the rite of the day were double, although it were lesser, the Mass of the day had to be celebrated. The liturgical law, however, has been very much changed in relation to low Masses; and, as there are among them some that are more privileged than others, we will divide them according to the privileges that they enjoy.

A. Low Exequial Mass said in place of the High Mass.—As has been seen above, the Church desires that no one of its children be laid in the grave without a mass *præsente corpore*. And as, on the other hand, poverty often prevents the relatives of the deceased from having the obsequies celebrated with solemnity, the Church, always a loving and indulgent mother, permits the high Mass to be replaced by a low one. At first, some limitations were placed to this opportune

concession (cf. Decree of 22 May, 1843, in Mechlinen., ad 6); now, however, by the general Decree of 9 May, 1899 (No. 4024), this exequial low Mass, which takes the place of a high Mass, is celebrated with all the privileges of the latter. In our opinion, the low exequial Mass said in the place of the high Mass enjoys the privileges of the latter, when, through special circumstances, the high Mass may not be celebrated, even in the case of the wealthy; as, for example, if the persons invited to the funeral could not remain long at the church, and the relatives of the deceased should on that account ask that the Mass be a low one. This is actually the practice in some places, and we believe that it may not be condemned, seeing that it is in accordance with the spirit of the Church, which, in recent times, has considerably modified its regulations in this connexion.

B. Low Mass on the Day of Obsequies and in the Same Church.—According to the ancient liturgical law, formulated in the Rubrics of the Missal of St. Pius V, low Requiem Mass, although the body were present, could not be celebrated on days of the Double—even Lesser Double—Rite. This law was justified by the great reverence in which the Double Rite was held and by the fact that, at the time of St. Pius V, there were very few feasts of this rite in the universal calendar. But as the number of these feasts had been greatly augmented, especially in the calendars of some of the religious orders and in those of some dioceses, there was no longer any reason for the rule: first, because the Double Rite, having come to be so abundantly granted, was no longer held in the high esteem that it had formerly enjoyed; secondly, because the great number of new doubles made it impossible to celebrate the low Requiem Mass on the day of the burial. These considerations were submitted to the Congregation of Rites in February, 1896. On 19 May following, there was published the general Decree No. 3903, which begins: "*Aucto postremis hisce temporibus, maxime in calendariis particularibus, Officiorum duplicium numero, quum pauci supersint per annum dies, qui Missas privatas de Requite fieri permittant. . .*" Thanks to this opportune decree, the low Mass, as well as the solemn one, may be celebrated at the obsequies of one deceased, even on a double. There are, however, certain conditions for the celebration of these low Masses. (1) They are allowed only on the day of the obsequies and in the church where the obsequies are celebrated, with or without presence of the corpse, as has been said under V (S. C. R., decr. 3944, ad 3); (2) they must be offered for the deceased whose obsequies are being celebrated, and for no other intention (*ibid.*, ad 4); (3) they may not be celebrated on a Sunday, or other holy day of obligation, even though the latter may have been suppressed; (4) they may not be celebrated on a Double of the First Class, even secondary, or on a day of which the rite prevents these Doubles of the First Class—that is, on Ash Wednesday and during Holy Week, the vigils of Christmas and of Pentecost, during the octaves of Easter and Pentecost, and on the octave day of the Epiphany (*ibid.*, ad 5). Such were hitherto the rules for low Masses on the day of obsequies and in the same church, but by a recent Decree of the Sacred Congregation of Rites these low Masses are now forbidden also on all Doubles of the Second Class. These Masses, of course, are of the Double Rite; they have but one prayer, and the Sequence is as in the solemn high Mass.

C. Low Mass in the Private Chapel, before the Burial.—This Mass of Requiem, also, is a recent concession of the Holy See in behalf of the deceased. By this concession, all the Masses allowed by the Brief by which the privilege of a private oratory was granted, may be celebrated as Requiems, on all the days on which the body remains in the house, on condition that they are offered only for the deceased

(cf. *Ephem. Liturg.*, 1899, p. 607); these Masses have all the privileges of the exequial low Mass. The same is true of all the Masses that are said in what are called mortuary chapels, in the palaces of cardinals, bishops, and princes, at the death of such personages, as long as the body remains exposed there, provided these Masses are for the repose of the deceased prince or prelate. By a recent decree of the Sacred Congregation of Rites these Masses are forbidden also on all Doubles of the Second Class.

D. Low Masses in Cemetery Chapels.—In the public or semi-public oratories of cemeteries, and also in the private chapels erected in burial places, Requiem Masses may be said every day, providing they be offered for the dead, except (1) on all feasts of precept, including Sundays; (2) on the Doubles of the First or of the Second Class; (3) on Ash Wednesday and during Holy Week; (4) on the vigils of Christmas and of Pentecost; and (5) during the privileged octaves of Christmas, Epiphany, Easter, Pentecost, and Corpus Christi (S. R. C., decr. 3944). This privilege, however, does not extend to the parochial church, although that church may be surrounded by a cemetery, and therefore considered a cemetery chapel; neither does it extend to those oratories which have been erected in disused cemeteries (S. R. C., Decr. 28 April, 1902, in "*Ephem. lit.*", 1902, p. 355).

E. Daily Low Masses.—These Masses of Requiem, called *daily* in the Missal, may be celebrated under the same restrictions as the Rubrics establish for votive Masses (General Decree 3922, III, 2; and Rubr. Miss., V, 5); that is they are allowed on days of the Simple or the Semi-Double Rite, and are forbidden on all days of the Double, even the Lesser Double, Rite, as well as on the days named above under IX. By a recent decree of the Sacred Congregation of Rites the daily low Masses are forbidden on the following days of a Semi-Double or Simple Rite: (a) all ferials of Lent; (b) quartertenses; (c) Rogation Monday; (d) vigils; (e) ferial on which the office of a Sunday is anticipated. In the Masses of these ferials or vigils, if they are celebrated for one or more deceased persons, it is permitted to insert, in the penultimate place, the oration for the deceased person or persons, and although those Masses are celebrated in violet or green vestments, nevertheless, by concession of the reigning pontiff, the indulgence of a privileged altar may be gained. The Sacred Congregation of Rites had already declared this by the Decrees nn. 1793, 2041, and 2962. They are of the Semi-Double Rite, and have three prayers at least, and sometimes five or seven, the number always being an odd one, as the Missal shows (V, 4). According to the new liturgical laws, however (S. R. C., decr. 3920), if the Mass is offered for one or more dead who are named, the first prayer is said accordingly, the second is taken *ad libitum*, and the third is always the "Fidelium". If, on the other hand, the Mass be offered for the dead in general, the three prayers are said as the Missal provides. If the celebrant wishes to say five or seven prayers, he may say two or four, between the second, "Deus veniæ", and the last, "Fidelium", from among those given in the Missal, following the order in which they are there given. As is known, the Sequence may be omitted or recited in the daily low Mass, according to the choice of the celebrant.

PIETRO PIACENZA.

Reredos. See ALTAR, sub-title ALTAR-SCREEN.

Rerum Creator Optime, the hymn for Matins of Wednesday in the Divine Office. It comprises four strophes of four iambic dimeters rhymed in couplets, e. g.

Rerum Creator optime,
Rectorque noster aspicie:
Nos a quiete noxia
Mersos sopore libera.

Its ascription to St. Ambrose is not sanctioned by the most recent authorities. Mone cites it as in an eighth-century manuscript at Trier, denying it to St. Ambrose because of its rhyme and thinking it may possibly be by St. Gregory the Great (d. 604); Pimont also refers it to Gregory with the remark that, if a choice must be made between the two, he would certainly choose him; Biraghi does not include it in his *inni sinceri* of St. Ambrose, nor does Dreves place it among those "possibly his". Blume thinks that neither St. Ambrose nor St. Gregory may seriously be considered for ascription of authorship. Daniel, citing it as in a manuscript of the tenth century at Rheinau, puts it in his category of hymns of the seventh and eighth century. Pimont ("*Les hymnes du bréviaire romain*", I Paris, 1874, pp. 192–9) gives the Latin text and an extended commentary. The "*Hymnarium Sarisburiense*" (London, 1851, p. 49) gives the uncorrected Latin text with various manuscript readings. The variants from the text of the Roman Breviary are nine in number and of small importance, but Pimont thinks that in the couplet of what he styles the *texte primitif*

Te, sancte Christe, poscimus,
Ignosce Tu criminibus,

the contrast between the holiness of Christ and the sinfulness of His petitioners is better emphasized by *criminibus* than by the *culpīs* of the Roman Breviary text (Ignosce culpīs omnibus), while the *Te* of the first line and the *Tu* of the second line heighten the energy of the prayer. He also defends *gessimus* in the line, "Vides malum quod gessimus", changed in our Breviary to *fecimus* (possibly because in the older poem the three forms, *gerendum*, *gestis*, *gessimus*, of the verb *gero*, occur in close proximity, and also possibly because of the words of the "Miserere") ("Et malum coram Te feci"). There are thirteen translations into English verse, eight by Catholics. Newman's version is given in the Marquess of Bute's "The Roman Breviary". To the list given in Julian's "Dictionary of Hymnology" (2nd ed., 1907, p. 956) should be added the version of Archbishop Bagshawe, "Most Holy Maker of the world" ("Breviary Hymns and Missal Sequences", London, 1900, p. 11) and that of Judge D. J. Donahoe, "Creator of the earth and skies" ("Early Christian Hymns", New York, 1908, p. 99).

H. T. HENRY.

Rerum Deus Tenax Vigor, the daily hymn for None in the Roman Breviary, comprises (like the hymns for Terce and Sext) only two stanzas of iambic dimeters together with a doxology varying according to the feast or season. As in the hymns for Prime, Sext, and Compline, the theme is found in the steady march of the sun that defines the periods of the day:

Rerum, Deus, tenax vigor
Immotus in te permanens,
Lucis diurnæ tempora
Successibus determinans.

O God, whose power unmoved the whole
Of Nature's vastness doth control,
Who mark'st the day-hours as they run
By steady marches of the sun.

The moral application is, as usual, made in the following stanza:

Largire lumen vespere
Quo vita nusquam decadat, etc.

O grant that in life's eventide

Thy light may e'er with us abide, etc.

The authorship of the hymns for Terce, Sext, and None is now ascribed only very doubtfully to St. Ambrose. They are not given to the saint by the Benedictine editors (see AMBROSIAN HYMNOGRAPHY), but are placed by Biraghi amongst his *inni sinceri*, since they are found in all the MSS. of the churches of Milan. Daniel (I, 23; IV, 13, 17) thinks that much longer hymns for the hours were replaced by the present ones. Pimont disagrees with Daniel and argues that the saint may well have composed two sets of hymns for the hours. However, the researches of Blume (1908) show that the primitive Benedictine cycle of hymns, as attested by the Rules of Cæsarius and Aurelian of Arles, did not include these hymns, but assigned for Terce, Sext, and None (for Easter-tide) the hymns: "Jam surgit hora tertia", "Jam sexta sensim volvitur", "Ter hora trina volvitur"; the earliest MSS. of the cycle give for these hours, for the remainder of the year, the hymns: "Certum tenentes ordinem", "Dicamus laudes Domino", "Perfectum trinum numerum"; while other MSS. give as variants for Lent: "Dei fide qua vivimus", "Meridie orandum est", "Sic ter quaternis trahitur". This Benedictine cycle was replaced throughout Western Christendom by a later one, as shown by Irish and English MSS., which give the present hymns for the little hours.

A. & M., *Hist. Ed.* (the introduction of this last gives an excellent discussion of the authorship, p. xiii). Consult also BLUME, *Der Cursus S. Benedicti Nursini* etc. (Leipzig, 1908); DREVES in *Analecta Hymnica*, L (Leipzig, 1907); DANIEL, *Thesaurus Hymnologicus*, index to V, s. vv.

H. T. HENRY.

Rerum Novarum, the opening words and the title of the Encyclical issued by Leo XIII, 15 May, 1891, on the "Condition of Labour". Although the Encyclical follows the lines of the traditional teaching concerning the rights and duties of property and the relations of employer and employee, it applies the old doctrines specifically to modern conditions. Opening with a description of the grievances of the working classes, it proceeds to refute the false theories of the Socialists, and to defend the right of private ownership. The true remedy, continues the pope, is to be found in the combined action of the Church, the State, the employer, and the employee. The Church is properly interested in the social question because of its religious and moral aspects; the State has the right and the duty to intervene on behalf of justice and individual and social well-being; and employers and workers should organize into both mixed and separate associations for mutual protection and for self protection. All this is set forth with sufficient detail to reach the principal problems and relations of industrial and social life.

Probably no other pronouncement on the social question has had so many readers or exercised such a wide influence. It has inspired a vast Catholic social literature, while many non-Catholics have acclaimed it as one of the most definite and reasonable productions ever written on the subject. Sometimes criticized as vague, it is as specific as any document could be written for several countries in different stages of industrial development. On one point it is strikingly definite: "Let it be taken for granted that workman and employer should, as a rule, make free agreements, and in particular should agree freely as to wages; nevertheless, there is a dictate of natural justice more imperious and ancient than any bargain between man and man, that remuneration should be sufficient to maintain the wage-earner in reasonable and frugal comfort. If through necessity or fear of a worse evil the workman accept harder conditions because an

employer or contractor will afford him no better, he is made the victim of force and injustice". Although this doctrine had been a part of the traditional teaching for many centuries, it had never been stated with such precision and authority. As the years go by and thoughtful men realize more and more how difficult it is to define the full requirements of justice in the matter of wages, a constantly increasing number of persons look upon this statement of Leo XIII as the most fruitful and effective principle of industrial justice that has ever been enunciated.

JOHN A. RYAN.

Rescripts, PAPAL (Lat. *re-scribere*, "to write back"), responses of the pope or a Sacred Congregation, in writing, to queries or petitions of individuals. Some rescripts concern the granting of favours; others the administration of justice, e. g. the interpretation of a law, the appointment of a judge. Sometimes the favour is actually granted in the rescript (*gratis facta*—a rescript *in forma gratiosa*); sometimes another is empowered to concede the request (*gratia facienda*—a rescript *in forma commissoria*); sometimes the grant is made under certain conditions to be examined into by the executor (a rescript *in forma mixta*). The petition forwarded to Rome comprises three parts: the narrative or exposition of the facts; the petition; the reasons for the request. The response likewise contains three parts: a brief exposition of the case; the decision or grant; the reason of the same.

Every rescript presupposes the truth of the allegations found in the supplication. Intentional falsehood or concealment of truth renders a rescript invalid, since no one should benefit through his own deceit. According to some, however, a rescript is valid if voluntary misrepresentation affect only the secondary reason of the grant. This is certainly true where there is no fraud, but merely inadvertence or ignorance of requirements; for, where there is no malice, punishment should not be inflicted; and the petition should be granted, if a sufficient cause therefor exist. A rescript *in forma commissoria* is valid, if the reason alleged for the grant be true at the time of execution, though false when the rescript was issued. When a rescript is null and void, a new petition is drawn up containing the tenor of the previous concession and cause of nullity, and asking that the defect be remedied. A new rescript will then be given, or the former one validated by letters *perinde valere*. If the formalities sanctioned by law or usage for the drawing up of rescripts are wanting, the document will be considered spurious. Erasures, misspellings, or grave grammatical errors in a rescript will render its authenticity suspected. Excommunicated persons may seek rescripts only in relation to the cause of their excommunication or in cases of appeal. Consequently in rescripts absolute from penalties and censures is first given, as far as necessary for the validity of the grant.

Rescripts have the force of a particular law, i. e. for the persons concerned; only occasionally, e. g. when they interpret or promulgate a general law, are they of universal application. Rescripts *in forma gratiosa* are effective from the date they bear; others only from the moment of execution. Rescripts contrary to common law contain a derogatory clause: all things to the contrary notwithstanding. Rescripts of favour ordinarily admit a broad interpretation; the exceptions are when they are injurious to others, refer to the obtaining of ecclesiastical benefices, or are contrary to common law. Rescripts of justice are to be interpreted strictly.

Rescripts expire for the most part in the same manner as faculties.

Decretals Greg. IX, I, 3; TAUNTON, *The Law of the Church* (London, 1906).

A. B. MEEHAN.

Reservation, the restriction in certain cases by a superior of the jurisdiction ordinarily exercised by an inferior. Reservation obtains in appointing to a benefice (q. v., section *Collation*), in dispensing from vows (q. v.), and in absolving from sins and censures. The power of reservation is vested in its fullness in the pope, who may exercise this right throughout the world. Bishops, regular superiors, or others with quasi-episcopal jurisdiction in the penitential forum may reserve to themselves the absolution of sins of their own subjects. Parish priests and local superiors do not possess this right. The chief reason for thus restricting the power of confessors is to deter evil-doers by the difficulty of obtaining absolution. Only graver mortal sins, that are external and completed, not merely attempted acts, should be reserved. Confession would prove too odious, were the confessor's jurisdiction unduly limited. Sins are reserved *with* censure (see CENSURES, ECCLESIASTICAL) or *without* censure: nearly all papal reservations belong to the former class, and the reservation is principally on account of the censure; episcopal reservations pertain for the most part to the latter category.

See APOSTOLICÆ SEDIS MODERATIONI; CENSURES, ECCLESIASTICAL, section *Absolution from Censures*; *Council of Trent*, Sess. XIV, cap. vii, can. xi; TAUNTON, *Law of the Church*, s. v. *Reserved Cases*; and the works of moral theologians.

A. B. MEEHAN.

Reservation of the Blessed Sacrament, the practice of preserving after the celebration of the Liturgy a portion of the consecrated elements for the Communion of the sick or for other pious purposes. The extreme antiquity of such reservation cannot be disputed. Already Justin Martyr, in the first detailed account of Eucharistic practice we possess, tells us that at the close of the Liturgy "there is a distribution to each and a participation of that over which thanks have been given, and to those who are absent a portion is sent by the deacons" (I Apol., lxxxvii). Again St. Irenæus as quoted by Eusebius (Hist. eccl., V, xxiv, 15) wrote to Pope Victor that "the presbyters before thee who did not observe it [i. e., the Quartodeciman practice] sent the Eucharist to those of other districts who did observe it". Tertullian uses the actual word, *reservare*, and seems to suggest that a man who scrupled to break his fast on a fast day might approach the Holy Table and carry the Blessed Sacrament away with him to consume it later on—"accepto corpore Domini et reservato, utrumque salvum est, et participatio sacramenti et executio officii" ("De orat.", XIX; C. S. E. L., XX, 192. Cf. "Ad ux.", II, 5).

In St. Cyprian, about the middle of the third century, we already find the record of Eucharistic miracles, as, for example, when he tells us of a woman who sought to open with polluted hands the casket (*arca*) in which she kept the Blessed Sacrament and was deterred by flames bursting from it (De lapsis, 26; C. S. E. L., I, 256). And again, at about the same period, an account written by St. Dionysius of Alexandria has been copied by Eusebius (Hist. eccl., VI, xlv) from which we learn that a priest, being ill and unable himself to visit a dying person who had sent a boy to him to ask for the Holy Viaticum in the middle of the night, gave the boy a portion of the Eucharist to take to the sufferer who was to consume it moistened with water. This story illustrates the first and primary purpose of reservation, which is thus formally stated in the thirteenth canon of Nicæa: "With respect to the dying, the old rule of the Church should continue to be observed which forbids that anyone who is on the point of death should be deprived of the last and most necessary Viaticum"

(τοῦ τελευταίου καὶ ἀναγκασιότατου ἐφοδίου). But it was clearly also permitted to Christians, especially in the time of persecution, to keep the Blessed Sacrament in their own possession that they might receive it privately (see, e. g., St. Basil, Ep. cclxxxix, "Ad Cæsar", and St. Jerome, Ep. i, "Ad Pammach.", n. 15). This usage lasted on for many centuries, especially under certain exceptional circumstances, for example, in the case of hermits. An answer given by the Bishop of Corinth to Luke the Younger, an anchorite in Achaia in the tenth century, explains in detail how Communion should be received under such circumstances (Combefis, "Patr. Bib. Auctuar.", II, 45).

At an earlier date, when certain heretically-minded monks of Mount Calamon in Palestine expressed doubts whether the Holy Eucharist which had been kept to the morrow did not lose its consecration, St. Cyril of Alexandria wrote (P. G., LXXVI, 1075) that those who so spoke must be mad (*μολινοῦνται*). What is more surprising, it remained the custom in many religious houses of women in the West down to the eleventh and twelfth centuries or later to receive on the day of their solemn profession a little provision of the Blessed Sacrament, and with this they spent a period of eight days in a sort of retreat, being free "to partake daily of this heavenly food" (see Martène, "De Antiquis Ecclesiæ Ritibus", II, 187). We also learn that Christians sought to carry the Blessed Sacrament about with them in times of grievous peril as a means of protection (St. Ambrose, "De Excessu Fratris", I, 43) or as a source of consolation. Further, as noticed above, the Eucharist was sent from one bishop to another in token of charitable communion, and it appears from the first "Ordo Romanus" (nn. 8 and 22) that a portion of the Eucharist remaining over from a previous sacrifice was mingled with the elements consecrated in the next celebration, probably as a token of continuity, while the practice of the Mass of the Presanctified, in which the species previously consecrated alone were used, was from an early period prescribed in the Eastern Church throughout the whole of Lent, the Sundays only excepted.

On the other hand, there appears to be no reliable evidence that before the year 1000, or even later, the Blessed Sacrament was kept in churches in order that the faithful might visit it or pray before it. Such evidence as has been quoted in proof of such a practice will be found on closer inspection to tell the other way. For example, though the altar is called by St. Optatus of Milevis ("De schism. Don.", VI, I; in P. L., XI, 1066) the throne of the Body and Blood of Christ (*sedes et corporis et sanguinis Christi*), the altar is also described in the same context as the place "where Christ's Body and Blood dwell for a certain brief space" (*per certa momenta*). Further, the true explanation of a passage in which St. Gregory Nazianzen describes his sister Gorgonia as visiting the altar in the middle of the night (P. G., XXXV, 810) seems to be that she went there to seek such crumbs or traces of the Eucharistic species as might accidentally have fallen and been overlooked (see Journal of Theol. Stud., Jan., 1910, pp. 275-78). It would probably, then, be correct to say that down to the later Middle Ages, those who came to the church to pray outside the hours of service came there not so much to honour the Eucharistic presence as to pray before the altar upon which Jesus Christ was wont to descend when the words of consecration were spoken in the Mass.

As to the manner and place of reservation during the early centuries there was no great uniformity of practice. Undoubtedly the Eucharist was at first often kept in private houses, but a Council of Toledo in 480, which denounced those who did not immediately consume the sacred species when they received them from the priest at the altar, very

possibly marks a change in this regard. On the other hand numerous decrees of synods and penalties entered in penitential books impose upon parish priests the duty of reserving the Blessed Sacrament for the use of the sick and dying, and at the same time of keeping it reverently and securely while providing by frequent renewal against any danger of the corruption of the sacred species. Caskets in the form of a dove or of a tower, made for the most part of one of the precious metals, were commonly used for the purpose, but whether in the early Middle Ages these Eucharistic vessels were kept over the altar, or elsewhere in the church, or in the sacristy, does not clearly appear. After the tenth century the commonest usage in England and France seems to have been to suspend the Blessed Sacrament in a dove-shaped vessel by a cord over the high altar; but fixed and locked tabernacles were also known and indeed prescribed by the regulations of Bishop Quivil of Exeter at the end of the thirteenth century, though in England they never came into general use before the Reformation. In Germany, in the fourteenth and fifteenth centuries, a custom widely prevailed of enshrining the Eucharist in a "sacrament house", often beautifully decorated, separate from the high altar, but only a short distance away from it, and on the north, or Gospel, side of the Church. This custom seems to have originated in the desire to allow the Blessed Sacrament to be seen by the faithful without exactly contravening the synodal decrees which forbade any continuous exposition. In the sacrament house the door was invariably made of metal lattice work, through which the vessel containing the sacred species could be discerned at least obscurely.

In modern times many provisions have been made to ensure reverence and security in the reservation of the Blessed Sacrament. With regard to the renewal of the species, it is laid down that the Eucharist should not be left for longer than a month, while a much less interval is recommended and generally followed in practice. The practice of burning a light before the tabernacle or other receptacle dates from the thirteenth century or earlier, but it was not at first regarded as of strict obligation. In the Greek Church the consecrated loaf is moistened with the species of wine and kept as a sort of crumbling paste.

HERBERT THURSTON.

Reserved Cases, a term used for sins whose absolution is not within the power of every confessor, but is reserved to himself by the superior of the confessor, or only specially granted to some other confessor by that superior. To reserve a case is then to refuse jurisdiction for the absolution of a certain sin. Christ gave power to the rulers of His Church to make such reservations: "Whose sins you shall retain they are retained" (John, xx, 23). The reservation of sins presupposes jurisdiction, and therefore the pope alone can make reservations for the whole Church; bishops can do the same for their dioceses only, and certain regular prelates for their religious subjects. That a sin be reserved it must be mortal, external, and consummated. If a sin be reserved in one diocese, and a penitent, without the intention of evading the law, confess to a priest in another diocese where the sin is not reserved, the latter may absolve the reserved sin. Cases are reserved either (a) merely on account of the sin itself, that is without censure, or (b) on account of the censures attached to it. If a penitent be in danger of death, any priest can absolve him, both from reserved censures and reserved sins. In case of reserved censures, if he recover, he must later present himself to the one

having special power for reserved censures, unless the case was simply reserved to the pope. As to reserved sins, he need not, as a general rule, present himself again after convalescence. In a case of urgent necessity, when it is not possible to have recourse to the proper superior, an ordinary priest may absolve a penitent, directly from unreserved sins and indirectly from episcopal reserved cases, but the penitent must afterwards apply to the person having power to absolve from the reservation. If there were also papal reservations, either simple or special, the absolution is direct, but in case of special reservations to the pope a relation must be made to the Holy See that its mandates on the subject may be obtained. Ignorance of a censure prevents its being incurred, but moralists dispute whether ignorance of a reservation, with or without censure, excuses from its incurrance. If it be a case with censure reserved to the pope, all agree that ignorance does excuse from it; if reserved to a bishop, it is controverted. Some moralists hold that ignorance excuses from all reservations, whether with or without censure. It is certain, however, that a bishop has authority to declare that ignorance of a reservation does not prevent its incurrance in his diocese.

WILLIAM H. W. FANNING.

Residence, ECCLESIASTICAL, a remaining or abiding where one's duties lie or where one's occupation is properly carried on, as the presence of a bishop in his diocese, a rector or incumbent in his benefice, a canon in his cathedral or collegiate church: opposed to non-residence or absence. Residence is intended to guarantee service or fulfilment of duty. In the canonical import of the term a merely material abiding in a place is not sufficient; vigilance and solicitude must accompany it; a laborious residence alone satisfies the requirements. Residence for this reason differs from domicile, and secondly because the intention of remaining is involved in the definition of domicile. It may be noted that by a fiction of law one who is lawfully absent fulfils the law of residence; while, on the contrary, one unlawfully absent is considered to be present: thus one who leaves his own diocese under censure or precept, or purposely and solely (*in fraudem legis*) to obtain absolution in a reserved case, is considered present. Residence is binding on clerics holding benefices. Originally this obligation was attached to all benefices, but through universal custom simple benefices or those without the cure of souls do not require personal residence. A canon's presence does not necessarily extend to all hours of the day, while that of a pastor, on the contrary, is continuous, owing to the numerous, and oft-times sudden, demands for his ministrations. A canon is not obliged ordinarily to dwell in close proximity to his benefice. It suffices that he be able conveniently to be present at the prescribed hours.

Residence, in connexion with the pastoral office, is inculcated in various canons. The Council of Trent (Sess. XXIII, c. 1, de ref.) says: "Since by Divine precept it is enjoined on all to whom the cure of souls is entrusted to know their own sheep, to offer sacrifice for them, to feed them by preaching the Divine word, by the administration of the sacraments, and by the example of all good works; likewise to have a fatherly care of the poor and other distressed persons, and to apply themselves to all other pastoral duties; all which offices can not be rendered and fulfilled by those who neither watch over nor are with their own flock, but abandon it after the manner of hirelings, the sacred synod admonishes and exhorts such that, mindful of the Divine precept and made a pattern of the flock, they feed and rule in judgment and truth."

A pastor then is obliged to dwell in his parish; and, generally speaking, by reason of local statutes, in the parochial residence or rectory. Because of greater responsibilities resting upon them, the Church insists that patriarchs, primates, metropolitans, bishops, or others in charge of dioceses or quasi-dioceses, even though they be cardinals, live within their own territory, though not of necessity in the episcopal city. Bishops, moreover, are admonished by the Council of Trent not to be absent from their cathedrals, unless their episcopal duties call them elsewhere in the diocese, during Advent and Lent, on Christmas, Easter, Pentecost, and Corpus Christi, on which days especially the sheep ought to be refreshed and rejoice in the Lord at the presence of the shepherd. The chancery office, the official centre of diocesan business, will be found more properly at the cathedral, even though the bishop reside elsewhere. The six cardinal bishops (see **CARDINAL**) whose sees are in proximity to Rome are permitted to dwell in the Eternal City, while suffragan bishops administer their dioceses (const. Clem. XVI, "Pastorale officium"; const. Pius X, "Apostolicæ Romanorum Pontificum", 15 Apr. 1910).

Some maintain that the duty of residence is incumbent on parish priests and bishops by virtue of Divine as well as ecclesiastical law. The Council of Trent did not see fit to settle this controversy (cf. Bened. XIV, "De syn.", L. 7, c. 1). It would seem that while the canons demand a personal fulfilment of their duties on the part of pastors, the Divine precept is satisfied if the work be done even by others, though this is less fitting. The law of residence is not to be applied so strictly as not to admit of absence at times. In some cases a reasonable or just cause of absence, e. g. necessary rest, legitimate recreation, a pilgrimage, a visit to relatives or friends, business matters, suffices; in others, a grave reason is required. Grave reasons for absence may be reduced to two. The first is urgent necessity, e. g. when one is persecuted, obliged by ill health to seek change of climate, called away in obedience to a lawful superior, attendance at an oecumenical council, making the prescribed *ad limina* visit. The second reason is charity in a marked degree, e. g. the prosecution of the rights of the diocese or of the Church, the promotion of peace among nations. For no cause should a pastor desert his people in time of war, pestilence, or on other occasions when their welfare is seriously menaced. The period of absence allowed may be continuous or interrupted. While the chapter may never be absent, individual members may annually have three months' vacation, if the constitutions of the chapter permit. A sufficient number for the offices required must be present. Bishops are counselled not to allow parish priests or rectors of missions more than two months' leave of absence yearly, unless the reason be urgent. Permission should be given in writing, except for short absences, and a substitute approved by the ordinary, with competent recompense, left in charge of the parish. Usually diocesan statutes permit an absence of a few days without consulting the ordinary. The law allows a bishop for just cause, when it is possible without detriment to his charge, to absent himself three months annually, though not during Advent or Lent or on the feasts enumerated above. For a longer absence, though advantage may not have been taken for years of the period annually allowed, a grave reason is required as well as express permission of the Consistorial Congregation. Clerics other than those mentioned are subject to local regulations, both as regards residence and absence.

Non-residence or unlawful absence is punishable in law. Canons lose all share in the daily distributions unless actually present in choir. Where it is permitted they may use with moderation the privilege of appointing substitutes. Besides being guilty of

mortal sin, bishops and rectors who violate the law of residence forfeit the fruits, i. e. salary or income, of their benefices in proportion to the time of their absence. A certain amount may be retained in recompense for other duties discharged, such as the application of Mass etc. The money forfeited is used in repairing churches or in works of piety. Bishops also lose whatever rights and privileges they possess as assistants to the papal throne. Continued infringement of the law may be more severely punished, even by deposition. If a bishop is absent more than a year, he must be denounced to the pope by his metropolitan. If the metropolitan be thus absent, the duty of reporting the matter devolves on the senior suffragan bishop. A parochial residence of one month suffices for the licit contracting of marriage in the parish (Nemere, art. 5): the mere fact of thirty days stay, even though by chance, if morally continuous, is sufficient. By such residence one becomes a parishioner as far as marriage is concerned, and although retaining a domicile or quasi-domicile elsewhere, may obtain matrimonial dispensations from the ordinary of the place of residence. Canonists are not agreed whether this is true in the case of one who, though living in a diocese for some time, e. g. a week, only in various parishes, has not acquired a parochial residence of a month. It is certain that the previous legislation contemplated a parochial, not a diocesan, domicile or quasi-domicile.

ANDREW B. MEEHAN

Resignation. See **ABDICATION**.

Respighi, LORENZO, b. at Cortemaggiore, Province of Piacenza, 7 October, 1824; d. at Rome, 10 December, 1889. He studied mathematics and natural philosophy, first at Parma and then at the University of Bologna, where he obtained his degree *ad honorem* in 1845. In 1849 he was appointed as substitute to the chair of rational mechanics and hydraulics in the same university, two years later professor of optics and astronomy, and finally in 1855 he became director of the Bologna observatory, after having been for some time at the observatory of Milan. From 1855 to 1864 he discovered, at Bologna, three comets (1862 IV, 1863 III, and 1863 V) and made himself known by other important works of meteorology and astronomy. In 1865 the Italian Government, already established in Bologna for five years, imposed upon the university professors the oath of subjection to the dynasty of Victor Emmanuel II. Three professors refused to take it: Chelini, Filopanti, and Respighi. In consequence of this refusal, the last-named had to leave the chair and the direction of the observatory. He then went to Rome, which still continued under the government of the pope, and obtained the position of astronomer at the observatory of the Capitol, directed by Calandrelli. In 1866, a year after the death of the latter, Respighi succeeded him both in the directorship of the observatory at the Capitol and in the chair of astronomy at the Sapienza. In 1866 he made important observations on the lunar crater Linnæus. In 1867 and 1868 he began his celebrated studies of the scintillation of stars. In October, 1869, he made the first spectroscopic observations on the border of the sun.

Rome having been occupied by the Italian Government (1870), Respighi (October, 1871) found himself again confronted with the question of the oath. He had been invited by the British Government to take part in an expedition to the Indies for the solar eclipse in December, 1871. This invitation gave so much distinction to the astronomer that the Italian Minister of Public Instruction offered

him a sum to defray the expenses of the journey. Respighi accepted on condition that he should not be subject to take the oath. It does honour to the minister that he did not insist upon a condition with which a loyal subject of the pope would not have complied even if his refusal cost him his position. Six years later, in 1877, Respighi was appointed Knight of the Civil Order of Savoy; to receive this honour it became again necessary to take the oath. In a letter to the Minister of Instruction, Respighi refused and returned the cross which had been already sent to him. Besides the aforementioned studies, we owe to him other very important researches, on spectra of stars and on the solar corona, as also the first systematic observations on solar protuberances. Moreover, he discovered and practised new methods to determine the diameter of the sun and the zenith distances of stars. Finally, astronomy owes Respighi a masterly catalogue of the absolute declinations of 2534 boreal stars. After Schiaparelli, Respighi was the most prominent Italian astronomer of the nineteenth century.

V. CERULLI.

Responsorium, Responsory, or Respond, a series of verses and responses, usually taken from Holy Scripture and varying according to the feast or season. Responsories are of two kinds: those which occur in the Proper of the Mass, and those used in the Divine Office; each differing slightly both as to history and form.

I. *The Responsories of the Mass*.—The psalmodic solo is the oldest form of Christian chant, and was apparently derived from the Synagogue. The psalm was recited by one chanter, to whom the people answered with a refrain or response, the latter being either the alternate verses of the psalm itself, or one verse repeated again and again, or sometimes a sentence taken from elsewhere. The psalm "Confitemini Domino", every verse of which has the refrain "Quoniam in æternum misericordia ejus", is a typical example, though sometimes the refrain was a mere exclamation, such as "Alleluia". This method of chant was known as the *cantus responsorius*, and is mentioned in the writings of Tertullian, St. Augustine, and St. Isidore. It was an integral part of the Liturgy, that is to say it was not introduced to fill up time whilst other things were going on, but was listened to by clergy and people alike, and in this it differs from the antiphonal chant, which was merely an accompaniment to various actions and ceremonies, e. g. the Introit, Offertory, and Communion. The responsorial parts of the Mass were the Gradual (so named from the position of the soloist, at the steps of the pulpit or ambo), the Alleluia, and at one time the Offertory. Up to the twelfth century the way of singing the Gradual was as follows: The cantor sang it from the beginning as far as the verse, and the choir repeated the cantor's part. Then came the verse, sung by the cantor, after which the refrain, i. e. the part first sung, was repeated by all. After the twelfth century the custom began of omitting the repetition after the verse whenever another chant, such as the Alleluia or Tract, followed. The present practice is to omit the repetition on all occasions, but in order to avoid a conclusion by the soloist alone, it has become general for the choir to join in at the end of the verse. In the early Middle Ages the *responsorium graduale* was still sung at every Mass, and not replaced, as at present, by an Alleluia in Eastertide. It may be noted that it is still retained in Easter Week, the Graduals of which are all connected (the refrain being the same and the verses being all from one psalm), and doubtless originally formed one chant with several verses, which was performed in full on Easter Day.

The second piece of responsorial chant in the Mass

is the Alleluia. It was introduced by Pope Damasus at the advice of St. Jerome, in imitation of the Liturgy of Jerusalem. The chant became very elaborate, the greater part of it being devoted to the last vowel of the word *alleluia*, which was prolonged through so many successive notes as to suggest a mystical meaning, viz., that it represented the chant of eternity, or, as Durandus says, the joy that is too great to be expressed in words. The reduction of this chant to responsorial form is due to St. Gregory, who added verses to it. The method of singing it was as follows: The soloist began with the Alleluia, which was repeated by the choir; the soloist then continued with the verse or verses, after each of which the choir repeated the Alleluia. On Holy Saturday and the Vigil of Pentecost there was no repetition, but the verse "Confitemini" was followed immediately (as now) by the tract "Laudate Dominum". The Offertory was originally an antiphonal chant, i. e. sung by two choirs, introduced to fill up the time whilst the oblations of the people were being made. Later on it became more convenient to leave the Verses to a soloist, and so it became a responsorial chant. One reason for this may have been that the singers, as well as the people, had oblations to offer. The change was naturally accompanied by an elaboration of the melody, both of the antiphon (which became the refrain) and of the verses. But when the popular offering fell out of use, the Offertory had to be curtailed, and the verses were dropped, in which form it is found as early as the eleventh century. At the present day the Mass for the Dead alone retains a vestige of the ancient usage, in the verse "Hostias et preces" and the repetition after it of the concluding part of the Offertory. Originally the people joined in the singing of all the Mass, responsorial chants taking up the responses after they had been commenced by the soloist. The gradual elaboration of the melodies, however, made this increasingly difficult for them, and so by degrees they were forced to relinquish their share to the trained singers of the choir. They had become thus silenced probably by St. Gregory's time, and thenceforward it was only in the Ordinary of the Mass that they were able to take their share.

II. *The Responsories of the Divine Office*.—These consist, like those of the Mass, of verses and responses, with or without the "Gloria Patri" (but omitting *sicut erat*), and their usual place is after the Lessons of Matins. There is also a shorter form, called the *responsorium breve* or *responsoriola*, which in the monastic Office always comes after the Capitulum at Lauds and Vespers, and also after the Lesson in summer ferial Matins (Reg. S. Ben., c. x). In the Roman Office it is found only in the Little Hours. St. Benedict in his Rule (written about 530) prescribes the use of responsories after the Lessons of Matins, but he gives no intimation as to their form, implying rather that they were in general use and therefore well-known. The earliest definite information we have as to their form is found in the description of the Roman Office at the beginning of the ninth century, given by Amalarius in his "De Ordine Antiphonarii" (Migne, P. L., CV). The method of chanting then in vogue is thus given by him: the precentor began with the first part, which the choir repeated; then the soloist sang the verse and the choir repeated the first part again as far as the verse; the soloist sang "Gloria Patri" and the choir repeated the second portion of its part again; finally the precentor began the Respond again from the beginning, and sang it as far as the verse, and the choir replied with a last repetition. The first Responsory of the year, "Aspiciens a longe", and a few others, had several verses, and in these cases the second part of the refrain was divided into as many sections as there were verses, one section being repeated after each verse, and then after the

"Gloria Patri" the full refrain again. One verse only, however, was the general rule.

A modification of the above method was introduced by the Franks, who repeated only the first part of the refrain after the verse instead of the whole of it. This dimidiation in the Gallican method of singing the Responsory led to some confusion of the sense of what was being sung, and Blessed Cardinal Tommasi, quoting from Amalarius, says that in consequence it became necessary to introduce some different verses in Gaul, so that there might be but one sense running through the words of both Respond and verse. Dom Bäumer gives the following as an example:

R. Tu es Petrus *ait Dominus ad Simonem.

V. Ecce Sacerdos magnus qui in diebus suis placuit Deo.

R. (Roman method) Tu es Petrus, etc.

But according to the Gallican method the repetition would be merely "Ait Dominus", etc., thus making Our Lord to say to Peter "Ecce Sacerdos magnus" etc.

Helisachar, Abbot of St. Maximin at Trier, was responsible for many of the new Verses, but his work did not meet with the approval of Amalarius, who set himself to improve upon it in the new Antiphonary which he compiled for use in Gaul. This in turn was violently attacked by Agobard and Florus, the liturgists of Lyons, but in the end the Gallican method of singing the Responsory prevailed over the Roman way, and became the general custom of the Church. This came about, however, only by degrees, for though Amalarius made his compilation early in the ninth century, we still find considerable variation of form in the Responsories contained in the twelfth-century Antiphonary of St. Peter's, which represents the use of the Vatican Basilica. The inclusion of the "Gloria Patri" in the Responsory was considered by Amalarius to be a recent innovation, though Walafrid Strabo ascribed its introduction to St. Benedict. At any rate its use without "sicut erat" points to its being at least older than the sixth century. It should be noted that usually it occurs only in the last of each set of nocturn Responds.

The number of Responsories used varied in the different Antiphonaries according to the number of lessons. Before the Te Deum was said at the end of Matins, extra Responsories were sometimes added on feast days, one after another, as a token of joy and solemnity. Numerous examples occur, for instance, in the Compiègne Antiphonary (Migne, P. L., LXXVIII), which was compiled in the ninth century, apparently for the use of non-monastic churches in the north of France. The preservation of the repetition in the Office Responsory, unlike that of the Mass, may perhaps be accounted for by the fact that the office chant was always in the hands of clerics or monks, rather than of professional singers; the latter would naturally apply themselves chiefly to the melodic development of the pieces entrusted to them, whereas the former would be more liturgically conservative and more careful of the organic structure of their pieces.

The words of the Responsories agreed either with the history in the Lessons they followed, or were proper to the feast of the day. Thus in the "Micrológus" of Bernold of Constance, the Responsories themselves are often called "Historia". Amalarius speaks of Responsories *de historia* being used after Lessons from the Old Testament, and *de psalmis* after those from the New. The practice of using a Responsory from the Common of Saints with a Lesson of the current Scripture has sometimes an awkward effect. Thus the French ritualist Grancolas, who flourished in the early eighteenth century, remarks that the intention of the Responsory was to furnish a meditation or commentary on what had just been

read, but that such intention was frustrated when, for instance, after a Lesson describing the doings of "Absalom, Ahab, or some other wicked prince" the answer was "Ecce Sacerdos magnus", or "Sponsabo te mihi in justitia". The Paris Breviary of 1735, introduced by Archbishop de Vintimille on his own authority, in which everything except hymns and lives of saints was rigidly Scriptural, has a series of Responsories which, considered as "moral concordances", are really works of art. The Old and New Testaments are made mutually illustrative in a masterly manner; thus, for example, on the feast of Our Lady's Conception we have:

R. Descendit sicut pluvia in vellus; *Benedictum nomen majestatis ejus in aeternum, et *Replebitur majestate ejus omnis terra.

V. Ecce tabernaculum Dei cum hominibus et habitabit cum eis; et ipse Deus cum eis erit eorum Deus.

R. Benedictum. V. Gloria Patri. R. Replebitur.

The Graduals and Responsories are certainly among the most ancient and interesting parts of the liturgy of the Church. Musically they are the highest achievement of the old Christian composers, and should always be referred to when it is desired to give specimens of the true Gregorian Chant; whilst as literature, Batiffol, speaking of the responds of the "Proprium de Tempore", which are older than the others, compares them to the chorus dialogues of classical Greek tragedy.

G. CYPRIAN ALSTON.

Restitution has a special sense in moral theology. It signifies an act of commutative justice by which exact reparation as far as possible is made for an injury that has been done to another. An injury may be done to another by detaining what is known to belong to him in strict justice and by wilfully doing him damage in his property or reputation. As justice between man and man requires that what belongs to another should be rendered him, justice is violated by keeping from another against his reasonable will what belongs to him, and by wilfully doing him damage in goods or reputation. Commutative justice therefore requires that restitution should be made whenever that virtue has been violated. This obligation is identical with that imposed by the Seventh Commandment, "Thou shalt not steal." For the obligation not to deprive another of what belongs to him is identical with that of not keeping from another what belongs to him. As theft is a grave sin of its own nature, so is the refusal to make restitution for injustice that has been committed.

Restitution signifies not any sort of reparation made for injury inflicted, but exact reparation as far as possible. Commutative justice requires that each one should have what belongs to him, not something else; and so that which was taken away must be restored as far as possible. If the property of another has been destroyed or damaged, the value of the damage done must be restored. Restitution therefore signifies reparation for an injury, and that reparation is made by restoring to the person injured what he had lost and thus putting him in his former position. Sometimes when an injury has been done it cannot be repaired in this way. A man who commits adultery with another's wife cannot make restitution to him in the strict sense. He has done his neighbour

an injury which in a certain sense is irreparable. He should make what reparation he can. In this and similar cases it is a disputed point among theologians whether the adulterer is obliged to offer a money compensation for the injury. If he is convicted and sentenced to pay damages by lawful authority, he will certainly be bound to do so in conscience. But apart from such a sentence, he cannot be obliged to compensate the injured husband in money, because there is no common measure between such injuries and compensation in goods of another order.

Commutative justice looks at objective equality, and prescribes that it be preserved. For this reason Aristotle called this species of justice corrective, inasmuch as it corrects and remedies the inequality which an act of injustice produces between the injurer and the party injured. The one has less than he ought to have, because the other has taken it away, and they will not be quits until restitution is made. In cases where an injury is irreparable, the injurer will be bound to do what he can so that the injured party may be content. This is called making satisfaction, to distinguish it from making restitution in the strict sense. We are thus bound to make satisfaction to God for the injury which our sins do Him; we cannot make Him restitution, nor did He suffer damage on account of our sins. A violation of commutative justice alone imposes the obligation of making restitution, for when charity or obedience or any of the other virtues is violated, there is indeed a consequent obligation of repenting for the sin, but there is no obligation of performing the omitted act of charity or obedience now. The obligation was urgent at the particular time and in the particular circumstances in which the sin was committed. Now the need of relief which called for the act of charity, and the reason for the command which was disobeyed no longer exist, and so there is no reason for supplying now for the omitted acts.

The grounds on which restitution becomes obligatory are either the possession of something belonging to another, or the causing of unjust damage to the property or reputation of another. These are called by divines the roots of restitution, for it is due on one of those two grounds if it is due at all. The moral obligations of one who finds himself in possession of another person's property, and who on that account is bound to make restitution, will depend on whether he had possession of the property hitherto in good faith, or in bad faith, or in doubtful faith. If hitherto he thought in good faith that the property was his own, and he now discovers that it belongs to someone else, it will be sufficient to restore the property itself to the owner, together with any fruits that still remain. If while he was in good faith he consumed the fruits, or even the property itself perished, the possessor will not be bound to make restitution for what no longer exists. If the possessor consumed what he thought was his own property, possession in good faith justified him in doing so; and if the property has perished or been lost, the owner must bear the loss. But if possession was begun in bad faith, the possessor must not only restore all that remains of the property or of its fruits, but he must also compensate the owner for any loss or damage that the latter suffered on account of being deprived of his property. For the unjust possessor must make compensation for all the damage that he has caused the owner by unwarrantably retaining his property. If possession was begun in doubtful faith, inquiry as to title should first of all be made. In this way, or by the use of presumptions, the doubt may often be settled. If it cannot thus be settled the common opinion of divines is that restitution must be made to the doubtful owner of a portion of the property corresponding to the probability of his right, while the possessor may keep a portion corresponding to the probability of his title. A few

recent theologians think that the possessor in such a case may keep possession of the property, provided that he is ready to hand it over to the true owner if and when the latter's title is proved. If the doubt about the title arises subsequently to the beginning of possession, inquiry should be made, and if the doubt cannot be solved, the possessor may keep the property, for in doubt the possessor has the better claim. Fruits, as a general rule, follow the property, on the principle: *Accessorium sequitur principale*.

The deliberate causing of unjust damage to the property, reputation, or other strict rights of another imposes on him who does the damage the obligation of making restitution for it, as we have seen. For, although in this case there is no possession of what belongs to another, still the wronged person has not what in justice he should have, and that through the unjust action of him who did the damage. The latter therefore has unjustly taken away what belonged to the former, and he must restore to him something which is equivalent to the loss which he has suffered and which will balance it, so that equality between them may be restored. However, as a man is not in conscience responsible for damage which he caused inadvertently and by accident, the action which caused the damage must be voluntary, with at least some confused foreknowledge of its probable effects, in order that an obligation in conscience may arise to make compensation for the damage caused. Even though in a particular case there was no theological fault of this kind, as it is called by divines, yet sometimes if the amount of diligence was not used which the law requires in the case, the law imposes the obligation of making compensation to the injured party. There is then said to be juridical fault, and after the sentence of a competent authority has imposed the obligation of making compensation, it will be matter of conscience to obey the sentence. Besides being voluntary, the injurious action must be against commutative justice in order that an obligation to make restitution may arise from it. If while exercising my own right, as by putting on the market a new patent machine, I cause loss to others, I do not offend against justice, nor am I bound to make compensation for the loss caused to others. Neither is one responsible for damage to others of which he was the mere occasion, not the cause. Thus if the arrival in a city of some great personage causes a crowd to gather, and there is a crush, and an accident, by which damage is done to persons and to property, the great personage is the occasion of the damage, not the cause; and he is not bound to make restitution for it.

The foregoing principles are applicable whenever a strict right of another has been violated. Not only when property rights, or reputation, have been injured, but when spiritual rights to innocence, or true doctrine, or religious vocation, or any others of mind or body, intrinsic to man's nature or extrinsic, have been unjustly violated, restitution as far as possible must be made. The efficacy of the confessional in bringing about restitution of ill-gotten property and the reparation of injuries of whatever sort is too well-known to need more than mention here.

T. SLATER.

Restitution, EDICT OF. See AUGSBURG; FERDINAND II; GERMANY.

Resurrection is the rising again from the dead, the resumption of life. The Fourth Lateran Council teaches that all men, whether elect or reprobate, "will rise again with their own bodies which they now bear about with them" (cap. "Firmiter"). In the language of the creeds and professions of faith this return to life is called resurrection of the body

(*resurrectio carnis, resurrectio mortuorum, ἀνάστασις τῶν νεκρῶν*) for a double reason: first, since the soul cannot die, it cannot be said to return to life; secondly, the heretical contention of Hymeneus and Philetus that the Scriptures denote by resurrection not the return to life of the body, but the rising of the soul from the death of sin to the life of grace, must be excluded. We shall first treat of the Resurrection of Jesus Christ and then of the General Resurrection of the Body.

I. RESURRECTION OF JESUS CHRIST.—The fact of Christ's resurrection, the theories opposed to this fact, its characteristics, and the reasons for its importance must be considered in distinct paragraphs.

A. The Fact of Christ's Resurrection.—The main sources which directly attest the fact of Christ's Resurrection are the Four Gospels and the Epistles of St. Paul. Easter morning is so rich in incident, and so crowded with interested persons, that its complete history presents a rather complicated tableau. It is not surprising, therefore, that the partial accounts contained in each of the Four Gospels appear at first sight hard to harmonize. But whatever exegetic view as to the visit to the sepulchre by the pious women and the appearance of the angels we may defend, we cannot deny the Evangelists' agreement as to the fact that the risen Christ appeared to one or more persons. According to St. Matthew, He appeared to the holy women, and again on a mountain in Galilee; according to St. Mark, He was seen by Mary Magdalen, by the two disciples at Emmaus, and by the Eleven before His Ascension into heaven; according to St. Luke, He walked with the disciples to Emmaus, appeared to Peter and to the assembled disciples in Jerusalem; according to St. John, Jesus appeared to Mary Magdalen, to the ten Apostles on Easter Sunday, to the Eleven a week later, and to the seven disciples at the Sea of Tiberias. St. Paul (I Cor., xv, 3-8) enumerates another series of apparitions of Jesus after His Resurrection; he was seen by Cephas, by the Eleven, by more than 500 brethren, many of whom were still alive at the time of the Apostle's writing, by James, by all the Apostles, and lastly by Paul himself.

Here is an outline of a possible harmony of the Evangelists' account concerning the principal events of Easter Sunday: (1) The holy women carrying the spices previously prepared start out for the sepulchre before dawn, and reach it after sunrise; they are anxious about the heavy stone, but know nothing of the official guard of the sepulchre (Matt., xxviii, 1-3; Mark, xvi, 1-3; Luke, xxiv, 1; John, xx, 1). (2) The angel frightened the guards by his brightness, put them to flight, rolled away the stone, and seated himself (not upon, ἐπ' αὐτοῦ, but) above (ἐπάνω αὐτοῦ) the stone (Matt., xxviii, 2-4). (3) Mary Magdalen, Mary the Mother of James, and Salome approach the sepulchre, and see the stone rolled back, whereupon Mary Magdalen immediately returns to inform the Apostles (Mark, xvi, 4; Luke, xxiv, 2; John, xx, 1-2). (4) The other two holy women enter the sepulchre, find an angel seated in the vestibule, who shows them the empty sepulchre, announces the Resurrection, and commissions them to tell the disciples and Peter that they shall see Jesus in Galilee (Matt., xxviii, 5-7; Mark, xvi, 5-7). (5) A second group of holy women, consisting of Joanna and her companions, arrive at the sepulchre, where they have probably agreed to meet the first group, enter the empty interior, and are admonished by two angels that Jesus has risen according to His prediction (Luke, xxiv, 10). (6) Not long after, Peter and John, who were notified by Mary Magdalen, arrive at the sepulchre and find the linen cloth in such a position as to exclude the supposition that the body was stolen; for they lay simply flat on the

ground, showing that the sacred body had vanished out of them without touching them. When John notices this he believes (John, xv, 3-10). (7) Mary Magdalen returns to the sepulchre, sees first two angels within, and then Jesus Himself (John, xx, 11-16; Mark, xvi, 9). (8) The two groups of pious women, who probably met on their return to the city, are favoured with the sight of Christ arisen, who commissions them to tell His brethren that they will see Him in Galilee (Matt., xxviii, 8-10; Mark, xvi, 8). (9) The holy women relate their experiences to the Apostles, but find no belief (Mark, xvi, 10-11; Luke, xxiv, 9-11). (10) Jesus appears to the disciples at Emmaus, and they return to Jerusalem; the Apostles appear to waver between doubt and belief (Mark, xvi, 12-13; Luke, xxiv, 13-35). (11) Christ appears to Peter, and therefore Peter and John firmly believe in the Resurrection (Luke, xxiv, 34; John, xx, 8). (12) After the return of the disciples from Emmaus, Jesus appears to all the Apostles excepting Thomas (Mark, xvi, 14; Luke, xxiv, 36-43; John, xx, 19-25). The harmony of the other apparitions of Christ after His Resurrection presents no special difficulties.

Briefly, therefore, the fact of Christ's Resurrection is attested by more than 500 eyewitnesses, whose experience, simplicity, and uprightness of life rendered them incapable of inventing such a fable, who lived at a time when any attempt to deceive could have been easily discovered, who had nothing in this life to gain, but everything to lose by their testimony, whose moral courage exhibited in their apostolic life can be explained only by their intimate conviction of the objective truth of their message. Again the fact of Christ's Resurrection is attested by the eloquent silence of the Synagogue which had done everything to prevent deception, which could have easily discovered deception, if there had been any, which opposed only sleeping witnesses to the testimony of the Apostles, which did not punish the alleged carelessness of the official guard, and which could not answer the testimony of the Apostles except by threatening them "that they speak no more in this name to any man" (Acts, iv, 17). Finally, the thousands and millions, both Jews and Gentiles, who believed the testimony of the Apostles in spite of all the disadvantages following from such a belief, in short the origin of the Church, requires for its explanation the reality of Christ's Resurrection, for the rise of the Church without the Resurrection would be a greater miracle than the Resurrection itself.

B. Opposing Theories.—By what means can the evidence for Christ's Resurrection be overthrown? Three theories of explanation have been advanced, though the first two have hardly any adherents in our day. (1) There is the theory of those who assert that Christ did not really die upon the cross, that His supposed death was only a temporary swoon, and that His Resurrection was simply a return to consciousness. This was advocated by Paulus ("Exegetisches Handbuch", 1842, II, p. 929) and in a modified form by Hase ("Gesch. Jesu", §112), but it does not agree with the data furnished by the Gospels. The scourging and the crown of thorns, the carrying of the cross and the crucifixion, the three hours on the cross and the piercing of the Sufferer's side cannot have brought on a mere swoon. His real death is attested by the centurion and the soldiers, by the friends of Jesus and by his bitterest enemies. His stay in a sealed sepulchre for thirty-six hours, in an atmosphere poisoned by the exhalations of a hundred pounds of spices, would have of itself sufficed to cause death. Moreover, if Jesus had merely returned from a swoon, the feelings of Easter morning would have been those of sympathy rather than those of joy and triumph, the Apostles would have been roused to the duties of a sick chamber rather than to apos-

tolie work, the life of the powerful wonderworker would have ended in ignoble solitude and inglorious obscurity, and His vaunted sinlessness would have changed into His silent approval of a lie as the foundation stone of His Church. No wonder that later critics of the Resurrection, like Strauss, have heaped contempt on the old theory of a swoon.

(2) *Imposition Theory*.—The disciples, it is said, stole the body of Jesus from the grave, and then proclaimed to men that their Lord had risen. This theory was anticipated by the Jews who "gave a great sum of money to the soldiers, saying: Say you, His disciples came by night, and stole him away when we were asleep" (Matt., xxviii, 12 sq.). The same was urged by Celsus (Orig., "Contra Cels.", II, 56) with some difference of detail. But to assume that the Apostles with a burden of this kind upon their consciences could have preached a kingdom of truth and righteousness as the one great effort of their lives, and that for the sake of that kingdom they could have suffered even unto death, is to assume one of those moral impossibilities which may pass for a moment in the heat of controversy, but must be dismissed without delay in the hour of cool reflection.

(3) *Vision Theory*.—This theory as generally understood by its advocates does not allow visions caused by a Divine intervention, but only such as are the product of human agencies. For if a Divine intervention be admitted, we may as well believe, as far as principles are concerned, that God raised Jesus from the dead. But where in the present instance are the human agencies which might cause these visions? The idea of a resurrection from the grave was familiar to the disciples from their Jewish faith; they had also vague intimations in the prophecies of the Old Testament; finally, Jesus Himself had always associated His Resurrection with the predictions of His death. On the other hand, the disciples' state of mind was one of great excitement; they treasured the memory of Christ with a fondness which made it almost impossible for them to believe that He was gone. In short, their whole mental condition was such as needed only the application of a spark to kindle the flame. The spark was applied by Mary Magdalen, and the flame at once spread with the rapidity and force of a conflagration. What she believed that she had seen, others immediately believed that they must see. Their expectations were fulfilled, and the conviction seized the members of the early Church that the Lord had really risen from the dead.

Such is the vision theory commonly defended by recent critics of the Resurrection. But however ingeniously it may be devised, it is quite impossible from an historical point of view. (a) It is incompatible with the state of mind of the Apostles; the theory presupposes faith and expectancy on the part of the Apostles, while in point of fact the disciples' faith and expectancy followed their vision of the risen Christ. (b) It is inconsistent with the nature of Christ's manifestations; they ought to have been connected with heavenly glory, or they should have continued the former intimate relations of Jesus with His disciples, while actually and consistently they presented quite a new phase that could not have been expected. (c) It does not agree with the conditions of the early Christian community: after the first excitement of Easter Sunday, the disciples as a body are noted for their cool deliberation rather than the exalted enthusiasm of a community of visionaries. (d) It is incompatible with the length of time during which the apparitions lasted; visions such as the critics suppose have never been known to last long, while some of Christ's manifestations lasted a considerable period. (e) It is not consistent with the fact that the manifestations were made to numbers at the same instant. (f) It does not agree with the place

where most of the manifestations were made; visionary appearances would have been expected in Galilee, while most apparitions of Jesus occurred in Judea. (g) It is inconsistent with the fact that the visions came to a sudden end on the day of the Ascension.

Keim admits that enthusiasm, nervousness, and mental excitement on the part of the disciples do not supply a rational explanation of the facts as related in the Gospels. According to him, the visions were directly granted by God and the glorified Christ; they may even include a "corporeal appearance" for those who fear that without this they would lose all. But Keim's theory satisfies neither the Church, since it abandons all the proofs of a bodily resurrection of Jesus, nor the enemies of the Church, since it admits many of the Church's dogmas; nor again is it consistent with itself, since it grants God's special intervention in proof of the Church's faith, though it starts with the denial of the bodily Resurrection of Jesus, which is one of the principal objects of that faith.

(4) *Modernist View*.—The Holy Office describes and condemns, in the thirty-sixth and thirty-seventh propositions of the Decree "Lamentabili", the views advocated by a fourth class of opponents of the Resurrection. The former of these propositions reads: "The Resurrection of our Saviour is not properly a fact of the historical order, but a fact of the purely supernatural order neither proved nor provable, which Christian consciousness has little by little inferred from other facts." This statement agrees with, and is further explained by the words of Loisy ("Autour d'un petit livre", p. viii, 120-121, 169; "L'Evangile et l'Eglise", pp. 74-78; 120-121; 171). According to Loisy, firstly, the entrance into life immortal of one risen from the dead is not subject to observation; it is a supernatural, hyper-historical fact, not capable of historical proof. The proofs alleged for the Resurrection of Jesus Christ are inadequate; the empty sepulchre is only an indirect argument, while the apparitions of the risen Christ are open to suspicion on a priori grounds, being sensible impressions of a supernatural reality; and they are doubtful evidence from a critical point of view, on account of the discrepancies in the various Scriptural narratives, and the mixed character of the detail connected with the apparitions. Secondly, if one prescind from the faith of the Apostles, the testimony of the New Testament does not furnish a certain argument for the fact of the Resurrection. This faith of the Apostles is concerned not so much with the Resurrection of Jesus Christ as with His immortal life; being based on the apparitions, which are unsatisfactory evidence from an historical point of view, its force is appreciated only by faith itself; being a development of the idea of an immortal Messiah, it is an evolution of Christian consciousness, though it is at the same time a corrective of the scandal of the Cross. The Holy Office rejects this view of the Resurrection when it condemns the thirty-seventh proposition in the Decree "Lamentabili": "The faith in the Resurrection of Christ pointed at the beginning not so much to the fact of the Resurrection, as to the immortal life of Christ with God."

Besides the authoritative rejection of the foregoing view, we may submit the following three considerations which render it untenable: First, the contention that the Resurrection of Christ cannot be proved historically is not in accord with science. Science does not know enough about the limitations and the properties of a body raised from the dead to immortal life to warrant the assertion that such a body cannot be perceived by the senses; again, in the case of Christ, the empty sepulchre with all its concrete circumstances cannot be explained except by a miraculous Divine intervention as supernatural in its character as the Resurrection of Jesus. Secondly, history

does not allow us to regard the belief in the Resurrection as the result of a gradual evolution in Christian consciousness. The apparitions were not a mere projection of the disciples' Messianic hope and expectation; their Messianic hope and expectations had to be revived by the apparitions. Again, the Apostles did not begin with preaching the immortal life of Christ with God, but they preached Christ's Resurrection from the very beginning, they insisted on it as a fundamental fact, and they described even some of the details connected with this fact: Acts, ii, 24, 31; iii, 15, 26; iv, 10; v, 30; x, 39-40; xiii, 30, 37; xvii, 31-32; Rom., i, 4; iv, 25; vi, 4, 9; viii, 11, 34; x, 7; xiv, 9; I Cor., xv, 4, 13 sqq.; etc. Thirdly, the denial of the historical certainty of Christ's Resurrection involves several historical blunders: it questions the objective reality of the apparitions without any historical grounds for such a doubt; it denies the fact of the empty sepulchre in spite of solid historical evidence to the contrary; it questions even the fact of Christ's burial in Joseph's sepulchre, though this fact is based on the clear and simply unimpeachable testimony of history (cf. Lepin, "Christologie. Commentaire des Propositions XXVII-XXXVIII du Décret du Saint Office 'Lamentabili'", Paris, 1908).

D. *Character of Christ's Resurrection.*—The Resurrection of Christ has much in common with the general resurrection; even the transformation of His body and of His bodily life is of the same kind as that which awaits the blessed in their resurrection. But the following peculiarities must be noted: (1) Christ's Resurrection is necessarily a glorious one; it implies not merely the reunion of body and soul, but also the glorification of the body. (2) Christ's body was to know no corruption, but rose again soon after death, when sufficient time had elapsed to leave no doubt as to the reality of His death. (3) Christ was the first to rise unto life immortal; those raised before Him died again (Col., i, 18; I Cor., xv, 20). (4) As the Divine power which raised Christ from the grave was His own power, He rose from the dead by His own power (John, ii, 19; x, 17-18). (5) Since the Resurrection had been promised as the main proof of Christ's Divine mission, it has a greater dogmatic importance than any other fact. "If Christ be not risen again, then is our preaching vain, and your faith is also vain" (I Cor., xv, 14).

E. *Importance of the Resurrection.*—Besides being the fundamental argument for our Christian belief, the Resurrection is important for the following reasons: (1) It shows the justice of God who exalted Christ to a life of glory, as Christ had humbled Himself unto death (Phil., ii, 8-9). (2) The Resurrection completed the mystery of our salvation and redemption; by His death Christ freed us from sin, and by His Resurrection He restored to us the most important privileges lost by sin (Rom., iv, 25). (3) By His Resurrection we acknowledge Christ as the immortal God, the efficient and exemplary cause of our own resurrection (I Cor., xv, 21; Phil., iii, 20-21), and as the model and the support of our new life of grace (Rom., vi, 4-6; 9-11).

II. GENERAL RESURRECTION.—"No doctrine of the Christian Faith", says St. Augustine, "is so vehemently and so obstinately opposed as the doctrine of the resurrection of the flesh" (In Ps. lxxxviii, sermo ii, n. 5). This opposition had begun long before the days of St. Augustine: "And certain philosophers of the Epicureans and of the Stoics", the inspired writer tells us (Acts, xvii, 18, 32), "disputed with him [Paul] . . . and when they had heard of the resurrection of the dead, some indeed mocked, but others said: We will hear thee again concerning this matter." Among the opponents of the Resurrection we naturally find first all those who denied the immortality of the soul; secondly, all those who, like Plato, regarded the body as the prison of the soul and death as an escape from

the bondage of matter; thirdly, the sects of the Gnostics and Manichæans who looked upon all matter as evil; fourthly, the followers of these latter sects, the Priscillianists, the Cathari, and the Albigenses; fifthly, the Rationalists, Materialists, and Pantheists of later times. Against all these we shall first establish the dogma of the resurrection, and secondly consider the characteristics of the risen body.

A. *Dogma of the Resurrection.*—The creeds and professions of faith and conciliar definitions do not leave it doubtful that the resurrection of the body is a dogma or an article of faith. We may appeal, for instance, to the Apostles' Creed, the so-called Nicene and Athanasian Creeds, the Creed of the Eleventh Council of Toledo, the Creed of Leo IX, subscribed by Bishop Peter and still in use at the consecration of bishops, the profession of faith subscribed by Michael Palæologus in the Second Council of Lyons, the Creed of Pius IV, and the Decree of the Fourth Lateran Council (c. "Firmiter") against the Albigenses. This article of faith is based on the belief of the Old Testament, on the teaching of the New Testament, and on Christian tradition.

(1) *Old Testament.*—The words of Martha and the history of the Machabees show the Jewish belief towards the end of the Jewish economy. "I know", says Martha, "that He shall rise again, in the resurrection at the last day" (John, xi, 24). And the third of the Machabee martyrs put forth his tongue and stretched out his hands, saying: "These I have from heaven, but for the laws of God I now despise them: because I hope to receive them again from him" (II Mach., xii, 11; cf. ix, 14). The Book of Daniel (xii, 2; cf. 12) inculcates the same belief: "Many of those that sleep in the dust of the earth, shall awake: some unto life everlasting, and others unto reproach, to see it always." The word *many* must be understood in the light of its meaning in other passages, e. g. Is., liii, 11-12; Matt., xxvi, 28; Rom., v, 18-19. Though Ezechiel's vision of the resurrection of the dry bones refers directly to the restoration of Israel, such a figure would be hardly intelligible except by readers familiar with the belief in a literal resurrection (Ez., xxxvii). The Prophet Isaias foretells that the Lord of hosts "shall cast down death headlong for ever" (xxv, 8), and a little later he adds: "Thy dead men shall live, my slain shall rise again . . . the earth shall disclose her blood, and shall cover her slain no more" (xxvi, 19-21). Finally, Job, bereft of all human comfort and reduced to the greatest desolation, is strengthened by the thought of the resurrection of his body: "I know that my Redeemer liveth, and in the last day I shall rise out of the earth. And I shall be clothed again with my skin, and in my flesh I shall see God. Whom I myself shall see, and my eyes shall behold, and not another; this hope is laid up in my bosom" (Job, xix, 25-27). The literal translation of the Hebrew text differs somewhat from the foregoing quotation, but the hope of resurrection remains.

(2) *New Testament.*—The resurrection of the dead was expressly taught by Christ (John, v, 28-29; vi, 39-40; xi, 25; Luke, xiv, 14) and defended against the unbelief of the Sadducees, whom He charged with ignorance of the power of God and of the Scriptures (Matt., xxii, 29; Luke, xx, 37). St. Paul places the general resurrection on the same level of certainty with that of Christ's Resurrection: "If Christ be preached, that he rose again from the dead, how do some among you say that there is no resurrection of the dead? But if there be no resurrection of the dead, then Christ is not risen again. And if Christ be not risen again, then is our preaching vain, and your faith is also vain" (I Cor., xv, 12 sqq.). The Apostle preached the resurrection of the dead as one of the fundamental doctrines of Christianity,

at Athens, for instance (Acts, xvii, 18, 31, 32), at Jerusalem (xxiii, 6), before Felix (xxiv, 15), before Agrippa (xxvi, 8). He insists on the same doctrine in his Epistles (Rom., viii, 11; I Cor., vi, 14; xv, 12 sqq.; II Cor., iv, 14; v, 1 sqq.; Phil., iii, 21; I Thess., iv, 12-16; II Tim., ii, 11; Hebr., vi, 2), and in this he agrees with the Apocalypse (xx, 12 sqq.).

(3) *Tradition*.—It is not surprising that the Tradition of the early Church agrees with the clear teaching of both the Old and New Testaments. We have already referred to a number of creeds and professions of faith which may be considered as part of the Church's official expression of her faith. Here we have only to point out a number of patristic passages, in which the Fathers teach the doctrine of the general resurrection in more or less explicit terms. St. Clement of Rome, I Cor., xxv; St. Justin Martyr, "De resurrect.", vii sqq.; Idem, "Dial. c. Tryph.", lxxx; Athenagoras, "De resur. carn.", iii; Tatian, "Adv. Græc.", vi; St. Irenæus, "Contra hæc.", I, x; V, vi, 2; Tertullian, "Contra Marcion.", V, ix; Idem, "De præscript.", xiii; Idem, "De resurrect. carn.", I, xii, xv, lxiii; Minucius Felix, "Octav.", xxxiv; Origen, tom. XVII, in Matt., xxix; Idem, "De princip.", præf., v; Idem, "In Lev.", v, 10; Hippolytus, "Adv. Græc." in P. G., X, 799; St. Cyril of Jerusalem, "Cat.", XVIII, xv; St. Ephraem, "De resurrect. mort."; St. Basil, "Ep. cclxxi", 3; St. Epiphanius, "In ancor.", lxxxiii sq., xcix; St. Ambrose, "De excessu frat. sui Satyri", II, lxvii, cii; Idem, "In Ps. cxviii", serm. x, n. 18; Ps. Ambr., "De Trinit.", xxiii, in P. L., XVII, 534; St. Jerome, "Ep. ad Paul" in LIII, 8; Rufinus, "In symbol.", xliv sq.; St. Chrysostom (Ps. Chrysostom), "Fragm. in libr. Job" in P. G., LXIV, 619; St. Peter Chrysologus, serm. 103, 118; "Apost. Constit.", VII, xli; St. Augustine "Enchirid.", 84; Idem, "De civit. Dei", XX, xx; Theodoret, "De provident.", or. ix; "Hist. eccl.", I, iii.

The general resurrection can hardly be proved from reason, though we may show its congruity. (a) As the soul has a natural propensity to the body, its perpetual separation from the body would seem unnatural. (b) As the body is the partner of the soul's crimes, and the companion of her virtues, the justice of God seems to demand that the body be the sharer in the soul's punishment and reward. (c) As the soul separated from the body is naturally imperfect, the consummation of its happiness, replete with every good, seems to demand the resurrection of the body. The first of these reasons appears to be urged by Christ Himself in Matt., xxii, 23; the second reminds one of the words of St. Paul, I Cor., xv, 19, and II Thess., i 4. Besides urging the foregoing arguments, the Fathers appeal also to certain analogies found in revelation and in nature itself, e. g. Jonas in the whale's belly, the three children in the fiery furnace, Daniel in the lions' den, the carrying away of Henoch and Elias, the raising of the dead, the blossoming of Aaron's rod, the preservation of the garments of the Israelites in the desert, the grain of seed dying and springing up again, the egg, the season of the year, the succession of day and night. Many pictures of early Christian art express these analogies (Kraus, "Encycl. Archæol.", s. v. Auferstehung; Northcote and Brownlow, "Roma Sotterranea"). But in spite of the foregoing congruities, theologians more generally incline to the opinion that in the state of pure nature there would have been no resurrection of the body.

B. *Characteristics of the Risen Body*.—All shall rise from the dead in their own, in their entire, and in immortal bodies; but the good shall rise to the resurrection of life, the wicked to the resurrection of judgment. It would destroy the very idea of resurrection, if the dead were to rise in bodies not their

own. Again, the resurrection, like the creation, is to be numbered amongst the principal works of God; hence, as at the creation all things came perfect from the hand of God, so at the resurrection all things must be perfectly restored by the same omnipotent hand. But there is a difference between the earthly and the risen body; for the risen bodies of both saints and sinners shall be invested with immortality. This admirable restoration of nature is the result of the glorious triumph of Christ over death as described in several texts of Sacred Scripture: Is., xxv, 8; Osee, xiii, 14; I Cor., xv, 26; Apoc., ii, 4. But while the just shall enjoy an endless felicity in the entirety of their restored members, the wicked "shall seek death, and shall not find it, shall desire to die, and death shall fly from them" (Apoc., ix, 6).

These three characteristics, identity, entirety, and immortality, will be common to the risen bodies of the just and the wicked. But the bodies of the saints shall be distinguished by four transcendent endowments, often called qualities. The first is "impassibility", which shall place them beyond the reach of pain and inconvenience. "It is sown", says the Apostle, "in corruption, it shall rise in incorruption" (I Cor., xv, 42). The Schoolmen call this quality impassibility, not incorruption, so as to mark it as a peculiarity of the glorified body; the bodies of the damned will be incorruptible indeed, but not impassible; they shall be subject to heat and cold, and all manner of pain. The next quality is "brightness", or "glory", by which the bodies of the saints shall shine like the sun. "It is sown in dishonour," says the Apostle, "it shall rise in glory" (I Cor., xv, 43; cf. Matt., xiii, 43; xvii, 2; Phil., iii, 21). All the bodies of the saints shall be equally impassible, but they shall be endowed with different degrees of glory. According to St. Paul: "One is the glory of the sun, another the glory of the moon, another the glory of the stars. For star differeth from star in glory" (I Cor., xv, 41-42). The third quality is that of "agility", by which the body shall be freed from its slowness of motion, and endowed with the capability of moving with the utmost facility and quickness wherever the soul pleases. The Apostle says: "It is sown in weakness, it shall rise in power" (I Cor., xv, 43). The fourth quality is "subtility", by which the body becomes subject to the absolute dominion of the soul. This is inferred from the words of the Apostle: "It is sown a natural body, it shall rise a spiritual body" (I Cor., xv, 44). The body participates in the soul's more perfect and spiritual life to such an extent that it becomes itself like a spirit. We see this quality exemplified in the fact that Christ passed through material objects.

Not to mention the pertinent chapters in our current apologetic and theological treatises, or the commentaries on the principal passages of Sacred Scripture cited in the course of the article, we shall only indicate a number of monographs on the questions implied in the dogmas of the Resurrection of Christ and of the general resurrection: CELLINI, *Gli ultimi capi del Tetramorfo e la critica razionalistica, cioè l'armonia dei quattro Evangelii* (Rome, 1906); DENTLER, *Die Auferstehung Jesu Christi nach den Berichten des NT. in NIKEL und ROHR, Biblische Zeitschriften*, I (Münster, 1908), 6; KULLMANN, *Die Wacht am Grabe Christi und die Leugner seiner Auferstehung* (Würzburg, 1887); SCHULTE, *Das Osterwunder in der neueren Theologie in Theologie und Glaube* (1909); LADEUZE, *La résurrection du Christ devant la critique contemporaine*; MANGENOT, a series of articles in *Revue pratique d'apologétique* (1908-9); PRAT, *La théologie de S. Paul* (Paris, 1908), 185-94; BAUTZ, *Die Lehre vom Auferstehungsleibe* (1877); ATZBERGER, *Die christliche Eschatologie* (1890); WILHELM AND SCANNELL, *Manual of Catholic Theology*, II (London, 1898), 179, 535 sqq.; MILLIGAN, *The Resurrection of Our Lord* (London, 1884); COX, *The Resurrection* (London, 1890); WILLIAMS, *Our Lord's Resurrection* (London, 1882); WESTCOTT, *The Gospel of the Resurrection* (London, 1884); PLUMMER, *I Corinthians, in the International Critical Commentary* (New York, 1911), 328-87; SIMPSON, *The Resurrection and Modern Thought* (London, 1911).

A. J. MAAS.

Resurrection, CONGREGATION OF THE, founded in Paris, 1836, by Bogdan Jański, Peter Semenenko,

and Jerome Kajsiewicz, and approved by the Holy See, 1902. Bogdan Jański, b. at Ciechanowiec, Poland, 1807, was sent by the Polish Administration to complete his studies at Paris, where he lost the faith and joined the Saint-Simonists. He assisted the Polish exiles who fled to Paris after their insurrection of 1830, and, gradually perceiving the fallacy of Saint-Simonism, he again embraced the Faith. Realizing that the great need of his countrymen was the Catholic Church, he with the poet Mickiewicz laboured zealously among the exiles, strengthening the weak and winning back the apostate. Among the latter were Peter Semenenko and Jerome Kajsiewicz, who wished to enter the priesthood. When Jański confided to them his plan for a religious community, they joined him, and Semenenko became the chief founder and organizer.

Peter Semenenko, son of a schismatic father who abandoned the faith while at the Russian Court, and of a Protestant mother, was born in Russian Poland, 1814, baptized by a Catholic priest (probably for want of a schismatic) and so strongly desired to receive Holy Communion in the Catholic Church that he was secretly instructed by the Fathers of the Mission and when eleven received the Sacrament. For this he was harshly treated by his relatives. He graduated from the gymnasium at Koze, 1829, and entered the University of Vilna. Imperfectly grounded in religion, and left without spiritual guidance, he finally lost his faith and became an avowed infidel. He joined the Polish Insurrection and after the defeat of the insurgents sought refuge in Paris, where in both Polish and French he agitated against every legitimate authority by speech and writing. An order for his arrest was issued, but before its execution Semenenko, through the salutary influence of Jański, had renounced his revolutionary principles, and the warrant was withdrawn.

Jerome Kajsiewicz, born at Slowiki, Poland, 1812, entered the gymnasium, 1827, and the University of Cracow, 1829, and soon joined the Polish Insurrection. He had ceased to practice his faith through godless education and perverse companionship. In an engagement with the Russians he was surrounded by the enemy's forces and seriously wounded. Before losing consciousness he promised, if freed from this imminent danger, to consecrate himself to the service of God for life. In a semi-conscious condition he was brought into the Russian camp and thrown on the snow with other prisoners. Rescued by a Polish detachment, he was placed in a hospital and, when he had sufficiently recovered his strength, journeyed to France, where he joined the Carbonari at Besançon. He soon saw the impiety of the secret societies with which he was associated, and withdrew from them. At Paris he met Mickiewicz, Jański, and Semenenko, through whose influence he returned to the Church.

Under the direction of Jański a religious community was formed by Semenenko, Kajsiewicz, and two other associates at Paris in 1836. Semenenko and Kajsiewicz continued their studies and were prefects of discipline at the College of St. Stanislaus. They subsequently adopted the disciplinary system of that institution. They went to Rome (1837) intending to complete their theological studies at the Propaganda, where Count Zamojski had obtained from Gregory XVI several free scholarships for Polish students, but, being Russian exiles without passports and other necessary papers, they were not admitted. Father Suszynski, S.J., collected a small sum of money for them and they lived for a month on twenty cents a day. Admitted as prefects in an orphan asylum, they were enabled to continue their studies for the priesthood and upon the arrival of two other companions (1838) led a community life of extreme poverty, having no personal income.

Jański, who had continued his apostolic work in Paris, came to Rome in 1840 and being in delicate health, worn out with labours, privations and hardships, died after six months. He had remained a layman.

When ready for Holy orders, Semenenko and Kajsiewicz were accused of being political agents and were denied ordination. Unwilling to join the Diocese of Rome to procure their "titulus ordinationis", as this would preclude the formation of their new Congregation, they were assisted by Count Montalembert, who prevailed on the Archbishop of Paris to confer Holy orders on them but exempt them from service in his diocese.

On Holy Saturday, 1842, Semenenko was unanimously chosen Superior and on Easter Sunday celebrated Mass in the Catacombs of Saint Sebastian, where, at the suggestion of Cardinal Micara, he and his six companions made their vows for five years. The name "Congregation of the Resurrection of Our Lord Jesus Christ" was suggested by the feast of the day. Their intention was to live according to the rule of some religious order already approved by the Church; but during an audience on 28 December, 1847, Pius IX advised them to formulate entirely new constitutions, as he knew of no religious rule suitable to their special aim. These were compiled by Father Semenenko and approved by the Holy See in 1902.

The habit adopted is that of the secular clergy with the addition of a black woollen girdle. No special mortifications are prescribed, save a fast on the vigils of the feasts of the Immaculate Conception, Seven Dolours, and Assumption of the Blessed Virgin Mary. A postulate of six months is followed by a novitiate of one year; at the end of the third year of an aluminate of six years' duration, clerical students are admitted to perpetual vows, while lay brothers take their final vows six years after the novitiate. The members of this congregation may belong to the Latin or the Greek Rite. The mother-house is at Rome, where reside the superior-general and his council. The superior-general, his council, and the procurator-general are elected by the General Chapter for a term of six years. These officials, the ex-superiors general, and two delegates, chosen by the Fathers of certain districts defined for this purpose, constitute the Chapter. Superiors, appointed by the general and his council for a term of three years, and the general may hold office for two consecutive terms; a third term requires a dispensation from the Holy See. Canonically established houses consist of at least six priests; missions where less than six reside are held by the papal indult and are subject to some house. The Congregation devotes itself to work in parishes and missions, held by them under the same conditions as by the secular clergy, and to the education of youth in colleges and seminaries. Both Fathers Semenenko and Kajsiewicz died as superiors general; the former in Paris, 1886; the latter in Rome, 1873.

Retable. See ALTAR, sub-title ALTAR-SCREEN.

Rethel, ALFRED, b. at Aachen, 1816; d. at Düsseldorf, 1859. He combined in a brilliant and forcible manner the idealism of the Romantics and Italians, the realism of Dürer, a sense of the monumental and strict adherence to nature. He might have been the greatest of German painters, but ill health crippled his energy. Recommended to Schadow by his teacher Bastine, his first oil-painting was exhibited at Düsseldorf in 1832; it represents St. Boniface, as do two other large canvasses and several sketches, which recall the realistic, powerful style of Lessing. The sketches of the "Battle of Sempach" and the "Death of Arnold von Winkel-

ried" betray the influence of Cornelius. The development of his sense of colour and expressive dramatic spirit belong to his period of attachment to Veit (1836). The "Reconciliation of Emperor Otto I with his brother Henry" and "The Monk at the Coffin of Henry IV" are important works. In the "Nemesis pursuing a Murderer" is already crystallized the darker mood, which clouded the later life of the painter. For the Kaisersaal in Frankfort he painted four characteristic pictures of monarchs. With great admiration he studied the glowing colouring of Titian in strong contrast to the pale art of the Nazarene. After this many-sided training follow his ripest works: "Hannibal's March" powerfully depicts in six pictures the crossing of the Alps; in the "Frescoes from the Life of Charlemagne", in the Rathaus at Aachen (see illustration in CHARLEMAGNE), the composition and colouring are both restrained and effective; his assistant Kehren completed the series with four greatly inferior pictures; the "Death Dance" depicts the horror of the Revolution of 1848. His superhuman strivings after the ideal were little appreciated by his townsmen and contemporaries. A softening of the brain afflicted him during his last years.

Retreat, CONGREGATION OF CHRISTIAN. See CHRISTIAN RETREAT, CONGREGATION OF.

Retreat, HOUSES OF CORRECTIONAL. See PRISONS, ECCLESIASTICAL.

Retreat of the Sacred Heart, CONGREGATION OF THE (DAMES DE LA RETRAITE).—Originally founded in 1678 under the name of the Institute of Retreat, at Quimper, in Brittany, by Mademoiselle Claude-Thérèse de Kerméno under the direction of the Jesuit Father Huby. The holy foundress having made a retreat in a convent which accommodated ladies who desired to retire from the world and follow the exercises of St. Ignatius, conceived the idea of founding a similar convent at Quimper. Later the sisters took the name of the Dames de la retraite. During the French Revolution they were dispersed for refusing to take the oath of allegiance. On 17 July, 1794, one of their number, Mademoiselle Victoire de St-Luc, suffered martyrdom for her devotion to the Sacred Heart by the guillotine. Her glorious death caused the institute to flourish, the members consecrated themselves to the Sacred Heart, and in 1805 began again the work of providing retreats for seculars, interrupted in 1791. The religious and administrative authorities in France then required the sisters to add the education of youth to their other work, and they now have large schools

in various places in England, France, and Belgium. In 1820 two sisters from Quimper opened a house at Redon (Ille-et-Vilaine), which eventually became the cradle of the Retreat of Angers. Meantime the mother-house at Quimper in 1808 opened a house at Quimperlé; in 1820 one at Lesneven (Finistère); in 1847 one at Pontchâteau (Loire-Inférieure), and in 1858 one at Brest (Finistère). The following convents were founded by the Retreat of Angers: in 1820, Redon; in 1844, Saumur (Maine-et-Loire); in 1857, a second house at Angers called l'Oratoire, and in 1893 one at Fontenay-sous-Bois (Seine). In 1880 the sisters went to England and the flourishing convent at Clapham Park was founded from Angers. In 1882 a convent was opened at Burnham, in Somersetshire, from Quimper, and after the union of Quimper and Angers (1897), another convent was opened at Weston-super-Mare, Somerset, and in 1904, one at Clevedon. In 1898 a house at Mentone was opened, and in 1899 a large educational establishment at Brussels. The institute and its constitutions were approved definitively by the Holy See in 1910.

FRANCESCA M. STEELE.

Retreats.—If we call a retreat a series of days passed in solitude and consecrated to practices of asceticism, in particular to prayer and penance, it is as old as Christianity. Without referring to the cus-

tom of the Prophets of the Old Testament, the forty days which Jesus Christ passed in the desert after His baptism is an example which has found many imitators in all ages of the Church. From this imitation sprang the eremitical life and the institution of the cenobites. The religious who sought the solitude of the deserts or the monasteries, or in general those wishing to lead a contemplative life withdrew from the world, in order the

FROM THE DEATH DANCE SERIES BY ALFRED RETHEL

more readily to draw nearer to God and apply themselves to exercises of Christian perfection. The "Forma cleri" of Tronson, t. IV, gives numerous texts of the Fathers and ecclesiastical writers, recommending a retreat for at least a few days. According to St. Francis de Sales (Treatise on the Love of God, XII, chap. vii), the practice of the retreat was specially restored by St. Ignatius Loyola. We may say indeed that in his "Spiritual Exercises" St. Ignatius has combined the methods of reforming one's life and seeking the will of God in solitude. The Society of Jesus was the first active religious order in which the practice of the retreat became obligatory by rule. St. Francis of Assisi and his first companions occasionally retired to hermitages where they gave themselves up to prayer and mortification. St. Ignatius prescribed for his religious the exercises of

thirty days ■ an indispensable experience before admission to the vows. The custom was introduced later of repeating this thirty days' retreat during a month of the third probation, and the usage was established little by little of renewing it in an abridged form each year during eight days. This custom obtained the force of law by decree of the Sixth General Congregation, held in 1608, besides being imitated in other religious orders, and encouraged by a Bull of Pope Paul V, 1606.

The Society of Jesus did not reserve these exercises for its own exclusive use, but gave them to communities and individuals. Blessed Peter Faber in his "Memoriale" testifies to having given them to the grandees of Spain, Italy, and Germany, and used them in restoring hundreds of convents to their first fervour. A letter of St. Ignatius (3 Feb., 1554) recommends giving the exercises publicly in the churches. In addition, the houses of the Society often contained rooms for priests or laymen desirous of performing the exercises privately. Ignatius, having sanctioned this custom during his lifetime, one of his successors, Aquaviva, exhorted the provincials to its maintenance in 1599. In studying the spread of this practice we must not neglect the influence of St. Charles Borromeo. The cardinal and the Jesuits co-operated in order to promote this sort of apostolate. A fervent admirer and disciple of the "Spiritual Exercises", St. Charles introduced them as a regular practice among the secular clergy by retreats for seminarians and candidates for ordination. He built at Milan an *asceterium*, or house solely destined to receive those making retreats, whose direction he confided to the Oblates. The zeal of St. Charles was effectual in encouraging the sons of St. Ignatius to adopt definitively the annual retreat, and to organize outside collective retreats of priests and laymen.

Two other saints furthered the practice. St. Francis de Sales, whose veneration for the Archbishop of Milan and his works is well known, made the retreat, praised it, and made it familiar to the Order of the Visitation, of which he was the founder (Const. XLVI). Then came St. Vincent de Paul, chosen by St. Francis de Sales to be the spiritual father of the Visitation in Paris. He was the organizer of ecclesiastical retreats in France, the plan of which had been already proposed in 1625, at the assembly of the clergy, by a *curé* of Normandy, Charles Dodefroy, in a small work, entitled "Le collège des saints exercices". St. Vincent de Paul established retreats for candidates for ordination first at Beauvais (1628), afterwards at Paris (1631). They took place six times a year under his direction at the Collège des Bons-Enfants. Soon other clerics than those of the Diocese of Paris were admitted; and when Saint-Lazare had been acquired (1634) this house was opened indiscriminately as a retreat for clergy, nobility, and people. In St. Vincent's time about 20,000 persons made retreats there. M. de Bérulle, founder of the Oratory, and M. Olier, founder of Saint-Sulpice, seconded this movement of reform and sanctification. From the middle of the seventeenth century, the synodal statutes prescribed that the clergy should make a retreat from time to time. Sometimes it was made obligatory for those who obtained benefices with the cure of souls. In a word, the retreat was thenceforth an established custom of pious ecclesiastics. In 1663 M. de Kerlivio, who knew the excellent results obtained at Saint-Lazare, founded a house of retreat for men at Vannes in Brittany, with the co-operation of P. Huby, S.J. This institution has a special importance in the history of retreats, because the regulations of Vannes generally guided the directors of other houses which the Jesuits established. These were at Quimper, Rennes, Nantes, Rouen, Paris, Dijon, Nancy, and soon in most of the large cities of France. Often, besides the house of retreat for men, one would be erected for women: as at

Vannes, thanks to the Venerable Catherine de Francheville, at Rennes, at Quimper, at Paris, Nantes, etc. With a view to organizing and facilitating retreats for women, there were formed, particularly in Brittany, congregations of Ladies of the Retreat which are still in existence.

France was not alone in having houses of exercises. They were established in Germany at Munich and Prague; in Spain, at Barcelona and Gerona; in Italy, at Rome, Perugia, Ancona, and Milan; in Sicily, at Palermo, Alcamo, Mazzara, Termini, Messina, etc.; in Poland, at Vilna; in Mexico, at Mexico City and Pueblo. The enumeration is necessarily incomplete; it should include missionary countries, Canada, Chile, China, etc. Nor were Jesuits the only ones to busy themselves with retreats: Franciscans, Benedictines, Lazarists, Eudists, Oratorians, Passionists, Redemptorists, and others vied with them in zeal. But the suppression of the Society struck a fatal blow at the work in many a country. In Brittany, the classic land of retreats, various religious, and principally priests, continued this ministry of the Jesuits. In Franche-Comté a saintly *curé*, the Venerable Antoine Receveur, organized the Congregation of Christian Retreat to secure for men and women the benefits of spiritual exercises. In Italy, the Venerable Bruno Lanteri instituted a society of priests, the Oblates of the Blessed Virgin Mary, who were occupied only with retreats. St. Alphonsus Liguori, who from his youth had followed the exercises among the Jesuits or among the Lazarists, could not neglect this means of apostleship. He adopted it as one of his own practices and prescribed it for the Congregation of the Most Holy Redeemer. Thus the Redemptorists kept up the custom of retreats in the Kingdoms of Naples and Sicily during the second half of the eighteenth century. In Argentina and Paraguay the retreats continued, thanks to the extraordinary initiative given by Maria-Antonia de San José de La Paz (1730-1799). Aided by several priests and various religious orders, she succeeded in having the exercises performed by nearly 100,000 persons.

Annual ecclesiastical retreats began as a general thing in France and other countries in 1815. Numerous promoters of these retreats came from the ranks of the secular clergy as well as from the regular orders. A large number of directors are annually engaged in giving retreats to the religious communities. Several institutions perform the complete exercises of twenty to thirty days. But there were not only priestly or conventual retreats; they were made by the faithful, grouped in parishes or in congregations, brotherhoods, third orders, etc. Thus retreats are conducted for employees, working-men, teachers, conscripts, deaf-mutes, etc. We may also mention retreats at the close of a course of study, established in the College of St. Acheul at Amiens in 1825, and which, spreading by degrees, led to the organization of retreats among the *alumni*, a custom that has become quite general. There has been no lack of co-operation in this great work of regeneration: bishops threw open their seminaries to the laity, the Christian nobility lent their châteaux; the religious orders—Benedictines, Cistercians, Carthusians, Dominicans, Franciscans, Lazarists, Eudists, Redemptorists, Passionists, the Society of Mary, Brothers of St. Vincent de Paul, and Brothers of the Christian Schools, all encouraged the retreat, either by providing suitable places for the purpose, or by furnishing directors. The Jesuits alone possessed twelve houses of exercises on French territory before 1901; they now have seven in Belgium and others in Spain, Austria, Italy, Holland, England, Canada, United States, Colombia, Chile, and various other countries of America, North and South. They have established houses in Australia, China, India, Ceylon, and Madagascar. Besides the Breton congregations already spoken of, new societies especially devoted to

retreats for women have been formed, such as Notre Dame du Cenacle, and Marie Reparatrice.

Retreats for laymen have spread greatly throughout the Catholic world during the last twenty-five years. A French Jesuit, Père Henry, was the pioneer in this great revival. In 1882 he gave himself to the task of instituting retreats for working-men, and it was not long before houses devoted to this purpose were founded all over Europe. During 1908, in Belgium alone 243 retreats were given, attended by 10,253 exercitants, and since 1890 in that country at least 100,000 of the labouring classes and about 25,000 professional and business men have made retreats. France, Germany, and Holland and other European States have also extended the work with gratifying results. In one house in France, Notre Dame du Haut-Mont, more than 30,500 men have made the retreat within the last twenty-five years. England and Ireland have taken up the movement, and are at present engaged with retreat organizations, as also is Canada. In the United States a generous response has been given to the movement, and a house of retreat has been founded (1911) on Staten Island, New York City.

The principal reason of the success of these retreats, called cloistered to distinguish them from the parochial retreats open to all, is their very necessity. In the fever and agitation of modern life, the need of meditation and spiritual repose impresses itself on Christian souls who desire to reflect on their eternal destiny, and direct their life in this world towards God.

PAUL DEBUCHY.

Retz, JEAN-FRANÇOIS-PAUL-GONDI, CARDINAL DE, ARCHBISHOP OF PARIS, b. at the Château of Montmirail, Oct., 1614; d. in Paris, 24 Aug., 1679. His father, becoming a widower, entered the Oratory, and was for a time (1643) the director of Anne of Austria. Retz was destined for the Church, although, as he himself declares, he "had neither the taste nor the disposition for it"; his preceptor was St. Vincent de Paul. His youth was stormy, not exempt from gallantries. However, he acquired a solid education, learned seven languages, studied sacred and profane literature and from reading Plutarch and Sallust developed a wild taste for republican maxims, and for the rôle of conspirator. This taste reveals itself when at the age of eighteen years he wrote a book on the conspiracy of Fieschi. He imitated an Italian author named Mascardi, but while Mascardi blamed the conspiracy, the young Retz approved of it. From 1638 to 1641 he took a certain part in the plots of the Count de Soissons against Richelieu; later, after the Count had been killed at the battle of La Marfée (6 July, 1641), Retz devoted himself definitively to an ecclesiastical career. Louis XIII on his death-bed named him coadjutor to his uncle, Gondi, Archbishop of Paris; on 31 Jan., 1644, Retz was consecrated at Notre Dame, receiving the title of Archbishop of Corinth. He soon became popular in Paris by his sermons, and by his manner of reforming the priests of the diocese. This popularity brought upon him the hostility of Mazarin, especially as in 1649 he threw himself into the movement of the so-called Fronde against this minister. He knew how to stir up the peasantry against the cardinal, the Parlement, and the Duke of Orléans. But he hated Condé, the head of the Fronde princes, as much as he hated Mazarin, and when the Prince de Condé openly revolted against the king, Retz attached himself to the Court party.

On 21 Sept., 1651, Louis XIV informed him that Innocent X had made him cardinal. From that time Retz promised fidelity to the royal family, and kept his promise, still continuing however in his opposition to Mazarin. Mazarin, wishing to exile him from Court, nominated him as "Director of French Affairs at Rome". This Retz refused, and, according to an

expression of Bossuet, "continued to threaten with severe and intrepid mien the victorious favourite". At the instigation of Mazarin, Louis XIV (16 Dec., 1652) signed an order of arrest against Retz. The latter surrendered himself, and was imprisoned at Vincennes. His uncle having died on 21 March, 1654, Retz, though a prisoner, took possession of the Archiepiscopal See of Paris by power of attorney. He soon resigned it in exchange for some abbey, and was transferred to the Château of Nantes, pending the acceptance by Innocent X of his abdication. He escaped, sailed for Spain, then went to Rome, where Innocent X wished him to retain the Archbishopric of Paris. A fugitive in a strange land, he then remained as archbishop at Rome, whence he directed the clergy of Paris, in spite of Mazarin, by a number of letters which Mazarin caused to be burned successively by the public executioner. He played a decisive rôle in the conclave which elected Alexander VII in 1655. His influence at Rome opposed that of Lionne, the ambassador of France. Seized by the spirit of political intrigues, we find him from 1658 to 1661 travelling in Germany, and Holland, and interesting himself in the restoration of the Stuarts. The contest between Retz and Mazarin ended only with the death of the cardinal; and as Louis XIV, even after Mazarin's death, did not wish Retz to return to Paris as archbishop, Retz finally resigned his see in 1662, receiving as compensation the Abbey of St. Denis, whose revenue of 120,000 livres was double that of the archbishopric. He established himself at the Château of Commercy.

More than once he played an active part in the quarrels between Louis XIV and Rome. It was he who, during the conflict between Louis XIV and Alexander VII regarding the reservation of the Host, advised Louis XIV to seize Avignon. In 1665 and 1666 he was connected with the difficulties resulting from the Bulls of Alexander VII against two decisions of the Sorbonne which were directed against two infallibilist publications. He tried in vain to induce the pope to declare that anti-infallibilist teachings were not heretical, but he succeeded in preventing Alexander VII from launching an excommunication against the Parlement which had joined forces with the Sorbonne; then he obtained a condemnation by the Index of one of the two publications condemned by the Sorbonne, and he interpreted this Act as a sort of indirect disavowal of the Bulls which had been directed against the Sorbonne. In his memoir on the Sacred College written in Sept., 1666, he contended that the Universal Church, in its conclaves, should be represented by cardinals chosen from all the countries of Christendom. This memoir and the dispatches written to Louis XIV and the minister Lionne are masterpieces of diplomatic language. He took a prominent part in the conclaves which elected Clement IX and Clement X, and even obtained eight votes in the conclave of 1676 which elected Innocent XI. He died three years later during a sojourn in

FRANÇOIS-PAUL DE RETZ

Paris. His memoirs, which he began to write in 1671, were published for the first time in 1717; several English translations were made in 1723, 1764, and 1774. His language is admirable for its charm and suppleness; for the profoundness of his political views, and the conciseness of his moral ideas he has been compared to Tacitus. The craving for intrigue and adventure formed the basis of his character. A man of remarkable parts, he was above all a church politician rather than a churchman.

GEORGES GOYAU.

Reuchlin (Grecized, CAPNION), JOHANNES, celebrated German humanist, b. at Pforzheim, Baden, 22 February, 1455; d. at Liebenzell, 30 June, 1522. He studied at Freiburg, Paris, and Basle, where he won his baccalaureate in 1475, his degree of master in 1477,

JOHANNES REUCHLIN

and later taught Greek and Latin; in 1479 he became bachelor of jurisprudence at Orléans, and licentiate of law at Poitiers in 1481. During two trips to Italy (1482 and 1490) he became acquainted with the Platonic Academy at Florence and the chief Italian philologists, he himself exciting wonder through his great philological knowledge. In the interval between these journeys he became counsel of Count Eberhard of Württemberg, assessor

in the high court and doctor of jurisprudence, meanwhile applying himself zealously to the study of Hebrew. On the death of his patron Eberhard, he fled to Heidelberg through fear of his successor, the malevolent Count Eberhard VI, where he became counsel to the elector. In 1498 he paid his third visit to Rome, and perfected his Hebrew by intercourse with some learned Jews. In Heidelberg he wrote his two witty and successful Latin comedies, "Sergius" and "Henno". On Eberhard's deposition he returned to Stuttgart, and became imperial judge of the Swabian Confederation (1502-12), private *littérateur*, professor of Greek and Hebrew at Ingoldstadt (1520-1), and professor at Tübingen (1521-2). The chief service of Reuchlin was his introduction into Germany of the study of Hebrew. His "De rudimentis hebraicis" (1506), containing both lexicon and grammar, was epoch-making. In 1512 he published as a manual for beginners an edition of the Hebrew text of the Penitential Psalms with a literal Latin translation. In his "De accentibus et orthographia linguæ hebraicæ" (1518), he treats in detail the word-accent, and more briefly the rhetorical accent and musical emphasis. Less important are his cabalistic writings ("De verbo mirifico", 1494; "De arte cabalistica", 1517), in which he becomes lost in the abstruse problems of mysterious names and figures. Meanwhile his unfortunate quarrel with Johann Pfefferkorn and the Cologne Dominicans concerning the destruction of the Talmudic books had begun. (For a discussion of this, see HUMANISM.) Throughout the Reformation, Reuchlin remained faithful to the Church and sought to alienate his grandnephew Melancthon from Luther.

KLEMENS LÖFFLER.

Reumont, ALFRED VON, statesman and historian, b. at Aachen, 15 August, 1808; d. there, 27 April, 1887. After finishing his course at the *gymnasium*, he took up in obedience to the wishes of his father rather than to his own inclination, the study of medicine at Bonn and Heidelberg. The death of his father in 1828 interrupted his studies, whereupon he became first private tutor at Florence, and within the course of a year, private secretary of the Prussian ambassador in that city. Meanwhile he attended lectures, and in 1833 graduated Doctor of Philosophy at Erlangen. He was subsequently engaged in the Foreign Office at Berlin (1835-6), as secretary of the legation at Florence and Rome (1836-43), again in the Foreign Office (1843-7), where he simultaneously acted as private secretary to King Frederick William IV. This monarch always reposed great confidence in Reumont, and in 1846 ennobled him. In 1847 he became counsel of the Prussian legation at Rome, where he remained alone after the flight of the pope. In 1851 he was appointed ambassador to Tuscany, but, on the annexation of this country, was placed on half pay, in consequence of an unwillingness to appoint a Catholic to the post previously intended for him: that of ambassador to the pope. Henceforth he devoted himself to his literary studies—at first in Rome, then in his native Aachen, from 1868 in Bonn, whence he returned to Aachen in 1878. In spite of severe bodily sufferings he always maintained his relations and a lively personal and epistolary intercourse with prominent personages of Germany and Italy, e. g. Hermann von Thile, his intimate friend and former colleague, Marchese Gino Capponi, the illustrious literary historian of Italy, Leopold von Ranke, the great historical investigator whom he had attacked in 1830, and several members of the Prussian royal house, especially Queen Elizabeth and Emperor William I. He was a prolific author, and in almost all his works takes as his special theme the portrayal of the literary life of Italy, the communication to German readers of a deeper understanding of Italian art and history, seeking thus to prepare the way for an intellectual union between Germany and Italy.

Among his many works dealing with Italy we must mention: "Andrea del Sarto" (Leipzig, 1835); "Reiseschilderungen u. Umriss aus südlichen Gegenden" (Stuttgart, 1835); "Italia" (2 vols., Berlin, 1838-40); "Römische Briefe von einem Florentiner" (4 vols., Leipzig, 1840-44); "Tavole cronologiche e sincrone della storia fiorentina" (Florence, 1841), supplementary volume (1875); "Ganganelli, Papst Clemens XIV. Seine Briefe u. seine Zeit" (2 vols., Berlin, 1851; tr. London, 1854). In his "Beiträge zur italienischen Geschichte" (6 vols., Berlin, 1853-7) he treats of "Galilei u. Rom", "Francesco Burlemacchi", "Gaeta", "Recollections of the year 1849", "The last days of the Order of Malta", and finally "The Queen of Etruria's attempted flight from Nizza in 1811". His "Jugend Katerinas de Medici" is brilliantly written (Berlin, 1854; Italian tr. Florence, 1858; French, Paris, 1864). Among his greatest works must be reckoned: "Geschichte der Stadt Rom" (3 vols., Berlin, 1867-70); "Lorenzo de Medici il Magnifico" (2 vols., Leipzig, 1874; 2nd ed., 1883); "Geschichte Toscanas seit dem Ende des florentinischen Freistaates" (2 vols., Gotha, 1867-77); "Gino Capponi. Ein Zeit u. Lebensbild" (Gotha, 1880); "Vittoria Colonna. Leben, Dichten, Glauben im 16. Jahrhundert" (Freiburg, 1881; Italian tr., Turin, 1883). As the fruit of his connexions with the royal house appeared: "Zeitgenossen. Biographien und Charakteristiken"

(Berlin, 1862), of which the second volume is devoted to Frederick William IV; "Biographische Denkblätter nach persönlichen Erinnerungen" (Leipzig, 1878); "Aus König Friedrich Wilhelms IV. gesunden u. kranken Tagen" (Leipzig, 1885). To his Rhenish homeland were devoted the "Aachener Liederchronik" (Aachen, 1873) and "Die rheinische Flora" (Aachen, 1881).

Consult the biographical sketch compiled by HÜFFER from Reumont's diaries in *Annalen des historischen Vereins für den Niederrhein*, lxxvii (Cologne, 1904).

PATRICIUS SCHLAGER.

Réunion, DIOCESE OF. See SAINT DENIS.

Reunion of Christendom. See UNION OF CHRISTENDOM.

Reusens, EDMOND, archæologist and historian, b. at Wijneghem (Antwerp), 25 April, 1831; d. at Louvain, 24 Dec., 1903. Sent to the University of Louvain immediately after his ordination to the priesthood (1854), he soon became head librarian of the university (1859-1896). He collaborated with his rector, Mgr de Ram, in his works on the religious history of Belgium, and in 1864 they founded the review, "Analectes pour servir à l'histoire ecclésiastique de la Belgique", which Reusens continued to direct until his death. With the same teacher, he became interested in the history of the University of Louvain, to which he devoted almost exclusively the last years of his life. Through his historical studies he acquired a knowledge of palæography and diplomacy and became professor of a course in these branches (1881-1903) which was the first of its kind in Belgium. In 1900 he was appointed a member of the Royal Commission of History (Brussels). After teaching theology for two years he had charge of a new course in Christian archæology from 1864-1900. In this department he soon acquired great distinction, as is evidenced by the success of his manual, his appointment (1884) to the Royal Commission of Monuments (Brussels), his participation in the exposition of ancient art, and his share in the renovation of religious art in Belgium. His principal works are: "Eléments d'archéologie chrétienne" (Louvain, 1871-5); "Eléments de paléographie" (Louvain, 1899); "Documents relatifs à l'histoire de l'université de Louvain" (Louvain, 1881-1903).

Annuaire de l'université catholique de Louvain (1905) pp. xv-xxiii; *Université catholique de Louvain*, bibliography and supplement, I, II, III (Louvain, 1900, 1902, 1904, 1906).

R. MAERE.

Reuss, name of the two smallest states of the German Confederation, which lie almost in the centre of Germany, east of Thuringia, on the western boundaries of the Kingdom of Saxony. Their united area is 440 sq. miles. Reuss alterer Linie, or Reuss-Greiz, comprises 122 sq. miles and in 1905 its population was 70,603, of whom 68,549 were Lutherans, 1205 Catholics, and 54 Jews. Reuss jüngerer Linie, or Reuss-Schleiz, contains 318 sq. miles, and had 144,584 inhabitants in 1905, of whom 140,640 were Lutherans, 2806 Catholics, and 290 Jews. The present Principality of Reuss and the neighbouring tracts of land were inhabited in early mediæval times by Slavonian races who were civilized and converted to Christianity by the German Emperor Otto I (936-73). In church matters the region was under the Diocese of Zeitz (founded in 968), which became a suffragan of Magdeburg. On account of the frequent inroads of the Slavs, the residence of the Bishop of Zeitz was removed to Naumburg in 1028, after which the see was called Naumburg-Zeitz. Upon its subjection to German authority, the whole province was allotted to the Margraviate of Zeitz. As early as the year 1000, however, Emperor Otto III permitted the entire part lying on the eastern boundary of Thuringia to be administered by imperial *vogts*, or bailiffs (*advocati imperii*), whence this

territory received the name of Vogtland (*Terra advocatorum*), a designation that has remained to this day a geographical summary for Reuss, especially that part on the Saxon borders. The position of *vogt* soon became hereditary. The princes of Reuss are descended from the *vogts* of Weida. Erkenbert I (1122) is proved by documentary evidence to have been their ancestor. His successors acquired almost the whole Vogtland by feuds or marriage settlement, although in the fourteenth and fifteenth centuries they lost the greater part of their possessions, most of which fell to Saxe-Meissen (the present Kingdom of Saxony). In 1244 the *vogt* Henry IV entered a German monastery. His sons divided his possessions, their seats being respectively at Weide (extinct in 1535), Gera (extinct in 1550), and Plauen. The Plauen branch was subdivided into an elder line that died out in 1572, and a younger line. Henry, the founder of the Plauen line (d. about 1300), on account of a visit to Russia received the surname of "der Reusse" (Ruthenus), whence the name passed to the country; on account of the close relations of that country with the neighbouring Saxon states, Lutheranism speedily gained a foothold in Reuss.

The rulers joined the Smalkaldic League against the German emperor, and forfeited their possessions, but afterwards recovered them. Henry XXII is notable among the more modern princes of this house for his enmity to Prussia, which he opposed in the Austro-Prussian War of 1866, when the Prussian troops occupied his domain. Henry joined the North German Confederation and the new German Empire (1871). He alone of all the confederate princes remained until his death (1902) an implacable enemy of Prince Bismarck and of the conditions created in Germany by the foundation of the empire. His son, Henry XXIV (born in 1878), being incapable of ruling, the regency passed to the princes of the younger line of Reuss. After the death of Henry XXIV, the last scion of the younger line, the Principalities of Reuss-Greiz and Reuss-Schleitz will be united. Since the end of the twelfth century all the male members of the princely house have borne the name of Henry in honour of the Emperor Henry VI of Germany (1190-7), to whom they were under great obligations. The Reformation entirely destroyed Catholicism in Reuss. The few Catholic settlers were for a long time deprived of regular religious ministrations. A Brief obtained from the papal nuncio in Vienna, 15 March, 1822, by the efforts of the Catholic Princess Gasparina of Rohan-Rochefort, wife of Henry XIX, placed the Catholics in the domains of the elder line under the jurisdiction of the Archbishop of Prague; and through a papal Brief of 18 March, 1874, they passed under that of the Vicar Apostolic of Saxony. The parish of Greiz has existed since 1897 and the statutes of the Catholic congregation there, dated 12 April, 1897, received government sanction on 7 June of the same year, together with the grant of a legal status under the civil law. Priests from the neighbouring countries (Bavaria and Saxony) are not prevented from exercising their spiritual functions.

Excluding Greiz and Frauenreuth, permission of the authorities to hold religious services is required in the towns and villages of the principality. The Catholics of Reuss-Schleiz were placed under the jurisdiction of the bishops of Paderborn by a Decree of the papal "Congregatio de propaganda fide" of 27 June, 1869, which, however, was not officially recognized, and, when in 1883 the Catholics of the city of Gera desired a mission with permanent priests, the Government made its consent dependent upon the transfer of jurisdiction to the Vicar Apostolic of Saxony. This was effected by a Decree of Propaganda dated 7 October, 1889. By a princely rescript of 14 June, 1894, the status of the Catholic

population of Gera was recognized from 1 June. They then received the rights and privileges of citizens under the civil law. The rector of Gera is not debarred from exercising his sacerdotal functions in places belonging to his parish, nor are priests from the neighbouring countries (Saxony and Saxe Weimar). The successful progress of Catholicism is retarded in both principalities by lack of means, since neither the State nor the people contribute anything to the Catholic Church and a church tax is not permitted. The Evangelical-Lutheran Church is supported by state and communal contributions, Catholics being assessed equally with Protestants for this purpose. The Government does not interfere with its subjects in regard to the change of their religion, establishment of orders, mixed marriages, and the education of the children of such marriages in either principality. For the most part the principles obtaining in the Kingdom of Saxony prevail in Reuss. Nominally, enjoyment of the privileges of citizenship is independent of creed, but in Reuss-Greiz religious exercises can take place only by express permission. In both principalities no previous

permission is required for processions on religious festivals, provided they are carried out in the customary manner. Catholic processions are not allowed. The public free schools are Evangelical-Lutheran and maintained by political or school districts. Catholics are obliged to contribute proportionally as much as Protestants, although religious instruction in their Faith is never given. A private Catholic free school (about 200 children) has existed in Gera since 1903, to which neither State nor city contributes. In Greiz the Catholics have succeeded in obtaining a school of their own since 1908, with about 130 children who are of compulsory school age. The grant of an appropriation for a high school is still pending (1911).
